B. Need and Uses

This clearance covers the information that offerors and contractors must submit to comply with the following Federal Acquisition Regulation (FAR) requirements:

52.222-50, Combating Trafficking in Persons

Notification. Paragraph (d) of this clause requires contractors to notify the contracting officer and the agency Inspector General of—

- Any credible information they receive from any source that alleges a contractor employee, subcontractor, or subcontractor employee, or their agent has engaged in conduct that violates the policy in paragraph (b) of the clause 52.222-50; and

- Any actions taken against a contractor employee, subcontractor, subcontractor employee, or their agent pursuant to this clause.

Compliance Plan and Annual Certification. Paragraph (h) of the clause contains an additional requirement for contracts for supplies (other than commercially available off-the-shelf (COTS) items) to be acquired outside the United States and contracts for services to be performed outside the United States, with an estimated value exceeding \$550,000, where the contractor is to maintain a compliance plan during the performance of the contract. This compliance plan must include an awareness program, a process for employees to report activity inconsistent with the zero-tolerance policy, a recruitment and wage plan, a housing plan, and procedures to prevent

subcontractors from engaging in trafficking in persons.

- Contractors are required to provide the compliance plan to the contracting officer upon request.

- Contractors are required to submit a certification to the contracting officer annually after receiving an award, asserting that they have the required compliance plan in place and that there have been no abuses, or that appropriate actions have been taken if abuses have been found.

- For those subcontractors required to submit a certification (see next bullet on flow down), contractors shall require that submission prior to award of the subcontract and annually thereafter.

Portions of this clause flows down to all subcontractors. The requirements related to the compliance plan only flow down to subcontracts exceeding \$550,000 for supplies (other than COTS items) acquired and services performed outside the United States.

This clause applies to commercial acquisitions, except the portions related to the compliance plan do not apply to acquisitions of COTS items.

52.222-56, Certification Regarding Trafficking in Persons Compliance Plan

This provision requires apparently successful offerors to submit a certification, prior to award, that they have implemented a compliance plan and that there have been no abuses, or that appropriate actions have been taken if abuses have been found.

The provision requires this certification for the portion of contracts exceeding \$550,000 for supplies (other than COTS items) acquired and services performed outside the United States.

This provision applies to commercial acquisitions, except acquisitions of COTS items.

Proposed Project

Promoting Adolescent Health through School-Based HIV/STD Prevention Reporting Templates (OMB Control No. 0920-1329, Exp. 3/31/2024)—Revision—National Center for HIV, Viral Hepatitis, STD, and TB Prevention (NCHHSTP), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

PS18-1807 Promoting Adolescent Health through School-Based HIV/STD Prevention was awarded August 1, 2018 with a five year project period. It has been extended into a sixth year, and is funded through the Division of Adolescent and School Health (DASH). Health behaviors during adolescence set the stage for behaviors and health into adulthood. In 2017, 40% of high school students in the U.S. had ever had sexual intercourse and 29% were currently sexually active. Among currently sexually active students, 46% did not use a condom, and 14% did not use any

method to prevent pregnancy the last time they had sexual intercourse. In 2016, young people aged 13–24 accounted for an estimated 21% of all new HIV diagnoses in the United States. Half of the nearly 20 million new STDs reported each year were among young people aged 15–24. Schools have direct contact with over 50 million students for at least six hours a day over 13 key years of their social, physical, and intellectual development. Schools can help understand and prevent adolescent risk for HIV, STD and teen pregnancy. Schools play an important role in HIV/STD prevention, and can influence students’ risk for HIV infection and other STD through parental engagement, health education, connection to physical and mental health services, and connecting youth to each other and important adults.

The PS18-1807 award supports implementation of activities at multiple levels of the education system to achieve health goals. School curricula, policies, and services are generally locally determined by local education agencies (LEA), or local school districts, with guidance from state education agencies (SEA). LEA and SEA both provide training, resources, and technical assistance to schools. SEA establish supportive state environments for local decision making about school policies and practices. LEA support implementation of school-based strategies through district level actions and decisions. Recognizing the importance of locally tailoring approaches, PS18-1807 uses priority schools within a district, or LEA, as a natural laboratory for working through program implementation details before scaling up—or diffusing—activities to all schools in a district. This approach supports close connections with decision-makers responsible for educational options and school environments at each of these levels. Additional support from organizations with specialized expertise and capacity for national reach will be used to increase the impact of SEA and LEA strategies. They provide a range of highly trained experts for professional development and technical assistance to advance HIV/STD prevention work.

CDC requests OMB approval for an Extension of one year to conduct three information collections titled, Promoting Adolescent Health through School-Based HIV/STD Prevention Reporting Templates. There are separate reporting templates and work plan templates for Component 1 reporting and for Component 2 reporting. Eighty (80) sites will be filling out the Component 1 reporting template and
