

the event of a catastrophic loss of SFP inventory. The multiple strategies for providing makeup water to the SFP include: using existing plant systems for inventory makeup; an internal strategy between IP2 and IP3 that relies on installed Primary Water Storage Tank, fire water inside the SFP buildings, and fire water using a temporary diesel pump from outside of the SFP buildings; or an external strategy that uses portable pumps to initiate makeup flow into the SFPs through a standpipe and standard fire hoses routed to the SFPs or to a spray nozzle. These strategies will continue to be required as License Condition 2(N), "Mitigation Strategy License Condition" and 2(AC), "Mitigation Strategy License Condition" for Units 2 and 3 respectively. Considering the very low probability of beyond-design-basis accidents affecting the SFP, these diverse strategies provide multiple methods to obtain additional makeup or spray water to the SFP before the onset of any postulated offsite radiological release. Because of the length of time, it would take for the fuel to heat up, there are 10 hours available to respond to any draindown event that might cause such an occurrence by restoring cooling or makeup or providing spray to the IP2 or IP3 SFPs.

For all the reasons stated above, the NRC staff finds that HDI's requested exemptions meet the underlying purpose of all of the standards in 10 CFR 50.47(b), as well as the requirements in 10 CFR 50.47(c)(2), and 10 CFR part 50, appendix E, and satisfies the special circumstances in 10 CFR 50.12(a)(2)(ii) in view of the greatly reduced risk of offsite radiological consequences associated with the permanently shutdown and defueled state of the IPEC facility. The staff further concludes that the exemptions granted by this action will maintain an acceptable level of emergency preparedness at IPEC and provide reasonable assurance that adequate offsite protective measures, if needed, can and will be taken by State and local government agencies using a CEMP approach, in the highly unlikely event of a radiological emergency at the IPEC facility. Since the underlying purposes of the rules, as exempted, would continue to be achieved, even with the elimination of the requirements under 10 CFR part 50 to maintain formal offsite radiological emergency plans and the reduction in the scope of the onsite EP activities at IPEC, the special circumstances required by 10 CFR 50.12(a)(2)(ii) exist.

#### *E. Environmental Considerations*

In accordance with 10 CFR 51.31(a), the Commission has determined that the granting of these exemptions will not have a significant effect on the quality of the human environment, as discussed in the NRC staff's Environmental Assessment and Finding of No Significant Impact published on October 31, 2023 (88 FR 74536).

#### **IV. Conclusions**

Accordingly, the Commission has determined, pursuant to 10 CFR 50.12(a), that HDI's request for exemptions from certain EP requirements in 10 CFR 50.47(b), 10 CFR 50.47(c)(2), and 10 CFR part 50, appendix E, section IV, and as summarized in Enclosure 2 to SECY-22-0102, are authorized by law, will not present an undue risk to the public health and safety, and are consistent with the common defense and security. Also, special circumstances are present. Therefore, the Commission hereby grants HDI exemptions from certain EP requirements of 10 CFR 50.47(b), 10 CFR 50.47(c)(2), and 10 CFR part 50, appendix E, section IV, as discussed and evaluated in detail in the staff's safety evaluation dated November 1, 2023 (ML23067A082). The exemptions are effective upon issuance.
