**Notice of Inventory Completion:
Peabody Museum of Archaeology and
Ethnology, Harvard University,
Cambridge, MA**

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the Peabody Museum of Archaeology and Ethnology, Harvard University (PMAE) has completed an inventory of human remains and has determined that there are known lineal descendants connected to the human remains in this notice.

DATES: Repatriation of the human remains in this notice may occur on or after May 31, 2024.

ADDRESSES: Jane Pickering, Peabody Museum of Archaeology and Ethnology, Harvard University, 11 Divinity Avenue, Cambridge, MA 02138, telephone (617) 496-2374, email jpickering@fas.harvard.edu.

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of the PMAE, and additional information on the determinations in this notice, including the results of consultation, can be found in the inventory or related records. The National Park Service is not responsible for the determinations in this notice.

Abstract of Information Available

Based on the information available, human remains representing one individual have been reasonably identified. The human remains were collected at the Carson Indian School, Ormsby County, NV, and are hair clippings collected from one individual, Evelina Anthony, who was recorded as being 15 years old and identified as "Washoe." Frederic Snyder took the hair clippings at the Carson Indian School between 1930 and 1933. Snyder sent the hair clippings to George Woodbury, who donated the hair clippings to the PMAE in 1935. No associated funerary objects are present.

Lineal Descendant

Based on the information available and the results of consultation, two lineal descendants are connected to the human remains described in this notice.

Determinations

The PMAE has determined that:

- The human remains described in this notice represent the physical remains of one individual of Native American ancestry.
- Cheyenne Stone and Ross Stone are connected to the human remains described in this notice.

Requests for Repatriation

Written requests for repatriation of the human remains in this notice must be sent to the authorized representative identified in this notice under

ADDRESSES. Requests for repatriation may be submitted by:

1. The known lineal descendants connected to the human remains.
2. Any other lineal descendant not identified who shows, by a preponderance of the evidence, that the requestor is a lineal descendant.

Repatriation of the human remains in this notice to a requestor may occur on or after May 31, 2024. If competing requests for repatriation are received, the PMAE must determine the most appropriate requestor prior to repatriation. The PMAE is responsible for sending a copy of this notice to the lineal descendant and any other consulting parties.

Authority: Native American Graves Protection and Repatriation Act, 25 U.S.C. 3003, and the implementing regulations, 43 CFR 10.10.

Dated: April 23, 2024.

Melanie O'Brien,

Manager, National NAGPRA Program.

The National Park Service is not responsible for the determinations in this notice.

Abstract of Information Available

Based on the information available, human remains representing, at least, six individuals have been reasonably identified. The 33 associated funerary objects are five lots of ceramic sherds, five lots of lithics, six lots of shell, six lots of faunal, three lots of flotation, four lots of soil samples, three lots of seeds, and one bone pin. Site 15McN18 (Crawford Lake) in McCracken, KY was excavated in 1990 by the University of Illinois' Western Kentucky Project. Calibrated radiocarbon dates place it in the Middle Archaic and Mississippian archaeological periods.

Based on the information available, human remains representing, at least, seven individuals have been reasonably identified. The 91 associated funerary objects are seven lots of lithics, six lots of faunal, six lots of floatation, six lots of soil samples, five lots of flora, seven lots of charcoal, 20 lithic projectile points, one lithic scraper, 13 faunal teeth, 13 pieces of ochre, two pieces of hematite, and five lots of burned clay. Site 15McN81 (Hedden) in McCracken, KY, was excavated in 1994 by Wilbur Smith Associates to mitigate road construction and in 2003 the Kentucky Office of Vital Statistics approved a request from the Kentucky Transportation Cabinet to curate at the University of Kentucky.

Cultural Affiliation

Based on the information available and the results of consultation, cultural affiliation is reasonably identified by the geographical location or acquisition history of the human remains and
