

J. Confidentiality

Data submitted and entered into ACE may include confidential commercial or financial information which may be protected under the Trade Secrets Act (18 U.S.C. 1905), the Freedom of Information Act (5 U.S.C. 552), and the Privacy Act (5 U.S.C. 552a). However, as stated in previous notices, participation in this or any of the previous ACE tests is not confidential and, therefore, upon receipt of a written Freedom of Information Act request, the name(s) of an approved participant(s) will be disclosed by CBP in accordance with 5 U.S.C. 552.

IV. Comments on the Test

All interested parties are invited to comment on any aspect of this test at any time. CBP requests comments and feedback on all aspects of this test, including the design, conduct and implementation of the test, in order to determine whether to modify, alter, expand, limit, continue, end, or fully implement this program. Comments should be submitted via email to GBI@cbp.dhs.gov, with the subject line reading “Comments/Questions on GBI EPoC.”

V. Paperwork Reduction Act

The Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3507(d)) requires that CBP consider the impact of paperwork and other information collection burdens imposed on the public. An agency may not conduct, and a person is not required to respond to, a collection of information unless the collection of information displays a valid control number assigned by the Office of Management and Budget (OMB).

The collection of GBI information gathered under this test has been approved by OMB in accordance with the requirements of the PRA under OMB control number 1651-0141. In addition, the Entry/Immediate Delivery Application and ACE Cargo Release (CBP Form 3461 and 3461 ALT) collection of information, which collects the GBI when entry is made, has been approved by OMB under OMB control number 1651-0024.

VI. Evaluation Criteria

The test is intended to evaluate the feasibility of utilizing GBIs to address data gaps caused by the unreliability of the MID, in addition to exploring opportunities to enhance supply chain traceability and visibility more broadly—including examining how CBP, PGAs, and the trade industry might leverage GBIs to comply with

growing supply chain traceability requirements. This will involve exploring the use of GBIs to accurately identify legal business entities, their different business locations and addresses, as well as their various functions and supply chain roles, based upon information derived from the unique D-U-N-S®, GLN, and LEI entity identifiers. The test will assist CBP in enforcing applicable laws and protecting the revenue, while fulfilling trade modernization efforts by assisting the agency in verifying the roles, functions and responsibilities that various entities play in a given participant’s importation of merchandise. CBP’s evaluation of the test, including the review of any comments submitted to CBP during the duration of the test, will be ongoing with a view to possible extension or expansion of the test.

CBP will evaluate whether the test: (1) improves foreign entity data for trade facilitation, enforcement, risk management, and statistical integrity; (2) ensures U.S. Government access to foreign entity data; (3) institutionalizes a global, managed identification system; (4) implements a cost-effective solution; (5) obtains stakeholder buy-in; and (6) facilitates legal compliance across the U.S. Government. At the conclusion of the test, an evaluation will be conducted to assess the efficacy of the information received throughout the course of the test. The final results of the evaluation will be published in the **Federal Register** as required by section 101.9(b)(2) of the CBP regulations (19 CFR 101.9(b)(2)).

Should the GBI EPoC be successful and ultimately be codified under the CBP regulations, CBP anticipates that this data would greatly enhance ongoing trade entity identification and resolution, reduce risk, and improve compliance operations. CBP would also anticipate greater supply chain visibility and additional information with which to verify and validate information on legal entities, which will support better decision-making during customs clearance processes.
