A. Purpose

GSA requires organizations desiring to do business with GSA for various supplies and services to provide procurement-related information through solicitations issued in accordance with the Federal Acquisition Regulation (FAR) Part 12, 14, 15 and 16 procedures. Using solicitation methods such as Requests for Proposals (RFP), Requests for Information (RFI), and Broad Agency Announcements (BAA), GSA requests information from prospective offerors such as pricing information, delivery schedule compliance, and evidence that the offeror has the resources (both human and financial) to accomplish requirements. Much of the solicitation information collected is covered by FAR clauses and the separate information collection approvals associated with them. Other GSA solicitation requirements call for more detailed or technical information to be provided, such as project management or sustainability plans, and drive the need for this information collection.

Responses per Respondent: 1.

Total Responses: 338,465.

Hours per Response: 2.

Total Burden Hours: 676,930.

SUPPLEMENTARY INFORMATION:

A. OMB Control Number, Title, and any Associated Form(s)

OMB Control No. 9000-0153, Federal Acquisition Regulation Part 11 Requirements.

B. Need and Uses

DoD, GSA, and NASA are combining OMB Control Nos. by FAR part. This consolidation is expected to improve industry’s ability to easily and efficiently identify burdens associated with a given FAR part. The review of the information collections by FAR part allows improved oversight to ensure there is no redundant or unaccounted for burden placed on industry. Lastly, combining information collections in a given FAR part is also expected to reduce the administrative burden associated with processing multiple information collections.

This justification supports the extension of OMB Control No. 9000-0153 and combines it with the previously approved information collections under OMB Control No. 9000-0043, with the new title “Federal Acquisition Regulation Part 11 Requirements”. Upon approval of this consolidated information collection, OMB Control No. 9000-0043 will be discontinued. The burden requirements previously approved under the discontinued number will be covered under OMB Control No. 9000-0153.

This clearance covers the information that offerors or contractors must submit to comply with the following FAR requirements:

- FAR 52.211-7, Alternatives to Government-Unique Standards. This solicitation provision permits offerors to propose alternatives to Government-unique standards in response to Government solicitations. When an offeror proposes a voluntary consensus standard as an alternative to a Government-unique standard included in a solicitation, the offeror must furnish data and/or information regarding the alternative in sufficient detail for the Government to determine if it meets the Government’s requirements. This provision is prescribed in FAR 11.107 for use when a solicitation uses Government-unique standards and the agency uses the transaction-based reporting method to report its use of voluntary consensus standards to the National Institutes of Standards and Technology (NIST). This provision is optional for use if an agency uses the categorical method to report to NIST. In accordance with OMB Circular A-119, Federal Participation in the Development and Use of Voluntary Consensus Standards and in Conformity
