Takes of Marine Mammals Incidental to Specified Activities; Taking Marine Mammals Incidental to the City of Oceanside’s Harbor Fishing Pier and Non-Motorized Vessel Launch Improvement Project in Oceanside, California

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; issuance of an incidental harassment authorization.

SUMMARY: In accordance with the regulations implementing the Marine Mammal Protection Act (MMPA) as amended, notification is hereby given that NMFS has issued an incidental harassment authorization (IHA) to the City of Oceanside to incidentally harass, by Level B harassment only, marine mammals during construction activities associated with harbor fishing pier and non-motorized vessel launch improvement in Oceanside, California. There are no changes from the proposed authorization to the final authorization.

DATES: This authorization is effective from March 1, 2024, through February 28, 2025.

ADDRESSES: Electronic copies of the application and supporting documents, as well as a list of the references cited in this document, may be obtained online at: <https://www.fisheries.noaa.gov/action/incidental-take-authorization-city-oceansides-harbor-fishing-pier-and-non-motorized-vessel>.

FOR FURTHER INFORMATION CONTACT: Alyssa Clevenstine, Office of Protected Resources, NMFS, (301) 427-8401.

SUPPLEMENTARY INFORMATION:

Background

The MMPA prohibits the “take” of marine mammals, with certain exceptions. Sections 101(a)(5)(A) and (D) of the MMPA (16 U.S.C. 1361 *et seq.*) direct the Secretary of Commerce (as delegated to NMFS) to allow, upon request, the incidental, but not intentional, taking of small numbers of marine mammals by U.S. citizens who engage in a specified activity (other than commercial fishing) within a specified geographical region if certain findings are made and either regulations are proposed or, if the taking is limited to harassment, a notice of a proposed IHA is provided to the public for review.

Authorization for incidental takings shall be granted if NMFS finds that the taking will have a negligible impact on the species or stock(s) and will not have an unmitigable adverse impact on the availability of the species or stock(s) for taking for subsistence uses (where relevant). Further, NMFS must prescribe the permissible methods of taking and other “means of effecting the least practicable adverse impact” on the affected species or stocks and their habitat, paying particular attention to rookeries, mating grounds, and areas of similar significance, and on the availability of the species or stocks for taking for certain subsistence uses (referred to in shorthand as “mitigation”); and requirements pertaining to the mitigation, monitoring and reporting of the takings are set forth. The definitions of all applicable MMPA statutory terms cited above are included in the relevant sections below.

Summary of Request

On May 16, 2023, NMFS received a request from the City of Oceanside for an IHA to take marine mammals incidental to construction activities associated with fishing pier and non-

motorized vessel launch improvement in Oceanside Harbor, Oceanside, CA. Following NMFS’ review of the application, the City of Oceanside submitted revised versions on July 18 and October 17, 2023. The application was deemed adequate and complete on November 2, 2023. The City of Oceanside’s request is for take of seven species of marine mammals by Level B harassment only. Neither the City of Oceanside nor NMFS expect serious injury or mortality to result from this activity and, therefore, an IHA is appropriate. There are no changes from the proposed IHA to the final IHA.

Description of Specified Activity

The City of Oceanside plans to remove and replace the existing public fishing pier and non-motorized vessel launch in Oceanside Harbor, Oceanside, CA. The applicant plans to use vibratory extraction to remove four 16-inch octagonal concrete support piles; vibratory driving to install up to 18 18-inch round plastic-coated steel piles to within 0.61–1.52 meters (m; 2–5 feet (ft)) of required depth; and, potentially, impact driving to complete pile installation depending on observed soil resistance. While not expected to be required based on site geology, 18 10-inch steel piles may be used as temporary guide piles to aid in the installation of the larger 18-inch structural piles.

A maximum of 6 non-consecutive days of piling activities will occur during the course of construction (5–6 months) from March 2024 through February 2025 (table 1). All project activities for which take is being requested will be located in Oceanside Harbor, Oceanside, CA.

A detailed description of the planned construction project is provided in the **Federal Register** notice for the proposed IHA (88 FR 83081, November 28, 2023). Since that time, no changes have been made to the planned activities. Therefore, a detailed description is not provided here. Please refer to that **Federal Register** notice for the description of the specified activity.
