

provided funding to better understand the human responses to water hazard services and products. This project seeks to understand and mitigate flooding outcomes for riverine communities, especially those that rank high on the Centers for Disease Control's (CDC's) Social Vulnerability Index (SVI), by conducting a Social Network Analysis (SNA) to study how stakeholders within two selected communities: Roanoke, Virginia; and Greenbrier County, West Virginia. Based on interviews with local government leaders and faith/community-based organizations (FCBOs) along with a survey of residents, the resulting SNA will map how messages are created and distributed, how they are accessed and understood, and how the information affects the decisions of emergency and water resource managers, first responders, community partners, and the general public as they prepare for, respond to, and recover from flooding events. While the NWS possesses some anecdotal knowledge of the dissemination and use of flood forecasts, a more complete accounting and formal analysis of the individuals and groups within these networks are needed. Ideally, the findings from the SNA in relation to the water hazard products and services will not only improve the NWS's understanding of who the stakeholders are, but also how they use the information provided and what they believe are the benefits for their constituents.

The primary driver for this project comes from the direction of NOAA leadership to develop a social behavioral infrastructure with data that supports the NWS in providing equitable service delivery for all of its products and services. Based on *H.R.3684 Infrastructure Investment and Jobs Act (IIJA), Provision 3*: funding shall be used for coastal and inland flood and inundation mapping and forecasting, next-generation water modeling activities such as modernized precipitation frequency and probable maximum studies, and transformative foundational social science research that build infrastructure and supports equitable service delivery to all communities. This project also aligns with Goal 3 of the NWS Strategic Plan to transform our Agency to meet current and future needs of society by (3.6) delivering actionable inland and coastal water resource and inundation information across all time scales to address the growing risk of flooding, drought, and low water flow as well as immediate and long range water management and planning; and by (3.8)

understanding and applying the best social, behavioral, and economic sciences to clearly communicate information with communities in multiple languages and deliver equitable service for those historically underserved and socially vulnerable to attain the desired response to high impact events.

Semi-structured interviews will be utilized to collect information from state and local government leaders, as well as FCBO leaders. A survey will be provided to residents of both communities, along with an in-person intercept survey provided to residents of Greenbrier County based on interviews with the FCBO leaders.

The SNA maps derived from the data collected will be utilized by the following NWS offices:

- Community Engagement Program to support outreach and engagement activities with specific groups and the organizations that serve these populations.
- The Decision Support Integration Branch of the Analyze, Forecast, and Support Office to help them identify and recruit organizations, businesses, and individuals who may be well poised to become Weather-Ready Ambassadors.

The raw data collected will be used by:

- The Social, Behavioral, and Economic Sciences (SBES) Program in the Office of Science and Technology Integration in developing an Agent Based Model (ABM) that can demonstrate, describe, and potentially anticipate evacuation and mobility behaviors within a prescribed system for inland flooding events. If possible, the application of an ABM will support the development of mitigation efforts that stakeholders can test to understand how the actions of specific agents within a system could possibly alter outcomes of flooding events for a community.

Affected Public: Local government, Not-for profit, and individuals or households.

Frequency: Once.

Respondent's Obligation: Voluntary.

Legal Authority: *H.R.3684*

Infrastructure Investment and Jobs Act (IIJA), Provision 3: funding shall be used for coastal and inland flood and inundation mapping and forecasting, next-generation water modeling activities such as modernized precipitation frequency and probable maximum studies, and transformative foundational social science research that build infrastructure and supports equitable service delivery to all communities.

This information collection request may be viewed at www.reginfo.gov. Follow the instructions to view the Department of Commerce collections currently under review by OMB.

Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the following website www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting "Currently under 30-day Review—Open for Public Comments" or by using the search function and entering the title of the collection.

Sheleen Dumas,

Department PRA Clearance Officer, Office of the Under Secretary for Economic Affairs, Commerce Department.

BILLING CODE 3510-KE-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[RTID 0648-XD763]

Pacific Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public meeting.

SUMMARY: The Pacific Fishery Management Council's (Pacific Council) Highly Migratory Species Management Team (HMSMT) will hold an online meeting, which is open to the public.

DATES: The online meeting will be held Thursday, April 4, 2024, from 10 a.m. to 12 p.m., Pacific Time.

ADDRESSES: This meeting will be held online. Specific meeting information, including directions on how to join the meeting and system requirements will be provided in the meeting announcement on the Pacific Council's website (see www.pcouncil.org). You may send an email to Mr. Kris Kleinschmidt (kris.kleinschmidt@noaa.gov) or contact him at (503) 820-2412 for technical assistance.

Council address: Pacific Fishery Management Council, 7700 NE Ambassador Place, Suite 101, Portland, OR 97220-1384.

FOR FURTHER INFORMATION CONTACT: Kit Dahl, Staff Officer, Pacific Council; telephone: (503) 820-2422.

SUPPLEMENTARY INFORMATION: The purpose of this online meeting is for the

HMSMT to discuss and draft the contents of a report with its recommendations for the Council Operations and Priorities agenda item that the Pacific Council will discuss at its April 2024 meeting.

Although non-emergency issues not contained in the meeting agenda may be discussed, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically listed in this document and any issues arising after publication of this document that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the intent to take final action to address the emergency.

Special Accommodations

Requests for sign language interpretation or other auxiliary aids should be directed to Mr. Kris Kleinschmidt (kris.kleinschmidt@noaa.gov; (503) 820-2412) at least 10 days prior to the meeting date.

Authority: 16 U.S.C 1801 *et seq.*

Dated: March 12, 2024.

Key Israel Marquez,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

BILLING CODE 3510-22-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[RTID 0648-XD804]

Marine Mammals; File No. 27548

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; receipt of application.

SUMMARY: Notice is hereby given that Lars Bejder, Ph.D., University of Hawaii at Manoa, 46-007 Lilipuna Road, Kaneohe, Hawaii 96744, has applied in due form for a permit to conduct research on cetaceans.

DATES: Written comments must be received on or before April 15, 2024.

ADDRESSES: The application and related documents are available for review by selecting "Records Open for Public Comment" from the "Features" box on the Applications and Permits for Protected Species home page, <https://apps.nmfs.noaa.gov>, and then selecting File No. 27548 from the list of available applications. These documents are also

available upon written request via email to NMFS.Pr1Comments@noaa.gov.

Written comments on this application should be submitted via email to NMFS.Pr1Comments@noaa.gov. Please include File No. 27548 in the subject line of the email comment.

Those individuals requesting a public hearing should submit a written request via email to NMFS.Pr1Comments@noaa.gov. The request should set forth the specific reasons why a hearing on this application would be appropriate.

FOR FURTHER INFORMATION CONTACT:

Shasta McClenahan, Ph.D., or Erin Markin, Ph.D., (301) 427-8401.

SUPPLEMENTARY INFORMATION: The subject permit is requested under the authority of the Marine Mammal Protection Act of 1972, as amended (MMPA; 16 U.S.C. 1361 *et seq.*), the regulations governing the taking and importing of marine mammals (50 CFR part 216), the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*), and the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR parts 222-226).

The applicant requests a 5-year research permit to study cetaceans including fundamental biology, ecology, habitat use, social structure, behavior, energetics, and impacts of human activities. Up to 31 species of marine mammals may be targeted including the following ESA-listed species: blue (*Balaenoptera musculus*), bowhead (*Balaena mysticetus*), fin (*Balaenoptera physalus*), false killer (*Pseudorca crassidens*; Hawaiian insular distinct population segment [DPS]), gray (*Eschrichtius robustus*; Western North Pacific DPS), humpback (*Megaptera novaeangliae*; Western North Pacific and Mexico DPSs), sei (*Balaenoptera borealis*), and sperm (*Physeter macrocephalus*) whales. Research may occur year-round in U.S. and international waters of the Pacific Ocean near Hawaii, Alaska, and U.S. territories. Research may be conducted from a vessel or unmanned aircraft system for counts, photography and video recording (above and underwater), photogrammetry, passive acoustics, tracking, biological sampling (skin and blubber biopsy, sloughed skin, exhaled air, and feces), and suction-cup tagging. See the application for complete numbers of animals requested by species, age-class, and procedure.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), an initial determination has been made that the activity proposed is categorically excluded from the requirement to

prepare an environmental assessment or environmental impact statement.

Concurrent with the publication of this notice in the **Federal Register**, NMFS is forwarding copies of the application to the Marine Mammal Commission and its Committee of Scientific Advisors.

Dated: March 12, 2024.

Julia M. Harrison,

Chief, Permits and Conservation Division, Office of Protected Resources, National Marine Fisheries Service.
