FEDERAL COMMUNICATIONS COMMISSION**47 CFR Parts 73 and 74**

[GN Docket No. 16–142; FCC 23–53; FR ID 184482]

Authorizing Permissive Use of the “Next Generation” Broadcast Television Standard**AGENCY:** Federal Communications Commission.**ACTION:** Final rule; announcement of effective date.

SUMMARY: In this document, the Federal Communications Commission (Commission) announces that the Office of Management and Budget (OMB) has approved, for a period of three years, the information collection requirements associated with the Commission’s rules in a Report and Order on authorizing permissive use of the “Next Generation” Broadcast Television Standard. This document is consistent with the Commission’s Report and Order, which stated that the Commission would publish a document in the **Federal Register** announcing the effective date of those rules.

DATES: The amendments to 47 CFR 73.3801(f) and (i), 73.6029(f) and (i), and 74.782(g) and (j) are published at 88 FR 45347, July 17, 2023 are effective as of November 16, 2023.

FOR FURTHER INFORMATION CONTACT: Evan Baranoff, Policy Division, Media Bureau, at 202–418–7142, or via email at evan.baranoff@fcc.gov.

SUPPLEMENTARY INFORMATION: This document announces that, on November 7, 2023, OMB approved the information collection requirements contained in §§ 73.3801, 73.6029, and 74.782 of the Commission’s rules. The OMB Control Number is 3060–1254. The Commission publishes this document as an announcement of the effective date of these rules. If you have any comments on the burden estimates listed below, or how the Commission can improve the collections and reduce any burdens caused thereby, please contact Cathy Williams, Federal Communications Commission, Room 3–317, 45 L Street NE, Washington, DC 20554. Please include the OMB Control Number, 3060–1254, in your correspondence. The Commission will also accept your comments via email at PRA@fcc.gov.

Total Annual Burden: 3,802 hours.

Total Annual Cost: \$147,000.

Needs and Uses: On June 23, 2023, the Commission released a Third Report and Order (Third R&O), FCC 23–53, in GN Docket No. 16–142. In this Third R&O, the Commission makes changes to its Next Gen TV rules designed to preserve over-the-air (OTA) television viewers’ access to multicast streams during television broadcasters’ transition to ATSC 3.0.

Multicast Licensing. The Commission generally adopts its proposal in the Next Gen TV Multicast Licensing FNPRM to allow a Next Gen TV station to seek modification of its license to include certain of its non-primary video programming streams (multicast streams) that are aired on “host” stations during a transitional period. In adopting this proposal, the Commission follows the same licensing framework, and to a large extent the same regulatory regime, established for the simulcast of primary video programming streams on “host” station facilities.

Form 2100. The Commission adopts the Next Gen TV Multicast Licensing FNPRM’s proposal to modify its Next Gen TV license application form (FCC Form 2100) to accommodate multicast licensing by collecting information similar to that already collected in the interim STA process. The Commission requires certain additional information as an addendum to Form 2100 if stations seek to include hosted multicast streams within their license. It also clarifies and slightly modifies the requirements of its rules governing Form 2100 to reflect the possibility of reliance on multiple hosts.

Specifically, applicants must prepare an Exhibit identifying each proposed hosted stream and provide the following information about each stream, as broadcast:

- the host station;
- channel number (RF and virtual);
- network affiliation (or type of programming if unaffiliated);
- resolution (e.g., 1080i, 720p, 480p, or 480i);

- the predicted percentage of population within the noise limited service contour served by the station’s original ATSC 1.0 signal that will be served by the host, with a contour overlay map identifying areas of service loss and, in the case of 1.0 streams, coverage of the originating station’s community of license; and

- whether the stream will be simulcast, and if so, the “paired” stream in the other service.

Finally, the Exhibit must either state that the applicant will be airing the same programming that it is airing in 1.0

at the time of the application or identify the station that has aired or is airing the same or a similar programming lineup at the same resolutions on the same type of facility (individual or shared), as well as that station's lineup (with resolutions). This Exhibit must be placed on the applicant's public website or in the applicant's online public inspection file if the station does not have a dedicated website, with a link provided in the application. This information is consistent both with that currently collected in STA applications and the approach identified in the Next Gen TV *Multicast Licensing FNPRM*. As with broadcast licenses generally, modifications to this license application or its accompanying exhibit (with respect to the primary or multicast streams) must be preceded by the filing and approval of a new application. Changes to the affiliation or content of a stream, or the elimination of a stream, however, do not implicate the concerns raised in this proceeding if they would not result in the use of additional capacity and if information about the change is easily available to the public. Therefore, in order to streamline this process for both broadcasters and the Commission, such changes may be implemented without prior Commission approval. They need only be reflected in a timely update to the Exhibit that the applicant makes available on its public website or in the applicant's online public inspection file and in an email notice to the Chief of the Media Bureau's Video Division. The new information collection requirements are contained in §§ 73.3801(f) and (i), 73.6029(f) and (i), and 74.782(g) and (j) of the Commission's rules.

Federal Communications Commission.

Secretary.
