SUPPLEMENTARY INFORMATION:

Title; Associated Form; and OMB Number: Women's Reproductive Health Care Provider Survey (WRHCPS); OMB Control Number: 0720-WRHS.

Needs and Uses: Health care provider knowledge, beliefs, and practices may have an impact on active-duty service women's (ADSW) access to contraception and overall reproductive health. The proposed survey is devised to be a sufficiently large and representative sample of the diverse professionals who provide reproductive and contraceptive care to ADSW at health care visits (e.g., readiness visits, pre-deployment, and during deployment). The survey will be designed to capture provider self-reported beliefs, clinical knowledge on reproductive health care (including contraceptive counseling) and prescription of contraception care for and during deployment. Data and analysis from the survey will enable DoD to evaluate, enhance, and where needed, improve reproductive services delivery and educational interventions; provide a strong basis for planning policy and services related to ADSW's reproductive and contraceptive health;

and provide data, programs, and details necessary for replication and peer review. In addition, the proposed one-time survey meets a Congressional mandate and serves as an appropriate follow-up to the WRHS by determining whether identified gaps in contraceptive access are the result of provider knowledge and attitudes. The 116-48 SASC Report for FY2020 required DoD to conduct a survey to better understand provider knowledge and beliefs related to provision of contraceptives to ADSW. The target population of the survey includes uniformed (active component only) and civilian MHS personnel.
