

Government is \$35 million or more, this provision requires the offeror to submit a copy of a PLA at the time offers are due, prior to award, or after contract award as determined by the agency. Subcontractors are required to become a party to the resulting PLA. An agency may require the use of a PLA on projects where the total cost to the Federal Government is less than \$35 million, if appropriate.

- *FAR 52.222–34, Project Labor Agreement.* When a PLA is required for a large-scale construction project within the United States for which the total estimated cost of the construction contract to the Federal Government is \$35 million or more, this clause requires the contractor to maintain the PLA in a current state throughout the life of the contract. The requirement for a PLA flows down to all subcontracts with subcontractors engaged in construction on the construction project.

- *FAR 52.222–46, Evaluation of Compensation for Professional Employees.* This provision requires offerors to submit for evaluation a total compensation plan setting forth proposed salaries and fringe benefits for professional employees working on the contract. The Government will use this information to determine if professional employees are compensated fairly and properly. Plans indicating unrealistically low professional employees' compensation may be assessed adversely as one of the factors considered in making a contract award.

### C. Annual Burden

*Respondents/Recordkeepers:* 544,162.  
*Total Annual Responses:* 619,558.

### D. Public Comment

A 60-day notice was published in the **Federal Register** at 87 FR 51044 on August 19, 2022, as part of a proposed rule under FAR Case 2022–003, Use of Project Labor Agreements for Federal Construction Projects. Due to the public comments received in response to the proposed rule regarding the burden calculations, the estimated number of hours necessary for the implementation of a PLA were increased from a range of 40–80 to a range of 100–200 hours. Only the burden for the FAR provision at 52.222–33, and the FAR clause at 52.222–34 is affected by this revision. All other FAR part 22 provisions and clauses covered by OMB Control #9000–0066 remain the same as previously approved.
