

or no longer require access, that individual's jump host can be deleted. Jump Hosts authenticate against Vault (within a management services subnet in the OnSolve AWS cloud environment) to establish access. Vault checks Active Directory to validate the login information that has been provided by the user and returns an SSH-signed certificate token/key that expires after 12 hours. Vault also stores "secrets" to the environment. For example, all the database passwords for database users are stored in Vault. The Jump Host is allowed access into all other subnets for administrative purposes just as if the 12-hours token has not expired.

OnSolve PCEM, which is hosted in AWS as a Software-as-a-Service application, inherits all the administrative, technical, and physical controls offered by AWS and the EXIM Infrastructure General Support System.

OnSolve PCEM CSP is compliant with the Federal Risk and Authorization Management Program (FedRAMP). The PII information EXIM Emergency Notification System is encrypted and stored in AWS, and the Hypertext Transfer Protocol Secure (HTTPS) protocol and Security Assertion Markup Language (SAML) authentication is used to access EXIM Emergency Notification System.

RECORD ACCESS PROCEDURES:

Requests to access records under the Privacy Act must be submitted in writing and must be signed by the requestor. Requests should be addressed to the Freedom of Information Act Office and the Office of Information Management and Technology, Export Import Bank of the United States, 811 Vermont Ave. NW, Washington, DC 20571. The request must comply with the requirements of 12 CFR 404.14.

CONTESTING RECORD PROCEDURES:

Individuals seeking to contest and/or amend records under the Privacy Act must submit a request in writing. The request must be signed by the requestor and should be addressed to the Freedom of Information Act Office and the Office of Information Management and Technology, Export Import Bank of the United States, 811 Vermont Ave. NW, Washington, DC 20571. The request must comply with the requirements of 12 CFR 404.14.

NOTIFICATION PROCEDURES:

Individuals wishing to determine whether this system of records contains information about them may do so by submitting a written request to the Freedom of Information Act Office and

the Office of Information Management and Technology, Export Import Bank of the United States, 811 Vermont Ave. NW, Washington, DC 20571. The written request must include the following:

- Name
- Type of information requested
- Address to which the information should be sent, and
- Signature

EXEMPTIONS PROMULGATED FOR THE SYSTEM:

None.

HISTORY:

None.

BILLING CODE 6690-01-P

FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060-1033; FR ID 204674]

Information Collection Being Reviewed by the Federal Communications Commission Under Delegated Authority

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act (PRA) of 1995, the Federal Communications Commission (FCC or the Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collection. Comments are requested concerning: whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees. The FCC may not conduct or sponsor a collection of information unless it displays a currently valid control number. No person shall be subject to

any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid Office of Management and Budget (OMB) control number.

DATES: Written PRA comments should be submitted on or before April 29, 2024. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

ADDRESSES: Direct all PRA comments to Nicole Ongele, FCC, via email PRA@fcc.gov and to nicole.ongele@fcc.gov.

FOR FURTHER INFORMATION CONTACT: For additional information about the information collection, contact Nicole Ongele, (202) 418-2991.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060-1033.

Title: Multi-Channel Video Program Distributor EEO Program Annual Report, FCC Form 396-C.

Form Number: FCC-396-C.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit entities, Not-for-profit institutions.

Number of Respondents and Responses: 603 respondents; 763 responses.

Estimated time per Response: 10 minutes-2.5 hours.

Frequency of Response: Recordkeeping requirement; Once every five year reporting requirement; Annual reporting requirement.

Obligation to Respond: Required to obtain benefits. The statutory authority for this collection of information is contained in Section 154(i) and 303 and 634 of the Communications Act of 1934, as amended.

Total Annual Burden: 970 hours.

Total Annual Cost: No Cost.

Needs and Uses: The FCC Form 396-C is a collection device used to assess compliance with the Equal Employment Opportunity (EEO) program requirements of Multi-Channel Video Programming Distributors (MPVDs). It is publicly filed to allow interested parties to monitor a MPVD's compliance with the Commission's EEO requirements. As part of the in-depth MVPD investigation conducted once every five years via the Form 396-C Supplemental Investigation Sheet, MVPDs are required to submit their annual EEO public file report for the preceding year, which details various facts concerning their employment outreach efforts.

Federal Communications Commission.

Marlene Dortch,

Secretary, Office of the Secretary.

OMB Control Number: 3060-1151.

Title: Sections 1.1411, 1.1412, 1.1415, and 1.1416 Pole Attachment Access and Dispute Resolution Requirements.

Form Number: FCC Form 5653.

Type of Review: Revision of a currently-approved collection.

Respondents: Business or other for-profit.

Number of Respondents and Responses: 1,380 respondents; 165,009 responses.

Estimated Time per Response: 0.25-5 hours.

Frequency of Response: On-occasion reporting requirement, recordkeeping requirement, and third-party disclosure requirement.

Obligation to Respond: Mandatory or required to obtain or retain benefits. Statutory authority for this information collection is contained in 47 U.S.C. 224.

Total Annual Burden: 120,980 hours.

Total Annual Cost: \$1,800.

Needs and Uses: The Commission is requesting Office of Management and Budget (OMB) approval for a revision to a currently approved information collection. In *Accelerating Wireline Broadband Deployment by Removing Barriers to Infrastructure Investment*, WC Docket No. 17-84, Fourth Report and Order, FCC 23-109 (rel. December 15, 2023) (Order), the Commission adopted rules that implement the pole attachment requirements in section 224 of the Communications Act of 1934, as amended. The Order substantially revised 47 CFR 1.1411, redesignated existing 47 CFR 1.1415 as 47 CFR 1.1416, and added a new 47 CFR 1.1415.

Section 1.1411. In the Order, the Commission adopted regulations requiring utilities to share information about their poles with prospective telecommunications and cable attachers. The Commission created this requirement to help improve the attachment process and potentially reduce disputes, thus facilitating broadband deployment. Specifically, the Order requires utilities to provide to potential attachers, upon request, the information contained in their most recent cyclical pole inspection reports, or any intervening, periodic reports created before the next cyclical inspection, for the poles covered by a submitted attachment application, including whether any of the affected poles have been "red tagged" by the utility for replacement and the scheduled replacement date or timeframe (if any). For the purposes of this new transparency requirement, a

cyclical pole inspection report is any report that a utility creates in the normal course of its business that sets forth the results of the routine inspection of its poles during the utility's normal pole inspection cycle, while a periodic pole inspection report is any report that a utility creates in the normal course of its business that sets forth the results of the inspection of any of its poles outside the utility's normal pole inspection cycle.

When asking for information about the status of a utility's poles for a planned buildout, the attacher must submit its information request no earlier than contemporaneously with an attachment application. The utility will have ten business days to respond to the request. Where an attacher amends its application based on the information it receives from the utility, the utility will have the option to restart the 45-day period for responding to the application on the merits and conducting the required make-ready survey. Regardless of whether the utility elects to restart the 45-day response period, any additional survey costs necessitated by the amended application, such as a second survey after a survey for the original application has been completed, will be borne by the new attacher consistent with the new attacher's obligation to pay for make-ready costs associated with its application.

The Commission also required utilities to retain copies, in whatever form they were created, of any such cyclical or periodic pole inspection reports they conduct in the normal course of business, until such time as the utility completes a superseding cyclical pole inspection report covering the poles included in the attachment application. The Commission reiterated that utilities are required to provide only the information they already possess and track in the normal course of conducting pole inspections at the time of the attacher's request for data. The Commission did not require utilities to collect or create new information for the purpose of responding to such requests or to provide all information they may possess on the affected poles outside their pole inspection reports. The Commission found that adopting this limited requirement achieves a balance between a potential attacher's need for more information about the poles that it plans to use as part of a broadband buildout and the utility's interest in minimizing the burden of mandatory disclosures.

Section 1.1415. To expedite the resolution of pole attachment disputes that impede or delay active broadband
