SUPPLEMENTARY INFORMATION: IMLS is especially interested in comments that help the agency to:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques, or other forms of information technology, *e.g.*, permitting electronic submissions of responses.

I. Background

IMLS is the primary source of Federal support for the Nation's libraries and museums. We advance, support, and empower America's museums, libraries, and related organizations through grant

making, research, and policy development. Our vision is a nation where museums and libraries work together to transform the lives of individuals and communities. To learn more, visit www.imls.gov.

II. Current Actions

This Notice is to solicit comments on a program evaluation of the IMLS Museums for All Initiative, which began in 2014. A current IMLS cooperative agreement includes an evaluation of the Museums for All initiative, a program through which participating institutions offer free or reduced-price admission to families facing financial need. The goal is to assess the impact of the Museums for All initiative on participating institutions. As part of this evaluation effort, a questionnaire, which is the subject of this Notice, will be undertaken to solicit information from participating institutions in Museums for All about the initiative's implementation, benefits, and areas for improvement. A small number of participating institution staff will be interviewed virtually or in person as part of case study research. These information collections will be developed based on what is needed to undertake the evaluation. The information IMLS collects will build on, but not duplicate existing or ongoing information collections.

FOR FURTHER INFORMATION CONTACT:

Matthew Hiser, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington,

DC 20555-0001; telephone: 301-415-2454; email: Matthew.Hiser@nrc.gov.

SUPPLEMENTARY INFORMATION:**I. Introduction**

Under section 2.106 of title 10 of the *Code of Federal Regulations* (10 CFR), the NRC is providing notice of the issuance of Construction Permit No. CPTR-6, to Kairos and issuance of the Record of Decision (ROD) under 10 CFR 51.102. The construction permit, which is immediately effective, authorizes Kairos to construct a test reactor facility in Oak Ridge, Tennessee, as described in Kairos's construction permit application. With respect to the construction permit application filed by Kairos, the NRC finds that the applicable standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations have been met. The NRC finds that any required notifications to other agencies or bodies have been duly made and that, among other things, there is reasonable assurance that the activities authorized by the permit will be conducted in compliance with the rules and regulations of the Commission, that safety questions will be satisfactorily resolved by the completion of construction, and that, taking into consideration siting criteria, the proposed facility can be constructed and operated at the proposed location without undue risk to public health and safety, subject to the conditions listed in the construction permit. Furthermore, the NRC finds that the licensee is technically and financially qualified to engage in the activities authorized, and that issuance of the license will not be inimical to the common defense and security or to the health and safety of the public. Finally, the NRC finds that the findings required by subpart A of 10 CFR part 51 have been made.

Accordingly, the immediately effective construction permit was issued on December 14, 2023.

II. Further Information

The NRC prepared a Safety Evaluation (SE) and Final Environmental Impact Statement (FEIS) that document the NRC's evaluation of Kairos's construction permit application and its findings. The Commission also issued its Memorandum and Order documenting its final decision on the mandatory hearing held on October 19, 2023, which serves as the ROD in this proceeding. The NRC also prepared a document summarizing the ROD that incorporates by reference materials contained in the FEIS. In accordance with 10 CFR 2.390 of the NRC's
