TABLE 1 TO PARAGRAPH (d)(1)(ii)(D)—SHOREBASED TRAWL ALLOCATIONS FOR 2023 AND 2024

IFQ species	Area	2023 Shorebased trawl allocation (mt)	2024 Shorebased trawl allocation (mt)
YELLOWEYE ROCKFISH	Coastwide	4.42	3.41
Arrowtooth flounder	Coastwide	15,640.17	11,408.87
Bocaccio	S of 40°10' N lat	700.33	694.87
Canary rockfish	Coastwide	842.50	851.42
Chilipepper	S of 40°10' N lat	1,563.80	1517.60
Cowcod	S of 40°10' N lat	24.80	24.42
Darkblotched rockfish	Coastwide	646.78	644.34
Dover sole	Coastwide	45,972.75	45,972.75
English sole	Coastwide	8,320.56	8,265.46
Lingcod	N of 40°10' N lat	1,829.27	1,593.47
Lingcod	S of 40°10' N lat	284.20	282.60
Longspine thornyhead	N of 34°27' N lat	2,129.23	2,002.88
Pacific cod	Coastwide	1,039.30	1,039.30
Pacific halibut (IBQ) ^a	N of 40°10' N lat	TBD	TBD
Pacific ocean perch	N of 40°10' N lat	2,956.14	2,832.64
Pacific whiting ^b	Coastwide	159,681.38	TBD
Petrale sole	Coastwide	3,063.76	2,863.76
Sablefish	N of 36° N lat	3,893.50	3,535.91
Sablefish	S of 36° N lat	970.00	909.55
Shortspine thornyhead	N of 34°27' N lat	1,146.67	1,117.22
Shortspine thornyhead	S of 34°27' N lat	50	50
Splintnose rockfish	S of 40°10' N lat	1,494.70	1,457.60
Starry flounder	Coastwide	171.86	171.86
Widow rockfish	Coastwide	11,509.68	10,367.68
Yellowtail rockfish	N of 40°10' N lat	3,761.84	3,431.69
Other Flatfish complex	Coastwide	4,142.09	4,152.89
Shelf Rockfish complex	N of 40°10' N lat	694.70	691.65
Shelf Rockfish complex	S of 40°10' N lat	163.02	162.43
Slope Rockfish complex	N of 40°10' N lat	894.43	874.99
Slope Rockfish complex	S of 40°10' N lat	417.1	414.58

^a Pacific halibut IBQ is set according to 50 CFR 660.55(m).

^b Managed through an international process. This allocation will be updated when announced.

* * * * *

■ 5. In § 660.231, revise paragraph (b)(3)(i) to read as follows:

§ 660.231 Limited entry fixed gear sablefish primary fishery.

* * * * *

(b) * * *
(3) * * *

(i) A vessel participating in the primary season will be constrained by the sablefish cumulative limit associated with each of the permits registered for use with that vessel. During the primary season, each vessel authorized to fish in that season under paragraph (a) of this section may take, retain, possess, and land sablefish, up to the cumulative limits for each of the permits registered for use with that vessel (*i.e.*, stacked permits). If multiple limited entry permits with sablefish endorsements are registered for use with a single vessel, that vessel may land up to the total of all cumulative limits announced in this paragraph for the tiers for those permits, except as limited by paragraph (b)(3)(ii) of this section.

Up to 3 permits may be registered for use with a single vessel during the primary season; thus, a single vessel may not take and retain, possess or land more than 3 primary season sablefish cumulative limits in any one year. A vessel registered for use with multiple limited entry permits is subject to per vessel limits for species other than sablefish, and to per vessel limits when participating in the daily trip limit fishery for sablefish under § 660.232. In 2023, the following annual limits are in effect: Tier 1 at 72,904 lb (33,069 kg), Tier 2 at 33,138 lb (15,031 kg), and Tier 3 at 18,936 lb (8,589 kg). In 2024 and beyond, the following annual limits are in effect: Tier 1 at 66,377lb (30,108 kg), Tier 2 at 30,171 lb (13,685 kg), and Tier 3 at 17,241lb (7,820 kg).

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 679

[Docket No. 230224–0053; RTID 0648–XD567]

Fisheries of the Exclusive Economic Zone Off Alaska; Reallocation of Pacific Cod in the Central Regulatory Area of the Gulf of Alaska

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; reallocation.

SUMMARY: NMFS is reallocating the projected unused amount of Pacific cod from catcher vessels using trawl gear to vessels using jig gear, catcher/processors using trawl gear, and catcher vessels greater than or equal to 50 feet (15.2 meters (m)) length overall using hook-and-line gear in the Central Regulatory

Area of the Gulf of Alaska (GOA). This action is necessary to allow the 2023 total allowable catch (TAC) of Pacific cod to be harvested.

DATES: Effective December 21, 2023, through 2400 hours, Alaska local time (A.l.t.), December 31, 2023.

FOR FURTHER INFORMATION CONTACT: Obren Davis, 907-586-7228.

SUPPLEMENTARY INFORMATION: NMFS manages the groundfish fishery in the GOA according to the Fishery Management Plan for Groundfish of the Gulf of Alaska (FMP) prepared by the North Pacific Fishery Management Council under authority of the Magnuson-Stevens Fishery Conservation and Management Act. Regulations governing fishing by U.S. vessels in accordance with the FMP appear at subpart H of 50 CFR part 600 and 50 CFR part 679.

The 2023 Pacific cod TAC specified for catcher vessels using trawl gear in the Central Regulatory Area of the GOA is 4,579 metric tons (mt), as established by the final 2023 and 2024 harvest specifications for groundfish in the GOA (88 FR 13238, March 2, 2023).

The 2023 Pacific cod TAC specified for vessels using jig gear in the Central Regulatory Area of the GOA is 111 mt, as established by the final 2023 and 2024 harvest specifications for groundfish in the GOA (88 FR 13238, March 2, 2023).

The 2023 Pacific cod TAC specified for catcher/processors using trawl gear in the Central Regulatory Area of the GOA is 462 mt, as established by the

final 2023 and 2024 harvest specifications for groundfish in the GOA (88 FR 13238, March 2, 2023).

The 2023 Pacific cod TAC specified for catcher vessels greater than or equal to 50 feet (15.2 m) length overall using hook-and-line gear in the Central Regulatory Area of the GOA is 738 mt, as established by the final 2023 and 2024 harvest specifications for groundfish in the GOA (88 FR 13238, March 2, 2023).

The Administrator, Alaska Region, NMFS, (Regional Administrator) has determined that catcher vessels using trawl gear will not be able to harvest 395 mt of the 2023 Pacific cod TAC allocated to those vessels under § 679.20(a)(12)(i)(B)(4).

Therefore, in accordance with § 679.20(a)(12)(ii)(B), NMFS apportions 395 mt of Pacific cod from catcher vessels using trawl gear to the annual amounts specified for vessels using jig gear, catcher/processors using trawl gear, and catcher vessels greater than or equal to 50 feet (15.2 m) length overall using hook-and-line gear.

The harvest specifications for 2023 Pacific cod included in the final 2023 and 2024 harvest specifications for groundfish in the Central Regulatory Area of the GOA (88 FR 13238, March 2, 2023) is revised as follows: 4,184 mt to catcher vessels using trawl gear, 246 mt to vessels using jig gear, 597 mt to catcher/processors using trawl gear, and 863 mt to catcher vessels greater than or equal to 50 feet (15.2 m) length overall using hook-and-line gear.

Classification

NMFS issues this action pursuant to section 305(d) of the Magnuson-Stevens Act. This action is required by 50 CFR part 679, which was issued pursuant to section 304(b), and is exempt from review under Executive Order 12866.

Pursuant to 5 U.S.C. 553(b)(B), there is good cause to waive prior notice and an opportunity for public comment on this action, as notice and comment would be impracticable and contrary to the public interest. This requirement is impracticable and contrary to the public interest as it would prevent NMFS from responding to the most recent fisheries data in a timely fashion and would allow for harvests that exceed the originally specified apportionment of the Pacific cod TAC. NMFS was unable to publish a notice providing time for public comment because the most recent, relevant data only became available as of December 20, 2023.

The Assistant Administrator for Fisheries, NOAA also finds good cause to waive the 30-day delay in the effective date of this action under 5 U.S.C. 553(d)(3). This finding is based upon the reasons provided above for waiver of prior notice and opportunity for public comment.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: December 20, 2023.

Everett Wayne Baxter,
Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.
