

defueled on December 3, 1971. The licensee started the decommissioning process in 1971 in accordance with section 50.82 of title 10 of the *Code of Federal Regulations* (10 CFR), “Termination of license.” In 1973, the U.S Atomic Energy Commission (NRC’s predecessor agency) issued an amendment placing the reactor in a SAFSTOR condition. SAFSTOR is a method of decommissioning in which a nuclear facility is placed and maintained in a condition that allows the facility to be safely stored and subsequently decontaminated (deferred decontamination) to levels that permit release for unrestricted use. In 1976, the Possession-only license was issued as required by the 10 CFR 50.82 rule that was completely revised in 1996 (61 FR 39278, July 29, 1996).

The licensee submitted its Post-Shutdown Decommissioning Activities Report (PSDAR), Revision 0, on December 11, 2006 (ADAMS Accession No. ML063470625) and withdrew Revision 0 by letter dated January 26, 2007 (ADAMS Accession No. ML18120A039), prior to the NRC scheduling a PSDAR public meeting. By letter dated December 11, 2008 (ADAMS Accession No. ML083590349), the licensee submitted an updated PSDAR, Revision 1, to reflect that there is no intent to immediately dismantle the ship itself following license termination. The scope of dismantlement described in the PSDAR is based on several fundamental assumptions, (1) the ship itself is not dismantled as part of DECON; (2) existing accesses are utilized to support dismantlement of systems and components; and (3) major structures will not be dismantled. These assumptions are based, in part, on National Historic Preservation Act requirements and satisfactory final status surveys (FSS). The licensee anticipates requesting license termination to be effective in December 2025, provided all prerequisite actions are complete at that time.

Based on this, and the fact that the ship is a registered National Historic Landmark, the licensee intends to pursue the DECON industrial work in a fashion that minimizes any physical affect to adjacent ship structure. DECON is a method of decommissioning in which structures, systems, and components that contain radioactive contamination are actively removed from the site and safely disposed of at a commercially operated low-level waste disposal facility or decontaminated to a level that permits the site to be released for unrestricted use. DECON may occur shortly after cessation of operations, or after a period

of SAFSTOR. Unlike a land-based nuclear plant, the NS Savannah is waterborne, mobile and of unique historic significance, thus its decommissioning presents a number of unusual factors for consideration.

By application dated October 23, 2023 (ADAMS Accession No. ML23298A041), the licensee submitted their LTP to the NRC. Paragraph 50.82(a)(9) specifies that an application for license termination must be accompanied or preceded by an LTP, which is subject to NRC review and approval. The LTP addresses site characterization to ensure that the scope of FSS of the site cover all areas where contamination existed, remains, or has the potential to exist or remain, identification of remaining dismantlement activities, plans for site remediation, a description of the FSS plans to confirm that NS Savannah will meet the release criteria in 10 CFR part 20, subpart E, “Radiological Criteria for License Termination,” dose-modeling scenarios that ensure compliance with the radiological criteria for license termination, an estimate of the remaining site-specific decommissioning costs and an updated assessment of the environmental effects of decommissioning NS Savannah. Once approved, the LTP would become a supplement to the NS Savannah Defueled Safety Analysis Report.

According to 10 CFR 50.82(a)(9)(iii), after the licensee submits an LTP the NRC must hold a public meeting near the site. The purpose of the meeting is for the NRC staff to discuss the NRC’s review of the LTP and to request public comments on the LTP. In addition, in accordance with 10 CFR 50.82(a)(9)(iii) and 20.1405, upon the receipt of an LTP from a licensee, NRC must publish a notice in the **Federal Register** and solicit comments from affected parties. Please see the related notice regarding the LTP proposed no significant hazards consideration determination and opportunity to request a hearing and petition to intervene (89 FR 22199, March 29, 2024).

III. Request for Comment and Public Meeting

The NRC is requesting public comments on the NS Savannah LTP. The NRC will conduct a public meeting to discuss the LTP and receive comments on Wednesday, May 8, 2024, from 6 p.m. to 7:30 p.m., ET onboard the NS Savannah, online, or by phone. The NS Savannah is located at Pier 13 Canton Marine Terminal, 4601 Newgate Avenue, Baltimore, MD 21124. Please contact Tanya E. Hood no later than May 6, 2024, if accommodations or special equipment are needed for you to

attend or to provide comments, so that the NRC staff can determine whether the request can be accommodated.

Special services. The NS Savannah is not compliant with the Americans with Disabilities Act. The ship has some capability to accommodate persons with impaired mobility. For additional information regarding the meeting, see the NRC’s Public Meeting Schedule website at <https://meetings.nrc.gov/pmns/mtg>. The agenda will be posted no later than 10 days prior to the meeting.
