Comments and the Objection Process

A legal notice was published in the *Lewiston Tribune* on February 16, 2018. This notice started a 30-day scoping/comment period. In accordance with 40 CFR 1502.9(d)(3), there will be no scoping conducted for this EIS. The scope of the End of the World final EA established the scope for this EIS. The Forest Service will be seeking comments on the draft EIS. The Forest Supervisor will be requesting Emergency Action Determination authority under the Bipartisan Infrastructure Law, section 40807, since the project is within two of the 250 high-risk western fireheds. If the Emergency Action Determination authority is approved, the End of the World project would not be subject to the pre-decisional objection review process pursuant to 36 CFR 218 subparts A and B.

The Forest Service will be soliciting future participation via the GovDelivery email notification system, rather than postal mail. Details about the upcoming project will be sent through GovDelivery. To sign up for GovDelivery and take advantage of electronic notifications, visit the End of the World Project web page at: <https://www.fs.usda.gov/project/?project=52541>. On the right side of the screen, under "Get Connected," select "Subscribe to Email Updates." When you click on that item, you will be prompted to provide your email address and select a password in the GovDelivery program. Once you have logged in, you will be able to manage your account by subscribing to projects by National Forest, Ranger District, project type, or project purpose. Select the Nez Perce-Clearwater National Forests, Salmon River Ranger District, and/or End of the World Project to receive any updates on the project. Once you are subscribed, you will continue to receive all project information and updates via email. Updates will not be sent via postal mail.

Nature of Decision To Be Made

The Responsible Official will review the information and analysis in the EIS

to determine whether direct, indirect, and cumulative effects on old growth in the End of the World project area meet the requirements of appendix N of the 1987 Nez Perce National Forest Land and Resource Management Plan (Plan); if there are cumulative impacts to old growth by the End of the World Restoration Project and the Hungry Ridge Restoration Project; and which alternative best meets the purpose and need of the project and complies with the Plan.
