

SUMMARY OF ESTIMATED ANNUAL BURDEN—Continued
[OMB No. 3064–0197]

Information collection (obligation to respond)	Type of burden (frequency of response)	Number of respondents	Number of responses per respondent	Time per response (HH:MM)	Annual burden (hours)
Total Annual Burden (Hours)	124

Source: FDIC.

General Description of Collection: The LCR rule implements a quantitative liquidity requirement and contains requirements subject to the PRA. The requirement is designed to promote the short-term resilience of the liquidity risk profile of large and internationally active banking organizations, thereby improving the banking sector’s ability to absorb shocks arising from financial and economic stress, and to further improve the measurement and management of liquidity risk. The LCR rule establishes a quantitative minimum liquidity coverage ratio that requires a company subject to the rule to maintain an amount of high-quality liquid assets (the numerator of the ratio) that is no less than 100 percent of its total net cash outflows over a prospective 30 calendar day period (the denominator of the ratio). There is no change in the methodology or substance of this information collection. This reduction in estimated annual burden (from 994 hours in 2021 to 124 hours currently) is due the reduction in both the estimated number of annual respondents and the estimated time per response.
