

treatment, and the number of animals released. This information will assist the Agency in tracking marine mammals that move into captive display and in the monitoring of rehabilitation and release. The data will also be used to assess the burden on stranding network centers. This form will be filled out only in the case of live-stranded marine mammals. The form will be required from rehabilitation centers in all five NMFS Regions. Each of the NMFS regions approves and issues a Letter of Agreement (LOA) or other form of agreement to marine mammal rehabilitation centers under § 112(c) of the MMPA, which allows the Secretary to enter into agreements in order to fulfill the general purposes of the Act, and under § 403 of the MMPA, which provides specific authority to enter into such stranding response agreements. These data will be monitored as part of the Rehabilitation Facilities Inspection (RFI) program. No changes are proposed to this form.

The Human Interaction Data Sheet will provide NMFS with consistent and detailed information on signs of human interaction in stranded marine mammals. This form also includes a subjective section that allows the examiner to evaluate the likelihood that human interaction contributed to the stranding of the animal. This information will assist the Agency in tracking resource conflicts and will provide a solid scientific foundation for conservation and management of marine mammals. With a better understanding of interactions, appropriate measures can be taken to resolve conflicts and stranding data are the best source of information regarding the occurrence of different types of human interaction. No changes are proposed for this form.
