

Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (NGA) (18 CFR 157.10).

As a matter of practice, the Commission itself generally acts on requests for extensions of time to complete construction for NGA facilities when such requests are contested before order issuance. For those extension requests that are contested,² the Commission will aim to issue an order acting on the request within 45 days.³ The Commission will address all arguments relating to whether the applicant has demonstrated there is good cause to grant the extension.⁴ The Commission will not consider arguments that re-litigate the issuance of the certificate order, including whether the Commission properly found the project to be in the public convenience and necessity and whether the Commission's environmental analysis for the certificate complied with the National Environmental Policy Act (NEPA).⁵ At the time a pipeline requests an extension of time, orders on certificates of public convenience and necessity are final and the Commission will not re-litigate their issuance.⁶ The Director of the Office of Energy Projects, or his or her designee, will act on all of those extension requests that are uncontested.

The applicant anticipates that the drawdown, repairs and refill would take approximately 60 days. The applicant would lower the reservoir at a rate not to exceed 1 foot per day to ensure that fish, mussels, and other aquatic species have an opportunity to migrate as the water levels recede. The applicant would maintain the spill minimum flow (25 cubic feet per second) via the radial gates during the temporary variance. The applicant proposes to use existing gravel-covered areas for laydown and storage, and no ground disturbance, vegetation clearing or tree cutting would occur during construction. The applicant requests that the temporary variance be effective from September 15, 2024 to December 15, 2024.
