

System Safety Standards for Freight and Other Non-Passenger Trains and Equipment; End-of-Train Devices). The relevant Docket Number is FRA–2015–0036.

Specifically, UPRR requests to continue operating extended haul trains for distances of up to 1,680 miles, beyond the limit of 1,500 miles stated in 49 CFR 232.213, *Extended haul trains*. In support of its request, UPRR states that it reviews with FRA “the list of trains associated with this waiver at a frequency of no less than once per quarter” and “adjustments are made accordingly.” UPRR further explains that “over a 56-month period, the incident rate has been no more than .055%[, which were] four events comprised of wheelset, axle, and journal bearing defects.” UPRR also notes that for the eight-year history of this waiver, UPRR “has not identified any adverse effect on the safety of operations” and that the waiver extension would “continue to support personnel safety, reduce critical resource idle time, and have a positive impact on the environment.”
