DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket Nos. CP20–50–000; CP20–51–000]

Tennessee Gas Pipeline Company, L.L.C.; Southern Natural Gas Company, L.L.C.; Notice of Requests for Extension of Time

Take notice that on January 26, 2024, Tennessee Gas Pipeline Company, L.L.C. (Tennessee) and Southern Natural Gas Company, L.L.C. (Southern) requested that the Federal Energy Regulatory Commission (Commission) grant an extension of time, until September 30, 2025, to construct and place into service its Evangeline Pass Project (Project) located in Louisiana as authorized in the Order Issuing Certificates and Approving Abandonments (Order).¹ The Order required Tennessee and Southern to complete construction of the Project and make it available for service within two years of the date of the Order, or by March 25, 2024.

Tennessee and Southern assert that they faced permitting delays after the Order Addressing Arguments Raised on Rehearing was issued on September 29, 2022.² They submitted an implementation plan and secured approval from the Commission on September 8, 2023, to begin construction. However, they have faced delays in securing construction contractors, finalizing land acquisition, and obtaining state and local permits. As a result, they anticipate beginning construction activities during the first quarter of 2024. Tennessee and Southern have requested an extension of the in-service date to September 30, 2025, to ensure that all necessary restoration activities are underway, and the Project facilities are fully constructed.

This notice establishes a 15-calendar day intervention and comment period deadline. Any person wishing to comment on Tennessee and Southern's request for an extension of time may do so. No reply comments or answers will

be considered. If you wish to obtain legal status by becoming a party to the proceedings for this request, you should, on or before the comment date stated below, file a motion to intervene in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (NGA) (18 CFR 157.10).

As a matter of practice, the Commission itself generally acts on requests for extensions of time to complete construction for NGA facilities when such requests are contested before order issuance. For those extension requests that are contested,³ the Commission will aim to issue an order acting on the request within 45 days.⁴ The Commission will address all arguments relating to whether the applicant has demonstrated there is good cause to grant the extension.⁵ The Commission will not consider arguments that re-litigate the issuance of the certificate order, including whether the Commission properly found the project to be in the public convenience and necessity and whether the Commission's environmental analysis for the certificate complied with the National Environmental Policy Act (NEPA).⁶ At the time a pipeline requests an extension of time, orders on certificates of public convenience and necessity are final and the Commission will not re-litigate their issuance.⁷ The Director of the Office of Energy Projects, or his or her designee, will act on all of those extension requests that are uncontested.

In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the internet through the Commission's Home Page (<http://www.ferc.gov>) using the "eLibrary" link. ³ Contested proceedings are those where an intervenor disputes any material issue of the filing. 18 CFR 385.2201(c)(1).

⁴ *Algonquin Gas Transmission, LLC*, 170 FERC ¶ 61,144, at P 40 (2020).

⁵ *Id.* at P 40.

⁶ Similarly, the Commission will not re-litigate the issuance of an NGA section 3 authorization, including whether a proposed project is not inconsistent with the public interest and whether the Commission's environmental analysis for the permit order complied with NEPA.

Abstract: This ICR presents EPA's estimates for the burden and costs associated with the information collection activities related to pollution prevention grant programs and the collection of activity and results data from the grantees via a standard electronic format. P2 means reducing or eliminating pollutants from entering any waste stream or otherwise being released into the environment prior to recycling, treatment, or disposal. EPA's P2 program operates three grant programs and is developing two new grant programs. The three existing programs are: The Pollution Prevention State Tribal Assistance Grants (P2 STAG); the Bipartisan Infrastructure Law Pollution Prevention Grants (P2 BIL); and the Source Reduction Assistance (SRA) Grants. The P2 STAG and SRA grants are funded through recurring appropriations and require grantees to provide matching funds. The P2 BIL grants, which are funded through the 2021 Infrastructure Investment and Jobs Act (IIJA), also referred to as the Bipartisan Infrastructure Law (BIL), are also STAG but do not require grantees to provide matching funds. The two new grant programs under development are: The Pollution Prevention Grant: Environmental Justice Through Safer/Sustainable Products (P2 EJ Products); and the Pollution Prevention Grant: Environmental Justice in Communities (P2 EJ Facilities). The P2 EJ Products and P2 EJ Facilities grants will also be supported by BIL funding and, as such, do not require grantee matching funds.

Form Numbers: 9600–047 and 9600–048.

Respondents/affected entities: Entities potentially affected by this ICR may include entities identified by the North American Industrial Classification System (NAICS) code 99200, *i.e.*, State Governmental entities.

Respondent's obligation to respond: Required to obtain or retain a benefit.

Total estimated number of potential respondents: 275 (total).

Frequency of response: On occasion.

Total estimated burden: 5,123 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated annual costs: \$431,778 (per year), includes no

annualized capital investment or maintenance and operational costs.
