SUPPLEMENTARY INFORMATION:

On September 7, 2022, EPA Region 10 proposed to reissue the general permit (87 FR 54688). In response to requests from the regulated community, EPA Region 10 extended the end of the public comment period from November 7 to December 22, 2022 (87 FR 66178). On July 18, 2023, EPA Region 10 initiated a second public comment period focused exclusively on four changes made to the General Permit (88 FR 45901). Eligible facilities include Concentrated Aquatic Animal Production (CAAP) facilities, non-CAAP facilities, aquaculture research facilities, and dam fish passage facilities. Currently, there are 32 facilities covered under the existing administratively continued general permit. Existing aquaculture facilities may request authorization to discharge under the general permit by submitting a Notice of Intent (NOI) no more than ninety (90) days following the effective date of the general permit. New facilities that begin operations after the effective date of the general permit must submit a NOI at least 180 days prior to initiation of operations. Upon receipt, EPA will review the NOI to ensure that all permit requirements are met. If determined appropriate by EPA, a discharger will be granted coverage under the general permit upon the date that EPA provides written notification.

Please see the general permit and fact sheet.

Abstract: To meet the goals and objectives that demonstrate the U.S. Environmental Protection Agency

(EPA's) and the Administration's commitment to achieving environmental justice and embedding environmental justice into Agency programs, EPA released the Thriving Communities Grantmaking Program (TCGM) funding opportunity. The Thriving Communities Grantmaking program is a reimagining of the long-standing Environmental Justice (EJ) Small Grants Program specifically designed to address the needs of underserved communities and marginalized groups through the provision of direct funding. Historically, the Agency has managed the EJ Small Grants directly, moving forward EPA plans to award 11+ cooperative agreement(s) to pass-through entities (referred to as Grantmakers) in collaboration with EPA to design and build their own processes to receive and evaluate competitive community project applications. This competitive subawards program called EJ Thriving Communities Subgrants will fund the initial development of community led environmental justice projects. The pass-through model removes the requirement of applying through the federal grants process and decreases the amount of time it takes to award federal funds. With this Information Collection Request (ICR), EPA seeks authorization to collect information to track progress made by the 11+ Grantmakers and their partnerships. Collection of this information enables EPA to assess and manage the TCGM Program, which ensures responsible stewardship of public funds; rigorous evidence-based learning and improvement; and transparent accountability to the American public. This ICR also requests authorization for the Grantmakers to collect input and insights from communities who seek to obtain subawards via the Thriving Communities Subgrant program, as well as stakeholders who have valuable experience and expertise in community engagement and empowerment. These information collections will enable the Grantmakers and their partners to document local priorities, needs, and norms to ensure that they develop useful and relevant outreach efforts and subgrant opportunities regionally and nationwide. Feedback about the accessibility and effectiveness of the subgrant opportunities will enable the Grantmakers to conduct self-assessments of their work and identify best practices and areas for improvement. Furthermore, each Grantmaker will offer specific application standards for a competitive community application for subaward

funding. Lastly, this ICR requests authorization for the Grantmakers to collect information from subrecipients, in order to track progress made in their funded projects.
