General Description of Collection: The Prompt Corrective Action (PCA) provisions of section 38 of the Federal Deposit Insurance Act requires or permits the FDIC and other federal banking agencies to take certain supervisory actions when FDIC-insured institutions fall within certain capital categories. They also restrict or prohibit certain activities and require the submission of a capital restoration plan when an insured institution becomes undercapitalized. Various provisions of the statute and the FDIC’s implementing regulations require the prior approval of the FDIC before an FDIC-supervised institution, or certain insured depository institutions, can engage in certain activities, or allow the FDIC to make exceptions to restrictions that would otherwise be imposed. This collection of information consists of the applications that are required to obtain the FDIC’s prior approval to engage in these activities. There is no change in the methodology or substance of this information collection. The estimated burden remains unchanged from 2021.

SUPPLEMENTARY INFORMATION:

A. OMB Control Number, Title, and Any Associated Form(s)

9000-0064, Certain Federal Acquisition Regulation Part 36 Construction Contract Requirements.

B. Need and Uses

DoD, GSA, and NASA are combining OMB Control Nos. by FAR part. This consolidation is expected to improve industry's ability to easily and efficiently identify burdens associated with a given FAR part. This review of

the information collections by FAR part allows improved oversight to ensure there is no redundant or unaccounted for burden placed on industry. Lastly, combining information collections in a given FAR part is also expected to reduce the administrative burden associated with processing multiple information collections.

This justification supports the extension of OMB Control No. 9000-0064 and combines it with the previously approved information collection under OMB Control No. 9000-0062, with the new title "Certain Federal Acquisition Regulation Part 36 Construction Contract Requirements". Upon approval of this consolidated information collection, OMB Control No. 9000-0062 will be discontinued. The burden requirements previously approved under the discontinued number will be covered under OMB Control No. 9000-0064.

This clearance covers the information that contractors must submit to comply with the following FAR requirements:

The contractor's request must include: the manufacturer's name, the model number, and other information concerning the performance, capacity, nature, and rating of the machinery and mechanical and other equipment; and full information concerning the material or articles. When directed by the contracting officer, the contractor must submit samples of the items requiring approval for incorporating into the work. The contracting officer uses this information to determine whether the machinery, equipment, material, or articles meet the standards of quality specified in the contract. A contracting officer may reject work, if the contractor installs machinery, equipment, material, or articles in the work without obtaining the contracting officer's approval.

- FAR 52.236-13, Accident Prevention, Alternate I. This alternate to the basic clause requires contractors to submit a written proposed plan to provide and maintain work environments and procedures that will safeguard the public and Government personnel, property, materials, supplies, and equipment exposed to contractor operations and activities; avoid interruptions of Government operations and delays in project completion dates; and control costs in the performance of this contract. The plan must include an analysis of the significant hazards to life, limb, and property inherent in
