If VR birth certificate and TAF linkages are successful, CMCS will also request state VR mortality data from a selection of states to link maternal death records to TAF data. Using current state linkages of live births with death certificate data to identify maternal and infant deaths will support further research into better understanding and reducing maternal and infant morbidity and mortality. *Form Number:* CMS–10398 #81 (OMB control number: 0938–1148); *Frequency:* One time; *Affected Public:* State, Local, or Tribal Governments; *Number of Respondents:* 52; *Total Annual Responses:* 52; *Total Annual Hours:* 104. **SUPPLEMENTARY INFORMATION:** Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501–3520), federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. The term "collection of information" is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires federal agencies to publish a 30-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, CMS is publishing this notice that summarizes the following proposed collection(s) of information for public comment:

The application is used by states to submit and revise their waiver requests. We use the application to review and adjudicate individual waiver actions.
