

amendment request for disposal of limited concentrations of short-lived radioactive tracers into offshore waters of the OCS in the GOM. In order for ProTechnics to continue supporting oil and gas drilling operations in the OCS of the GOM, it would need a license amendment to authorize retention of the tracer materials on the drilling rigs or support vessels. The retained well completion fluids containing the tracer materials would need to be transported to shore for transfer to an authorized disposal facility. The NRC staff considers that transfer and movement of the well completion fluids containing tracer material would present an increased likelihood of accidents and an increased potential for occupational and public radiological doses in comparison to the proposed action.

#### Agencies and Person Consulted

The NRC staff consulted with National Oceanic and Atmospheric Administration (NOAA) Fisheries regarding its determination that the proposed action is not likely to adversely affect listed species or habitats. By email dated November 17, 2023, NOAA Fisheries concurred with the NRC staff's determination. Therefore, no further consultation is required under Section 7 of the Endangered Species Act of 1973, as amended. Further, the NRC staff determined that the proposed action is not the type of activity that has the potential to cause effects on historic properties. Therefore, consistent with 36 CFR 800.3(a)(1), no consultation is required under Section 106 of the National Historic Preservation Act.
