ePermits Initiative

We are exploring the feasibility of using the Service’s new “ePermits” initiative, an automated permit application system that will allow the agency to move towards a streamlined permitting process to reduce public burden. The ePermits platform would automate the five forms associated with this proposed information collection. Public burden reduction is a priority for the Service, the Assistant Secretary for Fish and Wildlife and Parks, and senior leadership at the Department of the Interior. The intent of the ePermits initiative is to fully automate the permitting and reporting process to improve the customer experience and to reduce time burden on respondents. This system enhances the user experience by allowing users to enter data from any device that has internet access, including personal computers, tablets, and smartphones. It will also link the permit applicant to the *Pay.gov* system for payment of any associated fees.
