FEDERAL REGISTER

Vol. 89 Friday,

No. 92 May 10, 2024

Pages 40359–41286

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097–6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Publishing Office, is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see *www.federalregister.gov.*

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at *www.govinfo.gov*, a service of the U.S. Government Publishing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 1, 1 (March 14, 1936) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, *gpocusthelp.com.*

The annual subscription price for the **Federal Register** paper edition is $860 plus postage, or $929, for a combined **Federal Register, Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is $330, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register,** including postage, is based on the number of pages: $11 for an issue containing less than 200 pages; $22 for an issue containing 200 to 400 pages; and $33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for $3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Publishing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see *bookstore.gpo.gov.*

How To Cite This Publication: Use the volume number and the page number. Example: 89 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Publishing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

Title 3—

The President

Memorandum of April 24, 2024

Delegation of Authority Under Section 614(a)(1) of the Foreign Assistance Act of 1961

Memorandum for the Secretary of State

By the authority vested in me as President by the Constitution and the laws of the United States of America, including section 621 of the Foreign Assistance Act of 1961 (FAA), I hereby delegate to the Secretary of State the authority under section 614(a)(1) of the FAA to determine whether it is important to the security interests of the United States to furnish up to $145 million in assistance to Ukraine without regard to any provision of law within the purview of section 614(a)(1) of the FAA.

You are authorized and directed to publish this memorandum in the *Federal Register*.

Proclamation 10746 of May 2, 2024

Boundary Enlargement of the San Gabriel Mountains National Monument

By the President of the United States of America

A Proclamation

Through Proclamation 9194 of October 10, 2014, President Obama established the San Gabriel Mountains National Monument (monument) to protect the rich cultural history, striking geologic features, and vibrant ecological diversity contained within a portion of the Angeles National Forest. Situated in the mountains north of Los Angeles, the monument is a verdant oasis that contains abundant and distinctive flora and fauna; unique geology; and evidence of centuries of occupation and use by Tribal Nations and Indigenous peoples, Spanish missionaries and colonists, Mexican rancheros, and Euro-American settlers and prospectors. In addition to protecting these and other objects of historic and scientific interest, the monument's pristine natural lands and proximity to Los Angeles make it a unique place of rejuvenation and recreation for the people of the ever-changing urban and suburban communities of greater Los Angeles.

Expanding the monument to include the expanse of the Angeles National Forest that stretches south and west from the current boundary to the National Forest boundary near foothill communities of Los Angeles will protect additional objects of scientific and historic interest. This expansion area contains evidence of thousands of years of use and occupation by Indigenous peoples, as well as evidence of more recent human uses, including the ruins of grand recreation resorts and of a missile unit built during the Cold War. A diversity of animals, birds, reptiles, and other wildlife, including numerous threatened and endangered species, live among the unique geological and ecological features of the expansion area, including its unusual canyons, chaparral, and coastal sage scrub lands, and use the area to travel from the lowlands in the south to the soaring mountains in the north.

Since time immemorial, the rich landscape within the expansion area has sustained a mosaic of Indigenous peoples, including the people known as the Gabrielino, Kizh, or Tongva, and the Chumash Kitanemuk, Serrano, and Tataviam peoples. The displacement of these peoples from the area began between 1770 and 1816, when Spanish missionaries forcibly assimilated the region's Indigenous families into surrounding missions, and continued past California's admission into the Union. Today, their descendants are part of Tribal Nations and other Indigenous peoples in the region, some of whose members continue to use the area for ceremonial purposes, as well as for collecting traditional plants important for basketry, food, and medicine.

Evidence of many eras of human history can be found in the expansion area. Dozens of known sites shed light on the daily life and activities of Indigenous peoples, including seasonal habitation, plant and mineral resource collection, food processing, tool manufacturing, and transportation corridors. One known site contains a seasonal encampment where there is evidence of food processing and tool production use from 1150 to 1771, including midden, flaked lithics and tools, ground stones, and hearths and earth ovens. The area also contains evidence of use associated with permanent Indigenous villages that were located adjacent to the expansion area

at the base of the area's canyons, including the Tongva villages of Muuhonga and Tohuunga.

Other sites contain lithic materials, including fused shale and obsidian that came from areas far to the north. These materials provide evidence of the ancient Indigenous trade routes that crisscrossed the area, bringing small game, deer, acorns, sage, piñon nuts, yucca, elderberry, and manzanita berry, among other resources, south into the Los Angeles Basin, and asphaltum, shell and soapstone cooking vessels, beads, pipes, effigies, pendants, and comals north into the mountains.

Mining made its way to the San Gabriel Mountains in the 19th century, following the discovery of gold in Placerita Canyon in 1842. Visitors to the area today can still see evidence of this first gold rush, including the remains of a mine shaft and ore cart rails of the Dawn Mine and mill site, which remained in operation until 1954. The remains of the Tujunga Mining District, including the shafts of the Josephine Mine above Mill Creek, evidence a second minor gold rush in the late 1880s.

The expansion area also contains evidence of Euro-American settlers who looked to these lands to provide mineral resources, wood for fuel and construction, other building materials, and water. Near Little Tujunga Canyon, three well-preserved limekilns, eligible for inclusion in the National Register of Historic Places, were constructed around 1870 with local limestone and granite cobbles within a mortar matrix. Visitors to the area can also traverse trails first developed by Indigenous peoples and later modified by Euro-American settlers. For example, ranchero and later Mayor of Los Angeles Benjamin Davis Wilson, also known as Don Benito, using labor from Indigenous and Spanish workers, built the trail known today as the Mount Wilson Trail to transport timber to his rancho. The Gabrielino Trail, which the Congress designated as America's first National Recreation Trail in 1970, incorporates trails that another 19th century trail maker, Wilbur Sturtevant, developed possibly along established Indigenous routes.

The expansion area also contains evidence of highly popular recreational pursuits of the Great Hiking Era of the early 20th century, when throngs of hikers and outdoor enthusiasts went to the mountains of southern California. This evidence includes the remains of the Mount Lowe Electric Railway (Railway), which was opened in 1893 to transport passengers from foothill communities to three impressive mountain resorts. The Railway, which is listed in the National Register of Historic Places as a Historic District, was the only scenic mountain electric traction railway ever built in the United States and became a tourist destination because of its remarkable location and engineering audacity. It recorded an estimated three million visitors between 1893 and 1938.

Today's visitors who hike to Echo Mountain will see portions of the railroad bed and crossties, a platform, trestle foundations, and scattered remains of the powerhouse's massive cog-wheel or ''bullwheel'' used to pull the incline car up the mountain. Nearby, visitors can also observe the remains of a once grand resort served by the Railway, including a staircase and the foundation footprint of a 70-room hotel, the remains of a zoo, the foundation of an observatory and telescope pedestal, two large concrete water tanks, and rock retaining walls outlining the tennis courts and casino. Visitors can also see remnants of a three million candlepower searchlight installed on the mountain from the 1893 Columbia Exposition World's Fair, and a largely intact, original ''echophone'' used by visitors to hear the canyon's echoes. A trestle abutment of the Railway can also be found near the Mount Lowe Campground. Nearby, at the head of Grand Canyon, visitors can see the rear wall of another of the resorts served by the Railway, the 12-room Swiss-style Ye Alpine Tavern.

To the north and west of the Railway, ruins of hike-in camps include the foundation of Switzer's Camp, developed by Commodore Perry Switzer in the early 1880s. That camp hosted Henry Ford, Shirley Temple, and numerous other celebrities.

The southeastern portion of the expansion area contains 64 cabins that were once part of the Big Santa Anita Canyon Summer Home Tract. This development was established to respond to the burgeoning early 20th century desire to be closer to, and have second homes in, natural settings. The tract originally contained 88 cabins and 12 associated campgrounds. Eligible for inclusion in the National Register of Historic Places, the cabins epitomized the rustic architectural design style of the early 20th century, and are notable for the care taken in sensitively siting them into the rugged topography.

Above El Prieto Canyon, in the southern portion of the expansion area, is the homestead site of a former cabin built and lived in by Robert Owens. Owens was a formerly enslaved person who built a thriving wood and building supply business in and around the canyon, becoming the wealthiest African American in Los Angeles County in 1865.

The expansion area also includes the historic Big Tujunga Dam, completed in 1931, and Brown Mountain Dam, constructed by the United States Forest Service (Forest Service) in 1943. The Lincoln Avenue Water Company water system is also in the area, which was constructed in the 1880s and is eligible for inclusion in the National Register of Historic Places.

The Los Pinetos Nike Missile site, which is eligible for inclusion in the National Register of Historic Places, played a vital role in United States national defense during the Cold War era. This site, along with the Mount Gleason Nike Missile site, which was destroyed by a wildfire in 2009, is among the 300 Nike Missile sites constructed across the country from 1955 to 1958 that were intended to serve as the last line of defense against Soviet bomber planes. The Los Pinetos Nike Missile site is unusual because its launch, administrative, and battery control facilities are located within a single line of sight.

In addition to extensive historical resources, the expansion area reflects massive geologic forces over hundreds of millions of years that created an exceptional landscape, providing views deep into the ancient Earth. The steep and rugged San Gabriel Mountains are one of the fastest growing mountain ranges in the world. These mountains form a major part of the east-west trending Transverse Ranges of southern California, a portion of which is in the expansion area. They were formed from eons of geological movement during the Mesozoic and Cenozoic Eras when the geologic Farallon Plate and the North American Plate crashed together. Dragged as much as 50 degrees in some places by these powerful forces, the San Gabriel Mountains have an unusual east-west orientation, instead of the more typical north-south orientation.

Around Mount Lowe, the uplift of rare anorthosite complex rocks that are 1.2 billion years old, including anorthosite pluton, syenite, and mafic rocks, reveals the dramatic twisting that can occur as mountains are formed. Evidence of this geological process typically lies far below the surface, making the area a hotbed of geological study and a natural classroom for the public. Around Mendenhall Peak, the bands and swirls of 1.7 to 1.8 billion-year-old Mendenhall Gneiss, the region's oldest rocks, are exposed.

The expansion area also contains scientifically important paleontological resources, particularly invertebrate fossils such as oysters and gastropods, at sites including Gold Canyon near Little Tujunga Canyon.

The expansion area is composed of many distinct and diverse ecosystem zones that support rich biodiversity, including more than 500 native plants and fungi, as well as important habitat including riparian woodlands, montane hardwood and conifer forests, coastal sage scrub, alluvial sage scrub, and extensive chaparral. The area also provides important connectivity to enable species to move from the foothills of the south to the soaring mountains of the north.

Perennial streams, springs, and associated riparian areas, and numerous seasonal tributaries, all support wetland-dependent plant species such as the California muhly and the Sonoran maiden fern, the latter of which

is designated as rare by the State of California. These riparian areas also provide critical habitat for sensitive fish and amphibians, including the threatened Santa Ana speckled dace and the threatened Santa Ana sucker found in Big Tujunga Creek, and the endangered Arroyo Toad found in both the Arroyo Seco and Big Tujunga Creek. Habitats for the steelhead trout and the Arroyo chub, a State species of special concern, are also found in Arroyo Seco and Big Tujunga Creek.

A rich variety of rare plants can be found in the expansion area, including the San Gabriel manzanita, San Gabriel Mountains leather oak, San Gabriel Mountains sunflower, San Gabriel bedstraw, and San Gabriel Mountains dudleya, all of which are found only or primarily in the San Gabriel Mountains, and the California muhly, fragrant pitcher sage, Greata's aster, and Plummer's mariposa lily, found only in southern California. Other rare species include the Mount Gleason paintbrush, California satintail, and Chaparral yucca, which is part of an extraordinary, mutually beneficial partnership with the interdependent California yucca moth.

While extremely reduced from its overall historic range, pockets of alluvial scrub habitat, particularly around Big Tujunga Canyon, provide a home for the rare endemic Davidson's bushmallow. Southern California's bigcone Douglas-fir, which is well adapted to the region's natural wildfire regime, is present in strongholds around San Gabriel Peak, the Switzer Falls Trail, and south of Mount Wilson, providing important nesting and roosting habitat for the California spotted owl, which the United States Fish and Wildlife Service has proposed to list as endangered.

Coastal sage scrub, among the most threatened plant communities in California, occurs primarily at elevations below 2,500 feet south of Mount Wilson and along the north side of Big Tujunga Creek. This rare plant community includes California sagebrush, brittlebush, California buckwheat, and various types of sage. Coastal sage scrub, which can be found in Placerita Canyon, provides critical habitat for the threatened coastal California gnatcatcher.

Montane hardwood and conifer forests south of Big Tujunga Bridge and Mount Wilson are typified by live oak, bigleaf maple, California bay, incense cedar, Pacific madrone, Coulter pine, sugar pine, and California incense cedar, as well as understory species such as ceanothus, coffeeberry, gooseberry, and currants. These forests provide habitat for a wide variety of wildlife such as black bears, mule deer, various reptiles, birds, and butterflies, as well as fish and amphibians that rely on the cool water found there. Birds that can be found seasonally or year-round in the expansion area include the endangered California condor and Least Bell's vireo; the threatened western population of yellow-billed cuckoo; the Swainson's hawk, which is listed as threatened by the State of California; the Peregrine falcon; and the California-listed willow flycatcher. The southwestern pond turtle, which the United States Fish and Wildlife Service has proposed to list as threatened, is also found in the area, along with the two-striped garter snake and the Southern California legless lizard, which are designated as sensitive species by the Angeles National Forest. Many species of bats use the area's canyons and waters, including the pallid bat and big free-tailed bat, both California special status species, along with migrants and resident bats, such as the hoary bat, Yuma myotis, small-footed myotis, canyon bat, big brown bat, Mexican free-tailed bat, long-eared myotis, and California myotis.

In addition to these key habitats, the area also contains important migration corridors that connect vulnerable habitats throughout the greater region. A striking example in the northwest portion of the expansion area is Bear Divide, which funnels thousands of migratory birds through a narrow pass along the Pacific Flyway, the primary avian migration route on the West Coast that extends from Central America to the Arctic. Another important corridor is the Arroyo Seco-Hahamongna Corridor, which connects the south-central portion of the expansion area to other nearby natural areas outside the Angeles National Forest boundary.

Despite its proximity to urban Los Angeles, the expansion area includes secluded and largely undeveloped areas such as the 4,700-acre Arroyo Seco Inventoried Roadless Area, which is an iconic landscape feature.

Protecting the expansion area will preserve an important spiritual, cultural, prehistoric, and historic landscape; maintain a diverse array of natural and scientific resources; and help ensure that the objects of historic and scientific interest within the area endure for the benefit of all Americans. As described above, the expansion area contains numerous objects of historic and scientific interest in need of protection. In addition, it provides exceptional outdoor recreational opportunities, including hiking, hunting, fishing, biking, horseback riding, backpacking, scenic driving, and wildlife viewing, all of which are important to residents of and visitors to the Los Angeles region.

WHEREAS, section 320301 of title 54, United States Code (the ''Antiquities Act''), authorizes the President, in his discretion, to declare by public proclamation historic landmarks, historic and prehistoric structures, and other objects of historic or scientific interest that are situated upon the lands owned or controlled by the Federal Government to be national monuments, and to reserve as a part thereof parcels of land, the limits of which shall be confined to the smallest area compatible with the proper care and management of the objects to be protected; and

WHEREAS, I find that each of the objects identified above, and objects of the type identified above within the area described herein, are objects of historic or scientific interest in need of protection under section 320301 of title 54, United States Code, regardless of whether they are expressly identified as an object of historic or scientific interest in the text of this proclamation; and

WHEREAS, I find that there are threats to the objects identified in this proclamation, and in the absence of a reservation under the Antiquities Act, the objects identified in this proclamation are not adequately protected by applicable law or administrative designations, thus making a national monument designation and reservation necessary to protect the objects of historic and scientific interest identified above for current and future generations; and

WHEREAS, I find that the boundaries of the monument reserved by this proclamation represent the smallest area compatible with the proper care and management of the objects of scientific or historic interest identified above, as required by the Antiquities Act; and

WHEREAS, it is in the public interest to ensure the preservation, restoration, and protection of the objects of scientific and historic interest identified above;

NOW, THEREFORE, I, JOSEPH R. BIDEN JR., President of the United States of America, by the authority vested in me by section 320301 of title 54, United States Code, hereby proclaim the objects identified above that are situated upon lands and interests in lands owned or controlled by the Federal Government to be part of the San Gabriel Mountains National Monument and, for the purpose of protecting those objects, reserve as part thereof all lands and interests in lands that are owned or controlled by the Federal Government within the boundaries described on the accompanying map, which is attached hereto and forms a part of this proclamation. The reserved Federal lands and interests in lands within the expansion area encompass approximately 105,919 acres. As a result of the distribution of the objects throughout the area, the boundaries described on the accompanying map are confined to the smallest area compatible with the proper care and management of the objects of historic or scientific interest identified above.

Nothing in this proclamation shall change the management of the areas protected under Proclamation 9194. The terms, conditions, and management direction provided by Proclamation 9194, including any term limiting the construction or effect of Proclamation 9194, are incorporated by reference

and shall apply to the area reserved by this proclamation except to the extent that they are inconsistent with a provision in this proclamation.

All Federal lands and interests in lands described on the accompanying map are hereby appropriated and withdrawn from all forms of entry, location, selection, sale, or other disposition under the public land laws or laws applicable to the Forest Service, other than by exchange that furthers the protective purposes of the monument; from location, entry, and patent under the mining laws; and from disposition under all laws relating to mineral and geothermal leasing.

This proclamation is subject to valid existing rights. If the Federal Government subsequently acquires any lands or interests in lands not currently owned or controlled by the Federal Government within the boundaries described on the accompanying map, such lands and interests in lands shall be reserved as a part of the monument, and objects of the type identified above that are situated upon those lands and interests in lands shall be part of the monument, upon acquisition of ownership or control by the Federal Government.

The Secretary of Agriculture (Secretary), through the Forest Service, shall manage the expansion area pursuant to applicable legal authorities and in accordance with the terms, conditions, and management direction provided by this proclamation and, as described above, those provided by Proclamation 9194.

The Secretary shall prepare, in consultation with the Secretary of the Interior, a management plan for the expansion area set forth in this proclamation, which shall include provisions for continuing outdoor recreational opportunities consistent with the proper care and management of the objects identified above, and shall promulgate such rules and regulations for the management of the expansion area as the Secretary shall deem appropriate. At the Secretary's discretion, such management plan may be included as a component of the existing management plan developed pursuant to Proclamation 9194. The Secretary shall provide for maximum public involvement in the development of the management plan, including consultation with Tribal Nations and meaningful engagement with Indigenous peoples that have cultural, traditional, or ancestral ties to the area, with community environmental, conservation, health, and justice organizations, and with State and local governments. To the maximum extent practicable, the Secretary shall carefully incorporate Indigenous Knowledge in the development and implementation of the management plan, work with Tribal Nations to appropriately protect that knowledge, and, to the extent practicable, explain any limitations on the Secretary's ability to protect such information from disclosure before it is shared with the Forest Service. The management plan shall provide for the protection and interpretation of the objects of scientific and historic interest identified above. The management plan shall also provide for continued public access to the area to the extent consistent with the protection of the objects identified above.

The Secretary, through the Forest Service, shall establish an advisory committee under chapter 10 of title 5, United States Code, to provide information and advice regarding the development of the management plan and management of the expansion area. The advisory committee shall consist of a fair and balanced representation of interested stakeholders, including State agencies and local governments; Tribal Nations and Indigenous peoples with cultural, traditional, or ancestral ties to the area; recreational users; conservation organizations; wildlife, hunting, and fishing organizations; the scientific community; business owners; and the general public in the region.

Nothing in this proclamation shall be deemed to revoke any existing withdrawal, reservation, or appropriation; however, the monument shall be the dominant reservation.

Warning is hereby given to all unauthorized persons not to appropriate, injure, destroy, or remove any feature of the monument and not to locate or settle upon any of the lands thereof.

If any provision of this proclamation, including its application to a particular parcel of land, is held to be invalid, the remainder of this proclamation and its application to other parcels of land shall not be affected thereby.

IN WITNESS WHEREOF, I have hereunto set my hand this second day of May, in the year of our Lord two thousand twenty-four, and of the Independence of the United States of America the two hundred and forty-eighth.

[Docket No. 240506–0127]

RIN 0694–AJ65

Conforming and Clarifying Changes to the Export Administration Regulations (EAR)

AGENCY: Bureau of Industry and Security, Department of Commerce.

ACTION: Final rule.

SUMMARY: This final rule makes conforming and clarifying changes to the Export Administration Regulations (EAR). These changes include making conforming changes to the EAR to ensure that destination names reflect the current destination names that are recognized by the United States Government, clarifying the removal of certain license requirements for exports, reexports, and transfers (in-country) to and within Australia and the United Kingdom, making a conforming change to reflect that Cyprus is no longer a Country Group D:5 country, and clarifying how Russia and the Russian Federation are referenced for consistency with the designation of Russia as a U.S. Arms Embargoed destinations.

DATES: This rule is effective May 30, 2024.

FOR FURTHER INFORMATION CONTACT: For questions on this rule, contact Philip Johnson at *RPD2@bis.doc.gov* or (202) 482–2440.

SUPPLEMENTARY INFORMATION:

I. Background

BIS is amending the EAR (15 CFR parts 730–774) by making conforming changes to the EAR to ensure that destination names reflect the current destination names that are recognized by the United States Government, by making conforming changes to ensure that the EAR reflects amendments and description of those amendments made pursuant to two recent rules, by making a conforming change to reflect that Cyprus is no longer a Country Group D:5 country, and by clarifying how Russia and the Russian Federation are referenced in the EAR to ensure consistency with the designation of Russia as a U.S. Arms Embargoed destination.

The four sets of changes this final rule makes are described in section II as follows:

A. Conforming changes to the Commerce Country Chart and Country Groups to ensure consistency with destinations names that are recognized by the United States Government;

B. Conforming changes to the Commerce Country Chart entries for Australia and the United Kingdom;

C. Conforming change to reflect Cyprus is no longer a Country Group D:5 country; *and*

D. Removing obsolete references to Russia and the Russian Federation in provisions that predate the country's addition to Country Group D:5.

II. Regulatory Changes

A. Conforming Changes to the Commerce Country Chart and Country Groups To Ensure Consistency With Destination Names That Are Recognized by the United States Government

This final rule in supplement no. 1 to part 738 (Commerce Country Chart) removes Swaziland from the Commerce Country Chart and replaces it, in alphabetical order, with Eswatini. On April 19, 2018, King Mswati III declared that the country be known as the Kingdom of Eswatini, rather than the Kingdom of Swaziland. BIS makes this change to conform to King Mswati III's declaration, as subsequently formally recognized by the State Department (*see https://www.state.gov/countries-areas/eswatini/*). This final rule also removes Macedonia (The Former Yugoslav Republic of) from the Commerce Country Chart and replaces it, in alphabetical order, with North Macedonia. BIS makes this change to the conform to the State Department's formal recognition of the new name in February 2019 (*see https://history.state.gov/countries/macedonia*). Lastly, this final rule removes Turkey from the Commerce Country Chart and replaces it, in alphabetical order, with Türkiye. BIS makes this change to conform to the State Department's recognition on January 9, 2023 of the new country's new name (*see https://www.state.gov/countries-areas/turkey/*). This rule revises only the names of the three countries; the information set forth in each of the three entries otherwise remains the same.

As a conforming change to the changes made to the Commerce Country Chart described above, this final rule removes Swaziland from Country Group B in supplement no. 1 to part 740, Country Groups), and replaces it (in alphabetical order) with Eswatini. Similarly, this rule removes Macedonia (the Former Yugoslav Republic of) from Country Group B and replaces it, in alphabetical order, with North Macedonia.

B. Conforming Changes to Commerce Country Chart Entries for Australia and the United Kingdom

This final rule also revises the Commerce Country Chart entries for Australia and the United Kingdom in supplement no. 1 to part 738 to align with the policy decisions and regulatory changes described and implemented in the August 19, 2024 interim final rule, ''Export Control Revisions for Australia, United Kingdom, United States (AUKUS) Enhanced Trilateral Security Partnership'' (89 FR 28594, published and effective on April 19, 2024) (April 19 IFR). Specifically, the April 19 IFR removed the license requirements for national security column 1 (NS1), regional stability column 1 (RS1), and missile technology column 1 (MT1) reasons for control for these two countries, as well as the footnote 3 designations for both of these countries, because the license requirements referenced in footnote 3 were no longer applicable.

This rule corrects inadvertent errors in which a subsequent interim final rule, ''Revisions of Firearms License Requirements'' (89 FR 34680, published on April 30, 2024, and effective on May 30, 2024) (April 30 IFR), erroneously included an ''X'' under the NS1, RS1, and MT1 reasons for control for Australia and the United Kingdom and also erroneously included the previously-applicable footnote 3 designation for these two countries. This final rule revises the entries for

Australia and the United Kingdom by removing the license requirement for NS1, RS1, and MT1, as well as the footnote 3 designation, for consistency with the intended regulatory changes described in the April 19 IFR.

The changes in this final rule described under this section II.B are limited to removing text (as described above) that inadvertently appeared in the two Commerce Country Chart entries. The April 30 IFR correctly removed the footnote 9 designation for Australia and the United Kingdom. The April 30 IFR addressed the license requirement described in footnote 9 for these two destinations by adding an ''X'' in the crime control column 2 (CC2) reason for control for these two countries.

C. Conforming Change to Reflect the Fact That Cyprus is No Longer a Country Group D:5 Country

The U.S. State Department recently amended § 126.1 of the International Traffic in Arms Regulations (ITAR) (22 CFR parts 120 through 130) to specify that Cyprus's status as a proscribed destination is suspended from October 1, 2023 through September 30, 2024 (see 88 FR 63016). Consistent with this change, Cyprus was effectively removed from Country Group D:5. As set forth in the Note to Country Group D:5 in supplement no. 1 to part 740 of the EAR, if there are any discrepancies between the list of D:5 countries and the countries identified by the Department of State as subject to a U.S. arms embargo, the State Department's list shall be controlling. To avoid confusion on the part of exporters, reexporters, and transferors, this final rule removes Cyprus from D:5. D:5 was the only ''X'' in the entry for Cyprus under Country Group D, so the entry is no longer needed.

D. Removing, for Clarity, References to Russia and the Russian Federation for Provisions That Also extend to Country Group D:5

The final rule, ''Implementation of Sanctions Against Russia Under the Export Administration Regulations (EAR)'' (87 FR 12226, published March 3, 2022, and effective February 24, 2022), included amendments to supplement no. 1 to part 740 (Country Groups) of the EAR consistent with the ITAR § 126.1. The March 3 final rule updated the Country Group designation for Russia in supplement no. 1 to part 740 to reflect its identification by the Department of State as a country subject to a United States arms embargo. As noted above, BIS harmonizes the arms embargo-related provisions in the EAR with the Directorate of Defense Trade Control's (DDTC's) regulation of arms embargoes in § 126.1 of the ITAR. Three sections of the EAR, which predated the March 18, 2021 (*see* 86 FR 14802) addition of Russia to § 126.1 under the ITAR, continued to separately identify Russia or the Russian Federation from Country Group D:5. These references are unnecessary due to the fact that Russia was subsequently added to Country Group D:5. Specifically, this final rule revises § 734.18(a)(5)(iv); § 740.9(a) introductory text (the fourth and seventh sentences) and paragraph (b)(5)(ii); and § 758.10, Note 1 to paragraph (b)(1), by removing references to Russia or the Russian Federation when the same sentence also refers to Country Group D:5. In the case of § 740.9(b)(5)(ii), the broader exclusion under paragraph (b)(5)(i) means the narrow exclusion under (b)(5)(ii) should not include Russia, which is subject to the broader exclusion as a Country Group D:5 country.

Export Control Reform Act of 2018

On August 13, 2018, the President signed into law the John S. McCain National Defense Authorization Act for Fiscal Year 2019, which included the Export Control Reform Act of 2018 (ECRA), 50 U.S.C. 4801–4852. ECRA, as amended, provides the legal basis for BIS's principal authorities and serves as the authority under which BIS issues this rule.

Rulemaking Requirements

1. BIS has examined the impact of this rule as required by Executive Orders 12866, 13563, and 14094. Pursuant to E.O. 12866, as amended by E.O. 14094, this final rule has not been determined to be a ''significant regulatory action.''

2. Notwithstanding any other provision of law, no person is required to respond to or be subject to a penalty for failure to comply with a collection of information, subject to the requirements of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*) (PRA), unless that collection of information displays a currently valid Office of Management and Budget (OMB) Control Number. This regulation involves an information collection approved by OMB under control number 0694–0088, Simplified Network Application Processing System. BIS does not anticipate a change to the burden hours associated with this collection as a result of this rule. Information regarding the collection, including all supporting materials, can be accessed at *https://www.reginfo.gov/public/do/PRAMain.*

3. This rule does not contain policies with federalism implications as that term is defined under Executive Order 13132.

4. Pursuant to Section 1762 of ECRA (50 U.S.C. 4821), this action is exempt from the Administrative Procedure Act (APA) (5 U.S.C. 553) requirements for notice of proposed rulemaking, opportunity for public participation and delay in effective date. Additionally, this rule is exempt from the ordinary rulemaking requirements of the APA pursuant to 5 U.S.C. 553(a)(1) as a military or foreign affairs function of the United States Government.

5. Because neither the APA nor any other law requires that notice of proposed rulemaking and an opportunity for public comment be given for this rule, the analytical requirements of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) are not applicable. Accordingly, no Final Regulatory Flexibility Analysis is required, and none has been prepared.

List of Subjects

15 CFR Part 734

Administrative practice and procedure, Exports, Inventions and patents, Research, Science and technology.

15 CFR Part 738

Administrative practice and procedure, Exports, Reporting and recordkeeping requirements.

15 CFR Part 740

Administrative practice and procedure, Exports, Reporting and recordkeeping requirements.

15 CFR Part 758

Administrative practice and procedure, Exports, Reporting and recordkeeping requirements.

Exports, Reporting and recordkeeping requirements.

Accordingly, parts 734, 738, 740, and 758 of the Export Administration Regulations (15 CFR parts 730–774) are amended as follows:

PART 734—SCOPE OF THE EXPORT ADMINISTRATION REGULATIONS

■ 1. The authority citation for 15 CFR part 734 is revised to read as follows:

Authority: 50 U.S.C. 4801–4852; 50 U.S.C. 4601 *et seq.;* 50 U.S.C. 1701 *et seq.;* E.O. 12938, 59 FR 59099, 3 CFR, 1994 Comp., p. 950; E.O. 13020, 61 FR 54079, 3 CFR, 1996 Comp., p. 219; E.O. 13026, 61 FR 58767, 3 CFR, 1996 Comp., p. 228; E.O. 13222, 66 FR 44025, 3 CFR, 2001 Comp., p. 783; E.O. 13637, 78 FR 16129, 3 CFR, 2014 Comp., p. 223; Notice of November 1, 2023, 88 FR 75475 (November 3, 2023).

■ 2. Section 734.18(a)(5) is amended by revising paragraph (a)(5)(iv) to read as follows:

§ 734.18 Activities that are not exports, reexports, or transfers.

(a) * * *

(5) * * *

(iv) Not intentionally stored in a country listed in Country Group D:5 (*see* supplement no. 1 to part 740 of the EAR).

Note 1 to paragraph (a)(5)(iv): Data in-transit via the internet is not deemed to be stored.

* * * * *

PART 738—COMMERCE CONTROL LIST OVERVIEW AND THE COUNTRY CHART

■ 3. The authority citation for 15 CFR part 738 continues to read as follows:

Authority: 50 U.S.C. 4801–4852; 50 U.S.C. 4601 *et seq.;* 50 U.S.C. 1701 *et seq.;* 10 U.S.C. 8720; 10 U.S.C. 8730(e); 22 U.S.C. 287c; 22 U.S.C. 2151 note; 22 U.S.C. 3201 *et seq.;* 22 U.S.C. 6004; 42 U.S.C. 2139a; 15 U.S.C. 1824; 50 U.S.C. 4305; 22 U.S.C. 7201 *et seq.;* 22 U.S.C. 7210; E.O. 13026, 61 FR 58767, 3 CFR, 1996 Comp., p. 228; E.O. 13222, 66 FR 44025, 3 CFR, 2001 Comp., p. 783.

■ 4. Supplement no. 1 to part 738 is amended by:

■ a. Revising the entry for ''Australia'';

■ b. Adding an entry for ''Eswatini'' in alphabetical order;

■ c. Removing the entries for ''Macedonia (The Former Yugoslav Republic of)'';

■ d. Adding an entry for ''North Macedonia'' in alphabetical order;

■ e. Removing the entry for ''Swaziland'';

■ f. Removing the entry for ''Turkey''; and

■ g. Adding an entry for ''Türkiye'' in alphabetical order.

■ h. Revising the entry for the ''United Kingdom'';

The additions and revisions read as follows:

Supplement No. 1 to Part 738—Commerce Country Chart

* * * * *

Countries	Chemical & biological weapons			Nuclear non-proliferation		National security		Missile tech	Regional stability		Firearms convention	Crime control			Anti-terrorism	
	CB 1	CB 2	CB 3	NP 1	NP 2	NS 1	NS 2	MT 1	RS 1	RS 2	FC 1	CC 1	CC 2	CC 3	AT 1	AT 2

PART 740—LICENSE EXCEPTIONS

■ 5. The authority citation for 15 CFR part 740 continues to read as follows:

Authority: 50 U.S.C. 4801–4852; 50 U.S.C. 4601 *et seq.;* 50 U.S.C. 1701 *et seq.;* 22 U.S.C. 7201 *et seq.;* E.O. 13026, 61 FR 58767, 3 CFR, 1996 Comp., p. 228; E.O. 13222, 66 FR 44025, 3 CFR, 2001 Comp., p. 783.

■ 6. Section 740.9 is amended by:

■ a. Removing ''Russia,'' in the fourth and seventh sentences of paragraph (a) introductory text wherever it appears; and

■ b. Removing ''Russia,'' in paragraph (b)(5)(ii) wherever it appears.

■ 7. Supplement no. 1 to part 740 is amended by:

■ a. In the ''Country Group A'' and ''Country Group B'' tables, removing the entry for ''Turkey'' and adding an entry for ''Türkiye'' in alphabetical order;

■ b. In the ''Country Group B'' table:

■ i. Adding an entry for ''Eswatini'' in alphabetical order;

■ i. Removing the entry for ''Macedonia, The Former Yugoslav Republic of'', and adding an entry for ''North Macedonia'' in alphabetical order;

■ ii. Removing the entry for ''Swaziland''; and

■ c. In the ''Country Group D'' table, removing the entry for Cyprus.

The additions and revisions read as follows:

Supplement No. 1 to Part 740—Commerce Country Chart

COUNTRY GROUP A

Country	[A:1] Wassenaar participating states [1]	[A:2] Missile technology control regime [2]	[A:3] Australia group	[A:4] Nuclear suppliers group [3]	[A:5]	[A:6]
*	*	*	*	*	*	
Türkiye	X	X	X	X	X	
*	*	*	*	*	*	

* * * * * * *

[1] Country Group A:1 is a list of the Wassenaar Arrangement Participating States, except for Malta, Russia and Ukraine.

[2] Country Group A:2 is a list of the Missile Technology Control Regime countries, except for Russia.

[3] Country Group A:4 is a list of the Nuclear Suppliers Group countries, except for the People's Republic of China (PRC), Russia, and Belarus.

* * * * *

Country Group B—Countries

* * * * *

Eswatini

* * * * *

North Macedonia

* * * * *

PEACE CORPS

22 CFR Part 303

RIN 0420–AA31

Procedures for Disclosure of Information Under the Freedom of Information Act; Correction

AGENCY: The Peace Corps.

ACTION: Final rule; correction.

SUMMARY: The Peace Corps is correcting a final rule that appeared in the **Federal Register** on April 11, 2024. This final rule amends the regulations that the Peace Corps follows in processing requests under the Freedom of Information Act (FOIA) to comply with the FOIA Improvement Act of 2016. These amendments clarify and update procedures for requesting information from the Peace Corps and procedures that the Peace Corps follows in responding to requests from the public for information.

DATES: Effective May 13, 2024.

FOR FURTHER INFORMATION CONTACT: David van Hoogstraten, 202–692–2150, *policy@peacecorps.gov.*

SUPPLEMENTARY INFORMATION: In FR Doc. 2024–06800, appearing on page 25519 in the **Federal Register** on Thursday, April 11, 2024, the following corrections are made:

§§ 303.11 and 303.12 [Corrected]

■ 1. On page 25525, in the third column, in part 303, in amendment 12, the instruction ''Redesignate §§ 303.11 and 303.12 as §§ 303.13 and 303.14, respectively'' is corrected to read ''Redesignate §§ 303.11 and 303.12 as §§ 303.12 and 303.13, respectively.''

Dated: May 6, 2024.

James Olin,

FOIA and Privacy Officer.

BILLING CODE 6051–01–P

DEPARTMENT OF THE TREASURY

Office of Foreign Assets Control

31 CFR Part 501

Reporting, Procedures and Penalties Regulations

AGENCY: Office of Foreign Assets Control, Treasury.

ACTION: Interim final rule; request for comments.

SUMMARY: The Department of the Treasury's Office of Foreign Assets Control (OFAC) is issuing this interim final rule to amend the Reporting, Procedures and Penalties Regulations (the ''Regulations''), to require electronic filing of certain submissions to OFAC and to describe and modify certain reporting requirements related to blocked property and rejected transactions. In particular, the rule would require use of the electronic OFAC Reporting System for submission of reports related to blocked property and rejected transactions, remove the mail option for certain other types of OFAC submissions, describe reports OFAC may require from financial institutions for transactions that meet specified criteria, and add a reporting requirement for any blocked property that is unblocked or transferred. Additionally, OFAC is clarifying the scope of the reporting requirement for rejected transactions, in part to respond to comments received on the interim final rule OFAC published on June 21, 2019 to amend the Regulations. Further, OFAC is modifying the procedures for requests relating to property that is blocked in error and updating the Regulations with respect to the availability of information under the Freedom of Information Act (FOIA) for certain categories of records. OFAC is also clarifying that persons may submit a petition for administrative reconsideration to seek removal of a person or property from the List of Specially Designated Nationals and Blocked Persons or any other list of sanctioned persons maintained by OFAC. OFAC is also adding a description of reports OFAC may require financial institutions to provide about transactions that meet specified criteria to aid in the identification of blocked property. Finally, OFAC is making several technical and conforming edits. OFAC is soliciting public comments for 30 days on this interim final rule.

DATES: This interim final rule is effective August 8, 2024. Written comments may be submitted on or before June 10, 2024.

ADDRESSES: You may submit comments via the following methods, electronic is preferred:

Federal eRulemaking Portal: www.regulations.gov. Follow the instructions on the website for submitting comments. Refer to Docket Number OFAC–2024–0002.

Mail: Office of Foreign Assets Control, U.S. Department of the Treasury, Treasury Annex/Freedman's Bank Building, 1500 Pennsylvania Avenue NW, Washington, DC 20220. Refer to Docket Number OFAC–2024–0002.

Instructions: All submissions received must include the agency name and the **Federal Register** Doc. number that appears at the end of this document. All comments, including attachments and other supporting materials, will become part of the public record and subject to public disclosure. Sensitive personal information, such as account numbers or Social Security numbers, should not be included. Comments generally will not be edited to remove any identifying or contact information.

FOR FURTHER INFORMATION CONTACT: Assistant Director for Licensing, 202–622–2480; Assistant Director for Regulatory Affairs, 202–622–4855; Assistant Director for Compliance, 202–622–2490.

SUPPLEMENTARY INFORMATION:

Background

The Regulations (31 CFR part 501), originally issued August 25, 1997 (62 FR 45098), set forth standard reporting and recordkeeping requirements, license application procedures, and other procedures relevant to the economic sanctions programs administered by OFAC. As described further below, OFAC is providing updates within nine sections of the Regulations: §§ 501.602, 501.603, 501.604, 501.605, 501.801, 501.804, 501.805, 501.806, and 501.807.

Electronic Filing of Submissions

OFAC Reporting System for reports of blocked property and rejected transactions. This interim final rule would generally require filers to use the electronic OFAC Reporting System (ORS) for submission to OFAC of initial reports of blocked property and Annual Reports of Blocked Property pursuant to § 501.603(d) and reports of rejected transactions pursuant to § 501.604(d), beginning on August 8, 2024. Electronic submission of reports improves efficiencies in reporting and reviewing data, and thus reduces the overall burden on both filers and the U.S. government over the long term. Many filers currently use ORS, on a voluntary basis, to submit initial reports of blocked property, Annual Reports of Blocked Property, and reports of rejected transactions. OFAC encourages filers to become familiar with ORS and to submit reports using that system in advance of the August 8, 2024 deadline. If a submitter can provide evidence of unique and extraordinary circumstances that would not permit the electronic filing of reports, such as lack of access to the internet, the submitter may request to submit reports in an alternative manner by calling 202–622–2490. Such requests will be subject to a presumption of denial and granted only in writing.

Email Submission of Other Reports. OFAC is amending several sections of the Regulations to require electronic submissions and to remove options for mail submission. OFAC is amending § 501.603(d)(2) to require electronic submission of reports of unblocked or transferred blocked property, as required pursuant to revised § 501.603(b)(3)(i). OFAC will accept such reports of unblocked or transferred blocked property pursuant to revised § 501.603(b)(3)(i) via either email or ORS. OFAC is also amending § 501.605(a) of the Regulations to require submission of the documentation and notifications required therein by email, given the time sensitivity of these reports, and to remove the options for submission by facsimile or mail. Finally, OFAC is requiring email submission or removing the options for mail submission in the following sections of the Regulations: §§ 501.804, 501.805, 501.806, and 501.807. Electronic submission and use of OFAC's website will allow for more efficient receipt and processing of reports and requests from the public.

Reports of Unblocked or Transferred Blocked Property

OFAC is revising § 501.603(b)(3)(i) to require reports within 10 business days of when blocked property is unblocked or transferred, including pursuant to a valid order issued by a U.S. government agency or U.S. court, as set out in that paragraph. This amendment will enable OFAC to ascertain the current status of blocked and unblocked property. Reports need not be submitted for credits of interest payments that would not be transfers of blocked property or debits to blocked accounts for normal service charges, in each case as authorized pursuant to OFAC sanctions. As noted above, filers must submit reports pursuant to this section electronically, either via email to *OFACReport@treasury.gov* or via ORS. Additionally, in revised § 501.603(d)(1), OFAC is expanding the retention requirement previously in § 501.603(b)(2)(iii) for Annual Reports of Blocked Property to extend to initial reports of blocked property.

Reports of Rejected Transactions

OFAC is revising elements of § 501.604 in response to public comments received on the June 21, 2019, interim final rule (84 FR 29055), which expanded the scope of the reporting requirement for rejected transactions.

Clarifying the definition of ''transaction.'' Several commenters requested clarity on the scope and types of rejected transactions that need to be reported to OFAC by non-financial institutions. In response to these comments, OFAC is amending § 501.604(a) to clarify the scope of the term ''transaction'' for purposes of that section by specifying that the term includes transactions related to securities, checks, or foreign exchange, as well as sales or purchases of goods or services, thereby clarifying that securities, checks, foreign exchange, and goods and services are not in and of themselves transactions, when not provided as part of a transaction.

Confirmation of the scope of the term ''U.S. persons.'' OFAC received several comments that requested clarity about whether the term ''U.S. persons,'' as used in § 501.604, includes U.S. persons other than U.S. financial institutions. OFAC confirms that this reporting requirement applies to all U.S. persons, as identified in the relevant parts of this chapter (or in the case of part 515, persons subject to U.S. jurisdiction), not only U.S. financial institutions.

Clarifying information that must be reported for rejected transactions. Comments received by OFAC also noted that not all information required by OFAC may be readily available at the time a transaction is rejected, and, in many cases, it would be burdensome and sometimes impractical for filers to seek out additional information about transactions that they have already rejected. In light of these concerns, OFAC is amending § 501.604(b) to clarify that the information required therein must be reported only to the extent the information is available to the filer at the time the transactions was rejected.

Additional responses to public comments. Many comments received by OFAC anticipated that the interim final rule would cause a large increase in the volume of rejected transaction reports from non-financial institutions, which the comments suggest would be overly burdensome for businesses to submit as well as for OFAC to review. Since the publication of the interim final rule, however, OFAC has not received a large number of reports of rejected transactions from non-financial institutions as compared to the number of such reports from financial institutions. OFAC does not expect the volume of reported rejected transactions to be overly burdensome for businesses, particularly given that OFAC is providing additional clarity on the scope of rejected transaction reporting through this rule.

Some commenters expressed concerns about the ability to identify all rejected transactions and provide all requested information in a timely manner without significant costs, particularly if this information was not already being gathered in the course of rejecting a transaction. As noted above, OFAC is amending the Regulations to require reporting of only the information that is available to the filer at the time the transaction is rejected. OFAC notes that many businesses already have systems to identify rejected transactions related to OFAC sanctions, so it would be less burdensome for those specific businesses to report those rejected transactions to OFAC. However, OFAC recognizes that there may have been an up-front increase in burden and costs for other businesses, such as some non-financial institutions, that did not already have such a system to identify rejected transactions in place.

OFAC received a few comments questioning the utility to OFAC of receiving rejected transaction reports, particularly from U.S. non-financial institutions. OFAC continues to believe that these reports are valuable to OFAC in supporting its mission, including to identify attempts by sanctioned persons

to utilize both financial and non-financial institutions to evade sanctions or further illicit activity.

Compliance Release Requests for Property Blocked Due to Mistaken Identity or Other Similar Errors

OFAC is revising the procedures at § 501.806 for requesting release of funds blocked due to ''mistaken identity'' to extend to a broader category of any property blocked due to ''typographical or similar errors leading to blocking.'' OFAC is also narrowing the procedures so they are available only to the person that mistakenly blocked the property. In these cases, the person that mistakenly blocked the property may request a ''Compliance Release'' from OFAC's Compliance Division. Others may continue to request unblocking of property through license applications submitted to OFAC's Licensing Division.

Rules Regarding the Availability of Information

In §§ 501.603(e), 501.604(e), and 501.801(b)(6), OFAC is updating the rules governing the availability of information under FOIA for certain categories of information that are submitted to OFAC pursuant to the Regulations, to clarify that such information will generally be protected from disclosure if OFAC determines that an exemption or exclusion under FOIA applies or the disclosure is otherwise prohibited by law.

Procedures for Delisting

In § 501.807, OFAC is clarifying that persons may submit a petition for administrative reconsideration to seek removal of a person or property from the List of Specially Designated Nationals and Blocked Persons (SDN List) or any other list of sanctioned persons maintained by OFAC, and making a technical update to the contact information, including to require submission by email.

Instruction To Report Certain Transactions

OFAC is adding a note to § 501.602 to describe reports OFAC may require financial institutions to provide about accounts or transactions that meet specified criteria to aid in the identification of blocked property. If OFAC has reason to believe an account or transaction (or class of transactions) may involve the property or interests in property of a blocked person, OFAC may instruct the financial to report transactions that meet specified criteria and to notify OFAC prior to processing such transactions. Upon review, OFAC may determine that a reported transaction involves the property or interests in property of a blocked person and may take further action.

Other Technical and Conforming Changes

OFAC is updating the instructions in §§ 501.603(b)(2)–(3), 501.801(b)(2), and 501.806(d)(5) to request the relevant ORS identification numbers, when available, to support efficient processing of these reports. OFAC is making edits throughout §§ 501.603, 501.604, 501.801, and 501.805 to update the OFAC website links. OFAC is amending § 501.804(b) to add contact information for OFAC. OFAC is also amending §§ 501.603(a)(1) and 501.604 to make clear that the reporting requirements extend to persons subject to U.S. jurisdiction in the case of the Cuban Assets Control Regulations, 31 CFR part 515. Additionally, OFAC is amending § 501.805(a) and (b) to make clear that OFAC records required by FOIA shall be made available in accordance with the provisions of the Regulations in addition to referenced provisions of 31 CFR part 1. OFAC is also amending § 501.805(c) to add an OFAC website link to obtain forms and remove the mail, phone, and in person options.

Electronic Availability

This document and additional information concerning OFAC are available on OFAC's website: *https://ofac.treasury.gov.*

Public Participation

Because the amendment of the Regulations is a rule of agency procedure and involves a foreign affairs function, the provisions of Executive Order 12866 of September 30, 1993, ''Regulatory Planning and Review'' (58 FR 51735, October 4, 1993), as amended, and the Administrative Procedure Act (5 U.S.C. 553) requiring notice of proposed rulemaking, opportunity for public participation, and delay in effective date are inapplicable. Because no notice of proposed rulemaking is required for this rule, the Regulatory Flexibility Act (5 U.S.C. 601–612) does not apply.

Paperwork Reduction Act

Pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3507), the collections of information related to the Regulations have been previously approved by the Office of Management and Budget (OMB) under control number 1505–0164. This interim final rule modifies the requirements for certain of the collections of information under the Regulations, such as requiring use of electronic submission for certain reports and clarifying the scope of certain reporting requirements. Specifically, in §§ 501.603 and 501.604, the rule would mandate the use of electronic filing via ORS for initial reports of blocked property and reports of rejected transactions, as well as Annual Reports of Blocked Property, in order to improve efficiencies for both filers and the U.S. government. In addition, OFAC is revising § 501.603(b)(3)(i) to require reports not only when blocked property is unblocked, but also when it is transferred, such as pursuant to a valid order from a U.S. government agency or U.S. court, as further set out in that paragraph. In § 501.604, OFAC is clarifying the scope of rejected transactions and associated information that must be reported to reduce unnecessary burdens on filers. Additionally, the rule will amend § 501.605(a) of the Regulations to allow for only electronic submission of the documentation and notifications required therein, given the time sensitivity of these reports, and to remove the options for submission by facsimile or mail. The rule will also remove the options for mail submission or require email submission in the following sections of the Regulations: §§ 501.804, 501.805, 501.806, and 501.807. OFAC is making other technical and conforming edits in the rule to increase the presence of websites and use electronic reporting, such as in §§ 501.603, 501.604, and 501.801 to update the OFAC website links. Finally, OFAC is amending § 501.805(c) to add an OFAC website link to obtain forms.

These modifications to the collections of information under the Regulations have been submitted to OMB for review and approval under control number 1505–0164. Written comments and recommendations for the modified collection can be submitted by visiting *www.reginfo.gov/public/do/PRAMain.* Find this document by selecting ''Currently Under Review—Open for Public Comments'' or by using the search function. Comments are welcome and must be received by June 10, 2024.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection of information displays a valid control number.

The likely filers and record-keepers affected by these collections of information contained in 31 CFR part 501 are financial institutions, business organizations, nonprofit organizations, individuals, and legal representatives.

Since OFAC's last filing in June 2021, OFAC has reviewed the data on

reporting received and processed between April 4, 2022, and April 4, 2023, to estimate the reporting burden, as set forth below. Given the number and type of reports received and processed during this period, the overall burden of the recordkeeping requirement imposed by § 501.601 is estimated to increase, largely due to the imposition of a broad range of sanctions in response to Russia's unjustified and unprovoked invasion of Ukraine in February 2022, which has led to a large influx of related reporting.

Additionally, the new electronic reporting mandate for some reports may impose initial costs on businesses that do not already file such reports electronically. OFAC is taking into account this potential initial increase in burden and cost for some parts of the private sector in its updated Supporting Statement related to this regulatory amendment. However, in the long term, OFAC expects the use of electronic reporting via ORS to reduce the overall time, cost, and burden of reporting for filers. OFAC estimates that, during the first three months of 2023, less than 1% (estimated 0.03%) of reports for blocked property or rejected transactions were submitted to OFAC using non-electronic methods, while approximately 96% of reports were submitted electronically via ORS, and approximately 3% of reports were submitted electronically to OFAC via email. In its updated Supporting Statement related to this regulatory amendment, OFAC is taking into account a potential small initial increase in burden and cost for the small number of filers (an estimated 3%) who would need to transition from filing reports via traditional mail service or via email to the new ORS electronic system. Overall, OFAC estimates that there should be a minimal overall burden in mandating electronic submission via ORS because nearly all filers currently send reports to OFAC via ORS.

The total burden for this collection is estimated to be:

Estimated Number of Respondents: 136,784.

Frequency of Response: On occasion.

Estimated Total Number of Annual Responses: 136,784.

Estimated Time per Response: Varies by form from 15 minutes to 5 hours.

Estimated Total Annual Burden Hours: 44,220.

Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information has practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services required to provide information.

List of Subjects in 31 CFR Part 501

Administrative practice and procedure, Banks, Banking, Exports, Foreign trade, Licensing and registration, Penalties, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, OFAC amends 31 CFR part 501 as follows:

PART 501—REPORTING, PROCEDURES AND PENALTIES REGULATIONS

■ 1. The authority citation for part 501 continues to read as follows:

Authority: 8 U.S.C. 1189; 18 U.S.C. 2332d, 2339B; 19 U.S.C. 3901–3913; 21 U.S.C. 1901–1908; 22 U.S.C. 287c, 2370(a), 6009, 6032, 7205, 8501–8551; 31 U.S.C. 321(b); 50 U.S.C. 1701–1706, 4301–4341; Pub. L. 101–410, 104 Stat. 890, as amended (28 U.S.C. 2461 note).

■ 2. Amend § 501.602 by redesignating Note 1 to § 501.602 as Note 2 to § 501.602 and adding new Note 1 to § 501.602 to read as follows:

§ 501.602 Reports to be furnished on demand.

* * * * *

Note 1 to § 501.602. If OFAC has reason to believe an account or transaction (or class of transactions) may involve the property or interests in property of a blocked person, OFAC may issue an instruction to one or more financial institutions that: (1) provides information or criteria to aid in the identification of blocked property; and (2) requires the financial institution to report transactions that meet the specified criteria and notify OFAC prior to processing such transactions. Upon review, OFAC may determine that a reported transaction involves the property or interests in property of a blocked person and take further action.

* * * * *

■ 3. Amend § 501.603 by:
■ a. Revising the section heading;
■ b. Revising and republishing paragraph (a);
■ c. Redesignating paragraphs (b)(1)(ii)(G) and (H) as paragraphs (b)(1)(ii)(H) and (I), respectively, adding new paragraph (b)(1)(ii)(G), and revising newly redesignated paragraph (b)(1)(ii)(H);
■ d. In paragraph (b)(2)(ii)(F), remove the ''and'' at the end of the paragraph;
■ e. Revising (b)(2)(ii)(G);
■ f. Adding a new paragraph (b)(2)(ii)(H);
■ g. Removing paragraph (b)(2)(iii);
■ h. Revising the paragraph heading to paragraph (b)(3);
■ i. Revising paragraph (b)(3)(i);
■ j. In paragraph (b)(3)(ii)(A), add ''or transfer'' after ''unblocking'';
■ k. Revising paragraphs (b)(3)(ii)(F) and (b)(3)(ii)(G);
■ l. Adding Note 1 to paragraph (b)(3); and
■ m. Revising and republishing paragraphs (d) and (e).

The revisions, republications, and additions to read as follows:

§ 501.603 Reports of blocked, unblocked, or transferred blocked property.

(a) *Who must report*—(1) *Persons holding, unblocking, or transferring blocked property.* Any U.S. person (or person subject to U.S. jurisdiction in the case of part 515 of this chapter), including a financial institution, holding, unblocking, or transferring property blocked pursuant to this chapter shall submit the relevant reports described in this section to the Office of Foreign Assets Control (OFAC). This requirement applies to all U.S. persons (or persons subject to U.S. jurisdiction in the case of part 515 of this chapter), who have in their possession or control any property blocked pursuant to this chapter, including financial institutions that receive and block payments or transfers, or who have had in their possession or control such property that is unblocked or transferred, as set out in paragraph (b) of this section.

(2) *Primary responsibility to report.* A report may be filed on behalf of a person who holds, transfers, or releases blocked property by an attorney, agent, or other person. Primary responsibility for reporting, however, rests with the actual holder, transferrer, or releaser of the property, or the person exercising control over property located outside the United States, with the following exceptions: primary responsibility for reporting any trust assets rests with the trustee; and primary responsibility for reporting real property rests with any U.S. co-owner, legal representative, agent, or property manager in the United States. No person is excused from filing a report by reason of the fact that another person has submitted a report with regard to the same property, except upon actual knowledge of the report filed by such other person.

(3) *Financial institution.* For purposes of this section, the term ''financial institution'' includes a banking institution, domestic bank, United States depository institution, financial

institution, or U.S. financial institution, as those terms are defined in the applicable part of this chapter.

(b) * * *

(1) * * *

(ii) * * *

(G) Any action taken with respect to the property (*e.g.,* depositing the property into a new or existing blocked, interest-bearing account that is labeled as such and is established in the name of, or contains a means of clearly identifying the interest of, the person subject to blocking pursuant to the requirements of this chapter);

(H) The legal authority or authorities under which the property is blocked. This may include a reference to the sanctions program (current programs are on OFAC's website: *https://ofac.treasury.gov*), the applicable part of this chapter (*e.g.,* 31 CFR part 515, 31 CFR part 544), an Executive order (E.O.) (*e.g.,* E.O. 13224, E.O. 13599), or a statute (*e.g.,* Foreign Narcotics Kingpin Designation Act). (*Note:* For this purpose, the term ''SDN'' is generic and cannot be used to identify the legal authority for blocking property); and

(2) * * *

(ii) * * *

(G) The legal authority or authorities under which the property is blocked. This may include a reference to the sanctions program (current programs are listed here: *https://ofac.treasury.gov*), the applicable part of this chapter (*e.g.,* 31 CFR part 515, 31 CFR part 544), an Executive order (E.O.) (*e.g.,* E.O. 13224, E.O. 13599), or a statute (*e.g.,* Foreign Narcotics Kingpin Designation Act). (*Note:* For this purpose, the term ''SDN'' is generic and cannot be used to identify the legal authority for blocking property); and

(H) The relevant OFAC Reporting System identification numbers, when available.

(3) *Reports of blocked property that is unblocked or transferred*—(i) *When reports are due.* Reports shall be submitted to OFAC within 10 business days from the date blocked property is unblocked or transferred, except that if such reports are already required as a condition of a general or specific license, no additional report is required to be submitted under this section. For example, such reports must be filed when blocked property is unblocked or transferred pursuant to a valid order from a U.S. government agency or U.S. court, including pursuant to a valid judicial order issued pursuant to Section 201(a) of the Terrorism Risk Insurance Act (Pub. L. 107–297, 116 Stat. 2322, 28 U.S.C. 1610 note) or a valid order of forfeiture by any U.S. government agency or U.S. court. Reports do not need to be filed under this section for debits to blocked accounts for normal service charges authorized pursuant to OFAC sanctions.

(ii) * * *

(F) The legal authority or authorities under which the property was unblocked or transferred. This may include, for example, reference to a specific or general license under an applicable part of this chapter or an E.O.; and

(G) A copy of the original blocking report filed with OFAC pursuant to § 501.603(b)(1) and the OFAC Reporting System report identification numbers, when available.

Note 3 to paragraph (b)(3). The reporting requirement set forth in this paragraph (b)(3) applies in addition to the reporting requirement set forth in § 501.605 of this part, which requires litigants to notify OFAC of proceedings that may affect blocked property or retained funds.

* * * * *

(d) *How to report.* (1) Except as otherwise provided, all initial reports of blocked property required under § 501.603(b)(1) and the Annual Reports of Blocked Property required under § 501.603(b)(2) must be filed electronically through the OFAC Reporting System (ORS), available on OFAC's website, *https://ofac.treasury.gov/ofac-reporting-system.* While blocked funds may be maintained in omnibus accounts, the Annual Reports of Blocked Property must contain a disaggregated list showing each blocked asset contained within the omnibus account. A copy of reports submitted pursuant to this section shall be retained for the submitter's records. If a submitter can provide evidence of unique and extraordinary circumstances that would not allow the submitter to use ORS, such as lack of access to the internet, the submitter may request to submit reports in an alternative manner by calling 202/622–2490. Such requests will be subject to a presumption of denial and granted only in writing.

(2) All reports of unblocked or transferred blocked property required pursuant to § 501.603(b)(3) must be submitted electronically to OFAC via email at *OFACReport@treasury.gov,* with the number of this section in the subject line, or through ORS, available on OFAC's website, *https://ofac.treasury.gov/ofac-reporting-system.* If a submitter can provide evidence of unique and extraordinary circumstances that would not allow the submitter to report electronically, such as lack of access to the internet, the submitter may request to submit reports in an alternative manner by calling 202/622–2490. Such requests will be subject to a presumption of denial and granted only in writing.

(e) *Rules governing availability of information.* Information submitted to OFAC pursuant to this section will be protected from disclosure under the Freedom of Information Act (FOIA) (5 U.S.C. 552) and the provisions of 31 CFR part 1 if OFAC reasonably foresees that disclosure would harm an interest protected by a FOIA exemption or disclosure is prohibited by law. See 31 CFR 1.5 for additional provisions relating to confidential commercial information.

■ 4. Amend § 501.604 by:

■ a. Revising the section heading;

■ b. In paragraph (a)(1), add ''in the case of part 515 of this chapter'' after ''(or a person subject to U.S. jurisdiction'';

■ c. Revising and republishing paragraph (a)(3);

■ d. Revising paragraph (b) introductory text;

■ e. In paragraph (b)(6), remove ''*www.treasury.gov/resource-center/sanctions/SDN-List/Pages/program_tags.aspx*'' and add in its place ''*https://ofac.treasury.gov*''; and

■ f. Revising and republishing paragraphs (d) and (e).

The revisions and republications to read as follows:

§ 501.604 Reports of rejected transactions.

(a) * * *

(3) *Transaction.* The term transaction for purposes of this section includes wire transfers, trade finance, transactions related to securities, checks, or foreign exchange, and sales or purchases of goods or services.

(b) *Required information to be reported.* Reports of rejected transactions shall include the following information, to the extent the information is available to the person submitting the report at the time the transaction is rejected:

* * * * *

(d) *Where to report.* Reports under this section shall be submitted to OFAC through the OFAC Reporting System, available on OFAC's website, *https://ofac.treasury.gov/ofac-reporting-system.* If a submitter can provide evidence of unique and extraordinary circumstances that would not allow the submitter to use ORS, such as lack of access to the internet, the submitter may request to submit reports in an alternative manner by calling 202/622–2490. Such requests will be subject to a presumption of denial and granted only in writing.

(e) *Rules governing availability of information.* Information submitted to OFAC pursuant to this section will be

protected from disclosure under the Freedom of Information Act (FOIA) (5 U.S.C. 552) and the provisions of 31 CFR part 1 if OFAC reasonably foresees that disclosure would harm an interest protected by a FOIA exemption or disclosure is prohibited by law. See 31 CFR 1.5 for additional provisions relating to confidential commercial information.

■ 5. In § 501.605, revise and republish paragraph (a) to read as follows:

§ 501.605 Reports on litigation, arbitration, and dispute resolution proceedings.

(a) U.S. persons (or persons subject to U.S. jurisdiction in the case of part 515 of this chapter) participating in litigation, arbitration, or other binding alternative dispute resolution proceedings in the United States on behalf of or against persons whose property or interests in property are blocked or whose funds have been retained pursuant to § 596.504(b) of this chapter, or when the outcome of any proceeding may affect blocked property or retained funds, must:

(1) Provide notice of such proceedings upon their commencement or upon submission or receipt of documents bringing the proceedings within the terms of the introductory text to this paragraph (a);

(2) Submit copies of all pleadings, motions, memoranda, exhibits, stipulations, correspondence, and proposed orders or judgments (including any proposed final judgment or default judgment) submitted to the court or other adjudicatory body, and all orders, decisions, opinions, or memoranda issued by the court, to the Office of the Chief Counsel (Foreign Assets Control) at *OFACReport@treasury.gov* with the number of this section in the subject line, within 10 days of filing, submission, or issuance. This paragraph (a)(2) shall not apply to discovery requests or responses, documents filed under seal, or requests for procedural action not seeking action dispositive of the proceedings (such as requests for extension of time to file); and

(3) Report by email to the Office of the Chief Counsel (Foreign Assets Control), at *OFACReport@treasury.gov* with the number of this section in the subject line, the scheduling of any hearing or status conference in the proceedings whenever it appears that the court or other adjudicatory body may issue an order or judgment in the proceedings (including a final judgment or default judgment) or is considering or may decide any pending request dispositive of the merits of the proceedings or of any claim raised in the proceedings.

* * * * *

■ 6. Amend § 501.801 by:

■ a. In paragraph (a), revise the third sentence; ''

■ b. Revise paragraph (b)(2)(ii);

■ c. In paragraph (b)(5), remove ''by written correspondence'' and add in its place ''via the OFAC License Application Page at *https://ofac.treasury.gov/ofac-license-application-page*''; and

■ d. Revise paragraph (b)(6).

The revisions to read as follows:

§ 501.801 Licensing

(a) * * * General licenses are set forth in subpart E of each part contained in this chapter, made available on OFAC's website (*https://ofac.treasury.gov*), or published in the **Federal Register**.* * *

(b) * * *

(2) * * *

(ii) *Information to be supplied.* The applicant must supply all information specified by relevant instructions (available on OFAC's Reporting and License Application Forms page at *https://licensing.ofac.treas.gov*) or forms, and must fully disclose the names of all parties who are concerned with or interested in the proposed transaction. If the application is filed by an agent, the agent must disclose the name of his or her principal(s). Such documents as may be relevant shall be attached to each application as a part of such application, whether filed electronically or by mail, except that documents previously filed with OFAC may, where appropriate, be incorporated by reference in such application. For applications for the release of blocked funds, applicants are encouraged to include, when available, the OFAC Reporting System (ORS) transaction and submission identification numbers. Applicants may be required to furnish such further information as is deemed necessary to assist OFAC in making a determination. Any applicant or other party in interest desiring to present additional information may do so at any time before or after OFAC makes its decision with respect to the application. Any requests to make such an oral presentation must be submitted via the OFAC License Application Page at *https://ofac.treasury.gov/ofac-license-application-page* to the attention of the Licensing Division, referencing the relevant Case ID number and a ''Request for Oral Presentation.'' Such requests are rarely granted.

* * * * *

(6) *Rules governing availability of information.* Information submitted to OFAC pursuant to this section will be protected from disclosure under the Freedom of Information Act (FOIA) (5 U.S.C. 552) and the provisions of 31 CFR part 1 if OFAC reasonably foresees that disclosure would harm an interest protected by a FOIA exemption or disclosure is prohibited by law. See 31 CFR 1.5 for additional provisions relating to confidential commercial information.

■ 7. In § 501.804, revise paragraph (b) to read as follows:

§ 501.804 Rulemaking.

* * * * *

(b) Any interested person may petition the Office of Foreign Assets Control for the issuance, amendment, or repeal of any rule, including a general license, at *OFACReport@treasury.gov* with the number of this section in the subject line.

§ 501.805 [Amended]

■ 8. Amend § 501.805 by:

■ a. In paragraphs (a) and (b), after the phrase ''31 CFR part 1'' add the phrase '', as well as the provisions of this part'' in both places it appears;

■ b. In paragraph (c), remove the phrase ''in person or by writing to the Office of Foreign Assets Control, U.S. Department of the Treasury, 1500 Pennsylvania Avenue NW—Annex, Washington, DC 20220, or by calling 202/622–2480'' with the phrase ''on OFAC's website (*https://ofac.treasury.gov*).''; and

■ c. In paragraph (d)(2), remove the reference ''*http://www.treas.gov/ofac*'' and add in its place the reference ''*https://ofac.treasury.gov*''.

■ 9. Revise and republish § 501.806 to read as follows:

§ 501.806 Procedures for unblocking property believed to have been blocked and reported in error due to mistaken identity or typographical or similar errors.

When a party believes it has blocked property pursuant to the applicable regulations of this chapter due to mistaken identity or typographical or similar errors, such party may seek to have such property unblocked pursuant to the following administrative procedures:

(a) Any person who has blocked and reported to the Office of Foreign Assets Control (OFAC) property pursuant to § 501.603 may submit a request for authorization to release blocked property that was blocked in error due to mistaken identity or typographical or similar error.

(b) Requests to release such property must be sent via email to *OFACReport@treasury.gov* and include the phrase ''31 CFR 501.806—Request for a Compliance Release'' in the subject line of the email.

(c) A request to release property must include the name, address, telephone number, and email address of the person seeking the release of the property.

(d) A request to release property should include the following information, where known, concerning the blocked property:

(1) The name of the person that holds the blocked property or filed the initial report of blocked property;

(2) The actual value, or if unknown, estimated value, in U.S. dollars of the blocked property, as included in the initial report of blocked property;

(3) The date of the blocking included in the initial report of blocked property;

(4) A copy of a valid government-issued identification document, social security number or employer identification number for a person whose property is believed to have been blocked in error, when applicable;

(5) The OFAC Reporting System (ORS) identification numbers associated with the initial report of blocked property filed with OFAC, when available;

(6) A description of the property or underlying transaction; and

(7) A narrative description of the reasons why the applicant believes the property was blocked in error.

(e) Upon receipt of the materials required by paragraph (d) of this section, OFAC may request additional material, if available, from the applicant concerning the blocked property pursuant to § 501.602.

(f) Following review of all applicable submissions, OFAC will determine whether the property should be released. In the event that OFAC determines that the property should be released, it will direct the person to release the property to the appropriate party.

■ 10. Revise and republish § 501.807 to read as follows:

§ 501.807 Procedures governing delisting from the Specially Designated Nationals and Blocked Persons List or any other list of sanctioned persons or property maintained by the Office of Foreign Assets Control.

A person may submit a petition for administrative reconsideration pursuant to the procedures outlined below in order to seek removal of a person or property (*e.g.,* a vessel) from the List of Specially Designated Nationals and Blocked Persons (SDN List) or any other list or identification of sanctioned persons or property maintained by the Office of Foreign Assets Control (OFAC):

(a) A person blocked under the provisions of any part of this chapter, including a specially designated national, specially designated terrorist, specially designated narcotics trafficker, or a person otherwise subject to sanctions pursuant to the provisions of any part of this chapter (each, a ''sanctioned person''), or a person owning a majority interest in property (*e.g.,* a vessel) that is blocked or otherwise subject to sanctions may submit arguments or evidence that the person believes establishes that insufficient basis exists for the sanction or that the circumstances resulting in the sanction no longer apply. The sanctioned person also may propose remedial steps on the person's part, such as corporate reorganization, resignation of persons from positions in a blocked entity, or similar steps, which the person believes would negate the basis for the sanction. A person owning a majority interest in property (*e.g.,* a vessel) that is blocked or otherwise subject to sanctions may propose the sale of the vessel, with the proceeds to be placed into a blocked interest-bearing account after deducting the costs incurred while the vessel was blocked and the costs of the sale. This submission must be made via email to *OFAC.Reconsideration@treasury.gov.*

(b) For purposes of reconsideration petitions relating to persons or property sanctioned by OFAC:

(1) The information submitted by the person seeking removal of a person or property from the SDN List or any other list or identification of sanctioned persons or property maintained by OFAC will be reviewed by OFAC, which may request clarifying, corroborating, or other additional information.

(2) A person seeking removal of a person or property from the SDN List or any other list or identification of sanctioned persons or property maintained by OFAC may request a meeting with OFAC; however, such meetings are not required, and the office may, at its discretion, decline to conduct such meetings prior to completing a review pursuant to this section.

(3) After OFAC has conducted a review of the request for reconsideration, it will provide a written decision to the person seeking the removal of a person or property from the SDN List or any other list or identification of sanctioned persons or property maintained by OFAC.

Bradley T. Smith,

Director, Office of Foreign Assets Control.

BILLING CODE 4810–AL–P

DEPARTMENT OF DEFENSE

Office of the Secretary

32 CFR Part 45

[Docket ID: DoD–2023–OS–0065]

RIN 0790–AL70

Medical Malpractice Claims by Members of the Uniformed Services

AGENCY: Department of Defense (DoD) Office of General Counsel, DoD.

ACTION: Final rule.

SUMMARY: The DoD is finalizing amendments to apply offsets for payments made by the U.S. Government for medical malpractice claims to potential economic damages only and not to total potential damages. Under this rule total potential damages will no longer be reduced by offsetting most of the compensation otherwise provided or expected to be provided by DoD or the Department of Veterans Affairs (VA) for the same harm that is the subject of the medical malpractice claim. Instead, only economic damages will be reduced by offsetting most of the compensation otherwise provided or expected to be provided by DoD or the VA for the same harm that is the subject of the medical malpractice claim. This rule also clarifies future lost earnings may be awarded until the time DoD determines that the claimant is, or is expected to be, medically rehabilitated and able to resume employment; in cases of permanent incapacitation, until expiration of the claimant's work-life expectancy; or, in cases of death, until the expiration of the claimant's work-life expectancy, after deducting for the claimant's personal consumption.

DATES: This final rule is effective May 10, 2024.

FOR FURTHER INFORMATION CONTACT: Melissa D. Walters, (703) 681–6027.

SUPPLEMENTARY INFORMATION:

I. Background

Section 2733a of title 10, United States Code, allows members of the uniformed services or their authorized representatives to file claims, and the Secretary of Defense to pay such claims, for personal injury or death caused by a DoD health care provider in a covered

military medical treatment facility, as defined in that section. DoD published an interim final rule to establish uniform standards and procedures for adjudicating these claims on June 17, 2021 (86 FR 32194) and a final rule on August 26, 2022 (87 FR 52446). Proposed amendments to this regulation were published in the **Federal Register** on October 20, 2023 (88 FR 72412), that proposed to apply offsets for payments made by the U.S. Government to economic damages only and clarify when future lost earnings may be awarded. Comments were accepted for 60 days until December 19, 2023. DoD is making no changes to the regulatory text based on the comments received.

II. Discussion of Comments and Changes

A total of 24 comments were posted on the regulatory docket. Summaries of the comments and the Department's responses are as follows.

General

Two comments from individual members of the public reflected general support for the proposed changes. One of these commenters stated that the proposed changes would benefit Service members and reduce the financial burdens on them and their families following injury or death.

One comment was too general to be actionable. The commenter generally sought to have a fair, efficient, and consistent system without making any suggestions for changes to the proposed rule.

The Department received a number of comments that were outside of the scope of the proposed rule and therefore did not result in changes to the proposed rule. Several comments expressed concerns about the quality of care provided by DoD or the VA and included personal narratives from Service members, their family members, or others on Service members' behalf about specific medical care the Service members received from DoD and VA medical providers. One comment sought to have 32 CFR part 45 extended to all patients of DoD's military health system and not just members of the uniformed services. Another commenter sought to have the doctrine in *Feres* v. *United States,* a 1950 Supreme Court decision, overturned to allow Service members to bring lawsuits in Federal court. An individual submitted comments seeking a change related to the definition of ''DoD health care provider'' in 32 CFR part 45. An additional comment beyond the scope of the regulation recommended that Service members receive copies of their DD Form 2807–1, ''Report of Medical History,'' and their DD Form 2807–2, ''Accessions Medical History Report,'' in addition to their DD Form 214, ''Certificate of Uniformed Service.'' One comment suggested that Service members be educated about the claims process. Finally, one individual generally expressed concerns about the claims process, including a belief that settlements under the process were unfair and lacked transparency.

Section 45.9 Calculation of Damages: Economic Damages

Comment: A State legislator supported the portions of the proposed rule clarifying when future lost wages may be awarded.

Response: This comment did not recommend any changes to § 45.9 and no changes were made to this section.

Section 45.10 Calculation of Damages: Non-Economic Damages

Comment: One individual commented that the rule change may provide additional compensation for non-economic harms, although noted that compensation could never make a malpractice victim or survivor whole. A number of comments, including comments from Members of Congress, a local elected official, a State legislator, and individuals sought elimination of the cap on non-economic damages.

Response: DoD did not make any changes as a result of these comments. Section 2733a(g)(2)(B) of title 10, U.S.C., requires DoD to adjudicate claims, including calculating damages, based on uniform national standards consistent with generally accepted standards used in a majority of States in adjudicating claims under the Federal Tort Claims Act (FTCA), 28 U.S.C. 2671 *et seq.,* without regard to the place where the Service member received medical care. This standard in 10 U.S.C. 2733a(g)(2)(B) is a different standard from the FTCA. Under the FTCA, 28 U.S.C. 2672 and 1346(b)(1), the law applied is the law of the place where the medical care was provided. A majority of States, 28, have caps on non-economic damages applicable in medical malpractice claims and therefore DoD has retained the cap on non-economic damages.

DoD administratively removed a description of ''physical disfigurement'' that used outdated terminology and is unnecessary for purposes of claims adjudication.

Section 45.11 Calculation of Damages: Offsets for DoD and VA Compensation

Comment: One commenter, a city elected official, was supportive of eliminating offsets from non-economic damages. A State legislator indicated support for the changes that would allow more Service members to receive compensation for non-economic damages than under the current regulation. A number of comments, including from Members of Congress, a State legislator, and individuals, sought to eliminate offsets from the portion of potential malpractice damage awards for economic damages in addition to the portion for non-economic damages. Some comments incorrectly seemed to suggest that ''offsets'' meant that the Service member's DoD and VA compensation would be reduced. Some comments also seemed to suggest, inaccurately, that the Department is offsetting an amount equal to all VA compensation for all line of duty injuries, not just offsetting the amount of compensation received for those additional injuries caused by malpractice.

Response: Federal law provides a comprehensive system of compensation for military members and their families in cases of death or disability incurred in military service. This system applies to all causes of death or disability incurred in service, whether due to combat injuries, training mishaps, motor vehicle accidents, naturally occurring illnesses, household events, with limited exceptions (*e.g.,* when the member is absent without leave or the injury is due to the member's intentional misconduct or willful negligence). This compensation system also applies to injuries incurred in service caused by medical malpractice.

Offsets from economic damages account for the fact that compensation has already been paid or will be paid by the Government for economic injuries caused by the malpractice. In other words, the claimant has already received, is receiving, or will be receiving compensation from the U.S. Government on account of his or her economic losses. For example, VA disability ratings ''represent as far as can practically be determined the average impairment in earning capacity'' resulting from service-related injuries. (*See* 38 CFR 4.1) DoD is required by 10 U.S.C. 2733a(g)(2)(B) to apply the law in the majority of states when adjudicating Service member medical malpractice claims. Offsetting economic damages for compensation already paid by the United States is consistent with general tort law principles that states would apply.

The fact that offsets are made from potential medical malpractice damages awards does not change a Service member's entitlement to the DoD or VA

compensation. The same amount of DoD or VA compensation is still paid to a claimant even if the claimant receives an award of medical malpractice damages. What happens with offsets is that the applicable amount of DoD or VA compensation is subtracted from the medical malpractice damages award that otherwise would be payable.

Additionally, offsets are made only for the amount of compensation received from the DoD or VA that is related to the medical conditions caused by the malpractice. The amount of compensation for medical conditions unrelated to the malpractice is not offset. For example, if a Service member receives VA disability compensation both for a combat injury to her hand and for an injury to her knee caused by malpractice, only the amount of compensation for the knee injury would be used as an offset from the proposed damages award.

DoD did not make changes to this section.

III. Effective Date

Pursuant to 5 U.S.C. 553(d), DoD has decided not to delay the effective date of this rule and to make it effective immediately. The final rule relieves a restriction on the amount of non-economic damages claimants may receive. Moreover, there is good cause not to delay the effectiveness of this rule. The amendments apply to claims received by DoD on or after the date this final rule is published in the **Federal Register** and to claims pending before DoD on that date. An immediate effective date allows more timely adjudication of those claims currently pending which would be impacted by the final rule and more timely payments to those claimants. Further, delaying the effective date would result in no benefit to claimants because the final rule imposes no burdens on them and therefore they do not need time to prepare for compliance with the final rule.

IV. Regulatory Analysis

Executive Order 12866, ''Regulatory Planning and Review,'' as Amended by Executive Order 14094, ''Modernizing Regulatory Review'' and Executive Order 13563, ''Improving Regulation and Regulatory Review''

Executive Orders 12866 (as amended by Executive Order 14094) and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health, and safety effects; distribution of impacts; and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This final rule has been determined to be a significant regulatory action under paragraph 3(f) of the amended Executive Order 12866. Accordingly, it has been reviewed by the Office of Management and Budget as required by these Executive orders.

Congressional Review Act (5 U.S.C. 804(2))

This final rule is not a ''major rule'' as defined by 5 U.S.C. 804(2).

Public Law 96–354, ''Regulatory Flexibility Act'' (5 U.S.C. 601 et seq)

The General Counsel of the Department of Defense certified that this final rule is not subject to the Regulatory Flexibility Act (5 U.S.C. 601) because it would not, if promulgated, have a significant economic impact on a substantial number of small entities. Therefore, the Regulatory Flexibility Act, as amended, does not require a regulatory flexibility analysis.

Section 202, Public Law 104–4, ''Unfunded Mandates Reform Act''

Section 202 of the Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1532) requires agencies to assess anticipated costs and benefits before issuing any rule whose mandates require non-Federal spending in any one year of $100 million in 1995 dollars, updated annually for inflation. This final rule does not mandate any requirements for State, local, or tribal governments, nor affect private sector costs.

Public Law 96–511, ''Paperwork Reduction Act'' (44 U.S.C. Chapter 35)

It has been determined that this final rule does not impose new reporting or recordkeeping requirements under the Paperwork Reduction Act of 1995.

Executive Order 13132, ''Federalism''

Executive Order 13132 establishes certain requirements that an agency must meet when it promulgates a final rule that imposes substantial direct requirement costs on State and local governments, preempts State law, or otherwise has federalism implications. This final rule does not have a substantial effect on State and local governments.

Executive Order 13175, ''Consultation and Coordination With Indian Tribal Governments''

Executive Order 13175 establishes certain requirements that an agency must meet when it promulgates a final rule that imposes substantial direct compliance costs on one or more Indian tribes, preempts tribal law, or affects the distribution of power and responsibilities between the Federal Government and Indian tribes. This final rule will not have a substantial effect on Indian tribal governments.

V. Impact of this Regulation

a. Summary

The amendments adjust and update certain portions of the regulation related to calculation of damages. Currently, DoD offsets from both economic and noneconomic damages compensation made by DoD and VA on account of the injuries from malpractice. The amendments apply offsets to economic damages only. Under the current rule, a claimant who has little or no economic damages would be unable to recover any damages if the compensation that the claimant already receives or will receive from DoD and VA for the injuries from malpractice exceeds the total amount of potential economic and non-economic damages. Under the amendment, these claimants will be able to recover non-economic damages because the amount of the DoD and VA compensation will no longer be used to offset the non-economic damages.

The amendments also include two changes that were made to better describe the applicable principles used when adjudicating claims to make the rule clearer for claimants. First, language was added to address medical rehabilitation as it relates to future lost earnings by explicitly stating the principle that future lost earnings do not continue beyond the point when DoD determines that the claimant is, or is expected to be, medically rehabilitated and able to resume employment. Second, because 10 U.S.C. 2733a(b)(5) prevents recovery for claims that are allowed to be settled and paid under any other provision of law, language was added to explicitly state that an injury or condition does not result in lost earnings for purposes of this regulation if the lost earnings stem from disability discrimination, since disability discrimination is compensable under other provisions of law. These principles, if applicable to the facts of a claim, already would have been applied in adjudicating those claims. Therefore, these changes will have no meaningful economic impact.

b. Affected Population

At the end of Fiscal Year 2022, there were approximately 1,410,000 Active Duty Service members, and 440,000 Reserve and National Guard members eligible for DoD healthcare benefits. These uniformed Service members will be able to file claims with DoD alleging malpractice from care at DoD military medical treatment facilities as defined in 10 U.S.C. 2733a.

c. Costs

DoD does not estimate that any additional claims will be filed as a result of the amendments to the regulation. Since the enactment of 10 U.S.C. 2733a, individuals who believe they have been subjected to malpractice have filed claims involving injuries ranging from minor injuries to death, regardless of the potential application of offsets.

d. Transfers

Regardless of the number of claims in which malpractice occurred, the only claims in which damages will be awarded are those which exceed the offsets for any payment to be made. The amendments solely impact non-economic damages. No amendments are being made that impact offsets from economic damages.

Similar to malpractice claims under the FTCA, claims payable under this regulation could include a wide range of non-economic damages depending on their facts. A claim involving minor pain and temporary injuries would result in a lower non-economic damages award than a claim involving significant, continuing pain and/or debilitating injury. Initially, non-economic damages were capped at $500,000. This cap was raised to $600,000 in August 2022 and again to $750,000 in October 2023.

Based on claims adjudicated under this part in 2021 and 2022, four claims were adjudicated in which offsets were applied. In two of these claims, the economic damages alone were larger than the offsets so the payouts would not have been impacted had the amendments been in effect. Only for the remaining two claims would the outcome have been different had the amendments been in effect. In one claim, an additional $200,000 would have been paid to the claimant if offsets had not been made from non-economic damages. In the other claim, an additional $100,000 would have been paid to the claimant if offsets had not been made from non-economic damages.

Claims in 2021 and 2022 may not necessarily be representative of claims in future years. Claims were accepted beginning January 1, 2020, but could only begin to be adjudicated beginning on July 17, 2021, when the interim final rule at 86 FR 32194 became effective. The first claims adjudicated under this new process were claims that did not require a decision on the merits of whether malpractice occurred, such as claims that were denied because the alleged malpractice fell outside the statute of limitations in 10 U.S.C. 2733a(b)(4). Just as with claim resolution processes involving non-Service member claims, more complex claims, which tend to involve higher amounts of damages, require time for review. Since Service members' claims have only been able to be adjudicated since July 17, 2021, more complex claims may still be under adjudication, and the two claims that would have had a different outcome in 2021 and 2022 may not be representative of the number of claims that would be impacted going forward.

Taking the limited information DoD has into account, DoD estimates that the amendments to the regulation will affect two claims per year. The average of the additional non-economic damages at issue in the two claims which would have been impacted if this regulation had been in effect was $150,000. Assuming $150,000 additional would be paid in two claims, the estimated total additional transfers from the Government to claimants therefore would be $300,000. Of this, the first $100,000 of each of the two claims would be paid by DoD, with the remainder to be paid by the Treasury.

There could be significant variation in the number of claims that would be impacted by the amendments to the regulation from year to year. In some years, there could be no claims affected by the amendments, so there would be zero additional transfers from the Government to claimants. In other years, there could be more claims impacted by the amendments and/or claims involving different amounts of non-economic damages than the $150,000 estimate. For example, assuming that in another year there were four claims in which non-economic damages would be paid and assuming the non-economic damages in these four claims would be paid at the cap of $750,000, this would lead to transfers of $3 million from the Government to claimants.

e. Benefits

The amendments to the regulation will allow some Service members to receive compensation for non-economic damages that they would not have been able to receive under the current regulation. The amendments afford some Service members additional compensation in light of the non-economic harms they have experienced as a result of malpractice.

List of Subjects in 32 CFR Part 45

Claims, Malpractice, Medical, Uniformed services.

Accordingly, the Department of Defense amends 32 CFR part 45 to read as follows:

PART 45—MEDICAL MALPRACTICE CLAIMS BY MEMBERS OF THE UNIFORMED SERVICES

■ 1. The authority for part 45 continues to read as follows:

Authority: 10 U.S.C. 2733a.

■ 2. Amend § 45.1 by revising paragraph (b) to read as follows:

§ 45.1 Purpose of this part.

* * * * *

(b) *Relationship to military and veterans' compensation programs.* Federal law provides a comprehensive system of compensation for military members and their families in cases of death or disability incurred in military service. This system applies to all causes of death or disability incurred in service, whether due to combat injuries, training mishaps, motor vehicle accidents, naturally occurring illnesses, or household events, with limited exceptions (*e.g.,* when the member is absent without leave or the injury is due to the member's intentional misconduct or willful negligence). This comprehensive compensation system applies to cases of personal injury or death caused by medical malpractice incurred in service as it does to all other causes. This part provides for the possibility of separate compensation in certain cases of medical malpractice but in no other type of case. A medical malpractice claim under this part will have no effect on any other compensation the member or the member's family is entitled to under the comprehensive compensation system applicable to all members. However, if the U.S. Government makes a payment for harm caused by malpractice, this payment reduces the potential damages under this part as provided in § 45.11.

* * * * *

■ 3. Amend § 45.9 by revising paragraph (b)(4) and adding paragraph (d) to read as follows:

§ 45.9 Calculation of damages: economic damages.

* * * * *

(b) * * *

(4) For future lost earnings:

(i) Until DoD determines that the claimant is, or is expected to be, medically rehabilitated and able to resume employment;

(ii) In cases of permanent incapacitation, until expiration of the claimant's work-life expectancy; or

(iii) In cases of death, until the expiration of the claimant's work-life expectancy, after deducting for the claimant's personal consumption.

(iv) Future lost earnings must be substantiated by appropriate documentation and claimants have an obligation to mitigate damages.

(v) In addition, loss of retirement benefits is compensable and similarly discounted after appropriate deductions. Estimates for future lost earnings and retirement benefits must be discounted to present value.

* * * * *

(d) *Disability discrimination.* An injury or condition does not result in lost earnings for purposes of, and is not compensable under, this part if the lost earnings stem from disability discrimination, which may be settled and paid under other provisions of law.

■ 4. Amend § 45.10 by revising paragraphs (a) through (c) to read as follows:

§ 45.10 Calculation of damages: non-economic damages.

(a) *In general.* Non-economic damages are one component of a potential damages award. The claimant has the burden of proof on the amount of non-economic damages by a preponderance of evidence. DoD may request an interview of or statement from the claimant or other person with primary knowledge of the claimant. DoD may also require medical statements documenting the claimant's condition and, in cases of disfigurement, photographs documenting the claimant's condition.

(b) *Elements of non-economic damages.* Non-economic damages include pain and suffering; physical discomfort; mental and emotional trauma or distress; loss of enjoyment of life; physical disfigurement; and the inability to perform daily activities that one performed prior to injury, such as recreational activities. Such damages are compensable as part of non-economic damages.

(c) *Cap on non-economic damages.* In any claim under this part, total non-economic damages may not exceed a cap amount published by DoD via a **Federal Register** notice. DoD will periodically publish updates to this cap amount via **Federal Register** notices, consistent with changes in prevailing amounts in the majority of the States with non-economic damages caps.

* * * * *

■ 5. Amend § 45.11 by:
■ a. Revising paragraph (a);
■ b. Redesignating paragraphs (c) and (d) as paragraphs (d) and (c), respectively;
■ c. Revising the first sentence in the newly redesignated paragraph (c);
■ d. Adding a sentence to the end of the newly redesignated paragraph (d);
■ e. Revising paragraph (e); and
■ f. Removing paragraphs (f) and (g).

The revisions and addition read as follows:

§ 45.11 Calculation of damages: offsets for DoD and VA Government compensation.

(a) *In general.* Total potential economic damages calculated under this part are reduced by offsetting most of the compensation otherwise provided or expected to be provided by DoD or VA for the same harm that is the subject of the medical malpractice claim. DoD has the burden to establish the applicability and amount of any offsets.

* * * * *

(c) * * * In determining offsets under this section from economic damages, DoD will use the present value of future payments and benefits. * * *

(d) * * * Claimants must provide information not available to DoD, but requested by DoD, for the purpose of determining offsets.

(e) *Benefits and payments that may be considered as potential offsets.* The general rule is that potential damages calculated under this part may be offset only by DoD or VA payments and benefits that are primarily funded by Government appropriations. Potential damages calculated under this part are not offset by U.S. Government payments and benefits that are substantially funded by the military member. The following examples are provided for illustrative purposes only, are not all-inclusive, and are subject to adjustment as appropriate.

(1) The following DoD and VA payments and benefits are primarily funded from Government appropriations and will be offset:

(i) Disability retired pay in the case of retirement due to the disability caused by the alleged medical malpractice;

(ii) Disability severance pay in the case of non-retirement disability separation caused by the alleged medical malpractice.

(iii) Incapacitation pay.

(iv) Involuntary and voluntary separation pays and incentives.

(v) Death gratuity.

(vi) Housing allowance continuation.

(vii) Survivor Benefit Plan.

(viii) VA disability compensation, to include Special Monthly Compensation, attributable to the disability resulting from the malpractice.

(ix) VA Dependency and Indemnity Compensation, attributable to the disability resulting from the malpractice.

(x) Special Survivor Indemnity Allowance.

(xi) Special Compensation for Assistance with Activities of Daily Living.

(xii) Program of Comprehensive Assistance for Family Caregivers.

(xiii) Fry Scholarship.

(xiv) TRICARE coverage, including TRICARE-for-Life, for a disability retiree, family, or survivors. Future TRICARE coverage is part of the Government's compensation package for a disability retiree or survivor.

(2) The following U.S. Government payments and benefits are substantially funded by the military members or are otherwise generally not eligible for consideration as potential offsets:

(i) Servicemembers Group Life Insurance.

(ii) Traumatic Servicemembers Group Life Insurance.

(iii) Social Security disability benefits.

(iv) Social Security survivor benefits.

(v) Prior Government contributions to a Thrift Savings Plan.

(vi) Commissary, exchange, and morale, welfare, and recreation facility access.

(vii) Value of legal assistance and other services provided by DoD.

(viii) Medical care provided while in active service or in an active status prior to death, retirement, or separation.

Dated: May 6, 2024.

Aaron T. Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

[FR Doc. 2024–10130 Filed 5–9–24; 8:45 am]

BILLING CODE 6001–FR–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 100

[Docket Number USCG–2024–0177]

RIN 1625–AA08

Special Local Regulation; Red River, Shreveport, LA

AGENCY: Coast Guard, DHS.

ACTION: Temporary final rule.

SUMMARY: The Coast Guard is establishing a temporary special local

regulation (SLR) for certain navigable waters of the Red River. This action is necessary to provide for the safety of life on these navigable waters near Shreveport, Louisiana, during high-speed powerboat races from May 24, 2024 through May 26, 2024. This rulemaking prohibits persons and vessels from being in the regulated area unless authorized by the Captain of the Port Sector Lower Mississippi River or a designated representative.

DATES: This rule is effective from 6 a.m. on May 24, 2024 through 6 p.m. on May 26, 2024.

FOR FURTHER INFORMATION CONTACT: If you have questions about this rule, call or email MSTC Lindsey Swindle, Waterways Management, U.S. Coast Guard; telephone 571–610–4197, email *Lindsey.M.Swindle@uscg.mil.*

SUPPLEMENTARY INFORMATION:

I. Table of Abbreviations

CFR Code of Federal Regulations
COTP Captain of the Port
DHS Department of Homeland Security
FR Federal Register
NPRM Notice of proposed rulemaking
§ Section
U.S.C. United States Code

II. Background Information and Regulatory History

On December 8, 2023, an organization notified the Coast Guard that it will be conducting high-speed powerboat races from 6 a.m. through 6 p.m. each day from May 24, 2024, through May 26, 2024. The races will take place between mile marker 228.1 and mile marker 228.8 on the Red River, Shreveport, LA, and involve approximately 55 powerboats ranging from 14 to 18 feet in length. No spectator craft will be allowed in the regulated area. The Captain of the Port Sector Lower Mississippi River (COTP) has determined that potential hazards associated with the high-speed powerboat race would be a safety concern for participants, participant vessels, and general public. In response, on March 25, 2024, the Coast Guard published a notice of proposed rulemaking (NPRM) titled Special Local Regulation: Red River, Shreveport, LA (89 FR 20577). There we stated why we issued the NPRM and invited comments on our proposed regulatory action related to this fireworks display. During the comment period that ended April 10, 2024, we received one comment.

Under 5 U.S.C. 553(d)(3), the Coast Guard finds that good cause exists for making this rule effective less than 30 days after publication in the **Federal Register**. Delaying the effective date of this rule would be impracticable because immediate action is needed to respond to the potential safety hazards associated with the high-speed powerboat race would be a safety concern for participants, participant vessels, and general public.

III. Legal Authority and Need for Rule

The Coast Guard is issuing this rule under authority in 46 U.S.C. 70041. The Captain of the Port Sector Lower Mississippi River (COTP) has determined that potential hazards associated with the high-speed powerboat race would be a safety concern for participants, participant vessels, and general public. The purpose of this rule is to ensure safety of vessels and the navigable waters in the regulated area before, during, and after the scheduled event.

IV. Discussion of Comments, Changes, and the Rule

As noted above, we received one comment to our NPRM published March 25, 2024. There are no changes in the regulatory text of this rule from the proposed rule in the NPRM. The Coast Guard conducted a National Environmental Policy Act (NEPA) analysis for this marine event and determined not be a danger to the environment. In addition, the Coast Guard will monitor the event via contact with the sponsor and the sponsor will have adequate boat crew on-site.

This rule establishes a temporary special local regulation from 6 a.m. to 6 p.m. each day on May 24, 2024 through May 26, 2024. The temporary special local regulation will cover all navigable waters within from mile marker 228.1 to mile marker 228.8 in Shreveport, LA. The duration of the zone is intended to ensure the safety of vessels and these navigable waters before, during, and after the high-speed powerboat races. No vessel or person will be permitted to enter the safety zone without obtaining permission from the COTP or a designated representative.

V. Regulatory Analyses

We developed this rule after considering numerous statutes and Executive orders related to rulemaking. Below we summarize our analyses based on a number of these statutes and Executive orders, and we discuss First Amendment rights of protestors.

A. Regulatory Planning and Review

Executive Orders 12866 and 13563 direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits. This rule has not been designated a ''significant regulatory action,'' under section 3(f) of Executive Order 12866, as amended by Executive Order 14094 (Modernizing Regulatory Review). Accordingly, this rule has not been reviewed by the Office of Management and Budget (OMB).

This regulatory action determination is based on the size, location, duration, and time-of-day of the special local regulation, which will impact mile marker 228.1 to mile marker 228.8 on the Red River for 12 hours each day. Moreover, the Coast Guard will issue a Broadcast Notice to Mariners via VHF–FM marine channel 16 about the regulated area, breaks in the racing will provide vessels opportunity to transit, and the rule allows vessels to seek permission to enter the zone.

B. Impact on Small Entities

The Regulatory Flexibility Act of 1980, 5 U.S.C. 601–612, as amended, requires Federal agencies to consider the potential impact of regulations on small entities during rulemaking. The term ''small entities'' comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000. The Coast Guard received zero comments from the Small Business Administration on this rulemaking. The Coast Guard certifies under 5 U.S.C. 605(b) that this rule will not have a significant economic impact on a substantial number of small entities.

While some owners or operators of vessels intending to transit the safety zone may be small entities, for the reasons stated in section V.A above, this rule will not have a significant economic impact on any vessel owner or operator.

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we want to assist small entities in understanding this rule. If the rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please call or email the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

Small businesses may send comments on the actions of Federal employees who enforce, or otherwise determine compliance with, Federal regulations to the Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards. The Ombudsman evaluates these actions

annually and rates each agency's responsiveness to small business. If you wish to comment on actions by employees of the Coast Guard, call 1–888–REG–FAIR (1–888–734–3247). The Coast Guard will not retaliate against small entities that question or complain about this rule or any policy or action of the Coast Guard.

C. Collection of Information

This rule will not call for a new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

D. Federalism and Indian Tribal Governments

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this rule under that Order and have determined that it is consistent with the fundamental federalism principles and preemption requirements described in Executive Order 13132.

Also, this rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

E. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 (adjusted for inflation) or more in any one year. Though this rule will not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

F. Environment

We have analyzed this rule under Department of Homeland Security Directive 023–01, Rev. 1, associated implementing instructions, and Environmental Planning COMDTINST 5090.1 (series), which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (42 U.S.C. 4321–4370f), and have determined that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This rule involves a special local regulation lasting approximately 12 hours on three separate days that will prohibit entry of persons or vessels during the Red River Rumble F1 Powerboat Showdown high-speed powerboat races. It is categorically excluded from further review under paragraph L61 of Appendix A, Table 1 of DHS Instruction Manual 023–01–001–01, Rev. 1.

G. Protest Activities

The Coast Guard respects the First Amendment rights of protesters. Protesters are asked to call or email the person listed in the **FOR FURTHER INFORMATION CONTACT** section to coordinate protest activities so that your message can be received without jeopardizing the safety or security of people, places or vessels.

List of Subjects in 33 CFR Part 100

Marine safety, Navigation (water), Reporting and recordkeeping requirements, Waterways.

For the reasons discussed in the preamble, the Coast Guard is proposing to amend 33 CFR part 100 as follows:

PART 100—SAFETY OF LIFE ON NAVIGABLE WATERS

■ 1. The authority citation for part 100 continues to read as follows:

Authority: 46 U.S.C. 70041; 33 CFR 1.05–1.

■ 2. Add § 100.T08–0177 to read as follows:

§ 100.T08–0177 Red River Rumble F1 Powerboat Showdown, Shreveport, LA.

(a) *Regulated area.* The regulations in this section apply to the following area: A special local regulation is established to encompass all waters of the Red River from mile marker 228.1 to mile marker 228.8.

(b) *Definitions.* As used in this section—

Designated representative means a Coast Guard Patrol Commander, including a Coast Guard coxswain, petty officer, or other officer operating a Coast Guard vessel and a Federal, State, and local officer designated by or assisting the Captain of the Port Lower Mississippi River (COTP) in the enforcement of the regulations in this section.

Participant means all persons and vessels registered with the event sponsor as a participant in the race.

Spectator means all persons and vessels not registered with the event sponsor as participants or official patrol vessels.

(c) *Regulations.* (1) All non-participants are prohibited from entering, transiting through, anchoring in, or remaining within the regulated area described in paragraph (a) of this section unless authorized by the COTP or their designated representative.

(2) To seek permission to enter, contact the COTP or the COTP's representative by 314–269–2332. Those in the regulated area must comply with all lawful orders or directions given to them by the COTP or the designated representative.

(3) The COTP will provide notice of the regulated area through advanced notice via Broadcast Notice to Mariners and by on-scene designated representatives.

(d) *Enforcement periods.* This section is effective from 6 a.m. on May 24, 2024 until 6 p.m. on May 26, 2024. This section will be subject to enforcement from 6 a.m. to 6 p.m. each day.

Dated: May 6, 2024.

Kristi L. Bernstein,

Captain, U.S. Coast Guard, Captain of the Port Sector Lower Mississippi River.

[FR Doc. 2024–10267 Filed 5–9–24; 8:45 am]

BILLING CODE 9110–04–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 165

[Docket Number USCG–2024–0245]

RIN 1625–AA87

Safety Zone: Piers Park, Boston Inner Harbor, East Boston, MA

AGENCY: Coast Guard, DHS.

ACTION: Temporary final rule.

SUMMARY: The Coast Guard is establishing a temporary safety zone for a portion of the navigable waters of Boston Inner Harbor in the vicinity of Piers Park, East Boston, Massachusetts. The temporary safety zone is needed to protect the maritime public and event participants from potential hazards created by a swim event taking place in a heavily trafficked harbor scheduled for June 9, 2024. Entry of vessels or persons into this zone is prohibited unless specifically authorized by the Captain of the Port Sector Boston, or a designated representative.

DATES: This rule is effective from 7 a.m. through noon on June 9, 2024.

ADDRESSES: To view documents mentioned in this preamble as being

available in the docket, go to *https://www.regulations.gov* type USCG–2024–0245 in the search box and click ''Search.'' Next, in the Document Type column, select ''Supporting & Related Material.''

FOR FURTHER INFORMATION CONTACT: If you have questions on this rule, call or email Mr. Timothy W. Chase, Sector Boston,Waterways Management, telephone (617) 447–1620, email *Timothy.W.Chase@uscg.mil.*

SUPPLEMENTARY INFORMATION:

I. Table of Abbreviations

CFR Code of Federal Regulations
COTP Captain of the Port Sector Boston
DHS Department of Homeland Security
FR Federal Register
MA Massachusetts
NPRM Notice of proposed rulemaking
§ Section
U.S.C. United States Code

II. Background Information and Regulatory History

The Coast Guard is issuing this temporary rule under authority in 5 U.S.C. 553(b)(B). This statutory provision authorizes an agency to issue a rule without prior notice and opportunity to comment when the agency for good cause finds that those procedures are ''impracticable, unnecessary, or contrary to the public interest.'' The Coast Guard finds that good cause exists for not publishing a Notice of Proposed Rulemaking (NPRM) with respect to this rule because doing so would be impracticable and contrary to the public interest. The Coast Guard was not made aware of the swim event with sufficient time to publish a NPRM, take public comments, consider those comments, and issue a final rule by June 9, 2024, the scheduled date of the event..

Under 5 U.S.C. 553(d)(3), the Coast Guard finds that good cause exists for making this rule effective less than 30 days after publication in the **Federal Register**. Delaying the effective date of this rule would be impracticable and contrary to the public interest due to the potential safety hazards associated with with a swim event taking place in heavily traffic harbor.

III. Legal Authority and Need for Rule

The Coast Guard is issuing this rule under authority in 46 U.S.C. 70034 (previously 33 U.S.C. 1231). The Captain of the Port Sector Boston (COTP) has determined that potential hazards associated with swim events occurring in a heavily traffic harbor in the vicinity of Piers Park, Boston Inner Harbor, East Boston, Massachuesetts. This rule is needed to to facilitate the safety to the martime public and the event participants from the hazards associated with swim events until the conclusion of the event.

IV. Discussion of the Rule

This rule establishes a safety zone from 7 a.m. to noon on June 9, 2024. The safety zone will cover all the navigable waters of a portion of Boston Inner Harbor in the vicinity of Piers Park, East Boston, specifacly within a box bound by the following coordinates: Corner #1 42°21′41.22″ N, 071°2′22.6″ W, thence to Corner #2 42°21′26.53″ N, 071°2′32.28″ W, thence to Corner #3 42°21′2.59″ N, 071°1′32.92″ W, thence to Corner #4 42°21′13.14″ N, 071°1′24.6″ W', and returning to the point of origin. The duration of the zone is intended to protect event participants, support personnel, vessels and the marine environment in these navigable waters during the swim event. No vessel or person will be permitted to enter the safet zone without obtaining permission from the COTP or a designated representative.

Requests to enter the zone will be considered and reviewed on a case-by-case basis. The COTP may be contacted by telephone at (856) 416–3015 or can be reached by VHF–FM channel 16. Persons and vessels permitted to enter this safety zone must transit at their slowest safe speed to minimize wake and comply with all lawful directions issued by the COTP or the designated representative.

V. Regulatory Analyses

We developed this rule after considering numerous statutes and Executive orders related to rulemaking. Below we summarize our analyses based on a number of these statutes and Executive orders, and we discuss First Amendment rights of protestors.

A. Regulatory Planning and Review

Executive Orders 12866 and 13563 direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits. This rule has not been designated a ''significant regulatory action,'' under Executive Order 12866. Accordingly, this rule has not been reviewed by the Office of Management and Budget (OMB).

This regulatory action determination is based on the size, location, duration, and time-of-year of the safety zone. Vessel traffic will be able to safely transit around this safety zone which will impact a small designated area of Boston Inner Harbor in the vicinity of Piesr Park, East Boston, MA, in support of a swim event on June 9, 2024. Additionally, this safety zone will be of limited duration, five hours, to minimize any adverse impacts to vessels who seek to transit the navigable waters. Moreover, the Coast Guard will issue a Local Notive to Mariners well in advance of the event and a Broadcast Notice to Mariners via VHF–FM marine channel 16 regarding the zone prior to commencement of the event, and the rule allows vessels to seek permission to enter the zone.

B. Impact on Small Entities

The Regulatory Flexibility Act of 1980, 5 U.S.C. 601–612, as amended, requires Federal agencies to consider the potential impact of regulations on small entities during rulemaking. The term ''small entities'' comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000. The Coast Guard certifies under 5 U.S.C. 605(b) that this rule will not have a significant economic impact on a substantial number of small entities.

While some owners or operators of vessels intending to transit the safety zone may be small entities, for the reasons stated in section V.A above, this rule will not have a significant economic impact on any vessel owner or operator.

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 121), we want to assist small entities in understanding this rule. If the rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please call or email the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

Small businesses may send comments on the actions of Federal employees who enforce, or otherwise determine compliance with, Federal regulations to the Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards. The Ombudsman evaluates these actions annually and rates each agency's responsiveness to small business. If you wish to comment on actions by employees of the Coast Guard, call 1–888–REG–FAIR (1–888–734–3247). The Coast Guard will not retaliate against small entities that question or complain about this rule or any policy or action of the Coast Guard.

C. Collection of Information

This rule will not call for a new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

D. Federalism and Indian Tribal Governments

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this rule under that Order and have determined that it is consistent with the fundamental federalism principles and preemption requirements described in Executive Order 13132.

Also, this rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

E. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 (adjusted for inflation) or more in any one year. Though this rule will not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

F. Environment

We have analyzed this rule under Department of Homeland Security Directive 023–01, Rev. 1, associated implementing instructions, and Environmental Planning COMDTINST 5090.1 (series), which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (42 U.S.C. 4321–4370f), and have determined that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This rule involves a safety zone lasting for a period of five hours that will prohibit entry within the designated safety zone during a swim event. It is categorically excluded from further review under paragraph L60(a) of Appendix A, Table 1 of DHS Instruction Manual 023–01–001–01, Rev. 1. A Record of Environmental Consideration supporting this determination is available in the docket. For instructions on locating the docket, see the **ADDRESSES** section of this preamble.

G. Protest Activities

The Coast Guard respects the First Amendment rights of protesters. Protesters are asked to call or email the person listed in the **FOR FURTHER INFORMATION CONTACT** section to coordinate protest activities so that your message can be received without jeopardizing the safety or security of people, places or vessels.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), reporting and recordkeeping requirements, Security measures, Waterways.

For the reasons discussed in the preamble, the Coast Guard amends 33 CFR part 165 as follows:

PART 165—REGULATED NAVIGATION AREAS AND LIMITED ACCESS AREAS

■ 1. The authority citation for part 165 continues to read as follows:

Authority: 46 U.S.C. 70034, 70051; 70124; 33 CFR 1.05–1, 6.04–1, 6.04–6, and 160.5; Department of Homeland Security Delegation No. 00170.1, Revision No. 01.3.

■ 2. Add § 165.T01–0781 to read as follows:

§ 165.T01–0947 Safety Zone; Pier Park, Boston Inner Harbor, East Boston MA.

(a) *Regulated area.* The following area is a safety zone: all navigable waters of a portion of Boston Inner Harbor in the vicinity of Pier Park, East Boston, specifacly within a box bound by the following coordinates: Corner #1 42°21′41.22″ N, 071°2′22.6″ W, thence to Corner #2 42°21′26.53″ N, 071°2′32.28″ W, thence to Corner #3 42°21′2.59″ N, 071°1′32.92″ W, thence to Corner #4 42°21′13.14″ N, 071°1′24.6″ W, and returning to the point of origin.

(b) *Definitions.* As used in this section—

Designated representative means a Coast Guard Patrol Commander, including a Coast Guard coxswain, petty officer, or other officer operating a Coast Guard vessel and a Federal, State, and local officer designated by or assisting the Captain of the Port New York (COTP) in the enforcement of the regulations in this section.

Participant means all persons registered with the event sponsor as a participant in the event.

(c) *Regulations.* (1) Under the general safety zone regulations in subpart C of this part, you may not enter the safety zone described in paragraph (a) of this section unless authorized by the COTP or the COTP's designated representative.

(2) To seek permission to enter, contact the COTP or the COTP's designated via VHF–FM Marine Channel 16 or by contacting the Coast Guard Sector Boston Command Center at (857) 416–3015.Those in the safety zone must comply with all lawful orders or directions given to them by the COTP or the COTP's designated representative.

(d) *Enforcement periods.* This section will be enforced from 7 a.m. to noon on June 9, 2024.

Kailie J. Benson,

Captain, U.S. Coast Guard, Captain of the Port Sector Boston.

[FR Doc. 2024–10225 Filed 5–9–24; 8:45 am]

BILLING CODE 9110–04–P

DEPARTMENT OF VETERANS AFFAIRS

38 CFR Part 38

RIN 2900–AR88

Commemorative Plaques and Urns

AGENCY: Department of Veterans Affairs.

ACTION: Final rule.

SUMMARY: The Department of Veterans Affairs (VA) is amending its regulations to implement new statutory authority to furnish commemorative plaques and urns for certain veterans whose cremated remains are not interred. This action is necessary to administer the new benefits, which were authorized by the ''Johnny Isakson and David P. Roe, M.D. Veterans Health Care and Benefits Improvement Act of 2020'' (the Act).

DATES: This rule is effective June 10, 2024.

FOR FURTHER INFORMATION CONTACT: Eric Powell, Director, Memorial Products Service, National Cemetery Administration, Department of Veterans Affairs, 810 Vermont Avenue NW, Washington, DC 20420. Telephone: 202–632–8670 (this is not a toll-free number).

SUPPLEMENTARY INFORMATION: On November 20, 2023, VA published in the **Federal Register**, at 88 FR 80649, a proposed rule revising its regulations to implement section 2207 of the Act (Pub. L. 116–315), which amended sec. 2306 of title 38, United States Code, by adding a new subsection (h), to create a new memorialization authority for the National Cemetery Administration

(NCA) to furnish, upon request, an urn or commemorative plaque for a veteran whose cremated remains are not interred. The public comment period ended January 19, 2024, and VA received nine comments. VA will address each in greater detail below but notes generally that six commenters expressed concerns with the rulemaking, two commenters supported the rulemaking, and one commenter's comment is considered beyond the scope of the rulemaking.

One commenter criticized the proposed rule as poorly written and lacking in foresight, suggesting the rulemaking was a cost-saving measure at the expense of the veteran community. While the expressed opinions about the regulatory work product are outside the scope of the rulemaking, we address this commenter's remarks about the underlying statutory authority implemented by this final rule. The commenter noted that a veteran who receives a commemorative plaque or urn would be prohibited from interment in a ''national/state'' cemetery in addition to being prohibited from receiving a headstone, marker, or medallion. The commenter also expressed concern about the effect of this outcome on grants for interment and care of remains.

The commenter is partially correct in that, if VA furnishes a commemorate plaque or urn for a veteran, § 38.634(a)(3)(i) and (ii) would prohibit VA from providing a Government headstone or marker and interring the veteran in a VA national cemetery. However, the proposed rule correctly explains this prohibition is based on statutory law, not a budgetary decision. See 38 U.S.C. 2306(d)(4) (authorizing VA to provide a medallion in lieu of a headstone or marker) and (h)(2) (prohibiting VA, after furnishing a plaque or urn, from providing a headstone or marker (and, by extension, a medallion provided in lieu of a headstone or marker) and interring the eligible individual in a VA national cemetery).

Additionally, we clarify for this commenter that VA grant-funded cemeteries are not prohibited from interring an individual who receives a commemorative plaque or urn, as VA national cemeteries are prohibited from doing so in sec. 2306(h)(2)(B); therefore, VA grant-funded cemeteries may inter a veteran who has received a plaque or urn and provide perpetual care of that veteran's gravesite. VA will make no changes based on commenter's concerns about the statutory restrictions in sec. 2306(h) implemented in this final rule.

Three commenters provided detailed feedback on multiple issues, which VA will address by subject matter below.

Adverse Impacts on Eligibility for Other VA Benefits and Cemetery Grant Funding

Commenters expressed concern that when a claimant accepts a Government-furnished commemorative plaque or urn for an eligible deceased veteran, the veteran is prohibited from future interment in a VA national cemetery or receiving a Government-furnished headstone or marker. The commenters noted that acceptance of ''relatively low cost'' items would deny the significant burial benefit and perpetual care of a veteran's gravesite. These commenters generally criticized the proposed rule's disqualification of a veteran's remains from interment in a VA national cemetery or a VA grant-funded cemetery as counter to the larger purpose of ''honoring veterans and providing perpetual care'' of their gravesites. The commenters were concerned that if a VA grant-funded cemetery interred a veteran who received a commemorative plaque or urn, such interment would violate the terms of grant funding under 38 U.S.C. 2408 and adversely impact a cemetery's eligibility to receive the VA plot or interment allowance. The commenters also cited to possible administrative burdens to verify whether a veteran has received a commemorative plaque or urn. The commenters noted financial burdens for VA grant-funded cemeteries to cover costs of furnishing a headstone or marker at their expense to veterans who received a commemorative plaque or urn and are interred in such cemeteries because VA would otherwise provide headstones or markers for veterans interred in those cemeteries.

First, VA reiterates that the purpose of the commemorative plaque and urn benefit is to honor veterans for their service for families that choose not to inter their loved one. The commemorative plaque or urn is authorized as a Federal benefit provided to an eligible deceased veteran instead of a headstone or marker, under sec. 2306(h)(1); and if furnished, VA is prohibited from interring that veteran in a VA national cemetery and providing a headstone or marker for such individual, under sec. 2306(h)(2)(A) and (B).

The commenters implied that because commemorative plaques and urns are ''relatively low cost,'' VA's provision of these items should not affect a veteran's eligibility for burial. VA clarifies that the cost of the commemorative plaque or urn is irrelevant to VA's obligation to follow the law, which prohibits VA from interring an eligible veteran in a VA national cemetery or furnishing a VA headstone or marker if we have furnished a commemorative plaque or urn for that veteran. Consistent with sec. 2306(h)(2), these express prohibitions must be implemented in regulations as proposed.

Additionally, the prohibitions in sec. 2306(h)(2) only affect burial in a VA national cemetery and the provision of a Government headstone or marker. Statutory eligibility for burial in a VA national cemetery is defined in sec. 2402, but sec. 2306(h)(2) prohibits VA from interring such veteran in a national cemetery or providing a Government headstone or marker for that veteran. If a VA grant-funded cemetery receives a request to inter a veteran for whom VA has furnished a commemorative urn or plaque, the cemetery may inter that veteran, and the prohibitions in sec. 2306(h)(2) would have no impact on existing or future VA grant-funding terms and conditions. VA grant-funded cemeteries are operated for the interment of eligible veterans and their eligible family members, including veterans who received a commemorative plaque or urn. Similarly, eligibility of certain cemeteries to receive the VA plot or interment allowance under sec. 2303 for the interments of eligible veterans would be unaffected by VA furnishing a commemorative plaque or urn for veterans interred in those cemeteries. However, if a cemetery, including a VA grant-funded cemetery, inters a veteran for whom VA furnished a commemorative plaque or urn, sec. 2306(h)(2)(A) prohibits VA from providing a Government headstone or marker for such veteran, and the cemetery would need to provide a headstone or marker through some other means.

VA understands the administration and financial burdens raised by the commenters. However, VA's provision of a commemorative plaque or urn for an eligible veteran and the prohibitions in sec. 2306(h) do not directly affect any non-VA national cemetery's decision to inter that veteran.

The commenters expressed uncertainty about processes for VA grant-funded cemeteries or other stakeholders to verify whether a veteran was furnished a commemorative urn or plaque. VA plans to include information on a public facing online tool that stakeholders can use to find such information. We stress that information in such online tool would not be intended to be determinative of a veteran's eligibility for interment in any

cemetery, but instead would be designed to provide stakeholders, which potentially include every cemetery or burial services provider in the nation, information to support their business decisions regarding the interment of a veteran subject to prohibitions under sec. 2306(h).

VA appreciates these comments raising concerns regarding restrictions in the underlying statutory authorities, including sec. 2306(h). However, VA is obligated to implement the current authority as proposed and makes no changes based on these comments.

Impacts on Future Generations and Risk of Increased Unclaimed Remains

The commenters noted the common practice of families delaying interment of cremated remains until surviving spouses and dependents have passed, which could affect long-term chain of custody of the commemorative plaque or urn. They raised concerns that decisions affecting the disposition of remains may fall to a family representative, generations removed, who may be unfamiliar with the prohibitions in sec. 2306(h) and the impact on other VA benefits. Additionally, commenters noted that because a veteran received a plaque or urn in lieu of interment in a VA national cemetery or a Government headstone or marker, there is a risk of the cremated remains of such veterans being unattended, resulting in an increase in those veterans' remains becoming unclaimed. One commenter asserted that the commemorative plaque and urn program would ''not help increase the number of eligible deceased veterans interred in a governmental cemetery.''

VA appreciates these comments, however, as explained, sec. 2306(h)(2) expressly bars VA from interring in a VA national cemetery or furnishing a headstone or marker to a veteran for whom VA has furnished a commemorative plaque or urn. There is no exception to this mandated prohibition.

Further, sec. 2306(h)(4)(A) mandates that any commemorative plaque or urn provided upon request for an eligible deceased veteran ''shall be the personal property of the next of kin or other such individual.'' In our proposed rule, VA specified many practical limitations of our authority to furnish a commemorative plaque or urn to raise the public's awareness. We also proposed an ''applicant'' definition to minimize the potential for unintended forfeitures of benefits, family disputes, and duplicate claims. Additionally, applicants must certify they are authorized to make decisions about the disposition of veteran's remains and certify their awareness of other precluded benefits, before submitting a claim for a plaque or urn. VA will continue to raise awareness of the limitations of sec. 2306(h) by providing detailed information about the commemorative plaque and urn program, following the effective date of this final rulemaking. However, VA has no jurisdiction over a commemorative plaque or urn once it has been furnished and must defer to a veteran's family members to maintain control of a furnished plaque or urn as their personal property.

Similarly, VA has no ability to control circumstances that result in remains of veterans becoming unclaimed by a family member or personal representative. VA has several benefit authorities supporting unclaimed veterans and those who bring remains to VA to ensure dignified burials. However, sec. 2306(h) prohibits VA from interring the unclaimed remains of a veteran for whom VA has furnished a commemorative plaque or urn. Again, the prohibition only applies to interment in VA national cemeteries, not to other cemeteries where burial of the unclaimed remains of a veteran, for whom VA has provided a commemorative plaque or urn, is not expressly prohibited.

Regarding the comment that the rule will not increase interments in ''governmental cemeteries,'' we reiterate that provision of a commemorative plaque or urn would bar interment only in a VA national cemetery. Further, as noted above, the purpose of the law is to provide an appropriate commemorative benefit to families that do not intend to inter their loved one in a cemetery. Finally, regardless of whether the availability of this benefit might affect a family's decision regarding interment in a VA cemetery, VA does not have authority to disregard the express limitations in the statute.

VA will make no changes to the rulemaking based on comments critical of the plaque and urn statutory authority.

Consideration of Suggested ''Reinstatement'' Process

Two commenters suggested including a procedure for returning a commemorative plaque or urn to reestablish eligibility for other veteran burial benefits. They added that not including such a provision would lead to irreversible decisions adversely affecting veterans and their families. Another commenter suggested regulatory procedures for returning a commemorative plaque or urn to governmental control ''whether in National, State, or Tribal cemeteries.'' This commenter suggested VA grant reinstatement ''with legitimate justification as a part of a request to cancel the initial decision to receive a commemorative plaque or urn in lieu of burial.''

VA understands the commentors' concerns, but the concept of reinstatement does not apply because VA has no authority to alter the prohibitions under sec. 2306(h). Further, while provision of a commemorative plaque or urn for an eligible veteran prohibits VA from interring such veteran in a national cemetery or furnishing a headstone or marker for such veteran, it does not invalidate the underlying criteria for a veteran's eligibility for burial in a VA national cemetery. The concept of ''reinstatement'' or ''reversing'' a decision affecting burial eligibility is technically inaccurate because VA furnishes a commemorative plaque or urn to eligible veterans. VA must confirm the individual meets the statutory criteria for eligibility as a veteran who served in the Armed Forces on or after April 6, 1917, who is eligible for a headstone or marker under sec. 2306(d) (or would be so eligible but for the date of the individual's death), and whose cremated remains are not interred. These criteria apply to VA's decision to furnish a requested plaque or urn and have no further impact, except on subsequent requests for burial in a VA national cemetery or a headstone or marker. The provision of either burial in a VA national cemetery or a headstone or marker is prohibited under sec. 2306(h)(2). As explained above, such veterans can be interred in any other cemetery with no impact on other VA benefits, except VA's provision of a headstone or marker. And, under 38 U.S.C. 2402(a)(5), an eligible spouse, surviving spouse, or dependent would not be prohibited from receiving a Government headstone or marker or being interred in a VA national cemetery. VA grant-funded cemeteries and veterans' family members or representatives may still submit claims for other VA benefits that are based on an individual's qualifying military service and other applicable criteria.

Lastly, VA has no authority to cancel a decision granting a requested benefit to allow the claimant to request a different benefit. Revision of a decision on grounds of clear and unmistakable error, renouncement of rights to monetary benefits, and withdrawal of a supplemental claim, higher-level review, or a notice of disagreement do

not apply in the context suggested by the commenter. Even if VA agreed with the commenter's suggestion to implement a return process in this final rule, VA has no authority to do so. VA is bound by sec. 2306(h) requirements and will make no changes based on these comments.

Two commenters expressed concern about the impact of the sec. 2306(h) prohibitions on veterans and their surviving spouses who are both entitled to distinct burial benefits. Both commenters raised the following hypothetical scenario: a veteran's spouse requested and received a commemorative plaque or urn for the deceased veteran; but, upon the death of the veteran's spouse, the family now wants to inter the veteran's spouse in a VA national cemetery or Arlington National Cemetery. Each commenter noted that a short-term decision of a veteran's spouse to not inter the veteran in a VA national cemetery and, instead, request a commemorative plaque or urn has long-term consequences for future surviving family members for whom VA cannot provide burial in a national cemetery or a headstone or marker for the veteran's eligible spouse. We clarify that the prohibition in sec. 2306(h)(2) applies only to burial in VA national cemeteries, not Arlington National Cemetery. However, prior to applying for a commemorative plaque or urn, VA encourages potential applicants to check directly with agencies that operate other cemeteries (including the Department of Defense regarding Arlington National Cemetery) concerning any potential adverse impact on eligibility for interment in such other cemeteries resulting from receipt of VA's plaque or urn benefit. As previously explained in this rulemaking, veterans who receive a commemorative plaque or urn may be interred in any other cemetery with no impact on other VA benefits, except VA's provision of a headstone or marker; and their eligible spouse, surviving spouse, or dependent would not be prohibited from receiving a headstone or marker or being interred in a VA national cemetery, although they would not be interred with the veteran.

One commenter suggested VA allow the veteran to be interred with the spouse if the spouse is already interred in a VA national cemetery, noting that including the urn ''would not add an additional cost to VA'' and would ''be no different than including a memento in the casket.'' While VA agrees that in certain scenarios, there would seemingly be negligible or no ''cost'' to allow such practice, the law explicitly prohibiting interment in a VA national cemetery of a veteran for whom VA has furnished a commemorative plaque or urn does not grant VA the authority to consider cost. VA is mandated to enforce the statutory prohibition. Second, the commemorative urn containing the cremated remains of an eligible veteran is a VA benefit intended to honor the veteran's service and sacrifice to this Nation. As explained in the preamble of the proposed rule, VA cautions families, and will continue to caution families, about the prohibitive impact of requesting a commemorative plaque or urn for a veteran. Once the final rule becomes effective, VA will provide extensive information about the plaque and urn authorities, impacts on VA burial and memorialization, and other critical issues on the VA public-facing web page.

One commenter suggested VA allow families to return the plaque or urn and reinstate eligibility for interment in a VA national cemetery and a Government headstone or marker. The commenter likened the return of a plaque or urn to the return of a Government headstone or marker when a decedent is moved from a VA national cemetery to a private cemetery. As explained in response to a similar comment suggesting reinstatement, this is not currently authorized under sec. 2306. Further, the Government headstone or marker installed in a VA national cemetery is not returned to VA when a family disinters a loved one and reinters the remains in a private cemetery. VA regulations in 38 CFR 38.630(b)(5)(iii) and 38.631(b)(5)(i) and (iii) provide that all Government-furnished burial and memorial headstones and markers remain the property of the United States Government in perpetuity and must be properly disposed of when they are removed from any cemetery, except burial headstones and markers may be relocated to a different gravesite following disinterment. By contrast, sec. 2306(h)(4)(A) mandates that any commemorative plaque or urn furnished for an eligible veteran is the personal property of the next of kin or such other individual as the Secretary considers appropriate. Additionally, sec. 2306(h)(4)(B) provides that the Federal Government shall not be liable for any damage after the date a commemorative plaque or urn is furnished. As explained in the preamble of the proposed rule, VA is aware of the complexity of the plaque and urn benefit, and we will continue to inform families of issues that they may need to manage if their request for a commemorative plaque or urn is granted. However, because these comments attack the statutory mandates implemented in this final rule, VA will make no changes based on these comments.

One commentor wrote that VA's provision of the commemorative urn under sec. 2306(h), as opposed to reimbursing the cost of such an urn, has financial implications for funeral homes, which traditionally sell urns to veteran families. VA acknowledges the commenter's concern and relies on information provided by the U.S. Small Business Administration (SBA) in determining if this regulatory action would have a significant impact on a substantial number of small entities. VA considers 1% or higher of the total number of entities within a North American Industry Classification System (NAICS) industry to be a ''substantial number.'' In determining whether a regulatory action may have a ''significant impact'' on small entities, VA uses a revenue test for each specific NAICS code that may be affected. Any regulatory action that generates a cost of 3% or higher on that NAICS code's annual revenue is deemed to have a ''significant impact. As explained in the Regulatory Flexibility Act (RFA) section of the proposed rule and this final rule, VA's analysis regarding the cost of commemorative plaques and urns, along with the Paperwork Reduction Act (PRA) costs of the rulemaking, yields a potential impact of $234,535.10 on the funeral home industry, which equates to a potential de minimis cost of $139.27 per funeral home ($234,535.10/1,684 estimated caseload). Based on this analysis and revenue test, the rulemaking will not have a significant economic impact on funeral homes.

Further, VA has no alternative but to implement the commemorative plaque or urn benefit in regulation and will make no changes based on this comment.

One of the two commenters who supported the rulemaking also expressed concern about the amount of time required for VA to implement the regulation that is necessary for an applicant to obtain a commemorative plaque or urn, and that an applicant should not be denied the benefit due to the delay in implementation of the authority. VA clarifies that the rule does not establish eligibility criteria that would preclude an eligible applicant from obtaining a commemorative plaque or urn for an eligible veteran who was deceased prior to the implementation of the regulation but on or after April 6, 1917, which is the eligibility date established under section 2306(h)(3). VA proposed the regulation to implement the new authority as expeditiously as possible, and it will

become effective within thirty days of publication of this final rule in the **Federal Register**. VA will update its website to provide information about the new benefit and how to apply for it. No changes to the rulemaking are needed based on these comments.

Finally, VA addresses the comment outside the scope of the rulemaking that requested an amendment to 38 U.S.C. 2306 to provide eligibility for burial for veterans who ''who commit suicide due to PTSD, or possible drug induced impulsiveness.'' VA clarifies that the rule only implements new statutory authority for the commemorative plaque or urn benefit for veterans with qualifying service; it does not establish eligibility criteria that pertain to cause of death. Cause of death has no bearing on eligibility. This means that a veteran who dies by suicide still may be eligible for a plaque or urn or other burial benefit. The comment also requested eligibility for veterans who are not ''registered'' with VA. VA clarifies that veterans do not need to be previously registered or affiliated with VA in any manner for someone to apply for a commemorative plaque or urn for their remains. VA will encourage veterans and family members who are interested in the new benefit to visit the VA web page for more information about how to apply. VA makes no changes based on the comment.

Executive Orders 12866, 13563 and 14094

Executive Orders 12866 (Regulatory Planning and Review) directs agencies to assess the costs and benefits of available regulatory alternatives and, when regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, and other advantages; distributive impacts; and equity). Executive Order 13563 (Improving Regulation and Regulatory Review) emphasizes the importance of quantifying both costs and benefits, reducing costs, harmonizing rules, and promoting flexibility. Executive Order 14094 (Modernizing Regulatory Review) supplements and reaffirms the principles, structures, and definitions governing contemporary regulatory review established in Executive Orders 12866 and 13563. The Office of Information and Regulatory Affairs has determined that this rulemaking is not a significant regulatory action under Executive Order 12866, as amended by Executive Order 14094. The Regulatory Impact Analysis associated with this rulemaking can be found as a supporting document at *www.regulations.gov.*

Regulatory Flexibility Act

The Secretary hereby certifies that this final rule will not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act (5 U.S.C. 601–612). This conclusion is based on the cost of commemorative plaques and urns and the Paperwork Reduction Act costs of the rulemaking to arrive at a potential impact of $234,535.10 on the funeral home industry, which equates to a potential de minimis cost of $139.27 per funeral home ($234,535.10/1,684 estimated caseload). Therefore, pursuant to 5 U.S.C. 605(b), the initial and final regulatory flexibility analysis requirements of 5 U.S.C. 603 and 604 do not apply.

Unfunded Mandates

The Unfunded Mandates Reform Act of 1995 requires, at 2 U.S.C. 1532, that agencies prepare an assessment of anticipated costs and benefits before issuing any rule that may result in an expenditure by State, local, and tribal governments, in the aggregate, or by the private sector, of $100 million or more (adjusted annually for inflation) in any one year. This final rule will have no such effect on State, local, and tribal governments, or on the private sector.

Paperwork Reduction Act

This final rule includes a provision constituting a new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3521) that requires approval by the Office of Management and Budget (OMB). Accordingly, under 44 U.S.C. 3507(d), VA has submitted a copy of this rulemaking action to OMB for review and approval.

This final rule adding 38 CFR 38.634 contains a new collection of information under the Paperwork Reduction Act of 1995. OMB has assigned control number 2900–0937 to this information collection, and this information collection is pending final OMB approval. VA may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. If OMB does not approve the collection of information as requested, VA will immediately remove the provision containing a collection of information or take such other action as is directed by OMB.

The collection of information contained in 38 CFR 38.634 is described immediately following this paragraph, under its respective title.

- *Title:* Request for Commemorative Plaque or Urn.
- *OMB Control No:* 2900–0937.
- *CFR Provision:* 38 CFR 38.634.
- *Summary of collection of information:* The new collection of information in proposed § 38.634 would require information necessary to establish the identity of a deceased veteran to verify burial eligibility under 38 U.S.C. 2402 for purposes of furnishing a commemorative plaque or urn, as authorized under 38 U.S.C. 2306(h). It would also require information regarding the applicant's relationship to the deceased veteran, the applicant's certification as to certain factual matters, and the applicant's contact information.
- *Description of need for information and proposed use of information:* The information would be used by VA to verify an individual's service in the Armed Forces on or after April 6, 1917; eligibility for a headstone, marker, or medallion that VA has not yet furnished under sec. 2306(d); and that the individual's remains were cremated and not interred. Information regarding the applicant's relationship to the deceased veteran would be used to verify that the applicant is a family member empowered to make decisions regarding memorialization of the veteran and disposition of any remains.
- *Description of likely respondents:* Veterans' family members.
- *Estimated number of respondents per year:* 1,684.
- *Estimated frequency of responses per year:* This is a one-time collection.
- *Estimated average burden per response:* 10 minutes.
- *Estimated total annual reporting and recordkeeping burden:* VA estimates the total annual reporting and recordkeeping burden to be 280.6667 hours (1,684 respondents × 10 minutes/60 minutes).
- *Estimated cost to respondents per year:* VA estimates the annual cost to respondents to be $8352.64. Using VA's average annual number of 1,684 respondents, VA estimates the total information collection burden cost to be $8352.64 per year (280.6667 burden hours (1,684 respondents × 10 minutes/60 minutes) × $29.76 mean hourly wage).

* To estimate the respondents' total information collection burden cost, VA uses the Bureau of Labor Statistics (BLS) mean hourly wage for ''All Occupations'' of $29.76. This information is available at *https://www.bls.gov/oes/2022/may/oes_nat.htm#00-0000.*

Congressional Review Act

Pursuant to Subtitle E of the Small Business Regulatory Enforcement Fairness Act of 1996 (known as the Congressional Review Act) (5 U.S.C. 801 *et seq.*), the Office of Information and Regulatory Affairs designated this rule as not satisfying the criteria under 5 U.S.C. 804(2).

List of Subjects in 38 CFR Part 38

Administrative practice and procedure, Cemeteries, Claims, Veterans.

Signing Authority

Denis McDonough, Secretary of Veterans Affairs, approved and signed this document on April 11, 2024, and authorized the undersigned to sign and submit the document to the Office of the Federal Register for publication electronically as an official document of the Department of Veterans Affairs.

Jeffrey M. Martin,

Assistant Director, Office of Regulation Policy & Management, Office of General Counsel, Department of Veterans Affairs.

For the reasons set forth in the preamble, the Department of Veterans Affairs amends 38 CFR part 38 as follows:

PART 38—NATIONAL CEMETERIES OF THE DEPARTMENT OF VETERANS AFFAIRS

■ 1. The authority citation for part 38 continues to read as follows:

Authority: 38 U.S.C. 107, 501, 512, 531, 2306, 2400, 2402, 2403, 2404, 2407, 2408, 2411, 7105.

■ 2. Amend § 38.600 by revising the definition of ''Interment'' to read as follows:

§ 38.600 Definitions.

(a) * * *

Interment means the burial or entombment of casketed or cremated remains, including the placement of cremated remains in a columbarium niche.

* * * * *

■ 3. Add § 38.634 to read as follows:

§ 38.634 Commemorative urns and plaques.

(a) *General.* (1) In lieu of furnishing a headstone, marker, or medallion under this part, the Department of Veterans Affairs (VA) will furnish, when requested—

(i) A commemorative urn; or

(ii) A commemorative plaque.

(2) For the purposes of this section, the following definitions apply:

(i) *Commemorative urn* means a container that signifies the deceased individual's status as a veteran, in which the individual's cremated remains may be placed at private expense.

(ii) *Commemorative plaque* means a tablet that signifies the deceased individual's status as a veteran.

(3) If VA furnishes a commemorative plaque or a commemorative urn for an individual under this section, VA may not provide for such individual—

(i) A headstone, marker, or medallion; or

(ii) Any burial benefit under 38 U.S.C. 2402.

(4) Any commemorative plaque or commemorative urn furnished under this section shall be the personal property of the applicant.

(5) The Federal Government shall not be liable for any damage to a commemorative plaque or urn furnished under this section that occurs after the date on which the commemorative plaque or urn is furnished. VA will not replace a commemorative plaque or urn unless it was damaged during shipping or contains a manufacturing deficiency or inscription error.

(b) *Eligible individuals to be commemorated.* An eligible individual for purposes of this section is a deceased individual:

(1) Who served in the Armed Forces on or after April 6, 1917;

(2) Who is eligible for, but has not received, a headstone, marker, or medallion under 38 U.S.C. 2306(d) (or would be so eligible but for the date of the death of the individual); and

(3) Whose remains were cremated and not interred (see § 38.600 for definition of interment).

(c) *Application process.* (1) *Applicant.* An applicant for a commemorative plaque or urn must be a member of the veteran's family, which includes the veteran's spouse or individual who was in a legal union as defined in § 3.1702(b)(1)(ii) of this chapter with the veteran; a child, parent, or sibling of the veteran, whether biological, adopted, or step relation; and any lineal or collateral descendant of the veteran.

(2) *Application.* An applicant must submit a completed VA Form 40–1330UP, Claim for Commemorative Urn or Commemorative Plaque for Veteran's Cremains Not Interred in a Cemetery. The National Cemetery Administration will verify the decedent's eligibility for a commemorative plaque or urn. Applicants must certify that they have read a statement about other benefits to which the veteran will lose benefit rights, that the decedent's remains were cremated and are not interred at the time of application, that the applicant is a member of the decedent's family authorized to make decisions about the disposition of the decedent's remains, and that the applicant is in possession of the entirety of the cremains. Other required claim information will include documentation of the decedent's eligibility and the applicant's contact information and mailing address. VA's duty to notify claimants of necessary information or evidence under § 3.159(b) of this chapter and duty to assist claimants in obtaining evidence under § 3.159(c) of this chapter will apply.

[FR Doc. 2024–10194 Filed 5–9–24; 8:45 am]

BILLING CODE 8320–01–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 180

[EPA–HQ–OPP–2021–0613 and EPA–HQ–OPP–2023–0347; FRL–11898–01–OCSPP]

1-Propanaminium, 3-amino-N-(2-carboxyethyl)-*N,N*-dimethyl-, N-coco acyl derivatives, inner salts; and 1-Propanaminium, 3-amino-N-(carboxymethyl)-*N,N*-dimethyl-, N-coco acyl derivatives, hydroxides, inner salts in Pesticide Formulations; Tolerance Exemptions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This regulation establishes an exemption from the requirement of a tolerance for residues of 1-propanaminium, 3-amino-N-(2-carboxyethyl)-*N,N*-dimethyl-, N-coco acyl derivatives, inner salts (CAS Reg. No. 499781–63–4) when used as an inert ingredient (adjuvant or surfactant) on growing crops and raw agricultural commodities pre- and post-harvest. This regulation also establishes an exemption from the requirement of a tolerance for residues of 1-propanaminium, 3-amino-N-(carboxymethyl)-*N,N*-dimethyl-, N-coco acyl derivatives, hydroxides, inner salts (CAS Reg. No. 61789–40–0), also known as cocamidopropyl betaine, when used as an inert ingredient (surfactant) on growing crops pre-harvest. Oxiteno USA, LLC and Bi-PA NV, respectively, each submitted a petition to EPA under the Federal Food, Drug, and Cosmetic Act (FFDCA), requesting establishment of an exemption from the requirement of a tolerance for each of these substances. This regulation eliminates the need to establish a maximum permissible level for residues of 1-propanaminium, 3-

amino-N-(2-carboxyethyl)-*N,N*-dimethyl-, N-coco acyl derivatives, inner salts; and cocamidopropyl betaine when used in accordance with the terms of these exemptions.

DATES: This regulation is effective May 10, 2024. Objections and requests for hearings must be received on or before July 9, 2024 and must be filed in accordance with the instructions provided in 40 CFR part 178 (see also Unit I.C. of the **SUPPLEMENTARY INFORMATION**).

ADDRESSES: The dockets for these actions, identified by docket identification (ID) numbers EPA–HQ–OPP–2021–0613 and EPA–HQ–OPP–2023–0347, are available at *https://www.regulations.gov* or at the Office of Pesticide Programs Regulatory Public Docket (OPP Docket) in the Environmental Protection Agency Docket Center (EPA/DC), West William Jefferson Clinton Bldg., Rm. 3334, 1301 Constitution Ave. NW, Washington, DC 20460–0001. The Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room and the OPP docket is (202) 566–1744. Please review the visitor instructions and additional information about the docket available at *https://www.epa.gov/dockets.*

FOR FURTHER INFORMATION CONTACT: Charles Smith, Director, Registration Division (7505T), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460–0001; main telephone number: (202) 566–1030; email address: *RDFRNotices@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this action apply to me?

You may be potentially affected by this action if you are an agricultural producer, food manufacturer, or pesticide manufacturer. The following list of North American Industrial Classification System (NAICS) codes is not intended to be exhaustive, but rather provides a guide to help readers determine whether this document applies to them. Potentially affected entities may include:

- Crop production (NAICS code 111).
- Animal production (NAICS code 112).
- Food manufacturing (NAICS code 311).
- Pesticide manufacturing (NAICS code 32532).

B. How can I get electronic access to other related information?

You may access a frequently updated electronic version of 40 CFR part 180 through the Office of the Federal Register's e-CFR site at *https://www.ecfr.gov/current/title-40.*

C. How can I file an objection or hearing request?

Under FFDCA section 408(g), 21 U.S.C. 346a(g), any person may file an objection to any aspect of this regulation and may also request a hearing on those objections. You must file your objection or request a hearing on this regulation in accordance with the instructions provided in 40 CFR part 178. To ensure proper receipt by EPA, you must identify docket ID number EPA–HQ–OPP–2021–0613 or EPA–HQ–OPP–2023–0347 in the subject line on the first page of your submission. All objections and requests for a hearing must be in writing, and must be received by the Hearing Clerk on or before July 9, 2024. Addresses for mail and hand delivery of objections and hearing requests are provided in 40 CFR 178.25(b).

In addition to filing an objection or hearing request with the Hearing Clerk as described in 40 CFR part 178, please submit a copy of the filing (excluding any Confidential Business Information (CBI)) for inclusion in the public docket. Information not marked confidential pursuant to 40 CFR part 2 may be disclosed publicly by EPA without prior notice. Submit the non-CBI copy of your objection or hearing request, identified by docket ID number EPA–HQ–OPP–2021–0613 or EPA–HQ–OPP–2023–0347, by one of the following methods:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the online instructions for submitting comments. Do not submit electronically any information you consider to be CBI or other information whose disclosure is restricted by statute.
- *Mail:* OPP Docket, Environmental Protection Agency Docket Center (EPA/DC), (28221T), 1200 Pennsylvania Ave. NW, Washington, DC 20460–0001.
- *Hand Delivery:* To make special arrangements for hand delivery or delivery of boxed information, please follow the instructions at *https://www.epa.gov/dockets/where-send-comments-epa-dockets#express.*

Additional instructions on commenting or visiting the docket, along with more information about dockets generally, is available at *https://www.epa.gov/dockets.*

II. Petition for Exemption

In the **Federal Register** of October 21, 2021 (86 FR 58239) (FRL–8792–04–OSCPP), EPA issued a document pursuant to FFDCA section 408, 21 U.S.C. 346a, announcing the filing of a pesticide petition (PP IN–11550) by Spring Regulatory Sciences, on behalf of Oxiteno USA, LLC, 3200 Southwest Freeway, Suite 1200, Houston, TX 77027. The petition requested that 40 CFR 180.910 be amended by establishing an exemption from the requirement of a tolerance for residues of 1-propanaminium, 3-amino-N-(2-carboxyethyl)- *N,N*-dimethyl-, N-coco acyl derivatives, inner salts (CAS Reg. No. 499781–63–4) when used as an inert ingredient (adjuvant or surfactant) in pesticide formulations applied to growing crops or raw agricultural commodities pre- and post-harvest. This document referenced a summary of the petition prepared by Oxiteno USA, LLC, which is available in the docket at *https://www.regulations.gov.* There were no comments received in response to the notice of filing.

In the **Federal Register** of Wednesday, July 26, 2023 (88 FR 48179) (FRL–10579–06–OSCPP), EPA issued a document pursuant to FFDCA section 408, 21 U.S.C. 346a, announcing the filing of a pesticide petition (PP IN–11782) by SciReg, Inc., 12733 Director's Loop, Woodbridge, VA 22192 on behalf of Bi-PA NV. The petition requested that 40 CFR 180.920 be amended by establishing an exemption from the requirement of a tolerance for residues of cocamidopropyl betaine (CAS Reg. No. 61789–40–0) when used as an inert ingredient (surfactant) in pesticide formulations pre-harvest at levels up to 10% w/w in pesticide formulations. This document referenced a summary of the petition prepared by Bi-PA NV, which is available in the docket at *https://www.regulations.gov.* There were no comments received in response to the notice of filing.

Based upon review of the data supporting the petitions and in accordance with its authority under FFDCA section 408(d)(4)(A)(i), EPA is establishing an exemption for residues of 1-propanaminium, 3-amino-N-(2-carboxyethyl)- *N,N*-dimethyl-, N-coco acyl derivatives, inner salts that includes a limitation of 25% w/w in pesticide formulations to account for potential aquatic toxicity. A revised petition was submitted by Oxiteno USA, LLC, to support this change to the petitioned-for exemption.

III. Inert Ingredient Definition

Inert ingredients are all ingredients that are not active ingredients as defined in 40 CFR 153.125 and include, but are not limited to, the following types of ingredients (except when they have a pesticidal efficacy of their own): solvents such as alcohols and hydrocarbons; surfactants such as

polyoxyethylene polymers and fatty acids; carriers such as clay and diatomaceous earth; thickeners such as carrageenan and modified cellulose; wetting, spreading, and dispersing agents; propellants in aerosol dispensers; microencapsulating agents; and emulsifiers. The term ''inert'' is not intended to imply nontoxicity; the ingredient may or may not be chemically active. Generally, EPA has exempted inert ingredients from the requirement of a tolerance based on the low toxicity of the individual inert ingredients.

IV. Aggregate Risk Assessment and Determination of Safety

Section 408(c)(2)(A)(i) of FFDCA allows EPA to establish an exemption from the requirement for a tolerance (the legal limit for a pesticide chemical residue in or on a food) only if EPA determines that the exemption is ''safe.'' Section 408(c)(2)(A)(ii) of FFDCA defines ''safe'' to mean that ''there is a reasonable certainty that no harm will result from aggregate exposure to the pesticide chemical residue, including all anticipated dietary exposures and all other exposures for which there is reliable information.'' This includes exposure through drinking water and in residential settings but does not include occupational exposure. When EPA makes a safety determination for an exemption from the requirement of a tolerance, FFDCA section 408(c)(2)(B) directs the Agency to take into account the considerations in section 408(b)(2)(C) and (D). Section 408(b)(2)(C) of FFDCA requires EPA to give special consideration to exposure of infants and children to the pesticide chemical residue in establishing a tolerance or exemption and to ''ensure that there is a reasonable certainty that no harm will result to infants and children from aggregate exposure to the pesticide chemical residue . . . .'' Section 408(b)(2)(D) lists other factors for EPA's consideration when making safety determinations, including the validity, completeness, and reliability of available data, nature of toxic effects, available information concerning the cumulative effects of the pesticide chemical and other substances with a common mechanism of toxicity, and available information concerning aggregate exposure levels to the pesticide chemical and other related substances.

EPA establishes exemptions from the requirement of a tolerance only in those cases where it can be clearly demonstrated that the risks from aggregate exposure to pesticide chemical residues under reasonably foreseeable circumstances will pose no harm to human health. In order to determine the risks from aggregate exposure to pesticide inert ingredients, the Agency considers the toxicity of the inert in conjunction with possible exposure to residues of the inert ingredient through food, drinking water, and through other exposures that occur as a result of pesticide use in residential settings. If EPA is able to determine that a finite tolerance is not necessary to ensure that there is a reasonable certainty that no harm will result from aggregate exposure to the inert ingredient, an exemption from the requirement of a tolerance may be established.

Consistent with FFDCA section 408(c)(2)(A), and the factors specified in FFDCA section 408(c)(2)(B), EPA has reviewed the available scientific data and other relevant information in support of these actions. EPA has sufficient data to assess the hazards of and to make a determination on aggregate exposure for 1-propanaminium, 3-amino-N-(2-carboxyethyl)-*N,N*-dimethyl-, N-coco acyl derivatives, inner salts and cocamidopropyl betaine, including exposure resulting from the exemptions established by this action. EPA's assessment of exposures and risks associated with 1-propanaminium, 3-amino-N-(2-carboxyethyl)-*N,N*-dimethyl-, N-coco acyl derivatives, inner salts and cocamidopropyl betaine follows.

A. Toxicological Profile

EPA has evaluated the available toxicity data and considered their validity, completeness, and reliability as well as the relationship of the results of the studies to human risk. EPA has also considered available information concerning the variability of the sensitivities of major identifiable subgroups of consumers, including infants and children. Specific information on the studies received and the nature of the adverse effects caused by 1-propanaminium, 3-amino-N-(2-carboxyethyl)-*N,N*-dimethyl-, N-coco acyl derivatives, inner salts and cocamidopropyl betaine as well as the no-observed-adverse-effect-level (NOAEL) and the lowest-observed-adverse-effect-level (LOAEL) from the toxicity studies are discussed in this unit.

The toxicological database of 1-propanaminium, 3-amino-N-(2-carboxyethyl)-*N,N*-dimethyl-, N-coco acyl derivatives, inner salts is supported by data regarding cocamidopropyl betaine and to a lesser extent, two other alkylamidopropyl betaines. EPA has determined that it is appropriate to bridge alkylamidopropyl betaine data to assess 1-propanaminium, 3-amino-N-(2-carboxyethyl)-*N,N*-dimethyl-, N-coco acyl derivatives, inner salts due to similarities in the manufacturing processes, functional groups/structure, composition, and physical/chemical properties, and among the available human health toxicity and ecological toxicity data of these substances.

1-Propanaminium, 3-amino-N-(2-carboxyethyl)-*N,N*-dimethyl-, N-coco acyl derivatives, inner salts and cocamidopropyl betaine exhibit moderate acute toxicity via the oral and dermal routes. No inhalation studies were available but, based on their physical-chemical properties, they are not expected to volatilize and therefore are not expected to be an inhalation toxicant.

They were shown to be a moderate dermal irritant in some studies and a non-irritant in others. They are severe eye irritants. Although some skin sensitization effects were seen in the acute studies, these chemicals contain byproducts that are known to cause sensitization. Therefore, it is possible the effects are from chemical byproducts and with proper manufacturing controls, these irritating components can be decreased.

The repeated-dose toxicity studies showed no concern for systemic effects. Local irritation was seen in the forestomach of dams in subchronic studies and in one developmental toxicity study following gavage administration. This forestomach irritation likely resulted in the decreased maternal body weight gain and food consumption and the associated developmental effects observed at the highest dose tested (*i.e.,* post-implantation loss and decreased mean fetal body weight). Due to the bolus administration of the compound (which may increase the irritation potential of a chemical), the lack of a forestomach in humans, and the developmental effects occurring at very high doses only, the effects observed are not considered relevant for human health risk assessment.

Although no specific neurotoxicity studies were conducted, there was no evidence of neurotoxicity following repeated dosing. The neurotoxicity observed following acute dosing occurred at doses not relevant for risk assessment purposes (*i.e.,* doses >1,000 mg/kg). Furthermore, concern for carcinogenicity is low, based on negative results in mutagenicity studies, and the lack of structural alerts for carcinogenicity.

B. Toxicological Points of Departure/ Levels of Concern

Once a pesticide's toxicological profile is determined, EPA identifies toxicological points of departure (POD) and levels of concern (LOC) to use in evaluating the risk posed by human exposure to the pesticide. For hazards that have a threshold below which there is no appreciable risk, the toxicological POD is used as the basis for derivation of reference values for risk assessment. PODs are developed based on a careful analysis of the doses in each toxicological study to determine the dose at which no adverse effects are observed (the NOAEL) and the lowest dose at which adverse effects of concern are identified (the LOAEL). Uncertainty/ safety factors are used in conjunction with the POD to calculate a safe exposure level—generally referred to as a population-adjusted dose (PAD) or a reference dose (RfD)—and a safe margin of exposure (MOE). For non-threshold risks, the Agency assumes that any amount of exposure will lead to some degree of risk. Thus, the Agency estimates risk in terms of the probability of an occurrence of the adverse effect expected in a lifetime. For more information on the general principles EPA uses in risk characterization and a complete description of the risk assessment process, see *https://www.epa.gov/pesticide-science-and-assessing-pesticide-risks/overview-risk-assessment-pesticide-program.*

The hazard profiles of 1-propanaminium, 3-amino-N-(2-carboxyethyl)-*N,N*-dimethyl-, N-coco acyl derivatives, inner salts and cocamidopropyl betaine are adequately defined. Overall, these chemicals are of low to moderate acute toxicity, and low subchronic and developmental toxicity. No toxicity relevant for risk assessment was observed up to 1,000 mg/kg/day. Therefore, no toxicological endpoints of concern or PODs were identified and a qualitative risk assessment for 1-propanaminium, 3-amino-N-(2-carboxyethyl)-*N,N*-dimethyl-, N-coco acyl derivatives, inner salts and cocamidopropyl betaine was performed.

C. Exposure Assessment

1. *Dietary exposure from food and feed uses.* In evaluating dietary exposure to 1-propanaminium, 3-amino-N-(2-carboxyethyl)-*N,N*-dimethyl-, N-coco acyl derivatives, inner salts and cocamidopropyl betaine, EPA considered exposure under the proposed exemptions from the requirement of a tolerance. EPA assessed dietary exposures from 1-propanaminium, 3-amino-N-(2-carboxyethyl)-*N,N*-dimethyl-, N-coco acyl derivatives, inner salts and cocamidopropyl betaine in food as follows.

Dietary exposure (food and drinking water) to 1-propanaminium, 3-amino-N-(2-carboxyethyl)-*N,N*-dimethyl-, N-coco acyl derivatives, inner salts and cocamidopropyl betaine may occur following ingestion of foods with residues from their use in accordance with these exemptions. However, a quantitative dietary exposure assessment was not conducted since a toxicological endpoint for risk assessment was not identified.

2. *From non-dietary exposure.* The term ''residential exposure'' is used in this document to refer to non-occupational, non-dietary exposure (*e.g.,* textiles (clothing and diapers), carpets, swimming pools, and hard surface disinfection on walls, floors, tables).

1-Propanaminium, 3-amino-N-(2-carboxyethyl)-*N,N*-dimethyl-, N-coco acyl derivatives, inner salts and cocamidopropyl betaine may be present in pesticide and non-pesticide products that may be used in and around the home. However, a quantitative residential exposure assessment was not conducted since a toxicological endpoint for risk assessment was not identified.

3. *Cumulative effects from substances with a common mechanism of toxicity.* Section 408(b)(2)(D)(v) of FFDCA requires that, when considering whether to establish, modify, or revoke a tolerance or exemption, the Agency consider ''available information'' concerning the cumulative effects of a particular pesticide's residues and ''other substances that have a common mechanism of toxicity.''

Based on the lack of systemic toxicity in the available database, EPA has not found 1-propanaminium, 3-amino-N-(2-carboxyethyl)-*N,N*-dimethyl-, N-coco acyl derivatives, inner salts and cocamidopropyl betaine to share a common mechanism of toxicity with any other substances, and 1-propanaminium, 3-amino-N-(2-carboxyethyl)-*N,N*-dimethyl-, N-coco acyl derivatives, inner salts and cocamidopropyl betaine do not appear to produce a toxic metabolite produced by other substances. For the purposes of these tolerance exemptions, therefore, EPA has assumed that 1-propanaminium, 3-amino-N-(2-carboxyethyl)-*N,N*-dimethyl-, N-coco acyl derivatives, inner salts and cocamidopropyl betaine do not have a common mechanism of toxicity with other substances. For information regarding EPA's efforts to determine which chemicals have a common mechanism of toxicity and to evaluate the cumulative effects of such chemicals, see EPA's website at *https://www.epa.gov/pesticide-science-and-assessing-pesticide-risks/cumulative-assessment-risk-pesticides.*

D. Additional Safety Factor for the Protection of Infants and Children

Section 408(b)(2)(C) of FFDCA provides that EPA shall apply an additional tenfold (10X) margin of safety for infants and children in the case of threshold effects to account for prenatal and postnatal toxicity and the completeness of the database on toxicity and exposure unless EPA determines based on reliable data that a different margin of safety will be safe for infants and children. This additional margin of safety is commonly referred to as the Food Quality Protection Act (FQPA) safety factor. In applying this provision, EPA either retains the default value of 10X, or uses a different additional safety factor when reliable data available to EPA support the choice of a different factor.

Based on an assessment of 1-propanaminium, 3-amino-N-(2-carboxyethyl)-*N,N*-dimethyl-, N-coco acyl derivatives, inner salts and cocamidopropyl betaine, EPA has concluded that there are no toxicological endpoints of concern for the U.S. population, including infants and children. Because there are no threshold effects associated with 1-propanaminium, 3-amino-N-(2-carboxyethyl)-*N,N*-dimethyl-, N-coco acyl derivatives, inner salts or cocamidopropyl betaine, EPA conducted a qualitative assessment. As part of that assessment, the Agency did not use safety factors for assessing risk, and no additional safety factor is needed for assessing risk to infants and children.

E. Aggregate Risks and Determination of Safety

Because no toxicological endpoints of concern were identified, EPA concludes that there is a reasonable certainty that no harm will result to the general population, or to infants and children, from aggregate exposure to 1-propanaminium, 3-amino-N-(2-carboxyethyl)-*N,N*-dimethyl-, N-coco acyl derivatives, inner salts or cocamidopropyl betaine residues.

V. Analytical Enforcement Methodology

An analytical method is not required for enforcement purposes since the Agency is not establishing a numerical tolerance for residues of 1-propanaminium, 3-amino-N-(2-

carboxyethyl)-*N,N*-dimethyl-, N-coco acyl derivatives, inner salts or cocamidopropyl betaine in or on any food commodities. EPA is establishing a limitation on the amount of 1-propanaminium, 3-amino-N-(2-carboxyethyl)-*N,N*-dimethyl-, N-coco acyl derivatives, inner salts and cocamidopropyl betaine that may be used in pesticide formulations. This limitation is based on the potential for aquatic toxicity and will be enforced through the pesticide registration process under the Federal Insecticide, Fungicide, and Rodenticide Act (''FIFRA''), 7 U.S.C. 136 *et seq.* EPA will not register any pesticide formulation for food use that exceeds 25% 1-propanaminium, 3-amino-N-(2-carboxyethyl)-*N,N*-dimethyl-, N-coco acyl derivatives, inner salts and/or 10% cocamidopropyl betaine in the final pesticide formulation.

VI. Conclusions

Therefore, an exemption from the requirement of a tolerance is established for residues of 1-propanaminium, 3-amino-N-(2-carboxyethyl)- *N,N*-dimethyl-, N-coco acyl derivatives, inner salts (CAS Reg. No. 499781–63–4) when used as an inert ingredient (adjuvant or surfactant) up to 25% w/w in pesticide formulations applied to growing crops or raw agricultural commodities pre- and post-harvest under 40 CFR 180.910.

An exemption from the requirement of a tolerance is also established for residues of 1-propanaminium, 3-amino-N-(carboxymethyl)-*N,N*-dimethyl-, N-coco acyl derivatives, hydroxides, inner salts (CAS Reg. No. 61789–40–0), also known as cocamidopropyl betaine, when used as an inert ingredient (surfactant) up to 10% w/w in pesticide formulations applied to growing crops pre-harvest under 40 CFR 180.920.

VII. Statutory and Executive Order Reviews

This action establishes exemptions from the requirement of a tolerance under FFDCA section 408(d) in response to a petition submitted to the Agency. The Office of Management and Budget (OMB) has exempted these types of actions from review under Executive Order 12866, entitled ''Regulatory Planning and Review'' (58 FR 51735, October 4, 1993). Because this action has been exempted from review under Executive Order 12866, this action is not subject to Executive Order 13211, entitled ''Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use'' (66 FR 28355, May 22, 2001), or Executive Order 13045, entitled ''Protection of Children from Environmental Health Risks and Safety Risks'' (62 FR 19885, April 23, 1997). This action does not contain any information collections subject to OMB approval under the Paperwork Reduction Act (PRA) (44 U.S.C. 3501 *et seq.*), nor does it require any special considerations under Executive Order 12898, entitled ''Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations'' (59 FR 7629, February 16, 1994).

Since tolerances and exemptions that are established on the basis of a petition under FFDCA section 408(d), such as the exemptions in this final rule, do not require the issuance of a proposed rule, the requirements of the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 *et seq.*), do not apply.

This action directly regulates growers, food processors, food handlers, and food retailers, not States or Tribes, nor does this action alter the relationships or distribution of power and responsibilities established by Congress in the preemption provisions of FFDCA section 408(n)(4). As such, the Agency has determined that this action will not have a substantial direct effect on States or Tribal governments, on the relationship between the National Government and the States or Tribal governments, or on the distribution of power and responsibilities among the various levels of government or between the Federal Government and Indian tribes. Thus, the Agency has determined that Executive Order 13132, entitled ''Federalism'' (64 FR 43255, August 10, 1999), and Executive Order 13175, entitled ''Consultation and Coordination with Indian Tribal Governments'' (65 FR 67249, November 9, 2000), do not apply to this action. In addition, this action does not impose any enforceable duty or contain any unfunded mandate as described under Title II of the Unfunded Mandates Reform Act (UMRA) (2 U.S.C. 1501 *et seq.*).

This action does not involve any technical standards that would require Agency consideration of voluntary consensus standards pursuant to section 12(d) of the National Technology Transfer and Advancement Act (NTTAA) (15 U.S.C. 272 note).

VIII. Congressional Review Act

Pursuant to the Congressional Review Act (5 U.S.C. 801 *et seq.*), EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. This action is not a ''major rule'' as defined by 5 U.S.C. 804(2).

List of Subjects in 40 CFR Part 180

Environmental protection, Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: May 2, 2024.

Charles Smith,

Director, Registration Division, Office of Pesticide Programs.

Therefore, for the reasons stated in the preamble, EPA is amending 40 CFR chapter I as follows:

PART 180—TOLERANCES AND EXEMPTIONS FOR PESTICIDE CHEMICAL RESIDUES IN FOOD

■ 1. The authority citation for part 180 continues to read as follows:

Authority: 21 U.S.C. 321(q), 346a and 371.

■ 2. In § 180.910, amend table 1 to 180.910 by adding, in alphabetical order, an entry for ''1-Propanaminium, 3-amino-N-(2-carboxyethyl)-*N,N*-dimethyl-, N-coco acyl derivatives, inner salts (CAS Reg. No. 499781–63–4)'' to read as follows:

§ 180.910 Inert ingredients used pre- and post-harvest; exemptions from the requirement of a tolerance.

* * * * *

TABLE 1 TO 180.910

Inert ingredients	Limits	Uses
* * * * * * *		
1-Propanaminium, 3-amino-N-(2-carboxyethyl)-*N,N*-dimethyl-, N-coco acyl derivatives, inner salts (CAS Reg. No. 499781–63–4).	25% w/w in pesticide formulation ..	Adjuvant or surfactant.
* * * * * * *		

■ 3. In § 180.920, amend table 1 to 180.920 by adding, in alphabetical order, an entry for ''1-Propanaminium, 3-amino-N-(carboxymethyl)-*N,N*-dimethyl-, N-coco acyl derivatives, hydroxides, inner salts (CAS Reg. No. 61789–40–0)'' to read as follows:

§ 180.920 Inert ingredients used pre-harvest; exemptions from the requirement of a tolerance.

* * * * *

TABLE 1 TO 180.920

Inert ingredients	Limits	Uses
* * *	* *	* *
1-Propanaminium, 3-amino-N-(carboxymethyl)-*N,N*-dimethyl-, N-coco acyl derivatives, hydroxides, inner salts (CAS Reg. No. 61789–40–0).	10% w/w in pesticide formulation ..	Surfactant.
* * *	* *	* *

[FR Doc. 2024–10182 Filed 5–9–24; 8:45 am]

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 180

[EPA–HQ–OPP–2022–0887; FRL–11734–01–OCSPP]

Cyflumetofen; Pesticide Tolerances

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This regulation establishes tolerances for residues of cyflumetofen in or on the following raw agricultural commodities: berry, low growing, subgroup 13–07G; fruit, small, vine climbing, except fuzzy kiwifruit, subgroup 13–07F; and vegetable, cucurbit, group 9. The Interregional Research Project Number 4 (IR–4) requested these tolerances under the Federal Food, Drug, and Cosmetic Act (FFDCA).

DATES: This regulation is effective May 10, 2024. Objections and requests for hearings must be received on or before July 9, 2024, and must be filed in accordance with the instructions provided in 40 CFR part 178 (see also Unit I.C. of the **SUPPLEMENTARY INFORMATION**).

ADDRESSES: The docket for this action, identified by docket identification (ID) number EPA–HQ–OPP–2022–0887, is available at *https://www.regulations.gov* or at the Office of Pesticide Programs Regulatory Public Docket (OPP Docket) in the Environmental Protection Agency Docket Center (EPA/DC), West William Jefferson Clinton Bldg., Rm. 3334, 1301 Constitution Ave. NW, Washington, DC 20460–0001. The Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room and the OPP Docket is (202) 566–1744. Please review the visitor instructions and additional information about the docket available at *https://www.epa.gov/.*

FOR FURTHER INFORMATION CONTACT: Charles Smith, Director, Registration Division (7505T), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460–0001; main telephone number: (202) 566–1030; email address: *RDFRNotices@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this action apply to me?

You may be potentially affected by this action if you are an agricultural producer, food manufacturer, or pesticide manufacturer. The following list of North American Industrial Classification System (NAICS) codes is not intended to be exhaustive, but rather provides a guide to help readers determine whether this document applies to them. Potentially affected entities may include:

- Crop production (NAICS code 111).
- Animal production (NAICS code 112).
- Food manufacturing (NAICS code 311).
- Pesticide manufacturing (NAICS code 32532).

B. How can I get electronic access to other related information?

You may access a frequently updated electronic version of EPA's tolerance regulations at 40 CFR part 180 through the Office of the Federal Register's e-CFR site at *https://www.ecfr.gov//.*

C. How can I file an objection or hearing request?

Under FFDCA section 408(g), 21 U.S.C. 346a(g), any person may file an objection to any aspect of this regulation and may also request a hearing on those objections. You must file your objection or request a hearing on this regulation in accordance with the instructions provided in 40 CFR part 178. To ensure proper receipt by EPA, you must identify docket ID number EPA–HQ–OPP–2022–0887 in the subject line on the first page of your submission. All objections and requests for a hearing must be in writing and must be received by the Hearing Clerk on or before July 9, 2024. Addresses for mail and hand delivery of objections and hearing requests are provided in 40 CFR 178.25(b).

In addition to filing an objection or hearing request with the Hearing Clerk as described in 40 CFR part 178, please submit a copy of the filing (excluding any Confidential Business Information (CBI)) for inclusion in the public docket. Information not marked confidential pursuant to 40 CFR part 2 may be disclosed publicly by EPA without prior notice. Submit the non-CBI copy of your objection or hearing request, identified by docket ID number EPA–HQ–OPP–2022–0887, by one of the following methods:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the online instructions for submitting comments. Do not submit electronically any information you consider to be CBI or other information whose disclosure is restricted by statute.
- *Mail:* OPP Docket, Environmental Protection Agency Docket Center (EPA/DC), (28221T), 1200 Pennsylvania Ave. NW, Washington, DC 20460–0001.
- *Hand Delivery:* To make special arrangements for hand delivery or delivery of boxed information, please follow the instructions at *https://www.epa.gov/.*

Additional instructions on commenting or visiting the docket, along with more information about dockets generally, is available at *https://www.epa.gov/.*

II. Summary of Petitioned-For Tolerance

In the **Federal Register** of February 23, 2023 (88 FR 11401) (FRL–10579–01–OCSPP), EPA issued a document pursuant to FFDCA section 408(d)(3), 21 U.S.C. 346a(d)(3), announcing the filing of pesticide petition (PP 2E9030) by the Interregional Research Project No. 4 (IR–4), North Carolina State University, 1730 Varsity Drive, Venture IV, Suite 210, Raleigh, NC 27606. The petition requests to amend 40 CFR 180.677 by establishing tolerances for residues of cyflumetofen (2-methoxyethyl α-cyano-α-[4-(1,1-dimethylethyl)phenyl]-β-oxo-2-(trifluoromethyl)benzenepropanoate), including its metabolites and degradates, in or on the following raw agricultural commodities: berry, low growing, subgroup 13–07G at 0.6 parts per million (ppm); fruit, small, vine climbing, except fuzzy kiwifruit, subgroup 13–07F at 0.6 ppm; and vegetable, cucurbit, group 9 at 2 ppm. Upon the establishment of these tolerances, IR–4 requested that EPA remove the existing tolerances in 40 CFR 180.677 for residues of cyflumetofen (2-methoxyethyl α-cyano-α-[4-(1,1-dimethylethyl)phenyl]-β-oxo-2-(trifluoromethyl)benzenepropanoate) in or on cucumber at 0.3 ppm; grape at 0.60 ppm; and strawberry at 0.6 ppm. That document referenced a summary of the petition prepared by IR–4, which is available in the docket at *https://www.regulations.gov.* One comment was received in response to the notice of filing. EPA's response to the comment is discussed in Unit IV.C.

Based upon review of the data supporting the petition and in accordance with its authority under FFDCA section 408(d)(4)(A)(i), EPA is establishing one tolerance at a different level than petitioned-for. The reason for this change is explained in Unit IV.D.

III. Aggregate Risk Assessment and Determination of Safety

Section 408(b)(2)(A)(i) of FFDCA allows EPA to establish a tolerance (the legal limit for a pesticide chemical residue in or on a food) only if EPA determines that the tolerance is ''safe.'' Section 408(b)(2)(A)(ii) of FFDCA defines ''safe'' to mean that ''there is a reasonable certainty that no harm will result from aggregate exposure to the pesticide chemical residue, including all anticipated dietary exposures and all other exposures for which there is reliable information.'' This includes exposure through drinking water and in residential settings but does not include occupational exposure. Section 408(b)(2)(C) of FFDCA requires EPA to give special consideration to exposure of infants and children to the pesticide chemical residue in establishing a tolerance and to ''ensure that there is a reasonable certainty that no harm will result to infants and children from aggregate exposure to the pesticide chemical residue. . . .''

Consistent with FFDCA section 408(b)(2)(D), and the factors specified therein, EPA has reviewed the available scientific data and other relevant information in support of this action. EPA has sufficient data to assess the hazards of and to make a determination on aggregate exposure for cyflumetofen including exposure resulting from the tolerances established by this action. EPA's assessment of exposures and risks associated with cyflumetofen follows.

In an effort to streamline its publications in the **Federal Register**, EPA is not reprinting sections that repeat what has been previously published for tolerance rulemakings for the same pesticide chemical. Where scientific information concerning a particular chemical remains unchanged, the content of those sections would not vary between tolerance rulemakings, and EPA considers referral back to those sections as sufficient to provide an explanation of the information EPA considered in making its safety determination for the new rulemaking.

EPA has previously published tolerance rulemakings for cyflumetofen in which EPA concluded, based on the available information, that there is a reasonable certainty that no harm would result from aggregate exposure to cyflumetofen and established tolerances for residues of that chemical. EPA is incorporating previously published sections from these rulemakings as described further in this rulemaking, as they remain unchanged.

Toxicological profile. For a discussion of the Toxicological Profile of cyflumetofen, see Unit III.A. of the final rule published in the **Federal Register** of May 8, 2019 (84 FR 20037) (FRL–9990–60).

Toxicological points of departure/Levels of concern. A summary of the toxicological endpoints for cyflumetofen used for human health risk assessment is discussed in Unit III.B. of the May 8, 2019, rulemaking.

Exposure assessment. EPA's dietary exposure assessments have been updated to include the additional exposures from the petitioned-for tolerances. No acute dietary exposure and risk analyses were performed since there were no appropriate toxicological effects attributable to a single dose observed in available toxicity studies for either the general population or for females 13 to 49 years of age. The chronic dietary (food and drinking water) exposure and risk assessment for cyflumetofen was conducted using the Dietary Exposure Evaluation Model software with the Food Commodity Intake Database (DEEM–FCID) Version 4.02. This software uses 2005–2010 food consumption data from the U.S. Department of Agriculture's (USDA's) National Health and Nutrition Examination Survey/What We Eat in America, (NHANES/WWEIA). An unrefined chronic dietary (food and drinking water) analysis was conducted using tolerance-level residues, default processing factors, empirical processing factors, and 100% crop treated assumptions.

Drinking water exposure. EPA has revised the cyflumetofen drinking water assessment (DWA) since the May 8, 2019, final rule and the final rule published in the **Federal Register** of December 6, 2021 (86 FR 68915) (FRL–9234–01–OCSPP). The DWA provides updated estimated drinking water concentrations (EDWCs) for cyflumetofen residues of concern in surface water and groundwater. The use patterns for current and proposed uses were modeled using new pesticide in water calculator scenarios. The updated EDWCs for use in human health risk assessment are 0.59 µg/L for acute exposures, 0.11 µg/L for non-cancer chronic exposures and 0.10 µg/L for cancer exposures generated from exposure in surface water.

Non-occupational exposure. There are no new proposed residential (non-occupational) uses for cyflumetofen at this time; however, there are registered uses of cyflumetofen on commercial vegetable gardens and ornamental plants. EPA's residential exposure assessment has changed since the May 8, 2019, final rule based on a revised practice. Because all current cyflumetofen labels require handlers to wear personal protective equipment, EPA assumes that cyflumetofen is applied by professional applicators, not residential (homeowner) applicators. Therefore, the current assessment does not consider exposure to residential handlers or exposure from direct homeowner applications to ornamentals or home gardens.

There are registered uses of cyflumetofen to commercially treat garden vegetables that could be subsequently purchased at a retail location for transplant into a residential setting and treated ornamental plants that can be purchased by consumers. EPA considers post-application exposure resulting from this scenario to be negligible because residues are

expected to decline significantly during the time from application in a commercial setting to consumer purchase at a retail location. Also, there is no dermal hazard for cyflumetofen since no systemic effects were observed in the dermal study up to the limit dose. Therefore, a quantitative residential post-application dermal risk assessment is not required.

Cumulative exposures. Unlike other pesticides for which EPA has followed a cumulative risk approach based on a common mechanism of toxicity, EPA has not made a common mechanism of toxicity finding as to cyflumetofen and any other substances and cyflumetofen does not appear to produce a toxic metabolite produced by other substances. For the purposes of this action, therefore, EPA has not assumed that cyflumetofen has a common mechanism of toxicity with other substances.

Safety factor for infants and children. EPA continues to conclude that there are reliable data to support the reduction of the Food Quality Protection Act (FQPA) safety factor from 10X to 1X. See Unit III.D. of the May 8, 2019, rulemaking for a discussion of the Agency's rationale for that determination.

Aggregate risk and Determination of safety. EPA determines whether acute and chronic dietary pesticide exposures are safe by comparing dietary exposure estimates to the acute population adjusted dose (aPAD) and chronic population adjusted dose (cPAD). Short-, intermediate-, and chronic-term risks are evaluated by comparing the estimated total food, water, and residential exposure to the appropriate points of departure (PODs) to ensure that an adequate margin of exposure (MOE) exists.

An acute dietary risk assessment was not conducted as toxicological effects attributable to a single dose were not identified. Therefore, cyflumetofen is not expected to pose an acute risk. Chronic dietary risks are below the Agency's level of concern of 100% of the cPAD; the chronic dietary exposure estimate for all infants, the most highly exposed population subgroup, is 7.6% of the cPAD. Because EPA has determined that there are no residential exposures, the chronic dietary risk is the same as the overall chronic aggregate risk for cyflumetofen and is not of concern.

As stated in Unit III.A. of the May 8, 2019, final rule, EPA concluded that the nonlinear approach for assessing potential cancer risk is appropriate. The chronic risk resulting from aggregate exposure to cyflumetofen is below the Agency's level of concern; therefore, the Agency concludes that there is not a cancer risk of concern from exposure to cyflumetofen.

Therefore, based on the risk assessments and information described above, EPA concludes that there is a reasonable certainty that no harm will result to the general population, or to infants and children, from aggregate exposure to cyflumetofen residues. More detailed information on this action can be found in the document titled ''Cyflumetofen. Human Health Risk Assessment for the Proposed New Use on Vegetable, Cucurbit, Group 9, Label Amendment for Vegetable, Fruiting, Group 8–10, and Crop Group Expansion of Berry, Low Subgroup 13–07G and Fruit, Small, Vine Climbing, Except Fuzzy Kiwifruit, subgroup 13–07F.'' in docket ID number EPA–HQ–OPP–2022–0887.

IV. Other Considerations

A. Analytical Enforcement Methodology

For a discussion of the available analytical enforcement method, see Unit IV.A. of the final rule published in the **Federal Register** of July 1, 2020 (85 FR 39491) (FRL–10009–25).

B. International Residue Limits

In making its tolerance decisions, EPA seeks to harmonize U.S. tolerances with international standards whenever possible, consistent with U.S. food safety standards and agricultural practices. EPA considers the international maximum residue limits (MRLs) established by the Codex Alimentarius Commission (Codex), as required by FFDCA section 408(b)(4).

Codex has not established an MRL for residues of cyflumetofen in or on cucurbit vegetable group 9, bell pepper or non-bell pepper. Codex has established MRLs for residues of cyflumetofen in or on strawberry at 0.6 ppm and in or on grape, table and grape, wine at 0.6 ppm. The U.S. tolerances for berry, low growing, subgroup 13–07G and fruit, small, vine climbing, except fuzzy kiwifruit, subgroup 13–07F are being established at 0.6 ppm and are harmonized with the relevant Codex MRLs.

C. Response to Comments

One comment was received on the notice of filing. The comment is an inquiry from the People's Republic of China, requesting that EPA explain the reasons for removing the existing tolerances for strawberries and grapes and establishing new crop group tolerances for berry, low growing, subgroup 13–07G and fruit, small, vine climbing, except fuzzy kiwifruit, subgroup 13–07F, thus expanding tolerance coverage for these crops. The commenter also requested that the Agency provide the test data used for risk assessment of the relevant fruits.

Under FFDCA section 408, EPA is authorized to establish tolerances for pesticide chemical residues in food. EPA establishes tolerances for each pesticide based on data on the pesticide residues and assesses the potential risks to human health posed by that pesticide. A tolerance is the maximum permissible residue level established for a pesticide in raw agricultural commodities and processed foods. The crop group regulations currently in 40 CFR 180.40 and 180.41 enable the establishment of tolerances for a group of crops based on residue data for certain crops that are representative of the group. Strawberry is a representative crop for the crop subgroup 13–07G, and grape is a representative crop for the crop subgroup 13–07F.

The data supporting the strawberry and grape tolerances were submitted to the Agency and were reviewed and reported in the document titled ''Cyflumetofen. Petition for the Establishment of Permanent Tolerances and Registration for Use on Citrus (Crop Group 10–10), Pome Fruits (Crop Group 11–10), Tree Nuts (Crop Group 14–12), Grape, Strawberry, and Tomato. Summary of Analytical Chemistry and Residue Data.'', D408531, D. Wilbur, 09-July-2013. In the current action, EPA is expanding the grape tolerance to fruit, small, vine climbing, except fuzzy kiwifruit, subgroup 13–07F and expanding the strawberry tolerance to berry, low growing, subgroup 13–07G as stated in the document ''Cyflumetofen. Proposed Section 3 Registration for the New Use on Vegetable Cucurbit, Group 9, Label Amendment for Vegetable, Fruiting, Group 8–10, and Crop Group Expansion of Berry, Low Subgroup 13–07G and Fruit, Small, Vine Climbing, Except Fuzzy Kiwifruit, Subgroup 13–07F. Summary of Analytical Chemistry and Residue Data'' and the document ''Cyflumetofen. Human Health Risk Assessment for the Proposed New Use on Vegetable, Cucurbit, Group 9, Label Amendment for Vegetable, Fruiting, Group 8–10, and Crop Group Expansion of Berry, Low Subgroup 13–07G and Fruit, Small, Vine Climbing, Except Fuzzy Kiwifruit, subgroup 13–07F.'' All three documents can be found in docket ID number EPA–HQ–OPP–2022–0887.

D. Revisions to Petitioned-For Tolerances

EPA reviewed the available residue data and is establishing the tolerance for

resides of cyflumetofen in or on vegetable, cucurbit, group 9 at 0.3 ppm rather than at 2 ppm as IR–4 requested. IR–4 calculated the tolerance of 2 ppm by including the metabolite B–1 in the residue levels. However, the only residues included in the tolerance expression are for the parent compound, cyflumetofen. Using the residues for cyflumetofen but not metabolite B–1, EPA calculated the tolerance for resides of cyflumetofen in or on vegetable, cucurbit, group 9 to be 0.06 ppm, which is covered by the established tolerance of 0.3 ppm in or on cucumber. Therefore, EPA is establishing the tolerance for residues of cyflumetofen in or on vegetable, cucurbit, group 9 at 0.3 ppm.

V. Conclusion

Therefore, tolerances are established for residues of cyflumetofen: (2-methoxyethyl α-cyano-α-[4-(1,1-dimethylethyl)phenyl]-β-oxo-2-(trifluoromethyl)benzenepropanoate), including its metabolites and degradates, in or on berry, low growing, subgroup 13–07G at 0.6 ppm; fruit, small, vine climbing, except fuzzy kiwifruit, subgroup 13–07F at 0.6 ppm; and vegetable, cucurbit, group 9 at 0.3 ppm. EPA is removing the established tolerances for strawberry at 0.6 ppm; grape at 0.60 ppm; and cucumber at 0.3 ppm as unnecessary upon the establishment of the new tolerances.

VI. Statutory and Executive Order Reviews

This action establishes tolerances under FFDCA section 408(d) in response to a petition submitted to the Agency. The Office of Management and Budget (OMB) has exempted these types of actions from review under Executive Order 12866, entitled ''Regulatory Planning and Review'' (58 FR 51735, October 4, 1993). Because this action has been exempted from review under Executive Order 12866, this action is not subject to Executive Order 13211, entitled ''Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use'' (66 FR 28355, May 22, 2001) or Executive Order 13045, entitled ''Protection of Children from Environmental Health Risks and Safety Risks'' (62 FR 19885, April 23, 1997). This action does not contain any information collections subject to OMB approval under the Paperwork Reduction Act (PRA) (44 U.S.C. 3501 *et seq.*), nor does it require any special considerations under Executive Order 12898, entitled ''Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations'' (59 FR 7629, February 16, 1994).

Since tolerances and exemptions that are established on the basis of a petition under FFDCA section 408(d), such as the tolerances in this final rule, do not require the issuance of a proposed rule, the requirements of the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 *et seq.*), do not apply.

This action directly regulates growers, food processors, food handlers, and food retailers, not States or Tribes, nor does this action alter the relationships or distribution of power and responsibilities established by Congress in the preemption provisions of FFDCA section 408(n)(4). As such, the Agency has determined that this action will not have a substantial direct effect on States or Tribal governments, on the relationship between the National Government and the States or Tribal governments, or on the distribution of power and responsibilities among the various levels of government or between the Federal Government and Indian tribes. Thus, the Agency has determined that Executive Order 13132, entitled ''Federalism'' (64 FR 43255, August 10, 1999), and Executive Order 13175, entitled ''Consultation and Coordination with Indian Tribal Governments'' (65 FR 67249, November 9, 2000) do not apply to this action. In addition, this action does not impose any enforceable duty or contain any unfunded mandate as described under Title II of the Unfunded Mandates Reform Act (UMRA) (2 U.S.C. 1501 *et seq.*).

This action does not involve any technical standards that would require Agency consideration of voluntary consensus standards pursuant to section 12(d) of the National Technology Transfer and Advancement Act (NTTAA) (15 U.S.C. 272 note).

VII. Congressional Review Act

Pursuant to the Congressional Review Act (5 U.S.C. 801 *et seq.*), EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. This action is not a ''major rule'' as defined by 5 U.S.C. 804(2).

List of Subjects in 40 CFR Part 180

Environmental protection, Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: May 6, 2024.

Charles Smith,

Director, Registration Division, Office of Pesticide Programs.

Therefore, for the reasons stated in the preamble, EPA is amending 40 CFR chapter I as follows:

PART 180—TOLERANCES AND EXEMPTIONS FOR PESTICIDE CHEMICAL RESIDUES IN FOOD

■ 1. The authority citation for part 180 continues to read as follows:

Authority: 21 U.S.C. 321(q), 346a and 371.

■ 2. In § 180.677, amend table 1 to paragraph (a) by:

■ a. Adding in alphabetical order an entry for ''Berry, low growing, subgroup 13–07G'';

■ b. Removing the entry for ''Cucumber'';

■ c. Adding in alphabetical order an entry for ''Fruit, small, vine climbing, except fuzzy kiwifruit, subgroup 13–07F'';

■ d. Removing the entries for ''Grape'' and ''Strawberry''; and

■ e. Adding in alphabetical order an entry for ''Vegetable, cucurbit, group 9''.

The additions read as follows:

§ 180.677 Cyflumetofen; tolerance for residues.

(a) * * *

TABLE 1 TO PARAGRAPH (a)

Commodity	Parts per million
* * * * *	
Berry, low growing, subgroup 13–07G	0.6
* * * * *	
Fruit, small, vine climbing, except fuzzy kiwifruit, subgroup 13–07F	0.6
* * * * *	
Vegetable, cucurbit, group 9	0.3

BILLING CODE 6560–50–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

45 CFR Part 1356

RIN 0970–AC89

Foster Care Legal Representation

AGENCY: Children's Bureau (CB), Administration on Children, Youth and Families (ACYF), Administration for Children and Families (ACF), Department of Health and Human Services (HHS).

ACTION: Final rule.

SUMMARY: This rule allows title IV–E agencies to claim Federal financial participation (FFP) for the administrative costs of: legal representation in foster care proceedings provided by an attorney representing the title IV–E agency or any other public agency (including an Indian tribe) which has an agreement in effect under which the other agency has placement and care responsibility of a title IV–E eligible child; independent legal representation provided by an attorney representing a child in title IV–E foster care, a child who is a candidate for title IV–E foster care (hereafter, referred to as a child ''who is eligible for title IV–E foster care''), the child's parent(s), the child's relative caregiver(s), and the child's Indian custodian(s) in foster care and other civil legal proceedings as necessary to carry out the requirements in the title IV–E agency's title IV–E foster care plan; and legal representation provided by an attorney representing an Indian child's tribe, or representation of an Indian child's tribe provided by a non-attorney, when the child's tribe participates or intervenes in any state court proceeding for the foster care placement or termination of parental rights (TPR) of an Indian child who is in title IV–E foster care or an Indian child who is a candidate for title IV–E foster care.

DATES: This rule is effective on July 9, 2024.

FOR FURTHER INFORMATION CONTACT: Joe Bock, Children's Bureau, (202) 205–8618. Telecommunications Relay users may dial 711 first. Email inquiries to *cbcomments@acf.hhs.gov*.

SUPPLEMENTARY INFORMATION:

Table of Contents

I. Statutory Authority

Section 474(a)(3) of the Social Security Act (the Act) authorizes Federal reimbursement for title IV–E foster care program administrative costs, which are defined as costs ''found necessary by the Secretary for the provision of child placement services and for the proper and efficient administration of the State [title IV–E] plan.'' This authorization applies to an Indian tribe, tribal organization, or tribal consortium that has an approved title IV–E plan, in the same manner as it applies to states.

This rule is published under the authority granted to the Secretary of Health and Human Services (the Secretary) by section 1102 of the Act, 42 U.S.C. 1302. Section 1102 of the Act authorizes the Secretary to publish regulations, not inconsistent with the Act, as may be necessary for the efficient administration of the functions with which the Secretary is charged under the Act.

II. Background

Many families that come to the attention of a child welfare agency are in the midst of or recovering from familial, health, housing, or economic challenges or crises. These obstacles can impede a family's ability to provide a safe and stable environment for their children.[1] Addressing these obstacles to restore a family's stability and safety and prevent a child from being removed from their home is critical to a child's well-being. This is because removal, even for a short period of time, exposes the child to a range of trauma and stress.[2] A child who is at risk of entering foster care has better outcomes when they remain safely at home compared to when they are placed into foster care.[3] Access to independent legal representation can help stabilize families, improve safety, and reduce the need for more formal child welfare system involvement, including foster care.[4] For families with children that have been placed in foster care, independent legal representation can expedite reunification and improve permanency or help provide access to needed supports for youth transitioning out of the child welfare system.[5]

HHS regulations at 45 CFR 1356.60(c) detail cost-sharing requirements for the Federal and non-Federal share of title IV–E foster care program expenditures for the cost of administrative activities. A title IV–E agency may claim FFP at the rate of 50 percent for allowable title IV–E foster care administrative costs. A title IV–E agency may also claim FFP for allowable administrative costs incurred by any other public agency or tribe which has an agreement in effect under which the other agency has placement and care responsibility of a title IV–E eligible child pursuant to 472(a)(2)(B)(ii) of the Act. Another ''public agency'' is a child placing agency authorized by state/tribal law to operate services to children and families, with supervision by the title IV–E agency (Child Welfare Policy Manual section (CWPM) 8.1G #1). Examples of other public agencies may be found in section G of the CWPM and could include the state/tribal juvenile justice agency, a court, or state/tribal mental health agency. The regulation at § 1356.60(c)(2) provides examples of allowable title IV–E foster care administrative expenditures that are necessary for the administration of the title IV–E agency's plan, such as preparation for and participation in judicial determinations, referral to services, development of the case plan, case reviews, and case management and supervision.

ACF policy historically allowed title IV–E agencies to claim FFP for the foster care administrative costs of ''preparation for and participation in judicial determinations'' as described in § 1356.60(c)(2)(ii), only for the title IV–E agency's (and if applicable, the Indian tribe or other public agency's) legal representation. However, in 2019, ACF revised the policy to allow title IV–E agencies to also claim FFP for the administrative costs of independent

legal representation provided by attorneys representing children who are candidates for title IV–E foster care, children who are in title IV–E foster care, and the children's parent(s) in all stages of foster care legal proceedings (CWPM 8.1B #30, 31, and 32). This policy was revised to ensure that reasonable efforts are made to prevent removal and finalize the permanency plan; and parents and youth are engaged in and complying with case plans. This policy change was well received and generated positive interest from title IV–E agencies and child welfare and legal partners. A ''candidate'' for title IV–E foster care is a child who is potentially eligible for title IV–E foster care maintenance payments and is at serious risk of removal from their home as evidenced by the title IV–E agency either pursuing the child's removal from the home or making reasonable efforts to prevent such removal (section 472(i) of the Act). Further, the agency must document the child's candidacy for title IV–E foster care maintenance payments through one of the three acceptable methods identified in the CWPM, such as a case plan (CWPM 8.1D #2), which we further explain in section IV of this final rule. A child is not considered a candidate for title IV–E foster care when the title IV–E agency has no formal involvement with the child or simply because the child has been described as ''at risk'' due to circumstances such as social or interpersonal problems or a dysfunctional home environment (CWPM 8.1D).

ACF published the September 2023 notice of proposed rulemaking (NPRM) proposing to codify and expand the policy in CWPM 8.1B #30, 31, and 32 (88 FR 66769, Sept. 28, 2023). Recent research, as described in the September 2023 NPRM, demonstrates that providing independent legal representation early in foster care proceedings and other civil legal proceedings can help prevent children from entering foster care, and for youth already in foster care it can improve the rate of reunification and result in more permanent outcomes for the child and the family. The NPRM proposed that providing independent legal representation to a child who is a candidate for or in title IV–E foster care, their parent(s), and their relative caregiver(s), to prepare for and participate in civil legal proceedings is an allowable administrative cost when necessary to carry out the requirements in the agency's title IV–E foster care plan in accordance with section 471(a) of the Act.

For Indian children that have been placed in foster care and are subject to the Indian Child Welfare Act (ICWA), and their families, early representation of an Indian child's tribe in foster care proceedings promotes stability for the child by minimizing unnecessary separation of children and their parents, maximizing placements of the child with extended family and other preferred placements, and avoiding unintended consequences adverse to a child's interests, such as loss of tribal membership and benefits.[6] ICWA was passed by Congress in 1978 to address the long history of failing ''to recognize the essential tribal relations of Indian people and the cultural and social standards prevailing in Indian communities and families'' (25 U.S.C. 1901(5)). ICWA protects the ''best interests of Indian children and promotes the stability and security of Indian tribes and families by the establishment of minimum federal standards for the removal of Indian children from their families and the placement of such children in foster or adoptive homes which will reflect the unique values of Indian culture, and by providing for assistance to Indian tribes in the operation of child and family service programs'' (25 U.S.C. 1902).[7]

As one tribal leader told Congress, tribes cannot long survive as ''self-governing'' communities if they cannot pass their ''heritage'' on to the next generation. *Holyfield* at 34 (citation omitted). Congress thus recognized that, by severing that connection to future generations, the breakup of Indian families threatens ''the continued existence and integrity of Indian tribes.'' 25 U.S.C. 1901(3). The Federal Government has an interest in ensuring that Indian tribes, vested with a statutory right to intervene in state foster care placement proceedings in accordance with 25 U.S.C. 1911(c), have legal representation to preserve and protect the continued existence and integrity of Indian tribes. As the Supreme Court noted in a case interpreting ICWA, ''Congress [ ] found that the breakup of Indian families harmed not only Indian children and their parents, but also their tribes.'' [8]

The information provided by the tribe's attorney provides the cultural and social standards of the child's tribe that are necessary for the court to make essential determinations that reasonable efforts were made as required under the title IV–E plan. For example, the Act requires the court to determine whether the agency made reasonable efforts to finalize a permanency plan. The tribal attorney's representation of the cultural and social standards for family connection, reunification and what permanency looks like in the child's tribe, may be necessary to finalize the permanency plan for an Indian child. For another example, if adoption is the permanency plan for an Indian child, the tribal attorney can provide information on customary adoption, which ensures ''the same stability and permanence of traditional adoption without terminating parental rights.'' [9]

This final rule supports the goal of tribal self-governance by supporting Indian families, both by minimizing unnecessary separations of Indian children from their parents and by maximizing their placement with extended family, other tribal members, or other tribal families when they cannot remain with their parents.

Equity Impact

This final rule advances the Administration's priority of equity for those historically underserved and adversely affected by persistent poverty and inequality (Executive Order 13985, *Advancing Racial Equity and Support for Underserved Communities Through the Federal Government* [Jan. 20, 2021]). Research documents the overrepresentation of certain racial and ethnic groups in foster care relative to their representation in the general population. African American and American Indian or Alaska Native children are at greater risk than other children of being placed in out-of-home care. They stay in foster care longer and have disparate outcomes. For example, they are less likely to reunify with their families.[10]

[6] Frequently Asked Questions Bureau of Indian Affairs Final Rule: Indian Child Welfare Act (ICWA) Proceedings, June 17, 2016; ICWA Compliance Task Force Report to the California Attorney General's Bureau of Children's Justice, 2017.

[7] ICWA and its implementing regulations define ''Indian child,'' to mean any unmarried person who is under age eighteen and is either a member of an Indian tribe or is eligible for membership in an Indian tribe and is the biological child of a member of an Indian tribe (25 U.S.C. 1903(4)). An ''Indian child's tribe'' means the Indian tribe in which an Indian child is a member or eligible for membership or, in the case of an Indian child who is a member of or eligible for membership in more than one tribe, the Indian tribe with which the Indian child has the more significant contacts (25 U.S.C. 1903(5)). An ''Indian custodian'' means any Indian person who has legal custody of an Indian child under tribal law or custom or under State law or to whom temporary physical care, custody, and control has been transferred by the parent of such child (25 U.S.C.1903(6)).

[10] Child Welfare Information Gateway (2021). Child welfare practice to address racial disproportionality and disparity. U.S. Department

Continued

Access to legal representation for an Indian child's tribe promotes equity for those historically and adversely affected by inequality by minimizing unnecessary separation of children and their parents, and by maximizing placements of the child with extended family, within the tribal community, and other preferred placements. Research also documents the overrepresentation of children and parents with disabilities in foster care relative to their representation in the general population. Parents with disabilities are more likely than nondisabled parents to have child welfare system involvement. Children with disabilities are institutionalized at higher rates and for longer periods of time. Children of parents with disabilities have higher out-of-home placements than other children. Studies have also found disabled parents have high rates of termination of parental rights (TPR).[11]

Access to independent legal representation early in a case may prevent children from entering foster care, including children of color, American Indian or Alaska Native children and children with disabilities who are disproportionately entering foster care. For children in foster care, it may increase the rate of reunification and provide a quicker timeframe for achieving permanency. For young adults aging out of foster care, such legal representation may provide access to services and supports needed to achieve permanency and long-term stability.

This final rule may also help low-income families adversely affected by persistent poverty who are struggling with unemployment, inadequate income, unstable housing, evictions or homelessness, and food insecurity when confronted with potential removal of a child from the home, or when a relative is caring for a child in their home. According to a 2017 study, 74 percent of low-income households experienced at least one civil legal problem in the previous year, including problems with health care, housing conditions, disability access, veterans' benefits, and domestic violence.[12] Of the low-income households reporting civil legal problems, 92 percent received inadequate or no legal help.[13] Studies also show that when a child is removed from the home, having access to legal representation not only for child welfare proceedings but also for other civil legal issues earlier in a case can improve the rate of reunification, halve the amount of time needed to secure legal guardianship or adoption, and result in more permanent outcomes for the child and the family.[14] That means that parents without independent legal representation in child welfare proceedings and in other civil legal proceedings are at a disadvantage in having their children returned to them. Therefore, providing families adversely affected by poverty with independent legal representation in foster care and other civil legal proceedings necessary to carry out the requirements in the agency's title IV–E foster care plan may improve outcomes related to reunification and permanency.

III. Overview of September 2023 NPRM Comments

We received 122 comments in response to the September 2023 NPRM. We reviewed and analyzed the public comments and considered them in finalizing this rule. The comments are available in the docket for this action on *Regulations.gov*. We received comments from four title IV–E child welfare agencies; 17 state and local government agencies; four American Indian/Native American tribes, tribal consortia, tribal organizations (''tribes'') and entities representing tribal interests; 31 national advocacy, public interest, philanthropic and professional organizations (organizations); 26 providers of legal representation; and 40 individuals and anonymous commenters.

General Comments in Support of the September 2023 NPRM

Summary of Comments on the Benefits of the Final Rule. Of the 122 comments received, 106 commenters supported issuing a final rule with some suggestions and/or clarifications. All of the title IV–E agencies, tribes and organizations representing tribal interests, providers of legal representation, and state and local government agencies that commented supported issuing a final rule. All but three of the organizations and most individual and anonymous commenters also supported issuing a final rule. We address suggestions and clarifications in section IV of this final rule. Overwhelmingly, commenters agreed that the rule as proposed would:

- Minimize barriers to access the support families need to prevent children from entering foster care.[15]
- For children who are in foster care, expedite permanency.[16]
- Support Indian families, both by minimizing unnecessary separations of Indian children from their parents and by maximizing their placement with extended family, other tribal members, or other tribal families when they cannot remain with their parents.

Comments About the Equity Impact of the Rule. Many commenters expressed that the proposal would advance equity for those historically underserved and adversely affected by persistent poverty and inequality. They noted that legal representation in civil proceedings: is critical to achieve equity; protects the rights of families and prevents inequities; promotes equity for LGBTQI+ youth who are overrepresented within the foster care system; and advances equity for parents, children, and families in diverse and historically underserved, disadvantaged, and marginalized identities.

Comments Not in Support of the September 2023 NPRM

Sixteen commenters opposed issuing a final rule. Thirteen individuals opposed issuing a final rule citing negative personal experiences with appointed attorneys, such as receiving ineffective or low-quality legal representation, conflicts of interests among attorneys representing other parties, and insufficient oversight or auditing of cases to ensure attorneys are handling family legal matters properly. Several individuals expressed the view that the purpose of this rule is to financially benefit attorneys. Three organizations opposed issuing a final rule cited to systemic issues with child welfare and family court systems, distrust of appointed attorneys, and lack of attorney oversight by the state.

Comments Outside the Scope of the Regulation

We received several comments outside the scope of this regulation, and therefore, we are not addressing those comments here. Some of these comments included requiring the final rule to endorse models of legal representation and include models for effective contracting and agency oversight of contracting and billing with legal providers. Commenters also recommended that the rule address cost-allocation requirements, which are governed by 45 CFR parts 75 and 95. Finally, some commenters suggested that the final rule require training to ensure quality legal representation by attorneys. This is outside the scope of this rule, which is optional for title IV–E agencies, and which does not govern requirements for attorney behavior, but rather provides requirements claiming FFP for administrative costs. However, as we stated in ACYF–CB–IM–21–06, we urge all state and tribal title IV–E agencies, courts, administrative offices of the courts, and Court Improvement Programs to work together to ensure that parents, children and youth, and child welfare agencies, receive high quality legal representation at all stages of child welfare proceedings, and to claim FFP for allowable training costs authorized under section 474(a)(3)(B) of the Act.

Changes to the Final Rule

We made the following changes to the final rule which are further explained in Section-by-Section Response to Comments:

- Title IV–E agencies may claim FFP for the administrative costs of independent legal representation for Indian custodian(s) in foster care and other civil legal proceedings (§ 1356.60(c)(4)(ii)).
- Title IV–E agencies may claim the administrative cost of an attorney or non-attorney representing an Indian child's tribe when the child's tribe participates or intervenes in any state court proceeding for the foster care placement or (TPR) of an Indian child who is in title IV–E foster care or an Indian child who is a candidate for title IV–E foster care (§ 1356.60(c)(4)(iii)).

IV. Section-by-Section Responses to Comments

We respond to the comments we received on the September 2023 NPRM in this section-by-section discussion.

Section 1356.60(c)(2)(xi)

Paragraph (c)(2)(xi) of the final rule references new paragraph (c)(4) and now reads: ''Costs related to legal representation described in paragraph (c)(4) of this section.''

Comment: One commenter suggested we add the word ''civil'' so that paragraph (c)(2)(xi) reads: ''Costs related to *civil* legal representation described in paragraph (c)(4) of this section.''

Response: We did not make this change to the final rule. Paragraph (c)(2)(xi) explains that the costs that are allowable include both *foster care legal proceedings and* other civil legal proceedings.

Section 1356.60(c)(4)

Paragraph (c)(4) identifies allowable administrative costs of legal representation. Although some legal representation costs might be coverable under paragraph (c)(2)(ii) that allows a title IV–E agency to claim IV–E administrative funding for the costs of ''preparation for and participation in judicial determinations,'' new paragraph (c)(4) codifies and expands the list of allowable activities. New paragraph (c)(4) does not include the costs of agency caseworkers preparing for and participating in hearings, which are clearly within the scope of paragraph (c)(2)(ii), and so does not displace paragraph (c)(2)(ii).

Comment: Several comments from national organizations, legal providers, tribes and tribal organizations requested that the final rule explicitly incorporate the examples of allowable activities of professionals that support an attorney providing independent legal representation to prepare for and participate in foster care legal proceedings including paralegals, investigators, peer partners or social workers as identified in CWPM 8.1B #32 and the preamble of the September 2023 NPRM, as well as other professionals.

Response: We confirm that a title IV–E agency may claim title IV–E administrative costs for activities to the extent that they are necessary to support an attorney in providing independent legal representation. However, we decline to change the regulatory text because it is not possible to list all of the activities that may be claimed. We encourage title IV–E agencies to contact CB regional offices for assistance.

Comment: A few commenters requested that the final rule compel state and local child welfare agencies to access title IV–E FFP for the administrative cost of independent legal representation and to fund every eligible provider of legal representation.

Response: We did not make this change to the final rule. As we explained in the September 2023 NPRM, title IV–E does not provide authority to require agencies to provide legal representation. This rule gives title IV–E agencies the flexibility to choose whether to claim FFP for allowable administrative costs of legal representation. This is because title IV–E agencies determine the allowable costs necessary to administer the title IV–E foster care program.

Comment: A few organizations and providers of legal representation suggested that ACF allow other public agencies, organizations, and individuals to access title IV–E funds directly from the Federal Government.

Response: This is not permitted by Federal law and therefore we did not make this change to the final rule. Title IV–E of the Act authorizes only state and tribal title IV–E agencies with an approved title IV–E foster care plan to claim FFP. However, title IV–E agencies may contract with public and private entities to perform administrative functions of the title IV–E foster care program. See CWPM 8.1E and G for more information.

Section 1356.60(c)(4)(i)

Section 1356.60(c)(4)(i) clarifies that a title IV–E agency may claim administrative costs for legal representation by an attorney representing the title IV–E agency or any other public agency, such as a tribe, that has an agreement with the title IV–E agency for placement and care responsibility of a title IV–E eligible child under section 472(a)(2)(B)(ii) of the Act in foster care proceedings.

Comment: Commenters noted that although the preamble to the September 2023 NPRM referred to ''any other public agency or tribe,'' the proposed regulatory text did not include the words ''or tribe.'' Commenters requested that ACF include tribes in the regulatory text.

Response: We agree with commenters, and accordingly have revised the regulation text to include tribes in order to clarify that a tribe may operate as the ''other public agency'' if it has an agreement with the state under section 472(a)(2)(B)(ii) of the Act. This revision to the regulation text does not change its meaning.

Comment: Many commenters requested that ACF clarify the meaning of ''an agreement in effect under which the other agency has placement and care responsibility of a title IV–E eligible child pursuant to 472(a)(2)(B)(ii) of the Act'' as it applies to tribes.

Response: Under this paragraph, a title IV–E agency may claim the FFP for the allowable administrative cost of an attorney providing legal representation of an Indian tribe in foster care legal proceedings only if the Indian tribe has

an agreement under which it takes placement and care responsibility of title IV–E eligible children in foster care and is operating all or part of the title IV–E program on behalf of the title IV–E agency (section 472(a)(2)(B) of the Act). More information on this topic can be found in CWPM 8.1G. We decline the recommendation to change the final regulatory text.

Section 1356.60(c)(4)(ii)

Section 1356.60(c)(4)(ii) permits a title IV–E agency to claim FFP for the administrative costs of independent legal representation provided by an attorney representing a child in title IV–E foster care, a child who is a candidate for title IV–E foster care, the child's parent(s), the child's relative caregiver(s), and the child's Indian custodian(s) in foster care and other civil legal proceedings as necessary to carry out the requirements in the agency's title IV–E foster care plan. Independent legal representation in civil proceedings includes facilitating, arranging, brokering, advocating, or otherwise linking clients with providers and services as identified in the child's case plan pursuant to sections 422, 471(a)(16), and 475 of the Act.

Comment: Several title IV–E agencies and tribal organizations requested that the final rule add ''Indian custodian'' to the list of individuals for whom a title IV–E agency may claim FFP for the administrative costs of independent legal representation in foster care and other civil legal proceedings. This is because ICWA uses the term ''Indian custodian'' to describe Indian persons who have legal custody of a child under tribal law or custom or to whom temporary physical care, custody and control has been transferred by the parent of such child (25 U.S.C. 1903(6); 25 CFR 23.2). As one state commented, the term ''Indian custodian'' may be more ''akin to a parent'' but is not encompassed in the title IV–E definition of parent.[17] The NPRM explained that under title IV–E of the Act, the term ''parent(s)'' means a biological or adoptive parent(s) or legal guardian(s), as determined by applicable state or tribal law (section 475(2) of the Act). Commenters also noted that the ICWA protections that apply to Indian parents generally also apply to Indian custodians. Another commenter indicated that an Indian custodian may align with being a relative caregiver, but not in all instances.

Response: We agree with commenters that it is important for Indian custodians to have equitable access to legal representation, and therefore changed the final rule to include Indian custodians so that title IV–E agencies have the option to claim FFP for independent legal representation of Indian custodians.

As we describe in section II, the Federal Government has an obligation to support the integrity of Indian tribes by minimizing unnecessary separations of Indian children from their parents and by maximizing their placement with extended family, other tribal members, or other tribal families when they cannot remain with their parents (25 U.S.C. 1901(3)). Title IV–E of the Act requires title IV–E agencies to make reasonable efforts to preserve and reunify families (42 U.S.C. 671(a)(15)(B) and (C)). This includes ensuring that Indian children remain with Indian custodians and reducing the need for more formal child welfare system involvement. Providing legal representation to Indian custodians of children in title IV–E foster care may minimize some of the barriers that prevent a child from being placed with an Indian custodian, enable more children to maintain family and tribal connections, stabilize placements and result in more permanent outcomes for the child and the family. Further, Indian custodians often have information essential to helping courts and title IV–E agencies preserve Indian families in the context of the long history of child custody proceedings ''often fail[ing] to recognize the essential tribal relations of Indian people and the cultural and social standards prevailing in Indian communities and families'' (25 U.S.C. 1901(5)).

Comment: Over 55 commenters from organizations and legal providers expressed concern about ''independent legal representation'' as described in the preamble. Some commenters interpreted the NPRM as proposing to allow the title IV–E agency to regulate the practice of law in a way that may be inconsistent with state statutes; court rules; and policies or guidelines of entities regulating attorney practice, including the entity's ethical opinions and rules of professional responsibility. Other commenters thought the NPRM appeared to require the attorney to explain to the client that the title IV–E agency may be paying for the cost of legal representation and to ask the client for their consent. Commenters believe this does not align with how legal aid and public defender offices are funded and would be difficult to implement if an attorney was not aware of the source of funding for the legal representation.

Response: The NPRM proposed that the title IV–E agency may determine what ''independent'' means for the purpose of identifying allowable administrative costs for which a title IV–E agency may claim FFP. Neither the NPRM nor this final rule suggest interpreting the term ''independent'' in a way that attempts to regulate attorneys or the practice of law. ACF has no authority in that area nor does the title IV–E agency, and therefore no changes were made to the final rule. To clarify, for purposes of the final rule, the term ''independent'' conveys that representation is not subject to control or influence by other parties, interested persons, nor the title IV–E agency.

The NPRM also suggested, but did not regulate, some minimum expectations for title IV–E agencies to consider when determining what ''independent'' should mean. For example, the NPRM suggested that agencies ensure the attorney providing legal representation does not have any concurrent conflicts of interest and that there is no interference with the lawyer's professional judgement or relationship with the client. It also suggested, but did not require, that the term ''independent'' mean that an attorney does not accept compensation for representing a client from *someone* other than the client, unless the client gives informed consent.

Comment: Several commenters requested guidance on the amount and type of information that an attorney providing independent legal representation must share with the title IV–E agency to satisfy Federal audit, data, and claims reporting requirements. For example, a title IV–E agency explained that it needs to know the number and names of individuals receiving independent legal representation to ensure eligibility under this final rule. However, a few providers of legal representation expressed concern that a title IV–E agency may ask for too much information as a means to exert undue influence or direct such representation.

Response: We made no changes to the final rule. We would like to clarify that a title IV–E agency should, at a minimum, ensure a legal service provider shares information that is necessary for the title IV–E agency to comply with Federal program requirements and requirements for audits, data and financial reporting as determined necessary by the Secretary (section 471(a)(6) and (13) of the Act). See also 45 CFR part 75 (Unform Administrative Requirements, Cost Principles, and Audit Requirements for HHS Awards); 45 CFR part 95, subpart E (Cost Allocation Plans). For example, this may include, but is not limited to information the title IV–E agency must report in the Form CB–496 ''Title IV–E

Programs Quarterly Financial Report (Foster Care, Adoption Assistance, Guardianship Assistance, Prevention Services and Kinship Navigator Programs). Title IV–E agencies seeking guidance on allowable claiming practices for FFP should contact their CB regional office.

Comment: Many commenters asked ACF to adopt the definition of ''candidate for title IV–E foster care'' as used in section 475(13) of the Act, to allow title IV–E agencies to claim FFP for the cost of legal representation for children and families who participate in the title IV–E prevention service program.

Response: We made no changes to the final rule. Section 475(13) of the Act defines a candidate for foster care for the title IV–E Prevention Program under section 474(a)(6)(B)(i) of the Act. This is a different definition than a title IV–E foster care candidate under this final rule. Further, this final rule and the September 2023 NPRM proposed allowable administrative costs for legal representation under the title IV–E foster care program as authorized under section 474(a)(3) of the Act. Therefore, administrative costs for legal representation under the title IV–E prevention services program is outside the scope of this final rule.

Comment: Several commenters requested we clarify whether the final rule allows title IV–E agencies to claim FFP for the cost of independent legal representation to resolve a child's or parent's immigration status, including proceedings related to obtaining Special Immigrant Juvenile status, and address other immigration-related barriers that may inhibit successful permanency. Another commenter asked whether a title IV–E agency can claim FFP for the cost of independent legal representation to meet the needs of undocumented caregivers/parents in obtaining relief from deportation, noting that thousands of children have entered the child welfare system because of a parent's deportation.

Response: We understand that immigration issues may lead to foster care placements and could pose barriers to successful reunification, placement, or permanency of a child in foster care. However, a child must be a U.S. citizen or ''qualified immigrant'' as defined in 8 U.S.C.1641(b),[18] among other requirements, to be eligible for title IV–E foster care (Personal Responsibility Work Opportunity Reconciliation Act of 1996 (Public Law 104–193); 8 U.S.C. 1611; CWPM 8.4B). A title IV–E agency may claim independent legal representation for title IV–E eligible children in any proceeding consistent with the requirements of this rule. However, a title IV–E agency may not claim FFP for the administrative cost of independent legal representation of children who are not U.S. citizens or qualified immigrants. A title IV–E agency may claim representation costs for parents of a title IV–E eligible child if such representation is needed to carry out the requirements in the agency's title IV–E foster care plan in relation to the title IV–E eligible child.

Comment: A few commenters expressed concern about potential conflicts that may arise if a title IV–E agency claims FFP for independent legal representation of an eligible child's relative caregiver. Some commenters recommended that we limit reimbursement available under title IV–E for relative caregivers to minimize the potential for a conflict between parents and relative caregivers noting specific concerns about relative caregiver representation in cases involving substance use disorders and also in Indian child welfare cases.

Response: While we appreciate the complex and potentially adverse interests of individuals involved in a child's care, the title IV–E agency may choose whether and what type of independent legal representation to claim FFP for, as described in the final rule. To provide title IV–E agencies with flexibility, we decline to revise the regulatory text. As explained in this final rule and the September 2023 NPRM, we expect that attorneys providing legal representation do not have any concurrent conflicts of interest and that there is no interference with the lawyer's professional judgement or relationship with the client. We expect that attorneys will practice law in a way that is consistent with state statutes; court rules; and the requirements of entities regulating attorney practice, including the entity's ethical opinions and rules of professional responsibility.

Comment: A commenter requested we amend ''civil legal proceedings'' to include ''administrative actions'' necessary to carry out the requirements in the agency's title IV–E foster care plan, because some civil legal issues involve proceedings which are deemed administrative rather than judicial in nature. Specifically, a few commenters asked whether a title IV–E agency may claim the cost of independent legal representation by an attorney in administrative actions for public benefit eligibility determinations, denials and appeals.

Response: In the September 2023 NPRM, we identified allowable civil legal costs to include ''securing public benefits when it is necessary to meet the plan requirement to make reasonable efforts to prevent the unnecessary removal of a child from the home or to finalize a case plan in support of a child's permanency goal as required by section 471(a)(15) of the Act.'' This may include certain public benefit eligibility determinations, denials and appeals that are administrative in nature, and they are considered civil legal proceedings for purposes of this rule. We are maintaining these provisions in this final rule, and as such decline to change the regulatory text.

Comment: Some legal representation providers and organizations made comments indicating a belief that a case plan is the only way to document a child's candidacy for title IV–E foster care, and that a case plan may only be developed after a child enters foster care, thereby preventing the agency from claiming FFP for independent legal representation of a child who is not yet in title IV–E foster care.

Response: A case plan is one of several ways a title IV–E agency may document a child's candidacy for title IV–E foster care and may be developed prior to a child entering foster care. The CWPM 8.1D #2 explains that there are three acceptable methods for documenting candidacy: (1) A defined case plan which clearly indicates that, absent effective preventive services, foster care is the planned arrangement for the child; (2) An eligibility determination form which has been completed to establish the child's eligibility for title IV–E foster care maintenance payments; or (3) Evidence of court proceedings in relation to the removal of the child from the home, in the form of a petition to the court, a court order or a transcript of the court proceedings. This policy provides additional guidance that for purposes of documenting a child's candidacy for title IV–E foster care, a case plan sets foster care as the goal for the child absent effective preventive services is an indication that the child is at serious risk of removal from their home because the title IV–E agency believes that a plan of action is needed to prevent that removal.

Comment: Over 50 organizations and legal providers asked whether a title IV–E agency may claim FFP for independent legal representation for either a child, parent or relative in various scenarios, including: prior to a petition being filed in court to remove a child from home, during the course of a CPS investigation, from the time a petition to remove a child from home is filed through the entire trajectory of the

[18] 8 U.S.C. 1641(b) refers to ''qualified alien.''

case (including appeals), and for youth in extended foster care.

Response: We do not have enough information to be able to provide a definitive answer about the availability for FFP for independent legal representation in case specific scenarios. The allowability of the cost of independent legal representation is not determined based on the status of a petition to remove a child from home or a CPS investigation. A title IV–E agency may choose to claim FFP for allowable administrative costs of independent legal representation as authorized in this rule if:

- A title IV–E agency determined that the child is a candidate for or in title IV–E foster care (or is the parent, relative, or Indian custodian of such child);
- The independent legal representation is provided in a foster care or other civil legal proceeding;
- The title IV–E agency determined that independent legal representation is necessary to carry out the requirements in the agency's title IV–E foster care plan; and
- The independent legal representation in civil legal proceedings is identified in the child's case plan.

Current policy in CWPM 8.1D #2 provides further details about a child who is a candidate for title IV–E foster care that may be useful to these commenters asking about situations where children have not yet been placed in foster care. Specifically, policy clarifies that ''a child may not be considered a candidate for [title IV–E] foster care solely because the title IV–E agency is involved with the child and his/her family. For the child to be considered a candidate for [title IV–E] foster care, the title IV–E agency's involvement with the child and family must be for the specific purpose of either removing the child from the home or satisfying the reasonable efforts requirement with regard to preventing removal.'' The policy also explains decisions made by the U.S. Department of Health and Human Services Department Appeals Board (DAB): ''The fact that a child is the subject of [a child abuse/neglect report] falls far short of establishing that the child is at serious risk of placement in foster care and thus of becoming eligible for IV–E assistance . . . A candidate, in the opinion of the DAB is a child who is at serious risk of removal from his/her home because the title IV–E agency is either pursuing that removal or attempting to prevent it. A child cannot be considered a candidate for foster care when the title IV–E agency has no formal involvement with the child or simply because s/he has been described as 'at risk' due to circumstances such as social/interpersonal problems or a dysfunctional home environment.'' We recommend that if organizations and legal providers have questions about allowable costs for legal representation, they contact the title IV–E agency for more information. Title IV–E agencies may contact the CB regional office specialist for assistance.

Section 1356.60(c)(4)(iii)

Paragraph (c)(4)(iii) permits a title IV–E agency to claim FFP for administrative costs of legal representation provided by an attorney or representation provided by a non-attorney of a title IV–E eligible Indian child's tribe (as defined in 25 U.S.C. 1903(5)), when the child's tribe participates or intervenes in any state court proceeding for the foster care placement or TPR.

Comment: We received several comments on the proposal. A commenter noted that securing attorneys who are knowledgeable about ICWA and tribal customs can be very expensive. Comments indicated that smaller tribes may not have the funding resources to hire attorneys to represent the Indian child's tribe's interest in state court proceedings for the foster care placement of, or TPR to, an Indian child, and thus have historically allowed non-attorneys to represent the tribe. One commenter was supportive of the reimbursement of non-attorneys regardless of whether they are representing the tribe in a case or whether they are providing support to an attorney's preparation for and participation in a case. Another commenter noted that early representation of an Indian child's tribe in child welfare court proceedings can, among other things, facilitate placements in accordance with ICWA placement preference and believes that the expertise independent attorneys bring to foster care proceedings can be a determining factor in whether a family stays together, receives necessary services, or is timely reunified after family separation. Finally, a commenter expressed the view that allowing a tribe to select its own representative supports tribal sovereignty.

Response: We amended the final rule to allow a title IV–E agency to claim the administrative cost of an attorney providing legal representation or a non-attorney representing an Indian child's tribe when the child's tribe participates or intervenes in any state court proceeding for the foster care placement or TPR of an Indian child who is in title IV–E foster care or an Indian child who is a candidate for title IV–E foster care. ACF believes this change may: result in more Federal financial support for a title IV–E eligible Indian child's tribe's participation in state foster care and TPR proceedings, ensure that a tribe's interest is preserved in placement recommendations, and honor tribal sovereignty and self-determination to identify a representative per the tribe's wishes. We believe this change will result in minimal fiscal impact, if any, because the costs of a non-attorney representative will likely be less than for an attorney.

Comment: Several commenters encouraged ACF to allow title IV–E agencies to claim FFP for the administrative cost of representation for a title IV–E eligible Indian child's tribe in state proceedings for foster care placement and TPR even if a tribe does not intervene in accordance with 25 U.S.C. 1911(c). Prior to intervention, a tribe may be involved at key decision points in the child's case. Commenters explained that early in state proceedings for the foster care placement of an Indian child, the tribe's representative works with the child welfare agency and state court to address the needs of the child, their family and the child's tribe. One commenter expressed the view that limiting representation to situations where a tribe has intervened in a case restricts tribes' sovereign decisions with respect to the best interest of tribal children.

Response: We agree with the commenters and revised the final rule to allow a title IV–E agency to claim administrative costs for representation of a title IV–E eligible Indian child's tribe to participate in state court proceedings for foster care placement and termination of parental rights (TPR) when necessary for the proper and efficient administration of the IV–E foster care plan (42 U.S.C. 674(a)(3)). This modification means that a title IV–E agency may claim these administrative costs when the child's tribe participates but does not intervene in a state court proceeding for foster care placement and TPR in accordance with 25 U.S.C. 1911(c).

As explained in section II, the Federal Government has an interest in ensuring that an Indian child's tribe has legal representation to preserve and protect the continued existence and integrity of Indian tribes. As the Supreme Court noted in a case interpreting ICWA, ''Congress [ ] found that the breakup of Indian families harmed not only Indian children and their parents, but also their tribes.'' *Mississippi Band of Choctaw Indians* v. *Holyfield,* 490 U.S. 30 at 33–34 (1989). It is well documented that for Indian children who have been placed in foster care, and their families, early

representation of an Indian child's tribe in state foster care proceedings promotes stability for the child by minimizing unnecessary separation of children and their parents, and by maximizing placements of the child with extended family and other preferred placements (Frequently Asked Questions Bureau of Indian Affairs Final Rule: Indian Child Welfare Act (ICWA) Proceedings, June 17, 2016). As the commenters note, much of a tribe's representation occurs early in state court foster care proceedings without regard to whether a child's tribe intervenes.

However, the Department appreciates the opportunity to clarify that this change applies only when the title IV–E agency determines that representation for the Indian child's tribe to participate in the state court proceeding is necessary for the proper and efficient administration of the title IV–E foster care plan (42 U.S.C. 674(a)(3)). Prior to intervening, tribal attorneys or non-attorney representatives often participate in state court proceedings at key decision points and in judicial determinations that are required by the title IV–E foster care plan. For example, the Act requires the court to determine whether the agency made reasonable efforts to preserve and reunify families. The child's tribe's representation of the cultural and social standards for family connection, reunification and what permanency looks like in the child's tribe, may be necessary to finalize the permanency plan for an Indian child, regardless of whether the child's tribe has intervened.

We believe this change will not result in a fiscal impact. This is because the Adoption and Foster Care Analysis and Reporting System (AFCARS) data provides the number of title IV–E eligible children who identified as American Indian or Alaska Native, alone or in combination. In the September 2023 NPRM we assumed that this population of children is potentially subject to ICWA requirements in state court foster care placement and TPR. We further assumed that each such Indian child's tribe will intervene in such proceedings. Therefore, there will not be a fiscal impact regardless of whether an Indian child's tribe chooses to participate, rather than intervene, in the proceeding as allowed by this final rule.

Comment: Several commenters requested that a final rule ensure that tribal nations have authority to choose the attorney representing an Indian child's tribe in state court proceedings for the foster care placement of, or TPR to, an Indian child for which the title IV–E agency is claiming FFP. The commenters explained the importance of each sovereign tribal nation selecting an attorney to represent an Indian child's tribe who is knowledgeable about the tribe's customs, membership requirements and benefits, culture, placement preferences, social services and other family supports, and is highly skilled in matters related to ICWA.

Response: We did not make changes to the final rule. The final rule provides an option for a title IV–E agency to claim FFP for the cost of an attorney to represent a title IV–E eligible Indian child's tribe and does not require that the title IV–E agency select that attorney. As the commenters noted, it is important that each sovereign tribal nation make that selection. This ensures that the tribe is represented by an attorney who is knowledgeable about the tribe's customs and other matters relevant in state court proceedings. However, a title IV–E agency may decide whether to contract with the attorney selected by a tribal nation.

Comment: Commenters suggested that the final rule require consultation between state title IV–E agencies and tribes to develop agreements for legal representation that are compatible with tribal governance structures.

Response: We did not change the final rule because it is the option of the title IV–E agency to claim title IV–E FFP for administrative costs as described in this final rule. However, we encourage title IV–E agencies that choose to claim title IV–E FFP for the cost of legal representation as described in this final rule to consult with tribes that are interested in developing agreements for this purpose.

V. Regulatory Process Matters

Executive Orders 12866 and 13563

Executive Orders 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health, and safety effects; distributive impacts; and equity). Executive Order 13563 is supplemental to, and reaffirms the principles, structures, and definitions governing regulatory review as established in Executive Order 12866, emphasizing the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. Based on ACF's estimates of the likely impacts associated with this rule, the Office of Management and Budget (OMB) designated this rule as a significant regulatory action under section 3(f)(1) of Executive Order 12866, as amended by Executive Order 14094. The estimated cost and transfer impacts of this final rule are provided below (see the section titled ''Accounting Statement'').

Regulatory Flexibility Analysis

The Regulatory Flexibility Act (RFA) (see 5 U.S.C. 605(b) as amended by the Small Business Regulatory Enforcement Fairness Act) requires Federal agencies to determine, to the extent feasible, a rule's impact on small entities, explore regulatory options for reducing any significant impact on a substantial number of such entities, and explain their regulatory approach. This rule does not affect small entities because it is applicable only to state and tribal title IV–E agencies. Therefore, a regulatory flexibility analysis is not required for this rule.

Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (UMRA) (Pub. L. 104–4) was enacted to avoid imposing unfunded Federal mandates on state, local, and tribal governments, or on the private sector. That threshold level is currently approximately $183 million. This rule does not contain mandates that would impose spending costs on state, local, or tribal governments in the aggregate, or on the private sector, in excess of the threshold.

Congressional Review

The Congressional Review Act (CRA) allows Congress to review major rules issued by Federal agencies before the rules take effect (*see* 5 U.S.C. 801(a)(1)(A)). The CRA defines a ''major rule'' as one that has resulted, or is likely to result, in (1) an annual effect on the economy of $100 million or more; (2) a major increase in costs or prices for consumers; individual industries; Federal, State, or local government agencies; or geographic regions; or (3) significant adverse effects on competition, employment, investment, productivity, or innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic and export markets (*see* 5 U.S.C. Chapter 8). OMB's Office of Information and Regulatory Affairs has determined that this final rule does meet the criteria set forth in 5 U.S.C. 804(2).

Assessment of Federal Regulations and Policies on Families

Section 654 of the Treasury and General Government Appropriations Act of 2000 requires Federal agencies to

determine whether a policy or regulation may negatively affect family well-being. If the agency determines a policy or regulation negatively affects family well-being, then the agency must prepare an impact assessment addressing seven criteria specified in the law. This regulation does not impose requirements on states or families. This rule will not have any impact on the autonomy or integrity of the family as an institution.

Comment: We received one comment on ACF's assessment, expressing the view that when the ACF proposes a regulation and also conducts the assessment, the result is bias that leads to no detailed study taking place. The commenter requested that ACF conduct a study that ensures a more thorough examination of the potential effects of the proposed rule on families by soliciting input from a diverse range of stakeholders and considering the comments received, especially those emphasizing the impact on family dynamics.

Response: As described in the September 2023 NPRM and above, independent research and data from existing legal programs demonstrate the benefits of providing independent legal representation. Providing representation early in foster care proceedings and other civil legal proceedings can help prevent children from entering foster care, and for youth already in foster care it can improve the rate of reunification and result in more permanent outcomes for the child and the family. We received no additional comments from the public expressing this concern. ACF's Assessment of Federal Regulations on Policy and Family is reviewed by the Secretary of HHS as well as the President's Office of Management and Budget, Office of Information and Regulatory Affairs, which reviews all significant Federal regulations from executive agencies.

Executive Order 13132

Executive Order 13132 prohibits an agency from publishing any rule that has federalism implications if the rule either imposes substantial direct compliance costs on state and local governments and is not required by statute, or the rule preempts state law, unless the agency meets the consultation and funding requirements of section 6 of the Executive order. This rule does not have federalism impact as defined in the Executive order. Shortly after publication of the NPRM, we held a briefing session with states and tribes and any other interested partners on the contents of the NPRM.

Comment: One commenter asked ACF to conduct a thorough re-assessment of the application of Executive Order 13132 because the definition of ''independent legal representation'' should be determined within their respective jurisdictions, rather than being subjected to Federal discretion.

Response: The final rule does not have any federalism implications and thus a re-assessment is not necessary. As discussed earlier, the final rule does not include any mandates or impose a regulatory definition of ''independent legal representation''. Therefore, Executive Order 13132 does not apply.

Paperwork Reduction Act

The Paperwork Reduction Act of 1995 (Pub. L. 104–13) seeks to minimize government-imposed burden from information collections on the public. In keeping with the notion that government information is a valuable asset, it also is intended to improve the practical utility, quality, and clarity of information collected, maintained, and disclosed.

The Paperwork Reduction Act defines ''information'' as any statement or estimate of fact or opinion, regardless of form or format, whether numerical, graphic, or narrative form, and whether oral or maintained on paper, electronic, or other media (5 CFR 1320.3(h)). This includes requests for information to be sent to the government, such as forms, written reports and surveys, recordkeeping requirements, and third-party or public disclosures (5 CFR 1320.3(c)). There is no burden to the Federal Government or to title IV–E agencies as a result of this final regulation. It is optional for a title IV–E agency to claim administrative costs. If the agency elects to do so, there are no new reporting requirements because the agency will continue to make administrative cost claims through the Form CB–496.

Annualized Cost to the Federal Government

Total Projections to Implement Final Rule. The estimate for the final rule was derived using fiscal year (FY) 2019 data from the Adoption and Foster Care Analysis and Reporting System (AFCARS) on the number of title IV–E eligible children who identified as American Indian or Alaska Native, alone or in combination, and FY 2021 claiming data from the Form CB–496 ''Title IV–E Programs Quarterly Financial Report (Foster Care, Adoption Assistance, Guardianship Assistance, Prevention Services and Kinship Navigator Programs).'' We did not use FY 2020 or 2021 data from AFCARS because such data would likely reflect anomalies due to the COVID–19 public health emergency period.

ACF estimates that the Federal cost in the presence of the final rule over ten fiscal years (2024–2033) is estimated to be $2,936,285,160. The combined total for Federal and agency costs over ten fiscal years is estimated to be $5,872,570,319. (These estimates encompass all provisions being codified for the first time by this rule.) It is optional for a title IV–E agency to claim the administrative cost of providing independent legal representation in foster care and civil legal proceedings to eligible children, their parents, their relative caregivers, and their Indian custodians and for representation for an Indian child's tribe that participates or intervenes in state court proceedings for the foster care placement and TPR of an eligible child.

Assumptions: ACF made several assumptions when calculating the administrative costs for this final rule.

- FY 2021 title IV–E foster care administrative cost claims are used as the base year amounts for projection purposes in this final rule and were sourced from Form CB–496 FC part 1. These are actual claims, and not estimates. For the purposes of these burden estimates, we will use the phrase ''candidates'' to refer to the number of children claimed as title IV–E candidates and ''IV–E FC'' for children who are in title IV–E foster care, the two populations of children (and their parents, relative caregivers, and Indian custodians) to which the costs of this final rule apply.
- AFCARS data provides the number of title IV–E eligible children who identified as American Indian or Alaska Native, alone or in combination. In the September 2023 NPRM, we assumed that this population of children is potentially subject to ICWA requirements in state court proceedings for the foster care placement of, or TPR to, an Indian child. We further assumed that each such Indian child's tribe would intervene in state court proceedings for the foster care placement of, or TPR to, an Indian child. As described previously in this final rule, a child's tribe may choose to participate rather than intervene in state court proceedings.
- Title IV–E agencies may claim reimbursement for 50 percent of the administrative costs to provide legal representation in foster care proceedings, including those in which an Indian child's tribe has participated or intervened in state court proceedings for the foster care placement of, or TPR to, an Indian child, and civil

proceedings, and the title IV–E agency must pay its share with state or tribal funds. This non-Federal share will be an equal percentage of 50 percent because a title IV–E agency must match the same amount of funds for which it seeks Federal reimbursement.

- We assume an overall annual one percent caseload growth rate in the population of candidates for title IV–E foster care and IV–E FC for whom title IV–E administrative costs will be claimed in civil legal proceedings and in FC legal proceedings, including those in which an Indian child's tribe has participated or intervened in state court for the foster care placement of, or TPR to, an Indian child. This is based on current title IV–E budgetary projections.
- We assume an annual FFP claims growth factor of 4.7 percent for FY 2024 and 2.3 percent from FY 2025 to FY 2033 for the administrative costs of independent legal representation in FC and in other civil legal proceedings. This is based on current title IV–E budgetary projections of the percentage of change in title IV–E administrative cost claims annually. We assume the calculated FY 2021 title IV–E foster care administration eligibility rate for children classified as American Indian or Alaska Native, alone or in combination, will remain unchanged for the ten FY (FYs 2024–2033) project period.
- An implementation level is used in the calculations for the chart below as an estimated projection for the growth in the number of children (either directly or on behalf of a parent, relative caregiver, or Indian custodian) receiving independent legal representation in foster care legal proceedings or civil legal proceedings. Similarly, an implementation level is used in the calculations for the chart below as an estimated projection for the growth in the number of children whose tribe is receiving legal representation by an attorney, or representation by a non-attorney, in state foster care placement and TPR legal proceedings. The implementation level is different for the cost estimates for foster care legal proceedings and civil legal proceedings, and state court foster care placement legal proceedings in which an Indian child's tribe has participated or intervened as explained below:
  - For independent legal representation in foster care legal proceedings, the implementation level is measured separately for children who are candidates and IV–E FC. The base year (FY 2021) implementation levels are calculated from Form CB–496 FC part 1 which identifies for each title IV–E agency on a quarterly basis the average monthly number of children where independent legal representation for foster care proceedings is being provided for a candidate or IV–E FC. For FY 2021, the independent legal representation for foster care proceedings implementation level is 15.4 percent for IV–E FC and 7.9 percent for candidates. For FYs 2024–2033, the implementation levels are derived from the experience observed in the reported caseload data between FY 2020 and FY 2021 where a 24 percent growth rate occurred for children in title IV–E foster care. We assume that the growth rate will peak in this year and then gradually diminish as more title IV–E agencies take up the option to claim for these costs, and more children are receiving this representation.
  - For legal representation by an Indian child's tribe in state court proceedings for the foster care placement of, or TPR to, an Indian child, a single implementation level is measured for children who are candidates and in IV–E FC. The base year (FY 2021) implementation level is set at zero percent since Federal funding for this cost will not be available until this final rule is implemented by title IV–E agencies. Although there is no known data on the extent to which we anticipate title IV–E agencies will begin providing representation for an Indian child's tribe to participate or intervene in state court proceedings for the foster care placement of, or TPR to, an Indian child, we anticipate that this administrative cost will be made available to five percent of potentially eligible children in FY 2024 and that most of the growth will occur in years two through five (FYs 2025–2028). In FY 2028 we anticipate 35 percent of potentially eligible tribes will receive legal representation. In subsequent FYs, the implementation growth rate will gradually diminish as more title IV–E agencies take up the option to claim for these costs, and thus there are more children on whose behalf a tribe is receiving this representation.
  - For independent legal representation in civil legal proceedings, the implementation level presumes that administrative cost claims will be limited to those children on whose behalf independent legal representation in foster care legal proceedings are claimed. Not all children receiving legal representation in FC proceedings need representation related to civil matters because the reasons for child welfare involvement vary. Additionally, not all title IV–E agencies providing independent legal representation in foster care legal proceedings will opt to also provide such legal representation in civil proceedings. We have no estimate for FY 2021 costs for legal representation in civil legal proceedings as these will be new costs as a result of this final rule. We assume that the proportion of children receiving legal representation for civil legal proceedings (for both candidates and IV–E FC) will be derived from among those receiving representation for foster care legal proceedings. We estimate that the civil legal proceedings title IV–E caseload will grow gradually each FY from 20 percent in FY 2024, to 45 percent in FY 2028 and up to 56 percent in FY 2033 of the children on whose behalf representation is also being provided for foster care legal proceedings. While there is a great deal of interest in providing legal representation in civil legal proceedings the projections take into account that, in most instances, new or revised protocols will need to be developed with various organizations to implement the final rule. There will also be a need to secure state or tribal funds for the non-Federal share of funding, which often requires legislative approvals.

Federal Cost Estimate for Independent Legal Representation in Foster Care Legal Proceedings

Here we describe the individual calculations by line that are in the following chart. All entries in the chart and the narrative below are rounded to the nearest whole number. The calculations to obtain these amounts, however, were performed without applying rounding to the involved factor(s).

Line 1. National number of children (candidates and IV–E FC) receiving legal representation in foster care legal proceedings. Line 1 of the table below provides that the actual number of children receiving independent legal representation in FC proceedings in FY 2021 (extrapolated into the future for the purpose of characterizing the analytic baseline) was 10,477 candidates and 26,092 IV–E FC. Line 1 also includes estimates of the annual number of children receiving independent legal representation in foster care proceedings in the following subsequent years: FYs 2024, 2025, 2026, 2028 and in 2033, the estimated number of children is 29,525 candidates and 73,530 IV–E FC.

Line 2. National average FFP claim per child (candidates and IV–E FC) for independent legal representation in foster care proceedings. Line 2 of the table below displays that in FY 2021, the actual average title IV–E administrative cost claim per child receiving independent legal

representation in foster care legal proceedings was $742 for title IV–E candidates and $2,709 for children in title IV–E foster care. We also provide estimates of the average title IV–E claim per child in the following subsequent years: FYs 2024, 2025, 2026, 2028 and in 2033 the per child average claim is estimated at $3,481 (IV–E FC) and $954 (candidates). We note that IV–E agencies will have an incentive to ensure that the attorneys' fee costs that they submit for IV–E reimbursement are reasonable because the IV–E agency will be responsible for the 50% state share of the cost.

Line 3. Average FFP claims for candidates and children in title IV–E foster care for independent legal representation in foster care legal proceedings. Line 3 of the table below displays that in FY 2021, the actual FFP for children receiving independent legal representation in foster care legal proceedings was $7,777,621 for candidates and $70,689,345 for children in IV–E FC. We also provide estimates of the average annual claims for these children in the following subsequent years: FYs 2024, 2025, 2026, 2028 and in 2033 the estimated cost is $28,160,009 (candidates) and $255,941,062 (IV–E FC).

Line 4. Total Federal costs for independent legal representation in foster care legal proceedings (candidates and IV–E FC). Line 4 of the table below provides that the actual total FFP in FY 2021 was $78,466,966, which is the sum of the costs of independent legal representation in foster care legal proceedings for candidates and IV–E FC. We also provide estimates of the total FFP for these costs in the following subsequent years: FYs 2024, 2025, 2026, 2028 and in 2033 the estimated annual cost is $284,101,071. The estimates for these subsequent FYs were calculated by multiplying line 1 by line 2 for candidates and IV–E FC.

Line 5. Non-Federal costs for independent legal representation in foster care legal proceedings. Line 5 of the table below displays the total FY 2021 non-Federal costs of independent legal representation in foster care proceedings for candidates and IV–E FC was $78,466,966. This number is the same as line 4 because the FFP rate used in these estimates is 50 percent, thus we estimate the costs for Federal and non-Federal to be the same. We also provide estimates of the total non-Federal costs of independent legal representation in foster care legal proceedings in the following subsequent years: FYs 2024, 2025, 2026, 2028 and in 2033 the estimated annual cost is $284,101,071.

Line 6. Total Federal and non-Federal costs of independent legal representation in foster care legal proceedings. Line 6 of the table below is the sum of lines 4 and 5 for the total Federal and non-Federal costs of independent legal representation in foster care legal proceedings for candidates and IV–E FC. The total FY 2021 costs were $156,933,932. We also provide estimates of these total Federal and non-Federal costs in the following subsequent years: FYs 2024, 2025, 2026, 2028 and in 2033 the estimated annual cost is $568,202,142.

Federal Cost Estimate of Independent Legal Representation in Other Civil Legal Proceedings

Line 7. Number of children (candidates and IV–E FC) receiving independent legal representation in civil legal proceedings. Line 7 of the table below displays the estimated number of children who will receive independent legal representation in civil legal proceedings either directly, or on behalf of a parent, relative caregiver, or Indian custodian in FY 2024 as 10,137 children. There is no estimate for FY 2021 in the chart because these costs were not claimed; these will be new costs as a result of this final rule. We also provide estimates for subsequent years: FYs 2025, 2026, 2028 and in 2033 the estimated number of children is 63,482. This is based on the implementation level which is the percentage of children receiving independent legal representation in foster care legal proceedings who are projected to also receive independent legal representation in civil legal proceedings in the year.

Line 8. National average title IV–E administrative cost claim per child for independent legal representation in civil legal proceedings. Line 8 of the table below displays that in FY 2021, we assumed the average FFP claim per child (candidates and IV–E FC) receiving independent legal representation in civil proceedings to be $1,262. We also provide estimates for these costs for the following subsequent years: FYs 2024, 2025, 2026, 2028 and in 2033, we estimate the average FFP claim per child to be $1,621. These cost estimates were derived from data provided by the ''Detroit Model'' legal services program in which legal representation in civil issues for child welfare clients was calculated as an average yearly amount of $2,524 gross ($1,262 50 percent FFP title IV–E Federal share) per client. We used the Detroit model project because we do not have current title IV–E administrative cost claims reported on the Form CB–496 for civil proceedings that we can use for an estimate of the cost of providing independent legal representation in civil legal proceedings in this rule. This is the only program model known to us providing civil legal representation in pre-petition cases for which average cost data is available, thus the only way for us to estimate these costs.[19] One commenter agreed that the working estimate of an administrative cost claim per child for independent legal representation in civil legal proceedings is plausible. Other commenters noted that the reasonableness of attorney fees may vary across counties, and depend on factors including geography, accessibility, cost of living, and local economies.

Line 9. Federal costs of independent legal representation in civil legal proceedings. Line 9 of the table below provides the estimated Federal administrative costs at 50 percent FFP for independent legal representation in civil legal proceedings for candidates and IV–E FC. These costs were calculated by multiplying the expected average monthly caseload (line 7) by the expected average annual claim per child (line 8). We provide estimated Federal costs of $13,393,972 for FY 2024 and in subsequent years: FYs 2025, 2026, 2028 and in 2033 the estimated Federal cost is $102,928,630.

Line 10. Non-Federal costs of independent legal representation in civil legal proceedings. Line 10 provides the estimated non-Federal share of administrative costs for independent legal representation in civil legal proceedings for candidates and IV–E FC, which is 50 percent of the total on line 11. This number is the same as line 9 because the FFP rate used in these estimates is 50 percent, thus we estimate the costs for Federal and non-Federal to be the same. We provide estimated non-Federal costs of $13,393,972 beginning in FY 2024 and in subsequent FYs: 2025, 2026, 2028 and in 2033 the estimated non-Federal cost is $102,928,630. There is no estimate for FY 2021 in the chart because these costs were not claimed; these will be new costs as a result of this final rule.

Line 11. Total Federal and non-Federal cost of independent legal representation in civil legal proceedings. Line 11 displays the annual estimated total (Federal + non-Federal) costs for independent legal representation for

[19] Detroit Center for Family Advocacy Pilot Evaluation report July 2009–June 2012; Sankaran, Vivek. Case Closed: Addressing Unmet Legal Needs and Stabilizing Families. M.L. Raimon, co-author. Center for the Study of Social Policy [2014] [Detroit model project].

candidates and IV–E FC in civil legal proceedings. This is the sum of lines 9 and 10. We estimate these total costs beginning in FY 2024 as $26,787,943 and in subsequent FYs: 2025, 2026, 2028 and in 2033, the estimate is $205,857,260. There is no estimate for FY 2021 in the chart because these costs were not claimed; these will be new costs as a result of this final rule.

Line 12. Number of Indian children on whose behalf a tribe may receive representation in state foster care legal proceedings (candidates and IV–E FC). Line 12 of the table below provides the estimated number of Indian children for whom legal representation may be received by their tribe in state FC proceedings. In FY 2021 (extrapolated into the future for the purpose of characterizing the analytic baseline) candidates and IV–E FC are not listed since this administrative cost was not available. We estimate that the total number, beginning in 2024 and subsequent FYs 2025, 2026, 2028 and 2033 is 3,342 for candidates and 7,814 for IV–E FC.

Line 13. National average FFP claim per child (candidates and IV–E FC) for tribal representation in state foster care legal proceedings. Line 13 of the table below provides the average title IV–E claim per child for the tribal representation in state foster care proceedings. In FY 2021 (extrapolated into the future for the purpose of characterizing the analytic), the average title IV–E administrative cost claim per child receiving legal representation in state foster care legal proceedings was $1,262 (estimated) for title IV–E candidates and $2,709 (actual) for children in title IV–E foster care. We estimate the total per child claim for subsequent FYs 2024, 2025, 2026, 2028, and 2033 is $1,621(candidates) and $3,481 (IV–E FC).

Line 14. Average FFP for IV–E FC and candidate itemized for tribal representation in state foster care legal proceedings. Line 14 of the table below displays estimates for the average annual claims for children whose tribe is receiving legal representation in state foster care proceedings. In FY 2021, there was no actual FFP for children receiving tribal legal representation in such legal proceedings. For subsequent FYs 2024, 2025, 2026, 2028 and 2033 the estimated cost is $5,419,446 (candidates) and $27,200,314 (IV–E FC).

Line 15. Total FFP for tribal representation in state foster care legal proceedings. Line 15 of the table below provides the total FFP for tribal representation in state foster care legal proceedings by multiplying line 12 for candidates by line 13 for IV–E FC. For FY 2021 (base year), there was no actual FFP for children receiving tribal legal representation in state foster care legal proceedings. Estimates of the total annual FFP for these costs in FYs 2024, 2025, 2026, 2028 and 2033 is $32,619,760.

Line 16. Total non-Federal cost for tribal representation in state foster care legal proceedings. Line 16 provides the estimated non-Federal share of administrative costs for tribal legal representation in state foster care legal proceedings for candidates and IV–E FC by multiplying line 1 by line 2, which is 50 percent of the total on line 17. This number is the same as line 15 because the FFP rate used in these estimates is 50 percent, therefore we estimate the costs for Federal and non-Federal to be the same. We provide estimated non-Federal costs of $2,641,921 beginning in FY 2024 and in subsequent FYs 2025, 2026, 2028 and 2033, the estimated non-Federal cost is $32,619,760. There is no estimate for FY 2021 in the chart because these costs were not claimed; these will be new costs as a result of this final rule.

Line 17. Total cost for state foster care legal proceedings. Line 17 displays the annual estimated total Federal and non-Federal costs for tribal representation for candidates and IV–E FC in state foster care legal proceedings. This is the sum of lines 15 and 16. We estimate these total costs beginning in FY 2024 as $5,283,842 and in subsequent FYs 2025, 2026, 2028 and 2033, the estimate is $65,239,520. There is no estimate for FY 2021 in the chart because these costs were not claimed; these will be new costs as a result of this final rule.

BILLING CODE 4184–25–P

Year	2021	2024	2025	2026	2028 (Year 5)	2033 (Year 10)
1. National number of children receiving legal representation in foster care legal proceedings (candidates and IV-E FC)	10,447 (candidates) 26,092 (IV-E FC)	13,201 (candidates) 32,876 (IV-E FC)	15,973 (candidates) 39,779 (IV-E FC)	19,328 (candidates) 48,133 (IV-E FC)	24,886 (candidates) 61,976 (IV-E FC)	29,525 (candidates) 73,530 (IV-E FC)
2. National average FFP claim per child (candidates and IV-E for foster care legal proceedings	$742 (candidates) $2,709 (IV-E FC)	$777 (candidates) $2,837 (IV-E FC)	$795 (candidates) $2,902 (IV-E FC)	$813 (candidates) $2,969 (IV-E FC)	$851 (candidates) $3,107 (IV-E FC)	$954 (candidates) $3,481 (IV-E FC)
3. Average FFP for IV-E FC and candidate itemized for foster care legal proceedings	$7,777,621 (candidates) $70,689,345 (IV-E FC)	$10,260,393 (candidates) $93,254,798 (IV-E FC)	$12,700,622 (candidates) $ 115,433,586 (IV-E FC)	$15,721,212 (candidates) $142,887,156 (IV-E FC)	$21,184,501 (candidates) $192,541,977 (IV-E FC)	$28,160,009 (candidates) $255,941,062 (IV-E FC)
4. Total FFP (line 1 x line 2 for combined IV-E FC child and candidate) for foster care legal proceedings	$78,466,966	$103,515,191	$128,134,209	$158,608,368	$213,726,479	$284,101,071
5. Total non-Federal cost (line 1 x line 2 for combined IV-E FC and candidates) for foster care legal proceedings	$78,466,966	$103,515,191	$128,134,209	$158,608,368	$213,726,479	$284,101,071

17. Total cost for a tribe in state foster care legal proceedings (line 15 + line 16)	N/A	$5,283,842	$16,378,274	$28,204,206	$42,153,722	$65,239,520

Accounting Statement

From a society-wide perspective, many of the effects estimated above are transfers from either the Federal Government or title IV–E agencies to title IV–E participants. The table immediately below presents annualized estimates of the incremental FFP claims, reported as Federal budget transfers, and estimates of the incremental non-Federal share, reported as other transfers, consistent with the yearly estimates reported in rows 4 and 5 (where applicable) and 9, 10, 15 and 16 in the table above. These estimates cover a 10-year time horizon and apply both a 7% and 3% discount rate.

Estimates comparing against pre-existing operations (summarizing rows 9, 10, 15 and 16 in the table above):

Category	Primary Estimate (millions)	Units		
		Year Dollars	Discount Rate	Period Covered
Federal Budget Transfers (annualized)	$76	2021	7%	10 years
Federal Budget Transfers (annualized)	$80	2021	3%	10 years
From/To	From: Federal Government	To: children eligible for title IV-E foster care		
Other Transfers (annualized)	$76	2021	7%	10 years
Other Transfers (annualized)	$80	2021	3%	10 years
From/To	From: Title IV-E agencies	To: children eligible for title IV-E foster care		

Estimates encompassing all provisions being codified for the first time (summarizing rows 4, 5, 9, 10, 15 and 16 in the table above):				
Category	Primary Estimate (millions)	Units		
		Year Dollars	Discount Rate	Period Covered
Federal Budget Transfers (annualized)	$274	2021	7%	10 years
Federal Budget Transfers (annualized)	$285	2021	3%	10 years
From/To	From: Federal Government	To: children eligible for title IV-E foster care		
Other Transfers (annualized)	$274	2021	7%	10 years
Other Transfers (annualized)	$285	2021	3%	10 years
From/To	From: Title IV-E agencies	To: children eligible for title IV-E foster care		

VI. Tribal Consultation Statement

Executive Order 13175, *Consultation and Coordination with Indian Tribal Governments,* requires agencies to consult with Indian tribes when regulations have ''substantial direct effects on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.'' Similarly, ACF's Tribal Consultation Policy says that consultation is triggered for a new rule adoption that significantly affects tribes, meaning the new rule adoption has substantial direct effects on one on more Indian tribes, on the amount or duration of ACF program funding, on the delivery of ACF programs or services to one or more Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes. This final rule does not meet either standard for consultation. Executive Order 13175 does not apply to this final rule because it does not impose any burden or cost on tribal title IV–E agencies, nor does it impact the relationship or distribution of power between the Federal Government and Indian Tribes. Rather, it provides title IV–E agencies an option for claiming additional administrative costs for legal representation under title IV–E of the Act. Although not required for this final rule, ACF is committed to consulting with Indian tribes and tribal leadership to the extent practicable and permitted by law. ACF engaged in consultation with tribes and their leadership on the September 2023 NPRM as described below.

Description of Consultation

On September 29th, 2023, ACF issued a letter to tribal leaders announcing the date, purpose, virtual location, and registration information for tribal consultation and shared it widely through a variety of peer groups and email list-serves. Tribal Consultation was held via a Zoom teleconference call on October 30, 2023. A report of the tribal consultation may be found on the CB website at: *https://www.acf.hhs.gov/cb/report/tribal-consultation-nprms-legal-foster-care.* In summary, the consultation participants requested clarifications on allowable administrative costs, access to funding for legal representation provided early in a case, information the tribe will need to report to the title IV–E agency for claiming costs, and additional funding for the cost of representation in state court proceedings for the foster care placement of, or TPR to, an Indian child, which we responded to in section IV. The participants also raised issues that are out of scope of the NPRM and more technical in nature, such as the types of agreements that must be in place to access Federal funding through the title IV–E agency. We would like to note that more information about agreements and contracts is available in CWPM 8.1E and G. ACF will work with title IV–E agencies and interested tribes to provide additional technical assistance on these issues.

Jeff Hild, Principal Deputy Assistant Secretary for the Administration for Children and Families, performing the delegable duties of the Assistant Secretary for Children and Families, approved this document on April 24, 2024.

List of Subjects in 45 CFR Part 1356

Administrative costs, Adoption assistance, Child welfare, Fiscal requirements (title IV–E), Grant programs—social programs, Statewide information systems.

(Catalog of Federal Domestic Assistance Program Number 93.658, Foster Care Maintenance; 93.659, Adoption Assistance; 93.645, Child Welfare Services—State Grants).

Dated: April 30, 2024.

Xavier Becerra,

Secretary, Department of Health and Human Services.

For the reasons set forth in the preamble, ACF amends 45 CFR part 1356 as follows:

PART 1356—REQUIREMENTS APPLICABLE TO TITLE IV–E

■ 1. The authority citation for part 1356 continues to read as follows:

Authority: 42 U.S.C. 620 *et seq.,* 42 U.S.C. 670 *et seq.,* 42 U.S.C. 1302.

■ 2. Amend § 1356.60 by revising paragraphs (c)(2)(viii) through (x) and adding paragraphs (c)(2)(xi) and (c)(4) to read as follows:

§ 1356.60 Fiscal requirements (title IV–E).

* * * * *

(c) * * *

(2) * * *

(viii) Rate setting;

(ix) A proportionate share of related agency overhead;

(x) Costs related to data collection and reporting; and

(xi) Costs related to legal representation described in paragraph (c)(4) of this section.

* * * * *

(4) The following are allowable administrative costs of legal representation:

(i) Legal representation in foster care proceedings provided by an attorney representing the title IV–E agency or any other public agency (including an Indian tribe) which has an agreement in effect under which the other agency has placement and care responsibility of a title IV–E eligible child pursuant to 472(a)(2)(B)(ii) of the Act;

(ii) Independent legal representation provided by an attorney representing a child in title IV–E foster care, a child who is a candidate for title IV–E foster care, the child's parent(s), the child's relative caregiver(s), and the child's Indian custodian(s) in foster care and other civil legal proceedings as necessary to carry out the requirements in the agency's title IV–E foster care plan. Independent legal representation in civil proceedings includes facilitating, arranging, brokering, advocating, or otherwise linking clients with providers and services as identified in the child's case plan pursuant to sections 422, 471(a)(16), and 475 of the Act; and

(iii) Legal representation provided by an attorney representing an Indian child's tribe (as defined by 25 U.S.C.1903(5)), or representation of an Indian child's tribe provided by a non-attorney, when the child's tribe participates or intervenes in any state court proceeding for the foster care placement or termination of parental rights of an Indian child who is in title IV–E foster care or an Indian child who is a candidate for title IV–E foster care.

AGENCY FOR INTERNATIONAL DEVELOPMENT

48 CFR Parts 727, 742, and 752

RIN 0412–AA90

USAID Acquisition Regulation: Planning, Collection, and Submission of Digital Information; Submission of Activity Monitoring, Evaluation, and Learning Plan to USAID; Correction

AGENCY: U.S. Agency for International Development.

ACTION: Final rule; correction.

SUMMARY: On May 6, 2024, the United States Agency for International Development (USAID) published a final rule amending USAID's Acquisition Regulation (AIDAR) that implements USAID requirements for managing digital information as a strategic asset to inform the planning, design, implementation, monitoring, and evaluation of the Agency's foreign assistance programs. The rule contained two errors which this document is correcting.

DATES: Effective June 5, 2024.

FOR FURTHER INFORMATION CONTACT: Kelly Miskowski, USAID M/OAA/P, at 202–256–7378 or *policymailbox@usaid.gov* for clarification of content or information pertaining to status or publication schedules. All communications regarding this rule must cite AIDAR RIN No. 0412–AA90.

SUPPLEMENTARY INFORMATION:

Correction

In FR Doc. 2024–09373, appearing on page 37948 in the **Federal Register** of Monday, May 6, 2024, the following corrections are made:

■ 1. In the preamble on page 37948, in the first column, in **SUMMARY**, in the first sentence, add the word ''is'' after ''(USAID)''.

727.7003 [Corrected]

■ 2. On page 37961, in the first column, in § 727.7003, in paragraph (a), in the first sentence, remove the words ''to USAID''.

Jami J. Rodgers,

Chief Acquisition Officer.

[Docket No. 240506–0128; RTID 0648–XD634]

Pacific Halibut Fisheries of the West Coast; Management Measures for the 2024 Area 2A Pacific Halibut Directed Commercial Fishery

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule.

SUMMARY: NMFS is implementing fishing periods and fishing period limits for the 2024 Pacific halibut non-tribal directed commercial fishery off the West Coast south of Point Chehalis, WA. This action establishes two fishing periods, June 25–27 and July 9–11, 2024. NMFS is also implementing vessel catch limits applicable to eight vessel size classes. These actions are intended to conserve Pacific halibut and provide fishing opportunity where available.

DATES: This rule is effective on June 25, 2024.

FOR FURTHER INFORMATION CONTACT: Heather Fitch, West Coast Region, NMFS, (360) 320–6549, *heather.fitch@noaa.gov.*

SUPPLEMENTARY INFORMATION:

Background

The Northern Pacific Halibut Act of 1982 (16 U.S.C. 773–773k) (Halibut Act), gives the Secretary of Commerce responsibility for implementing the provisions of the Convention between Canada and the United States for the Preservation of the Halibut Fishery of the North Pacific Ocean and Bering Sea (Convention), signed at Ottawa, Ontario, on March 2, 1953, as amended by a Protocol Amending the Convention (March 29, 1979).

The Secretary of State, with the concurrence of the Secretary of Commerce and on behalf of the United

States, has accepted regulations recommended by the International Pacific Halibut Commission (IPHC), in accordance with the Convention, which govern the Pacific halibut fishery in all regulatory areas, and include the 2024 catch limit for the Area 2A non-tribal directed commercial fishery. The IPHC's Area 2A is located off the coasts of Washington, Oregon and California, and includes the area south of Point Chehalis, WA, (lat. 46°53.30′ N) to the U.S./Mexico border. NMFS published the IPHC regulations in the **Federal Register** on March 18, 2024 (89 FR 19275) to provide notice of their immediate regulatory effectiveness and to inform persons subject to the regulations of their restrictions and requirements (50 CFR 300.62).

In accordance with 16 U.S.C. 773c(c) of the Halibut Act, the Pacific Fishery Management Council (Council) developed a catch sharing plan (CSP) guiding the framework distribution of the overall Area 2A allocation of Pacific halibut across the various sectors. Based on the 2024 Area 2A fishery constant exploitation yield (FCEY) of 1.47 million pounds (667 mt), net weight (*i.e.,* the weight of Pacific halibut that is without gills and entrails, head-off, washed, and without ice and slime), and the allocation framework in the CSP, the non-tribal directed commercial Pacific halibut fishery allocation for 2024 is 249,338 pounds (113 mt), net weight (89 FR 19275, March 18, 2024).

This final rule implements annual management measures for 2024 for the directed commercial Pacific halibut fishery in Area 2A that are not part of the annual IPHC regulations, specifically fishing periods and fishing period limits. This final rule adopts, without changes, the annual management measures from the proposed rule published on March 13, 2024 (89 FR 18368). Specifically, this action establishes two 58-hour fishing periods and four fishing period limits (*i.e.* vessel catch limits) across eight vessel size classes for both fishing periods.

Fishing Periods

Fishing periods, often referred to as fishery openers, are the times during the IPHC coastwide commercial Pacific halibut season when fishing in the non-tribal directed commercial Pacific halibut fishery in Area 2A is allowed. NMFS is implementing two fishing periods open for 58 hours each. The first fishing period will begin on June 25, 2024, at 8 a.m. PDT and close on June 27, 2024, at 6 p.m. PDT. The second fishing period will begin on July 9, 2024, at 8 a.m. PDT and close on July 11, 2024, at 6 p.m. PDT.

Following the initial two fishing periods, NMFS will assess fishery harvest and determine if the fishery has attained the non-tribal directed commercial allocation. If harvest estimates indicate the allocation has not been reached, NMFS may determine that subsequent fishing period(s) are necessary to attain the allocation. If a third fishing period occurs, it would occur no sooner than 3 weeks after the second fishing period. A third fishing period, and any subsequent fishing periods, would be announced in the **Federal Register** through inseason action consistent with 50 CFR 300.63(e).

Fishing Period Limits

A fishing period limit, also called a vessel catch limit, is the maximum amount of Pacific halibut that may be retained and landed by a vessel during one fishing period. Each vessel may retain no more than the current fishing period limit of Pacific halibut for its vessel class, which is determined by vessel length. NMFS is implementing the non-tribal directed commercial fishing period limits shown in table 1 below. Fishing period limits are intended to ensure that the Area 2A directed commercial fishery does not exceed its allocation, while also providing fair and equitable access across participants to an attainable amount of harvest.

If NMFS determines that more than two fishing periods are warranted, NMFS will set new associated fishing period limits and any such fishing period limits for subsequent fishing periods will be set equal across all vessel classes. Any subsequent fishing period limits would be announced in the **Federal Register** through inseason action consistent with 50 CFR 300.63(e).

2024 Non-Tribal Directed Commercial Fishery Fishing Periods and Fishing Period Limits

The Area 2A non-tribal directed commercial fishery, which occurs south of Point Chehalis, WA, (lat. 46°53.30′ N), will open on June 25, 2024, at 8 a.m. PDT and close on June 27, 2024, at 6 p.m. PDT, and will re-open on July 9, 2024, at 8 a.m. PDT and close on July 11, 2024, at 6 p.m. PDT. The fishery's fishing periods may be adjusted inseason consistent with 50 CFR 300.63.

TABLE 1—FISHING PERIOD LIMITS BY SIZE CLASS FOR THE 2024 FIRST AND SECOND FISHING PERIODS OF THE AREA 2A PACIFIC HALIBUT NON-TRIBAL DIRECTED COMMERCIAL FISHERY

Vessel class	Length range in feet (meters)	Fishing period limit in pounds (mt)
A	1–25 (0.3–7.8)	1,800 (0.8164)
B	26–30 (7.9–9.3)	1,800 (0.8164)
C	31–35 (9.4–10.9)	1,800 (0.8164)
D	36–40 (11.0–12.4)	3,000 (1.361)
E	41–45 (12.5–13.9)	3,000 (1.361)
F	46–50 (14.0–15.4)	3,800 (1.724)
G	51–55 (15.5–16.9)	3,800 (1.724)
H	56+ (17.0+)	4,500 (2.041)

Note: Fishing period limits are in dressed weight (head-on, with ice and slime).

Comments and Responses

NMFS published a proposed rule on March 13, 2024 (89 FR 18368) and accepted public comments on the 2024 Area 2A Pacific halibut directed commercial fishery annual management measures through April 12, 2024. NMFS received one public comment.

Comment 1: NMFS received a comment from a member of the public expressing the opinion that retention of a Pacific halibut weighing over 150 pounds should not be allowed.

Response: Size limits were not within the scope of this action. However, NMFS has determined that this action is based on the best scientific information available. For 2024, the IPHC adopted a minimum size limit for commercial fisheries in its annual management

measures (89 FR 19275, March 9, 2024). In addition, the IPHC previously examined maximum size limits [1] and is conducting ongoing research activities examining factors that influence Pacific halibut biomass. Consistent with its statutory and other obligations, NMFS will continue to keep abreast of the IPHC's ongoing research and ensure that its regulatory actions, including its approval of annual Pacific halibut management measures, are based on the best scientific information available.

Classification

Regulations governing the U.S. fisheries for Pacific halibut are developed by the IPHC, the Pacific Fishery Management Council, the North Pacific Fishery Management Council, and the Secretary of Commerce. Section 5 of the Halibut Act of 1982 (Halibut Act, 16 U.S.C. 773c) allows the Regional Council having authority for a particular geographical area to develop regulations governing the allocation and catch of Pacific halibut in U.S. Convention waters as long as those regulations do not conflict with IPHC regulations.

This final rule is exempt from review under Executive Order 12866 because this action contains no implementing regulations.

The Chief Counsel for Regulation of the Department of Commerce certified to the Chief Counsel for Advocacy of the Small Business Administration during the proposed rule stage that this action would not have a significant economic impact on a substantial number of small entities. The factual basis for the certification was published in the proposed rule and is not repeated here. No comments were received regarding this certification. As a result, a regulatory flexibility analysis was not required and none was prepared.

This final rule contains no information collection requirements under the Paperwork Reduction Act of 1995.

Authority: 16 U.S.C. 773–773k.

Dated: May 6, 2024.

Samuel D. Rauch III,

Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

[Docket No. 240506–0129]

RIN 0648–BM46

Fisheries of the Caribbean, Gulf of Mexico, and South Atlantic; Reef Fish Resources of the Gulf of Mexico; Amendment 56

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule.

SUMMARY: NMFS issues regulations to implement management measures described in Amendment 56 to the Fishery Management Plan for the Reef Fish Resources of the Gulf of Mexico. This final rule revises catch levels for gag, accountability measures for its recreational harvest, and the recreational fishing season. In addition, Amendment 56 establishes a rebuilding plan for the overfished stock, and revises the stock status determination criteria and sector harvest allocations. The purpose of this action is to implement a rebuilding plan for gag and revised management measures to end overfishing and rebuild the stock.

DATES: This final rule is effective on June 1, 2024.

ADDRESSES: An electronic copy of Amendment 56 is available from the Southeast Regional Office website at *https://www.fisheries.noaa.gov/action/amendment-56-modifications-catch-limits-sector-allocation-and-recreational-fishing-seasons.* Amendment 56 includes an environmental assessment, a fishery impact statement, a Regulatory Flexibility Act (RFA) analysis, and a regulatory impact review.

FOR FURTHER INFORMATION CONTACT: Dan Luers, NMFS Southeast Regional Office, telephone: 727–824–5305, or email: *daniel.luers@noaa.gov.*

SUPPLEMENTARY INFORMATION: NMFS, with the advice of the Gulf of Mexico Fishery Management Council (Council), manages the reef fish fishery, which includes gag, in Federal waters of the Gulf of Mexico (Gulf), under the Fishery Management Plan for the Reef Fish Resources of the Gulf of Mexico (FMP). The Council prepared the FMP, which the Secretary of Commerce approved, and NMFS implements the FMP through regulations at 50 CFR part 622 under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act).

On October 18, 2023, NMFS published a notice of availability for the review of Amendment 56 and requested public comment (88 FR 71812). On November 9, 2023, NMFS published a proposed rule for Amendment 56 and requested public comment (88 FR 77246). NMFS approved Amendment 56 on January 17, 2024.

Background

Gag in Gulf Federal waters are found primarily in the eastern Gulf. Juvenile gag are estuarine dependent and often inhabit shallow seagrass beds. As gag mature, they move to deeper offshore waters to live and spawn. Gag is managed as a single stock with a stock annual catch limit (ACL) that is further divided or allocated into commercial and recreational sector ACLs. Currently, that allocation of the stock ACL is 39 percent to the commercial sector and 61 percent to the recreational sector. All weights in this final rule are given in gutted weight.

Commercial fishing for gag is managed under the individual fishing quota (IFQ) program for groupers and tilefishes (GT–IFQ program), which began on January 1, 2010 (74 FR 44732, August 31, 2009; 75 FR 9116, March 1, 2010). Under the GT–IFQ program, the commercial quota for gag is set 23 percent below the gag commercial ACL, and NMFS distributes allocation (in pounds) of gag on January 1 each year to those who hold shares (in percent) of the gag total commercial quota. Both gag and red grouper, another grouper species managed under the GT–IFQ program, have a commercial multi-use provision that allows a portion of the gag quota to be harvested under the red grouper allocation, and vice versa. As explained further in Amendment 56, the multi-use provision is based on the difference between the respective gag and red grouper ACLs and quotas. However, if gag is under a rebuilding plan, as will occur under Amendment 56 and this final rule, the percentage of red grouper multi-use allocation is equal to zero. Commercial harvest of gag is also restricted by area closures and a minimum size limit.

NMFS, with the advice of the Council, manages the recreational harvest of gag with an ACL, an annual catch target (ACT) set approximately 10 percent below the ACL, in-season and post-season accountability measures (AMs) to prevent and mitigate overfishing, seasonal and area closures, a minimum

size limit, and daily bag and possession limits.

The most recent stock assessment for gag was completed in 2021 through Southeast Data, Assessment, and Review 72 (SEDAR 72), and concluded that the gag stock is overfished and is undergoing overfishing as of 2019. Compared to the previous assessment for gag, SEDAR 72 used several improved data sources, including corrections for the potential misidentification between black grouper and gag, which are similar looking species, to better quantify estimates of commercial discards. SEDAR 72 also used updated recreational catch and effort data from the Marine Recreational Information Program (MRIP) Access Point Angler Intercept Survey and Fishing Effort Survey (FES) through 2019. Prior to SEDAR 72, the most recent stock assessment for gag was SEDAR 33 Update (2016), which indicated that gag was not subject to overfishing and was not overfished. The SEDAR 33 Update used recreational catch and effort data generated by the MRIP Coastal Household Telephone Survey (CHTS).

SEDAR 72 also accounted for observations of red tide mortality directly within the stock assessment model. Gag is vulnerable to red tide events and was negatively affected by these disturbances in 2005, 2014, 2018, and projected for 2021. Modeling changes were also made in SEDAR 72 to improve size estimates of gag retained by commercial and for-hire (charter vessels and headboats) fishermen, and private anglers.

The Council's Scientific and Statistical Committee (SSC) reviewed the results of SEDAR 72 in November 2021 and concluded that the assessment was consistent with the best scientific information available and suitable for informing fisheries management. On January 26, 2022, NMFS notified the Council that gag was overfished and undergoing overfishing, and the Council subsequently developed a rebuilding plan for gag through Amendment 56.

At its January 2022 meeting, the Council requested that the NMFS Southeast Fisheries Science Center update the SEDAR 72 base model by replacing MRIP–FES landings estimates for the Florida private angling mode with landings estimates produced by the Florida Fish and Wildlife Conservation Commission's State Reef Fish Survey (SRFS). Historically, SRFS estimates a slightly higher fishing effort, and therefore a larger harvest of gag, by private anglers and state charter vessels (in Florida) than MRIP–CHTS, but SRFS estimates a substantially smaller harvest of gag by private anglers and state charter vessels than MRIP–FES. This alternative model run of SEDAR 72 (''SRFS Run'') used MRIP–FES data for the federally permitted charter vessel and shore modes, and data from the Southeast Region Headboat Survey (SRHS) for federally permitted headboats. The results of the SRFS Run were presented to the Council's SSC at its July 2022 meeting. The SSC found the SEDAR 72 SRFS Run to be consistent with the best scientific information available. The SSC determined that SRFS is a comprehensive survey for the gag private angling component of the recreational sector given that greater than 95 percent of private angling landings of gag are captured by the SRFS sampling frame and the SRFS program's collection protocol has been certified by the NMFS Office of Science and Technology as scientifically rigorous. NMFS worked in conjunction with the State of Florida to develop a calibration model to rescale historic effort estimates so that they could be compared to new estimates from SRFS. This calibration model was peer-reviewed and approved through the NOAA Office of Science and Technology in May 2022. Information about the calibration and the SSC's review of the SEDAR 72 SRFS Run can be found here: *https://gulfcouncil.org/meetings/scientific-and-statistical-meetings/july-2022/*. The results of the SEDAR 72 SRFS Run were consistent with the results of the SEDAR 72 base model in that both concluded that the gag stock is overfished and undergoing overfishing.

At the time that NMFS and the Council developed Amendment 56, the Council recognized that NMFS could not likely implement a potential final rule until 2024. Further, the Council recognized that maintaining the previously implemented catch limits for gag in 2023 would continue to allow overfishing. Therefore, the Council sent a letter to NMFS, dated July 18, 2022 (Appendix A in Amendment 56), requesting that NMFS implement interim measures that would reduce overfishing by reducing the gag stock ACL from 3.120 million pounds (lb) or 1.415 million kilograms (kg) to 661,901 lb (300,233 kg). The Council determined, and NMFS agreed, that for this short-term reduction in harvest it was appropriate to maintain the current allocation of the stock ACL between the sectors of 39 percent commercial and 61 percent recreational, and the availability of red grouper multi-use and gag multi-use under the IFQ program. In addition to the reduction in the catch limits, the Council requested that the recreational fishing season for 2023 begin on September 1 and close on November 10, rather than the existing open season of June 1 through December 31. NMFS agreed and implemented these interim measures through a temporary rule effective on May 3, 2023 (88 FR 27701, May 3, 2023). The measures in the temporary rule were initially effective for 180 days, and then NMFS extended them for up to 186 additional days (through May 2, 2024; 88 FR 69553, October 6, 2023), so NMFS could solicit and review public comments on the proposed rule and Amendment 56, and prepare final regulations as appropriate. Because the SSC's review of the SEDAR 72 SRFS Run occurred after the Council's decision to request interim measures for gag, the recreational catch limits in the temporary rule are consistent with MRIP–FES calibrated landings, and are not directly comparable to the catch limits recommended in Amendment 56 and this final rule.

Based on the results of the SEDAR 72 SRFS Run and SSC recommendations, the Council recommended the following changes for gag through Amendment 56:

- Revise the maximum sustainable yield (MSY) proxy, optimum yield (OY), and status determination criteria (SDC);
- Establish a rebuilding plan for the stock, and revise the overfishing limit (OFL), acceptable biological catch (ABC), and stock ACL consistent with that rebuilding plan;
- Revise the commercial-recreational allocation of the stock ACL and set new commercial and recreational sector ACLs, sector ACTs, and commercial quota;
- Modify the recreational AMs; and
- Revise the Federal recreational fishing season.

The current MSY proxy is based on the yield associated with a fishing mortality rate (F) associated with the maximum yield per recruit (F_{MAX}). The SSC recommended a more conservative MSY proxy using the yield associated with F that would result in a spawning stock biomass (SSB) of 40 percent of the spawning potential ratio (SPR; $F_{40\%SPR}$), where SPR is the ratio of the SSB to its unfished state. This revised MSY proxy of $F_{40\%SPR}$ was used to specify the long-term OY and SDC, and informs the catch level projections produced by the SEDAR 72 SRFS Run.

For gag, the sector allocations of the stock ACL affect the catch level projections produced by SEDAR 72. As more of the stock ACL is allocated to the recreational sector, the proportion of recreational discards and associated

mortality increases. Recreational discard mortality rates of gag are assumed to be less than commercial discard mortality rates but the total number of recreational discards is considerably greater than the number of commercial discards. Generally, a gag caught and released by a recreational fisherman has a greater likelihood of survival than by a commercial fisherman because of how and where they fish. However, because of the much higher numbers of gag that are released by the recreational sector compared to the commercial sector, the total number of discarded fish that die from recreational fishing exceeds dead discards from commercial fishing. This results in additional mortality for the stock and a lower projected annual yield, which means a lower OFL, ABC, and stock ACL. However, higher number of dead discards is not due to any change in how the recreational sector operates in the fishery but occurs because the SEDAR 72 SRFS Run data estimated greater fishing effort, and consequently a greater number of fish being caught, which included discards and the associated mortality from discarding fish.

After analyzing multiple alternatives for allocating the stock ACL between the fishing sectors, the Council determined and recommended to NMFS that using the allocation of 35 percent commercial and 65 percent recreational would best represent the historic landings for each sector while accounting for the change from data produced by the Marine Recreational Fisheries Statistics Survey (MRFSS) to SRFS data. Based on the results of the SEDAR 72 SRFS Run and the allocation ratio, the Council recommended OFLs and ABCs for gag during 2024–2028, and recommended the stock ACL be set equal to the ABC.

Management Measures Contained in This Final Rule

This final rule will modify the gag stock and sector ACLs, sector ACTs, commercial quota (which is equivalent to the commercial ACT), recreational AMs, and recreational fishing season as described further.

Annual Catch Limits and Annual Catch Targets

The 2023 temporary rule for gag implemented the current commercial ACL and commercial quota of 258,000 lb (117,027 kg) and 199,000 lb (90,265 kg), respectively, and the recreational ACL and ACT of 403,759 lb (183,142 kg) and 362,374 lb (164,370 kg), respectively. These catch limits are based on the results of the initial SEDAR 72 base model run, which included recreational landings estimates generated using MRIP–FES.

Amendment 56 and this final rule will set the stock ACL for gag at 444,000 lb (201,395 kg) in 2024, and will allocate approximately 35 percent to the commercial sector and approximately 65 percent to the recreational sector. This results in a 155,000-lb (70,307-kg) commercial ACL and a 288,000-lb (130,635-kg) recreational ACL for 2024. As explained in the proposed rule and in this final rule, these catch limits are based on the results of the SEDAR 72 SRFS Run. Because of the different surveys used to estimate recreational landings that were then used to determine the current catch limits and the catch limits in this final rule, the catch limits are not directly comparable. However, the catch limits in this rule are a significant reduction compared to the catch limits that would go back into effect if the 2023 temporary rule expires with no further action. Catch levels will be set from 2024 through 2028, which increase during the time series. The 2028 catch levels will continue after 2028 unless modified by subsequent rulemaking. All of the catch levels recommended by the Council in Amendment 56 were rounded down to the nearest thousand pounds. Therefore, the sum of the sector ACLs does not equal the stock ACL.

Based on the Council's recommendation, this final rule will set the commercial quota equal to the commercial ACT, and the commercial quota will be approximately 5 percent below the commercial ACL. The current buffer between the commercial ACL and commercial quota is 23 percent. The Council recommended reducing this buffer, because there have been considerable improvements in the estimation of commercial landings and discards of gag since NMFS implemented the buffer in 2012. Further, the fraction of gag discarded compared to the total number of gag caught by the commercial sector has remained low. NMFS does not expect the actions in Amendment 56 and this final rule to significantly increase commercial discards of gag. Therefore, the commercial quota, the amount of gag allocation that NMFS distributes annually to IFQ shareholders, will be approximately 95 percent of the commercial ACL.

For the recreational sector, the current buffer between the ACL and ACT is approximately 10 percent. The Council recommended a more conservative ACT than if they had applied the ACL and ACT control rule, which would have resulted in a 10 percent buffer between the ACL and ACT. Instead, the Council recommended doubling that buffer to increase the probability of rebuilding gag by accounting for uncertainty in managing the recreational harvest and further reducing fishing mortality and discards that result from directed harvest. NMFS agrees, thus, this final rule will implement a recreational ACT that is approximately 20 percent below the recreational ACL. Table 1 shows the catch levels recommended in Amendment 56, and except for the stock ACL, these catch levels are included in the regulatory text at the end of this rule.

TABLE 1—STOCK ACL AND SECTOR CATCH LEVELS BY YEAR FOR GAG

Year	Stock ACL lb (kg)	Com ACL lb (kg)	Rec ACL lb (kg)	Com ACT & Quota lb (kg)	Rec ACT lb (kg)
2024	444,000 (201,395)	155,000 (70,307)	288,000 (130,635)	147,000 (66,678)	230,000 (104,326)
2025	615,000 (278,959)	215,000 (97,522)	399,000 (180,983)	204,000 (92,533)	319,000 (144,696)
2026	769,000 (348,813)	269,000 (122,016)	499,000 (226,343)	255,000 (115,666)	399,000 (180,983)
2027	943,000 (427,738)	330,000 (149,685)	613,000 (278,052)	313,000 (141,974)	490,000 (222,260)
2028	1,156,000 (524,353)	404,000 (183,251)	751,000 (340,648)	383,000 (173,726)	600,000 (272,155)

Note: Values are displayed in gutted weight. Abbreviations used in this table: Com means commercial and Rec means recreational. Lb is pounds and kg is kilograms. Catch levels for 2028 will continue after 2028 unless changed.

Recreational Accountability Measures

Currently for the recreational sector, the AMs require NMFS to prohibit harvest of gag for the rest of the fishing year when recreational landings reach its ACL. The AMs also state that if the recreational ACL for gag is exceeded in a fishing year, then in the following fishing year, NMFS will maintain the

prior year's ACT at the same level, unless the best scientific information available determines that is unnecessary, and the fishing season duration will be set based on the recreational ACT. In addition to the previous measures, if gag is overfished and the recreational ACL is exceeded in a fishing year, NMFS will reduce the ACL and ACT in the following fishing year by the amount of the ACL overage, unless the best scientific information available determines that is unnecessary. Amendment 56 and this final rule change the recreational AMs to require that NMFS prohibit harvest when the recreational ACT is projected to be met regardless of whether there was an overage of the recreational ACL in the prior year. NMFS and the Council expect this change, in combination with the increased buffer between the recreational ACL and ACT, to decrease the likelihood of recreational harvest exceeding the recreational ACL. The larger buffer between the recreational ACL and ACT will also reduce the level of discards associated with directed harvest, increasing the probability of meeting the 18-year rebuilding time.

This final rule will also remove the recreational AM that requires the previous year's ACT to be maintained in the year following an overage of the recreational ACL. Because the stock is overfished and NMFS is required to reduce the ACL and ACT by any overage, an additional adjustment that retains the lower ACT is unnecessary.

Recreational Fishing Season

Before NMFS implemented the temporary recreational fishing season for gag in 2023, the recreational season for gag was open each year from June 1 through December 31 (79 FR 24038, April 25, 2016). During the effective period of the temporary rule, the recreational fishing season opened on September 1 and was to close on November 10, 2023, unless NMFS projected the recreational ACL would be harvested prior to that date. On October 4, 2023, NMFS published a temporary rule in the **Federal Register** closing the recreational harvest of gag effective on October 19, 2023 (88 FR 68495).

This final rule will modify the recreational fishing season for gag so the season begins each year on September 1. Unlike the season implemented by the temporary rule, Amendment 56 and this final rule do not establish a predetermined season closure date. Consistent with the changes to the AMs, NMFS will close the gag recreational season when landings reach the recreational ACT. NMFS will use the best data available to project the duration of the recreational season in 2024 and in following years. NMFS expects to have better estimates of recreational fishing effort and catch of gag for a season beginning September 1 after data from 2023 are finalized. This should reduce the uncertainty in projecting an appropriate closure date for the 2024 recreational fishing season. Once the recreational ACT for gag is projected to be met and harvest is closed, recreational fishing for gag would not resume before the end of the year because data would not be available in time for NMFS to determine whether landings did reach the ACT and potentially reopen harvest.

Management Measures in Amendment 56 That Will Not Be Codified in Regulations by This Final Rule

In addition to the measures that will be codified in regulations through this final rule, Amendment 56 revises the MSY proxy, OY, and SDC for gag. Further, Amendment 56 revises the gag OFL, ABC, and sector allocations of the stock ACL.

Maximum Sustainable Yield, Optimum Yield, and Status Determination Criteria

Based on the results of SEDAR 72, Amendment 56 revises MSY proxy, OY, and the SDC used to determine whether overfishing is occurring or the stock is overfished. The proxy for MSY is defined as the yield when fishing at $F_{40\%SPR}$, where SPR is the ratio of SSB to its unfished state. The maximum fishing mortality threshold (MFMT) is equal to $F_{40\%SPR}$. The minimum stock size threshold (MSST) is defined as 50 percent of the biomass at the new MSY proxy. The OY is conditional on the rebuilding plan, such that if the stock is under a rebuilding plan, OY is equal to the stock ACL; and if the stock is not under a rebuilding plan, OY is equal to 90 percent of MSY or its proxy. Currently, MSY is defined in the FMP as F assuming F_{MAX}, and the MFMT is F_{MAX}. The MSST is defined as 50 percent of the biomass at F_{MAX}. The OY is defined as 75 percent of the yield at F_{MAX}. The changes to the MSY, OY, and SDC represent a more conservative approach to management that will rebuild the gag stock to a more robust size, which should be more resilient to episodic mortality from environmental factors including red tide and other harmful algal blooms, and sustainable levels of fishing mortality.

Stock Rebuilding Plan Timeline and Modification of OFL, ABC, and Sector Allocations

Amendment 56 establishes a rebuilding plan and sets the rebuilding time for gag at 18 years, which is based on the amount of time the stock is expected to take to rebuild if fished at 75 percent of the MSY proxy (yield at $F_{40\%SPR}$). Amendment 56 evaluated two other rebuilding times: 11 years, which is the minimum time to rebuild in the absence of fishing mortality; and 22 years, which is twice the minimum time. In addition, the Council initially considered an alternative rebuilding time of 19 years, which is based on the minimum rebuilding time plus one generation time (8 years for gag). Because this option resulted in a rebuilding time similar to fishing at 75 percent of the MSY proxy, the Council removed this alternative from further consideration (Appendix C in Amendment 56). The Council also discussed whether to consider in more detail a rebuilding time between 11 years and 18 years. The Council decided not to add an additional alternative because a slightly shorter rebuilding time would provide minimal benefits to the stock but increase the negative impacts to fishing communities.

Consistent with the rebuilding time recommended by the Council, Amendment 56 revises the OFL and ABC, and sets the stock ACL equal to the ABC. In addition, Amendment 56 revises the sector allocation percentages of the stock ACL from 39 percent commercial and 61 percent recreational to 35 percent commercial and 65 percent recreational, and revises the sector ACLs consistent with the revised allocations as stated earlier in this final rule. The OFL and ABC values by year from 2023 through 2028 are shown in table 2. However, the OFL and ABC values in 2023 are not directly comparable to the OFLs and ABCs from 2024 through 2028, because they are based, in part, on recreational landings estimates produced by the different surveys discussed earlier. Values in 2028 will continue for subsequent fishing years unless modified through another action by the Council or NMFS.

TABLE 2—OFLS AND ABCS VALUES BY YEAR FOR GAG

Year	OFL in pounds (kg)	ABC in pounds (kg)
2023	4,180,000 (1,896,016)	3,120,000 (1,415,208)
2024	591,000 (268,073)	444,000 (201,395)
2025	805,000 (365,142)	615,000 (278,959)
2026	991,000 (449,510)	769,000 (348,813)
2027	1,200,000 (544,311)	943,000 (427,738)
2028	1,454,000 (659,523)	1,156,000 (524,353)

Note: Values are displayed in gutted weight. Kg is kilograms. The ABC values also equal the stock ACL values for gag. Catch levels for 2028 will continue after 2028 unless changed.

Administrative Change to Codified Text Not in Amendment 56

NMFS also clarifies the regulations at 50 CFR 622.8(c) with this final rule. These regulations allow NMFS to re-open harvest for a stock in the same fishing year if data indicate that a quota or ACL was not reached as previously projected. Several stocks have ACTs that are also codified in regulation as quotas. However, some ACTs, such as the recreational ACT for gag, do not have corresponding quotas, and therefore may not appear to be included in the current authority to re-open. NMFS is modifying the regulations in section 622.8(c) to provide a more general reference to allowable harvest levels. This will be consistent with the framework procedures in the relevant fishery management plans that allow NMFS to re-open harvest if additional data show that NMFS closed a season prematurely.

Comments and Responses

NMFS received 33 comments in response to the notice of availability for Amendment 56, and 10 comments were received on the proposed rule. Comments ranged widely in scope, with some supporting Amendment 56 without modification, while others urging disapproval. In general, recreational fishermen and groups supporting recreational fishing are in favor of the revised allocation percentages of the stock ACL for gag between the commercial and recreational sectors in Amendment 56 and this final rule. Commercial fishermen, commercial fishing organizations, and environmental groups generally supported maintaining the current allocation percentages of the stock ACL for gag between the commercial and recreational sectors. Some comments that NMFS received were outside the scope of this action. These comments included suggestions that the for-hire component of the recreational sector be moved to the commercial sector; concern that predation and depredation by sharks and goliath grouper are responsible for much of the decline in abundance of gag and reef fish abundance in general; concern of interspecies competition with red snapper and triggerfish on the reefs due to perceived inadequate management of these species; concern that fertilizer runoff is a causal factor in the decline of gag; NMFS should provide an annual health check to ensure the rebuilding plan for gag is on track; and NMFS and the Council should be managing the reef ecosystem as a whole rather than just by individual fish species. Comments specific to Amendment 56 and the proposed rule are grouped as appropriate and summarized below, each followed by NMFS' respective response.

Comment 1: Several commenters did not support the proposed recreational season. Suggested alternatives included a June 1 start date; seasons from November through February, and October to January; or shorter, intermittent season openings (*e.g.,* a season open a few weeks at a time throughout the summer and fall).

Response: The Council recommended, and NMFS approved, the recreational season start date in Amendment 56 of September 1 to try to provide the longest season possible. The analysis in Amendment 56 indicated that beginning the season on September 1 would result in the longest recreational fishing season of the alternatives considered. For example, initial estimates are that a June 1 start date would result in a recreational season lasting only 16 days. Regarding the suggested October through January season and November through February season, NMFS estimated that the high fishing effort and catch rates during October through December would result in fewer fishing days than a September 1 starting date. Shorter seasons, including intermittent season openings, are more likely to result in derby-like (race to fish) fishing, where greater effort and greater numbers of fish are harvested in a shorter period, and fishermen may decide to go out in more dangerous weather and sea conditions. The September season start date promotes safety of human life at sea to the extent practicable, consistent with National Standard 10 (NS 10) of the Magnuson-Stevens Act.

Comment 2: The recreational season should be fixed, and NMFS should not prohibit harvest before the established closure date.

Response: NMFS disagrees that it is appropriate to allow fishing until a fixed annual closure date. The Magnuson-Stevens Act requires AMs, which the NS 1 guidelines explain are management controls to prevent ACLs, including sector ACLs from being exceeded [50 CFR 600.310(g)]. The recreational AMs for gag at 50 CFR 622.41(d)(2)(i) require NMFS to prohibit further harvest when NMFS estimates that recreational landings will reach or have reached the applicable catch limit. Allowing fishing to continue until a date certain after NMFS determines that landings would reach the catch limit would not be consistent with the AMs. In 2023, the Council recommended and NMFS implemented, a recreational fishing season for gag that opened on September 1 and was to close no later than November 10, for a maximum of 70 days. However, NMFS explained that if the best available data indicated that the catch limit would be harvested before the end of the 70-day period, NMFS would implement a recreational closure prohibiting harvest of gag for the remainder of the fishing year. When NMFS analyzed in-season data that became available during the 2023 open season, NMFS determined that the 2023 ACL for gag had been harvested and closed the recreational season on October 19, 2023. Amendment 56 and this final rule do not specify an end date to the recreational season, which has an opening date of September 1, 2024. Consistent with the AMs, NMFS will use the best scientific information available to determine when recreational harvest will reach the applicable catch limit and close the season on that date.

Comment 3: Several commenters suggested closing commercial and recreational fishing for reef fish for a year or making gag catch and release only until the population rebuilds. Another commenter suggested further reductions to the gag catch limits for the commercial and recreational sectors.

Response: As described in Amendment 56, the NMFS Southeast Fisheries Science Center produced models to predict the effect of reducing gag catch to different levels and estimate how quickly those reduced catch levels would rebuild the gag stock. The models estimated that even if there were no fishing mortality, including no dead discards, the stock would take 11 years to rebuild. Thus, implementing a total fishing closure for 1 year, including no catch and release fishing (and thus no landed catch), or further reducing landed catch limits would not be expected to result in a substantial reduction in the time needed to rebuild the stock. In addition, a complete closure of gag fishing would result in the loss of important fishery-dependent and biological information that help monitor stock rebuilding and in determining appropriate management of gag and other reef fish species. In addition, prohibiting fishing for 1 year or further reducing the catch limits would increase adverse social and economic effects on fishermen and communities that are reliant on gag. (See the response to *Comment 4* for more information on the expected economic effects of Amendment 56 and this rule.)

Comment 4: The low quotas are causing economic hardships for commercial fishermen who cannot pay their bills.

Response: NMFS agrees that the significant reduction in the commercial quota for gag is expected to have adverse economic effects on commercial fishing businesses, and some commercial vessels and fishing businesses may not be earning an economic profit. However, the most recent available data does not indicate that the average commercial fishing vessel that harvests gag or the average commercial fishing business that possesses quota shares for gag is not able to cover its costs or earn an economic profit. Available data suggests that vessels harvesting gag earn economic profits equal to about 32 percent of their annual gross revenue on average. Further, available data suggests that expected economic profits from the harvest of IFQ species (red snapper, groupers, and tilefishes) for all commercial fishing businesses that possess gag shares are at least $29.4 million. This estimate does not account for any economic profits that may accrue to businesses with gag shares that also own commercial fishing vessels that harvest non-IFQ species. Such profits are likely to be small because harvest of IFQ species accounts for around 84 percent of commercial IFQ vessels' annual revenue and economic profits from the harvest of non-IFQ species tend to be smaller than those from IFQ species. Given that there are 455 commercial fishing businesses that possess gag quota shares, the average annual expected economic profit per commercial fishing business is at least $64,620.

Most of these expected economic profits (84 percent) are the result of owning IFQ quota shares for red snapper. Only approximately 1.7 percent of their expected economic profits is thought to be due to the ownership of gag quota shares, and NMFS expects this rule to affect economic profits only from the ownership of gag shares. More specifically, the action to change the sector allocation, implement a rebuilding plan, and change the stock ACL will reduce the commercial quota from 939,000 lb to 212,000 lb (425,923 kg to 96,162 kg) on average from 2024 through 2028. However, average annual commercial landings of gag from 2017 through 2021 were only 492,401 lb (223,349 kg), which is noticeably below the current commercial quota. Therefore, the expected average reduction in annual commercial landings is 280,401 lb (127,188 kg), far less than the reduction in the commercial quota. In addition, the expected reduction in commercial landings is expected to initially increase the average ex-vessel price of gag from $6.10 per lb to $7.78 per lb in 2024, and then gradually decrease to $6.96 per lb in 2028. This increase in the ex-vessel price is expected to partially offset the adverse effects of the expected landings reduction. Thus, the expected reduction in ex-vessel revenue for gag on average is approximately $1.57 million per year. Given an average annual allocation price of $1.03 per lb for gag, the expected reduction in commercial landings of gag is expected to reduce economic profits to these commercial fishing businesses by about $288,813, or by approximately $635 per commercial fishing business. Thus, NMFS expects the reduction in economic profits to be around 1 percent on average per commercial fishing business as a result of the action to change the sector allocation, implement a rebuilding plan, and change the stock ACL. NMFS does not expect a 1 percent reduction in economic profits to cause an economic hardship for the average commercial fishing business that possesses quota shares for gag.

Comment 5: The gag population is healthy. The catch level reductions for gag are unnecessary.

Response: NMFS disagrees that the reduction in the gag catch limits are unnecessary. The most recent stock assessment for gag (SEDAR 72), completed in 2021, is the best scientific information available, indicates that the gag stock is overfished and undergoing overfishing, and that a reduction in the catch limits is necessary to rebuild the stock. The assessment included a multi-day data review workshop and several webinars, was peer reviewed, and was reviewed by the Council's SSC. NMFS recognizes that the abundance of gag varies across locations. However, gag is managed as a single stock in the Gulf, and the stock assessment, which used Gulf-wide data, concluded that the overall abundance has declined since the previous gag stock assessment was completed in 2016. This conclusion is supported by the inability of both the commercial and recreation sectors to harvest their allotted catch limits of gag. In the last 5 years covered by SEDAR 72 (2015 through 2019), the combined commercial and recreational harvest exceeded 50 percent of the gag stock ACL only once (2016).

Comment 6: Recreational data used in making decisions for gag management, such as the assessment and catch-per-unit-effort calculations, have too much error and should not be used. NMFS should only use recreational data that have less than 25 percent standard error.

Response: The Magnuson-Stevens Act requires that fishery conservation and management decisions be based on best scientific information available. The percent standard error associated with an estimate reflects the uncertainty in that estimate. Although NMFS recognizes that reducing standard error in recreational catch estimates for gag would be beneficial, the estimates for recreational catch that are used in Amendment 56 are based on best scientific information available, and are thus appropriate to be used in management. Sometimes the data determined to be the best scientific information available do not have a PSE of less than 25 percent, but the data are necessary and appropriate to be used for management. NMFS sets catch levels (such as ABC and ACL) to address both scientific and management uncertainties. As newer and better data become available, NMFS will update analyses and methodologies to reduce

uncertainty in future management decisions. However, the management measures implemented through this final rule are based on best scientific information available at the time they were developed.

Comment 7: Gag shortages are caused by man-made red tide caused by pollution. Red tides are one of the primary drivers of mortality and the cause of overfishing. Red tide is not sufficiently addressed in the management actions within Amendment 56 as required by the Magnuson-Stevens Act and the NS 1 guidelines. In addition, the amendment should include management actions that address climate change impacts. The climate vulnerability analysis (CVA) indicates that gag has a high overall vulnerability to climate change impacts, yet no management considerations are suggested to alleviate the risks. An MSY proxy of 40 to 50 percent of the SPR is a more appropriate baseline for conservation of the stock but does not directly mitigate impacts from environmental conditions and therefore is not a sufficient management action to address the environmental conditions that are contributing to overfishing.

Response: NMFS recognizes that red tide is one of the primary drivers of mortality for gag, and that gag are highly susceptible to negative impacts of climate change (as indicated by the CVA for gag). Red tide has occurred throughout the known history of the Gulf, and while not man-made, there is evidence suggesting that human induced factors, including pollution, may increase the intensity of red tide events. Still, despite extensive research on causes and factors exacerbating red tide events, much is unknown about these events and how to reduce the negative effects they have on the environment and, specifically, on gag. Further, the timing, location, and intensity of red tide is intermittent, not predictable, and highly variable, as are their effects on gag. For example, while red tide can be associated with large mortality events for gag, it is also often associated with higher than normal recruitment of gag in the following year (presumably due to density dependence mechanisms of gag ecology, such as less competition for food or ideal habitat).

Regarding climate change, the CVA for gag identified the sensitivities and exposures that contribute to the stock's high vulnerability. However, the analysis recognized that few studies have examined the effect of climate factors on the population productivity and distribution of gag, and that it is unclear how any changes will impact abundance and distribution of the stock. Thus, although NMFS is concerned about the increasing negative impacts of climate change on gag as estimated by the CVA and how these factors, in addition to red tide, may negatively affect gag population dynamics in the future, NMFS has determined that Amendment 56 includes measures that sufficiently address the uncertainty related to these impacts.

The SEDAR 72 gag stock assessment directly considered the expected mortality associated with red tide but NMFS models do not account for the increased recruitment associated with these events due to the high level of uncertainty associated with this process. This is because while increased recruitment after a red tide event is predictable, the magnitude of the increase is not.

Despite the uncertainty, Amendment 56 contains management changes to take a more precautionary approach, such as using rebuilding catch projections that are based on the SSB for males and females combined as opposed to just female SSB, and modifying the MSY proxy to be $F_{40\%SPR}$. These changes are expected to help mitigate the adverse effects of both red tide events and climate change by directly accounting for male SSB, which has been recognized as a limitation on rebuilding, and rebuilding the stock to a larger size stock size based on the revised MSY proxy. NMFS does not agree that the MSY proxy should be set at a more conservative level. As explained in Section 1.1 of Amendment 56, the SSC recommended an MSY proxy of $F_{40\%SPR}$ based on gag's susceptibility to episodic mortality from red tide and guidance from a 2019 study by Harford *et al.* The SSC concluded that an MSY proxy of $F_{40\%SPR}$ would allow the stock to rebuild to a more robust level of SSB making it more resilient to environmental influences like red tide and to changes in fishing mortality. NMFS agrees with the SSC that an MSY of $F_{40\%SPR}$ is sufficiently conservative to address current and foreseeable mortality due to fishing and environmental factors.

Comment 8: Amendment 56 and this final rule violate section 303(a)(15) of the Magnuson-Stevens Act, which requires hard catch limits and AMs that will ensure that ACLs will not be exceeded and overfishing will not occur in the fishery. There is no certainty that the measures included in Amendment 56 and the proposed rule will end overfishing. While Amendment 56 includes a 20 percent buffer between the recreational ACL and ACT, the ACT is not an effective recreational AM because it does little to address discards either in or out of season, and targeted recreational catch is not driving overfishing. Further, by admitting that an exact accounting of total gag mortality cannot be determined at this time, NMFS concedes that Amendment 56 does not include legally sufficient ACLs and AMs.

Response: Amendment 56 and the FMP are consistent with the requirements of section 303(a)(15) of the Magnuson-Stevens Act, which requires the FMP to include ACLs, at a level such that overfishing does not occur, and AMs. With respect to discarded fish, there is no requirement in this provision to separately specify or monitor discard mortality. The NS 1 guidelines define catch as including both landed fish and dead discards [50 CFR 600.310(f)(1)(i)]. However, the NS 1 guidelines also state that the ABC, on which the ACLs are based, may be expressed in terms of landings as long as estimates of bycatch and any other fishing mortality not accounted for in the landings are incorporated into the determination of ABC [50 CFR 600.310(f)(3)(i)]. The OFL, ABC, and ACLs specified in Amendment 56 are derived from SEDAR 72 SRFS Run, which accounted for dead discards estimates that were derived from the best scientific information available. Thus, an exact accounting of total mortality is not necessary to apply the AMs to constrain harvest to the ACLs, which are expressed in terms of landed fish only. In addition, as explained in response to *Comment 10,* NMFS recognizes that a significant portion of past gag recreational catch occurred when the recreational season is closed, and is thus discarded, but NMFS expects the significant reduction in the stock ACL as well as the larger buffer between the recreational ACL and ACT, to result in much lower overall gag mortality as required by the rebuilding plan.

Comment 9: The rebuilding plan is legally insufficient because there are no interim measures to monitor the total mortality from discards, as only landings are used for management in non-assessment years.

Response: NMFS disagrees that the rebuilding plan is not legally sufficient. It is unnecessary to monitor discards directly because the rebuilding catch limits are expressed as landed fish. Discard mortality is incorporated into the determination of these catch limits through the SEDAR 72 SRFS Run, which is consistent with the best scientific information available.

Comment 10: The management measures in Amendment 56 and the proposed rule are insufficient to provide at least a 50 percent probability of

rebuilding the gag stock because they do not adequately address discard mortality resulting from recreational sector bycatch. The projections from the stock assessment assume that discards will be reduced proportionally to landed catch but this assumption has been proven false. The private recreational sector discards an estimated 90 percent of gag that are caught, suggesting that the majority of gag interactions occur as non-target interactions. The actions in the amendment do not reduce discards, and Amendment 56 suggests these actions are likely to increase discards, because under the rebuilding plan, increased regulatory discarding of gag would occur during any open fishing season for co-occurring target species (*e.g.,* red grouper, red snapper). In order to reduce discards to appropriate levels, fishery managers must rely on the improbable scenario that individual anglers take action to intentionally avoid gag and therefore reduce their collective discard rates.

Response: NMFS disagrees that the measures being implemented do not provide at least a 50 percent probability of rebuilding the stock. While NMFS recognizes that a significant portion of past gag recreational catch occurred when the recreational season is closed and, therefore, was discarded, the basis for the commenter's assumption that the majority of gag interactions occur as non-target interactions is unclear. Further, NMFS does not agree that this means imposing new stricter catch limits will not rebuild the stock as projected.

With respect to the recreational sector, this rule will further reduce the allowable harvest by increasing the buffer between the recreational ACL and the ACT by 10 percent more than necessary to account for the uncertainty in constraining recreational harvest. This additional 10 percent reduction in recreational harvest will further reduce mortality and increase the probability of rebuilding.

NMFS also disagrees that the assumption that discards will be reduced proportionally to landed catch ''has been proven false.'' NMFS does not have comparable catch or effort data to test this assumption because of the lower catch limits and changes in the dates of the recreational season. Thus, NMFS cannot precisely predict the effects of the management measures in this final rule until we have appropriate data, which will likely be after a few years of rebuilding (including the changes in recruitment, *etc.*) has been completed. Further, many factors affect angler behavior and discards, including changes in the number of fish recruiting (entering) the fishery, open and closed seasons for other reef fish species, and prevailing economic conditions which can affect the amount of angler fishing effort and catch and discard rates.

NMFS expects the change to a September 1 opening date for the recreational season to result in recreational fishermen targeting gag in shallower and colder waters than the previous season, which should further increase survivability of released fish and result in additional escapement contributing to rebuilding the stock. Consistent with section 304(e)(7) of the Magnuson-Stevens Act, NMFS will review rebuilding plan progress. If NMFS determines that adequate progress is not being made because fishing mortality (both landings and discards) exceeds the level necessary to rebuild the gag stock, NMFS will notify the Council and recommend further conservation and management measures, including potential development and implementation of a new or revised rebuilding plan.

Comment 11: The rebuilding plan is legally insufficient because the rebuilding projections (and increases in the ACL) are dependent on the assumption that the sectors will operate as they have in recent years, which we know to be a false assumption.

Response: The stock assessment model requires assumptions about future fishing behavior to produce appropriate catch limit recommendations. The SEDAR 72 SRFS Run assessment projections assume that selectivity, discarding, and retention were the same as the most recent year, which was 2019. This is the best available scientific information at the time those projections were developed. NMFS does not have any data to determine the extent or magnitude of any potential changes to fishing practices. As new data become available on any changes in fishing practices, NMFS can revisit the assessment assumptions as appropriate. NMFS can also use any new data to improve in-season management. For example, NMFS recognizes that changing the start date of the recreational fishing season from June 1 to September 1 is likely to change how the recreational sector operates both during and outside of the open season. While the scope of the effects from the change are not well understood, NMFS is in the process of fully analyzing 2023 data, during which the gag catch limits were reduced and the recreational season started on September 1. Since the 2023 interim regulations are more directly comparable to those being implemented in Amendment 56 and the final rule, NMFS will be more able to accurately predict and anticipate factors such as recreational fishing effort, harvest rates, in-season and out-of-season bycatch rates, and other variables that may result in differential effects to the gag population. Thus, as more appropriate and comparable data are collected, NMFS has the ability to mitigate negative impacts and can take steps to ensure the schedule to rebuild the gag stock is maintained.

Comment 12: Amendment 56 is insufficient to provide at least a 50 percent probability of rebuilding success because it would increase the ACLs each year after 2024. By 2027, the commercial ACL will be only approximately 50 percent of 2022 commercial landings but the recreational ACL will be greater than 2022 recreational landings as estimated by MRIP–CHTS. NMFS should implement a precautionary constant catch approach for gag that would maintain catch at baseline levels and would not proceed with increases until there are tangible signs of stock improvement. A constant catch approach paired with more frequent interim assessments and monitoring of discarding and red tide trends would add baseline protection to this highly vulnerable stock and improve the likelihood of rebuilding success.

Response: NMFS disagrees that because the catch limits for gag increase over time, the probability of rebuilding success will be less than 50 percent and that a more precautionary constant catch approach is appropriate. First, the rebuilding plan is based on the stock assessment, which was informed by the more conservative MSY proxy of $F_{40\%SPR}$ and the recommendations from the Council and SSC that include the increases to the commercial and recreational ACLs adopted in this final rule. Second, NMFS will set the recreational season length based on when the recreational ACT is projected to be met as specified in the revised AMs. It is inappropriate to compare the MRIP–CHTS recreational landings estimate from 2022 to the 2027 recreational ACT, which is based in part on SRFS data. Using consistent recreational data from SRFS, the recreational ACT increases from 230,000 lb (104,326 kg) in 2024 to 600,000 lb (272,155 kg) in 2028, which is well below average recreational landings from 2017 through 2021, which were over 1.2 million lb (544,311 kg). Even if the ACL were the management target, the recreational ACL for 2028 is only 751,000 lb (340,648 kg), which is approximately 63 percent less than the

1.2 million-lb (544,311-kg) average. Finally, a constant catch approach that keeps the stock ACL at the 2024 baseline level would increase the adverse economic and social effects on fishery participants and fishing communities, without significant benefits to stock. As explained in Amendment 56, a rebuilding plan that is based on no fishing mortality would be expected to rebuild the stock in 11 years, as opposed to the 18-year rebuilding plan implemented in this final rule. Thus, a constant catch rebuilding plan that keeps the 2024 stock ACL of 444,000 lb (201,395 kg) is unlikely to result in a significant reduction of the projected rebuilding time but would increase the negative social and economic impacts as discussed in Chapters 4, 5, and 6 of Amendment 56. This would not be consistent with section 304(e)(4) of the Magnuson-Stevens Act, which requires that the rebuilding period for an overfished stock be as short as time possible, taking into account both the biology of the stock and the needs of fishing communities or NS 8, which requires, in pertinent part, that conservation and management measures minimize adverse economic impacts on such fishing communities to the extent practicable.

Comment 13: Amendment 56 is insufficient to provide at least a 50 percent probability of rebuilding success because it fails to address the key biological vulnerabilities of the gag stock including reducing mortality of older, male fish and improving male recruitment (escapement of females and transitioning males) from nearshore reefs so that a greater percentage can become older and transition to male.

Response: NMFS disagrees with the premise that male gag mortality and recruitment need to be addressed directly for the rebuilding plan to have a least a 50 percent chance of success. Amendment 56 includes several measures that address concerns related to male gag mortality and recruitment. A long history of harvesting large males and large fecund females is a large part of the issue with the current sex ratio of gag. Amendment 56 substantially reduces allowable harvest of gag for both the commercial and recreational sectors, which is expected to reduce overall mortality of gag, including that of older adult male fish, and increase male recruitment. In addition, the discard mortality rate is relatively low in the recreational sector due to the generally shallower depth of fishing when compared to the commercial sector, so there would be reduced mortality from reduced catch limits contributing to rebuilding the stock in the long run. Further, NMFS expects the commercial sector to be able to avoid large individuals specifically due to more selective fishing practices as they manage their limited individual fishing quota allocations, which should result in improvements in the stock by reducing pressure on these large gag. Reduced catch limits are also expected to result in greater recruitment of male gag because they will result in more fish in the population, and thus more fish will be available to move to deeper offshore waters to transition to male.

In addition to the lower catch limits, the change in the recreational fishing season from a June 1 start date to a September 1 start date is expected to result in reduced harvest of male gag, which are found almost exclusively in deep water. Fishermen have often reported at Council meetings that gag feed more aggressively when water temperatures are cooler, and particularly when nearshore waters are cooler. Further, studies have shown that discard mortality is lower when fish are caught and released into cool surface water compared to warm surface water. Thus, capturing and releasing gag during summer months, especially from deeper water where barotrauma becomes an increasingly influential factor on discard mortality for gag, is likely to result in increased discard mortality compared to capturing and releasing gag during comparatively cooler fall and winter months. Because directed fishing effort for gag in summer months is typically conducted in greater average depths than in fall months, the probability of harvesting or discarding dead a male gag is higher by comparison in these summer months. Therefore, changing to a September opening of the recreational season is expected to contribute to a reduced mortality of adult male gag.

Comment 14: Amendment 56 violates Magnuson-Stevens Act NS 9 because it allocates fish to the recreational sector and away from the commercial sector. NMFS data estimates that the commercial sector was responsible for less than 1 percent of all gag discards between 1993 and 2019. Choosing an alternative that provides a lower catch limit to the recreational sector and consequently provides a higher gag stock ACL would allow for less waste, more landings, and minimize discards. In addition, the Bycatch Practicability Analyses (BPA) in Amendment 56 does not analyze whether the FMP contains measures to reduce bycatch to the extent practicable, and has no discussion of other measures that could reduce bycatch or bycatch mortality, for example, whether requiring larger circle hooks could reduce catch of smaller grouper; and time or area closures and the effects on bycatch. Other significant discard analyses, including projections, should have been considered and included in the rebuilding plan. Examples include projections at higher and lower discard rates than is assumed, higher uncertainty, *etc.,* to identify at what level of discarding may be occurring on an annual basis. A thorough discard analysis is critical to ensuring the proposed management measures will end overfishing and rebuild the stock. Additional analysis should also have been done to minimize out-of-season discarding through other measures, such as spatial closures or discarding rates during other species' open seasons, and the ABC should reflect any uncertainty from these analyses.

Response: NS 9 requires that conservation and management measures, ''to the extent practicable: (1) minimize bycatch; and (2) to the extent bycatch cannot be avoided, minimize the mortality of such bycatch.'' Conservation and management measures must also be consistent with all of the other National Standards and maximization of net benefits to the Nation. As the National Standard guidelines explain, 10 factors should be considered when determining consistency with NS 9. Some of these factors include population effects for the bycatch species; changes in the economic, social, or cultural value of fishing activities, and non-consumptive uses of fishery resources; changes in the distribution of benefits and costs; and social effects [50 CFR 600.305(d)(3)]. Thus, NS 9 does not require that management measures result in the greatest stock size as the comment appears to suggest. Rather, NMFS must consider and account for the different economic, social, and cultural objectives of the commercial and recreational sectors when determining whether management measures minimize bycatch and bycatch mortality to the extent practicable. Participants in the commercial sector tend to seek to maximize harvest and efficiency while participants in the recreational sector tend to seek to maximize access and fishing opportunities. The sectors operate differently to achieve those objectives, and these differences impact fishing behavior, which generally results in more discards by the recreational sector.

The BPA (Appendix H in Amendment 56) provides information about gag bycatch and bycatch mortality, and discusses the 10 factors in the NS 9

guidelines at 50 CFR 600.350(d)(3), which include summaries of the biological, economic, and social effects presented in Chapter 4 of Amendment 56. As noted in Section 4.2.2 of Amendment 56, the impacts to the gag stock are similar under both allocation alternatives because the overfishing limits are based on a fixed level of fishing mortality. The recreational sector is responsible for more discards and more dead discards than the commercial sector. Therefore, Preferred Alternative 3 (Preferred Option 2b) in Action 2, which changes the allocation percentages, allows for slightly less total harvest than Alternative 2 (Option 2b), which would retain the current allocation percentages, reducing the stock ACL by approximately 9,000 lb (4,082 kg) in 2024 (about 2 percent). However, NMFS expects both Alternative 2 and Alternative 3 in Action 2 to reduce discards when compared to Alternative 1 (no action) due to the substantial reduction in catch limits, and the numbers and rates of discards and discard mortality between Alternatives 2 and 3 are expected to be similar. NMFS also expects an additional reduction in recreational discards associated with directed fishing as a result of the increase in the buffer between the recreational ACL and ACT from 10.25 to 20 percent, and the requirement that NMFS prohibit recreational harvest when the ACT is projected to be met.

With respect to the economic and social effects on both the commercial and recreational sectors, the expected negative impacts are a result of the need to implement a rebuilding plan that requires a significant reduction in the total allowable harvest of gag (see Amendment 56 BPA Criterion 6, 8, 9, and 10, and Sections 4.2.3 and 4.2.4). The new allocation percentages result in an increase in those negative effects for the commercial sector and a decrease in those effects for the recreational sector. However, the revised allocation represents the historical harvest of the two sectors during the same time period as the original allocation (1986 through 2005) updated only to reflect that there has been a change in the survey used to estimate recreational landings. Given the need to account for the different objectives of the commercial and recreational sectors, and provide for the greatest overall benefit to the Nation with respect to both food production and recreational opportunities NMFS has determined that gag bycatch and bycatch mortality are minimized to the extent practicable in both the FMP and Amendment 56.

While NMFS agrees that additional research and analyses could be conducted in the future to determine more precise impacts that bycatch may have on the catch projections or if there are other measures that could further reduce gag bycatch and bycatch mortality, NMFS is required to implement a rebuilding for gag within 2 years of notification to the Council that gag is overfished and, consistent with NS 2, NMFS used the best scientific information available to develop the rebuilding plan for gag and address the various requirements of the Magnus-Stevens Act, including NS 9. As discussed at the Council's January 2024 meeting, NMFS and the Council intend to review additional data and analyses to determine whether additional measures to reduce bycatch of gag (*e.g.,* time or area closures) are practicable. The Council initially considered including additional measures, such as increasing the number of area closures, to Amendment 56 but determined that it was not practicable to do so because before implementing new time or area closures, it was necessary to gather further data and analysis was needed on the impacts of the current closed areas (*i.e.,* Madison-Swanson and Steamboat-Lumps marine protected areas). In addition, after the rebuilding plan has been in effect for a few years, it may be possible to perform alternative stock assessment analyses that incorporate new information on discards in the recreational sector and use the results from those additional analyses to inform the bycatch practicability analysis.

Comment 15: NMFS needs to clarify how dead discards are accounted for in setting the MSY and OY.

Response: Dead discards are accounted for in specifying both the MSY and OY for the gag stock through the stock assessment. The NS 1 guidelines define MSY as ''the largest long-term average catch or yield that can be taken from a stock or stock complex under prevailing ecological, environmental conditions and fishery technological characteristics (*e.g.,* gear selectivity), and the distribution of catch among fleets.'' 50 CFR 600.310(e)(1)(i)(A). OY is the long-term average desired yield from a stock that provides ''the greatest overall benefit to the Nation, particularly with respect to food production and recreational opportunities,'' is reduced from the MSY to take into account economic, social, and ecological factors, and in the case of an overfished fishery, provides for rebuilding to a level consistent with producing the MSY in such fishery. 16 U.S.C. 1802(33); see also 50 CFR 600.310(e)(3)(i). Amendment 56 defines MSY as the yield when fishing at $F_{40\%SPR}$ and defines OY based on rebuilding status, such that: if the stock is under a rebuilding plan, OY is equal to the stock ACL; if the stock is not under a rebuilding plan, OY is equal to 90 percent of MSY or its proxy. The catch projections produced from the SEDAR 72 SRFS Run are based on the MSY proxy specified in Amendment 56 and account for discard mortality. As explained in Amendment 56, during the rebuilding plan OY is set equal to the stock ACL because this is the amount of fish that, over the rebuilding time, would allow the stock to rebuild to a level that is consistent with producing MSY. When rebuilding is complete the OY will be set at 90 percent of the MSY or proxy, which is consistent with the OY set for other reef fish species in Amendment 48 to the FMP (87 FR 34811 June 8, 2022). As explained in Amendment 48, an OY of 90 percent of the MSY or proxy is an intermediate level (between 85 and 95 percent of the MSY of proxy) that balances the need to protect the stock and allow for both food production and recreational opportunities. After the stock rebuilds and if new information indicates that that this OY may not be appropriate, NMFS and the Council can consider that new information and whether to revise the OY.

Comment 16: Amendment 56 will cause hardship to recreational fishermen but will not hurt commercial fishermen. Recreational fishing seasons are getting shorter, as demonstrated by both the recreational gag and red grouper seasons in 2023. However, commercial harvest goes on unabated. Commercial and recreational regulations should be the same.

Response: NMFS disagrees that it is appropriate to have the same regulations for commercial and recreational fishing, and that Amendment 56 only negatively affects recreational anglers. Amendment 56 and this final rule will reduce the commercial and recreational ACLs for gag for each sector to levels substantially lower than average landings from 2017 through 2021. In addition, although both the commercial and recreational sectors have failed to catch or even approach their respective catch limits in recent years, the percent reduction for each sector ACL in this rule compared to their respective recent landings is similar. Commercial fishing is managed differently than recreational fishing to address the economic, social, and cultural goals of each sector. Recreational fishing is managed primarily with bag limits, size limits, and seasons to allow the maximum number of participants the opportunity

to fish. The commercial sector operates under an IFQ program, which allows commercial fishermen to harvest their share of the gag quota at any time during the year. So, unlike the recreational sector, there is no closed commercial season. Because the IFQ program gives individual commercial fishermen the flexibility to fish any time during the year, it prevents ''derby-like'' fishing that can create unsafe fishing conditions as fishermen race to catch as many fish as possible before a catch limit is reached. In addition, the IFQ program allows fishermen to supply fish over the course of the season, which allows for consumers to be able to purchase the fish throughout the year. However, regardless of when they fish during the year, fishing by both sectors is constrained by their respective annual harvest limits.

Comment 17: Amendment 56 and this final rule violate NS 4 of the Magnuson-Stevens Act because they allocate fish away from the commercial sector to account for the discards in the recreational sector, which is not fair and equitable and does not promote conservation.

Response: NMFS has determined that Amendment 56 and the final rule are fair and equitable and reasonably calculated to promote conservation, consistent with NS 4. The Council initially reviewed allocation options based on six different times series of landings data, but removed some options from further consideration because they resulted in relatively minor differences. In Amendment 56, the Council evaluated retaining the existing allocation percentages and updating those percentages using the SRFS recreational landings estimates calibrated to the same time series (1986 through 2005) that was used in setting the original allocation percentages. The Council determined, and NMFS agrees, that updating the allocation percentages using the SRFS calibrated recreational landings results is fair and equitable because it accounts for the transition to using SRFS data to estimate recreational catch while maintain the same referenced time series.

As explained in response to *Comment 14,* recreational fishing for gag (and many other reef fish species) typically involves higher numbers of discards than for the commercial sector, and the sector allocation percentages approved in Amendment 56 (*i.e.,* Alternative 3, Option 2b in Action 2) reduce the total ACL by approximately 9,000 lb (4,082 kg) when compared to the percentages proposed in Alternative 2b. However, the OY includes both recreational opportunities and food production, and the commercial and recreational sectors have different objectives, and operate differently to achieve those objectives. The Council and NMFS must consider and account for these differences when determining whether an allocation fairly and equitably allocates fishing privileges and provides the greatest overall benefit to the Nation with respect to both food production and recreational opportunities. Further, the large reduction in the total allowable harvest in Amendment 56 is not a result of the shift in sector allocation of the stock ACL but the result of SEDAR 72 and the determination that the stock is overfished and undergoing overfishing.

Comment 18: The Council failed to follow its allocation review policy by combining the allocation decision with decisions related to catch limits and rebuilding times. The Council's allocation policy requires a comprehensive allocation review and an after-the-fact determination that Amendment 56 includes that review is not sufficient. Further, the Council and NMFS suggest that the ''sector allocation ratio in Alternative 2 results in a de facto reallocation to the commercial sector of approximately 4 percent,'' but no allocation review was performed to evaluate this reallocation. If de facto reallocation arguments are to be used as justifications for management changes, then their use must be consistent with all NMFS and Gulf Council allocation policies and guidance.

Response: The process for evaluating and changing the commercial-recreational allocation percentages through Amendment 56 was consistent with NMFS and Gulf Council policies and guidance. The Council's Allocation Review Guidelines address the situation that resulted in Amendment 56, recognizing that, ''[i]n some instances, *e.g.,* following a stock assessment, the Council may elect to skip a formal allocation review and directly proceed with the development of an FMP amendment. In these cases, these guidelines would not apply.'' The most recent stock assessment (SEDAR 72) indicated that the gag stock was overfished and undergoing overfishing, and incorporated the updated SRFS recreational catch estimates. Therefore, the Council and NMFS used Amendment 56 to develop a rebuilding plan and review the sector allocations to determine whether an adjustment was appropriate. The review incorporated into Amendment 56 included an evaluation of allocation options, and all of the relevant ecological, economic, social, and performance factors identified in the relevant Council and NMFS polices and guidance, including the Council's Allocation Policy and NMFS' Procedural Directive 01–119–01.

Comment 19: Automatic reallocation based on SRFS is arbitrary, and retrospectively adjusting historical landings estimates from 30 years ago is fraught with uncertainty. Allocation decisions should not be based on SRFS data until the accuracy of the data is resolved.

Response: NMFS disagrees that there was an automatic reallocation and that is not appropriate to use SRFS data to adjust the commercial-recreational allocation percentages in Amendment 56. Amendment 56 included an alternative to retain the current allocation percentages and an alternative to adjust those percentages using SRFS calibrated landings. As explained in response to *Comment 17,* the Council recommended, and NMFS agrees, that it is appropriate to adjust the allocation to 65 percent recreational: 35 percent commercial based on the same 1986 through 2005 time series with updated SRFS landings estimates. Although there is uncertainty related to the SRFS calibration, as explained previously, this was reviewed and approved by peer-review through the NMFS Office of Science and Technology in May 2022. NMFS has determined that SRFS landings estimates are best scientific information available, and thus that it was appropriate to use these estimates to inform the allocation decision recommended by the Council in Amendment 56 and being implemented in this final rule.

Comment 20: Revised estimates of recreational landings based on SRFS do not provide all of the necessary information for allocation decisions. Had SRFS been used initially in the stock assessment, it would have generated higher OFLs, ABCs, and ACLs for both sectors, allowing the commercial sector to increase its harvest.

Response: NMFS disagrees that it is appropriate to speculate on possible changes to commercial landings and the commercial-recreational allocation had SRFS data been available to use in prior stock assessments. NS 2 requires that management measures be based on the best scientific data available and calibrated SRFS recreational catch estimates were not available to use prior to the SEDAR 72 SRFS Update. Even if it were appropriate and correct to assume that the stock ACL would have been higher had this new data been available previously, it does not automatically follow that commercial harvest would have been larger. As noted in the Regulatory Flexibility Act

Analysis in Chapter 6 of Amendment 56, the average commercial landings of gag from 2017 through 2021 were only 492,401 lb (223,349 kg), well below the commercial quota of 939,000 lb (425,923 kg).

Comment 21: The Council passed a motion to delay implementing new use of FES until the pilot study examining issues with the design of FES has been completed and deemed consistent with best scientific information available. If this analysis was done for SRFS, it is reasonable to assume the same result, so proceeding with reallocation in Amendment 56 is premature and inconsistent with recent Council actions.

Response: At its January 2024 meeting, the Council passed a motion to delay decisions about whether to change allocations of ACLs between the commercial and recreational sectors that were based on MRIP–FES data. SEDAR 72 and Amendment 56 both use recreational landings data based on SRFS to recommend catch levels for the recreational harvest of gag. NMFS disagrees that approving and implementing Amendment 56 is inconsistent with the Council's decision to delay potential actions that involve commercial-recreational allocations and use data generated from MRIP–FES or that it is reasonable to assume that the results of the pilot studies are applicable to SRFS. The MRIP–FES collects recreational trip information for specified 2-month periods, and over the course of the previous year. The Council's motion was in response to the results of one pilot study conducted by the NMFS Office of Science and Technology that evaluated a potential source of bias in MRIP–FES effort questions; specifically, the order in which two questions were presented. This pilot study found that estimates for private angler effort were generally 30 to 40 percent lower for shore and private boat modes than produced from the current design. However, the study was conducted over a relatively short period (6 months) using a smaller sample size than the full FES sample. NMFS is currently conducting a larger scale follow-up study. It is unknown whether this larger scale study will produce the same results as the initial pilot study. Information about the study, next steps, and the anticipated timeline can be found at *https://www.fisheries.noaa.gov/recreational-fishing-data/fishing-effort-survey-research-and-improvements.*

The Council's motion reflects the Council's intention to defer recommendations related to any changes to commercial-recreational allocations that incorporate MRIP–FES data until the ongoing research to determine the impacts of these changes to the survey is complete. The motion is not relevant to NMFS' review and implementation of the updated allocation percentages in Amendment 56, which are based in part on the calibrated time series of SRFS estimates of private recreational effort as incorporated into the SEDAR 72 SRFS Run and are separate from MRIP–FES. SRFS creates a universe of reef fish anglers by requiring anyone who harvests certain reef fish from a private vessel in Florida to obtain the State Reef Fish Angler designation, which, makes an angler eligible to receive a questionnaire in the mail that asks about their fishing activity in the previous month. More information on the SRFS questionnaire can be found at *https://myfwc.com/research/saltwater/fishstats/srfs/program/.* The SRFS questionnaire is more narrowly focused than the MRIP–FES questionnaire. Therefore, NMFS does not believe it is reasonable to assume that the potential bias identified with the MRIP–FES questionnaire would be indicative of similar bias with SRFS.

Comment 22: Action 3 in Amendment 56, which reallocates gag away from commercial fishermen to the recreational sector, is not consistent with the purpose and need of Amendment 56 and violates the Magnuson-Stevens Act. Providing greater allocation to the recreational sector, which accounts for the vast majority of discards and discard mortality, will not allow the stock to rebuild as projected in this rebuilding plan.

Response: The allocation percentages recommended by the Council in Amendment 56 do not reduce the probability of rebuilding the gag stock. The OFLs and ABCs recommended by the SSC were derived from SEDAR 72, which accounts for dead discards by both sectors, and the risk of overfishing the stock is the same for both of the allocation alternatives considered by the Council. As explained in response to *Comment 10,* NMFS expects the combined management measures in Amendment 56 (*i.e.,* reduction in catch limits, increased buffer between the recreational ACL and ACT, and change in recreational season start date) to rebuild the stock as projected. Therefore, NMFS has determined that the allocation percentages recommended in Amendment 56 are consistent with the purpose and need statement.

Comment 23: The rule does not clarify how any overage of the recreational ACL in 2023 will be addressed in 2024 given that the 2023 ACL is derived in part from MRIP–FES data and the 2024 ACL is derived in part from SRFS data. The amendment should include clarity surrounding the calibration and consistency of the catch limits [of data used from the different recreational surveys].

Response: Regulations at 50 CFR 622.41(d)(2)(iii) require that if gag are overfished and gag recreational landings exceed the applicable ACL, NMFS will reduce the ACL for that following year by the amount of the ACL overage in the prior fishing year, and reduce the ACT by the amount of the ACL overage in the prior fishing year, unless the best scientific information available determines that a greater, lesser, or no overage adjustment is necessary. NMFS has determined that recreational landings in 2023 exceeded the recreational ACL as specified in the interim regulations and that adjustments to the 2024 recreational ACL and ACT are appropriate. To reconcile the different data used to specify the 2023 and 2024 ACLs, NMFS has determined what the 2023 recreational ACL would have been after calibrating from MRIP–FES to SRFS data, and intends to use 2023 SRFS estimates to determine the overage of that recreational ACL. That overage will then be deducted from the 2024 recreational ACL and ACT as specified in Amendment 56 and this final rule. The 2024 commercial ACL and ACT will not be effected, and the rebuilding projections as specified in Amendment 56 will also remain unchanged. More information will be made available when NMFS publishes the temporary rule specifying the 2024 recreational catch limits.

Harford, W.J., S.R. Sagarese, and M. Karnauskas. 2019. Coping with information gaps in stock productivity for rebuilding and achieving maximum sustainable yield for grouper–snapper fisheries. Fish and Fisheries 20(2):303–321.

Classification

Pursuant to section 304(b)(3) of the Magnuson-Stevens Act, the NMFS Assistant Administrator has determined that this final rule is consistent with Amendment 56, the FMP, other provisions of the Magnuson-Stevens Act, and other applicable law.

There is good cause under 5 U.S.C. 553(d)(3) to establish an effective date for this final rule of less than 30 days after the date of publication. On November 28, 2023, NMFS published a temporary rule to withhold a portion of

the commercial allocation of gag for the 2024 fishing year in anticipation of the reduction in the commercial quota in this final rule (88 FR 83040). If this final rule is not effective on June 1, 2024, the regulations at 50 CFR 622.22(a)(4) require NMFS to distribute the previously withheld commercial allocation to shareholders. NMFS was unable to publish this final rule 30 days in advance of June 1, 2024, because NMFS received several significant comments on the proposed rule, which required more time than anticipated to consider and provide responses. If allocation is distributed on or after June 1, NMFS would be unable to withdraw that allocation from the shareholder accounts and commercial harvest would not be constrained to the reduced catch limits for gag in his final rule. Allowing this additional commercial harvest would be contrary to the public interest because it could result in overfishing of gag and would be inconsistent with the approved rebuilding plan in Amendment 56 that was developed as required by section 304(e)(4) of the Magnuson-Stevens Act. Further, a 30-day delay in the effective date of this final rule would also cause confusion by allowing the recreational season for gag to open for a brief period beginning on June 1, 2024. And if this rule became effective after a 30-day delay, the recreational season would close again and not reopen until September 1, 2024. Having this final rule effective on June 1, 2024, avoids any confusion about when recreational fishing is allowed.

This final rule has been determined to be not significant for purposes of Executive Order 12866. The Magnuson-Stevens Act provides the legal basis for this final rule. No duplicative, overlapping, or conflicting Federal rules have been identified.

A final regulatory flexibility analysis (FRFA) was prepared. The FRFA incorporates the initial regulatory flexibility analysis (IRFA), a summary of the significant issues raised by the public comments in response to the IRFA, NMFS' responses to those comments, and a summary of the analyses completed to support the action. NMFS' response to one public comment regarding the Executive Order 12866 analysis is in the **SUPPLEMENTARY INFORMATION** section of the preamble (see *Comment 4* in the Comments and Responses section). A copy of the full analysis is available from NMFS (see **ADDRESSES**). A summary of the FRFA follows.

The objective of this final rule is to use the best scientific information available to end overfishing of gag and rebuild the stock to a level commensurate with MSY, consistent with the authority under the Magnuson-Stevens Act. All monetary estimates in the following analysis are in 2021 dollars.

Amendment 56 revises the MSY, OY, and SDC for gag based on the results of the updated SEDAR 72 SRFS Run as reviewed by the Council's SSC. The definition of MSY changes from F_{MAX} to the yield when fishing at $F_{40\neq SPR}$. The definition of MFMT changes from being equal to F_{MAX} to being equal to the fishing mortality at the MSY proxy (*i.e.,* $F_{40\neq SPR}$). The definition of MSST changes from 50 percent of the biomass at F_{MAX} to 50 percent of the biomass at the new MSY proxy. OY is currently defined as 75 percent of the yield at F_{MAX}. The new definition of OY is conditional on whether a rebuilding plan is in place. Specifically, if the stock is under a rebuilding plan, OY will be equal to the stock ACL. However, if the stock is not under a rebuilding plan, OY will be equal to 90 percent of MSY or its proxy.

Amendment 56 also revises the sector allocation of the stock ACL from 39 percent commercial and 61 percent recreational to approximately 35 percent commercial and 65 percent recreational. Amendment 56 also establishes a rebuilding plan based on the amount of time the stock is expected to take to rebuild based on the yield when fishing at 75 percent of $F_{40\neq SPR}$, which is equal to 18 years. In turn, the rebuilding plan in combination with the new sector allocation changes the OFL, ABC, stock ACL, commercial ACL, and the recreational ACL. Based on the current allocation of the stock ACL between sectors, the OFL, ABC, stock ACL, commercial ACL, recreational ACL, commercial quota, and recreational ACT would be 4.180 million lb (1.896 million kg), 3.120 million lb (1.415 million kg), 3.120 million lb (1.415 million kg), 1.217 million lb (0.552 million kg), 1.903 million lb (0.863 million kg), and 0.939 million lb (0.426 million kg), and 1.708 million lb (0.775 million kg), respectively, in 2024 and future years if no action was taken. The recreational portion of the OFL, ABC, stock ACL, the recreational ACL, and the recreational ACT would be based on MRIP–CHTS data. Under the new sector allocation and rebuilding plan, the OFL, ABC, stock ACL, recreational ACL, commercial ACL, recreational ACT, and commercial quota are reduced in 2024 but subsequently increase through 2028 as indicated in tables 1 and 2 earlier in this rule. The recreational portion of the revised OFL, ABC, stock ACL, the recreational ACL, and the recreational ACT are based on recreational landings estimates used in the SEDAR 72 SRFS Run. Therefore, the different stock ACLs and recreational ACLs and ACTs are not directly comparable.

This final rule also revises the buffer between the recreational ACL and ACT, which is currently 10.25 percent (*i.e.,* the recreational ACT is 89.75 percent of the recreational ACL). Under this final rule, the buffer between the recreational ACL and ACT is approximately 20 percent (*i.e.,* the recreational ACT is approximately 80 percent of the recreational ACL).

In addition, this final rule also modifies the buffer between the commercial ACL and quota, and sets the quota equal to the ACT. The commercial quota is currently set at approximately 77 percent of the commercial ACL. The commercial ACT is not codified in regulations. This final rule sets the commercial ACT equal to approximately 95 percent of the commercial ACL and sets commercial quota equal to the commercial ACT. Thus, the commercial quota is approximately 95 percent of the commercial ACL.

Lastly, this final rule changes the recreational season start date and modifies the recreational AMs for gag. Specifically, the recreational season start date is changed from June 1 to September 1 each year. The current AM requires NMFS to prohibit harvest when the recreational ACL is projected to be met, whereas this final rule requires NMFS to prohibit harvest when the recreational ACT is projected to be met. The current AM also requires NMFS to maintain the recreational ACT for the following fishing year at the level of the prior year's ACT unless the best scientific information available determines that maintaining the prior year's ACT is unnecessary. This provision is removed under this final rule. Given these individual actions, this final rule is expected to regulate commercial fishing businesses that possess gag shares in the GT–IFQ program and for-hire fishing businesses that target gag.

The gag commercial quota is allocated annually based on the percentage of gag shares in each IFQ account. For example, if an account possesses 1 percent of the gag shares and the commercial quota is 1 million lb (0.45 million kg), then that account would receive 10,000 lb (4,536 kg) of commercial quota for gag. Although it is common for a single IFQ account with gag shares to be held by a single business, some businesses have multiple IFQ accounts with gag shares. As of July 8, 2021, there were 536 IFQ accounts, of which 506 IFQ accounts held gag shares. These accounts and gag

shares were owned by 455 businesses. Thus, NMFS assumes this final rule would regulate 455 commercial fishing businesses.

A valid charter vessel/headboat permit for Gulf reef fish is required to legally harvest gag on a recreational for-hire fishing trip. NMFS does not possess complete ownership data regarding businesses that hold a charter vessel/headboat permit for Gulf reef fish, and thus potentially harvest gag. Therefore, it is not currently feasible to accurately determine affiliations between vessels and the businesses that own them. As a result, for purposes of this analysis, NMFS assumes each for-hire vessel is independently owned by a single business, which is expected to result in an overestimate of the actual number of for-hire fishing businesses regulated by this final rule.

NMFS also does not have data indicating how many for-hire vessels actually harvest gag in a given year. However, in 2020, there were 1,289 vessels with valid charter vessel/headboat permits for Gulf reef fish. Further, gag is only targeted and almost entirely harvested in waters off the west coast of Florida. Of the 1,289 federally permitted vessels, 803 were homeported in Florida. Of these 803 federally permitted vessels, 62 are primarily used for commercial fishing rather than for-hire fishing purposes, and thus are not considered for-hire fishing businesses (*i.e.,* 1,227 vessels are for-hire fishing businesses). In addition, 46 of these permitted vessels are considered headboats, which are considered for-hire fishing businesses. However, headboats take a relatively large, diverse set of anglers to harvest a diverse range of species on a trip, and therefore do not typically target a particular species exclusively. Therefore, NMFS assumes that no headboat trips would be canceled, and thus no headboats would be directly affected by this final rule.

However, charter vessels often target gag. Of the 803 vessels with a valid charter vessel/headboat permit for Gulf reef fish that are homeported in Florida, 695 vessels are charter vessels. A recent study reported that 76 percent of charter vessels with a valid charter vessel/headboat permit in the Gulf were active in 2017, *i.e.,* 24 percent were not fishing. A charter vessel would only be directly affected by this final rule if it is used to go fishing. Given this information, NMFS' best estimate of the number of charter vessels that are likely to harvest gag in a given year is 528, and thus NMFS estimates this final rule would regulate 528 charter fishing businesses.

For RFA purposes, NMFS has established a small business size standard for businesses, including their affiliates, whose primary industry is commercial fishing (50 CFR 200.2). A business primarily involved in the commercial fishing industry is classified as a small business if it is independently owned and operated, is not dominant in its field of operation (including its affiliates), and its combined annual receipts (revenue) are not in excess of $11 million for all of its affiliated operations worldwide. NMFS does not collect revenue data specific to commercial fishing businesses that have IFQ accounts; rather, revenue data are collected for commercial fishing vessels in general. It is not possible to assign revenues earned by commercial fishing vessels back to specific IFQ accounts and the businesses that possess them because quota is often transferred across many IFQ accounts before it is used by the business on a vessel for harvesting purposes, and specific units of quota cannot be tracked. However, from 2017 through 2021, the maximum annual gross revenue earned by a single commercial fishing vessel was about $3.25 million. Based on this information, all commercial fishing businesses regulated by this final rule are determined to be small entities for the purpose of this analysis.

For other industries, the Small Business Administration has established size standards for all major industry sectors in the United States, including for-hire businesses (North American Industry Classification System code 487210). A business primarily involved in for-hire fishing is classified as a small business if it is independently owned and operated, is not dominant in its field of operation (including its affiliates), and has annual receipts (revenue) not in excess of $12.5 million for all its affiliated operations worldwide. The maximum annual gross revenue for a single headboat in the Gulf was about $1.38 million in 2017. On average, annual gross revenue for headboats in the Gulf is about three times greater than annual gross revenue for charter vessels, reflecting the fact that businesses that own charter vessels are typically smaller than businesses that own headboats. Based on this information, all charter fishing businesses regulated by this final rule are determined to be small businesses for the purpose of this analysis.

NMFS expects this final rule to regulate 455 of the 536 businesses with IFQ accounts, or approximately 85 percent of those commercial fishing businesses. Further, NMFS expects this final rule would regulate 528 of the 1,227 for-hire fishing businesses with valid charter vessel/headboat permits for Gulf reef fish, or approximately 43 percent of those for-hire fishing businesses. NMFS has determined that, for the purpose of this analysis, all regulated commercial and for-hire fishing businesses are small entities. Based on this information, NMFS expects the final rule to affect a substantial number of small entities.

Because NMFS does not collect revenue and cost data for the commercial fishing businesses that are expected to be regulated by this final rule, direct estimates of their economic profits are not available. However, economic theory suggests that annual allocation (quota) prices should reflect expected annual economic profits, which allows economic profits to be estimated indirectly. Further, the 455 businesses with gag shares also own shares in the other IFQ share categories and thus are expected to earn profits from their ownership of these shares as well, *i.e.,* red snapper, red grouper, shallow-water grouper, deep-water grouper, and tilefish.

However, economic profits will only be realized if the allocated quota is used for harvesting purposes. For example, practically all of the commercial quota of red snapper has been used for harvesting in recent years, and so it is assumed that all of that quota will be harvested in the foreseeable future. Important management changes have occurred for red grouper, which partly resulted in 96 percent of the commercial quota being harvested in 2021. Thus, this analysis also assumes that all of the red grouper quota will be harvested in the future as well. However, only 82 percent of the deep-water grouper quota, 38 percent of the shallow-water grouper quota, and 73 percent of the tilefish quota was harvested from 2017 through 2021, and that is expected to continue in the foreseeable future. For gag, the quota utilization rate from 2017 through 2021 was approximately 52 percent. Given these quota utilization rates in combination with average annual allocation prices from 2017 through 2021 and annual commercial quotas in 2021, NMFS estimates that the total expected economic profits for commercial fishing businesses with gag shares are at least $29.4 million per year at the present time. This estimate does not account for any economic profits that may accrue to businesses with gag shares that also own commercial fishing vessels that harvest non-IFQ species. Such profits are likely to be small because harvest of IFQ species accounts for around 84 percent of commercial IFQ vessels' annual revenue and

economic profits from the harvest of non-IFQ species tend to be smaller than those from IFQ species. Given that there are 455 businesses with gag shares, NMFS expects the average annual economic profit per commercial fishing business is at least $64,620.

Most of these economic profits (84 percent) are the result of owning red snapper shares. Only approximately $502,930 (or 1.7 percent) of the expected economic profits is due to the ownership of gag shares. This final rule is only expected to affect economic profits from the ownership of gag shares.

Specifically, the action that changes the sector allocation of the stock ACL and implements a rebuilding plan, which changes the stock ACL, reduces the commercial ACL and commercial quota from 1.217 million lb (552,022 kg) and 939,000 lb (425,923 kg) to 275,000 lb (124,738 kg) and 212,000 lb (96,162 kg) on average from 2024 through 2028. However, average annual commercial landings of gag from 2017 through 2021 were only 492,401 lb (223,349 kg), noticeably below the commercial quota. Because average annual landings exceed the commercial quotas for 2024 through 2028, it is assumed all of the proposed commercial quota will be harvested in each year through 2028, and the expected average reduction in annual commercial landings will be 280,401 lb (127,188 kg). Initially, NMFS expects the reduction in commercial landings to increase the average ex-vessel price of gag from $6.10 per lb to $7.78 per lb, or by $1.68 per lb, in 2024. However, NMFS expects the increase in ex-vessel price to gradually decrease through 2028 as the quota and landings increase, resulting in an ex-vessel price of $6.96 in 2028. The increase in the ex-vessel price would partially offset the adverse effects of the landings reduction. Based on the above information, NMFS expects a reduction in annual ex-vessel revenue for gag of approximately $1.57 million on average, or about $3,451 on average per commercial fishing business. Given an average annual allocation price of $1.03 per lb for gag from 2017 through 2021, NMFS expects the reduction in commercial landings of gag to reduce economic profits to these commercial fishing businesses by about $288,813, or by approximately $635 per commercial fishing business. Thus, NMFS expects economic profits to be reduced by around 1 percent on average per commercial fishing business as a result of the action to change the sector allocation and implement a rebuilding plan that reduces the stock ACL.

The action that sets the commercial ACT equal to 95 percent of the commercial ACL and sets the commercial quota equal to the commercial ACT causes the commercial quota to be equal to 95 percent of the commercial ACL as opposed to approximately 77 percent of the commercial ACL. As such, this action is expected to increase the commercial quota relative to what it would be otherwise. The increase still yields commercial quotas below the recent average commercial landings, and thus NMFS assumes all of the expected increase in the quota will be harvested. Specifically, NMFS expects the average annual increase in the commercial quota and landings from 2024 through 2028 to be about 48,527 lb (22,011 kg), which would increase average annual revenue by $267,371, or by about $588 per commercial fishing business. Again, assuming an average annual allocation price of $1.03 per lb, NMFS expects economic profit to commercial fishing businesses to increase by $49,983 per year, or about $110 per commercial fishing business, as a result of this action.

Combining these expected increases in revenue and profits with the decreases discussed earlier, NMFS expects this final rule to decrease average revenue for commercial fishing businesses by about $1.31 million per year from 2024 through 2028, or by $2,868 per commercial fishing business. The total reduction in economic profits for commercial fishing businesses is expected to be $238,830, or $525 per commercial fishing business, which represents a decrease of about 0.8 percent.

According to the most recent estimates of economic returns for charter vessels, average annual economic profit per charter vessel is $27,948. The action to change the sector allocation and implement a rebuilding plan, which would change the stock ACL, would change the gag recreational ACL from its current value of 1.903 million lb (863,186 kg) to 510,000 lb (231,332 kg) on average from 2024 through 2028. As explained previously, the current and new recreational ACLs are not directly comparable because they are based, in part, on recreational landings estimates derived from different surveys. However, average recreational landings from 2017 through 2021 were approximately 1.265 million lb (573,794 kg). Given that average recreational landings have been considerably greater than the recreational ACT in this final rule, all of the recreational ACT is expected to be harvested in the future. NMFS expects the reduction in the recreational ACT to reduce the recreational season length from 214 days to 25 days in 2024. However, the season length is expected to steadily increase to 120 days by 2028 and the average season length from 2024 through 2028 is expected to be 64 days. The reduction in the season length would reduce the number of angler trips targeting gag on charter vessels. From 2024 through 2028, the average reduction in angler trips targeting gag on charter vessels is expected to be 20,976 trips per year. Net Cash Flow per Angler Trip (CFpA) is the best available estimate of profit per angler trip by charter vessels. According to a recent study (available from NMFS see **ADDRESSES**), CFpA on charter vessels is estimated to be $150 per angler trip. Thus, NMFS estimates the total reduction in charter vessel profits from this action to be $3.146 million per year. The average reduction in economic profit per charter fishing business would therefore be about $5,960, or approximately 21.3 percent of their current economic profit, per year.

In combination with the action to require NMFS to close the recreational season based on when the recreational ACT, rather than the recreational ACL, is projected to be met, the action to increase the buffer between the recreational ACL and recreational ACT from 10.25 percent to 20 percent is expected to reduce the recreational season length further from the action to change the sector allocation and implement a rebuilding plan. Specifically, the season length is expected to be further reduced by 2 days in 2024 (open for 23 days instead of 25), though this reduction is expected to gradually increase to 24 days by 2028 (open for 96 days instead of 120 days). The average additional reduction in the recreational season length per year is expected to be 12 days (open for 52 days instead of 64). Again, a reduction in the season length is expected to reduce the number of angler trips targeting gag on charter vessels. From 2024 through 2028, the average reduction in angler trips targeting gag on charter vessels is expected to be 2,125 trips per year. Based on an estimate of $150 in economic profit per angler trip, NMFS estimates the reduction in charter vessel profits from this action to be $318,690 per year. The average reduction in economic profit per charter vessel $604 per year, or about 2.2 percent on average per charter fishing business.

The action that changes the recreational season start date from June 1 to September 1 is expected to increase the recreational season length from 23 days to 59 days in 2024, and from 52 days to 81 days on average from 2024 through 2028. However, because there

are many fewer charter trips targeting gag in the fall months (September through December) compared to the summer months (June through August), this action is expected to further decrease the number of angler trips targeting gag on charter vessels. Although the reduction in trips from 2024 through 2028 varies slightly from year to year, the average reduction per year is 1,610 trips. Based on an estimate of $150 in economic profit per angler trip, NMFS expects this action to decrease economic profits for charter vessels by about $241,500 per year, or by $456 per charter vessel. This would result in a decrease of economic profits by around 1.6 percent on average per charter fishing business.

Based on the above, NMFS expects the total reduction in target trips by charter vessels per year as a result of this final rule to be 24,711 trips. NMFS expects this reduction in trips to reduce economic profits for charter vessels by a total of about $3.707 million per year, or approximately $7,020 per charter vessel. Thus, annual economic profit per charter fishing business is expected to be reduced by approximately 25.1 percent on average.

Six alternatives, including the status quo, were considered for the actions to change the sector allocation of the stock ACL to 35 percent to the commercial sector and 65 percent to the recreational sector, establish a rebuilding plan of 18 years based on the amount of time the stock is expected to take to rebuild if fished at the yield from fishing at 75 percent of $F_{40\%SPR}$, and change the catch levels for 2024 through 2028 as specified in table 1. The status quo alternative would have retained the current sector allocation of the stock ACL of 39 percent to the commercial sector and 61 percent to the recreational sector based on MRIP–CHTS recreational landings data. The status quo alternative would not have established a rebuilding plan or modified any of the catch limits based on MRIP–FES and SRFS landings estimates. This alternative was not selected because the sector allocation would have been based in part on MRFSS recreational landings estimates, which is no longer consistent with the best scientific information available and would effectively result in a reallocation to the commercial sector of approximately four percent, which the Council did not consider to be equitable. This alternative also would not have rebuilt the gag stock or ended overfishing as required by the Magnuson-Stevens Act.

A second alternative would have also retained the current sector allocation of the stock ACL of 39 percent to the commercial sector and 61 percent to the recreational sector, but would have established a rebuilding plan of 11 years assuming a fishing mortality rate of zero. This alternative would have revised the OFL based on the projections from the SEDAR 72 SRFS Run and would have set all of the other catch levels through 2028 at zero. However, as with the status quo alternative, the sector allocation would have been based in part on MRFSS recreational landings data. Further, prohibiting harvest of gag would not be expected to eliminate all fishing mortality, as some gag would still be expected to be discarded and die as fishermen continue fishing for other species that live in similar habitats as gag. This alternative was not selected because, as discussed above, MRFSS is not consistent with the best scientific information available, and would result in a de facto reallocation from the recreational to the commercial sector of approximately four percent, which the Council did not considerable to be equitable. Further, because it is not feasible to eliminate dead discards of gag when fishermen are targeting other species, it is unlikely the stock would actually be rebuilt in 11 years. This alternative would have also resulted in significantly larger adverse economic effects on commercial and charter fishing businesses compared to the action in this final rule.

A third alternative would have also retained the current sector allocation of the stock ACL of 39 percent to the commercial sector and 61 percent to the recreational sector. But, like the action in this final rule, the third alternative would have established a rebuilding plan of 18 years and changed the catch levels based on the projections from the SEDAR 72 SRFS Run. This alternative would have ended overfishing and rebuilt the stock in 18 years. But, as with the status quo and the second alternative, the sector allocation of the stock ACL would be based on MRFSS recreational landings data. Thus, this alternative was not selected because MRFSS is not the best scientific information available, and would effectively result in a reallocation from the recreational sector to the commercial sector of approximately four percent.

A fourth alternative would have also retained the current sector allocation of the stock ACL of 39 percent to the commercial sector and 61 percent to the recreational sector, but would have established a rebuilding plan of 22 years and changed the catch limits based on the projections from the SEDAR 72 SRFS Run. This alternative would have ended overfishing and rebuilt the stock while allowing greater harvest and resulting in smaller adverse economic effects on commercial and charter fishing businesses compared to the action in this final rule. However, it was not selected because the stock is expected to take 4 more years to rebuild compared to the action in this final rule, and the Magnuson-Stevens Act requires overfished stocks to be rebuilt in as short a time period as possible, taking into account various factors. This alternative was also not selected because the use of MRFSS recreational landings data is not consistent with the best scientific information available, and would effectively result in a reallocation to the commercial sector of approximately four percent.

Like the action in this final rule, a fifth alternative would have changed the sector allocation of the stock ACL to 35 percent to the commercial sector and 65 percent to the recreational sector based in part on recreational landings estimates from MRIP–FES, SRHS, and SRFS for 1986 through 2005. As with the second alternative, the fifth alternative would have also established a rebuilding plan of 11 years assuming a fishing mortality rate of zero and used SEDAR 72 SRFS Run projections to change the OFL. The other catch limits would have been set at zero. As discussed earlier, prohibiting harvest of gag would not be expected to eliminate all fishing mortality, as some gag would still be expected to be discarded and die as fishermen continue fishing for other species that live in similar habitats as gag. This alternative was not selected because it is not feasible to eliminate dead discards of gag when fishermen are targeting other species, and therefore it is unlikely the stock would rebuild in 11 years. This alternative would have also resulted in significantly larger adverse economic effects on commercial and for-hire fishing businesses compared to the proposed action.

Like the action in this final rule, a sixth alternative would have changed the sector allocation of the stock ACL to 35 percent to the commercial sector and 65 percent to the recreational sector based in part on recreational landings estimates from MRIP–FES, SRHS, and SRFS data for 1986 through 2005. However, this alternative would have also established a rebuilding plan of 22 years. This alternative would be based on the best scientific information available, end overfishing, and rebuild the stock. This alternative would have also resulted in higher catch limits and therefore resulted in small adverse economic effects on commercial and for-

hire fishing businesses compared to the proposed action. However, this alternative was not selected because it is expected to take 4 more years to rebuild compared to the action in this final rule, and the Magnuson-Stevens Act requires overfished stocks to be rebuilt in as short a time as possible, taking into account various factors.

Two alternatives, including the status quo, were considered for the action to increase the buffer between the recreational ACL and recreational ACT from 10.25 percent to 20 percent. The status quo alternative would have maintained the buffer between the recreational ACL and recreational ACT at 10.25 percent based the yield at 75 percent of F_{MAX}. However, as explained previously, use of F_{MAX} as a proxy for F_{MSY} is not consistent with the best scientific information available.

The second alternative would have revised the recreational ACT using the Council's ACL and ACT Control Rule based on recreational landings data from 2018 through 2021. This alternative would have resulted in a 10 percent buffer between the recreational ACL and ACT, which would have left the buffer essentially unchanged. This alternative was not selected because the Council concluded it was necessary to increase the buffer between the ACL and ACT to reduce the probability of the recreational sector exceeding its ACL, reduce the likelihood of overfishing, and reduce the level of discards associated with directed harvest, which together are expected to increase the probability of meeting the 18-year timeline for rebuilding the gag stock.

Two alternatives, including the status quo, were considered for the action to set the commercial ACT equal to 95 percent of the commercial ACL and set commercial quota equal to the commercial ACT. The status quo alternative would have maintained commercial ACT, which is based on the yield at 75 percent of F_{MAX}, and a commercial quota set at 86 percent of the commercial ACT. This alternative was not selected because it is based on F_{MAX}, which is no longer consistent with the best scientific information available.

The second alternative would have set the commercial ACT equal to 86 percent of the commercial ACL and, like the action in this final rule, set the commercial quota equal to the commercial ACT. This alternative was not selected because the Council determined that a 14 percent buffer between the commercial ACL and ACT is too high and unnecessarily limits commercial harvest due to reduced uncertainty in the estimates of commercial landings and discards.

Three alternatives, including the status quo, were considered for the action to change the recreational season start date from June 1 to September 1 and require NMFS to close the recreational season based on when the recreational ACT is projected to be met rather than the recreational ACL. The status quo alternative would have maintained the recreational season start date of June 1 and required NMFS to close the recreational season based on when the recreational ACL is projected to be met. This alternative was not selected mainly because it would have resulted in a shorter average recreational season length (75 days) compared to the action in this final rule (81 days) for 2024 through 2028. In general, a longer fishing season would result in more fishing opportunities for both the private and for-hire components of the recreational sector. Further, shifting fishing effort to a historically low-effort month (September) may reduce the overall magnitude of recreational discards compared to starting the season in June. Shifting fishing pressure to the fall would also be expected to reduce directed effort for gag in deeper waters, which may further reduce the probability of harvesting or discarding dead male gag.

The second alternative would have retained the June 1 start date for the recreational season. But, like the action in this final rule, this alternative would have required NMFS to close the recreational season based on when the recreational ACT is projected to be met. This alternative was not selected mainly because it would have resulted in a shorter average recreational season length (52 days) compared to the action in this final rule (81 days) for 2024 through 2028. In general, a longer fishing season would result in more fishing opportunities for both the private recreational and for-hire components of the fishery. Further, shifting fishing effort to a historically low-effort month (September) may reduce the overall magnitude of recreational discards compared to starting the season in June. Shifting fishing pressure to the fall would be expected to reduce directed effort for gag in deeper waters, which may further reduce the probability of harvesting or discarding dead male gag.

The third alternative would have changed the recreational season start date to October 1. But, like the action in this final rule, this alternative would have required NMFS to close the recreational season based on when the recreational ACT is projected to be met. This alternative was not selected because it would have resulted in a shorter average recreational season length (63 days) compared to the action in this final rule (81 days) for 2024 through 2028 and would have also resulted in greater adverse effects to charter fishing businesses. In general, a longer fishing season would be expected to result in more fishing opportunities for both the private and for-hire components of the recreational sector.

Section 212 of the Small Business Regulatory Enforcement Fairness Act of 1996 states that, for each rule or group of related rules for which an agency is required to prepare a FRFA, the agency shall publish one or more guides to assist small entities in complying with the rule, and shall designate such publications as ''small entity compliance guides.'' The agency shall explain the actions a small entity is required to take to comply with a rule or group of rules. As part of this rulemaking process, NMFS prepared a fishery bulletin, which also serves as a small entity compliance guide. Copies of this final rule are available from the Southeast Regional Office, and the guide, *i.e.,* fishery bulletin, will be sent to all known industry contacts in the Gulf reef fish fishery and be posted at: *https://www.fisheries.noaa.gov/tags/small-entity-compliance-guide?title=&field_species_vocab_target_id=&field_region_vocab_target_id%5B1000001121%5D=1000001121&sort_by=created.* The guide and this final rule will be available upon request.

This final rule contains no information collection requirements under the Paperwork Reduction Act of 1995.

List of Subjects in 50 CFR Part 622

Fisheries, Fishing, Gag, Gulf of Mexico.

Dated: May 6, 2024.

Samuel D. Rauch, III,

Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

For the reasons set out in the preamble, NMFS amends 50 CFR part 622 as follows:

PART 622—FISHERIES OF THE CARIBBEAN, GULF OF MEXICO, AND SOUTH ATLANTIC

■ 1. The authority citation for part 622 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

■ 2. In § 622.8, revise paragraph (c) to read as follows:

§ 622.8 Quotas—general.

* * * * *

(c) *Reopening.* When a species, species group, sector, or sector component has been closed based on a projection of the applicable catch limit (ACL, ACT, or quota) specified in this part being reached and subsequent data indicate that the catch limit was not reached, the Assistant Administrator may file a notification with the Office of the Federal Register. Such notification may reopen the species, species group, sector, or sector component to provide an opportunity for the catch limit to be harvested.

3. In § 622.34, revise paragraph (e) to read as follows:

§ 622.34 Seasonal and area closures designed to protect Gulf reef fish.

* * * * *

(e) *Seasonal closure of the recreational sector for gag.* The recreational harvest of gag in or from the Gulf EEZ is closed from January 1 through August 31. During the closure, the bag and possession limits for gag in or from the Gulf EEZ are zero.

* * * * *

■ 4. In § 622.39, revise paragraph (a)(1)(iii)(B) to read as follows:

§ 622.39 Quotas.

* * * * *

(a) * * *

(1) * * *

(iii) * * *

(B) *Gag.* See table 1.

TABLE 1 TO PARAGRAPH (a)(1)(iii)(B)

Year	Commercial quota in lb (kg)
2024	147,000 (66,678)
2025	204,000 (92,533)
2026	255,000 (115,666)
2027	313,000 (141,974)
2028+	383,000 (173,726)

* * * * *

■ 5. In § 622.41, revise paragraph (d) to read as follows:

§ 622.41 Annual catch limits (ACLs), annual catch targets (ACTs), and accountability measures (AMs).

* * * * *

(d) *Gag*—(1) *Commercial sector.* See table 1 for the commercial ACLs in gutted weight. The commercial ACT for gag is equal to the applicable commercial quota specified in § 622.39(a)(1)(iii)(B). The IFQ program for groupers and tilefishes in the Gulf of Mexico in § 622.22 serves as the accountability measure for the commercial harvest of gag.

TABLE 1 TO PARAGRAPH (d)(1)

Year	Commercial ACL in lb (kg)
2024	155,000 (70,307)
2025	215,000 (97,522)
2026	269,000 (122,016)
2027	330,000 (149,685)
2028+	404,000 (183,251)

(2) *Recreational sector.* (i) See table 2 for the recreational ACLs and ACTs in gutted weight.

TABLE 2 TO PARAGRAPH (d)(2)(i)

Year	Recreational ACL in lb (kg)	Recreational ACT in lb (kg)
2024	288,000 (130,635)	230,000 (104,326)
2025	399,000 (180,983)	319,000 (144,696)
2026	499,000 (226,343)	399,000 (180,983)
2027	613,000 (278,052)	490,000 (222,260)
2028+	751,000 (340,648)	600,000 (272,155)

(ii) If the NMFS SRD estimates that gag recreational landings have reached or are projected to reach the applicable recreational ACT specified in paragraph (d)(2)(i) of this section, the AA will file a notification with the Office of the Federal Register to close the recreational sector for the remainder of the fishing year. On and after the effective date of such a notification, the bag and possession limits for gag in or from the Gulf EEZ are zero. These bag and possession limits apply in the Gulf on board a vessel for which a valid Federal charter vessel/headboat permit for Gulf reef fish has been issued without regard to where such species were harvested, *i.e.,* in state or Federal waters.

(iii) In addition to the measures specified in paragraph (d)(2)(ii) of this section, if the NMFS SRD estimates that gag recreational landings have exceeded the applicable ACL specified in paragraph (d)(2)(i) of this section and gag is overfished based on the most recent Status of U.S. Fisheries Report to Congress, the following measure will apply. The AA will file a notification with the Office of the Federal Register, at or near the beginning of the following fishing year, to reduce the recreational ACL for that following year by the amount of the ACL overage in the prior fishing year, unless the best scientific information available determines that a greater, lesser, or no overage adjustment is necessary.

* * * * *

Proposed Rules

Federal Register
Vol. 89, No. 92
Friday, May 10, 2024

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 165

[Docket Number USCG–2024–0259]

RIN 1625–AA00

Safety Zone; Tennessee River, Saltillo, TN

AGENCY: Coast Guard, DHS.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Coast Guard is proposing to establish a temporary safety zone for certain waters of the Tennessee River. This action is necessary to provide for the safety of life on these navigable waters near Saltillo, TN, during fireworks display on July 4th, 2024. This proposed rulemaking would prohibit persons and vessels from being in the safety zone unless authorized by the Captain of the Port Sector Ohio Valley or a designated representative. We invite your comments on this proposed rulemaking.

DATES: Comments and related material must be received by the Coast Guard on or before June 10, 2024.

ADDRESSES: You may submit comments identified by docket number USCG–2024–0259 using the Federal Decision-Making Portal at *https://www.regulations.gov.* See the ''Public Participation and Request for Comments'' portion of the **SUPPLEMENTARY INFORMATION** section for further instructions on submitting comments. This notice of proposed rulemaking with its plain-language, 100-word-or-less proposed rule summary will be available in this same docket.

FOR FURTHER INFORMATION CONTACT: If you have questions about this proposed rulemaking, call or email MST3 Joshua D Carter, Waterways Management Division; *Joshua.D.Carter@uscg.mil* or 615–736–5421 x2104.

SUPPLEMENTARY INFORMATION:

I. Table of Abbreviations

CFR Code of Federal Regulations
DHS Department of Homeland Security
FR Federal Register
MM Mile marker
NPRM Notice of proposed rulemaking
§ Section
U.S.C. United States Code

II. Background, Purpose, and Legal Basis

On March 4, 2024, the Town of Saltillo notified the Coast Guard that it will be conducting fireworks display from 8 p.m. to 10 p.m. on July 4, 2024. The fireworks are to be launched from land next to the Tennessee River at Mile Marker (MM) 170, with firework fallout encroaching on the river channel. Hazards from firework displays include accidental discharge of fireworks, dangerous projectiles, and falling hot embers or other debris. The Captain of the Port Sector Ohio Valley (COTP) has determined that potential hazards associated with the fireworks to be used in this display would be a safety concern for anyone within a 100-yard radius of the barge, and as such is establishing a safety zone from MM169 to MM171 of the Tennessee River.

The purpose of this rulemaking is to ensure the safety of vessels and the navigable waters within a 1-mile radius of the fireworks launch zone before, during, and after the scheduled event. The Coast Guard is proposing this rulemaking under authority in 46 U.S.C. 70034.

III. Discussion of Proposed Rule

The COTP is proposing to establish a safety zone from 8 p.m. to 10 p.m. on July 4, 2024. The safety zone would cover all navigable waters from MM 169 to MM 171 of the Tennessee River. The duration of the zone is intended to ensure the safety of vessels and these navigable waters before, during, and after the scheduled fireworks display. No vessel or person would be permitted to enter the safety zone without obtaining permission from the COTP or a designated representative. The regulatory text we are proposing appears at the end of this document.

IV. Regulatory Analyses

We developed this proposed rule after considering numerous statutes and Executive orders related to rulemaking. Below we summarize our analyses based on a number of these statutes and Executive orders, and we discuss First Amendment rights of protestors.

A. Regulatory Planning and Review

Executive Orders 12866 and 13563 direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits. This NPRM has not been designated a ''significant regulatory action,'' under section 3(f) of Executive Order 12866, as amended by Executive Order 14094 (Modernizing Regulatory Review). Accordingly, the NPRM has not been reviewed by the Office of Management and Budget (OMB).

This regulatory action determination is based on the size, location, duration, and time-of-day of the safety zone. Vessel traffic would be able to safely transit this stretch of waterways before and after the implementation of the safety zone which would impact a small designated area of the Tennessee River for less than 2 hours during the night when vessel traffic is normally low. Moreover, the Coast Guard would issue a Broadcast Notice to Mariners via VHF–FM marine channel 16 about the zone, and the rule would allow vessels to seek permission to enter the zone.

B. Impact on Small Entities

The Regulatory Flexibility Act of 1980, 5 U.S.C. 601–612, as amended, requires Federal agencies to consider the potential impact of regulations on small entities during rulemaking. The term ''small entities'' comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000. The Coast Guard certifies under 5 U.S.C. 605(b) that this proposed rule would not have a significant economic impact on a substantial number of small entities.

While some owners or operators of vessels intending to transit the safety zone may be small entities, for the reasons stated in section IV.A above, this proposed rule would not have a significant economic impact on any vessel owner or operator.

If you think that your business, organization, or governmental jurisdiction qualifies as a small entity and that this proposed rule would have a significant economic impact on it, please submit a comment (see

ADDRESSES) explaining why you think it qualifies and how and to what degree this rule would economically affect it.

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we want to assist small entities in understanding this proposed rule. If the proposed rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please call or email the person listed in the **FOR FURTHER INFORMATION CONTACT** section. The Coast Guard will not retaliate against small entities that question or complain about this proposed rule or any policy or action of the Coast Guard.

C. Collection of Information

This proposed rule would not call for a new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

D. Federalism and Indian Tribal Governments

A rule has implications for federalism under Executive Order 13132 (Federalism), if it has a substantial direct effect on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this proposed rule under that Order and have determined that it is consistent with the fundamental federalism principles and preemption requirements described in Executive Order 13132.

Also, this proposed rule does not have tribal implications under Executive Order 13175 (Consultation and Coordination with Indian Tribal Governments) because it would not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes. If you believe this proposed rule has implications for federalism or Indian tribes, please call or email the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

E. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 (adjusted for inflation) or more in any one year. Though this proposed rule would not result in such an expenditure, we do discuss the potential effects of this proposed rule elsewhere in this preamble.

F. Environment

We have analyzed this proposed rule under Department of Homeland Security Directive 023–01, Rev. 1, associated implementing instructions, and Environmental Planning COMDTINST 5090.1 (series), which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (42 U.S.C. 4321–4370f), and have made a preliminary determination that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This proposed rule involves a safety zone lasting 2 hours that would prohibit entry within 1 mile of a fireworks launch site. Normally such actions are categorically excluded from further review under paragraph L60(a) of Appendix A, Table 1 of DHS Instruction Manual 023–01–001–01, Rev. 1. A preliminary Record of Environmental Consideration supporting this determination is available in the docket. For instructions on locating the docket, see the **ADDRESSES** section of this preamble. We seek any comments or information that may lead to the discovery of a significant environmental impact from this proposed rule.

G. Protest Activities

The Coast Guard respects the First Amendment rights of protesters. Protesters are asked to call or email the person listed in the **FOR FURTHER INFORMATION CONTACT** section to coordinate protest activities so that your message can be received without jeopardizing the safety or security of people, places, or vessels.

V. Public Participation and Request for Comments

We view public participation as essential to effective rulemaking and will consider all comments and material received during the comment period. Your comment can help shape the outcome of this rulemaking. If you submit a comment, please include the docket number for this rulemaking, indicate the specific section of this document to which each comment applies, and provide a reason for each suggestion or recommendation.

Submitting comments. We encourage you to submit comments through the Federal Decision-Making Portal at *https://www.regulations.gov.* To do so, go to *https://www.regulations.gov,* type USCG–2024–0259 in the search box and click ''Search.'' Next, look for this document in the Search Results column, and click on it. Then click on the Comment option. If you cannot submit your material by using *https://www.regulations.gov,* call or email the person in the **FOR FURTHER INFORMATION CONTACT** section of this proposed rule for alternate instructions.

Viewing material in docket. To view documents mentioned in this proposed rule as being available in the docket, find the docket as described in the previous paragraph, and then select ''Supporting & Related Material'' in the Document Type column. Public comments will also be placed in our online docket and can be viewed by following instructions on the *https://www.regulations.gov* Frequently Asked Questions web page. Also, if you click on the Dockets tab and then the proposed rule, you should see a ''Subscribe'' option for email alerts. The option will notify you when comments are posted, or a final rule is published.

We review all comments received, but we will only post comments that address the topic of the proposed rule. We may choose not to post off-topic, inappropriate, or duplicate comments that we receive.

Personal information. We accept anonymous comments. Comments we post to *https://www.regulations.gov* will include any personal information you have provided. For more about privacy and submissions to the docket in response to this document, see DHS's eRulemaking System of Records notice (85 FR 14226, March 11, 2020).

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Reporting and recordkeeping requirements, Security measures, Waterways.

For the reasons discussed in the preamble, the Coast Guard is proposing to amend 33 CFR part 165 as follows:

PART 165—REGULATED NAVIGATION AREAS AND LIMITED ACCESS AREAS

■ 1. The authority citation for part 165 continues to read as follows:

Authority: 46 U.S.C. 70034, 70051, 70124; 33 CFR 1.05–1, 6.04–1, 6.04–6, and 160.5; Department of Homeland Security Delegation No. 00170.1, Revision No. 01.3.

■ 2. Add § 165.T08–0259 to read as follows:

§ 165.T08–0259 Safety Zone; Tennessee River, Saltillo, TN.

(a) *Location.* The following area is a safety zone: all navigable waters of the

Tennessee River from Mile Markers 169 to 171.

(b) *Enforcement period.* This section will be enforced from 8 p.m. to 10 p.m. on July 4, 2024.

(c) *Regulations.* (1) According to the general regulations in § 165.23 of this part, entry into this temporary safety zone is prohibited unless authorized by the Captain of the Port Sector Ohio Valley (COTP) or a designated representative.

(2) Persons or vessels seeking to enter the safety zone must request permission from the COTP on VHF–FM channel 16 (156.8 MHz) or by telephone at 361–939–0450.

(3) If permission is granted, all persons and vessels shall comply with the instructions of the COTP or designated representative.

(d) *Information broadcasts.* The COTP or a designated representative will inform the public of the enforcement times and date for this safety zone through Broadcast Notices to Mariners, Local Notices to Mariners, and/or Safety Marine Information Broadcasts, as appropriate.

Dated: April 23, 2024.

H.R. Mattern,

Captain, U.S. Coast Guard, Captain of the Port Sector Ohio Valley.

BILLING CODE 9110–04–P

DEPARTMENT OF COMMERCE

Patent and Trademark Office

37 CFR Part 1

[Docket No. PTO–P–2024–0003]

RIN 0651–AD76

Terminal Disclaimer Practice To Obviate Nonstatutory Double Patenting

AGENCY: United States Patent and Trademark Office, Department of Commerce.

ACTION: Notice of proposed rulemaking.

SUMMARY: The USPTO proposes to amend the rules of practice to add a new requirement for an acceptable terminal disclaimer that is filed to obviate (that is, overcome) nonstatutory double patenting. The proposed rule change would require terminal disclaimers filed to obviate nonstatutory double patenting to include an agreement by the disclaimant that the patent in which the terminal disclaimer is filed, or any patent granted on an application in which a terminal disclaimer is filed, will be enforceable only if the patent is not tied and has never been tied directly or indirectly to a patent by one or more terminal disclaimers filed to obviate nonstatutory double patenting in which: any claim has been finally held unpatentable or invalid as anticipated or obvious by a Federal court in a civil action or by the USPTO, and all appeal rights have been exhausted; or a statutory disclaimer of a claim is filed after any challenge based on anticipation or obviousness to that claim has been made. This action is being taken to prevent multiple patents directed to obvious variants of an invention from potentially deterring competition and to promote innovation and competition by allowing a competitor to avoid enforcement of patents tied by one or more terminal disclaimers to another patent having a claim finally held unpatentable or invalid over prior art.

DATES: Comments must be received by July 9, 2024 to ensure consideration.

ADDRESSES: For reasons of government efficiency, comments must be submitted through the Federal eRulemaking Portal at *www.regulations.gov.* To submit comments via the portal, one should enter docket number PTO–P–2024–0003 on the homepage and click ''search.'' The site will provide search results listing all documents associated with this docket. Commenters can find a reference to this proposed rule and click on the ''Comment'' icon, complete the required fields, and enter or attach their comments. Attachments to electronic comments will be accepted in Adobe® portable document format (PDF) or Microsoft Word® format. Because comments will be made available for public inspection, information that the submitter does not desire to make public, such as an address or phone number, should not be included in the comments.

Visit the Federal eRulemaking Portal for additional instructions on providing comments via the portal. If electronic submission of or access to comments is not feasible due to a lack of access to a computer and/or the internet, please contact the USPTO using the contact information below for special instructions.

FOR FURTHER INFORMATION CONTACT: Susy Tsang-Foster, Senior Legal Advisor, Office of Patent Legal Administration, at 571–272–7711; or Nicholas Hill, Legal Advisor, Office of Patent Legal Administration, at 571–270–1485.

SUPPLEMENTARY INFORMATION: Under U.S. law, a person is entitled to a patent, absent certain exceptions, for an invention that is new and not obvious as of the effective filing date of the claimed invention. Because a patent owner may file continuing applications and obtain follow-on patents with claims that have the same effective filing date as those of the original patent, patent owners may pursue multiple patents with claims that vary in only minor ways from each other. A patent owner may also, under certain circumstances (for example, when two applications are filed on the same day), obtain patents that are not part of the same patent family for obvious variants of an invention. As a result, obviousness-type double patenting (also referred to as nonstatutory double patenting) may exist between patents and/or applications in the same patent family or in a different patent family. Under the doctrine of obviousness-type double patenting, the USPTO rejects patentably indistinct claims filed in patent applications when these applications and the applications and/or patents whose claims form the basis of the nonstatutory double patenting: (1) have the same inventive entity, at least one common (joint) inventor, a common applicant, and/or a common owner/assignee; or (2) are not commonly owned but are owned by parties to a joint research agreement.

Under current practice, a patent applicant or patent owner (also referred to as a patentee) may, in most instances, obviate nonstatutory double patenting by filing a terminal disclaimer meeting the requirements of 37 CFR 1.321(c) or (d). A terminal disclaimer will ensure that the term of the patent with the terminal disclaimer will not extend beyond the term of the patent forming the basis of the nonstatutory double patenting. To prevent the harassment of an alleged infringer by multiple parties, under current 37 CFR 1.321(c) or (d) a terminal disclaimer must state that the patent in which the terminal disclaimer is filed shall be enforceable only for and during the period that the patent is commonly owned, or commonly enforced, with the patent which formed the basis for the nonstatutory double patenting.

Even with the protections currently provided by a terminal disclaimer, multiple patents tied by terminal disclaimers that are directed to obvious variants of an invention could deter competition due to the prohibitive cost of challenging each patent separately in litigation or administrative proceedings.

Currently, a terminal disclaimer filed to obviate nonstatutory double patenting over a conflicting patent must include a disclaimer of term, if any, extending beyond the term of the conflicting patent and a common ownership or common enforcement agreement. Under

the proposed rule, the USPTO will not issue a patent to a common owner or inventor with a claim that conflicts with a claim of a second patent unless the terminal disclaimer includes an additional agreement that the patent with the terminal disclaimer will not be enforced if any claim of the second patent is invalidated by prior art. That means to resolve a dispute where there are multiple patents tied by terminal disclaimers, competitors could focus on addressing the validity of the claims of a single patent. As is the case under current practice, a terminal disclaimer under the proposed rule would be unidirectional, encumbering only the patent with the terminal disclaimer and not the conflicting patent. The reason for this is that a terminal disclaimer is signed only by the owner of the patent with the terminal disclaimer, and that patent and the conflicting patent might not be commonly owned when the terminal disclaimer is filed. See 35 U.S.C. 253 (providing for filing of a terminal disclaimer by the owner of the patent in which it is filed). The proposed rule is intended to promote competition by lowering the cost of challenging groups of patents tied by terminal disclaimers, resulting in reduced barriers to market entry and lower costs for consumers. The proposed rule furthers the objectives of Executive Order 14036 on ''Promoting Competition in the American Economy,'' 86 FR 36987 (July 14, 2021).

As an example of how the proposed rule would lower costs of challenging multiple related patents, in a litigation in which a patent owner is enforcing a patent along with several other patents that are tied by one or more terminal disclaimers to that patent, a competitor could seek to have the court narrow any validity disputes to address only that patent. Narrowing validity disputes in litigation to only one such patent could result in more focused claim construction hearings, lower litigation costs, and faster resolution. Similarly, a competitor could petition for an inter partes or post-grant review of just a single patent to which multiple patents are tied by one or more terminal disclaimers with the proposed agreement. The outcome of the post-grant challenge to the claims in the selected patent may also resolve the enforceability of the multiple patents tied to that selected patent. Because only one patent can be challenged per post-grant petition, the proposed terminal disclaimer rule would lower the cost of administrative proceedings by enabling a challenger to seek the freedom to operate through the review of only one patent, as opposed to seeking the review of a number of patents claiming obvious variants of a single invention.

I. Background

A. Request for Comments on Whether Any Changes Need To Be Made to the Patent System Regarding Nonstatutory Double Patenting

In a recent request for comments, the USPTO sought public input on whether changes are needed in terminal disclaimer practice to help ensure that the U.S. patent system properly and adequately protects innovation while not unnecessarily harming competition. *See Request for Comments on USPTO Initiatives To Ensure the Robustness and Reliability of Patent Rights,* 87 FR 60130 (October 4, 2022) (''Request for Comments''). In the Request for Comments, the USPTO recognized that existing practice may not adequately address concerns that multiple patents directed to obvious variants of an invention could deter competition if the number of patents is prohibitively expensive to challenge in post-grant proceedings before the PTAB or in district court. To address this issue, the Request for Comments asked whether applicants seeking patents on obvious variations to prior claims should be required to stipulate that the claims are not patentably distinct from the previously considered claims as a condition of filing a terminal disclaimer to obviate an obviousness-type double patenting rejection. The Request for Comments also recognized that, under current practice, patents tied together with a terminal disclaimer after an obviousness-type double patenting rejection must be separately challenged on validity grounds. The Request for Comments asked whether the filing of a terminal disclaimer in these patents should be an admission of obviousness and, if so, whether the patents, when their validity is challenged after issuance, should stand and fall together.

The USPTO received comments expressing a range of views on the questions posed in the Request for Comments. Some comments supported the stipulation requirement and the proposition that the filing of a terminal disclaimer should be an admission of obviousness such that patents tied by terminal disclaimers should stand and fall together. These include comments suggesting that a stipulation could clarify the intrinsic record or simplify subsequent litigation. Some comments stated that a stipulation or admission could reduce the cost and risk of challenging multiple duplicative patents and lower drug prices for drugs that are no longer considered innovative. Some comments also indicated that a stipulation could create an incentive for applicants to address nonstatutory double patenting questions on the merits and that this would encourage innovators to create more inventions, stimulating investment into innovation.

Other comments opposed the stipulation requirement and the proposition that the filing of a terminal disclaimer should be an admission of obviousness such that patents tied by terminal disclaimers should stand and fall together. These include comments asserting that the decision of whether to file a terminal disclaimer is often driven by a desire to expedite prosecution and reduce costs rather than by the merits of the nonstatutory double patenting rejection, that a stipulation requirement would cause delays and increase burdens on applicants, and/or that a stipulation requirement would encourage applicants to file a large number of claims in a single application. Comments opposed to treating the filing of a terminal disclaimer as an admission of obviousness include comments citing *SimpleAir, Inc.* v. *Google LLC,* 884 F.3d 1160 (Fed. Cir. 2018), or earlier Federal Circuit cases, for the proposition that a terminal disclaimer should not be considered an admission or give rise to a presumption/estoppel. Comments opposing the changes in terminal disclaimer practice discussed in the Request for Comments also include comments asserting the following: validity is determined on a claim-by-claim basis; claims are presumed valid under 35 U.S.C. 282; the fact that prior art invalidates a claim in one of two patents tied together by a terminal disclaimer does not necessarily mean that the same prior art would invalidate a claim in the other patent; and/or these changes raise questions of due process and fairness.

In addition, some comments broadly opposed any changes to terminal disclaimer practice. Commenters were concerned that such changes would increase the burden on applicants. Some commenters asserted that the stipulation requirement described in the Request for Comments would be a substantive rule that the USPTO does not have authority to make.

Upon consideration of the comments, the USPTO has opted not to propose a rule requiring a stipulation that the claims are not patentably distinct or an agreement by the disclaimant that filing a terminal disclaimer is an admission of obviousness. The proposed rule does not concern the validity of claims.

Instead, the proposed rule would require an agreement by the disclaimant that the patent with the terminal disclaimer will be enforced only under certain conditions. To the extent an applicant believes claims are patentably distinct, they may either challenge the rejection or move those claims to an application in which a terminal disclaimer has not been, and will not be, filed. A rule requiring that terminal disclaimers filed to obviate nonstatutory double patenting include language placing conditions upon enforcement was previously upheld as within the USPTO's rulemaking authority. See *In re Van Ornum,* 686 F.2d 937 (CCPA 1982).

B. Current Practice

Nonstatutory double patenting may be obviated, in most instances, by filing a terminal disclaimer. The terminal disclaimer will ensure that the term of the patent with the terminal disclaimer will not extend beyond the term of the patent forming the basis of the nonstatutory double patenting. In addition, the enforcement provision of the terminal disclaimer will prevent the harassment of an alleged infringer by multiple parties. Under current USPTO regulations, two types of terminal disclaimers may be used to obviate nonstatutory double patenting. The first type is filed pursuant to 37 CFR 1.321(c) and must include a provision that the patent in which the terminal disclaimer is filed (that is, the subject patent) or any patent granted on the application in which the terminal disclaimer is filed (that is, any patent granted on the subject application) shall be enforceable only for and during the period that the subject patent or any patent granted on the subject application is commonly owned with the reference patent or any patent granted on the reference application which formed the basis for the nonstatutory double patenting. The second type is filed pursuant to 37 CFR 1.321(d) and must include a provision that the subject patent or any patent granted on the subject application shall be enforceable only for and during such period that the subject patent or any patent granted on the subject application and the reference patent or any patent granted on the reference application which formed the basis for the nonstatutory double patenting are not separately enforced. The second type obviates nonstatutory double patenting based on a non-commonly owned reference patent or application that is excepted or disqualified as prior art as a result of the subject matter of the reference patent or application and the claimed invention in the subject patent or application being treated as commonly owned on the basis of a joint research agreement.

Currently, claims in patents tied by a terminal disclaimer filed under 37 CFR 1.321(c) or (d) to obviate nonstatutory double patenting must be separately challenged on validity grounds. See 35 U.S.C. 282(a); see also *SimpleAir, Inc.* v. *Google LLC,* 884 F.3d 1160, 1167–68 (Fed. Cir. 2018) (''[O]ur cases foreclose the inference that filing a terminal disclaimer functions as an admission regarding the patentability of the resulting claims.''); *Motionless Keyboard Co.* v. *Microsoft Corp.,* 486 F.3d 1376, 1385 (Fed. Cir. 2007) (''A terminal disclaimer simply is not an admission that a later-filed invention is obvious.''); *Ortho Pharm. Corp.* v. *Smith,* 959 F.2d 936, 941 (Fed. Cir. 1992) (rejecting the argument that the patent applicant admitted to obviousness-type double patenting by filing a terminal disclaimer); *Quad Envtl. Techs. Corp.* v. *Union Sanitary Dist.,* 946 F.2d 870, 874 (Fed. Cir. 1991) (''[T]he filing of a terminal disclaimer simply serves the statutory function of removing the rejection of double patenting, and raises neither presumption nor estoppel on the merits of the rejection.''). The current state of the law exposes competitors attempting to enter the market to potentially high costs because they may have to defend against patents to obvious variants of a single invention despite the presence of terminal disclaimers.

II. Proposed Changes

A. Changes to Current Practice

The USPTO proposes to revise the enforcement provisions in 37 CFR 1.321(c) and (d) to require that a terminal disclaimer filed to obviate nonstatutory double patenting include an agreement by the disclaimant that the subject patent or any patent granted on the subject application shall be enforceable only if the patent is not tied and has never been tied directly or indirectly to a patent by one or more terminal disclaimers filed to obviate nonstatutory double patenting in which: (1) any claim has been finally held unpatentable or invalid under 35 U.S.C. 102 or 103 (statutory provisions for anticipation or obviousness as referred to in the **SUMMARY** above) by a Federal court in a civil action or by the USPTO, and all appeal rights have been exhausted; or (2) a statutory disclaimer of a claim is filed after any challenge based on 35 U.S.C. 102 or 103 to that claim has been made. The new requirement for a terminal disclaimer in this proposed rule differs from the stipulation described in the Request for Comments discussed above. See 87 FR at 60134. Specifically, the proposed rule does not require an applicant or a patentee to make a statement in the terminal disclaimer regarding conflicting claims being patentably indistinct. The new requirement has the likely advantages of reducing litigation and administrative proceeding costs and increasing predictability compared with the stipulation requirement in the Request for Comments because a comparison of claims is not necessary to determine which claims are subject to a stipulation (or an agreement), including claims that are amended during prosecution after the terminal disclaimer is filed. The proposed agreement would not affect the validity of the claims in the subject patent or any patent granted on the subject application because it is a voluntary agreement by the patentee that the patent with the terminal disclaimer will be enforceable only under certain conditions and does not touch on the validity of the claims. The new requirement solves the current problem of requiring a competitor to invalidate multiple patents tied by terminal disclaimers in order to have the freedom to operate. To the extent an applicant believes claims are patentably distinct, they may either challenge the rejection or move those claims to an application in which a terminal disclaimer has not been, and will not be, filed.

(1) Meaning of Direct and Indirect Tying

a. Direct Tying—By One Terminal Disclaimer

The subject patent or any patent granted on the subject application is tied directly by a terminal disclaimer to another patent when: (1) the terminal disclaimer is filed in the subject patent or application; and (2) the other patent, or the application that issued as the other patent, is the reference patent or application identified in the terminal disclaimer. The tying by a terminal disclaimer is unidirectional and is effective only for the patent with the terminal disclaimer. Therefore, a terminal disclaimer that directly ties a subject patent or any patent granted on a subject application to a reference patent or any patent granted on a reference application does not directly tie the reference patent or any patent granted on the reference application to the subject patent or any patent granted on the subject application. Direct tying is illustrated by example 1 in section (II)(A)(3) below.

If timely requested, a recorded terminal disclaimer may be withdrawn

before the application in which it is filed issues as a patent, or if a terminal disclaimer is filed in a reexamination proceeding, before the reexamination certificate issues. See section 1490, subsection VIII of the Manual of Patent Examining Procedure (MPEP) (Ninth Edition, Revision 07.2022, February 2023). After a patent or reexamination certificate issues, a recorded terminal disclaimer will not be nullified. *Id.* For a terminal disclaimer filed in a patent, the recorded terminal disclaimer is considered part of the original patent. See 35 U.S.C. 253(b) and 37 CFR 1.321(a). By contrast, a terminal disclaimer filed in a reexamination proceeding is a proposed amendment to the patent that does not take effect until the reexamination certificate issues. See MPEP 2288.

Where a terminal disclaimer is filed in an application, if the terminal disclaimer is withdrawn before a patent issues from the application, then the patent containing the withdrawn terminal disclaimer is not tied and has never been tied to the patent identified in the withdrawn terminal disclaimer (or to any patent granted on the application identified in the withdrawn terminal disclaimer).

b. Indirect Tying—By Two or More Terminal Disclaimers

The subject patent or any patent granted on the subject application is tied indirectly by two terminal disclaimers to another patent when: (1) a terminal disclaimer filed in the subject patent or application identifies an intermediate patent/application as the reference patent or application; and (2) a terminal disclaimer filed in the intermediate patent/application identifies the other patent, or the application that issued as the other patent, as the reference patent or application. This is illustrated by example 2 in section (II)(A)(3) below.

As discussed above with respect to direct tying, terminal disclaimers may be withdrawn from an application in certain circumstances. The following four illustrations show the effect on tying of withdrawing a terminal disclaimer from an intermediate application where a terminal disclaimer is also filed in a subject application.

(1) Where the terminal disclaimer filed in the intermediate application identifies the other patent and is withdrawn *before* a patent is granted on the subject application, the patent granted on the subject application was never tied indirectly to the other patent.

(2) Where the terminal disclaimer filed in the intermediate application identifies the other patent and is withdrawn *after* a patent is granted on the subject application, the indirect tying to the other patent is undone but the patent granted on the subject application was at one point tied indirectly to the other patent.

(3) Where the terminal disclaimer filed in the intermediate application identifies the application that later issues as the other patent and is withdrawn *before* a patent is granted on the subject application or *before* the other patent issues, the patent granted on the subject application was never tied indirectly to the other patent.

(4) Where the terminal disclaimer filed in the intermediate application identifies the application that later issues as the other patent and is withdrawn *after* a patent is granted on the subject application and *after* the other patent issues, the indirect tying to the other patent is undone but the patent granted on the subject application was at one point tied indirectly to the other patent.

Tying by more than two terminal disclaimers is illustrated by example 3 in section (II)(A)(3) below.

(2) Meaning of ''A Claim Has Been Finally Held Unpatentable or Invalid''

The term ''finally held unpatentable'' refers to a final determination by the USPTO in a trial established by the Leahy-Smith America Invents Act (AIA) (Pub. L. 112–29 (2011)) or a reexamination proceeding that one or more claims in a patent are unpatentable after all appeals have been concluded or appeal rights exhausted. The term ''finally held . . . invalid'' relates to a final decision entered in a Federal court in a civil action holding one or more claims of a patent invalid after all appeals have been concluded or appeal rights exhausted. The proposed agreement is independent of the relative timing of the terminal disclaimer and the final holding of unpatentability or invalidity over prior art. Additionally, the proposed agreement cannot be avoided by filing a statutory disclaimer of a claim under 35 U.S.C. 253(a) after any challenge based on 35 U.S.C. 102 or 103 to that claim has been made.

(3) Examples

The following examples illustrate the meaning of: (1) direct and indirect tying in the proposed rule, and (2) the possible consequences of the agreement in the proposed rule.

In the examples, all terminal disclaimers include the agreement in the proposed rule and are filed to obviate nonstatutory double patenting, unless otherwise noted.

A single capital letter identifies both an application and any patent that issues from that application, with the letter ''A'' in parentheses used to identify the application and the letter ''P'' in parentheses used to identify the patent. Thus, X(P) is any patent that has issued from application X(A).

An arrow represents a terminal disclaimer filed to obviate nonstatutory double patenting. The arrow starts at the subject patent or application and points toward the reference patent or application.

The patents and applications in these examples may be in the same patent family or in a different patent family.

The enumeration of the terminal disclaimers using terms such as ''first,'' ''second,'' etc. does not refer to when the terminal disclaimers are filed but is instead used for identification purposes.

Example 1

The subject patent or any patent granted on the subject application is tied directly to the reference patent or any patent granted on the reference application by a terminal disclaimer filed in the subject patent or application to obviate nonstatutory double patenting based on the reference patent or application.

Thus, if a terminal disclaimer is filed in X(P) or X(A) identifying W(P) or W(A) as a reference patent or application, then X(P) is tied directly to W(P). Example 1 may be represented visually as:

$W \leftarrow X$

The tying by a terminal disclaimer is unidirectional. Therefore, in this example, W(P) is not tied to X(P) by the terminal disclaimer filed in X.

In this example, X(P) is the subject patent or any patent granted on the subject application, and W(P) is the reference patent or any patent granted on the reference application. As a result, if a claim of W(P) is finally held unpatentable or invalid over prior art, X(P) may not be enforced. However, if a claim of X(P) is finally held unpatentable or invalid over prior art, W(P) may still be enforced because a terminal disclaimer with the agreement in the proposed rule was not filed in W identifying X as a reference patent or application.

If the terminal disclaimer filed in X(A) is withdrawn before X(A) issues as a patent, then X(P) may be enforced even if a claim in W(P) is finally held unpatentable or invalid over prior art because X(P) was never tied to W(P).

We can further explain example 1 in practical terms. For instance, applicant overcomes a nonstatutory double

patenting rejection in application X(A) based on reference patent W(P) by filing a terminal disclaimer with the agreement in the proposed rule, thereby obtaining patent X(P). Under the current rule, both patents X(P) and W(P) may block competitors and need to be separately invalidated or licensed to gain freedom to operate. Under the proposed rule, if a claim of patent W(P) is finally held invalid or unpatentable over prior art, competitors would avoid the enforcement of patent X(P) based on the agreement in the proposed rule in the terminal disclaimer in patent X(P). However, if a claim of patent X(P) is finally held invalid or unpatentable over prior art, competitors would not be able to, solely on this basis, avoid the enforcement of patent W(P) because a terminal disclaimer containing the proposed agreement was not filed in W identifying X as a reference patent or application.

Additionally, multiple subject patents or applications may have terminal disclaimers identifying the same reference patent or application. Under the proposed rule, if a claim of the reference patent or any patent granted on the reference application is finally held invalid or unpatentable over prior art, competitors would avoid the enforcement of these multiple patents based on the proposed agreement in the terminal disclaimers filed in these patents.

Example 2

Extending example 1 (where the terminal disclaimer filed in X includes the proposed agreement), if a second terminal disclaimer is filed in Y(P) or Y(A) identifying X(P) or X(A) as a reference patent or application, then Y(P) is tied indirectly to W(P). This would be the case even if X(A) is abandoned or remains pending. Example 2 may be represented visually as:

$W \leftarrow X \leftarrow Y$

Consistent with example 1, Y(P) is tied directly to X(P), and X(P) is tied directly to W(P). In this example, X(P) or X(A), as the case may be, is an intermediate patent/application because the two terminal disclaimers tie Y(P) to W(P).

In this example, W(P) is not tied to X(P) or Y(P), and X(P) is not tied to Y(P).

In this example, Y(P) is a subject patent or any patent granted on a subject application for the terminal disclaimer filed in Y, and W(P) is a reference patent or any patent granted on a reference application for the terminal disclaimer filed in X. In this example, X is an intermediate patent/application that is the reference patent or application for the terminal disclaimer filed in Y and the subject patent or application for the terminal disclaimer filed in X. As a result, if a claim of W(P) is finally held unpatentable or invalid over prior art, and the terminal disclaimer in Y(P) contains the proposed agreement, Y(P) may not be enforced.

As in example 1, if a claim of W(P) is finally held unpatentable or invalid over prior art, X(P) may not be enforced. Similarly, if a claim of X(P) is finally held unpatentable or invalid over prior art, Y(P) may not be enforced.

If the terminal disclaimer filed in X(A) identifying W(P) is withdrawn before Y(A) issues as a patent, then Y(P) would still be enforceable in the event that a claim in W(P) is finally held unpatentable or invalid over prior art because Y(P) was never tied to W(P). On the other hand, if the terminal disclaimer filed in X(A) identifying W(P) is withdrawn after Y(A) has issued as a patent, then Y(P) may not be enforced in the event that a claim in W(P) is finally held unpatentable or invalid over prior art because Y(P) was once tied to W(P).

Note that even if the terminal disclaimer filed in X did not contain the proposed agreement (because it was filed prior to the implementation of this proposed rule), Y(P) is still tied to W(P). In this situation, if a claim in W(P) is finally held unpatentable or invalid over prior art, X(P) may still be enforced (because the terminal disclaimer filed in X does not contain the proposed agreement) even though Y(P) may not be enforced.

Example 3

Indirect tying may also occur through multiple intermediate patents/applications. Extending example 2, if a third terminal disclaimer is filed in Z(P) or Z(A) identifying Y(P) or Y(A) as a reference patent or application, then Z(P) is tied indirectly to W(P). This would be the case even if X(A) and/or Y(A) are/is abandoned or remain(s) pending. Example 3 may be represented visually as:

$W \leftarrow X \leftarrow Y \leftarrow Z$

In this example, all the tying relationships of example 2 remain.

Also in this example, Z(P) is a subject patent or any patent granted on a subject application for the terminal disclaimer filed in Z, and W(P) is a reference patent or any patent granted on a reference application for the terminal disclaimer filed in X. X(P) or X(A) and Y(P) or Y(A), as the case may be, are intermediate patents/applications because the three terminal disclaimers tie Z(P) to W(P). As a result, if a claim of W(P) is finally held unpatentable or invalid over prior art and if the terminal disclaimer filed in Z(A) contains the proposed agreement, Z(P) may not be enforced.

As in example 2, if a claim of W(P) is finally held unpatentable or invalid over prior art, Y(P) and X(P) may not be enforced; if a claim of X(P) is finally held unpatentable or invalid over prior art, Y(P) and Z(P) may not be enforced; and if a claim of Y(P) is finally held unpatentable or invalid over prior art, Z(P) may not be enforced.

Example 4

This example shows three patents tied directly and indirectly by terminal disclaimers. In this example, a first terminal disclaimer is filed in X(P) or X(A) identifying W(P) or W(A) as a reference patent or application, directly tying X(P) to W(P).

$W \leftarrow X$

A second terminal disclaimer is filed in W(P) or W(A) identifying X(P) or X(A) as a reference patent or application, directly tying W(P) to X(P).

$W \leftrightarrows X$

A third terminal disclaimer is filed in Y(P) or Y(A) identifying X(P) or X(A) as a reference patent or application, directly tying Y(P) to X(P).

$W \leftrightarrows X \leftarrow Y$

A fourth terminal disclaimer is filed in X(P) or X(A) identifying Y(P) or Y(A) as a reference patent or application, directly tying X(P) to Y(P).

$W \leftrightarrows X \leftrightarrows Y$

A fifth terminal disclaimer is filed in Y(P) or Y(A) identifying W(P) or W(A) as a reference patent or application, directly tying Y(P) to W(P).

$W \leftarrow Y$

A sixth terminal disclaimer is filed in W(P) or W(A) identifying Y(P) or Y(A) as a reference patent or application, directly tying W(P) to Y(P).

$W \leftrightarrows Y$

Example 4 may be represented visually as:

$W \leftrightarrows X \leftrightarrows Y$ and $W \leftrightarrows Y$

In this example, in addition to W(P), X(P), and Y(P) each being directly tied to one another, they each are indirectly tied to one another. As a result, if a claim in any one of W(P), X(P), or Y(P) is finally held unpatentable or invalid over prior art and if the terminal disclaimers filed in W, X, and Y contain the proposed agreement, the other two patents may not be enforced.

Example 5

The following example illustrates two patents that are not indirectly tied by

terminal disclaimers even though each has a terminal disclaimer identifying the same reference patent or application, due to the unidirectionality of tying by a terminal disclaimer.

In this example, a first terminal disclaimer is filed in X(P) or X(A) identifying Y(P) or Y(A) as a reference patent or application, and a second terminal disclaimer is filed in Z(P) or Z(A) identifying Y(P) or Y(A) as a reference patent or application. Example 5 may be represented visually as:

$X \rightarrow Y \leftarrow Z$

In this example, X(P) and Z(P) are both tied directly to Y(P). As a result, if a claim in Y(P) is finally held unpatentable or invalid over prior art and if the proposed agreement is contained in the terminal disclaimers filed in X and Z, X(P) and Z(P) cannot be enforced.

However, Z(P) is not tied to X(P), X(P) is not tied to Z(P), and Y(P) is not tied to either X(P) or Z(P). Thus, if a claim in X(P) or Z(P) is finally held unpatentable or invalid over prior art, there is no effect on whether the other two patents may be enforced.

(4) Ways To Address Nonstatutory Double Patenting

To obviate nonstatutory double patenting, patent owners and applicants can voluntarily file a terminal disclaimer with the proposed agreement. If applicants and patent owners are concerned about the new requirement and seek to avoid the consequences of the proposed agreement, applicants and patent owners have the option of not filing a terminal disclaimer with the proposed agreement. The nonstatutory double patenting may be dealt with in a number of ways.

An applicant facing a nonstatutory double patenting rejection in an application has a number of options to avoid filing a terminal disclaimer with the proposed agreement such as:

(1) combining the conflicting claims into a single application,

(2) canceling or amending any conflicting claims in the application or in the other application containing the conflicting claims that formed the basis of the nonstatutory double patenting,

(3) arguing that rejected claims in the application are patentably distinct from the claims of the reference patent or application, or

(4) filing a reissue application of the patent whose claims formed the basis of the nonstatutory double patenting in order to add canceled conflicting claims from the application into the reissue application, provided that the added claims do not introduce new matter into the reissue application.

Alternatively, an applicant may separate the patentably distinct claims into another application and file a terminal disclaimer with the proposed agreement in the application with the indistinct claims.

If the applicant amends the claims after the filing of the terminal disclaimer such that the claims no longer conflict with the claims in the reference patent or application, the applicant may file a petition under 37 CFR 1.182 to withdraw the terminal disclaimer prior to the issuance of the application to avoid the effect of the proposed agreement on patentably distinct claims and any potential loss of patent term. As discussed above, after patent grant, a recorded terminal disclaimer will not be withdrawn. See MPEP 1490, subsection VIII.

B. Changes Consistent With Current Practice

(1) Who May File a Disclaimer

The proposed rule makes no change to who may file a terminal disclaimer. Consistent with 35 U.S.C. 253, the USPTO proposes to refer to the party with the ownership interest making the disclaimer in 37 CFR 1.321 as the ''disclaimant'' rather than the patentee, applicant, assignee, or grantee as currently prescribed in the regulations.

(2) Clarify That a Terminal Disclaimer Can Be Filed in a Patent To Obviate Nonstatutory Double Patenting

Current 37 CFR 1.321(c) and (d) state that a terminal disclaimer may be filed in an application or in a reexamination proceeding but do not explicitly state that the terminal disclaimer to obviate nonstatutory double patenting can be filed in a patent not subject to a reexamination proceeding. Consistent with the guidance set forth in the MPEP, a terminal disclaimer may be filed in a patent under 37 CFR 1.321(c) or (d) that is not subject to a reexamination proceeding. See MPEP 1490, subsection II. Proposed 37 CFR 1.321(c) and (d) are amended to explicitly state that a terminal disclaimer may be filed in a patent to obviate nonstatutory double patenting.

(3) Changes To Reflect Current Terminology in the MPEP

Consistent with current usage in the MPEP (see, for example, chapters 800 and 1400), the USPTO proposes the following changes in 37 CFR 1.321: (1) replace ''judicially created double patenting'' with the phrase ''nonstatutory double patenting,'' (2) refer to the patent in which a terminal disclaimer is filed and the patent subject to a reexamination proceeding in which the terminal disclaimer is filed as the ''subject patent,'' (3) refer to the application in which a terminal disclaimer is filed as the ''subject application,'' and (4) refer to the patent or application forming the basis for the nonstatutory double patenting as the ''reference patent or application.''

(4) Changes To Conform With Current Language in the MPEP

MPEP 1490, subsection VII, provides examples of acceptable terminal disclaimer language to use for terminal disclaimers filed under 37 CFR 1.321(c) or (d). In a few of the examples, the language states that the patentee/applicant agrees to the enforcement provision of current 37 CFR 1.321(c)(3) or (d)(3). Consistent with this guidance set forth in the MPEP, the USPTO proposes to amend 37 CFR 1.321(c)(3) and (d)(3) by adding ''agreeing'' in the enforcement provision.

III. Discussion of Proposed Rules

The following is a discussion of proposed amendments to 37 CFR part 1:

The USPTO proposes to amend § 1.321(a) and (b) by replacing ''grantee'' with ''disclaimant.''

The USPTO proposes to amend § 1.321(a)(3) by replacing ''patentee's ownership interest'' with ''the disclaimant's ownership interest.''

The USPTO proposes to amend § 1.321(b)(1) by redesignating current § 1.321(b)(1) as § 1.321(b)(1)(i) and adding new subparagraph § 1.321(b)(1)(ii) to incorporate the requirements of § 1.321(b)(1) in effect on September 15, 2012. This proposal eliminates the need for the public to consult § 1.321 in effect on September 15, 2012, when filing a terminal disclaimer in an application filed before September 16, 2012, and makes the proposed § 1.321 applicable to all applications, regardless of their filing date. ''Inventor'' and ''applicant'' are no longer synonymous for applications filed on or after September 16, 2012. See MPEP 605 and *Changes To Implement the Inventor's Oath or Declaration Provisions of the Leahy-Smith America Invents Act,* 77 FR 48776, 48778–79 (August 14, 2012) (final rule). The term ''applicant'' in proposed § 1.321(b)(1)(i) can include an inventor(s), an assignee(s), or others with a sufficient proprietary interest, whereas the term ''applicant'' in proposed § 1.321(b)(1)(ii) refers to the inventor(s).

The USPTO proposes to amend § 1.321(b)(3) by replacing ''applicant's

ownership interest'' with ''the disclaimant's ownership interest.''

The USPTO proposes to amend § 1.321(c) by replacing ''judicially created double patenting'' with ''nonstatutory double patenting.''

Additionally, proposed § 1.321(c) would explicitly provide for the filing of a terminal disclaimer in a patent not subject to a reexamination proceeding. As is the case today, when a terminal disclaimer under proposed § 1.321(c) is filed to obviate nonstatutory double patenting in a reexamination proceeding, it should be filed in the reexamination proceeding and not in the patent file. See 37 CFR 1.321(c) and MPEP 1490, subsection III.A.

The USPTO proposes to amend § 1.321(c)(3) by adding ''agreeing,'' which is consistent with current practice (see MPEP 1490, subsection VII).

The USPTO proposes to amend § 1.321(d) to specify that the type of double patenting that may be obviated by filing a terminal disclaimer is ''nonstatutory double patenting.''

Additionally, proposed § 1.321(d) would explicitly provide for the filing of a terminal disclaimer in a patent not subject to a reexamination proceeding. As is the case today, when a terminal disclaimer under proposed § 1.321(d) is filed to obviate nonstatutory double patenting in a reexamination proceeding, it should be filed in the reexamination proceeding and not in the patent file. See 37 CFR 1.321(d) and MPEP 1490, subsection III.A.

The USPTO proposes to amend § 1.321(d)(3) by adding ''agreeing,'' which is consistent with current practice (see MPEP 1490, subsection VII).

The USPTO proposes to amend § 1.321(c), (c)(3), (d), and (d)(3) to identify the patent or application forming the basis for the nonstatutory double patenting as the ''reference patent or application.''

The USPTO proposes to amend § 1.321(c)(2), (c)(3), (d)(2), and (d)(3) to identify an application in which a terminal disclaimer is filed to obviate nonstatutory double patenting as a ''subject application'' and a patent in which a terminal disclaimer is filed to obviate nonstatutory double patenting as a ''subject patent.'' The term ''subject patent'' includes both patents that are undergoing a reexamination proceeding and patents that are not undergoing a reexamination proceeding.

The USPTO proposes to amend § 1.321(c)(3) and (d)(3) to require that a terminal disclaimer filed to obviate nonstatutory double patenting include an agreement by the disclaimant that the patent in which the terminal disclaimer is filed, or any patent granted on an application in which the terminal disclaimer is filed, will be enforceable only if the patent is not tied and has never been tied directly or indirectly to a patent by one or more terminal disclaimers filed to obviate nonstatutory double patenting in which: (1) any claim has been finally held unpatentable or invalid under 35 U.S.C. 102 or 103 in a Federal court in a civil action or at the USPTO, and all appeal rights have been exhausted; or (2) a statutory disclaimer of a claim is filed after any challenge based on 35 U.S.C. 102 or 103 to that claim has been made.

IV. Rulemaking Considerations

A. Administrative Procedure Act

The changes proposed by this rulemaking involve rules of agency practice and procedure, and/or interpretive rules, and do not require notice-and-comment rulemaking. See *Perez* v. *Mortg. Bankers Ass'n,* 575 U.S. 92, 97, 101 (2015) (explaining that interpretive rules ''advise the public of the agency's construction of the statutes and rules which it administers'' and do not require notice and comment when issued or amended); *Cooper Techs. Co.* v. *Dudas,* 536 F.3d 1330, 1336–37 (Fed. Cir. 2008) (stating that 5 U.S.C. 553, and thus 35 U.S.C. 2(b)(2)(B), do not require notice-and- comment rulemaking for ''interpretative rules, general statements of policy, or rules of agency organization, procedure, or practice''); and *JEM Broadcasting Co.* v. *F.C.C.,* 22 F.3d 320, 328 (D.C. Cir. 1994) (explaining that rules are not legislative because they do not ''foreclose effective opportunity to make one's case on the merits'').

Nevertheless, the USPTO is publishing this proposed rule for comment to seek the benefit of the public's views on the Office's proposed regulatory changes.

B. Regulatory Flexibility Act (RFA)

For the following reasons, the Senior Counsel for Regulatory and Legislative Affairs of the USPTO has certified to the Chief Counsel for Advocacy of the Small Business Administration that this rule will not have a significant economic impact on a substantial number of small entities. See 5 U.S.C. 605(b).

The USPTO is proposing to revise the enforcement provisions in § 1.321(c) and (d) to require that a terminal disclaimer filed to obviate nonstatutory double patenting include an agreement by the disclaimant that the subject patent, or any patent granted on the subject application, shall be enforceable only if the patent is not tied and has never been tied directly or indirectly to a patent by one or more terminal disclaimers filed to obviate nonstatutory double patenting: (1) in which any claim has been finally held unpatentable or invalid under 35 U.S.C. 102 or 103 by a Federal court in a civil action or by the USPTO, and all appeal rights have been exhausted; or (2) in which a statutory disclaimer of a claim is filed after any challenge based on 35 U.S.C. 102 or 103 to that claim has been made. Thus, the rulemaking does not propose to substantively change when an applicant or patent owner may file a terminal disclaimer under § 1.321.

The Small Business Administration (SBA) small business size standards that are applicable to most analyses conducted to comply with the RFA are set forth in 13 CFR 121.201. These regulations generally define small businesses as those with fewer than a specified maximum number of employees or less than a specified level of annual receipts for the entity's industrial sector or North American Industry Classification System (NAICS) code. As provided by the RFA, and after consulting with the SBA, the USPTO formally adopted an alternate size standard for the purpose of conducting an analysis or making a certification under the RFA for patent-related regulations. See *Business Size Standard for Purposes of United States Patent and Trademark Office Regulatory Flexibility Analysis for Patent-Related Regulations,* 71 FR 67109 (Nov. 20, 2006), 1313 *Off. Gaz. Pat. Office* 60 (Dec. 12, 2006). The USPTO's alternate small business size standard is SBA's previously established size standard that identifies the criteria entities must meet to be entitled to pay reduced patent fees. See 13 CFR 121.802. If patent applicants identify themselves on a patent application as qualifying for reduced patent fees, the USPTO captures this data in its patent application data repository (formerly the Patent Application Monitoring and Locating (PALM) system and now called the One Patent Service Gateway (OPSG) system), which tracks information on each patent application submitted to the Office.

Unlike the SBA small business size standards set forth in 13 CFR 121.201, the size standard for the USPTO is not industry specific. The Office's definition of a small business concern for RFA purposes is a business or other concern that: (1) meets the SBA's definition of a ''business concern or concern'' set forth in 13 CFR 121.105; and (2) meets the size standards set forth in 13 CFR 121.802 for the purpose of paying reduced patent fees, namely, an entity:

(a) whose number of employees, including affiliates, does not exceed 500 persons; and (b) which has not assigned, granted, conveyed, or licensed (and is under no obligation to do so) any rights in the invention to any person who made it and could not be classified as an independent inventor, or to any concern that would not qualify as a nonprofit organization or a small business concern under this definition. See *Business Size Standard for Purposes of United States Patent and Trademark Office Regulatory Flexibility Analysis for Patent-Related Regulations,* 71 FR at 67112 (Nov. 20, 2006), 1313 Off. Gaz. Pat. Office at 63 (Dec. 12, 2006). For purposes of this certification, the USPTO defines small entities to include entities who are paying small or micro entity fee rates at the USPTO.

The USPTO estimates that approximately 20% of applicants and patent owners (including small entity applicants and patent owners, who account for approximately 27% of patent filings) that are considering the filing of a terminal disclaimer to obviate nonstatutory double patenting will opt not to file a terminal disclaimer containing the proposed agreement, at least during an initial period after the effective date of the final rule. As mentioned earlier herein, applicants and patent owners who choose not to file a terminal disclaimer with the proposed agreement have a number of alternatives to obviate nonstatutory double patenting. The USPTO estimates that the vast majority of applicants and patent owners who choose not to file a terminal disclaimer with the proposed agreement will opt to argue and/or amend claims to obviate nonstatutory double patenting.

The number of instances in which applicants and patent owners have to obviate nonstatutory double patenting is relatively low. The USPTO issues roughly 650,000 nonfinal and final Office actions per fiscal year, of which 175,500 (or 27%) are issued to small entities. Of the 175,500 Office actions issued to small entities, approximately 14%, or approximately 24,570, contain at least one nonstatutory double patenting rejection, and approximately 4%, or approximately 7,020, contain only a nonstatutory double patenting rejection(s).

To estimate the potential impact on small entities from this proposed rulemaking, the USPTO refers to the 2023 Report of the Economic Survey, published by the Committee on Economics of Legal Practice of the American Intellectual Property Law Association, which estimates a median cost of $3,500 per Office action response.[1]

For purposes of this certification, the USPTO estimates that all of the approximately 20% of the small entity applicants and patent owners who the USPTO estimates will choose not to file a terminal disclaimer with the proposed agreement will opt to argue and/or amend claims to obviate the nonstatutory double patenting rejection(s). The USPTO therefore estimates that the proposed rulemaking could have a potential annual cost to small entities of $17,199,000 (24,570 × 20% × $3,500) for responding to an Office action containing at least one nonstatutory double patenting rejection by arguing and/or amending claims, rather by than filing a terminal disclaimer.

Furthermore, the USPTO estimates that, on the upper range, approximately 50%, or approximately 2,457 (24,570 × 20% × 50%), of the responses filed will fail to obviate at least one nonstatutory double patenting rejection. These cases may potentially incur the additional cost to small entities of $8,599,500 (2,457 × $3,500) to respond to an additional Office action. Therefore, the USPTO estimates that the upper range of cost that the proposed rulemaking could have on the approximately 20% of potentially impacted small entities is $25,798,500 ($17,199,000 + $8,599,500). The estimated cost will therefore not affect a substantial number (approximately 20%) of small entities.

For at least two reasons, the USPTO believes these estimates to represent the upper range of the potential impact on small entities. First, the preceding estimates do not account for the cost savings, including filing fee savings, from not filing a terminal disclaimer. The USPTO charges a fee of $170 for filing a terminal disclaimer. Based on the estimated 4,914 small entity applicants that opt to not file a terminal disclaimer, the USPTO estimates terminal disclaimer filing fee savings of $835,380. In addition, the USPTO estimates that it takes an estimated 0.25 hours (15 minutes) for applicants and patent owners to file a terminal disclaimer. The 2023 Report of the Economic Survey estimates an hourly attorney fee of $447. Based on the estimated 4,914 small entity applicants that opt to not file a terminal disclaimer, the USPTO estimates cost savings of $549,140. Therefore, the total cost savings for those not filing a terminal disclaimer because of the proposed rulemaking is $1,384,520.

Second, the preceding cost estimates are based on all Office actions containing at least one nonstatutory double patenting rejection, including Office actions containing at least one other rejection that is not a nonstatutory double patenting rejection. As stated above, the USPTO estimates that 7,020 Office actions contain only a nonstatutory double patenting rejection(s). Thus, in 17,550 (24,570 − 7,020) Office actions, small entity applicants and patent owners would have to respond to at least one rejection that is not a nonstatutory double patenting rejection. It therefore follows that at least some portions of the annual costs in the preceding estimates for these 17,550 Office actions should be excluded as they would be attributed to responding to those other rejection(s).

Thus, the total upper range of estimated cost to the 24,570 small entity applicants and patent owners impacted by this rule would be $24,413,980 ($25,798,500 − $1,384,520). The USPTO does not have the data to determine the distribution of this cost across the 24,570 small entity applicants and patent owners that would be impacted by this rule. Thus, for purposes of this certification, the USPTO estimates an average of less than $1,000 in impact to the 24,570 small entities. However, as mentioned above, this estimate is likely to be overstated as some of that impact would be attributed to costs related to responding to a rejection that is not a nonstatutory double patenting rejection.

For the foregoing reasons, the changes proposed in this rulemaking will not have a significant economic impact on a substantial number of small entities.

C. Executive Order 12866 (Regulatory Planning and Review)

This rulemaking has been determined to be not significant under Executive Order 12866 (September 30, 1993), as amended by Executive Order 14094 (April 6, 2023).

D. Executive Order 13563 (Improving Regulation and Regulatory Review)

The USPTO has complied with Executive Order 13563 (January 18, 2011). Specifically, and as discussed above, the USPTO has, to the extent feasible and applicable: (1) made a reasoned determination that the benefits justify the costs of the rule; (2) tailored the rule to impose the least burden on society consistent with obtaining the regulatory objectives; (3) selected a regulatory approach that maximizes net benefits; (4) specified performance

[1] This cost represents the report's median charges for services categorized as ''Application amendment/argument, relatively complex—biotech/chemical'' and ''Application amendment/argument, relatively complex—electrical/computer.''

objectives; (5) identified and assessed available alternatives; (6) involved the public in an open exchange of information and perspectives among experts in relevant disciplines, affected stakeholders in the private sector, and the public as a whole, and provided online access to the rulemaking docket; (7) attempted to promote coordination, simplification, and harmonization across government agencies and identified goals designed to promote innovation; (8) considered approaches that reduce burdens and maintain flexibility and freedom of choice for the public; and (9) ensured the objectivity of scientific and technological information and processes.

E. Executive Order 13132 (Federalism)

This rulemaking pertains strictly to Federal agency procedures and does not contain policies with federalism implications sufficient to warrant the preparation of a Federalism Assessment under Executive Order 13132 (August 4, 1999).

F. Executive Order 13175 (Tribal Consultation)

This rulemaking will not: (1) have substantial direct effects on one or more Indian Tribes; (2) impose substantial direct compliance costs on Indian Tribal governments; or (3) preempt Tribal law. Therefore, a Tribal summary impact statement is not required under Executive Order 13175 (November 6, 2000).

G. Executive Order 13211 (Energy Effects)

This rulemaking is not a significant energy action under Executive Order 13211 because this rulemaking is not likely to have a significant adverse effect on the supply, distribution, or use of energy. Therefore, a Statement of Energy Effects is not required under Executive Order 13211 (May 18, 2001).

H. Executive Order 12988 (Civil Justice Reform)

This rulemaking meets applicable standards to minimize litigation, eliminate ambiguity, and reduce burden as set forth in sections 3(a) and 3(b)(2) of Executive Order 12988 (February 5, 1996).

I. Executive Order 13045 (Protection of Children)

This rulemaking does not concern an environmental risk to health or safety that may disproportionately affect children under Executive Order 13045 (April 21, 1997).

J. Executive Order 12630 (Taking of Private Property)

This rulemaking will not affect a taking of private property or otherwise have taking implications under Executive Order 12630 (March 15, 1988).

K. Congressional Review Act

Under the Congressional Review Act provisions of the Small Business Regulatory Enforcement Fairness Act of 1996 (5 U.S.C. 801 *et seq.*), prior to issuing any final rule, the USPTO will submit a report containing the final rule and other required information to the United States Senate, the United States House of Representatives, and the Comptroller General of the Government Accountability Office. The changes proposed in this rulemaking are not expected to result in an annual effect on the economy of $100 million or more; a major increase in costs or prices; or significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic and export markets. Therefore, this rulemaking is not expected to result in a ''major rule'' as defined in 5 U.S.C. 804(2).

L. Unfunded Mandates Reform Act of 1995

The changes proposed in this rulemaking do not involve a Federal intergovernmental mandate that will result in the expenditure by State, local, and Tribal governments, in the aggregate, of $100 million (as adjusted) or more in any one year, or a Federal private sector mandate that will result in the expenditure by the private sector of $100 million (as adjusted) or more in any one year, and will not significantly or uniquely affect small governments. Therefore, no actions are necessary under the provisions of the Unfunded Mandates Reform Act of 1995. See 2 U.S.C. 1501 *et seq.*

M. National Environmental Policy Act of 1969

This rulemaking will not have any effect on the quality of the environment and is thus categorically excluded from review under the National Environmental Policy Act of 1969. See 42 U.S.C. 4321 *et seq.*

N. National Technology Transfer and Advancement Act of 1995

The requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) are not applicable because this rulemaking does not contain provisions that involve the use of technical standards.

O. Paperwork Reduction Act of 1995

The Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*) (PRA) requires that the USPTO consider the impact of paperwork and other information collection burdens imposed on the public. This rulemaking involves information collection requirements that are subject to review and approval by the Office of Management and Budget (OMB) under the Paperwork Reduction Act.

This proposed rulemaking impacts the rules of practice pertaining to terminal disclaimers. The general provisions pertaining to terminal disclaimers have been reviewed and approved by the OMB under OMB control number 0651–0031 and are accounted for under the line item Statutory Disclaimers (including terminal disclaimers) as contained in 0651–0031. In a 60-day notice published January 29, 2024 (89 FR 5500), for the renewal of 0651–0031, the USPTO provided estimates for this line item and those estimates appear below.

Under this proposed rulemaking, the USPTO proposes to modify terminal disclaimers to include the additional agreement as discussed in the preamble. The USPTO estimates that approximately 20% of applicants and patent owners that are considering the filing of a terminal disclaimer to obviate nonstatutory double patenting will opt not to file a terminal disclaimer containing the proposed agreement, at least during an initial period after the effective date of the final rule. Therefore, the USPTO proposed estimates below take into account the anticipated 20% reduction in terminal disclaimer filings.

The USPTO will be accounting for this impact in a proposed new information collection that has been submitted to the OMB. The proposed new information collection will reflect an estimated total decrease of 9,990 respondents, 2,498 burden hours and $1,698,300 in filing fees with respect to terminal disclaimers, because some applicants and patent owners will choose not to file a terminal disclaimer with the proposed agreement. A summary of the change in burden to terminal disclaimers follows. The proposed new information collection will be available at the OMB's Information Collection Review website (*www.reginfo.gov/public/do/PRAMain*).

Estimated Data Published in the 60-day Notice for 0651–0031 (January 29, 2024):

Estimated number of annual respondents for statutory disclaimers (including terminal disclaimers): 49,950.

Estimated number of annual responses for statutory disclaimers (including terminal disclaimers): 49,950.

Estimated total annual respondent burden hours for statutory disclaimers (including terminal disclaimers): 12,488.

Estimated total annual respondent hourly cost burden for statutory disclaimers (including terminal disclaimers): $5,582,136.

Estimated total annual respondent non-hourly cost burden for statutory disclaimers (including terminal disclaimers): $8,491,500 in the form of filing fees.

Proposed New Information Collection Associated with RIN 0651–AD76:

OMB control number: 0651–NEW.

Title of collection: Terminal disclaimers.

Needs and uses: The changes under proposed § 1.321 on the filing of terminal disclaimers would be used by an owner (in whole or in part) of a patent or a patent to be granted to agree that the patent in which the terminal disclaimer is filed, or any patent granted on an application in which a terminal disclaimer is filed, will be enforceable only if the patent is not tied and has never been tied directly or indirectly to a patent by one or more terminal disclaimers filed to obviate nonstatutory double patenting in which: any claim has been finally held unpatentable or invalid as anticipated or obvious by a Federal court in a civil action or by the USPTO, and all appeal rights have been exhausted; or a statutory disclaimer of a claim is filed after any challenge based on anticipation or obviousness to that claim has been made.

The changes would be used by the USPTO to ensure it does not issue a patent to a common owner or inventor with a claim that conflicts with a claim of a second patent, unless the terminal disclaimer includes the additional agreement that the patent with the terminal disclaimer will not be enforced if any claim of the second patent is invalidated by prior art.

The changes would be used by the public to focus on addressing the validity of the claims of a single patent to resolve a dispute where there are multiple patents tied by terminal disclaimers.

Impacted forms in this information collection:

- PTO/AIA/25 (Terminal Disclaimer to Obviate a Provisional Double Patenting Rejection Over a Pending ''Reference'' Application)
- PTO/SB/25 (Terminal Disclaimer to Obviate a Provisional Double Patenting Rejection over a Pending Second Application)
- PTO/SB/25a (Terminal Disclaimer in a Patent or Proceeding in view of an Application)
- PTO/AIA/26 (Terminal Disclaimer to Obviate a Double Patenting Rejection Over a ''Prior'' Patent)
- PTO/SB/26 (Terminal Disclaimer to Obviate a Double Patenting Rejection over a Prior Patent)
- PTO/SB/26a (Terminal Disclaimer in a Patent or Proceeding in view of Another Patent)
- PTO/AIA/63 (Terminal Disclaimer to Accompany Petition under 37 CFR 1.137 in a Design Application Filed on or after September 16, 2012)
- PTO/SB/63 (Terminal Disclosure to Accompany Petition)

Type of review: New.

Affected public: Private Sector.

Respondent's Obligation: Required to obtain or retain benefits.

Frequency: On occasion.

Estimated number of annual respondents for statutory disclaimers (including terminal disclaimers): 39,960.

Estimated number of annual responses for statutory disclaimers (including terminal disclaimers): 39,960.

Estimated total annual respondent burden hours for statutory disclaimers (including terminal disclaimers): 9,990.

Estimated total annual respondent hourly cost burden for statutory disclaimers (including terminal disclaimers): $4,465,530.

Estimated total annual respondent non-hourly cost burden for statutory disclaimers (including terminal disclaimers): $6,793,200 in the form of filing fees.

The USPTO is soliciting public comments to:

(a) evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(b) evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information;

(c) enhance the quality, utility, and clarity of the information to be collected; and

(d) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting the electronic submission of responses.

Please submit comments on this new collection of information at *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under Review'' or by using the search function and entering the title of the collection. Please send a copy of your comments to the USPTO using the method described under **ADDRESSES** at the beginning of this document.

All comments submitted in response to this proposed rulemaking are a matter of public record. The USPTO will include or summarize the comments received in the request to the OMB to approve the new information collection requirements.

Notwithstanding any other provision of law, no person is required to respond to nor shall a person be subject to a penalty for failure to comply with a collection of information subject to the requirements of the PRA unless that collection of information displays a currently valid OMB control number.

P. E-Government Act Compliance

The USPTO is committed to compliance with the E-Government Act to promote the use of the internet and other information technologies, to provide increased opportunities for citizen access to Government information and services, and for other purposes.

List of Subjects in 37 CFR Part 1

Administrative practice and procedure, Biologics, Courts, Freedom of information, Inventions and patents, Reporting and recordkeeping requirements, Small businesses.

For the reasons stated in the preamble, the USPTO proposes to amend 37 CFR part 1 as follows:

PART 1—RULES OF PRACTICE IN PATENT CASES

■ 1. The authority citation for 37 CFR part 1 continues to read as follows:

Authority: 35 U.S.C. 2(b)(2), unless otherwise noted.

■ 2. Revise § 1.321 to read as follows:

§ 1.321 Statutory disclaimers, including terminal disclaimers.

(a) A patentee owning the whole or any sectional interest in a patent may disclaim any complete claim or claims in a patent. In like manner any patentee may disclaim or dedicate to the public the entire term, or any terminal part of the term, of the patent granted. Such disclaimer is binding upon the

disclaimant and its successors or assigns. A notice of the disclaimer is published in the Official Gazette and attached to the printed copies of the specification. The disclaimer, to be recorded in the Patent and Trademark Office, must:

(1) Be signed by the patentee, or an attorney or agent of record;

(2) Identify the patent and complete claim or claims, or term being disclaimed. A disclaimer which is not a disclaimer of a complete claim or claims, or term will be refused recordation;

(3) State the present extent of the disclaimant's ownership interest in the patent; and

(4) Be accompanied by the fee set forth in § 1.20(d).

(b) An applicant may disclaim or dedicate to the public the entire term, or any terminal part of the term, of a patent to be granted. Such terminal disclaimer is binding upon the disclaimant and its successors or assigns. The terminal disclaimer, to be recorded in the Patent and Trademark Office, must:

(1)(i) For patent applications filed under 35 U.S.C. 111(a) or 363 on or after September 16, 2012, be signed by the applicant or an attorney or agent of record; or

(ii) For patent applications filed under 35 U.S.C. 111(a) or 363 before September 16, 2012, be signed:

(A) By the applicant;

(B) If there is an assignee of record of an undivided part interest, by the applicant and such assignee;

(C) If there is an assignee of record of the entire interest, by such assignee; or

(D) By an attorney or agent of record;

(2) Specify the portion of the term of the patent being disclaimed;

(3) State the present extent of the disclaimant's ownership interest in the patent to be granted; and

(4) Be accompanied by the fee set forth in § 1.20(d).

(c) Except as provided for in paragraph (d) of this section, a terminal disclaimer, when filed in a patent, a reexamination proceeding, or a patent application to obviate nonstatutory double patenting of a claimed invention based on a reference patent or application, must:

(1) Comply with the provisions of paragraphs (b)(2) through (4) of this section;

(2) Be signed in accordance with paragraph (b)(1) of this section if filed in a patent application (the subject application) or in accordance with paragraph (a)(1) of this section if filed in a patent or in a reexamination proceeding (the subject patent); and

(3) Include a provision agreeing that the subject patent or any patent granted on the subject application shall be enforceable:

(i) Only for and during such period that the subject patent or any patent granted on the subject application is commonly owned with the reference patent or any patent granted on the reference application; and

(ii) Only if the subject patent or any patent granted on the subject application is not tied and has never been tied directly or indirectly to a patent by one or more terminal disclaimers filed to obviate nonstatutory double patenting in which:

(A) A claim has been finally held unpatentable or invalid under 35 U.S.C. 102 or 103 in a Federal court in a civil action or at the USPTO, and all appeal rights have been exhausted; or

(B) A statutory disclaimer of a claim is filed after any challenge based on 35 U.S.C. 102 or 103 to that claim has been made.

(d) A terminal disclaimer, when filed in a patent, a reexamination proceeding, or a patent application to obviate nonstatutory double patenting of a claimed invention based on a reference patent or application that is not commonly owned but was disqualified as prior art as set forth in either § 1.104(c)(4)(ii) or (c)(5)(ii) as the result of activities undertaken within the scope of a joint research agreement, must:

(1) Comply with the provisions of paragraphs (b)(2) through (4) of this section;

(2) Be signed in accordance with paragraph (b)(1) of this section if filed in a patent application (the subject application) or be signed in accordance with paragraph (a)(1) of this section if filed in a patent or in a reexamination proceeding (the subject patent); and

(3) Include a provision waiving the right to separately enforce the subject patent or any patent granted on the subject application and the reference patent or any patent granted on the reference application, and agreeing that the subject patent or any patent granted on the subject application shall be enforceable:

(i) Only for and during such period that the subject patent or any patent granted on the subject application and the reference patent or any patent granted on the reference application are not separately enforced; and

(ii) Only if the subject patent or any patent granted on the subject application is not tied and has never been tied directly or indirectly to a patent by one or more terminal disclaimers filed to obviate nonstatutory double patenting in which:

(A) A claim has been finally held unpatentable or invalid under 35 U.S.C. 102 or 103 in a Federal court in a civil action or at the USPTO, and all appeal rights have been exhausted; or

(B) A statutory disclaimer of a claim is filed after any challenge based on 35 U.S.C. 102 or 103 to that claim has been made.

Katherine K. Vidal,

Under Secretary of Commerce for Intellectual Property and Director of the United States Patent and Trademark Office.

[FR Doc. 2024–10166 Filed 5–9–24; 8:45 am]

BILLING CODE 3510–16–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 679

[Docket No. 240502–0125]

RIN 0648–BM69

Fisheries of the Exclusive Economic Zone Off Alaska; Amendment 113 to the Fishery Management Plan for the Groundfish of the Gulf of Alaska; Central Gulf of Alaska Rockfish Program Adjustments

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Proposed rule; request for comments.

SUMMARY: NMFS proposes regulations to implement amendment 113 to the Fishery Management Plan (FMP) for the Groundfish of the Gulf of Alaska (GOA). If approved, amendment 113 and this proposed rule would modify specific provisions of the Central Gulf of Alaska (CGOA) Rockfish Program (RP) to change the season start date, remove the catcher vessel (CV) cooperative holding cap, and revise the processing and harvesting caps. This action is necessary to provide increased flexibility and efficiency, and help ensure the rockfish total allowable catch (TAC) is fully harvested and landed in Kodiak while maintaining the intent of the RP. Amendment 113 is intended to promote the goals and objectives of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act), the GOA FMP, and other applicable laws.

DATES: Submit comments on or before June 10, 2024.

ADDRESSES: A plain language summary of this proposed rule is available at *https://www.regulations.gov/docket/*

NOAA-NMFS-2023-0149. You may submit comments on this document, identified by NOAA–NMFS–2023–0149, by any of the following methods:

- *Electronic Submission:* Submit all electronic public comments via the Federal e-Rulemaking Portal. Visit *https://www.regulations.gov* and type NOAA–NMFS–2023–0149 in the Search box. Click on the ''Comment'' icon, complete the required fields, and enter or attach your comments.
- *Mail:* Submit written comments to Gretchen Harrington, Assistant Regional Administrator, Sustainable Fisheries Division, Alaska Region NMFS. Mail comments to P.O. Box 21668, Juneau, AK 99802–1668.

Instructions: Comments sent by any other method, to any other address or individual, or received after the end of the comment period, may not be considered by NMFS. All comments received are a part of the public record and will generally be posted for public viewing on *https://www.regulations.gov* without change. All personal identifying information (*e.g.,* name, address, *etc.*), confidential business information, or otherwise sensitive information submitted voluntarily by the sender will be publicly accessible. NMFS will accept anonymous comments (enter ''N/A'' in the required fields if you wish to remain anonymous). Electronic copies of amendment 113 to the FMP, the Environmental Assessment and Regulatory Impact Review prepared for this action (the Analysis), and the Finding of No Significant Impact prepared for this action may be obtained from *https://www.regulations.gov* and the NMFS Alaska Region website at *https://www.fisheries.noaa.gov/region/alaska.*

Written comments regarding the burden-hour estimates or other aspects of the collection-of-information requirements contained in this proposed rule may be submitted to NMFS at the above address and to *https://www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Joel Kraski, 907–586–7228, *joel.kraski@noaa.gov.*

SUPPLEMENTARY INFORMATION:

Authority for Action

NMFS manages the groundfish fishery in the exclusive economic zone in the GOA according to the FMP for Groundfish of the Gulf of Alaska prepared by the North Pacific Fishery Management Council (Council) under authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act). Regulations governing fishing by U.S. vessels in accordance with the FMP appear at subpart H of 50 CFR part 600 and 50 CFR part 679.

A notice of availability (NOA) for amendment 113 was published in the **Federal Register** on April 4, 2024 (89 FR 23535), with comments invited through June 3, 2024. All relevant written comments received by the end of the comment period (See **DATES**), whether specifically directed to the NOA or this proposed rule, will be considered by NMFS in the approval/disapproval decision for amendment 113. Commenters do not need to submit the same comments on both the NOA and this proposed rule. Comments submitted on this proposed rule by the end of the comment period (See **DATES**) will be considered by NMFS in our decision to implement measures recommended by the Council and will be addressed in the response to comments in the final rule.

Background

Following is a description of the Central GOA Rockfish Program (RP) and the need for this proposed rule.

The Rockfish Program

This section provides a brief overview of the RP, which is a limited access privilege program (LAPP). The Council designed the RP to meet the requirements for limited access privileges in section 303A of the Magnuson-Stevens Act. The RP was developed to enhance resource conservation and improve economic efficiency in the CGOA rockfish fisheries. A detailed description of the RP and its development is provided in the preambles to the proposed and final rules implementing the RP from 2012 through 2021 (76 FR 52147, August 19, 2011 and 76 FR 81248, December 27, 2011).

Originally, the RP was developed to recognize historic participation of fishing vessels and processors. It established a set-aside for participants not eligible to participate in the Rockfish Pilot Program (RPP) and catch limits of species incidentally harvested: northern rockfish, pelagic shelf rockfish (since redefined as dusky rockfish), and Pacific ocean perch.

The RP, which includes the CGOA rockfish species of Pacific ocean perch, northern rockfish, and pelagic shelf rockfish, is based on the recognition of historical participation of fishing vessels and processors in the CGOA rockfish fisheries from 1996 to 2002. The RP provides catch limits for non-rockfish species and non-target rockfish species harvested with the CGOA rockfish species, based upon historical harvest levels of these incidentally caught species; and sets aside up to 5 percent of the TAC of the CGOA rockfish fisheries for CVs that are not eligible to participate in the program. The RP apportions TAC to cooperatives formed by individuals holding a License Limitation Program (LLP) license with rockfish quota share (QS). Fishing under cooperative management resulted in a slower-paced fishery that allowed harvesters to choose when to fish and provided greater stability for processors by spreading out production over a longer period of time.

The RP provides exclusive harvesting privileges for vessels using trawl gear to harvest a specific set of ''rockfish primary species'' and associated ''rockfish secondary species'' (defined at 50 CFR 679.2) incidentally harvested to the rockfish primary species in the CGOA, an area from 147° W long. to 159° W long. The rockfish primary species are northern rockfish, Pacific ocean perch, and dusky rockfish. The rockfish secondary species are Pacific cod, rougheye rockfish, shortraker rockfish, and sablefish. The RP also allocates a portion of the halibut bycatch mortality limit for the GOA trawl fisheries to RP participants.

Need for Amendment 113 and This Proposed Rule

In June 2022, the Council recommended that the Secretary approve amendment 113 to the GOA FMP. Amendment 113 and this proposed rule would address changes in, and potentially resolve associated impacts to, the RP fishery since the RP was reauthorized in 2021.

Cumulative changes since the start of the RP in 2012 have impacted the CGOA fisheries, resulting in difficulties harvesting and processing the CV cooperative quota (CQ), especially later in the season as processors approach the limit of their current processing cap or close for seasonal maintenance. Seasonal fishing activity is the driving force for the planning of vessels and processing staff needs. From the processors' perspective, one of the primary reasons for implementing the RP was to allow the rockfish fishery to be prosecuted prior to the start of the pink salmon fishery, which begins in July. Previous overlaps in the timing of various fisheries led to processing capacity and labor issues. Processors were unable to sustain production when overwhelmed with landings from various overlapping fisheries or were

unable to expand or shrink their production-line employee pools in association with landings. The RP's early opening date allowed excess processor capacity and labor to be utilized more efficiently. Additionally, since 2021, the CGOA flatfish market prices have declined partially due to increased foreign trade tariffs levied by China, leading to a negative financial impact on Kodiak processors due to labor planning issues and lack of sustained deliveries to keep processing crews active. Given these RP processing facility issues, the Council chose to recommend measures that would provide processors increased flexibility, as described below, and allow the RP fishery to adapt to unforeseen challenges.

Seven individual Kodiak rockfish processors, each associated with one or more cooperatives, participated in the RP from 2012 through 2014. One RP processor was acquired in 2014 by another processing company, reducing the total number RP processors to six but leaving the number of RP cooperatives unchanged. Later, in 2018, a rockfish processor ceased processing and the associated cooperative disbanded. In 2020, a merger between processors, and a third processor deciding not to take any RP deliveries, reduced the total number to four processors. In late 2023, one of the four remaining processors announced the intent to sell the rockfish processing plant located in Kodiak, which may leave 10 percent of the TAC unable to be processed, as each of the remaining three processors are limited to processing 30 percent of the TAC.

Amendment 113 and this proposed rule would also provide additional flexibility for trawl vessels to participate in the RP during April, and could keep rockfish processors fully operational, thus mitigating impacts from changes in market conditions. The change in season start date from May 1 to April 1 annually would likely help maintain processing capacity for other non-trawl fisheries through workforce stability, which was observed during the 2021 rockfish season under the emergency rule (86 FR 14851, March 19, 2021) when NMFS temporarily moved the season start date to April 1, 2021.

The term ''use cap'' or ''cap'' is the limit on the quota that can be caught or processed by participants in the RP. This proposed rule would implement the amendment 113 change to three of the RP use caps to remove constraints on the amount of CQ that can be caught or processed by participants, while still maintaining the Council's original intent of preventing consolidation and meeting the overall goal of prosecuting this fishery in a sustainable and functional manner. These changes to the FMP regulations would improve the likelihood that the TACs for the rockfish primary species and the rockfish secondary species would be fully harvested and landed in Kodiak.

In addition to providing additional flexibility to RP processors and harvesters, this proposed rule would implement the amendment 113 update to terminology in the FMP regulations for one species grouping by changing ''pelagic shelf rockfish'' to ''dusky rockfish.'' This would resolve an overlooked species grouping reference that was not completely resolved with the final rule to implement amendment 111 to the GOA FMP (86 FR 11895, March 1, 2021). This is a change in name only; it was effectively made in May 2012 during the 2012 and 2013 harvest specifications (77 FT 15194, March 14, 2012), when the GOA FMP was revised by removing widow rockfish and yellowtail rockfish from the ''pelagic shelf rockfish'' species grouping, thus leaving only dusky rockfish.

Finally, this proposed rule would revise to the regulations to allow for increased flexibility, consistency, and clarity, as described in the *Other Regulatory Changes* section below.

This Proposed Rule

Change in Rockfish Program Season Start Date

This proposed rule would change the start date for this fishery from May 1 to April 1, specified at § 679.80(a)(3)(ii) for a rockfish cooperative, to enhance flexibility for processing plants and vessel operators participating in the RP.

This proposed rule would also change associated references to RP season start dates in §§ 679.5(r)(10), 679.7(n)(3)(i), 679.7(n)(6)(vi), 679.51(a)(2)(vi)(D)(*1*), 679.81(i)(3), 679.84(g)(1), and 679.84(g)(2). The changes in § 679.5(r)(10) would add April to the reporting period of the Rockfish Ex-vessel Volume and Value Report. The changes in § 679.7(n)(3)(i) and (n)(6)(vi) would extend the requirement to use a Vessel Monitoring System (VMS) during the month of April while operating in the RP fishery. The changes in § 679.51(a)(2)(vi)(D)(*1*) would extend the observer requirements for RP from May to the month of April. The changes in §§ 679.81(i)(3), 679.84(g)(1) and 679.84(g)(2) would extend when catch of the rockfish primary species and rockfish secondary species are deducted from CQ from May to the month of April. These provisions all reference the season start date for RP and the changes in this proposed rule would make the regulations consistent with the change to the season start date and would eliminate references to the prior start date of May 1.

Remove the Catcher Vessel Cooperative Rockfish CQ Use Cap

This proposed rule would remove § 679.82(a)(3), thereby eliminating the CV cooperative rockfish CQ use cap that prevents a CV rockfish cooperative from holding or using an amount of rockfish primary species CQ during a calendar year that is greater than an amount resulting from 30.0 percent of the aggregate rockfish primary species QS initially assigned to the CV sector. Removing this use cap would allow cooperatives to reduce the administrative and management costs associated with managing the cooperatives. RP CVs are currently free to join any RP cooperative and each RP cooperative can associate with any processor, and any processor can associate with more than one cooperative. The Council determined, and NMFS agrees, that the RP's processing use cap provides the intended protection from over consolidation, as discussed below, and removing the 30 percent CV cooperative CQ cap would remove duplication and increase efficiencies for cooperatives.

Therefore, this proposed rule would relieve the unnecessary administrative burden caused by preventing RP CVs from joining together into larger cooperatives, while providing more flexibility within the RP fishery for CVs.

Increase the Use Caps for Rockfish Processors

This proposed rule would revise § 679.82(a)(5) to increase the use cap for rockfish processors from 30 percent to 40 percent of the CV QS pool for rockfish primary species, Pacific cod, and sablefish, which ensures that a minimum of three Kodiak processors would be necessary to process all the RP CQ. As noted above, seven individual Kodiak rockfish processors, each associated with one or more cooperatives, participated in the RP from 2012 through 2014. The reduction from seven rockfish processors down to the four that are currently required was not a result of consolidation; it occurred because of plant closures due to various market conditions since 2014. There are currently four rockfish processors operating in Kodiak, Alaska. One of those four rockfish processors announced in December 2023 that their Kodiak processing plant would be listed for sale, resulting in uncertainty for

vessels having a market for rockfish CQ deliveries. Increasing the processor use cap could allow consolidation of RP processing activity to three rockfish processors in Kodiak, Alaska. This could reduce the number of operating rockfish processors; however, increasing the processing cap to 40 percent would continue to limit processor consolidation and provide additional flexibility, allowing all of the CV CQ to be harvested and processed for the primary aggregated rockfish species, Pacific cod, and sablefish.

Revise CV Aggregated Rockfish Harvesting Cap

This proposed rule would revise § 679.82(a)(4) pertaining to the 8 percent harvest vessel use cap for catcher vessels. This proposed rule would not change the harvest vessel use cap for catcher/processor vessels.

This change would delete the phrases ''rockfish primary species'' and ''aggregate rockfish primary species'' in paragraph (4) and replace them with the phrase ''Pacific ocean perch'', thus effectively removing dusky rockfish and northern rockfish from the calculation of the 8 percent harvest vessel use cap, so that the cap would apply only to a CV's harvest of Pacific ocean perch. This change is intended to increase harvest under the RP and more fully utilize the dusky rockfish and northern rockfish TACs, which are consistently underharvested. This would provide an increased opportunity to CVs to harvest a larger portion of dusky rockfish and northern rockfish CQ. In the past, one to three CVs have approached the harvest vessel use cap, but never exceeded that use cap. CVs that have approached the aggregated rockfish harvesting cap limit primarily catch Pacific ocean perch. As a result, maintaining the 8 percent harvest vessel use cap for Pacific ocean perch, but removing it for dusky and northern rockfish, would continue to restrict the catch of Pacific ocean perch quota while simultaneously allowing RP CVs to harvest a greater portion of the dusky rockfish and northern rockfish CQ.

Other Regulatory Changes

In addition to the regulatory changes necessary to implement amendment 113, NMFS proposes the below revisions to the FMP regulations on the RP for clarity, efficiency, and technical consistency, pursuant to the authority of section 305(d) of the Magnuson-Stevens Act. These revisions would:

- Replace all relevant instances of ''pelagic shelf rockfish'' with ''dusky rockfish'' in § 679.7(n)(4), 679.7(n)(6)(vi), and table 37 in part 679. This change would clarify that the regulations apply only to one species, dusky rockfish. This would resolve an overlooked species grouping reference. Recommendations were made by the Council during the 2012 and 2013 harvest specifications process to align the GOA FMP with the Stock Assessment and Fisheries Evaluation report for the GOA. In May 2012, the GOA FMP was revised to remove widow rockfish and yellowtail rockfish from the ''pelagic shelf rockfish'' assemblage, leaving only dusky rockfish (77 FR 15194, March 14, 2012). The final rule to implement amendment 111 to the GOA FMP changed references from ''pelagic shelf'' rockfish to ''dusky'' rockfish throughout 50 CFR part 679 to update the GOA FMP regulations consistent with changes that have occurred to species categories since 2012 and consistent with the implementation of the Rockfish Program (86 FR 11895, March 1, 2021). However, the final rule implementing the Rockfish Program did not change § 679.7(n)(4), 679.7(n)(6)(vi), and table 37 in part 679. Tables or other sections that refer to a specific year in which all three species were present in the assemblage would not be changed.
- Revise § 679.5(r)(8)(i)(A) and (B) to allow vessel operators to submit the check in/out reports on behalf of the rockfish cooperative for additional flexibility. The designated representative of a rockfish cooperative, or vessel operator authorized by the rockfish cooperative, would be able to conduct the check in/out process for the rockfish cooperative vessel.
- Remove the website address for the NMFS Alaska Region website in § 679.5(r)(10)(v). Because the website address is included in the definition of ''NMFS Alaska Region website'' at § 679.2, it is no longer necessary (and it may be confusing) to also include the website in § 679.5(r)(10)(v).
- Revise § 679.81(f)(4) by removing the requirement to submit all listed documents for the Annual Application for the RP. Thus, all documents would be required to be submitted with an initial application, while applicants would be required to resubmit only those documents from the initial application that contain new or changed information. This change would help reduce the reporting burden for subsequent annual applications.
- Regulations at § 679.81(g)(2)(i) and (ii) by removing ''Transfer Key'' from the application for inter-cooperative transfer of cooperative quota, as Transfer Keys are no longer used by the RP.

Classification

Pursuant to sections 304(b)(1)(A) and 305(d) of the Magnuson-Stevens Act, the NMFS Assistant Administrator has determined that this proposed rule is consistent with the GOA FMP, other provisions of the Magnuson-Stevens Act, and other applicable law, subject to further consideration after public comment. Pursuant to MSA section 305(d), this action is necessary to carry out amendment 113 to the GOA FMP, other provisions of the Magnuson-Stevens Act, and other applicable law, and to revise regulations associated with the RP for clarity and technical consistency. Section 305(d) grants the authority to make technical changes to existing regulations, updating cross-references, and clarifications to facilitate pre-planned efficiencies. This proposed rule has been determined to be not significant for the purposes of Executive Order 12866.

A Regulatory Impact Review was prepared to assess costs and benefits of available regulatory alternatives. A copy of this analysis is available from NMFS (see **ADDRESSES**). The Council recommended amendment 113, and NMFS proposes these regulations based on those measures that maximize net benefits to the Nation. Specific aspects of the economic analysis are discussed below in the Initial Regulatory Flexibility Analysis section.

Initial Regulatory Flexibility Analysis

This Initial Regulatory Flexibility Analysis (IRFA) was prepared for this proposed rule, as required by Section 603 of the Regulatory Flexibility Act (RFA) (5 U.S.C. 603), to describe the economic impact this proposed rule, if adopted, would have on small entities. This IRFA describes the action; the reasons why this proposed rule is proposed; the objectives and legal basis for this proposed rule; the number and description of directly regulated small entities to which this proposed rule would apply; the recordkeeping, reporting, and other compliance requirements of this proposed rule; and the relevant Federal rules that may duplicate, overlap, or conflict with this proposed rule. This IRFA also describes significant alternatives to this proposed rule that would accomplish the stated objectives of the Magnuson-Stevens Act, and any other applicable statutes, and that would minimize any significant economic impact of this proposed rule on small entities. The description of the proposed action, its purpose, and the legal basis are explained above in the **SUPPLEMENTARY INFORMATION** section of

this proposed rule, and are not repeated here.

For Regulatory Flexibility Act purposes only, NMFS has established a small business size standard for businesses, including their affiliates, whose primary industry is commercial fishing (see 50 CFR 200.2). A business primarily engaged in commercial fishing (NAICS code 11411) is classified as a small business if it is independently owned and operated, is not dominant in its field of operation (including its affiliates), and has combined annual receipts not in excess of $11 million for all its affiliated operations worldwide.

Number and Description of Small Entities Regulated by This Proposed Rule

This proposed rule would directly regulate the owners and operators of CVs and catcher/processor vessels eligible to participate in the CGOA RP. In 2022 (the most recent year of complete data), 57 vessels participated in the RP, 26 of which are considered small entities based on the $11 million threshold. None of the nine catcher/processor vessels that participate in the RP are classified as small entities because their combined gross income through affiliation with the amendment 80 cooperative exceeds the $11 million first wholesale value threshold for combined annual receipts for all affiliated operations worldwide. Additional detail is included in Sections 2.9 in the Analysis prepared for this rule (see **ADDRESSES**).

Description of Significant Alternatives That Minimize Adverse Impacts on Small Entities

In recommending amendment 113 and this proposed rule, the Council considered two alternatives, with multiple elements, including the ''no action'' alternative (Alternative 1); and an action alternative (Alternative 2) to modify the RP with four options to address a suite of potential management revisions. The Council selected, and this proposed rule would implement, Alternative 2, and all options under that alternative, which would increase net benefits to the nation in comparison to the status quo. Those options, which are described (along with a description of the benefits of each option) above in the section entitled, ''This Proposed Rule,'' are to: (1) change the season start date from May 1 to April 1; (2) remove the CV cooperative rockfish CQ use cap; (3) increase the use caps for rockfish processors; and (4) revise the CV aggregated rockfish harvesting cap. As described above in the ''This Proposed Rule'' section, these options enhance flexibility (options 1, 2 and 3), relieve unnecessary administrative burdens for participants in the RP (option 2), and provide increased opportunities to harvest a larger portion of the dusky rockfish and northern rockfish CQ (option 4). The option to increase the processor use cap from 30 to 40 percent could allow consolidation of RP processing activity to three rockfish processors in Kodiak. This allows for the reduction of the number of operating rockfish processors from four to three. The expected result of this option to increase the processing cap would be continued limiting of processor consolidation while also allowing for additional flexibility compared to the status quo. These adjustments to the current CGOA RP would allow additional flexibility to adapt to changing market and environmental conditions, both on the water and in processing capacity within the community, as discussed in the ''This Proposed Rule'' section. The proposed action is intended to meet the overall goal of prosecuting this fishery in a sustainable and functional manner, and to better ensure that the TACs for the primary rockfish species and other allocated species are fully harvested and landed in Kodiak. As noted by the Council in its purpose and need statement, this proposed action includes relatively small changes to the regulations but could have a meaningful impact to the fishery and the Kodiak community.

Based upon the best available scientific data, and in consideration of the Council's objectives of this action, there are no significant alternatives to Alternative 2, which would be implemented by this proposed rule, that have the potential to accomplish the stated objectives of the Magnuson-Stevens Act and any other applicable statutes, and that have the potential to minimize any significant adverse economic impact of the proposed rule on small entities. After consideration of input from the public, the Council and NMFS concluded that the proposed action would best accomplish the stated objectives articulated above in the **SUPPLEMENTARY INFORMATION** section of this proposed rule, and in applicable statutes, and would minimize any significant economic impact of the proposed rule on small entities.

Duplicate, Overlapping, or Conflicting Federal Rules

NMFS has not identified any duplication, overlap, or conflict between this proposed rule and existing Federal rules.

Recordkeeping, Reporting, and Other Compliance Requirements

This proposed rule would modify recordkeeping and reporting requirements under the RP to: (1) Add the month of April to the Rockfish Ex-vessel Volume and Value Report; (2) modify cooperative check-in/out procedures to allow vessel operators to perform the check-in/out; (3) prohibit operation of a vessel that is assigned to a rockfish cooperative and fail to use functioning VMS equipment at all times when operating in a reporting area off Alaska for the month of April; and (4) require documentation for the Annual Application for the RP on the initial application, while subsequently requiring less documentation. Subsequent applications will only be required to resubmit documents for the application if information has changed. These recordkeeping and reporting changes would clarify existing provisions of the RP and remove unnecessary reporting requirements, with the result of slightly reducing the reporting burden for all directly regulated entities including small entities. The impact of these changes is described in more detail in Section 2.8.2 of the Analysis prepared for this proposed rule (See **ADDRESSES**).

Collection-of-Information Requirements

Under the Paperwork Reduction Act (PRA) of 1995, two collections of information (and the requirements therein) would continue to apply with no changes: Office of Management and Budget (OMB) Control Number 0648–0445, NMFS Alaska Region VMS Program; and OMB Control Number 0648–0711, Alaska Cost Recovery and Fee Programs. This proposed rule does not contain a change to the requirements contained in these two collections.

This proposed rule contains one collection-of-information requirement subject to review and approval by the OMB under the PRA. This proposed rule would revise the existing requirements for the collection of information OMB Control Number 0648–0545, entitled ''Central Gulf of Alaska Rockfish Program: Permits and Reports.'' As described below, the revisions made by this proposed rule to OMB Control Number 0648–0545 would not result in a change in estimated burden hours. Because of a concurrent action (submitted for three-year renewal) for 0648–0545, the revision to that collection of information for this rule will be assigned a temporary control number that will later be merged into 0648–0545.

Specifically, this proposed rule would revise the requirements for the Application for Rockfish Cooperative Fishing Quota to require the documents listed at § 679.81(f)(4)(i) to be submitted only with the initial application. In subsequent applications, applicants would need to resubmit these documents only if information has changed. This would not modify the respondents, responses, or the burden related to this application. This proposed rule would also allow vessel operators to conduct the check-in and check-out process for the rockfish cooperative vessel check-in and check-out reports. Currently this can only be done by the RP cooperative representative. This revision would add 10 vessel operators as new respondents for the rockfish check-in and check-out reports, but would not change the number of responses or the burden.

The public reporting burden for the Application for Rockfish Cooperative Fishing Quota is estimated to average two hours and the check-in and check-out reports are estimated to average 10 minutes each. These burden estimates include the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

Public comment is sought regarding whether existing collections of information 0648–0445 and 0648–0711, and collection of information 0648–0545 as proposed for revision by this action, are necessary for the proper performance of the functions of the agency, including whether the information to be collected will have practical utility; the accuracy of the burden estimate; ways to enhance the quality, utility, and clarity of the information to be collected; and ways to minimize the burden of the collection of information, including through the use of automated collection techniques or other forms of information technology. Submit comments on these or any other aspects of the collection of information at *https://www.reginfo.gov/public/do/PRAMain.*

Notwithstanding any other provision of the law, no person is required to respond to, nor shall any person be subject to a penalty for failure to comply with, a collection of information subject to the requirements of the PRA, unless that collection of information displays a currently valid OMB Control Number.

List of Subjects in 50 CFR Part 679

Alaska, Fisheries, Reporting and recordkeeping requirements.

Date: May 2, 2024.

Samuel D. Rauch, III,

Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

For the reasons set out in the preamble, NMFS proposes to amend 50 CFR part 679 as follows:

PART 679—FISHERIES OF THE EXCLUSIVE ECONOMIC ZONE OFF ALASKA

■ 1. The authority citation for part 679 continues to read as follows:

Authority: 16 U.S.C. 773 *et seq.;* 1801 *et seq.;* 3631 *et seq.;* Pub. L. 108–447; Pub. L. 111–281.

■ 2. In § 679.5, revise of paragraphs (r)(8)(i)(A) introductory text, (r)(8)(i)(B) introductory text, (r)(8)(ii), and (r)(10)(ii) and (v) to read as follows:

§ 679.5 Recordkeeping and reporting (R&R).

* * * * *

(r) * * *

(8) * * *

(i) * * *

(A) *Vessel check-in.* The designated representative of a rockfish cooperative must designate any vessel that is authorized to fish under the rockfish cooperative's CQ permit, or, if authorized by the rockfish cooperative, the operator of a vessel must do so, before that vessel may fish under that CQ permit through a check-in procedure. The designated representative for a rockfish cooperative or operator of the vessel must submit to NMFS, in accordance with paragraph (r)(8)(ii) of this section, a check-in designation for a vessel:

* * * * *

(B) *Vessel check-out.* The designated representative of a rockfish cooperative must designate any vessel that is no longer fishing under a CQ permit for that rockfish cooperative, or, if authorized by the rockfish cooperative, the operator of the vessel must do so, through a check-out procedure. A check-out report must be submitted to NMFS, in accordance with (r)(8)(ii) of this section, within 6 hours after the effective date and time the rockfish cooperative ends the vessel's authority to fish under the CQ permit.

* * * * *

(ii) *Submittal.* The designated representative of the rockfish cooperative or, if authorized by the rockfish cooperative, the operator of a vessel must submit a vessel check-in or check-out report electronically. The rockfish cooperative's designated representative or vessel operator must log into the online system and create a vessel check-in or vessel check-out request as indicated on the computer screen. By using the NMFS ID password and submitting the transfer request, the designated representative or vessel operator certifies that all information is true, correct, and complete.

* * * * *

(10) * * *

(ii) *Reporting period.* The reporting period of the Rockfish Ex-vessel Volume and Value Report shall extend from April 1 through November 15 of each year.

* * * * *

(v) *Submittal.* The rockfish processor must complete and submit online by electronic submission to NMFS the Rockfish Ex-vessel Volume and Value Report available at the Alaska Region website.

* * * * *

■ 3. Amend § 679.7 by

■ a. Revising paragraph (n)(3)(i) introductory text; and

■ b. Removing the phrase ''pelagic shelf rockfish'' and adding, in its place, the phrase ''dusky rockfish'' in paragraphs (n)(4) and (n)(6)(vi).

The revision reads as follows:

§ 679.7 Prohibitions.

* * * * *

(n) * * *

(3) * * *

(i) Operate a vessel that is assigned to a rockfish cooperative and fail to use functioning VMS equipment as described at § 679.28(f) at all times when operating in a reporting area off Alaska from April 1:

* * * * *

■ 4. In § 679.51, revise paragraph (a)(2)(vi)(D)(*1*) to read as follows:

§ 679.51 Observer and Electronic Monitoring System requirements for vessels and plants.

(a) * * *

(2) * * *

(vi) * * *

(D) * * *

(*1*) *Rockfish cooperative.* A catcher/processor that is named on an LLP license that is assigned to a rockfish cooperative and is fishing under a CQ permit must have at least two observers aboard for each day that the vessel is used to catch or process fish in the Central GOA from April 1 through the earlier of November 15 or the effective date and time of an approved rockfish cooperative termination of fishing declaration. At least one observer must be endorsed as a lead level 2 observer. More than two observers must be aboard if the observer workload restriction

would otherwise preclude sampling as required.

* * * * *

■ 5. In § 679.80, revise paragraph (a)(3)(ii) to read as follows:

§ 679.80 Allocation and transfer of rockfish QS.

* * * * *

(a) * * *

(3) * * *

(ii) *Rockfish cooperative.* Fishing by vessels participating in a rockfish cooperative is authorized from 1200 hours, A.l.t., April 1 through 1200 hours, A.l.t., November 15.

* * * * *

■ 6. In § 679.81, revise paragraphs (f)(4) introductory text, (f)(4)(i) introductory text, (g)(2)(i) and (ii), and (i)(3)(viii) and (xxii) read as follows:

§ 679.81 Rockfish Program annual harvester privileges.

* * * * *

(f) * * *

(4) *Contents of the Application.* A completed application must contain the information specified on the Application for Rockfish Cooperative Fishing Quota identifying the rockfish cooperative, members of the cooperative, and processor associate of a catcher vessel rockfish cooperative, with all applicable fields accurately filled-in and all required documentation attached. The initial application must contain all documents specified at paragraph (f)(4)(i) of this section. Subsequent applications will only be required to resubmit documents specified at paragraph (f)(4)(i) if information they contain has changed.

(i) *Additional documentation.* For the cooperative application to be considered complete, the following documents must be attached to the initial application:

* * * * *

(g) * * *

(2) * * *

(i) The transferor's designated representative must log into NMFS' online system and create a transfer request as indicated on the computer screen. By using the transferor's NMFS ID and password, and submitting the transfer request, the designated representative certifies that all information is true, correct, and complete.

(ii) The transferee's designated representative must log into the online system and accept the transfer request. By using the transferee's NMFS ID and password, the designated representative certifies that all information is true, correct, and complete.

* * * * *

(i) * * *

(3) * * *

Requirement	Catcher vessel sector	Catcher/processor sector
* * *	* * *	
(viii) Is there a season during which designated vessels may catch CQ?	Yes, any vessel designated to catch CQ for a rockfish cooperative is limited to catching CQ during the season beginning on 1200 hours, A.l.t., on April 1 through 1200 hours, A.l.t., on November 15.	
* * *	* * *	
(xxii) When does catch count against my CQ permit?	Any vessel fishing checked-in (and therefore fishing under the authority of a CQ permit must count any catch of rockfish primary species, rockfish secondary species, or rockfish halibut PSC against that rockfish cooperative's CQ from April 1 until November 15, or until the effective date of a rockfish cooperative termination of fishing declaration that has been approved by NMFS).	
* * *	* * *	

* * * * *

■ 7. In § 679.82, remove and reserve paragraph (a)(3) and revise paragraphs (a)(4)(i) and (a)(5) to read as follows:

§ 679.82 Rockfish Program use caps and sideboard limits.

(a) * * *

* * * * *

(4) * * *

(i) A catcher vessel may not harvest an amount of Pacific ocean perch CQ greater than 8.0 percent of the Pacific ocean perch CQ issued to the catcher vessel sector during a calendar year.

* * * * *

(5) *Use cap for rockfish processors.* (i) A rockfish processor may not receive or process an amount of rockfish primary species harvested with CQ assigned to the catcher vessel sector greater than 40.0 percent of the aggregate rockfish primary species CQ assigned to the catcher vessel sector during a calendar year.

(ii) A rockfish processor may not receive or process an amount of Pacific cod harvested with CQ assigned to the catcher vessel sector greater than 40.0 percent of Pacific cod CQ issued to the catcher vessel sector during a calendar year.

(iii) A rockfish processor may not receive or process an amount of sablefish harvested with CQ assigned to the catcher vessel sector greater than 40.0 percent of sablefish CQ issued to the catcher vessel sector during a calendar year.

(iv) * * *

* * * * *

§ 679.84 [Amended]

■ 8. Amend § 679.84 by removing the word ''May'' and add, in its place, the word ''April'' in paragraphs (g)(1) and (2).

■ 9. Revise table 37 to § 679 to read as follows.

TABLE 37 TO PART 679—GOA AMENDMENT 80 SIDEBOARD LIMIT FOR GROUNDFISH FOR THE AMENDMENT 80 SECTOR

In the following management areas in the GOA and in adjacent waters open by the State of Alaska for which it adopts a Federal fishing season . . .	The sideboard limit for . . .	Is . . .
Area 610	Pollock	0.3% of the TAC.

TABLE 37 TO PART 679—GOA AMENDMENT 80 SIDEBOARD LIMIT FOR GROUNDFISH FOR THE AMENDMENT 80 SECTOR—Continued

In the following management areas in the GOA and in adjacent waters open by the State of Alaska for which it adopts a Federal fishing season . . .	The sideboard limit for . . .	Is . . .
Area 620	Pollock	0.2% of the TAC.
Area 630	Pollock	0.2% of the TAC.
Area 640	Pollock	0.2% of the TAC.
West Yakutat District	Pacific cod	3.4% of the TAC.
	Pacific ocean perch	96.1% of the TAC.
	Dusky rockfish	89.6% of the TAC.
Central GOA	Pacific cod	4.4% of the TAC.
	Pacific ocean perch	Subject to regulations in subpart G to this part.
	Dusky rockfish	Subject to regulations in subpart G to this part.
	Northern rockfish	Subject to regulations in subpart G to this part.
Western GOA	Pacific cod	2.0% of the TAC.
	Pacific ocean perch	99.4% of the TAC.
	Dusky rockfish	76.4% of the TAC.
	Northern rockfish	100% of the TAC.

BILLING CODE 3510–22–P

Notices

Federal Register
Vol. 89, No. 92
Friday, May 10, 2024

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Office of the Secretary

Meeting Notice of the National Agricultural Research, Extension, Education, and Economics Advisory Board

AGENCY: Research, Education, and Economics.

ACTION: Notice of public meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, the National Agricultural Research, Extension, and Teaching Policy Act of 1977, and the Agriculture Improvement Act of 2018, the United States Department of Agriculture (USDA) announces a meeting of the National Agricultural Research, Extension, Education, and Economics (NAREEE) Advisory Board. The Board will meet to continue to determine its advice and recommendations on the top priorities and policies for food and agricultural research, education, extension, and economics; discuss progress on their 'Relevance and Adequacy' evaluation of USDA's precision nutrition efforts; and visit the North Carolina Agriculture and Technology (A&T) University Center for Post Harvest Technologies and the North Carolina Food Innovation Lab.

DATES: The NAREEE Advisory Board will meet in person June 3–4, 2024. The date and times the meeting is open to the public on June 3, 2024, is from 8:30–11:45 a.m. and 3:00 p.m. to 5:45 p.m. EDT. The time for public oral comments is 5:30 p.m.–5:45 p.m. EDT. The meeting is not open to the public from 11:45 a.m.–3:00 p.m. for administrative purposes.

The date and times that the meeting is open to the public on June 4, 2024, is from 8:30–noon EDT. The time for public oral comments is 11:45 a.m.–noon EDT. The meeting is not open to the public from noon–3:00 p.m. EDT for administrative purposes.

Public Participation/Oral Comments: Interested individuals may participate in-person or virtually. To attend the meeting via Zoom and/or make oral comments, you must contact Ms. Michele Simmons at email: *nareee@usda.gov* at least five business days prior to the meeting (no later than May 27, 2024).

Written Comments: The public may file written comments no later than May 27, 2024. Written comments from the public may be submitted via email at *nareee@usda.gov* to the attention of Ms. Michele Simmons. Public written comments will be considered by the NAREEE Advisory Board at the meeting. All written public comments will be available for review at the meeting. Duplicate comments from multiple individuals will appear as one comment, with a notation that multiple copies of the comment were received. The comments will be maintained in the public record of the federal advisory committee at USDA. Please visit *https://nareeeab.ree.usda.gov* to learn more about the agenda for or reports resulting from this meeting.

All statements will become a part of the official record of the NAREEE Advisory Board and will be kept on file for public review in the NAREEE Advisory Board's Office. Written comments by attendees and other interested stakeholders will be welcomed for the public record before and up to two weeks following the Board meeting (no later than 5 p.m. eastern standard time on Wednesday, June 19, 2024).

ADDRESSES: *Meeting Location:* The Board meeting will take place North Carolina Research Campus; Core Laboratory Building (Events Room); 150 Research Campus Drive, Kannapolis, NC 28081.

FOR FURTHER INFORMATION CONTACT: Ms. Kate Lewis, Executive Director/Designated Federal Official, or Ms. Michele Simmons, Program Support Coordinator, National Agricultural Research, Extension, Education, and Economics Advisory Board; telephone: (202) 579–6610 or email: *nareee@usda.gov.*

SUPPLEMENTARY INFORMATION: In accordance with the Federal Advisory Committee Act, 5 U.S.C. 10, Section 1408 of the National Agricultural Research, Extension, and Teaching Policy Act of 1977 (7 U.S.C. 3123), and the Agriculture Improvement Act of 2018, the United States Department of Agriculture (USDA) announces a meeting of the National Agricultural Research, Extension, Education, and Economics (NAREEE) Advisory Board.

Purpose of the meeting: The Board will meet to continue to determine its advice and recommendations on the top priorities and policies for food and agricultural research, education, extension, and economics; discuss progress on their 'Relevance and Adequacy' evaluation of USDA's precision nutrition efforts; and visit the North Carolina Agriculture and Technology (A&T) University Center for Post Harvest Technologies and the North Carolina Food Innovation Lab.

An agenda for this two-day meeting may be received by sending an email to the attention of Ms. Michele Simmons at *nareee@usda.gov.*

USDA programs are prohibited from discriminating based on race, color, national origin, religion, sex, gender identity (including gender expression), sexual orientation, disability, age, marital status, family/parental status, income derived from a public assistance program, political beliefs, or reprisal or retaliation for prior civil rights activity, in any program or activity conducted or funded by USDA (not all bases apply to all programs). Remedies and complaint filing deadlines vary by program or incident.

Persons with disabilities who require alternative means of communication for program information (*e.g.,* Braille, large print, audiotape, American Sign Language, etc.) should contact the responsible Agency or USDA's TARGET Center at (202) 720–2600 (voice and TTY) or contact USDA through the Federal Relay Service at (800) 877–8339. Additionally, program information may be made available in languages other than English.

Equal opportunity practices in accordance with USDA's policies will be followed in all appointments to the FACA Committee. To ensure that the recommendations of the Committee have taken into account the needs of the diverse groups served by the Department, membership shall include, to the extent practicable, individuals with demonstrated ability to represent the many communities, identities, races, ethnicities, backgrounds, abilities, cultures, and beliefs of the American

people, including underserved communities. USDA is an equal opportunity provider, employer, and lender.

Dated: May 6, 2024.

Cikena Reid,

USDA Committee Management Officer.

BILLING CODE 3410–03–P

DEPARTMENT OF AGRICULTURE

Food and Nutrition Service

Agency Information Collection Activities: Supplemental Nutrition Assistance Program (SNAP) Repayment Demand and Program Disqualification

AGENCY: Food and Nutrition Service (FNS), Department of Agriculture.

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this notice invites the general public and other public agencies to comment on this proposed information collection. This is a revision of currently approved information collection requirements associated with initiating collection actions against individuals/households (I/HH) who have received an overissuance in SNAP.

DATES: Written comments must be received on or before July 9, 2024.

ADDRESSES: Comments may be sent to: Maribelle Balbes, Food and Nutrition Service, U.S. Department of Agriculture, 1320 Braddock Place, 5th Floor, Alexandria, VA 22314. Comments may also be submitted via email to *snapsab@usda.gov.* Comments will also be accepted through the Federal eRulemaking Portal. Go to *http://www.regulations.gov* and follow the online instructions for submitting comments electronically.

All responses to this notice will be summarized and included in the request for Office of Management and Budget approval. All comments will be a matter of public record.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of this information collection should be directed to Jennifer Ragan at *snapsab@usda.gov,* 703–457–6786.

SUPPLEMENTARY INFORMATION: Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions that were used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on those who are to respond, including use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Title: Supplemental Nutrition Assistance Program Repayment Demand and Program Disqualification.

Form Number: N/A.

OMB Control Number: 0584–0492.

Expiration Date: 07/31/2024.

Type of Request: Revision of a currently approved collection.

Abstract: Section 13(b) of the Food and Nutrition Act of 2008, as amended (7 U.S.C. 2022(b)), and SNAP regulations at 7 CFR 273.18 require State agencies to initiate collection action against I/HH that have been overissued benefits. To initiate collection action, State agencies must provide an affected I/HH with written notification informing the I/HH of the claim and demanding repayment. This process is automated in most State agencies.

SNAP regulations at 7 CFR 273.16(e)(3) require State agencies to investigate any case of suspected fraud and, where applicable, make an Intentional Program Violation (IPV) determination either administratively or judicially. Notifications and activities involved in the IPV process include:

—The State agency providing written notification informing an individual suspected of committing an IPV of an impending administrative disqualification hearing or court action;

—An individual opting to accept the disqualification and waiving the right to an administrative disqualification hearing or court action by signing either a waiver to an administrative disqualification hearing or a disqualification consent agreement in cases of deferred adjudication and returning it to the State agency; and

—Once a determination is made regarding an IPV, the State agency sending notification to the affected individual of the action taken on the administrative disqualification hearing or court decision.

SNAP regulations at 7 CFR 273.16 require State agencies to use disqualified recipient data to ascertain the correct penalty for IPVs, based on prior disqualifications. State agencies determine this by accessing and reviewing records located in the Electronic Disqualified Recipient System (eDRS). eDRS is an automated system developed by the Food and Nutrition Service that contains records of disqualifications in every State. State agencies are also responsible for updating the system, as required at 7 CFR 237.16, which includes reporting disqualifications in eDRS as they occur and updating eDRS when records are no longer accurate, relevant, or complete.

This information collection covers activities associated with initiating overissuance collections and IPV determinations. The burden associated with reporting collections and other claims management information on the FNS–209 form is covered under the Food Program Reporting System, OMB control number 0584–0594, expiration date 09/30/2026. The burden associated with referring delinquent claims and receiving collections through the Treasury Offset Program is covered under currently approved OMB control number 0584–0446, expiration date 09/30/2025.

Summary of Estimated Burden

The burden consists of two major components: the initiation of overissuance collections and actions associated with IPV determinations. As an exception, due to the variances in data associated with implementing COVID flexibilities during the Public Health Emergency, a 3-year average for fiscal years 2021–2023 has been used to compare against the currently approved burden. The estimated total 3-year average annual burden for this collection is 99,786.9643 hours (69,343.3710 State agency reporting hours + 14,910.3556 I/HH reporting hours + 15,533.2377 State agency recordkeeping hours). The net aggregate change to this collection is a decrease of 35,739.02 total burden hours from the currently approved burden of 135,525.9843 hours. The estimated total annual responses for this collection is 1,498,759.9962 responses (547,029.3333 State agency reporting total annual response + 486,663.6667 I/HH reporting total annual responses + 465,066.9962 State agency recordkeeping total annual records). The burden hours associated with overissuance collection initiation and IPV activity have decreased due to a decrease in the number of claims established and the number of States initiating IPV activity against SNAP I/HH over the last 3 fiscal years (2021–2023).

Reporting

Affected Public: State, Local and Tribal government (State agency); I/HH.

Respondent Type: SNAP participants.

State Agency Reporting Burden

States have done these activities for many years. Based on prior experience in how long these activities take, FNS estimates it will take the 53 State agencies an average 7 minutes (0.1268 hours) to issue each letter or notice or take the actions described below. The following is a summary total for the activities described below.

Estimated Number of Respondents: 53.

Estimated Total Number of Responses per Respondent: 10,321.3082.

Estimated Total Annual Responses: 547,029.3333.

Estimated Time per Response: 0.1268.

Estimated Total Annual Reporting Burden: 69,343.3710.

Demand Letter for Overissuance 7 CFR 273.18 (a)(2)

Based on many years of doing these activities, FNS estimates it will take the 53State agencies 8 minutes (0.1336 hours) to issue a Demand Letter, and that they will issue 7,339.2642 letters each, for a total of 51,967.8616 hours. The prior approval included 74,787.2760 hours. The new burden estimate is 22,819.4144 fewer hours than the previously approved burden amount due to program adjustments. (53 State agencies * 7,339.2642 letters each * 8 minutes (0.1336 hours) = 51,967.8616 hours). Prior approval 74,787.2760 hours − 51,967.8616 hours = 22,819.4144 hours less than the currently approved burden amount).

Notice for Hearing or Prosecution 7 CFR 273.16(e)(3)

FNS estimates that 53 State agencies will issue 745.3333 Notices for Hearing or Prosecution for a total of 39,502.6667 responses. FNS estimates it will take approximately 8 minutes (0.1336 hours) to issue a Notice for Hearing or Prosecution for an estimated 5,277.5563 total hours. The previously approved burden was 5,716.6104 hours. This represents a change of 439.0541 fewer hours associated with this burden due to program adjustments. (53 State agencies * 745.3333 responses * 8 minutes (0.1336 hours) = 5,277.5563 hours). Prior approval 5,716.6104 hours − 5,277.5563 hours = 439.0541 hours less than previously approved burden.)

Action Taken on Hearing or Court Decision: For IPV Findings 7 CFR 273.16(e)(9)

FNS estimates that 53 State agencies will take action on 690.2516 IPV findings for a total of 36,583.3333 responses. FNS estimates that it will take approximately 10 minutes (0.1670 hours) for a State agency to take action on a court decision for IPV findings for a total of 6,109.4167 annual burden hours. This represents a change of 419.7823 fewer hours from the previously approved burden of 6,529.1990 hours due to program adjustments. (53 State agencies * 690.2516 responses * 10 minutes (0.167 hours) = 6,109.4167 hours). Prior approval hours 6,529.1990 − 6,109.4167 hours = 419.7823 hours less than previously approved burden.)

Action Taken on Hearing or Court Decision: For No IPV Findings 7 CFR 273.16(e)(9)

FNS estimates that 53 State agencies will take action on 83.1258 instances of no IPVs as a result of a hearing or court decision for a total of 4,405.6667 total responses. FNS estimates that it will take approximately 5 minutes (0.0835 hours) for a State agency to take action on a hearing or court decision for no IPV findings for a total of 367.8732 annual burden hours. This represents a change of 59.5912 additional burden hours from the previously approved burden of 308.2820 hours due to program adjustments. (53 State agencies * 83.1258 responses * 5 minutes (0.0835 hours) = 367.8732 hours). Prior approval 308.2820 hours − 367.8732 hours = 59.5912 additional burden hours than previously reported.)

Electronic Disqualified Recipient System Breakout For eDRS Reporting 7 CFR 273.16(i)(2)(i)

FNS estimates that 53 State agencies will generate reporting from their eDRS system 690.2516 times for a total of 36,583.3333 annual responses. FNS estimates that it will take approximately 5 minutes (0.0835 hours) for a State agency to generate reporting from eDRS for a total of 3,054.7083 burden hours. This represents a change of 209.8912 fewer burden hours from the previously approved burden of 3,264.5995 hours due to program adjustments. (53 State agencies * 690.2516 responses * 5 minutes (0.0835 hours) = 3,054.7083 hours). Prior approval of 3,264.5995 hours − 3,054.7083 hours = 209.8912 fewer burden hours than previously reported.)

Electronic Disqualified Recipient System Breakout: For Editing and Resubmission 7 CFR 272.1(f)(3)

FNS estimates that 53 State agencies will edit and resubmit reporting to the eDRS system 82.8302 times for a total of 4,390.0000 annual responses. FNS estimates that it will take approximately 10 minutes (0.167 hours) for a State agency to edit and resubmit reporting to eDRS for a total of 733.1300 burden hours. This represents a change of 50.3739 fewer burden hours from the previously approved 783.5039 hours due to program adjustments. (53 State agencies * 82.8302 responses * 10 minutes (0.167 hours) = 733.1300 hours). Prior approval of 783.5039 hours − 733.1300 = 50.3739 fewer burden hours than previously reported.)

Electronic Disqualified Recipient System Breakout: For Penalty Checks using Mainframe 7 CFR 273.16(i)(4)

FNS estimates that 53 State agencies will use eDRS for penalty checks using the mainframe 690.2516 times for a total of 36,583.3333 annual responses. FNS estimates that it will take approximately 3 minutes (0.0501 hours) for a State agency to run a penalty check using the mainframe for a total of 1,832.8250 burden hours. This represents a change of 125.9347 fewer burden hours from the previously approved 1958.7597 hours due to program adjustments. (53 State agencies * 690.2516 responses * 3 minutes (0.0501 hours) = 1,832.8250 hours). Prior approval of 1958.7597 hours − 1,832.8250 hours = 125.9347 less annual burden hours than previously reported.)

I/HH Reporting Burden

Based on prior experience in how long these activities take, FNS estimates it will take the 486,663.6667 I/HH respondents an average of less than 2 minutes (0.0306 hours) to respond as requested by the State agency. The following is a summary total for the activities related to I/HH reporting requirements as described below.

Estimated Number of Respondents: 486,663.6667.

Estimated Number of Responses per Respondent: 1.

Total Number of Annual Responses: 486,663.6667.

Estimated Time per Response: 0.0306.

Estimated Total Annual Reporting Burden: 14,910.3556.

Initiation of Overissuance Collection 7 CFR 273.18(a)(2)

Based on many years of reporting these activities, FNS estimates approximately 388,981.0000 respondents will respond 1 time for a demand letter for overissuance for a total of 388,981.0000 annual responses. FNS estimates that it will take approximately 2 minutes (0.0334 hours) for a respondent to respond to a demand letter for a total estimate of 12,991.9654 annual burden hours. This represents a change of 5,704.8536 fewer annual burden hours from the previously

approved burden of 18,696.8190 hours due to a program adjustment. (388,981.0000 respondents * 1 response per respondent * 2 minutes (0.0334 hours) = 12,991.9654 hours). Prior approval of 18,696.8190 − 12,991.9654 = 5,704.8536 fewer annual burden hours than previously reported for I/HH.)

Notice for Hearing or Prosecution 7 CFR 273.16(e)(3)

FNS estimates approximately 39,502.6667 respondents will respond 1 time for a notice for hearing or prosecution for a total of 39,502.6667 annual responses. FNS estimates that it will take approximately 1 minute (0.0167 hours) for a respondent to read a notice for hearing or prosecution for a total estimate of 659.6945 annual burden hours. This represents a change of 57.8818 fewer annual burden hours from the previously approved burden of 714.5763 hours due to a program adjustment. (39,502.6667 respondents * 1 response per respondent * 1 minute (0.0167 hours) = 659.6945 hours). Prior approval of 714.5763 − 659.6945 = 54.8818 fewer annual burden hours than previously reported for I/HH.)

Administrative Disqualification Hearing Waiver 7 CFR 273.16(i)(2)

FNS estimates approximately 14,542.6667 respondents will respond 1 time for an administrative disqualification hearing waiver for a total of 14,542.6667 annual responses. FNS estimates that it will take approximately 2 minutes (0.0334 hours) for a respondent to submit an administrative disqualification hearing waiver for a total estimate of 485.7251 annual burden hours. This represents a change of 37.4525 fewer annual burden hours from the previously approved burden of 523.1776 hours due to a program adjustment. (14,542.6667 respondents * 1 response per respondent * 2 minutes (0.0334 hours) = 485.7251 hours). Prior approval of 523.1776 − 485.7251 = 37.4525 fewer burden hours than previously reported for I/HH.)

Disqualification Consent Agreement 7 CFR 273.16(i)(2)

FNS estimates approximately 2,648.3333 respondents will respond 1 time for a disqualification consent agreement for a total of 2,648.3333 annual responses. FNS estimates that it will take approximately 2 minutes (0.0334 hours) for a respondent to submit a disqualification consent agreement for a total estimate of 88.4543 annual burden hours. This represents a change of 8.3389 fewer annual burden hours from the previously approved burden of 96.7932 hours due to a program adjustment. (2,648.3333 respondents * 1 response per respondent * 2 minutes (0.0334 hours) = 88.4543 hours). Prior approval of 96.7932 − 88.4543 = 8.3389 fewer burden hours than previously reported for I/HH.)

Action Taken on Hearing or Court Decision: For IPV Findings 7 CFR 273.16(e)(9)

FNS estimates approximately 36,583.3333 respondents will respond 1 time for an action taken on hearing or court decision for IPV findings for a total of 36,583.3333 annual responses. FNS estimates that it will take approximately 1 minute (0.0167 hours) for a respondent to submit an action taken on hearing or court decision for IPV findings for a total estimate of 610.9417 annual burden hours. This represents a change of 41.9782 fewer annual burden hours from the previously approved burden of 652.9199 hours due to a program adjustment. (36,583.3333 respondents * 1 response per respondent * 1 minute (0.0167 hours) = 610.9417 hours). Prior approval of 652.9199 − 610.9417 = 41.9782 fewer burden hours than previously reported for I/HH.)

Action Taken on Hearing or Court Decision: For No IPV Findings 7 CFR 273.16(e)(9)

FNS estimates approximately 4,405.6667 respondents will respond 1 time for an action taken on hearing or court decision for no IPV findings for a total of 4,405.6667 annual responses. FNS estimates that it will take approximately 1 minute (0.0167 hours) for a respondent to submit an action taken on a hearing or court decision for no IPV findings for a total estimate of annual 73.5746 burden hours. This represents a change of 11.9182 additional annual burden hours from the previously approved burden of 61.6564 hours due to a program adjustment. (4,405.6667 respondents * 1 response per respondent * 1 minute (0.0167 hours) = 73.5746 hours). Prior approval 61.6564 − 73.5746 = 11.9182 additional burden hours than previously reported for I/HH.)

Recordkeeping

State Agency Recordkeeping Burden

States have done these activities for many years. Based on prior experience in how long these activities take, FNS estimates it will take the 53 State agencies an average of 2 minutes (0.0334 hours) to perform the required recordkeeping. The following is a summary total for the activities described below.

Estimated Number of Recordkeepers: 53.

Estimated Total Records per Recordkeeper: 8,774.8490.

Estimated Total Annual Records: 465,066.9962.

Estimated Average # of Hours per Response: 0.0334.

Estimated Total Recordkeeping Hours: 15,533.2377.

Initiation of Overissuance Collection 7 CFR 272.1(f)

Based on many years of performing these activities, FNS estimates that 53 State agencies will perform recordkeeping for initiating a collection action approximately 7,339.2642 times for a total of 388,981.0000 annual records. FNS estimates that it will take approximately 2 minutes (0.0334 hours) for a State agency to perform recordkeeping for initiation of a collection action for a total of 12,991.9654 burden hours. This represents a change of 5,704.8536 fewer burden hours from the previously approved burden of 18,696.8190 hours due to program adjustments. (53 State agencies * 7,339.2642 records * 2 minutes (0.0334 hours) = 12,991.9654 hours). Prior approval of 18,696.8190 hours − 12,991.9654 hours = 5,704.8536 fewer annual burden hours than previously reported.)

IPV Determinations 7 CFR 272.1(f)

FNS estimates that 53 State agencies will perform recordkeeping for IPVs 1,435.5848 times for a total of 76,085.9962 annual records. FNS estimates that it will take approximately 2 minutes (0.0334 hours) for a State agency to update records for IPVs for a total of 2,541.2723 annual burden hours. This represents a change of 193.7201 fewer annual burden hours from the previously approved burden of 2,734.9924 hours due to program adjustments. (53 State agencies * 1,435.5848 records * 2 minutes (0.0334 hours) = 2,541.2723 hours). Prior approval of 2,734.9924 hours − 2,541.2723 = 193.7201 fewer annual burden hours than previously reported.)

Overall Grand Total Reporting and Recordkeeping Burden for All Affected Public

Estimated Overall Total Number of Respondents: 486,769.6667.

Estimated Overall Responses per Respondents: 3.0790.

Estimated Overall Total Annual Responses: 1,498,759.9962.

Estimated Overall Time per Response: 0.0666.

Estimated Overall Grand Total Annual Reporting and Recordkeeping Burden: 99,786.9643.

Respondent category (affected public)	Type of respondents	Burden activity	CFR Section of regulations	Estimated number of respondents	Responses per respondent	Total annual responses (Col. ExF)	Estimated avg. number of hours per response	Estimated total hours (Col. GxH)

BILLING CODE 3410–30–P

DEPARTMENT OF AGRICULTURE

Forest Service

Sierra Vista Ranger District; Coronado National Forest; Arizona; Hermosa Critical Minerals Project

AGENCY: Forest Service, Agriculture (USDA).

ACTION: Notice of intent to prepare an environmental impact statement.

SUMMARY: The USDA Forest Service, Coronado National Forest, is preparing an environmental impact statement (EIS) to evaluate and disclose the potential environmental effects from the proposed Hermosa Critical Minerals Exploration and Mine Plan of Operations, submitted by South32 Hermosa Inc. (proponent), to occupy and use National Forest System lands for operations associated with an expansion of an underground polymetallic development. The proposed mine plan of operations (MPO) may also require an amendment to the 2018 Coronado National Forest Land and Resource Management Plan (forest plan) to include site-specific exceptions to plan direction to accommodate the proposed exploration and mining operations. The Forest Service is providing this public scoping opportunity to gather information to inform the environmental review and decision-making process.

DATES: Comments concerning the scope of the analysis must be received by June 10, 2024. The draft EIS is expected May 2025 and the final EIS is expected February 2026.

ADDRESSES: Comments can be submitted electronically using the Public Comment Form at *https://cara.fs2c.usda.gov/Public//CommentInput?Project=65668.* Written comments may be submitted via mail or hand delivery (Monday through Friday, 8 a.m. to 4:30 p.m., excluding Federal holidays) to Kerwin S. Dewberry, Forest Supervisor, Coronado National Forest, ATTN: Hermosa Critical Minerals Project, 300 West Congress Street, Tucson, AZ 85701. Written comments may also be submitted during public scoping meetings (see ''Scoping Comments and the Objection Process'').

FOR FURTHER INFORMATION CONTACT: Edwin Monin, Project Manager, Coronado National Forest, 300 West Congress Street, Tucson, AZ 85701, by email at *edwin.monin@usda.gov* or by phone at 520–388–8300, between 8 a.m. and 4:00 p.m. Mountain Standard Time, Monday through Friday. Individuals who use telecommunication devices for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 800–877–8339, 24 hours a day, every day of the year, including holidays.

SUPPLEMENTARY INFORMATION: The proposed MPO was submitted by the proponent in accordance with 36 CFR part 228, subpart A. The Forest Service finished the review process for MPO completeness for elements required under 36 CFR 228.4(c). The MPO dated December 1, 2023, was formally accepted as administratively complete on December 15, 2023. For complete details, please refer to the proposed MPO online at *https://www.fs.usda.gov/project/coronado/?project=65668.*

After evaluating the proposed MPO, the Forest Service determined that the decision for whether to approve use of National Forest System lands would be a major Federal action subject to the National Environmental Policy Act (NEPA), as defined in 40 CFR 1508.1. Accordingly, the Forest Service will prepare an EIS to document key issues associated with the MPO, consider and assess reasonable alternatives, evaluate and disclose potential environmental effects, propose mitigation necessary to minimize adverse impacts, and ensure compliance with applicable laws, regulations, and policy. Therefore, the Forest Service is fulfilling statutory requirements and agency policy and direction to comply with NEPA and other relevant authorities.

Purpose and Need for Action

The Forest Service's purpose for the action is to decide whether to approve the proponent's December 1, 2023, proposed MPO for surface use of National Forest System lands in connection with operations authorized by U.S. mining laws (30 U.S.C. 21–54).

The Forest Service's need for action is established by the agency's responsibility under the General Mining Law of 1872, as amended, and the agency's locatable mineral regulations (36 CFR part 228, subpart A). In accordance with 36 CFR 228.5, the Forest Service must analyze and provide timely response to the submittal of an MPO. Furthermore, the Forest Service must assess whether the proposed operations will be conducted so as, where feasible, to minimize adverse environmental impacts on national forest surface resources in accordance with 36 CFR 228.8.

Proposed Action

The Forest Supervisor for the Coronado National Forest (responsible official) must decide whether to approve the MPO submitted by the proponent, and whether to require any modifications determined necessary through the analysis to comply with applicable laws and regulations. As described in the MPO, the proposed action would affect Federal and private lands comprised of patented mining claims owned by the proponent. However, the Forest Service only has the authority to regulate surface operations on National Forest System lands and does not have jurisdiction to regulate mining operations underground or those that occur on private land. Nevertheless, the EIS will consider and disclose environmental effects of any connected action, including mining-related operations that would occur on private lands. Other actions potentially related to the MPO will be considered in the process, including but not limited to Clean Water Act permitting by the U.S. Army Corp of Engineers and the Arizona Department of Environmental Quality in addition to related amendments to the Coronado National Forest Land and Resource Management Plan.

Project Location

The proposed MPO (project) is located within the Patagonia Mountains in southern Arizona. The project is located in an unincorporated part of central Santa Cruz County, approximately 6 miles southeast of the town of Patagonia and about 8 miles north of the U.S.-Mexico international border. Nearby communities include Kino Springs, Nogales, Rio Rico, and Sonoita.

Project Description

The proposed action would continue the historic production of minerals within the Harshaw Mining District. The primary minerals targeted by the proponent are manganese and zinc, which are identified by the United States Geological Survey as critical minerals in the 2022 Final List of Critical Minerals (87 FR 10381). The Energy Act of 2020 defines a ''critical mineral'' as a non-fuel mineral or mineral material essential to the economic or national security of the United States and which has a supply chain vulnerable to disruption. The proponent's proposed activities on or beneath National Forest System lands are an expansion of the current operations on the proponent's adjacent private land, with a proposed surface

disturbance of 480.5 acres, an underground disturbance of 223 acres, and restricted access to 353.4 acres. Figure 2–1 included in the MPO depicts the proposed site plan and facilities on both private and National Forest System lands. The following MPO activities are proposed on or beneath National Forest System lands.

Surface exploration—

- Continued definition of the ore body within the footprint of tailings storage facility 2 and in other locations. This includes construction of temporary drill pads and access roads. Where future surface disturbance is not contemplated, drill pads and access roads would be reclaimed.

Underground exploration, mining, and support operations—

- Construction of underground tunnels and infrastructure.
- Underground mining of ore using the long-hole open stoping method, as well as hauling and crushing of sulfide ore so it can be brought to the surface.
- Use of approximately half of the tailings for mixing of cemented paste backfill (comprising filtered tailings, cement, and water) and return of material via pipe for backfill underground.
- Underground equipment use and maintenance.
- Continued definition of the orebody through exploration drilling from underground workings.

Surface storage of tailings and waste rock—

- Geotechnical drilling and test pits to support development of tailings storage facility 2, a lined dry-stack tailings storage facility on National Forest System land.
- Construction, use, and closure of the lined dry-stack tailings storage facility 2 for storage of both filtered tailings and waste rock, as well as other small quantities of materials such as solids from the water treatment plants. The lined tailings storage facility includes infrastructure for management of stormwater runoff and seepage.
- Construction, use, and closure of an underdrain collection pond for the lined dry-stack tailings storage facility 2, including a lined drainage conveyance channel leading to the storage facility's underdrain collection pond.
- Transportation and placement of filtered tailings and waste rock materials into tailings storage facility 2.
- Construction and use of water distribution pipelines and associated tailings storage facility 2 underdrain collection pond to convey collection pond water for treatment.
- Construction and use of the project electrical distribution lines, including lines to tailings storage facility 2 and the storage facility's underdrain collection pond.

Water management activities—

- Construction of groundwater management wells on the surface and construction of water management infrastructure (sumps, pumps) underground.
- Collection of water for groundwater management purposes to reduce hydrostatic pressures to allow underground exploration and mining, either by pumping groundwater management wells or by collection underground.
- Construction, operation, and maintenance of piping and power lines associated with groundwater management wells.
- Construction of permanent monitoring wells to observe water quality and level and comply with regulatory requirements.
- Recharge of treated water in areas that would benefit the aquifer using rapid infiltration basins, including water delivery pipelines.
- Construction of stormwater controls to reroute non-contact runoff and contain contact water.

Roads and transportation—

- Geotechnical drilling and/or test pits to support construction of the primary access road.
- Construction of a new and permanent primary access road from the project area to State Route 82 (where feasible, limiting new disturbance by improving existing Forest Road segments).
- Construction of temporary access roads including (1) those associated with facility access and exploration that would be closed and reclaimed during the operational mine life, causing a short-term temporary disturbance (short-term temporary access roads); and (2) those associated with facility access, groundwater management wells, monitoring wells, connecting haul roads, or rapid infiltration basins that would remain through the operational mine life until closure, involving a long-term disturbance (long-term temporary access roads).
- Upgrade of some existing roads to meet similar criteria used for temporary access roads.
- Transportation of equipment, materials, supplies, and personnel to and from the project area using existing Forest Roads, the primary access road, and temporary access roads.
- Transportation of filtered zinc and lead and silver concentrates off-site in sealed containers.
- Transportation of crushed oxide ore in sealed containers to beneficiation facilities on private land distal from the project area.
- Construction and maintenance of fencing and berms as required for worker and public safety. This includes construction of temporary roads along four planned fence locations for construction and maintenance.

Reclamation and closure activities—

- Salvage and storage of growth media for use in reclamation.
- Closure of the dry-stack tailings storage facility 2 and storage facility's underdrain collection pond upon completion of operations, including placing a closure cap and growth media on tailings storage facility 2, implementing passive treatment for seepage associated with the storage facility, and stormwater management controls.
- Abandonment (proper closure) of groundwater management wells, and closure and reclamation of groundwater management well pads.
- Closure and reclamation of all temporary access roads, exploration drill holes, pads, and rapid infiltration basins.
- Long-term monitoring activities.

Preliminary Alternatives

In addition to the proposed action, two additional alternatives have been identified for detailed study including the no-action alternative and alternative 1. The no-action alternative is the alternative where the Forest Service does not approve the proposed MPO and represents what operations could still occur on private land. This alternative serves as the baseline for the comparison among the action alternatives. Alternative 1 includes the MPO and a proposal from UniSource Energy Services to construct a 138-kV overhead transmission line to serve the project area and support service reliability for UniSource customers in the San Rafael Valley, Washington Camp, and Lochiel areas of southeastern Arizona. Comments received in response to this Notice of Intent may result in identification of additional reasonable alternatives.

Plan Amendment

The proposed action includes activities that may require a forest plan amendment to include site-specific exceptions to plan direction to accommodate the proposed action. The proposed action may include, but is not limited to, a forest plan amendment to allow a reduction in the scenic integrity objectives for the project area (2018 Coronado National Forest Land and Resource Management Plan, page 82). Additionally, a forest plan amendment

may be required to allow major aboveground utility corridor development outside of the area identified and mapped in the 2008 West-Wide Energy Corridor Programmatic EIS as referenced in the 2018 Coronado National Forest Land and Resource Management Plan (pages 83 and 85).

The responsible official plans to release the draft record of decision in conjunction with the final EIS. The draft decision would be subject to 36 CFR part 218, ''Project-Level Pre-decisional Administrative Review Process.'' Depending on the nature of the forest plan amendment(s) required, the draft decision may also be subject to 36 CFR part 219, subpart B, ''Pre-decisional Administrative Review Process.'' Following resolution of objections to the draft decision, the final decision would be issued.

Expected Impacts

It is anticipated that there would be impacts to water quality and quantity; scenery; threatened, endangered, and other special status species and their habitats; effects from drilling and mining activities such as noise and lights used for nighttime drilling; impacts to air quality; and increased traffic. This is a preliminary issues list with additional issues to be identified through the scoping process.

Lead and Cooperating Agencies

The Forest Service is the lead agency for the proposed action and compliance with NEPA. The Coronado National Forest has identified, invited, and received acceptance from four cooperating agencies to include the U.S. Army Corps of Engineers, the U.S. Fish and Wildlife Service, the Arizona Department of Environmental Quality, and the Arizona State Historic Preservation Office.

Responsible Official

The responsible official for the decision on this project is Kerwin S. Dewberry, Forest Supervisor, Coronado National Forest, 300 West Congress Street, Tucson, Arizona 85701.

Scoping Comments and the Objection Process

This notice of intent initiates the scoping process, which guides the development of the EIS. In this process, the agency is requesting comments on potential issues and alternatives in addition to identification of any relevant information, studies, or analyses of any kind concerning impacts affecting the quality of the human environment.

Public scoping meetings in an open house format will be held as follows:

1. May 20, 2024, 4:30 to 6:30 p.m., Patagonia Union High School, 200 Naugle Ave., Patagonia, Arizona
2. May 21, 2024, 4:30 to 6:30 p.m., Quality Hotel Americana, 639 N Grand Ave., Nogales, Arizona

Meeting details will also be posted on the Coronado National Forest website and advertised in the *Arizona Daily Star, Herald/Review, Nogales International,* and *Patagonia Regional Times.*

It is important that reviewers provide their comments at such times and in such manner that they are useful to the agency's preparation of the EIS; therefore, comments should be provided prior to the close of the comment period and should clearly articulate the reviewer's concerns and contentions. Commenting during scoping and any other designated opportunity to comment provided by the responsible official as prescribed by the applicable regulations will also govern eligibility to object once the final EIS and draft record of decision has been published. Comments received in response to this solicitation, including names and addresses of those who comment, will be part of the public record for this proposed action. Comments submitted anonymously will be accepted and considered; however, they will not be used to establish eligibility for the objection process.

Objections will be accepted only from those who have previously submitted specific written comments regarding the proposed project during scoping or other designated opportunity for public comment in accordance with 36 CFR 218.5(a). Issues raised in objections must be based on previously submitted timely, specific written comments regarding the proposed project unless based on new information arising after designated opportunities.

Permits, Licenses, or Other Authorizations Required

The MPO may require other permits, licenses, and authorizations including but not limited to a Clean Water Act Section 404 Permit from the U.S. Army Corps of Engineers; an Underground Injection Control Permit from the U.S. Environmental Protection Agency; an Encroachment Permit from the Arizona Department of Transportation; a Reclamation Plan and annual renewal from the Arizona State Mine Inspector; and the following permits from the Arizona DEQ—Air Quality Permit, Arizona Pollutant Discharge Elimination System Permit, Aquifer Protection Permit, Arizona Water Quality Certification under section 401 of the Clean Water Act, and Resource Conservation and Recovery Act Subtitle C Site Identification Form.

Nature of Decision To Be Made

Based on environmental analysis and disclosure documented in the EIS, the responsible official will decide: (1) whether to approve the MPO as proposed or modified, or as described in an alternative; (2) what mitigation measures, if needed, would be required; (3) what monitoring, if any, would be required; and (4) whether approval of an action alternative would be consistent with the 2018 Coronado National Forest Land and Resource Management Plan or whether an amendment to the forest plan would be required.

Substantive Provisions

Any proposed forest plan amendment(s) would meet the substantive requirements for sustainability (36 CFR 219.8), species diversity (36 CFR 219.9), multiple use (36 CFR 219.10), and timber (36 CFR 219.11).

Dated: May 2, 2024.

Troy Heithecker,

Associate Deputy Chief, National Forest System.

BILLING CODE 3411–15–P

DEPARTMENT OF AGRICULTURE

Forest Service

Proposed Recreation Fee Site

AGENCY: Forest Service, USDA.

ACTION: Notice.

SUMMARY: The Inyo National Forest is proposing to establish a recreation fee site. Proposed recreation fees collected at the proposed recreation fee sites would be used for operation, maintenance, and improvement of the sites. An analysis of nearby recreation fee sites with similar amenities shows the proposed recreation fees that would be charged at the new recreation fee sites are reasonable and typical of similar recreation fee sites in the area.

DATES: If approved, the proposed recreation fees would be established no earlier than six months following the publication of this notice in the **Federal Register**.

ADDRESSES: Inyo National Forest, Attention: Recreation Fees, 351 Pacu Lane, Suite 200, Bishop, CA 93514.

FOR FURTHER INFORMATION CONTACT: Andrew Kennedy, Forest Recreation

Officer, (760) 920–3522, *andrew.kennedy@usda.gov.*

SUPPLEMENTARY INFORMATION: The Federal Lands Recreation Enhancement Act (16 U.S.C. 6803(b)) requires the Forest Service to publish a six-month advance notice in the **Federal Register** of establishment of proposed recreation fee sites. In accordance with Forest Service Handbook 2309.13, Chapter 30, the Forest Service will publish the proposed recreation fee sites and proposed recreation fees in local newspapers and other local publications for public comment. Most of the proposed recreation fees would be spent where they are collected to enhance the visitor experience at the proposed recreation fee sites.

A special recreation permit recreation fee of $20 per permit is proposed for the Inyo National Forest Christmas Tree Permits. The 4th Grade Pass would be honored for a free permit.

Expenditures of recreation fees collected at the proposed recreation fee sites would enhance recreation opportunities, improve customer service, and address maintenance needs. Once public involvement is complete, the proposed recreation fee sites and proposal recreation fees will be reviewed by a Recreation Resource Advisory Committee prior to a final decision and implementation.

Dated: May 6, 2024.

Jacqueline Emanuel,

Associate Deputy Chief, National Forest System.

COMMISSION ON CIVIL RIGHTS

Sunshine Act Meeting Notice

AGENCY: Commission on Civil Rights.

ACTION: Notice of Commission public briefing.

SUMMARY: Notice of Commission public briefing, *The Federal Role in Enforcing Religious Freedoms in Prison,* Notice of Commission business meeting, and call for public comments.

DATES: Friday, May 17, 2024, 10 a.m. ET.

ADDRESSES: The briefing is open to the public and can be attended via live stream on the Commission's YouTube page at: *https://www.youtube.com/usccr.*

FOR FURTHER INFORMATION CONTACT: Angelia Rorison (202) 376–8359; *publicaffairs@usccr.gov.*

SUPPLEMENTARY INFORMATION: The U.S. Commission on Civil Rights on whether prisoners' religious freedom rights are being protected and enforced in accordance with constitutional and statutory provisions. This is an update to the Commission's 2008 statutory enforcement report, *Enforcing Religious Freedom in Prison.*

At this public briefing, the Commission will hear from subject matter experts such as government officials, religious leaders, academics, prisoners' rights advocates, religious liberty organizations, and legal experts. The Commission will accept written materials from the public for consideration as we prepare our report; submit to *rfip@usccr.gov* no later than Monday, June 17, 2024.

This briefing is open to the public and is accessible via live stream at *https://www.youtube.com/usccr.* (* Streaming information subject to change.)

Computer assisted real-time transcription (CART) will be provided. The web link to access CART (in English) on Friday, May 17, 2024, is *https://www.streamtext.net/player?event=USCCR.* Please note that CART is text-only translation that occurs in real time during the meeting and is not an exact transcript.

To request additional accommodations, persons with disabilities should email *access@usccr.gov* by Monday, May 13, 2024, indicating ''accommodations'' in the subject line.

Briefing Agenda for Civil Rights Implications of the Federal Use of Facial Recognition Technology

10:00 a.m.–3:15 p.m.

All times Eastern Standard Time

I. Introductory Remarks: 10:00–10:10 a.m.
II. Panel 1: Constitutional and Legal Experts: 10:10–11:25 a.m.
III. Break: 11:25–11:35 a.m.
IV. Panel 2: Religious Leaders & Direct Service Providers: 11:35 a.m.–12:50 p.m.
V. Lunch: 12:50–1:50 p.m.
VI. Panel 3: Prisoners' Religious Rights Advocates: 1:50 p.m.–3:05 p.m.
VII. Closing Remarks: 3:05–3:15 p.m.
VIII. Adjourn Meeting.

** Public Comments will also be accepted through written testimony.

* Schedule is subject to change.

Call for Public Comments

In addition to the testimony collected on Friday, May 17, 2024, via public briefing, the Commission welcomes the submission of material for consideration as we prepare our report. Please submit such information to *rfip@usccr.gov* no later than June 17, 2024, or by mail to OCRE/Public Comments, ATTN: RFIP, U.S. Commission on Civil Rights, 1331 Pennsylvania Ave. NW, Suite 1150, Washington, DC 20425.

Dated: May 17, 2024.

Angelia Rorison,

USCCR Media and Communications Director.

DEPARTMENT OF COMMERCE

International Trade Administration

[A–469–815]

Carbon Steel Flanges From Spain: Preliminary Results of Antidumping Duty Administrative Review and Rescission of Review in Part; 2022–2023

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The U.S. Department of Commerce (Commerce) preliminarily finds that carbon steel flanges from Spain were sold in the United States at prices below normal value. The period of review (POR) is June 1, 2022, through May 31, 2023. We are also rescinding this administrative review, in part, with respect to seven companies because the requests for administrative review were timely withdrawn. We invite interested parties to comment on these preliminary results.

DATES: Applicable May 10, 2024.

FOR FURTHER INFORMATION CONTACT: Jacob Waddell or Mark Flessner, AD/CVD Operations, Office VI, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–1369 or (202) 482–6312, respectively.

SUPPLEMENTARY INFORMATION:

Background

On June 4, 2017. Commerce issued an antidumping duty order on finished carbon steel flanges from Spain.[1] On August 3, 2023, based on timely requests for administrative review, Commerce initiated an administrative review of the *Order.*[2] All requests for administrative review were timely withdrawn with regard to seven

[1] *See Finished Carbon Steel Flanges from Spain: Antidumping Duty Order,* 82 FR 27229 (June 14, 2017) (*Order*).

[2] *See Initiation of Antidumping and Countervailing Duty Administrative Reviews,* 88 FR 51271 (August 3, 2023) (*Initiation Notice*).

companies,[3] leaving ULMA Forja, S.Coop (ULMA) as the sole mandatory respondent in this review.[4] On February 9, 2024, in accordance with section 751(a)(3)(A) of the Tariff Act of 1930, as amended (the Act), Commerce extended the preliminary results of review until June 28, 2024.[5]

For a complete description of the events that followed the initiation of this administrative review, *see* the Preliminary Decision Memorandum.[6] A list of topics included in the Preliminary Decision Memorandum is included as Appendix I to this notice. The Preliminary Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *https://access.trade.gov*. In addition, a complete version of the Preliminary Decision Memorandum can be accessed directly at *https://access.trade.gov/public/FRNoticesListLayout.aspx*.

Scope of the Order

The product covered by the *Order* is carbon steel flanges from Spain. For a complete description of the scope of the *Order, see* the Preliminary Decision Memorandum.

Methodology

Commerce is conducting this administrative review in accordance with section 751(a)(2) of the Act. Commerce has calculated export prices in accordance with section 772(a) of the Act. Constructed export prices have been calculated in accordance with section 772(b) of the Act. Normal value is calculated in accordance with section 773 of the Act. For a full description of the methodology underlying our conclusions, *see* the Preliminary Decision Memorandum.

Partial Rescission of Administrative Review

Pursuant to 19 CFR 351.213(d)(1), Commerce will rescind an administrative review, in whole or in part, if the party or parties that requested a review withdraws the request within 90 days of the publication of the notice of initiation of the requested review. As noted above, all requests for an administrative review were timely withdrawn for all companies except ULMA. Therefore, in accordance with 19 CFR 351.213(d)(1), we are rescinding this administrative review with respect to seven of the eight companies named in the *Initiation Notice*.[7]

Preliminary Results of Review

Commerce preliminarily finds the following estimated weighted-average dumping margin exists for the period June 1, 2021, through May 31, 2023:

Exporter/producer	Weighted-average dumping margin (percent)
ULMA Forja, S.Coop	2.02

Disclosure and Public Comment

We intend to disclose to interested parties the calculations performed for these preliminary results within five days after public announcement of the preliminary results, or if there is no public announcement, within five days of the publication of these preliminary results in the **Federal Register**, in accordance with 19 CFR 351.224(b).

Interested parties may submit case briefs no later than 30 days after the date of publication of these preliminary results of review.[8] Rebuttal briefs, limited to issues raised in the case briefs, may be filed no later than five days after the date for filing case briefs.[9] Interested parties who submit case briefs or rebuttal briefs in this proceeding must submit: (1) a table of contents listing each issue; and (2) a table of authorities.[10]

As provided under 19 CFR 351.309(c)(2) and (d)(2), in prior proceedings, we have encouraged interested parties to provide an executive summary of their brief that should be limited to five pages total, including footnotes. In this review, we instead request that interested parties provide, at the beginning of their briefs, a public executive summary for each issue raised in their briefs.[11] Further, we request that interested parties limit their public executive summary of each issue to no more than 450 words, not including citations. We intend to use the public executive summaries as the basis of the comment summaries included in the issues and decision memorandum that will accompany the final results in this administrative review. We request that interested parties include footnotes for relevant citations in the public executive summary of each issue. Note that Commerce has amended certain of its requirements pertaining to the service of documents in 19 CFR 351.303(f).[12]

Pursuant to 19 CFR 351.310(c), interested parties who wish to request a hearing must submit a written request to the Assistant Secretary for Enforcement and Compliance, filed electronically via ACCESS. An electronically filed document must be received successfully in its entirety by Commerce's electronic records system, ACCESS, by 5:00 p.m. Eastern Time within 30 days after the date of publication of this notice.[13] Requests should contain: (1) the party's name, address and telephone number; (2) the number of participants; and (3) a list of issues to be discussed. Issues raised in the hearing will be limited to those raised in the respective case briefs.

Assessment Rate

Upon issuance of the final results, Commerce shall determine, and CBP shall assess, antidumping duties on all appropriate entries covered by this review.[14]

For any individually examined respondents whose weighted-average dumping margin is above *de minimis* (*i.e.,* greater than or equal to 0.5 percent) in the final results of this review, we will calculate importer-specific *ad valorem* duty assessment rates based on the ratio of the total amount of antidumping duties calculated for the examined sales to the total entered value of the examined sales to that importer, and we will instruct CBP to assess antidumping duties on all appropriate entries covered by this review. For entries of subject merchandise during the POR produced by each respondent for which it did not know its merchandise was destined for the United States, we will instruct CBP to liquidate such entries at the all-others

[12] *See APO* and *Service Final Rule*.

[13] *See* 19 CFR 351.310(c).

[14] *See* 19 CFR 351.212(b)(1).

rate if there is no rate for the intermediate company(ies) involved in the transaction.[15] Where the individually-selected respondent's weighted-average dumping margin is zero or *de minimis,* or an importer-specific assessment rate is zero or *de minimis,* we will instruct CBP to liquidate the appropriate entries without regard to antidumping duties.

For the companies listed in Appendix II for which we are rescinding this review, we will instruct CBP to assess antidumping duties on all appropriate entries at a rate equal to the cash deposit of estimated antidumping duties required at the time of entry, or withdrawal from warehouse, in accordance with 19 CFR 351.212(c)(l)(i). Commerce intends to issue these rescission instructions to CBP no earlier than 35 days after the date of publication of this notice in the **Federal Register**.

Commerce intends to issue assessment instructions to CBP no earlier than 35 days after the date of publication of the final results of this review in the **Federal Register**.[16] If a timely summons is filed at the U.S. Court of International Trade, the assessment instructions will direct CBP not to liquidate relevant entries until the time for parties to file a request for a statutory injunction has expired (*i.e.,* within 90 days of publication).

Cash Deposit Requirements

The following cash deposit requirements will be effective upon publication of the notice of final results of this administrative review for all shipments of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the date of publication, as provided by section 751(a)(2) of the Act: (1) the cash deposit rate for the companies listed in the final results of review will be equal to the weighted-average dumping margin established in the final results of this administrative review; (2) for merchandise exported by producers or exporters not covered in this review but covered in a prior segment of the proceeding, the cash deposit rate will continue to be the company-specific rate published for the most recently completed segment of this proceeding in which they were reviewed; (3) if the exporter is not a firm covered in this review, a prior review, or the original investigation but the producer is, then the cash deposit rate will be the rate established for the most recently completed segment of this proceeding for the producer of the merchandise; (4) the cash deposit rate for all other producers or exporters will continue to be 2.02 percent, the all-others rate established in the less-than-fair-value investigation.[17] These cash deposit requirements, when imposed, shall remain in effect until further notice.

Final Results of Review

Unless otherwise extended, Commerce intends to issue the final results of this administrative review, which will include the results of its analysis of issues raised in any briefs, within 120 days of publication of these preliminary results of review, pursuant to section 751(a)(3)(A) of the Act.

Notification to Importers

This notice serves as a preliminary reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this POR. Failure to comply with this requirement could result in Commerce's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

Notification to Interested Parties

Commerce is issuing and publishing these preliminary results in accordance with sections 751(a)(1) and 777(i) of the Act, and 19 CFR 351.221(b)(4).

Dated: May 6, 2024.

Ryan Majerus,

Deputy Assistant Secretary for Policy and Negotiations, performing the non-exclusive functions and duties of the Assistant Secretary for Enforcement and Compliance.

Steel Concrete Reinforcing Bar From Mexico: Final Results of Antidumping Duty Administrative Review; 2021–2022

SUMMARY: The U.S. Department of Commerce (Commerce) determines that sales of steel concrete reinforcing bar (rebar) from Mexico were made at less than normal value during the period of review (POR), November 1, 2021, through October 31, 2022.

DATES: Applicable May 10, 2024.

FOR FURTHER INFORMATION CONTACT: Patrick Barton or Kyle Clahane, AD/CVD Operations, Office III, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–0012 or (202) 482–5449, respectively.

SUPPLEMENTARY INFORMATION:

Background

On November 8, 2023, Commerce published the *Preliminary Results* for this review in the **Federal Register** and invited interested parties to comment on those results.[1] The review covers five companies, including two mandatory respondents, Deacero S.A.P.I. de C.V. (Deacero), and I.N.G.E.T.E.K.N.O.S. Estructurales, S.A. de C.V. (Ingetek) (collectively, Deacero Group), and Acerero S.A. de C.V. (Acerero). From January 5 to 10, 2024, interested parties submitted case and rebuttal briefs.[2] For a complete summary of the events that have occurred since Commerce

[1] *See Steel Concrete Reinforcing Bar from Mexico: Preliminary Results of Antidumping Duty Administrative Review; 2021–2022,* 88 FR 77079 (November 8, 2023) (*Preliminary Results*), and accompanying Preliminary Decision Memorandum.

[2] *See* Rebar Trade Action Coalition's Letter, ''RTAC's Case Brief,'' dated January 5, 2024; *see also* Deacero Group's Letter, ''Case Brief,'' dated January 5, 2024; Gerdau Corsa, S.A.P.I. de C.V. and Sidertul S.A. de C.V.'s Letter, ''Letter in Lieu of Case Brief of Gerdau Corsa, S.A.P.I. de C.V. and Sidertul S.A. de C.V.,'' dated January 5, 2024; Acerero's Letter, ''Rebuttal Brief of Grupo Acerero S.A. de C.V.,'' dated January 10, 2024; and Deacero Group's Letter, ''Rebuttal Brief,'' dated January 10, 2024.

published the *Preliminary Results,* as well as a full discussion of the issues raised by parties for these final results, *see* the Issues and Decision Memorandum.[3] Commerce conducted this review in accordance with section 751(a) of the Tariff Act of 1930, as amended (the Act).

Scope of the Order [4]

The product covered by the *Order* is rebar from Mexico. For a complete description of the scope, *see* the Issues and Decision Memorandum.

Analysis of Comments Received

All issues raised in the case and rebuttal briefs are addressed in the Issues and Decision Memorandum. A list of the issues that parties raised and to which we responded in the Issues and Decision Memorandum is attached in the appendix to this notice. The Issues and Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *https://access.trade.gov.* In addition, a complete version of the Issues and Decision Memorandum can be accessed directly at *https://access.trade.gov/public/FRNoticesListLayout.aspx.*

Changes Since the Preliminary Results

Based on a review of the record and comments received from interested parties regarding the *Preliminary Results,* we made certain changes to the preliminary weighted-average dumping margins calculated for Deacero Group and Acerero. For a detailed discussion of these changes, *see* the Issues and Decision Memorandum.[5]

Rate for Non-Individually Examined Companies

The Act and Commerce's regulations do not address the establishment of a rate to apply to companies not selected for individual examination when Commerce limits its examination in an administrative review pursuant to section 777A(c)(2) of the Act. Generally, Commerce looks to section 735(c)(5) of the Act, which provides instructions for calculating the all-others rate in a market economy investigation, for guidance when calculating the rate for companies which not selected for individual examination in an administrative review.

Under section 735(c)(5)(A) of the Act, the all-others rate is normally ''an amount equal to the weighted average of the estimated weighted-average dumping margins established for exporters and producers individually investigated, excluding rates that are zero, *de minimis* (*i.e.,* less than 0.5 percent), or determined entirely on the basis of facts available.

For these final results of review, we calculated weighted-average dumping margins for both respondents, Deacero Group and Acerero, that are not zero, *de minimis,* or based entirely on the basis of facts available. Accordingly, consistent with section 735(c)(5)(A) of the Act, we determined the weighted-average dumping margin for each of the non-selected companies based on the weighted-average dumping margins calculated for the mandatory respondents.[6]

Final Results of Review

Commerce determines that the following weighted-average dumping margins exist for the period August 1, 2021, through July 31, 2022:

Exporter or producer	Weighted-average dumping margin (percent)
Deacero S.A.P.I. de C.V./I.N.G.E.T.E.K.N.O.S. Estructurales, S.A. de C.V	1.16
Grupo Acerero S.A. de C.V	6.21
Grupo Simec S.A.B. de C.V./Aceros Especiales Simec Tlaxcala, S.A. de C.V./Compania Siderurgica del Pacifico S.A. de C.V./Fundiciones de Acero Estructurales, S.A. de C.V./Grupo Chant S.A.P.I. de C.V./Operadora de Perfiles Sigosa, S.A. de C.V./Orge S.A. de C.V./Perfiles Comerciales Sigosa, S.A. de C.V./RRLC S.A.P.I. de C.V./Siderúrgicos Noroeste, S.A. de C.V./Siderurgica del Occidente y Pacifico S.A. de C.V./Simec International, S.A. de C.V./Simec International 6 S.A. de C.V./Simec International 7 S.A. de C.V./Simec International 9 S.A. de C.V	2.11
Gerdau Corsa, S.A.P.I. de C.V	2.11
Sidertul S.A. de C.V	2.11

Disclosure

Commerce intends to disclose the calculations performed for these final results to interested parties in this review within five days of the date of publication of this notice in the **Federal Register**, in accordance with 19 CFR 351.224(b).

Assessment Rates

Pursuant to section 751(a)(2)(A) of the Act, and 19 CFR 351.212(b)(1), Commerce will determine, and U.S. Customs and Border Protection (CBP) shall assess, antidumping duties on all appropriate entries of subject merchandise covered by this review. In accordance with 19 CFR 351.212(b)(1), where the respondents reported the entered value of their U.S. sales, Commerce calculated importer-specific *ad valorem* antidumping duty assessment rates based on the ratio of the total amount of dumping calculated for each importer's examined sales to the total entered value of those same sales. Where the respondents did not report entered value, we calculated a per-unit assessment rate for each importer by dividing the total amount of dumping calculated for the examined sales made to that importer by the total quantity associated with those sales. To determine whether an importer-specific, per-unit assessment rate is *de minimis,* in accordance with 19 CFR 351.106(c)(2), we also calculated an importer-specific *ad valorem* ratio based on estimated entered values. Where either a respondent's weighted-average dumping margin is zero or *de minimis,* within the meaning of 19 CFR 351.106(c)(1), or an importer-specific assessment rate is zero or *de minimis,* we will instruct CBP to liquidate the

[3] *See* Memorandum, ''Steel Concrete Reinforcing Bar from Mexico: Issues and Decision Memorandum for the Final Results of Antidumping Duty Administrative Review; 2021–2022,'' dated concurrently with, and hereby adopted by, this notice (Issues and Decision Memorandum).

[5] *Id.*

[6] *See* Memorandum, ''Final Results of the Antidumping Duty Administrative Review of Steel Concrete Reinforcing Bar from Mexico: Calculation of the Rate for Non-Selected Respondents,'' dated concurrently with this notice.

appropriate entries without regard to antidumping duties.

Commerce's ''automatic assessment'' will apply to entries of subject merchandise during the POR for which the examined companies did not know that the merchandise they sold to an intermediary (*e.g.,* a reseller, trading company, or exporter) was destined for the United States. In such instances, we will instruct CBP to liquidate such entries at the all-others rate if there is no rate for the intermediate company(ies) involved in the transaction.

The assessment rate for antidumping duties for each of the companies not selected for individual examination will be equal to the weighted-average dumping margin identified above in the ''Final Results of Review'' section.

The final results of this review shall be the basis for the assessment of antidumping duties on entries of merchandise covered by the final results of this review and for future deposits of estimated duties, where applicable.[7]

Commerce intends to issue assessment instructions to CBP no earlier than 41 days after the date of publication of the final results of this review in the **Federal Register**, in accordance with 19 CFR 356.8(a).

Cash Deposit Requirements

The following cash deposit requirements will be effective for all shipments of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the publication date of the final results of this administrative review, as provided by section 751(a)(2)(C) of the Act: (1) the cash deposit rates for the companies identified above in the ''Final Results of Review'' will be equal to the company-specific weighted-average dumping margin established in the final results of this administrative review; (2) for merchandise exported by a company not covered in this administrative review but covered in a completed prior segment of the proceeding, the cash deposit rate will continue to be the company-specific rate published for the most recently completed segment of this proceeding; (3) if the exporter is not a firm covered in this review or completed prior segment of this proceeding but the producer is, the cash deposit rate will be the company-specific rate established for the most recently-completed segment of this proceeding for the producer of the subject merchandise; and (4) the cash deposit rate for all other producers or exporters will continue to be 20.58 percent, the rate established in the investigation of this proceeding.[8]

These cash deposit requirements, when imposed, shall remain in effect until further notice.

Notification to Importers

This notice serves as a final reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this POR. Failure to comply with this requirement could result in Commerce's presumption that reimbursement of antidumping duties has occurred and the subsequent assessment of double antidumping duties.

Administrative Protective Order

This notice also serves as a final reminder to parties subject to administrative protective order (APO) of their responsibility concerning the return or destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3), which continues to govern business proprietary information in this segment of the proceeding. Timely written notification of the return or destruction of APO materials, or conversion to judicial protective order, is hereby requested. Failure to comply with the regulations and the term of an APO is a sanctionable violation.

Notification to Interested Parties

We are issuing and publishing this notice in accordance with sections 751(a)(1) and 777(i)(1) of the Act, and 19 CFR 351.221(b)(5).

Dated: May 3, 2024.

Ryan Majerus,

Deputy Assistant Secretary for Policy and Negotiations, performing the non-exclusive functions and duties of the Assistant Secretary for Enforcement and Compliance.

DEPARTMENT OF COMMERCE

National Institute of Standards and Technology

National Construction Safety Team Advisory Committee Meeting

AGENCY: National Institute of Standards and Technology, Department of Commerce.

ACTION: Notice of open meeting.

SUMMARY: The National Construction Safety Team (NCST) Advisory Committee (Committee) will hold a virtual meeting via web conference on Thursday, September 12, 2024, from 8:30 a.m. to 5:00 p.m. Eastern Time. The primary purposes of this meeting are to update the Committee on the progress of the NCST investigation focused on the impacts of Hurricane Maria in Puerto Rico, and on the progress of the NCST investigation focused on the Champlain Towers South partial building collapse that occurred in Surfside, Florida. The final agenda will be posted on the NIST website at *https://www.nist.gov/topics/disaster-failure-studies/national-construction-safety-team-ncst/advisory-committee-meetings.*

DATES: The NCST Advisory Committee will meet on Thursday, September 12, 2024, from 8:30 a.m. to 5:00 p.m. Eastern Time. The meeting will be open to the public.

ADDRESSES: The meeting will be held via web conference. For instructions on how to participate in the meeting, please see the **SUPPLEMENTARY INFORMATION** section of this notice.

FOR FURTHER INFORMATION CONTACT: Tanya Brown-Giammanco, Disaster and Failure Studies Program, Engineering

Laboratory, NIST. Tanya Brown-Giammanco's email address is *Tanya.Brown-Giammanco@nist.gov* and her phone number is (301) 975–2822.

SUPPLEMENTARY INFORMATION: The Committee was established pursuant to Section 11 of the NCST Act (Pub. L. 107–231, codified at 15 U.S.C. 7301 *et seq.*). The Committee is currently composed of eight members, appointed by the Director of NIST, who were selected on the basis of established records of distinguished service in their professional community and their knowledge of issues affecting the National Construction Safety Team program. The Committee advises the Director of NIST on carrying out the NCST Act; reviews the procedures developed for conducting investigations; and reviews the reports issued documenting investigations. Background information on the NCST Act and information on the NCST Advisory Committee is available at *https://www.nist.gov/topics/disaster-failure-studies/national-construction-safety-team-ncst/advisory-committee.*

Pursuant to the Federal Advisory Committee Act, as amended, 5 U.S.C. 1001 *et seq.,* notice is hereby given that the NCST Advisory Committee will meet on the date(s) and at the time(s) set forth in the **DATES** section of this notice. The meeting will be open to the public and will be held via web conference. Interested members of the public will be able to participate in the meeting from remote locations. The primary purposes of this meeting are to update the Committee on the progress of the NCST investigation focused on the impacts of Hurricane Maria in Puerto Rico, and on the progress of the NCST investigation focused on the Champlain Towers South partial building collapse that occurred in Surfside, Florida. The agenda may change to accommodate Committee business. The final agenda will be posted on the NIST website at *https://www.nist.gov/topics/disaster-failure-studies/national-construction-safety-team-ncst/advisory-committee-meetings.*

This meeting will be recorded. Individuals and representatives of organizations who would like to offer comments and suggestions related to items on the Committee's agenda for this meeting are invited to request a place on the agenda. Approximately twenty minutes will be reserved for public comments and speaking times will be assigned on a first-come, first-served basis. The amount of time per speaker will be determined by the number of requests received. Questions from the public will not be considered during this period. All those wishing to speak must submit their request by email to the attention of Taylor Avery at *taylor.avery@nist.gov* by 5:00 p.m. Eastern Time, Monday September 9, 2024. Any member of the public is also permitted to file a written statement with the advisory committee; speakers who wish to expand upon their oral statements, those who wish to speak but cannot be accommodated on the agenda, and those who are unable to attend are invited to submit written statements electronically by email to *disaster@nist.gov.*

Anyone wishing to attend this meeting via web conference must register by 5:00 p.m. Eastern Time, Monday, September 9, 2024, to attend. Please submit your full name, the organization you represent (if applicable), email address, and phone number to Taylor Avery at *taylor.avery@nist.gov.*

Alicia Chambers,

NIST Executive Secretariat.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[RTID 0648–XD904]

Pacific Fishery Management Council; Public Meetings

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public meetings.

SUMMARY: The Pacific Fishery Management Council's (Pacific Council) Coastal Pelagic Species Management Team (CPSMT) and Coastal Pelagic Species Advisory Subpanel (CPSAS) will hold public meetings.

DATES: The CPSMT meeting will be held Wednesday, May 29, 2024, from 9 a.m. to 12 p.m., Pacific Daylight Time or until business for the day has been completed.

The CPSAS meeting will be held Thursday, May 30, 2024, from 1 p.m. to 4 p.m., Pacific Daylight Time or until business for the day has been completed.

ADDRESSES: These meetings will be held online. Specific meeting information, including directions on how to join the meeting and system requirements will be provided in the meeting announcement on the Pacific Council's website (see *www.pcouncil.org*). You may send an email to Mr. Kris Kleinschmidt (*kris.kleinschmidt@noaa.gov*) or contact him at (503) 820–2412 for technical assistance.

Council address: Pacific Fishery Management Council, 7700 NE Ambassador Place, Suite 101, Portland, OR 97220–1384.

FOR FURTHER INFORMATION CONTACT: Jessi Doerpinghaus, Staff Officer, Pacific Council; telephone: (503) 820–2415.

SUPPLEMENTARY INFORMATION: The primary purpose of the CPSMT and CPSAS online meetings are to discuss and develop work products and recommendations for the Pacific Council's June 2024 meeting. Topics will include terms of reference for CPS stock assessments, Council operations and priorities, and marine planning. Other items on the Pacific Council's June agenda may be discussed as well. The meeting agendas will be available on the Pacific Council's website in advance of the meetings. No management actions will be decided by the CPSMT or CPSAS. CPSMT and CPSAS recommendations will be considered by the Pacific Council at their June Council meeting.

Although non-emergency issues not contained in the meeting agenda may be discussed, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically listed in this document and any issues arising after publication of this document that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the intent to take final action to address the emergency.

Special Accommodations

Requests for sign language interpretation or other auxiliary aids should be directed to Mr. Kris Kleinschmidt (*kris.kleinschmidt@noaa.gov;* (503) 820–2412) at least 10 days prior to the meeting date.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: May 7, 2024.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[RTID 0648–XD936]

Fisheries of the U.S. Caribbean; Southeast Data, Assessment, and Review (SEDAR); Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of SEDAR 84 Assessment Webinar III for U.S Caribbean Yellowtail Snapper and Stoplight Parrotfish.

SUMMARY: The SEDAR 84 assessment process of U.S. Caribbean yellowtail snapper and stoplight parrotfish will consist of a Data Workshop, and a series of assessment webinars, and a Review Workshop. See **SUPPLEMENTARY INFORMATION**.

DATES: The SEDAR 84 assessment webinar III will be held May 29, 2024, from 2 p.m. to 4 p.m., Eastern Time.

ADDRESSES: The meeting will be held via webinar. The webinar is open to members of the public. Those interested in participating should contact Julie A. Neer at SEDAR (see **FOR FURTHER INFORMATION CONTACT**) to request an invitation providing webinar access information. Please request webinar invitations at least 24 hours in advance of each webinar.

SEDAR address: 4055 Faber Place Drive, Suite 201, North Charleston, SC 29405.

FOR FURTHER INFORMATION CONTACT: Julie A. Neer, SEDAR Coordinator; (843) 571–4366; email: *Julie.neer@safmc.net.*

SUPPLEMENTARY INFORMATION: The Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils, in conjunction with NOAA Fisheries and the Atlantic and Gulf States Marine Fisheries Commissions have implemented the Southeast Data, Assessment and Review (SEDAR) process, a multi-step method for determining the status of fish stocks in the Southeast Region. SEDAR is a multi-step process including: (1) Data Workshop, (2) a series of assessment webinars, and (3) A Review Workshop. The product of the Data Workshop is a report that compiles and evaluates potential datasets and recommends which datasets are appropriate for assessment analyses. The assessment webinars produce a report that describes the fisheries, evaluates the status of the stock, estimates biological benchmarks, projects future population conditions, and recommends research and monitoring needs. The product of the Review Workshop is an Assessment Summary documenting panel opinions regarding the strengths and weaknesses of the stock assessment and input data. Participants for SEDAR Workshops are appointed by the Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils and NOAA Fisheries Southeast Regional Office, HMS Management Division, and Southeast Fisheries Science Center. Participants include data collectors and database managers; stock assessment scientists, biologists, and researchers; constituency representatives including fishermen, environmentalists, and NGO's; International experts; and staff of Councils, Commissions, and state and federal agencies.

The items of discussion during the Assessment webinar III are as follows:

Panelists will review and discuss initial assessment modeling to date.

Although non-emergency issues not contained in this agenda may come before this group for discussion, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically identified in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the intent to take final action to address the emergency.

Special Accommodations

The meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to the Council office (see **ADDRESSES**) at least 5 business days prior to each workshop.

Note: The times and sequence specified in this agenda are subject to change.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: May 7, 2024.

Rey Israel Marquez,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), a final determination has been made that the activities proposed are categorically excluded from the requirement to prepare an environmental assessment or environmental impact statement.

As required by the ESA, as applicable, issuance of these permits was based on a finding that such permits: (1) were applied for in good faith; (2) will not operate to the disadvantage of such endangered species; and (3) are consistent with the purposes and policies set forth in section 2 of the ESA.

Authority: The requested permits have been issued under the MMPA of 1972, as amended (16 U.S.C. 1361 *et seq.*), the regulations governing the taking and importing of marine mammals (50 CFR part 216), the ESA of 1973, as amended (16 U.S.C. 1531 *et seq.*), and the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR parts 222–226), as applicable.

Dated: May 7, 2024.

Julia M. Harrison,

Chief, Permits and Conservation Division, Office of Protected Resources, National Marine Fisheries Service.

BILLING CODE 3510–22–P

COMMITTEE FOR PURCHASE FROM PEOPLE WHO ARE BLIND OR SEVERELY DISABLED

Procurement List; Proposed Additions and Deletions

AGENCY: Committee for Purchase From People Who Are Blind or Severely Disabled.

ACTION: Proposed additions to and deletions from the Procurement List.

SUMMARY: The Committee is proposing to add service(s) to the Procurement List that will be furnished by nonprofit agencies employing persons who are blind or have other severe disabilities, and delete product(s) previously furnished by such agencies.

DATES: Comments must be received on or before: June 09, 2024.

ADDRESSES: Committee for Purchase From People Who Are Blind or Severely Disabled, 355 E Street SW, Suite 325, Washington, DC 20064.

FOR FURTHER INFORMATION CONTACT: For further information or to submit comments contact: Michael R. Jurkowski, Telephone: (703) 785–6404, or email *CMTEFedReg@AbilityOne.gov.*

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 8503(a)(2) and 41 CFR 51–2.3. Its purpose is to provide interested persons an opportunity to submit comments on the proposed actions.

Additions

In accordance with 41 CFR 51–5.3(b), the Committee intends to add this services requirement to the Procurement List as a mandatory purchase only for DEPT OF THE AIR FORCE, FA3300 42 CONS CC at Maxwell AFB (including Gunter Annex and Vigilant Warrior Training Site), Montgomery, AL with the proposed qualified nonprofit agency as the authorized source of supply. Prior to adding the service to the Procurement List, the Committee will consider other pertinent information, including information from Government personnel and relevant comments from interested parties regarding the Committee's intent to geographically limit this services requirement.

The following service(s) are proposed for addition to the Procurement List for production by the nonprofit agencies listed:

Service(s)

Service Type: Custodial and Related Services
Mandatory for: US Air Force, Maxwell AFB (including Gunter Annex and Vigilant Warrior Training Site), Montgomery, AL
Authorized Source of Supply: Global Connections to Employment, Inc., Pensacola, FL
Contracting Activity: DEPT OF THE AIR FORCE, FA3300 42 CONS CC

Deletions

The following product(s) are proposed for deletion from the Procurement List:

Product(s)

NSN(s)—Product Name(s):
1670–01–578–6771—Deployment Bag, Parachute, 35 Feet (T–10R)
Authorized Source of Supply: Georgia Industries for the Blind, Bainbridge, GA
Authorized Source of Supply: Winston-Salem Industries for the Blind, Inc, Winston-Salem, NC
Contracting Activity: DLA AVIATION, RICHMOND, VA

Michael R. Jurkowski,

Deputy, Business Operations.

BILLING CODE 6353–01–P

DEPARTMENT OF EDUCATION

[Docket No.: ED–2023–SCC–0216]

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Comment Request; Process for FSA ID Account Creation for Individuals Without a Social Security Number in Connection With Person Authentication Service (PAS)

AGENCY: Federal Student Aid (FSA), Department of Education (ED).

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act (PRA) of 1995, the Department is proposing an extension without change of a currently approved information collection request (ICR).

DATES: Interested persons are invited to submit comments on or before June 10, 2024.

ADDRESSES: Written comments and recommendations for proposed information collection requests should be submitted within 30 days of publication of this notice. Click on this link *www.reginfo.gov/public/do/PRAMain* to access the site. Find this information collection request (ICR) by selecting ''Department of Education'' under ''Currently Under Review,'' then check the ''Only Show ICR for Public Comment'' checkbox. *Reginfo.gov* provides two links to view documents related to this information collection request. Information collection forms and instructions may be found by clicking on the ''View Information Collection (IC) List'' link. Supporting statements and other supporting documentation may be found by clicking on the ''View Supporting Statement and Other Documents'' link.

FOR FURTHER INFORMATION CONTACT: For specific questions related to collection activities, please contact Beth Grebeldinger, (202) 377–4018.

SUPPLEMENTARY INFORMATION: The Department is especially interested in public comment addressing the following issues: (1) is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

Title of Collection: Process for FSA ID Account Creation for Individuals without a Social Security Number in Connection with Person Authentication Service (PAS).

OMB Control Number: 1845–0179.

Type of Review: Extension without change of a currently approved ICR.

Respondents/Affected Public: Individuals or Households.

Total Estimated Number of Annual Responses: 3,500.

Total Estimated Number of Annual Burden Hours: 1,155.

Abstract: Applicants, parents, and borrowers establish an FSA ID, which includes a username and password. The FSA ID is used for the purposes of verifying the identity of the user; allowing users to establish an account with FSA; safeguarding their personally identifiable and financial information; signing applications and loan related documents; providing users access to their information and applications; allowing users to customize or update their accounts with FSA; renewing or revoking a user's account with FSA; and supporting the Federal Student Aid Information Center (FSAIC) help desk functions.

The specific questions that applicants are asked to answer in the FSA ID creation process are described separately in the Creating FSA–ID document, which explains the use of the questions in the application. As part of the standard process, users' information is matched with information from the Social Security Administration (SSA) to confirm their SSA status.

In the event of individuals who do not have a SSN to match, they are instructed to the contact the Department and provide one of the following documents (U.S. State/Territory Driver's License; U.S. State or City Identification Card; Foreign Passport; Municipal identification card; Community ID; or a Consular identification card) and a signed attestation of their identity under the penalty of perjury, as instructed by the Privacy Act.

This collection provides the process and application that individuals without an SSN may use to acquire an FSA ID to access the statutory and regulatory benefits of the Title IV, HEA student financial assistance programs.

Dated: May 6, 2024.

Kun Mullan,

PRA Coordinator, Strategic Collections and Clearance, Governance and Strategy Division, Office of Chief Data Officer, Office of Planning, Evaluation and Policy Development.

DEPARTMENT OF EDUCATION

[Docket No.: ED–2023–SCC–0124]

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Comment Request; Evaluation of the Toolkit to Support Evidence-Based Algebra Instruction in Middle and High School

AGENCY: Institute of Education Sciences (IES), Department of Education (ED).

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act (PRA) of 1995, the Department is proposing a revision of a currently approved information collection request (ICR).

DATES: Interested persons are invited to submit comments on or before June 10, 2024.

ADDRESSES: Written comments and recommendations for proposed information collection requests should be submitted within 30 days of publication of this notice. Click on this link *www.reginfo.gov/public/do/PRAMain* to access the site. Find this information collection request (ICR) by selecting ''Department of Education'' under ''Currently Under Review,'' then check the ''Only Show ICR for Public Comment'' checkbox. *Reginfo.gov* provides two links to view documents related to this information collection request. Information collection forms and instructions may be found by clicking on the ''View Information Collection (IC) List'' link. Supporting statements and other supporting documentation may be found by clicking on the ''View Supporting Statement and Other Documents'' link.

FOR FURTHER INFORMATION CONTACT: For specific questions related to collection activities, please contact Eric Mason, (202) 987–1355.

SUPPLEMENTARY INFORMATION: The Department is especially interested in public comment addressing the following issues: (1) is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate;

(4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

Title of Collection: Evaluation of the Toolkit to Support Evidence-Based Algebra Instruction in Middle and High School.

OMB Control Number: 1850–0988.

Type of Review: Revision of a currently approved ICR.

Respondents/Affected Public: Individuals or households.

Total Estimated Number of Annual Responses: 1,029.

Total Estimated Number of Annual Burden Hours: 358.

Abstract: The current authorization for the Regional Educational Laboratories (REL) program is under the Education Sciences Reform Act of 2002, part D, section 174, (20 U.S.C. 9564), administered by the Department of Education, Institute of Education Sciences (IES), National Center for Education Evaluation and Regional Assistance (NCEE). The central mission and primary function of the RELs is to support applied research and provide technical assistance to state and local education agencies within their region (ESRA, part D, section 174[f]). The REL program's goal is to partner with educators and policymakers to conduct work that is change-oriented and supports meaningful local, regional, or state decisions about education policies, programs, and practices to improve outcomes for students.

Even prior to the COVID–19 pandemic, Algebra 1 proved challenging for many students because of the extensive abstract thinking it requires (Katz, 2007; Susa et al., 2014). To help students succeed in Algebra 1, REL Central is developing a toolkit of professional learning supports to help Algebra 1 teachers learn about, make sense of, plan for, and implement three evidence-based Algebra 1 teaching practices that were identified in the related What Works Clearinghouse (WWC) Practice Guide, ''Teaching Strategies for Improving Algebra Knowledge in Middle and high School Students.'' The toolkit contains the following three parts: (1) Initial Diagnostic and On-going Monitoring Instruments, (2) Professional Development Resources, and (3) Steps for Institutionalizing Supports for Evidence-Based Practice.

This study will assess whether implementing the toolkit improves teacher and student outcomes and will describe the implementation of the toolkit in study schools that use it. Using a school-level randomized controlled trial during the 2024–2025 school year, the study will estimate the impact of the toolkit on teachers' self-efficacy and their understanding and use of the promising practices, as well as on students' algebraic content knowledge, self-efficacy, and mathematical mindsets. To provide context for the impact estimates and inform future use of the toolkit, the study will also describe the implementation of the toolkit. The study plans to include 20 schools from up to three school districts. To disseminate these findings, REL Central will produce a report for school leaders and teachers who are potential users of the toolkit.

The original information collection request received approval for recruitment activities. This revision requests clearance for data collection activities.

Dated: May 6, 2024.

Juliana Pearson,

PRA Coordinator, Strategic Collections and Clearance, Governance and Strategy Division, Office of Chief Data Officer, Office of Planning, Evaluation and Policy Development.

Title of Collection: US Department of Education Pre-Authorized Debit Account Brochure and Application.

OMB Control Number: 1845–0025.

Type of Review: Extension without change of a currently approved ICR.

Respondents/Affected Public: Individuals or Households.

Total Estimated Number of Annual Responses: 637.

Total Estimated Number of Annual Burden Hours: 51.

Abstract: The Pre-authorized Debit Account Brochure and Application (PDA Application) serves as the means by which an individual with a defaulted federal education debt (student loan or grant overpayment) that is held by the U.S. Department of Education (ED) requests and authorizes the automatic debiting of payments toward satisfaction of the debt from the borrower's checking or savings account. The PDA Application explains the automatic debiting process and collects the individual's authorization for the automatic debiting and the bank account information needed by ED to debit the individual's account.

Total Estimated Number of Annual Responses: 60.

Total Estimated Number of Annual Burden Hours: 1,380.

Abstract: This information collection request revises the 1810–0727 College Assistance Migrant Program (CAMP) Annual Performance Report (APR) collection. These changes include language replacements, removals, and additions intended to ensure compliance with 34 CFR 75.110 and OMB Circular A–110, improve clarity of instructions and data collection, and remove duplicative language. Substantive changes include the addition of a data element related to mode of instruction and the removal of a data element related to the SAT and ACT. For a complete list of revisions, please see the attached summary, which will be shared with the public and Office of Management and Budget (OMB) as a supplemental document.

The Office of Migrant Education (OME) collects information for the CAMP, which is authorized under Title IV, Section 418A of the Higher Education Act of 1965, as amended by Section 408 of the Higher Education Opportunity Act (HEOA) (20 U.S.C. 1070d–2) (special programs for students whose families are engaged in migrant and seasonal farmwork), and 2 CFR 200.328, which requires that recipients of discretionary grants submit an APR to best inform improvements in program outcomes and productivity.

Although the Education Department continues to use the generic 524B, the OME requests continued use of a customized APR that goes beyond the generic 524B APR to facilitate the collection of more standardized and comprehensive data to inform performance measure indicators, to improve the overall quality of data collected, and to increase the quality of data that can be used to inform policy decisions.

Dated: May 6, 2024.

Kun Mullan,

PRA Coordinator, Strategic Collections and Clearance Governance and Strategy Division, Office of Chief Data Officer, Office of Planning, Evaluation and Policy Development.

BILLING CODE 4000–01–P

ELECTION ASSISTANCE COMMISSION

Technical Guidelines Development Committee (TGDC) Notice of Vacancy

AGENCY: Election Assistance Commission.

ACTION: Notice of vacancy.

SUMMARY: Pursuant to the Help America Vote Act (HAVA) and the Charter of the EAC Technical Guidelines Development Committee (TGDC), the EAC is posting this notice of vacancy for an individual with technical and scientific expertise relating to voting systems and voting equipment. The vacancy shall be filled jointly by the EAC and the Director of the National Institute of Standards and Technology (NIST).

ADDRESSES: Pursuant to the TGDC Charter, the EAC will post the notice on the EAC website: *https://www.eac.gov.* Interested, qualified individuals should contact the Alternate Designated Federal Official by email, *jpanek@eac.gov.*

SUPPLEMENTARY INFORMATION:

TGDC Appointment Process

The Technical Guidelines Development Committee (TGDC) is a non-discretionary Federal Advisory Committee established by the Help America Vote Act of 2002 (HAVA), Public Law 107–252, 116 Stat. 1666 (2002). The TGDC assists the EAC in developing the Voluntary Voting System Guidelines (VVSG). The chairperson of the TGDC is the director of the National Institute of Standards and Technology (NIST). The TGDC is composed of 14 other members appointed jointly by EAC and the director of NIST.

HAVA mandates that the 14 other members appointed jointly by the EAC and NIST shall include individuals with technical and scientific expertise relating to voting systems and voting equipment. The TGDC Charter requires that notice of vacancies on the Committee for those individuals jointly appointed by EAC and NIST be published in the **Federal Register** as well as on the Commission's website. Pursuant to HAVA and the TGDC charter, the EAC is publishing this notice of vacancy on the TGDC. This

vacancy shall be filled through a joint appointment by the EAC and NIST.

This notice will remain active through May 24, 2024.

Camden Kelliher,

Acting General Counsel, U.S. Election Assistance Commission.

[FR Doc. 2024–10226 Filed 5–9–24; 8:45 am]

BILLING CODE P

DEPARTMENT OF ENERGY

Update on Reimbursement for Costs of Remedial Action at Uranium and Thorium Processing Sites

AGENCY: Office of Environmental Management, Department of Energy.

ACTION: Notice of acceptance of title X claims during fiscal year (FY) 2024.

SUMMARY: This Notice announces the Department of Energy's (DOE) acceptance of claims in FY 2024 from eligible uranium and thorium processing site licensees for reimbursement under title X of the Energy Policy Act of 1992. The FY 2024 DOE Office of Environmental Management's Congressional Budget Request included $24.4 million for the Title X Uranium and Thorium Reimbursement Program; however, the Congressional appropriation for FY 2024 is zero dollars ($0.00). Thus, the claims received in FY 2023 and claims received in FY 2024 cannot be reimbursed until there is a new appropriation from Congress.

DATES: The closing date for the submission of FY 2024 title X claims is July 8, 2024. DOE will review claims for eligibility and claims will be processed for payment together with any eligible unpaid approved claim balances from prior years, based on availability of funds from future congressional appropriations. If the total approved claim amounts exceed the available funding, the approved claim amounts will be reimbursed on a prorated basis. All reimbursements are subject to the availability of funds from congressional appropriations.

ADDRESSES: Claims must be submitted by certified or registered mail, return receipt requested, to Charlee Anne Boger, U.S. DOE Department of Energy, Office of Legacy Management, 2597 Legacy Way, Grand Junction, Colorado 81503. Two copies of the claim should be included with each submission. In addition to the mailed hardcopies, claims may be submitted electronically to *Charlee.Boger@lm.doe.gov.*

FOR FURTHER INFORMATION CONTACT: Amie Robinson, Title X Program Lead at (240) 243–5550 or email*: amie.robinson@em.doe.gov.*

SUPPLEMENTARY INFORMATION: DOE published a final rule under 10 CFR part 765 in the **Federal Register** on May 23, 1994, (59 FR 26714) to carry out the requirements of title X of the Energy Policy Act of 1992 (sections 1001–1004 of Pub. L. 102–486, 42 U.S.C. 2296a *et seq.*) and to establish the procedures for eligible licensees to submit claims for reimbursement. DOE amended the final rule on June 3, 2003, (68 FR 32955) to adopt several technical and administrative amendments (*e.g.,* statutory increases in the reimbursement ceilings). Title X requires DOE to reimburse eligible uranium and thorium licensees for certain costs of decontamination, decommissioning, reclamation, and other remedial action incurred by licensees at active uranium and thorium processing sites. The eligible licensees incurred these costs to remediate byproduct material, generated as an incident of sales to the United States Government of uranium or thorium that was extracted or concentrated from ores processed primarily for their source material contents. To be reimbursable, costs of remedial action must be for work that is necessary to comply with applicable requirements of the Uranium Mill Tailings Radiation Control Act of 1978 (42 U.S.C. 7901 *et seq.*) or, where appropriate, with requirements established by a State pursuant to a discontinuance agreement under section 274 of the Atomic Energy Act of 1954 (42 U.S.C. 2021). Claims for reimbursement must be supported by reasonable documentation as determined by DOE in accordance with 10 CFR part 765. Funds for reimbursement will be provided from the Uranium Enrichment Decontamination and Decommissioning Fund established at the Department of Treasury pursuant to section 1801 of the Atomic Energy Act of 1954 (42 U.S.C. 2297g). Payment or obligation of funds shall be subject to the requirements of the Anti-Deficiency Act (31 U.S.C. 1341).

Authority: Section 1001–1004 of Pub. L. 102–486, 106 Stat. 2776 (42 U.S.C. 2296a *et seq.*).

Signing Authority

This document of the Department of Energy was signed on May 3, 2024, by Amie Robinson, Office of Waste Disposal, Office of Environmental Management, pursuant to delegated authority from the Secretary of Energy. That document with the original signature and date is maintained by DOE. For administrative purposes only, and in compliance with requirements of the Office of the Federal Register, the undersigned DOE Federal Register Liaison Officer has been authorized to sign and submit the document in electronic format for publication, as an official document of the Department of Energy. This administrative process in no way alters the legal effect of this document upon publication in the **Federal Register**.

Signed in Washington, DC, on May 6, 2024.

Treena V. Garrett,

Federal Register Liaison Officer, U.S. Department of Energy.

BILLING CODE 6450–01–P

DEPARTMENT OF ENERGY

Notice of Availability of Preliminary List of Potential National Interest Electric Transmission Corridors; Request for Comments

AGENCY: Grid Deployment Office, Department of Energy.

ACTION: Notice of availability of preliminary list; request for comments.

SUMMARY: The U.S. Department of Energy (DOE) gives notice of availability of the preliminary list of potential National Interest Electric Transmission Corridors (NIETCs). This issuance initiates Phase 2 of the NIETC designation process outlined in the guidance DOE released on December 19, 2023. NIETC designation focuses public and policymaker attention on the areas of greatest transmission need and unlocks valuable Federal financing and permitting tools to advance transmission development. Additional information on one of those tools—Transmission Facility Financing—is also included with the preliminary list.

DATES: Interested parties may submit comments on the preliminary list of potential NIETCs and information and recommendations focused on those potential NIETCs based on the list of information requested for Phase 2 in the NIETC Guidance by 5:00 p.m. ET on June 24, 2024.

FOR FURTHER INFORMATION CONTACT: Gretchen Kershaw, U.S. Department of Energy, Grid Deployment Office, at (202) 586–2006; or *NIETC@hq.doe.gov.*

SUPPLEMENTARY INFORMATION: DOE's Grid Deployment Office (GDO) is announcing the availability of the *Initiation of Phase 2 of National Interest Electric Transmission Corridor (NIETC) Designation Process: Preliminary List of Potential NIETCs.* Section 216(a)(2) of

the Federal Power Act (FPA), as amended by section 40105 of the Infrastructure Investment and Jobs Act (IIJA), requires DOE to issue a report not less frequently than once every three years, which may designate as a NIETC any geographic area that is experiencing or is expected to experience electric energy transmission capacity constraints or congestion that adversely affects consumers. DOE must base any NIETC designation on the findings of DOE's triennial nationwide study required by FPA section 216(a)(1), which DOE refers to as the National Transmission Needs Study (Needs Study), or other information relating to electric energy transmission capacity constraints or congestion. In addition, the FPA requires DOE to consider alternatives and recommendations from interested parties (including an opportunity for comment from affected States and Indian Tribes) and to consult with regional entities when designating a NIETC. FPA section 216(a)(4) allows DOE to also consider several additional factors in designating a NIETC.

On December 19, 2023, DOE released final guidance (NIETC Guidance) that describes DOE's intended implementation of this statutory authority and initiated the process for designating one or more NIETCs following issuance of the Needs Study released in October 2023. The NIETC Guidance sets forth a four-phase process, which begins with DOE evaluating the results of the most recent Needs Study to begin identifying potential geographic areas for NIETC designation and concurrent 45-day Phase 1 information submission window. During this window, interested parties may submit information and recommendations on the narrow geographic boundaries of potential NIETCs, the present or expected transmission capacity constraints or congestion within those geographic boundaries, and the relevant discretionary factors in FPA section 216(a)(4). For this iteration of the NIETC designation process, that window opened with issuance of the final guidance on December 19, 2023, and closed on February 2, 2024.

Phase 2 of the NIETC designation process begins with DOE's issuance of a preliminary list of potential NIETCs, which is the subject of this notice. The preliminary list identifies which potential NIETCs DOE is continuing to consider, provides a high-level explanation of the basis for those potential NIETCs, and opens a public comment period to gather information specific to the listed potential NIETCs. DOE may narrow the list of potential NIETCs as the designation process proceeds to Phase 3. DOE plans to prioritize which potential NIETCs move to Phase 3 based on the available information on geographic boundaries and potential impacts on environmental, community, and other resources and preliminary review of comments. During Phase 3, DOE continues to independently assess the basis for NIETC designation, initiates any needed environmental reviews, and conducts robust public engagement, culminating in the release of one or more draft designation reports and draft environmental documents, as needed, for public comment. Phase 4 is the conclusion of the NIETC designation process, with issuance of one or more final designation reports and final environmental documents, as needed.

The preliminary list of potential NIETCs was informed by numerous Phase 1 information submissions and recommendations from interested parties and DOE's internal preliminary analysis of known possible environmental, community, and other resource impacts. DOE preliminarily finds that the geographic areas depicted in the preliminary list of potential NIETCs constitute targeted, high-priority areas where NIETC designation is likely to catalyze transmission development to alleviate transmission capacity constraints or congestion and the associated adverse effects on consumers, thereby making the most efficient and effective use of DOE's resources. DOE intends to employ NIETC designation in one or more of these geographic areas to further the timely buildout of a reliable, resilient, and efficient transmission system that facilitates the achievement of national energy policy goals while reducing consumer energy costs.

During the 45-day comment period on the preliminary list of potential NIETCs, DOE invites interested parties to comment on the information contained within the preliminary list of potential NIETCs. This includes commenting on the present or expected transmission capacity constraints or congestion relevant to the potential NIETCs in the preliminary list as well as the adverse effects on consumers resulting therefrom (*i.e.,* the consumer harms resulting from inadequate transmission within the potential NIETCs).

In addition, DOE invites interested parties to submit further information on the thirteen resource report categories listed in the NIETC Guidance for Phase 2: (1) geographic boundaries; (2) water use and quality; (3) fish, wildlife, and vegetation; (4) cultural resources; (5) socioeconomics; (6) Tribal resources; (7) communities of interest; (8) geological resources; (9) soils; (10) land use, recreation, and aesthetics; (11) air quality and environmental noise; (12) alternatives; and (13) reliability and safety. The Phase 2 information submission window is focused on gathering additional information on geographic boundaries and potential impacts on environmental, community, and other resources to facilitate DOE's environmental review, which starts in Phase 3. Interested parties may submit information related to one or more of the thirteen categories listed.

NIETC designation focuses public and policymaker attention on the areas of greatest transmission need and unlocks valuable federal financing and permitting tools to advance transmission development. These include DOE authorities under the IIJA, the Inflation Reduction Act, and the Energy Policy Act of 2005, as well as the Federal Energy Regulatory Commission's permitting authority under FPA section 216(b). Additional information on one of those tools—Transmission Facility Financing—is included with the preliminary list of potential NIETCs, including eligibility criteria. DOE invites input on the scope of eligible projects, as explained further in the document.

Members of the public can visit GDO's website to access the preliminary list of potential NIETCs at: *https://www.energy.gov/gdo/national-interest-electric-transmission-corridor-designation-process.* Additionally, the NIETC Guidance remains available at: *https://www.energy.gov/sites/default/files/2023-12/2023-12-15%20GDO%20NIETC%20Final%20Guidance%20Document.Vpdf.*

Signing Authority

This document of the Department of Energy was signed on May 7, 2024, by Maria D. Robinson, pursuant to delegated authority from the Secretary of Energy. That document with the original signature and date is maintained by DOE. For administrative purposes only, and in compliance with requirements of the Office of the Federal Register, the undersigned DOE Federal Register Liaison Officer has been authorized to sign and submit the document in electronic format for publication, as an official document of the Department of Energy. The administrative process in no way alters the legal effect of this document upon publication in the **Federal Register**.

Signed in Washington, DC, on May 7, 2024.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. ER24–1941–000]

Liberty County Solar Project, LLC; Supplemental Notice That Initial Market-Based Rate Filing Includes Request for Blanket Section 204 Authorization

This is a supplemental notice in the above-referenced proceeding of Liberty County Solar Project, LLC's application for market-based rate authority, with an accompanying rate tariff, noting that such application includes a request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability.

Any person desiring to intervene or to protest should file with the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant.

Notice is hereby given that the deadline for filing protests with regard to the applicant's request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability, is May 28, 2024.

The Commission encourages electronic submission of protests and interventions in lieu of paper, using the FERC Online links at *http://www.ferc.gov.* To facilitate electronic service, persons with internet access who will eFile a document and/or be listed as a contact for an intervenor must create and validate an eRegistration account using the eRegistration link. Select the eFiling link to log on and submit the intervention or protests.

Persons unable to file electronically may mail similar pleadings to the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426. Hand delivered submissions in docketed proceedings should be delivered to Health and Human Services, 12225 Wilkins Avenue, Rockville, Maryland 20852.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502–6595 or *OPP@ferc.gov.*

Dated: May 6, 2024.

Federal Energy Regulatory Commission

[Docket No. IN79–6–000]

FERC Form 580 Interrogatory on Fuel and Energy Purchase Practices, Notice of Request for Partial Waiver

Take notice that on May 1, 2024, pursuant to Rule 207(a)(5) of the Federal Energy Regulatory Commission's (Commission) Rules of Practice and Procedure,[1] Sierra Pacific Power Company submitted a request for a partial waiver of the requirement to respond to the 2024 FERC Form 580 Interrogatory on Fuel and Energy Purchase Practices, as more fully explained in the request.

Any person desiring to intervene or to protest this filing must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a notice of intervention or motion to intervene, as appropriate. Such notices, motions, or protests must be filed on or before the comment date. Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant.

In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the internet through the Commission's Home Page (*http://www.ferc.gov*). From the Commission's Home Page on the internet, this information is available on eLibrary. The full text of this document is available on eLibrary in PDF and Microsoft Word format for viewing, printing, and/or downloading. To access this document in eLibrary, type the docket number excluding the last three digits of this document in the docket number field.

User assistance is available for eLibrary and the Commission's website during normal business hours from FERC Online Support at 202–502–6652 (toll free at 1–866–208–3676) or email at *ferconlinesupport@ferc.gov,* or the Public Reference Room at (202) 502–8371, TTY (202) 502–8659. Email the Public Reference Room at *public.referenceroom@ferc.gov.*

The Commission strongly encourages electronic filings of comments, protests and interventions in lieu of paper using the ''eFiling'' link at *http://www.ferc.gov.* Persons unable to file electronically may mail similar pleadings to the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426. Hand delivered submissions in docketed proceedings should be delivered to Health and Human Services, 12225 Wilkins Avenue, Rockville, Maryland 20852.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. IC24–11–000]

Commission Information Collection Activities (FERC–576) Comment Request; Extension

AGENCY: Federal Energy Regulatory Commission.

ACTION: Notice of information collection and request for comments.

SUMMARY: In compliance with the requirements of the Paperwork Reduction Act of 1995 (PRA), the Federal Energy Regulatory Commission (Commission or FERC) is soliciting public comment on the currently approved information collection, FERC–576, OMB Control Number 1902–0004, which will be submitted to the Office of Management and Budget (OMB) for review.

DATES: Comments on the collection of information are due June 10, 2024.

ADDRESSES: Send written comments on FERC–576 to OMB through *www.reginfo.gov/public/do/PRAMain.* Attention: Federal Energy Regulatory Commission Desk Officer. Please identify the OMB Control Number (1902–0004) in the subject line of your comments. Comments should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.*

Please submit copies of your comments to the Commission. You may submit copies of your comments (identified by Docket No. IC24–11–000 and FERC–576) by one of the following methods:

Electronic filing through *https://www.ferc.gov,* is preferred.

- *Electronic Filing:* Documents must be filed in acceptable native applications and print-to-PDF, but not in scanned or picture format.
- For those unable to file electronically, comments may be filed by USPS mail or by hand (including courier) delivery.

○ *Mail via U.S. Postal Service Only:* Addressed to: Federal Energy Regulatory Commission, Secretary of the Commission, 888 First Street NE, Washington, DC 20426.

○ *Hand (including courier) delivery:* Deliver to: Federal Energy Regulatory Commission, Secretary of the Commission, 12225 Wilkins Avenue, Rockville, MD 20852.

Instructions: OMB submissions must be formatted and filed in accordance with submission guidelines at *www.reginfo.gov/public/do/PRAMain.* Using the search function under the ''Currently Under Review'' field, select Federal Energy Regulatory Commission; click ''submit,'' and select ''comment'' to the right of the subject collection.

FERC submissions must be formatted and filed in accordance with submission guidelines at: *https://www.ferc.gov.* For user assistance, contact FERC Online Support by email at *ferconlinesupport@ferc.gov,* or by phone at: (866) 208–3676 (toll-free).

Docket: Users interested in receiving automatic notification of activity in this docket or in viewing/downloading comments and issuances in this docket

may do so at *https://www.ferc.gov/ferc-online/overview.*

FOR FURTHER INFORMATION CONTACT: Jean Sonneman may be reached by email at *DataClearance@FERC.gov,* telephone at (202) 502–6362.

SUPPLEMENTARY INFORMATION:

Title: FERC–576, Report of Service Interruptions or Damage to Facilities.

OMB Control No.: 1902–0004.

Type of Request: Three-year extension of the FERC–576 information collection requirements with no changes to the current reporting requirements.

Abstract: Per 18 CFR 260.9, natural gas pipeline companies must report (i) damage to any jurisdictional natural gas facilities other than liquefied natural gas facilities caused by a hurricane, earthquake or other natural disaster or terrorist activity that results in a loss of or reduction in pipeline throughput or storage deliverability; and (ii) serious interruptions of service to any shipper involving jurisdictional natural gas facilities other than liquefied natural gas facilities.

The notifications, made to the Director, Division of Pipeline Certificates via email or fax as soon as feasibly possible, must state: (1) The location of the service interruption or damage to natural gas pipeline or storage facilities; (2) The nature of any damage to pipeline or storage facilities; (3) Specific identification of the facilities damaged; (4) The time the service interruption or damage to the facilities occurred; (5) The customers affected by the service interruption or damage to the facilities; (6) Emergency actions taken to maintain service; and (7) Company contacts and telephone numbers. The information provided by these notifications are kept by the Commission and are not made part of the public record.

In addition, if the Department of Transportation requires an incident report [1] under the Natural Gas Pipeline Safety Act (49 U.S.C. 60101 through 60143), a copy of such report must be submitted to the Director of the Commission's Division of Pipeline Certificates, within 30 days of the reportable incident. Natural gas companies must also send a copy of submitted incident reports to each state commission for the state(s) in which the reported service interruption occurred.[2] If the Commission did not collect this information, it would lose a data point that assists in the monitoring of transactions, operations, and reliability of interstate pipelines.

The Commission published a 60-day notice for FERC–576 on May 4, 2024 (89 FR 15569), with a due date of May 3, 2024. The Commission received no public comments in response.

Type of Respondents: Natural gas companies experiencing service interruptions or damage to facilities.

Estimate of Annual Burden: The Commission estimates the average annual burden [3] and cost [4] for this information collection as follows.

	Number of respondents	Annual number of responses per respondent	Total number of responses	Average burden hrs. & cost ($) per response	Total annual burden hrs. & total annual cost	Cost per respondent ($)
	(1)	(2)	(1) * (2) = (3)	(4)	(3) * (4) = (5)	(5) ÷ (1)
Notification of Incident—Service Interruption.	50	1	50	1 hr.; $100.00	50 hrs.; $5,000.00	$100.00
Notification of Incident—Damage.	22	1	22	0.25 hrs.; $25.00	5.5 hrs.; $550.00	25.00
Submittal of DOT Incident Report.	10	1	10	0.25 hrs.; $25.00	2.5 hrs.; $250.00	25.00
Total	82				58 hrs.; $5,800	

Comments: Comments are invited on: (1) whether the collection of information is necessary for the proper performance of the functions of the Commission, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information collection; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Dated: May 6, 2024.

Debbie-Anne A. Reese,

Acting Secretary.

ENVIRONMENTAL PROTECTION AGENCY

[FRL OP–OFA–125]

Environmental Impact Statements; Notice of Availability

Responsible Agency: Office of Federal Activities, General Information 202–564–5632 or *https://www.epa.gov/nepa.*

Weekly receipt of Environmental Impact Statements (EIS)

Filed April 29, 2024 10 a.m. EST

Through May 6, 2024 10 a.m. EST

Pursuant to 40 CFR 1506.9.

Notice

Section 309(a) of the Clean Air Act requires that EPA make public its comments on EISs issued by other Federal agencies. EPA's comment letters on EISs are available at: *https://cdxapps.epa.gov/cdx-enepa-II/public/action/eis/search.*

EIS No. 20240078, Draft Supplement, BLM, USFWS, UT, Supplemental Environmental Impact Statement to

[1] The Department of Transportation defines ''incident'' at 49 CFR 191.3. The regulatory thresholds for an ''incident report'' include (1) A death, or personal injury necessitating in-patient hospitalization; (2) Estimated property damage of $122,000 or more; (3) Unintentional estimated gas loss of three million cubic feet or more; (4) Emergency shutdown of a facility; or (5) An event that is significant in the judgment of the operator.

[2] *See* 18 CFR 260.9(d) and 260.9(e).

[3] Burden is defined as the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. For further explanation of what is included in the information collection burden, refer to 5 CFR part 1320.

[4] The Commission staff estimates that the average respondent for FERC–576 is similarly situated to the Commission, in terms of salary plus benefits. Based on FERC's current annual average of $207,786 (for salary plus benefits), the average hourly cost is $100/hour.

Reconsider a Highway Right-of-Way Application and Associated Amendment of an Incidental Take Permit, Washington County, Utah, Comment Period Ends: 06/24/2024, Contact: Dawna Ferris-Rowley 435–688–3200.

EIS No. 20240079, Final, NMFS, NC, Final Amendment 15 to the 2006 Consolidated Atlantic Highly Migratory Species Fishery Management Plan, Review Period Ends: 06/10/2024, Contact: Steve Durkee 301–427–8503.

Dated: May 6, 2024.

FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060–1294; FR ID 218850]

Information Collection Being Reviewed by the Federal Communications Commission

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act of 1995 (PRA), the Federal Communications Commission (FCC or Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collection(s). Comments are requested concerning: whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees.

The FCC may not conduct or sponsor a collection of information unless it displays a currently valid Office of Management and Budget (OMB) control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

DATES: Written comments should be submitted on or before July 9, 2024. If you anticipate that you will be submitting comments but find it difficult to do so within the period of time allowed by this notice, you should advise the contacts below as soon as possible.

ADDRESSES: Direct all PRA comments to Cathy Williams, FCC, via email to *PRA@fcc.gov* and to *Cathy.Williams@fcc.gov*.

FOR FURTHER INFORMATION CONTACT: For additional information about the information collection, contact Cathy Williams at (202) 418–2918.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060–1294.

Title: FCC Authorization for Radio Service License—3.45 GHz Band Service.

Form Number: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit entities, state, local, or tribal government, and not for profit institutions.

Number of Respondents and Responses: 52 respondents, 8,197 responses.

Estimated Time per Response: 5–20 hours.

Frequency of Response: Third party disclosure requirement; on occasion reporting requirement and periodic reporting requirement.

Obligation to Respond: Required to obtain or retain benefits. Statutory authority for these collections are contained in 47 U.S.C. 151, 152, 154, 154(i), 155(c), 157, 201, 202, 208, 214, 301, 302a, 303, 307, 308, 309, 310, 311, 314, 316, 319, 324, 331, 332, 333, 336, 534, 535, and 554 of the Communications Act of 1934.

Total Annual Burden: 9,198 hours.

Total Annual Cost: $10,353,000.

Needs and Uses: On March 17, 2021, the Federal Communications Commission (''Commission'' or ''FCC'') adopted a Second Report and Order, FCC 21–32, GN Docket No. WT–19–348 (Second Report and Order) that establishes rules for flexible-use wireless access to the 100 megahertz in the 3450–3550 MHz (3.45 GHz) band, creating the new 3.45 GHz Service. The rules will create additional capacity for wireless broadband allowing full-power operations across the band in the entire contiguous United States, while also ensuring full protection of incumbent Federal operations remaining in particular locations. As part of this process, the Commission also adopted rules related to the relocation of incumbent non-Federal radiolocation operations, and reimbursement of expenses related to such relocation.

Sections 2.016 and 27.1603 require a 3.45 GHz Service licensee whose license area overlaps with a Cooperative Planning Area or Periodic Use Area, as defined in those sections, to coordinate deployments pursuant to those licenses in those areas with relevant Federal agencies. This coordination may take the form of a mutually acceptable operator-to-operator coordination agreement between the licensee and the relevant Federal agency. In the absence of such an agreement, this coordination will include a formal request for access through a Department of Defense online portal, which will include the submission of information related to the technical characteristics of the base stations and associated mobile units to be used in the covered area. It does not require a revision to the FCC Form 601.

Section 27.1605 requires non-Federal, secondary radiolocation operations which are relocating from the 3.45 GHz band to alternate spectrum to clear the band for new flexible-use wireless operations to submit certain information to a clearinghouse in order to ensure their relocation costs are fairly reimbursed. It does not require a revision to the FCC Form 601.

Section 27.1607 requires 3.45 GHz Service licensees to share certain information about their network operations in that band with operators in the adjacent Citizens Broadband Radio Service in order to enable the latter to synchronize their operations to reduce the risk of harmful interference. In response to a request by a Citizens Broadband Radio Service operator, a 3.45 GHz Service licensee must provide information to enable Time Division Duplex synchronization. The exact nature of the information to be provided will be determined by a negotiation between the two entities, conducted on a good faith basis. The 3.45 GHz Service licensee must keep the information current as its network operations change. This does not require a revision to the FCC Form 601.

Section 27.14(w) requires 3.45 GHz Service licensees to provide information on the extent to which they provide service in their license areas. Licensees are required to file two such reports: The first four (4) years after its initial license grant and the second eight (8) years after such grant, unless they failed to meet the first set of performance requirements, in which case the second report is due seven (7) years after the initial grant. These reports are filed

alongside the Form 601 and require no revisions to it.

Federal Communications Commission.

Marlene Dortch,

Secretary, Office of the Secretary.

[FR Doc. 2024–10263 Filed 5–9–24; 8:45 am]

BILLING CODE 6712–01–P

FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060–1050; FR ID 218851]

Information Collection Being Reviewed by the Federal Communications Commission Under Delegated Authority

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act of 1995 (PRA), the Federal Communications Commission (FCC or Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collection(s). Comments are requested concerning: whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees.

The FCC may not conduct or sponsor a collection of information unless it displays a currently valid Office of Management and Budget (OMB) control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

DATES: Written comments should be submitted on or before July 9, 2024. If you anticipate that you will be submitting comments but find it difficult to do so within the period of time allowed by this notice, you should advise the contacts below as soon as possible.

ADDRESSES: Direct all PRA comments to Cathy Williams, FCC, via email to *PRA@fcc.gov* and to *Cathy.Williams@fcc.gov.*

FOR FURTHER INFORMATION CONTACT: For additional information about the information collection, contact Cathy Williams at (202) 418–2918.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060–1050.

Title: Section 97.303, Frequency Sharing Requirements.

Form Number: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Individuals or households.

Number of Respondents: 5,000 respondents; 5,000 responses.

Estimated Time per Response: 20 minutes (.33 hours).

Frequency of Response: Recordkeeping requirement.

Obligation to Respond: Required to obtain or retain benefits. Statutory authority for this information collection is contained in 47 U.S.C. 151, 154, 301, 302(a) and 303(c), and (f) of the Communications Act of 1934, as amended.

Total Annual Burden: 1,650 hours.

Total Annual Cost: No cost.

Needs and Uses: The Commission established a recordkeeping procedure in section 97.303(s) that required that amateur operator licensees using other antennas must maintain in their station records either manufacturer data on the antenna gain or calculations of the antenna gain.

The amateur radio service governed by 47 CFR part 97 of the Commission's rules, provides spectrum for amateur radio service licensees to participate in a voluntary noncommercial communication service which provides emergency communications and allows experimentation with various radio techniques and technologies to further the understanding of radio use and the development of technologies. The information collection is used to calculate the effective radiated power (ERP) that the station is transmitting to ensure that ERP does not exceed 100 W PEP.

Federal Communications Commission.

Marlene Dortch,

Secretary, Office of the Secretary.

BILLING CODE P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

[Document Identifiers: CMS–10767]

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: Centers for Medicare & Medicaid Services, Health and Human Services (HHS).

ACTION: Notice.

SUMMARY: The Centers for Medicare & Medicaid Services (CMS) is announcing an opportunity for the public to comment on CMS' intention to collect information from the public. Under the Paperwork Reduction Act of 1995 (PRA), federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information (including each proposed extension or reinstatement of an existing collection of information) and to allow 60 days for public comment on the proposed action. Interested persons are invited to send comments regarding our burden estimates or any other aspect of this collection of information, including the necessity and utility of the proposed information collection for the proper performance of the agency's functions, the accuracy of the estimated burden, ways to enhance the quality, utility, and clarity of the information to be collected, and the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

DATES: Comments must be received by July 9, 2024.

ADDRESSES: When commenting, please reference the document identifier or OMB control number. To be assured consideration, comments and recommendations must be submitted in any one of the following ways:

1. *Electronically.* You may send your comments electronically to *http://www.regulations.gov.* Follow the instructions for ''Comment or Submission'' or ''More Search Options'' to find the information collection document(s) that are accepting comments.

2. *By regular mail.* You may mail written comments to the following address: CMS, Office of Strategic Operations and Regulatory Affairs, Division of Regulations Development, Attention: Document Identifier/OMB Control Number: ____, Room C4–26–05, 7500 Security Boulevard, Baltimore, Maryland 21244–1850.

To obtain copies of a supporting statement and any related forms for the proposed collection(s) summarized in this notice, please access the CMS PRA website by copying and pasting the following web address into your web browser: *https://www.cms.gov/Regulations-and-Guidance/Legislation/PaperworkReductionActof1995/PRA-Listing.*

FOR FURTHER INFORMATION CONTACT: William N. Parham at (410) 786–4669.

SUPPLEMENTARY INFORMATION:

Contents

This notice sets out a summary of the use and burden associated with the following information collections. More detailed information can be found in each collection's supporting statement and associated materials (see **ADDRESSES**).

CMS–10767 Patient Access through Application Programming Interfaces (API)

Under the PRA (44 U.S.C. 3501–3520), federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. The term ''collection of information'' is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA requires federal agencies to publish a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, CMS is publishing this notice.

Information Collection

1. *Type of Information Collection Request:* Reinstatement without change of a previously approved collection; *Title of Information Collection:* Patient Access through Application Programming Interfaces (API); *Use:* This final rule is the first phase of policies centrally focused on advancing interoperability and patient access to health information using the authority available to the Centers for Medicare & Medicaid Services (CMS). We believe this is an important step in advancing interoperability, putting patients at the center of their health care, and ensuring they have electronic access to their health information. We are committed to working with stakeholders to solve the issue of interoperability and getting patients access to information about their health care, and we are taking an active approach to move participants in the health care market toward interoperability and the secure and timely exchange of electronic health information by adopting policies for the Medicare and Medicaid programs, the Children's Health Insurance Program (CHIP), and qualified health plan (QHP) issuers on the individual market Federally-facilitated Exchanges (FFEs). For purposes of this rule, references to QHP issuers on the FFEs excludes issuers offering only stand-alone dental plans (SADPs). Likewise, we are also excluding QHP issuers only offering QHPs in the Federally-facilitated Small Business Health Options Program Exchanges (FF–SHOPs) from the provisions of this rule. This rule requires these impacted payers to maintain and use standards-based APIs to make certain information available to enrollees. CMS regulations at 42 CFR 417.414, 417.416, 422.112(a)(1)(i), and 422.114(a)(3)(ii) require that all Medicare Advantage organizations (MAOs) offering coordinated care plans, network-based private fee-for-service (PFFS) plans, and as well as section 1876 cost organizations, maintain a network of appropriate providers that is sufficient to provide adequate access to covered services to meet the needs of the population served. To enforce this requirement, CMS regulations at § 422.116 outline network adequacy criteria which set forth the minimum number of providers and maximum travel time and distance from enrollees to providers, for required provider specialty types in each county in the United States and its territories. Organizations must be in compliance with the current CMS network adequacy criteria guidance, which is updated and published annually on CMS's website. This collection of information is essential to appropriate and timely compliance monitoring by CMS, in order to ensure that all active contracts offering network-based plans maintain an adequate network. *Form Number:* CMS–10767 (OMB control number: 0938–1412); *Frequency:* Occasionally; *Affected Public:* Private sector; *Number of Respondents:* 345; *Number of Responses:* 345; *Total Annual Hours:* 589,950. (For policy questions regarding this collection contact Lorraine Doo at 410–786–6597.)

William N. Parham, III

Director, Division of Information Collections and Regulatory Impacts, Office of Strategic Operations and Regulatory Affairs.

BILLING CODE 4120–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

[Document Identifiers: CMS–10164 A/B]

Agency Information Collection Activities: Submission for OMB Review; Comment Request

AGENCY: Centers for Medicare & Medicaid Services, Health and Human Services (HHS).

ACTION: Notice.

SUMMARY: The Centers for Medicare & Medicaid Services (CMS) is announcing an opportunity for the public to comment on CMS' intention to collect information from the public. Under the Paperwork Reduction Act of 1995 (PRA), federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, and to allow a second opportunity for public comment on the notice. Interested persons are invited to send comments regarding the burden estimate or any other aspect of this collection of information, including the necessity and utility of the proposed information collection for the proper performance of the agency's functions, the accuracy of the estimated burden, ways to enhance the quality, utility, and clarity of the information to be collected, and the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

DATES: Comments on the collection(s) of information must be received by the OMB desk officer by June 10, 2024.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

To obtain copies of a supporting statement and any related forms for the proposed collection(s) summarized in this notice, please access the CMS PRA website by copying and pasting the following web address into your web browser: *https://www.cms.gov/Regulations-and-Guidance/Legislation/PaperworkReductionActof1995/PRA-Listing.*

FOR FURTHER INFORMATION CONTACT: William Parham at (410) 786–4669.

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501–3520), federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. The term ''collection of information'' is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires federal agencies to publish a 30-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, CMS is publishing this notice that summarizes the following proposed collection(s) of information for public comment:

1. *Type of Information Collection Request:* Reinstatement with change; *Title of Information Collection:* Medicare Electronic Data Interchange (EDI) Registration and Electronic Data Interchange Enrollment Form; *Use:* The purpose of this collection is to obtain information that will be subsequently used during transaction exchange for identification of Medicare providers/suppliers and authorization of requested electronic data interchange (EDI) functions. The EDI Registration Form and the Medicare Enrollment Forms are completed by Medicare providers/suppliers and submitted to CMS Medicare Administrative Contractors (MACs). Authorization is needed for providers/suppliers to send/receive Health Insurance Portability and Accountability Act (HIPAA) standard transactions directly (or through a designated 3rd party) to/from Medicare contractors. Medicare contractors will use the information for initial set-up and maintenance of the access privileges. CMS has allowed each MAC to create their own organization specific forms given they are comparable in terms of content of forms 10164A and 10164B, to transmit data files electronically between themselves and their trading partners. The Standards for Electronic Transactions final rule, 45 CFR part 162 Subpart K § 162.1101 through Subpart R § 162.1802, (hereinafter referred to as ''Transactions Rule'') published August 17, 2000 adopted standards for health care transactions and code sets.[1] Subsequent to the Transactions Rule, CMS–0003–P and CMS–0005–P proposed modifications to the adopted standards essential to permit initial implementation of the standards throughout the entire healthcare industry. Currently, MACs have a process in place to enroll providers for electronic billing and other EDI transactions. In support of the HIPAA Transactions Rule, the purpose of this Paperwork Reduction Act (PRA) request is to establish a prescribed amount of data that must be submitted by providers/suppliers that is sufficient to address all HIPAA transactions. *Form Number:* CMS–10164 A/B (OMB control number: 0938–0983); *Frequency:* Once; *Affected Public:* Private and Business or other for-profits; *Number of Respondents:* 1,181,209; *Total Annual Responses:* 1,181,209; *Total Annual Hours:* 393,706. (For policy questions regarding this collection contact Charlene Parks at (410) 786–8684 or *Charlene.Parks@cms.hhs.gov*).

William N. Parham, III,

Director, Division of Information Collections and Regulatory Impacts, Office of Strategic Operations and Regulatory Affairs.

BILLING CODE 4120–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

Submission for Office of Management and Budget Review; Risk Determination Hearings for Unaccompanied Children (New Collection)

AGENCY: Office of Refugee Resettlement; Administration for Children and Families; U.S. Department of Health and Human Services.

ACTION: Request for Public Comments.

SUMMARY: The Office of Refugee Resettlement (ORR), Administration for Children and Families (ACF), U.S. Department of Health and Human Services (HHS), is requesting approval from the Office of Management and Budget (OMB) and inviting public comments on the proposed information collection. The request consists of several forms that will allow the Unaccompanied Children (UC) Program to implement a new set of hearings (''Risk Determination hearings''), which

[1] *https://www.federalregister.gov/documents/2000/08/17/00-20820/health-insurance-reform-standards-for-electronic-transactions.*

will serve as due process protections for children in ORR care.

DATES: *Comments due within 30 days of publication.* OMB is required to make a decision about the collection of information between 30 and 60 days after publication of this document in the **Federal Register**. Therefore, a comment is best assured of having its full effect if OMB receives it within 30 days of publication.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. You can also obtain copies of the proposed collection of information by emailing *infocollection@acf.hhs.gov.* Identify all emailed requests by the title of the information collection.

SUPPLEMENTARY INFORMATION:

Description: ORR plans to create a new information collection containing five instruments in order to implement the new risk determination hearings for unaccompanied children. This new information collection will replace the *Flores* bond hearing process. The new instruments will not take effect until the underlying regulations at 45 CFR part 410 on which they are based take effect. The UC Program issued a notice of proposed rulemaking in October 2023, which aims to adopt and replace regulations relating to key aspects of the placement, care, and services provided to unaccompanied children referred to ORR. The UC Program has adjudicated public comments received and has announced its intention to publish the Final Rule on April 30th, 2024; the Final Rule will take effect 60 days after publishing.

Risk Determination Hearing Forms: These forms are provided to unaccompanied children placed in ORR custody by their case manager or by individuals associated with the HHS Departmental Appeals Board (DAB), which is responsible for the actual day-to-day logistical operations of these hearings. These instruments are provided to unaccompanied children placed in a restrictive setting (heightened supervision facilities and residential treatment center facilities) upon a finding by ORR that a child would present a danger to the community if released, and to unaccompanied children placed in other types of facilities upon request. They will be translated into Spanish and other languages, as needed.

- Request for Risk Determination Hearing (Form RDH–1): The unaccompanied child, the child's parent/legal guardian, or the child's representative may use this instrument to request a Risk Determination Hearing.
- Risk Determination Hearing Opt-Out (Form RDH–2): The unaccompanied child or the child's representative may use this instrument to opt-out of a Risk Determination Hearing.
- Appointment of Representation for Risk Determination Hearing (Form RDH–3): The unaccompanied child or the child's parent/legal guardian may use this instrument to appoint a representative to act on the child's behalf throughout the Risk Determination Hearing process and consent to the release of any records that are related to the child's case to that representative.
- Risk Determination Hearing Transcript Request (Form RDH–4): The unaccompanied child, the child's parent/legal guardian, or the child's representative may use this instrument to request a written transcript of the Risk Determination Hearing.
- Request for Appeal of Risk Determination Hearing (Form RDH–5): The unaccompanied child, the child's parent/legal guardian, or the child's representative may use this instrument to appeal the decision of the hearing officer.

Once the new Risk Determination Hearing forms are in effect, the UC Program will prepare a non-substantive change request to the Office of Management and Budget (OMB) to discontinue the use of three instruments currently approved under the Legal Services for Unaccompanied Children information collection (OMB# 0970–0565). The forms to be replaced by the Risk Determination Hearing forms include the following:

- Request for a Flores Bond Hearing (Form LRG–7)
- Motion Requesting a Bond Hearing—Secure or Staff Secure (Form LRG–8A)
- Motion Requesting a Bond Hearing—Non-Secure (Form LRG–8B)

Respondents: ORR grantee and contractor staff, unaccompanied children, parents/legal guardians of unaccompanied children, attorneys of record, and legal service providers.

ANNUAL BURDEN ESTIMATES

Instrument	Annual number of respondents	Total number of responses per respondent	Average burden hours per response	Annual total burden hours
Request for Risk Determination Hearing (Form RDH–1)	250	1	0.17	42.5
Risk Determination Hearing Opt-Out (Form RDH–2)	250	1	0.17	42.5
Appointment of Representative for Risk Determination Hearing (Form RDH–3)	1000	1	0.17	170
Risk Determination Hearing Transcript Request (Form RDH–4)	16	1	0.17	2.7
Request for Appeal of Risk Determination Hearing (Form RDH–5)	3	1	0.17	.5

Estimated Total Annual Burden Hours: 258.2.

Authority: 6 U.S.C. 279; 8 U.S.C. 1232

Mary C. Jones,

ACF/OPRE Certifying Officer.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2021–N–0408]

Modified Risk Tobacco Product Application: Renewal Application for IQOS 3.0 System Holder and Charger, Heated Tobacco Product, Submitted by Philip Morris Products S.A.

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of availability.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing an opportunity to provide public comment on a modified risk tobacco product application (MRTPA). The application is for renewal of an existing modified risk tobacco product (MRTP) order for the IQOS 3.0 System Holder and Charger, a Heated Tobacco Product (HTP), submitted by Philip Morris Products S.A.

DATES: Electronic or written comments on the application may be submitted beginning May 10, 2024. FDA will establish a closing date for the comment period as described in section I.

ADDRESSES: You may submit comments as follows:

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov.*
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand Delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2021–N–0408 for ''Modified Risk Tobacco Product Application: Renewal application for the IQOS 3.0 System Holder and Charger, Heated Tobacco Product (HTP), Submitted by Philip Morris Products S.A.'' Received comments will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, 240–402–7500.

- Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf.*

Docket: For access to the docket to read the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240–402–7500.

FOR FURTHER INFORMATION CONTACT: Adrian Mixon or Dhanya John, Office of Regulations, Center for Tobacco Products, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. G335, Silver Spring, MD 20993–0002, 1–877–287–1373, email: *CTPRegulations@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

Section 911 of the Federal Food, Drug, and Cosmetic Act (FD&C Act) (21 U.S.C. 387k) addresses the marketing and distribution of MRTPs. MRTPs are tobacco products that are sold or distributed for use to reduce harm or the risk of tobacco-related disease associated with commercially marketed tobacco products. Section 911(a) of the FD&C Act prohibits the introduction or delivery for introduction into interstate commerce of any MRTP unless an order issued by FDA pursuant to section 911(g) of the FD&C Act is effective with respect to such product.

Section 911(d) of the FD&C Act describes the information that must be included in a MRTPA, which must be filed and evaluated by FDA before an applicant can receive an order from FDA. FDA is required by section 911(e) of the FD&C Act to make a MRTPA available to the public (except for matters in the application that are trade secrets or otherwise confidential commercial information) and to request comments by interested persons on the information contained in the application and on the label, labeling, and advertising accompanying the application. The determination of whether an order is appropriate under section 911 of the FD&C Act is based on the scientific information submitted by the applicant as well as the scientific evidence and other information that is made available to the Agency, including through public comments.

Section 911(g) of the FD&C Act describes the demonstrations applicants must make to obtain an order from FDA under either section 911(g)(1) or (2). The applicant, Philip Morris Products S.A., is seeking a renewal under section 911(g)(2) of an order previously issued under section 911(g)(2) of the FD&C Act.

FDA may issue an order under section 911(g)(2) of the FD&C Act with respect to a tobacco product that does not

satisfy the section 911(g)(1) standard. A person seeking an order under section 911(g)(2) of the FD&C Act must show that:

- Such an order would be appropriate to promote the public health;
- Any aspect of the label, labeling, and advertising for the product that would cause the product to be an MRTP is limited to an explicit or implicit representation that the tobacco product or its smoke does not contain or is free of a substance or contains a reduced level of a substance, or presents a reduced exposure to a substance in tobacco smoke;
- Scientific evidence is not available and, using the best available scientific methods, cannot be made available without conducting long-term epidemiological studies for an application to meet the standards for obtaining an order under section 911(g)(1) of the FD&C Act;
- The scientific evidence that is available without conducting long-term epidemiological studies demonstrates that a measurable and substantial reduction in morbidity or mortality among individual tobacco users is reasonably likely in subsequent studies;
- The magnitude of overall reductions in exposure to the substance or substances which are the subject of the application is substantial, such substance or substances are harmful, and the product as actually used exposes consumers to the specified reduced level of the substance or substances;
- The product as actually used by consumers will not expose them to higher levels of other harmful substances compared to the similar types of tobacco products then on the market unless such increases are minimal and the reasonably likely overall impact of use of the product remains a substantial and measurable reduction in overall morbidity and mortality among individual tobacco users;
- Testing of actual consumer perception shows that, as the applicant proposes to label and market the product, consumers will not be misled into believing that the product is or has been demonstrated to be less harmful or presents or has been demonstrated to present less of a risk of disease than one or more other commercially marketed tobacco products; and
- Issuance of the exposure modification order is expected to benefit the health of the population as a whole taking into account both users of tobacco products and persons who do not currently use tobacco products.

Section 911(g)(4) of the FD&C Act describes factors that FDA must take into account in evaluating whether a tobacco product benefits the health of individuals and the population as a whole.

FDA is issuing this notice to inform the public that the MRTPA for the following product submitted by Philip Morris Products S.A. has been filed and is being made available for public comment:

- MR0000254.PD3: IQOS 3.0 System Holder and Charger

The applicant is seeking renewal of the authorization to market the IQOS 3.0 System Holder and Charger, a product that previously received authorization under section 911(g)(2) of the FD&C Act [1] to be marketed as a modified risk tobacco product with reduced exposure claims. For purposes of premarket review, FDA has identified these tobacco products as heated tobacco products (HTPs). HTPs meet the definition of a cigarette, but the tobacco is heated and not combusted (products that do not exceed 350° C). The applicant is including information from the previous MRTPA by cross-reference.

FDA will post the application documents, including any amendments, to its website for the MRTPAs (see section II) for public comment on a rolling basis as they are redacted in accordance with applicable laws. In this document, FDA is announcing the availability of the first batch of application documents for public comment. FDA intends to establish a closing date for the comment period that is both at least 180 days after the date of this notice and at least 30 days after the final documents from the application are made available for public comment. FDA will announce the closing date at least 30 days in advance. FDA believes that this comment period is appropriate given the volume and complexity of information in the MRTPA that has not been available for public comment as part of the previously authorized MRTPA for the IQOS system.

FDA will notify the public about the availability of additional application documents and comment period closing date via the Agency's web page for the MRTPA (see section II) and by other means of public communication, such as by email to individuals who have signed up to receive email alerts. To receive email alerts, visit FDA's email subscription service management website (*https://www.fda.gov/about-fda/contact-fda/get-email-updates*), provide an email address, scroll down to the ''Tobacco'' heading, select ''Modified Risk Tobacco Product Application Update'', and click ''Submit.'' FDA does not intend to issue additional notices in the **Federal Register** regarding the availability of additional application documents, including amendments, or the comment period for this MRTPA. To encourage public participation consistent with section 911(e) of the FD&C Act, FDA is making the redacted MRTPAs that are the subject of this notice available electronically (see section II).

[1] The notice of availability for the IQOS 3 System Holder and Charger MRTPA that received a modified risk granted order appeared in the **Federal Register** of May 14, 2021 (86 FR 26530), and the docket containing notices and public comments, FDA–2021–N–0408, is accessible at: *https://www.regulations.gov/document/FDA-2021-N-0408-0001.*

II. Electronic Access

Persons with access to the internet may obtain the document(s) at *https://www.fda.gov/tobacco-products/advertising-and-promotion/philip-morris-products-sa-modified-risk-tobacco-product-mrtp-applications.*

Dated: May 3, 2024.

Lauren K. Roth,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2017–D–3001]

Modified Risk Tobacco Product Application: Renewal Applications for IQOS 2.4 System Holder and Charger, Marlboro Amber HeatSticks, Marlboro Green Menthol HeatSticks, and Marlboro Blue Menthol HeatSticks, Heated Tobacco Products and Heated Tobacco Product Consumables, Submitted by Philip Morris Products S.A.

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of availability.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing an opportunity to provide public comment on modified risk tobacco product applications (MRTPAs). The applications are for the renewal of existing MRTP orders for IQOS 2.4 System Holder and Charger, Marlboro Amber HeatSticks, Marlboro Green Menthol HeatSticks and Marlboro Blue Menthol HeatSticks, Heated Tobacco Products (HTPs) and HTP Consumables,

submitted by Philip Morris Products S.A.

DATES: Submit either electronic or written comments on the application beginning May 10, 2024. FDA will establish a closing date for the comment period as described in section I.

ADDRESSES: You may submit comments as follows:

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov.*
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand Delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2017–D–3001 for ''Modified Risk Tobacco Product Applications: Renewal Applications for IQOS 2.4 System Holder and Charger, Marlboro Amber HeatSticks, Marlboro Green Menthol HeatSticks and Marlboro Blue Menthol HeatSticks, Heated Tobacco Products (HTPs) and HTP Consumables, Submitted by Philip Morris Products S.A.'' Received comments will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, 240–402–7500.

- Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf.*

Docket: For access to the docket to read the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240–402–7500.

SUPPLEMENTARY INFORMATION:

I. Background

Section 911 of the Federal Food, Drug, and Cosmetic Act (FD&C Act) (21 U.S.C. 387k) addresses the marketing and distribution of modified risk tobacco products (MRTPs). MRTPs are tobacco products that are sold or distributed for use to reduce harm or the risk of tobacco-related disease associated with commercially marketed tobacco products. Section 911(a) of the FD&C Act prohibits the introduction or delivery for introduction into interstate commerce of any MRTP unless an order issued by FDA pursuant to section 911(g) of the FD&C Act is effective with respect to such product.

Section 911(d) of the FD&C Act describes the information that must be included in a MRTPA, which must be filed and evaluated by FDA before an applicant can receive an order from FDA. FDA is required by section 911(e) of the FD&C Act to make a MRTPA available to the public (except for matters in the application that are trade secrets or otherwise confidential commercial information) and to request comments by interested persons on the information contained in the application and on the label, labeling, and advertising accompanying the application. The determination of whether an order is appropriate under section 911 of the FD&C Act is based on the scientific information submitted by the applicant as well as the scientific evidence and other information that is made available to the Agency, including through public comments.

Section 911(g) of the FD&C Act describes the demonstrations applicants must make to obtain an order from FDA under either section 911(g)(1) or (2). The applicant, Philip Morris Products S.A., is seeking a renewal under section 911(g)(2) of an order previously issued under section 911(g)(2) of the FD&C Act.

FDA may issue an order under section 911(g)(2) of the FD&C Act with respect to a tobacco product that does not satisfy the section 911(g)(1) standard. A person seeking an order under section 911(g)(2) of the FD&C Act must show that:

- Such an order would be appropriate to promote the public health;
- Any aspect of the label, labeling, and advertising for the product that would cause the product to be an MRTP is limited to an explicit or implicit representation that the tobacco product or its smoke does not contain or is free of a substance or contains a reduced level of a substance, or presents a reduced exposure to a substance in tobacco smoke;
- Scientific evidence is not available and, using the best available scientific methods, cannot be made available without conducting long-term epidemiological studies for an application to meet the standards for

obtaining an order under section 911(g)(1) of the FD&C Act;

- The scientific evidence that is available without conducting long-term epidemiological studies demonstrates that a measurable and substantial reduction in morbidity or mortality among individual tobacco users is reasonably likely in subsequent studies;
- The magnitude of overall reductions in exposure to the substance or substances which are the subject of the application is substantial, such substance or substances are harmful, and the product as actually used exposes consumers to the specified reduced level of the substance or substances;
- The product as actually used by consumers will not expose them to higher levels of other harmful substances compared to the similar types of tobacco products then on the market unless such increases are minimal and the reasonably likely overall impact of use of the product remains a substantial and measurable reduction in overall morbidity and mortality among individual tobacco users;
- Testing of actual consumer perception shows that, as the applicant proposes to label and market the product, consumers will not be misled into believing that the product is or has been demonstrated to be less harmful or presents or has been demonstrated to present less of a risk of disease than one or more other commercially marketed tobacco products; and
- Issuance of the exposure modification order is expected to benefit the health of the population as a whole taking into account both users of tobacco products and persons who do not currently use tobacco products.

Section 911(g)(4) of the FD&C Act describes factors that FDA must take into account in evaluating whether a tobacco product benefits the health of individuals and the population as a whole.

FDA is issuing this notice to inform the public that the MRTPAs for the following products submitted by Philip Morris Products S.A. have been filed and are being made available for public comment:

- MR0000254.PD1: IQOS 2.4 System Holder and Charger
- MR0000254.PD5: Marlboro Amber HeatSticks
- MR0000254.PD6: Marlboro Green Menthol HeatSticks
- MR0000254.PD7: Marlboro Blue Menthol HeatSticks

The applicant is seeking renewal of the authorization to market the IQOS 2.4 System Holder and Charger, Marlboro Amber HeatSticks,[1] Marlboro Green Menthol HeatSticks [2] and Marlboro Blue Menthol HeatSticks,[3] products that previously received authorization under section 911(g)(2) of the FD&C Act [4] to be marketed as modified risk tobacco products with reduced exposure claims. For purposes of premarket review, FDA has identified these tobacco products as HTPs. HTPs meet the definition of a cigarette, but the tobacco is heated and not combusted (products that do not exceed 350 °C). The applicant is including information from the previous MRTPAs by cross-reference.

FDA will post the application documents, including any amendments, to its website for the MRTPAs (see section II) for public comment on a rolling basis as they are redacted in accordance with applicable laws. In this document, FDA is announcing the availability of the first batch of application documents for public comment. FDA intends to establish a closing date for the comment period that is both at least 180 days after the date of this notice and at least 30 days after the final documents from the application are made available for public comment. FDA will announce the closing date at least 30 days in advance. FDA believes that this comment period is appropriate given the volume and complexity of information in the MRTPA that has not already been available for public comment as part of the previously authorized MRTPAs for the IQOS system.

FDA will notify the public about the availability of additional application documents and comment period closing date via the Agency's web page for the MRTPA (see section II) and by other means of public communication, such as by email to individuals who have signed up to receive email alerts. To receive email alerts, visit FDA's email subscription service management website (*https://www.fda.gov/about-fda/contact-fda/get-email-updates*), provide an email address, scroll down to the ''Tobacco'' heading, select ''Modified Risk Tobacco Product Application Update'', and click ''Submit''. FDA does not intend to issue additional notices in the **Federal Register** regarding the availability of additional application documents, including amendments, or the comment period for this MRTPA. To encourage public participation consistent with section 911(e) of the FD&C Act, FDA is making the redacted MRTPAs that are the subject of this notice available electronically (see section II).

[1] Product name was previously Marlboro Heatsticks.

[2] Product name was previously Marlboro Smooth Menthol Heatsticks.

[3] Product name was previously Marlboro Fresh Menthol Heatsticks.

[4] The notice of availability for the IQOS MRTPAs that received modified risk granted orders appeared in the **Federal Register** of June 15, 2017 (82 FR 27487), and the docket containing notices and public comments, FDA–2017–D–3001, is accessible at: *https://www.regulations.gov/docket/FDA-2017-D-3001.*

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2018–N–3741]

Remanufacturing of Medical Devices; Guidance for Industry, Entities That Perform Servicing or Remanufacturing, and Food and Drug Administration Staff; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of availability.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing the availability of a final guidance entitled ''Remanufacturing of Medical Devices.'' This final guidance is intended to help clarify whether activities performed on devices are likely ''remanufacturing.'' This final guidance also clarifies existing regulatory requirements for remanufacturers and includes recommendations for information that should be included in labeling to help assure the continued quality, safety, and effectiveness of devices that are intended to be serviced over their useful life.

DATES: The announcement of the guidance is published in the **Federal Register** on May 10, 2024.

ADDRESSES: You may submit either electronic or written comments on Agency guidances at any time as follows:

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov.*
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand Delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2018–N–3741 for ''Remanufacturing of Medical Devices.'' Received comments will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, 240–402–7500.

- Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240–402–7500.

You may submit comments on any guidance at any time (see 21 CFR 10.115(g)(5)).

An electronic copy of the guidance document is available for download from the internet. See the **SUPPLEMENTARY INFORMATION** section for information on electronic access to the guidance. Submit written requests for a single hard copy of the guidance document entitled ''Remanufacturing of Medical Devices'' to the Office of Policy, Center for Devices and Radiological Health, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 66, Rm. 5431, Silver Spring, MD 20993–0002. Send one self-addressed adhesive label to assist that office in processing your request.

FOR FURTHER INFORMATION CONTACT: Katelyn Bittleman, Center for Devices and Radiological Health, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 66, Rm. 4250, Silver Spring, MD 20993–0002, 240–402–1478; or James Myers, Center for Biologics Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 7301, Silver Spring, MD 20993, 240–402–7911.

SUPPLEMENTARY INFORMATION:

I. Background

Many devices are reusable and need preventive maintenance and repair during their useful life. For these devices, proper servicing is critical to their continued safe and effective use. However, there is a lack of clarity regarding the distinction between ''servicing'' and ''remanufacturing'' activities. FDA has been working to promote clarity on the distinction between ''servicing'' and ''remanufacturing.''

FDA opened a docket for public comment (81 FR 11477) and held a public workshop (81 FR 46694) in 2016. The Food and Drug Administration Reauthorization Act (FDARA) became law on August 18, 2017. Section 710 of FDARA charged the Secretary of Health and Human Services, acting through the Commissioner of Food and Drugs, to issue a report on the continued quality, safety, and effectiveness of medical devices with respect to servicing. In May 2018, FDA published on its website the report entitled ''FDA Report on the Quality, Safety, and Effectiveness of Servicing of Medical Devices'' (*https://www.fda.gov/media/113431/download*). One conclusion of the report stated ''a majority of comments, complaints, and adverse event reports alleging that inadequate 'servicing' caused or contributed to clinical adverse events and deaths actually pertain to 'remanufacturing' and not 'servicing,' '' and FDA committed to issue guidance that clarifies the difference between servicing and remanufacturing activities. In December 2018, FDA issued a white paper entitled ''Evaluating Whether Activities are Servicing or Remanufacturing'' (*https://www.fda.gov/media/117238/download*), opened a public docket (FDA–2018–N–3741), and held a public workshop (*https://wayback.archive-it.org/7993/20201222125933/https:/www.fda.gov/medical-devices/workshops-conferences-medical-devices/public-workshop-medical-device-servicing-and-remanufacturing-activities-december-10-11-2018-12102018*) to facilitate public discussion on the distinction between servicing and remanufacturing. The white paper described FDA's initial thoughts about guiding principles, provided a flowchart with accompanying text for understanding the distinctions, and contained a complementary approach for software, as well as considerations for labeling and examples utilizing the flowchart. FDA also included targeted questions throughout the white paper on which the Agency sought feedback. FDA

considered the comments from the public docket and discussions during the public workshop in developing the draft guidance. A notice of availability of the draft guidance appeared in the **Federal Register** of June 24, 2021 (86 FR 33305).

FDA focuses this guidance on activities that are likely remanufacturing—processing, conditioning, renovating, repackaging, restoring, or any other act done to a finished device that significantly changes the finished device's performance or safety specifications, or intended use (see 21 CFR 820.3(w)). The determination of whether the activities an entity performs are remanufacturing affects the applicability and enforcement of regulatory requirements under the Federal Food, Drug, and Cosmetic Act (FD&C Act) and its implementing regulations. FDA has consistently enforced requirements under the FD&C Act and its implementing regulations on entities engaged in remanufacturing, including but not limited to registration and listing, adverse event reporting, the Quality System regulation, and marketing submissions.

FDA considered comments received and revised the guidance as appropriate. In this final guidance, FDA provided additional contextual examples of activities throughout Section VI.B to provide further clarity when determining whether activities remanufacture a device. FDA clarified the applicability of the guidance to original equipment manufacturers (OEMs) and external entities on behalf of OEMs. FDA also added Section VIII ''Regulatory Requirements and Considerations for Remanufacturers'' to the guidance clarifying and outlining certain existing regulatory requirements that apply to remanufacturers.

This guidance is being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115). The guidance represents the current thinking of FDA on ''Remanufacturing of Medical Devices.'' It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations.

II. Electronic Access

Persons interested in obtaining a copy of the guidance may do so by downloading an electronic copy from the internet. A search capability for all Center for Devices and Radiological Health guidance documents is available at *https://www.fda.gov/medical-devices/device-advice-comprehensive-regulatory-assistance/guidance-documents-medical-devices-and-radiation-emitting-products.* This guidance document is also available at *https://www.regulations.gov, https://www.fda.gov/regulatory-information/search-fda-guidance-documents* or *https://www.fda.gov/vaccines-blood-biologics/guidance-compliance-regulatory-information-biologics.* Persons unable to download an electronic copy of ''Remanufacturing of Medical Devices'' may send an email request to *CDRH-Guidance@fda.hhs.gov* to receive an electronic copy of the document. Please use the document number GUI00017048 and complete title to identify the guidance you are requesting.

III. Paperwork Reduction Act of 1995

While this guidance contains no new collection of information, it does refer to previously approved FDA collections of information. The previously approved collections of information are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501–3521). The collections of information in the following table have been approved by OMB:

21 CFR part or FDA form	Topic	OMB control No.
800, 801, 809, and 830	Medical Device Labeling Regulations; Unique Device Identification	0910–0485
803	Medical Device Reporting	0910–0437
Form FDA 3670	Adverse event reports/MedSun program	0910–0471
806	Medical Devices; Reports of Corrections and Removals	0910–0359
810	Medical Device Recall Authority	0910–0432
820	Current Good Manufacturing Practice; Quality System Regulation	0910–0073
807, subparts A through D	Electronic Submission of Medical Device Registration and Listing	0910–0625
807, subpart E	Premarket notification	0910–0120
814, subparts A through E	Premarket approval	0910–0231
860, subpart D	De Novo classification process	0910–0844
812	Investigational Device Exemption	0910–0078
814, subpart H	Humanitarian Use Devices; Humanitarian Device Exemption	0910–0332
1000 through 1040	Electronic Products Requirements	0910–0025

Dated: May 7, 2024.

Lauren K. Roth,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

[CMS–3455–FN]

Medicare and Medicaid Programs: Application From The Compliance Team (TCT) for Continued Approval of Its Rural Health Clinic (RHC) Accreditation Program

AGENCY: Centers for Medicare & Medicaid Services (CMS), Department of Health and Human Services (HHS).

ACTION: Final notice.

SUMMARY: This final notice announces our decision to approve The Compliance Team (TCT) for continued recognition as a national accrediting organization (AO) for Rural Health Clinics (RHCs) that wish to participate in the Medicare or Medicaid programs.

DATES: The decision announced in this final notice is effective July 17, 2024, to July 17, 2028.

FOR FURTHER INFORMATION CONTACT:
Joy Webb (410) 786–1667.
Shonte Carter (410) 786–3532.

SUPPLEMENTARY INFORMATION:

I. Background

Under the Medicare program, eligible beneficiaries may receive covered services in a Rural Health Clinic (RHC) provided certain requirements are met by the RHC. Sections 1861(aa)(1) and (2) and 1905(l)(1) of the Social Security Act (the Act) establish distinct criteria for facilities seeking designation as an RHC. Regulations concerning provider agreements are at 42 CFR part 489, and those pertaining to activities relating to the survey and certification of facilities are at 42 CFR part 488, subpart A. The regulations at 42 CFR part 491, subpart A, specify the conditions that an RHC must meet to participate in the Medicare program. The scope of covered services and the conditions for Medicare payment for RHCs are set forth at 42 CFR part 405, subpart X.

Generally, to enter into an agreement, an RHC must first be certified by a State survey agency as complying with the conditions or requirements set forth in part 491 of CMS regulations. Thereafter, the RHC is subject to regular surveys by a State survey agency to determine whether it continues to meet these requirements.

However, there is an alternative to surveys by State survey agencies. Section 1865(a)(1) of the Act provides that if a provider entity demonstrates through accreditation by an approved national accrediting organization (AO) that all applicable Medicare conditions are met or exceeded, we will deem those provider entities as having met the requirements. Accreditation by an AO is voluntary and is not required for Medicare participation.

If an AO is recognized by the Secretary of Health and Human Services as having standards for accreditation that meet or exceed Medicare requirements, any provider entity accredited by the national accrediting body's approved program would be deemed to meet the Medicare conditions. A national AO applying for CMS approval of their accreditation program under 42 CFR part 488, subpart A must provide CMS with reasonable assurance that the AO requires the accredited provider entities to meet requirements that are at least as stringent as the Medicare conditions. Our regulations concerning the approval of AOs are set forth at § 488.5.

The Compliance Team (TCT) has requested CMS approval for its RHC program. CMS has reviewed TCT's application as described in the following section and is hereby announcing TCT's term of approval for a period of four years.

II. Approval of Deeming Organization

Section 1865(a)(2) of the Act and our regulations at § 488.5 require that our findings concerning the review and approval of a national accrediting organization's requirements consider, among other factors, the applying accrediting organization's requirements for accreditation; survey procedures; resources for conducting required surveys; capacity to furnish information for use in enforcement activities; monitoring procedures for provider entities found not in compliance with the conditions or requirements; and ability to provide us with the necessary data for validation.

Section 1865(a)(3)(A) of the Act further requires that we publish, within 60 days of receipt of an organization's complete application, a notice identifying the national accrediting body making the request, describing the nature of the request, and providing at least a 30-day public comment period. We have 210 days from the receipt of a complete application to publish notice of approval or denial of the application.

III. Provisions of the Proposed Notice

On December 21, 2023, CMS published a proposed notice in the **Federal Register** (88 FR 88393), announcing TCT's request for approval of its Medicare Rural Health Clinic (RHC) accreditation program. In that proposed notice, we detailed our evaluation criteria. Under section 1865(a)(2) of the Act and in our regulations at § 488.5 and § 488.8(h), we conducted a review of TCT's RHC application in accordance with the criteria specified by our regulations, which include, but are not limited to, the following:

- An administrative review of TCT's: (1) corporate policies; (2) financial and human resources available to accomplish the proposed surveys; (3) procedures for training, monitoring, and evaluation of its RHC surveyors; (4) ability to investigate and respond appropriately to complaints against accredited RHCs; and (5) survey review and decision-making process for accreditation.
- A review of TCT's survey processes to confirm that a provider or supplier, under TCT's RHC deeming accreditation program, would meet or exceed the Medicare program requirements.
- A documentation review of TCT's survey process to do the following:

++ Determine the composition of the survey team, surveyor qualifications, and TCT's ability to provide continuing surveyor training.

++ Compare TCT's processes to those we require of State survey agencies, including periodic resurvey and the ability to investigate and respond appropriately to complaints against TCT-accredited RHCs.

++ Evaluate TCT's procedures for monitoring an accredited RHC it has found to be out of compliance with TCT's program requirements. (This pertains only to monitoring procedures when TCT identifies non-compliance. If a SA identifies non-compliance through a validation survey, the SA monitors corrections as specified at § 488.9(c)).

++ Assess TCT's ability to report deficiencies to the surveyed RHC and respond to the RHC's plan of correction in a timely manner.

++ Establish TCT's ability to provide CMS with electronic data and reports necessary for effective validation and assessment of the organization's survey process.

++ Determine the adequacy of TCT's staff and other resources.

++ Confirm TCT's ability to provide adequate funding for performing required surveys.

++ Confirm TCT's policies with respect to surveys being unannounced.

++ Confirm TCT's policies and procedures to avoid conflicts of interest, including the appearance of conflicts of interest, involving individuals who conduct surveys or participate in accreditation decisions.

++ Obtain TCT's agreement to provide CMS with a copy of the most current accreditation survey, together with any other information related to the survey as we may require, including corrective action plans.

IV. Analysis of and Responses to Public Comments on the Proposed Notice

In accordance with section 1865(a)(3)(A) of the Act, the December 21, 2023, proposed notice also solicited public comments regarding whether TCT's requirements met or exceeded the Medicare Conditions for Certification (CfCs) for RHCs. CMS did not receive any public comments.

V. Provisions of the Final Notice

A. Differences Between TCT's Standards and Requirements for Accreditation and Medicare Conditions and Survey Requirements

We compared TCT's RHC accreditation requirements and survey process with the Medicare conditions set forth at 42 CFR part 491, subpart A, the survey and certification process requirements of parts 488 and 489, and survey process as outlined in the State Operations Manual (SOM). Our review and evaluation of TCT's RHC application, which was conducted as described in section III. of this final notice, yielded the following areas where, as of the date of this notice, TCT has completed revising its standards and certification processes in order to—

- Meet the Medicare CfC requirements for all of the following regulations:

++ Section 488.5(a)(4)(ii), to provide documentation demonstrating the comparability of the organization's survey process and surveyor guidance to those required for State survey agencies conducting federal Medicare surveys for the same provider or supplier type to ensure levels of triaging will not negatively impact patient care and outcomes.

++ Section 488.5(a)(12) to specify a triage process for responding to and investigating complaints against accredited facilities, including policies and procedures regarding referrals when applicable to appropriate licensing bodies and ombudsman programs.

++ Section 488.26(b) to ensure citation level of deficiencies are cited appropriately, by conducting additional review of standards and RHC Medicare CfCs, provide a process for ensuring a thorough understanding of manner and degree of deficiency, and surveyor training.

++ Section 491.5(a)(1) to explicitly demonstrate RHC is located in a rural area, through policies and procedures, ensure surveyor's documentation exhibits the RHC physical name and address where services are provided.

++ SOM Chapter 2, Section 2700A to establish a policy and procedure to protect the integrity and intent of unannounced surveys when surveys are conducted at multiple locations and in close proximity.

++ SOM Chapter 2, Section 2728B, is to clarify an acceptable plan of correction that includes the RHC completing the organizational plan of correction template and documentation implementing the plan for future compliance and monitoring.

++ SOM Chapter 5 Section 5075, to ensure the administrative review and offsite investigation that are generally not permitted is consistent with the compliant policies found in Chapter 5.

++ Provide a revised plan of correction policy comparable to Chapter 2 of the SOM.

In addition to the standards review, CMS reviewed TCT's comparable survey processes, which were conducted as described in section III. of this final notice, and yielded the following areas where, as of the date of this notice, TCT has completed revising its survey processes in order to demonstrate that it uses survey processes that are comparable to state survey agency processes by:

++ Removing TCT's policies to allow patient and staff identifiers to be kept together. Such identifiers need to be kept separately from the surveyor's notes and findings to keep patients and staff private.

++ Revising language prohibiting Protected Health Information from being taken from the clinic. TCT language is inconsistent with CMS policy, which allows surveyors to photocopy documents needed to support deficient findings.

++ Clarifying TCT's policy that gives surveyors the discretion to conduct interviews privately. This policy is inconsistent with CMS policy governing private interviews with patients, staff, and visitors; it is a requirement and not discretionary unless the interviewee refuses.

++ Specifying TCT's policy to allow facilities to audio tape exit conferences, require facilities to provide two tapes and tape recorders and a recording of the meeting simultaneously, and then permitting the surveying team to select one of the tapes at the conclusion of the exit conference.

B. Term of Approval

Based on our review and observations described in section III. and section V. of this final notice, we approve TCT as a national accreditation organization for RHCs that request participation in the Medicare program. The decision announced in this final notice is effective July 17, 2024, to July 17, 2028 (4 years).

VI. Collection of Information Requirements

This document does not impose information collection requirements, that is, reporting, recordkeeping, or third-party disclosure requirements. Consequently, there is no need for review by the Office of Management and Budget under the authority of the Paperwork Reduction Act of 1995 (44 U.S.C. chapter 35).

The Administrator of the Centers for Medicare & Medicaid Services (CMS), Chiquita Brooks-LaSure, having reviewed and approved this document, authorizes Trenesha Fultz-Mimms, who is the Federal Register Liaison, to electronically sign this document for purposes of publication in the **Federal Register**.

Trenesha Fultz-Mimms,

Federal Register Liaison, Centers for Medicare & Medicaid Services.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

National Institute of Environmental Health Sciences; Notice of Closed Meetings

Pursuant to section 1009 of the Federal Advisory Committee Act, as amended, notice is hereby given of the following meetings.

The meetings will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: National Institute of Environmental Health Sciences Special Emphasis Panel: NIEHS Support for Conferences and Scientific Meeting R13.

Date: June 11, 2024.

Time: 11:00 a.m. to 12:00 p.m.

Agenda: To review and evaluate grant applications.

Place: National Institute of Environmental Health Science, 530 Davis Drive, Keystone Building, Durham, NC 27713 (Virtual Meeting).

Contact Person: Murali Ganesan, Scientific Review Officer, Scientific Review Branch, Division of Extramural Research and Training, National Institute of Environmental Health Sciences, National Institutes of Health, Keystone Building, Room 3097, Research Triangle Park, NC 27713, (984) 287–4674, *murali.ganesan@nih.gov*.

Name of Committee: National Institute of Environmental Health Sciences Special Emphasis Panel: Career Development in K Applications.

Date: June 20–21, 2024.

Time: 10:00 a.m. to 4:30 p.m.

Agenda: To review and evaluate grant applications.

Place: National Institute of Environmental Health Science, 530 Davis Drive, Keystone Building, Durham, NC 27713 (Virtual Meeting).

Contact Person: Beverly W. Duncan, Ph.D., Scientific Review Officer, Keystone Building, 530 Davis Drive, Room 3130, Durham, NC 27713, (240) 353–6598, *beverly.duncan@nih.gov*.

BILLING CODE 4140–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

Prospective Grant of an Exclusive Patent License: Antibody-Drug Conjugates (ADCs) for Targeting CD56-Positive Tumors

AGENCY: National Institutes of Health, HHS.

ACTION: Notice.

SUMMARY: The National Cancer Institute, an institute of the National Institutes of Health, Department of Health and Human Services, is contemplating the grant of an Exclusive Patent License to practice the inventions embodied in the Patents and Patent Applications listed in the **SUPPLEMENTARY INFORMATION** section of this Notice to McSAF Inside Oncology SAS (''McSAF Inside Oncology'') located in Tours, France.

DATES: Only written comments and/or applications for a license which are received by the National Cancer Institute's Technology Transfer Center on or before May 28, 2024 will be considered.

ADDRESSES: Requests for copies of the patent applications, inquiries, and comments relating to the contemplated Exclusive Patent License should be directed to: Rose Freel, Ph.D., Unit Supervisor, NCI Technology Transfer Center, Telephone: (301) 624–1257; Email: *rose.freel@nih.gov.*

SUPPLEMENTARY INFORMATION:

Intellectual Property

1. United States Provisional Patent Application No. 62/199,707 filed July 31, 2015, entitled ''Antibody-drug conjugates for targeting CD56-positive tumors'' [HHS Reference No. E–221–2015–0–US–01];

2. International Patent Application No. PCT/US2016/044777 filed July 29, 2016, entitled ''Antibody-drug conjugates for targeting CD56-positive tumors'' [HHS Reference No. E–221–2015–0–PCT–02]; and

3. United States Patent No. 10,548,987 issued February 02, 2020 (corresponding to United States Patent Application No. 15/747,620 filed January 25, 2018), entitled ''Antibody-drug conjugates for targeting CD56-positive tumors'' [HHS Reference No. E–221–2015–0–US–03].

The patent rights in these inventions have been assigned and/or exclusively licensed to the government of the United States of America.

The prospective exclusive license territory may be worldwide, and the field of use may be limited to the following:

''The use, development, and commercialization of an antibody-drug conjugate (ADC) for the treatment of Merkel cell carcinoma, wherein the ADC utilizes any technology for attachment of the cytotoxic payload and has:

(1) The CDR sequences of the m906 antibody; and

(2) a cytotoxic payload.''

and

''The use, development, and commercialization of an antibody-drug conjugate (ADC) for the treatment of CD56-positive cancers except glioblastoma, wherein the ADC:

(1) has the CDR sequences of the m906 antibody;

(2) has a cytotoxic payload; and

(3) utilizes solely McSAF Inside Oncology's proprietary or exclusively in-licensed bioconjugation technologies for attachment of the linker-payload(s) to the m906 antibody.

The E–221–2015 patent family is directed to ADCs utilizing the CD56-specific monoclonal antibody known as m906 and conjugated to a drug. The technology is intended to be used as a therapeutic for CD56-positive cancers such as neuroblastoma, multiple myeloma, ovarian cancer, acute myeloid leukemia, and small cell lung cancer. The exclusive field of use which may be granted to McSAF Inside Oncology applies to only ADCs which either (1) treat Merkel Cell Carcinoma; or (2) use McSAF Inside Oncology's proprietary bioconjugation platform for attachment of the antibody to the linker-payload. Accordingly, the proposed scope of rights which may be conveyed under the license covers only a portion of the total scope of the E–221–2015 patent family and only a subset of the possible ADCs that incorporate the m906 antibody as well as the possible therapeutic applications of the ADCs.

This Notice is made in accordance with 35 U.S.C. 209 and 37 CFR part 404. The prospective exclusive license will be royalty bearing, and the prospective exclusive license may be granted unless within fifteen (15) days from the date of this published Notice, the National Cancer Institute receives written evidence and argument that establishes that the grant of the license would not be consistent with the requirements of 35 U.S.C. 209 and 37 CFR part 404.

In response to this Notice, the public may file comments or objections. Comments and objections, other than those in the form of a license application, will not be treated confidentially and may be made publicly available.

License applications submitted in response to this Notice will be presumed to contain business confidential information and any release of information from these license applications will be made only as required and upon a request under the Freedom of Information Act, 5 U.S.C. 552.

Dated: May 6, 2024.

Richard U. Rodriguez,

Associate Director, Technology Transfer Center, National Cancer Institute.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

National Institute of Arthritis and Musculoskeletal and Skin Diseases; Notice of Closed Meeting

Pursuant to section 1009 of the Federal Advisory Committee Act, as amended, notice is hereby given of the following meeting.

The meeting will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: National Institute of Arthritis and Musculoskeletal and Skin Diseases Special Emphasis Panel: AMSC/AMS Member Conflict Review.

Date: June 17, 2024.

Time: 1:00 p.m. to 3:00 p.m.

Agenda: To review and evaluate grant applications.

Place: National Institutes of Health, One Democracy Plaza, 6701 Democracy Boulevard, Bethesda, MD 20892 (Virtual Meeting).

Contact Person: Kan Ma, Ph.D., Scientific Review Officer, Scientific Review Branch, National Institute of Arthritis,

Musculoskeletal and Skin Diseases, NIH, 6701 Democracy Boulevard, Suite 814, Bethesda, MD 20892, 301–451–4838, *mak2@mail.nih.gov*.

BILLING CODE 4140–01–P

DEPARTMENT OF HOMELAND SECURITY

Transportation Security Administration

[Docket No. TSA–2011–0008]

Request for Applicants for Appointment to the Aviation Security Advisory Committee

AGENCY: Transportation Security Administration, Department of Homeland Security.

ACTION: Committee management; request for applicants.

SUMMARY: The Transportation Security Administration (TSA) requests that qualified individuals interested in serving on the Aviation Security Advisory Committee (ASAC) apply for appointment as identified in this notice. All applicants must represent one of the constituencies specified below in order to be eligible for appointment. ASAC's mission is to provide advice and recommendations to the TSA Administrator on improving aviation security matters, including developing, refining, and implementing policies, programs, rulemakings, and security directives pertaining to aviation security, while adhering to sensitive security guidelines.

DATES: Applications for membership must be submitted to TSA, using one of the methods identified in the **ADDRESSES** section below, on or before May 31, 2024.

ADDRESSES: Applications must be submitted by one of the following means:

- *Email: ASAC@tsa.dhs.gov.*
- *Mail:* Tamika McCree Elhilali, ASAC Designated Federal Officer, Transportation Security Administration (TSA–28), 6595 Springfield Center Drive, Springfield, VA 20598–6028.

The ASAC will send you an email that confirms receipt of your application and will notify you of the final status of your application once TSA selects members.

FOR FURTHER INFORMATION CONTACT: Tamika McCree Elhilali, ASAC Designated Federal Officer, Transportation Security Administration (TSA–28), 6595 Springfield Center Drive, Springfield, VA 20598–6028, *ASAC@tsa.dhs.gov,* 202–595–4802.

SUPPLEMENTARY INFORMATION: The ASAC is an advisory committee established pursuant to 49 U.S.C. 44946. The committee is composed of individual members representing 19 key constituencies affected by aviation security requirements, as defined at 49 U.S.C. 44946(c)(1)(C).

This request for applications is limited to specific membership categories. Consistent with applicable law, TSA is committed to pursuing opportunities to appoint a committee that reflects the diversity of the United States. The following list provides the key constituencies and identifies with an asterisk (*) the constituencies for whom the current representative's term is expiring:

1. Air carriers.
2. All-cargo air transportation.*
3. Labor organizations representing air carrier employees (3 vacancies).*
4. Aircraft manufacturers.*
5. Airport operators.*
6. General aviation.*
7. Travel industry.*
8. Victims of terrorist acts against aviation.*
9. Law enforcement and security experts.
10. Indirect air carriers.*
11. Aviation security technology industry (including screening technology and biometrics).
12. Airport-based businesses.*
13. Passenger advocacy groups.
14. Airport authorities and businesses that conduct security operations at airports.*
15. Labor organizations representing transportation security officers.*
16. Airport construction and maintenance contractors.*
17. Labor organizations representing employees of airport construction and maintenance contractors.
18. Privacy organizations.
19. Aeronautical repair stations.

Unless otherwise noted, the ASAC does not have a specific number of members allocated to any membership category and the number of members in a category may change to fit the needs of the Committee. As required by the statute, however, individuals selected on the ASAC may not represent more than 34 member organizations.

Appointees will be designated as Representative members. Representative members speak for the key constituency group they represent. Membership on ASAC is personal to the appointee and a member may not send an alternate to a Committee meeting. Pursuant to 49 U.S.C. 44946(c)(3), members shall not receive pay, allowances, or benefits from the Government by reason of their service on ASAC.

Committee Meetings

The ASAC typically convenes four times per year. Additional meetings may be held with the approval of the Designated Federal Official. While at least one meeting per year is open to the public, the other meetings are typically closed to the public due to the sensitive nature of the material discussed. In addition, members are expected to participate on ASAC subcommittees that typically meet more frequently to deliberate and discuss specific aviation matters.

Committee Membership

Committee members are appointed by, and serve at the pleasure of, the TSA Administrator for a 2-year term or until a successor is appointed. Members who are currently serving on the Committee are eligible to reapply for membership (a new application is required).

Committee Membership Vetting

All applicants that are presented to the TSA Administrator for appointment to ASAC must successfully complete a Security Threat Assessment (STA) by TSA, as access to sensitive security information will be necessary. U.S. citizens and those meeting residency requirements will be vetted using TSA's Universal Enrollment Services (UES), which includes the collection of biographic and biometric information to allow TSA to perform the STA in regards to criminal history, intelligence, and citizenship. Selected applicants will be offered a no-cost authorization code to complete the three-step UES process; which includes online pre-enrollment, coordinating a visit to an enrollment center, and the in-person visit to the enrollment center.

Non-U.S. applicants presented for appointment to ASAC will be required to complete additional vetting. This vetting will include the completion and submission of TSA Form 2816B form, which must be submitted at least 30 days before visiting TSA spaces.

Application for Advisory Committee Appointment

TSA is seeking applications for the membership categories which are marked with an asterisk in the Supplementary Information section above. Any person wishing to be

considered for appointment to ASAC must provide the following:

- Complete professional resume.
- Statement of interest and reasons for application, including the membership category and how you represent a significant portion of that constituency and also provide a brief explanation of how you can contribute to one or more TSA strategic initiatives, based on your prior experience with TSA, or your review of current TSA strategic documents that can be found at *www.tsa.gov/about/strategy.*
- If there are aspects of diversity that you wish to describe or emphasize in support of your candidacy, please do so within your statement of interest application.
- Home and work addresses, telephone number, and email address.

Please submit your application to the Responsible TSA Official in the **ADDRESSES** section noted above by May 31, 2024.

Dated May 6, 2024.

Eddie D. Mayenschein,

Assistant Administrator, Policy, Plans, and Engagement.

BILLING CODE 9110–05–P

DEPARTMENT OF HOMELAND SECURITY

U.S. Citizenship and Immigration Services

[OMB Control Number 1615–0028]

Agency Information Collection Activities; Revision of a Currently Approved Collection: Petition To Classify Orphan as an Immediate Relative; Application for Advance Processing of an Orphan Petition; Supplement 1, Listing of an Adult Member of the Household; Supplement 2, Consent To Disclose Information; and Supplement 3, Request for Action on Approved Form I–600A/I–600

AGENCY: U.S. Citizenship and Immigration Services, Department of Homeland Security.

ACTION: 30-Day notice.

SUMMARY: The Department of Homeland Security (DHS), U.S. Citizenship and Immigration Services (USCIS) will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995. The purpose of this notice is to allow an additional 30 days for public comments.

DATES: Comments are encouraged and will be accepted until June 10, 2024.

ADDRESSES: Written comments and/or suggestions regarding the item(s) contained in this notice, especially regarding the estimated public burden and associated response time, must be submitted via the Federal eRulemaking Portal website at *http://www.regulations.gov* under e-Docket ID number USCIS–2008–0020. All submissions received must include the OMB Control Number 1615–0028 in the body of the letter, the agency name and Docket ID USCIS–2008–0020.

FOR FURTHER INFORMATION CONTACT: USCIS, Office of Policy and Strategy, Regulatory Coordination Division, Samantha Deshommes, Chief, telephone number (240) 721–3000 (This is not a toll-free number. Comments are not accepted via telephone message). Please note contact information provided here is solely for questions regarding this notice. It is not for individual case status inquiries. Applicants seeking information about the status of their individual cases can check Case Status Online, available at the USCIS website at *https://www.uscis.gov,* or call the USCIS Contact Center at 800–375–5283 (TTY 800–767–1833).

SUPPLEMENTARY INFORMATION:

Comments

The information collection notice was previously published in the **Federal Register** on October 26, 2023, at 88 FR 73614, allowing for a 60-day public comment period. USCIS received no comments in connection with the 60-day notice.

You may access the information collection instrument with instructions or additional information by visiting the Federal eRulemaking Portal site at: *https://www.regulations.gov* and entering USCIS–2008–0020 in the search box. Comments must be submitted in English, or an English translation must be provided. The comments submitted to USCIS via this method are visible to the Office of Management and Budget and comply with the requirements of 5 CFR 1320.12(c). All submissions will be posted, without change, to the Federal eRulemaking Portal at *https://www.regulations.gov,* and will include any personal information you provide. Therefore, submitting this information makes it public. You may wish to consider limiting the amount of personal information that you provide in any voluntary submission you make to DHS. DHS may withhold information provided in comments from public viewing that it determines may impact the privacy of an individual or is offensive. For additional information, please read the Privacy Act notice that is available via the link in the footer of *https://www.regulations.gov*.

Written comments and suggestions from the public and affected agencies should address one or more of the following four points:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Overview of This Information Collection

(1) *Type of Information Collection:* Revision of a Currently Approved Collection.

(2) *Title of the Form/Collection:* Petition to Classify Orphan as an Immediate Relative; Application for Advance Processing of an Orphan Petition; Supplement 1, Listing of an Adult Member of the Household; Supplement 2, Consent to Disclose Information; and Supplement 3, Request for Action on Approved Form I–600A/I–600.

(3) *Agency form number, if any, and the applicable component of the DHS sponsoring the collection:* I–600; I–600A; I–600/I–600A Supplement 1; I–600/I–600A Supplement 2; I–600/I–600A Supplement 3; USCIS.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract: Primary:* Individuals or households. A U.S. adoptive parent may file a petition to classify an orphan as an immediate relative through Form I–600 under section 101(b)(1)(F) of the INA. A U.S. prospective adoptive parent may file Form I–600A in advance of the Form I–600 filing and USCIS will determine the prospective adoptive parent's eligibility to file Form I–600 and their suitability and eligibility to properly parent an orphan. If a U.S. prospective/adoptive parent has an

adult member of their household, as defined at 8 CFR 204.301, the prospective/adoptive parent must include the Supplement 1 when filing both Form I–600A and Form I–600. A U.S. prospective/adoptive parent files Supplement 2 to authorize USCIS to disclose case-related information to adoption service providers that would otherwise be protected under the Privacy Act, 5 U.S.C. 552a. Authorized disclosures will assist USCIS in the adjudication of Forms I–600A and I–600. A U.S. prospective/adoptive parent files Supplement 3 to request action such as an extended or updated suitability determination based upon a significant change in their circumstances or change in the number or characteristics of the children they intend to adopt, a change in their intended country of adoption, or a request for a duplicate notice of their approved Form I–600A suitability determination.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* The estimated total number of respondents for the information collection Form I–600 is 1,200 and the estimated hour burden per response is .82 hours; the estimated total number of respondents for the information collection Form I–600A is 2,000 and the estimated hour burden per response is .82 hours; the estimated total number of respondents for the information collection Form I–600A Supplement 1 is 301 and the estimated hour burden per response is .82 hours; the estimated total number of respondents for the information collection Form I–600A Supplement 2 is 1,260 and the estimated hour burden per response is 0.25 hours; the estimated total number of respondents for the information collection Form I–600A Supplement 3 is 1,286 and the estimated hour burden per response is .82 hours; the estimated total number of respondents for the Home Study information collection is 2,500 and the estimated hour burden per response is 25 hours; the estimated total number of respondents for the biometrics submission is 2,520 and the estimated hour burden per response is 1.17 hours; and the estimated total number of respondents for the Biometrics—DNA information collection is 2 and the estimated hour burden per response is 6 hours.

(6) *An estimate of the total public burden (in hours) associated with the collection:* The total estimated annual hour burden associated with this collection is 69,701 hours.

(7) *An estimate of the total public burden (in cost) associated with the collection:* The estimated total annual cost burden associated with this collection of information is $7,759,932.

Dated: May 6, 2024

Samantha L. Deshommes,

Chief, Regulatory Coordination Division, Office of Policy and Strategy, U.S. Citizenship and Immigration Services, Department of Homeland Security.

BILLING CODE 9111–97–P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–6462–N–01]

Section 8 Housing Assistance Payments Program—Fiscal Year (FY) 2024 Inflation Factors for Public Housing Agency (PHA) Renewal Funding

AGENCY: Office of the Assistant Secretary for Policy Development and Research, HUD.

ACTION: Notice.

SUMMARY: This notice establishes Renewal Funding Inflation Factors (RFIFs) to adjust Fiscal Year (FY) 2024 renewal funding for the Housing Choice Voucher (HCV) Program of each public housing agency (PHA), as required by the Consolidated Appropriations Act, 2024. The notice apportions the expected percent change in national Per Unit Cost (PUC) for the HCV program, 7.38 percent, to each PHA based on the change in Fair Market Rents (FMRs) for their operating area to produce the FY 2024 RFIFs. HUD's FY 2024 methodology differs in part from that used in FY 2023. HUD has refined the national PUC forecast by changing the gross rent component in a manner that weights projected recent mover rents as measured by the FMR with an independent forecast of all-mover rents as measured by the Consumer Price Index (CPI).

DATES: *Applicability Date:* May 10, 2024.

FOR FURTHER INFORMATION CONTACT: Miguel A. Fontanez, Director, Housing Voucher Financial Division, Office of Public Housing and Voucher Programs, Office of Public and Indian Housing, Room 4222, U.S. Department of Housing and Urban Development, 451 Seventh Street SW, Washington, DC 20410; telephone (202) 422–0278 (this is not a toll-free number). Adam Bibler, Program Parameters and Research Division, Office of Policy Development and Research, Room 8208, U.S. Department of Housing and Urban Development, 451 Seventh Street SW, Washington, DC 20410; telephone (202) 402–6057 (this is not a toll-free number), for technical information regarding the development of the schedules for specific areas or the methods used for calculating the inflation factors. HUD welcomes and is prepared to receive calls from individuals who are deaf or hard of hearing, as well as individuals with speech or communication disabilities. To learn more about how to make an accessible telephone call, please visit *https://www.fcc.gov/consumers/guides/telecommunications-relay-service-trs.*

SUPPLEMENTARY INFORMATION:

I. Background

Division F, Title II of the Consolidated Appropriations Act, 2024 requires that the HUD Secretary, for the calendar year 2024 funding cycle, provide renewal funding for each public housing agency (PHA) based on validated voucher management system (VMS) leasing and cost data for the prior calendar year and by applying an inflation factor as established by the Secretary, by notice published in the **Federal Register**. This notice announces the availability of the FY 2024 inflation factors and describes the methodology for calculating them. Tables in PDF and Microsoft Excel formats showing Renewal Funding Inflation Factors (RFIFs) by HUD Fair Market Rent Area are available electronically from the HUD data information page at: *https://www.huduser.gov/portal/datasets/rfif/rfif.html.*

II. Methodology

RFIFs are used to adjust the allocation of Housing Choice Voucher (HCV) program funds to PHAs for local changes in rents, utility costs, and tenant incomes. To calculate the RFIFs, HUD first forecasts a national inflation factor, which is the annual change in the national average Per Unit Cost (PUC). HUD then calculates individual area inflation factors, which are based on the annual changes in the two-bedroom Fair Market Rent (FMR) for each area. Finally, HUD adjusts the individual area inflation factors to be consistent with the national inflation factor.

Since FY 2017, HUD's method of projecting the national average PUC has been based on independent forecasts of gross rent and tenant income. Each forecast is produced using historical and forecasted macroeconomic data as independent variables, where the forecasts are consistent with the Economic Assumptions of the Administration's FY Budget. The forecast for gross rent is itself based on forecasts of the Consumer Price Index (CPI) Rent of Primary Residence Index and the CPI Fuels and Utilities Index. Forecasted values of gross rent series were then applied to the relevant FY national average two-bedroom FMR to produce a CY value. Finally, a ''notional'' PUC is then calculated as the difference between gross rent value and 30 percent of tenant income (the standard for tenant rent contribution in the voucher program). HUD uses a notional PUC as opposed to the actual

PUC to project costs that are consistent with PHAs leasing the same number and quality of units.

For FY 2024, HUD is continuing its overall methodology of forecasting notional PUC based on a combination of expected gross rent increases and tenant income increases. However, HUD has modified how it calculates the gross rent increase based on recent dynamics in rental markets. As previously mentioned, HUD has historically used the CPI Rent of Primary Residence series as its measure of shelter rent inflation. The CPI is constructed based on a survey of rents paid in a fixed sample of units over time. Recent research has shown that since 2020, rents paid for newly leased units have increased at a significantly faster rate than overall rents. HUD attempted to address this dynamic in its calculation of FY 2024 FMRs by replacing the use of the CPI in part with rates of rental inflation as captured by private sector rent data. This was done as the FMR is required by regulation to reflect rents paid by ''recent movers.'' However, for purposes of forecasting Per Unit Costs, the gross rent component should represent all types of tenants in the Housing Choice Voucher program, including new admissions and recent movers, as well as those staying in place. Using both a baseline and projected CY FMR as the gross rent component of PUC as in prior years risks overstating program gross rents in a manner that only reflects rents paid by recent movers. HUD's analysis of tenant administrative data has found that the vast majority of HUD assisted households remain in place from year to year, and experience slower rates of rent inflation on average. Using an FMR-only rent, especially in times of large recent mover rent growth, would likely overstate per unit costs. In contrast, using a PUC based solely on an all-mover CPI Forecast would further risk underestimating per unit costs when PHA's are implementing large recent mover rent increases. Therefore, for FY 2024, HUD is calculating the gross rent component of PUC based on a weighted average of the expected change in national FMR (to represent recent movers) and the expected national change in Rent of Primary Residence CPI (to represent in-place tenants).

For the reasons outlined above, HUD is considering two different approaches for weighting the FMR and CPI. Under the first approach, HUD develops a gross rent inflation factor using a weighted average of the established CY FMR projection and independent CY CPI gross rent index forecast methodology, where the FMR is weighted at approximately 56.7 percent and the CPI gross rent inflation index measure is weighted at approximately 43.3 percent. HUD determined the weights empirically in a manner that best predicts the historical average voucher tenant gross rents.[1] The change between the forecasted CY 2024 notional PUC and the CY 2023 notional PUC is the expected national change in PUC, or 9.54 percent. The strengths of this approach are that by considering the time series of actual rents, these weights are likely capturing important dynamics of the real-world dynamics of the voucher program. The weaknesses are that there is no guarantee that these past trends will continue and, given that there was historically little difference between rates of recent mover and all mover inflation, the weights assigned to each component may be arbitrary.

Under the second approach, HUD takes a weighted average of the CY FMR projection and independent CY CPI gross rent index forecast, where the FMR is weighted at approximately 15 percent and the CPI gross rent index is weighted at approximately 85 percent. HUD determined these weights based on the historical composition of new admissions and recent movers based on HUD administrative data. The change between the forecasted CY 2024 notional PUC and the CY 2023 notional PUC for this approach is 5.22 percent. The strength of this approach is that weights based on the actual number of new leases in the program is a better theoretical approach to assigning recent mover rates of inflation than simply following past trends. However, there is also evidence to suggest that even non-movers in the voucher program may experience higher rates of rent inflation, such as existing tenants having rents exceeding payment standards or landlords pricing units based on FMR regardless of unit turnover.

Given these uncertainties, HUD takes the average of the two factors produced by these approaches and gets a final CY2024 PUC estimate of 7.38 percent. HUD's forecasts of the Consumer Price Index (CPI) Rent of Primary Residence Index, CPI Fuels and Utilities Index and HUD tenant incomes remain consistent with the Economic Assumptions of the Administration's FY 2025 Budget. For more information on HUD's forecast methodology, see 82 FR 26710 (June 8, 2017).

[1] Specifically, HUD attempted to predict each year's tenant gross rent using a weighted average of FMR and CPI change, then compared the predicted gross rent to the actual historical gross rent. HUD then generated an error measure as the difference between the predicted and actual rent. HUD then solved for the weights that minimize the root mean squared error of the predicted and actual rents.

The inflation factor for an individual geographic area is based on the annualized change in the area's FMR between FY 2023 and FY 2024. These changes in FMRs are then scaled such that the voucher-weighted average of all individual area inflation factors is equal to the national inflation factor, *i.e.,* the expected annual change in national PUC from CY 2023 to CY 2024, and such that no area has a factor less than one. For PHAs operating in multiple FMR areas, HUD calculates a voucher-weighted average inflation factor based on the count of vouchers in each FMR area administered by the PHA as captured in HUD administrative data as of December 31, 2023.

III. The Use of Inflation Factors

HUD subsequently applies the calculated individual area inflation factors to eligible renewal funding for each PHA based on VMS leasing and cost data for the prior calendar year.

IV. Geographic Areas and Area Definitions

As explained above, inflation factors based on area FMR changes are produced for all FMR areas and applied to eligible renewal funding for each PHA. The tables showing the RFIFs, available electronically from the HUD data information page, list the inflation factors for each FMR area on a state-by-state basis. The inflation factors use the same OMB metropolitan area definitions, as revised by HUD, that are used in the FY 2024 FMRs. PHAs should refer to the Area Definitions Table on the following web page to make certain that they are referencing the correct inflation factors: *http://www.huduser.org/portal/datasets/rfif/FY20234/FY2024_RFIF_FMR_AREA_REPORT.pdf.* The Area Definitions Table lists areas in alphabetical order by state, and the counties associated with each area. In the six New England states, the listings are for counties or parts of counties as defined by towns or cities. HUD is also releasing the data in Microsoft Excel format to assist users who may wish to use these data in other calculations. The Excel file is available at *https://www.huduser.gov/portal/datasets/rfif/rfif.html.* Note that, as described earlier, the actual renewal funding inflation factor applied to agency funding will be the voucher-weighted average of the FMR area factors when the PHA operates in multiple areas.

V. Environmental Impact

This notice involves a statutorily required establishment of a rate or cost determination which does not constitute

a development decision affecting the physical condition of specific project areas or building sites. Accordingly, under 24 CFR 50.19(c)(6), this notice is categorically excluded from environmental review under the National Environmental Policy Act of 1969 (42 U.S.C. 4321).

Solomon Greene,

Principal Deputy Assistant Secretary for Policy Development and Research.

Agency Information Collection Activities; Documenting, Managing, and Preserving Department of the Interior Museum Collections Housed in Non-Federal Repositories

AGENCY: Office of Acquisition and Property Management, Interior.

ACTION: Notice of information collection; request for comment.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, we, the Office of Acquisition and Property Management, Office of the Secretary, Department of the Interior are proposing to renew an information collection with revisions.

DATES: Interested persons are invited to submit comments on or before July 9, 2024.

ADDRESSES: Send your comments on this information collection request (ICR) by mail to Rochelle Bennett, Office of Acquisition and Property Management, U.S. Department of the Interior, 1849 C Street NW, MS 4262–MIB, Washington, DC 20240; or by email to *Rochelle_Bennett@ios.doi.gov*. Please reference OMB Control Number 1084–0034 in the subject line of your comments.

FOR FURTHER INFORMATION CONTACT: To request additional information about this ICR, contact Rochelle Bennett by email at *Rochelle_Bennett@ios.doi.gov,* or by telephone at 202–513–7564. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside of the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION: In accordance with the Paperwork Reduction Act of 1995 (PRA, 44 U.S.C. 3501 *et seq.*) and 5 CFR 1320.8(d)(1), all information collections require approval under the PRA. We may not conduct or sponsor and you are not required to respond to a collection of information unless it displays a currently valid OMB control number.

As part of our continuing effort to reduce paperwork and respondent burdens, we invite the public and other Federal agencies to comment on new, proposed, revised, and continuing collections of information. This helps us assess the impact of our information collection requirements and minimize the public's reporting burden. It also helps the public understand our information collection requirements and provide the requested data in the desired format.

We are especially interested in public comment addressing the following:

(1) Whether or not the collection of information is necessary for the proper performance of the functions of the agency, including whether or not the information will have practical utility;

(2) The accuracy of our estimate of the burden for this collection of information, including the validity of the methodology and assumptions used;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) How might the agency minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of response.

Comments that you submit in response to this notice are a matter of public record. We will include or summarize each comment in our request to OMB to approve this ICR. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Abstract: The Department of the Interior (DOI) manages an estimated 75 million museum objects and over 92 thousand linear feet of archives in trust for the American public. This diverse collection consists of archaeological artifacts, archives, biological specimens, ethnographic objects, fine arts, geological specimens, historic objects, and paleontological specimens owned and managed by DOI bureaus and offices (bureaus). Although the majority of DOI museum collections are housed in DOI bureau facilities, at least 10 percent are located at more than 1,000 non-Federal repositories, primarily state and tribal institutions, museums, and university departments. Most of DOI museum collections housed in non-Federal repositories resulted from projects on Federal lands, and include objects from the disciplines of archaeology, biology, geology, and paleontology, as well as associated project documentation (archives or associated records).This information collection request is directed to these non-Federal repositories that house DOI museum collections.

DOI museum collections cared for in non-Federal repositories are established as Federal property under Federal law. Permits and other agreements for the collection of artifacts and specimens from public lands managed by DOI further affirm Federal ownership. Federal regulations and DOI policy require that all permittees (authorized individuals) conducting research or performing compliance activities on DOI-managed lands must ensure that any retained museum objects and archives collected or generated during a project are: (1) accessioned and cataloged according to DOI standards in the Interior Collection Management System (ICMS), its successor the Museum Collection Management System (MCMS), or another collection management system from which the necessary data can be imported into ICMS or MCMS; and (2) housed in an appropriate museum repository that meets professional and DOI museum standards. These requirements help to establish and maintain accountability, as well as ensure the collections' long-term preservation, protection, and availability for access and use.

Upon request by DOI bureaus, voluntary submittal of the information identified below from non-Federal repositories supports DOI's management of its museum collections, as well as compliance with the Native American Graves Protection and Repatriation Act (NAGPRA) where applicable.DOI bureaus may request information within the following categories:

(1) Museum records created to manage DOI museum collections, such as accession, catalog, inventory, loan, and deaccession records, and backups of collection management systems or other software/programs. (REVISED)

(2) Associated records/archives generated by the activity of collecting and analyzing DOI museum collections. (NEW)

(3) Access and use of DOI museum collections, such as use requests, analyses, physical and virtual exhibits, online catalogs and finding aids, presentations, and publications resulting from use. (NEW)

(4) Objects newly identified as under DOI ownership and possible Native American Graves Protection and Repatriation Act (NAGPRA) human remains or cultural items in DOI museum collections. (NEW)

(5) Improved management and care recommendations, including considerations for Duty of Care requirements consistent with NAGPRA. (NEW)

(6) Reports of damaged, deteriorated, missing, or stolen objects. (NEW)

(7) Core management and planning documents, such as scope of collection statement, emergency management, integrated pest management, security, and housekeeping plans. (NEW)

(8) Partnerships, funding, or commercial sponsorships that may involve DOI museum collections. (NEW)

(9) *Facility Checklist for Spaces Housing DOI Museum Property (Checklist)* to capture current environmental, security, and other management controls in place to document and safeguard DOI museum collections and provide recommendations for improvements. (EXISTING)

(10) *Input on Collections from Lands Administered by the U.S. Department of the Interior that are Located at Non-Federal Facilities (Input Form)* to query a limited range of information about the repository, scope and types of DOI museum collections in the repository, DOI bureaus with which the collections are associated, status of documentation and NAGPRA compliance, and availability of objects and archives for research and other uses. (EXISTING)

The expanded categories of information identified above provide a more accurate representation of the information that DOI bureaus may ask non-Federal repositories to voluntarily provide on DOI museum collections. The proposed changes in this information collection request also include elimination of the three instruction sheets for accession, catalog, and inventory information included in previous iterations, as that information is captured in a revised category identified above.

Title of Collection: Documenting, Managing, and Preserving Department of the Interior Museum Collections Housed in Non-Federal Repositories.

OMB Control Number: 1084–0034.

Form Number: None.

Type of Review: Revision of a currently approved collection.

Respondents/Affected Public: Museums; academic, cultural, and research institutions; and state, tribal, and local agencies and institutions.

Total Estimated Number of Annual Respondents: 900.

Total Estimated Number of Annual Responses: 900.

Estimated Completion Time per Response: Varies from less than 1 hour to 80 hours, depending on activity.

Total Estimated Number of Annual Burden Hours: 12,550.

Respondent's Obligation: Voluntary.

Frequency of Collection: Maximum of once per year per collection instrument, and likely less frequently.

Total Estimated Annual Nonhour Burden Cost: None.

An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

The authority for this action is the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

Megan Olsen,

Director, Office of Acquisition and Property Management.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[BLM_WY_FRN_MO4500179595]

Public Meeting for the Wyoming Resource Advisory Council

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of public meeting.

SUMMARY: In accordance with the Federal Land Policy and Management Act of 1976 and the Federal Advisory Committee Act of 1972, the U.S. Department of the Interior, Bureau of Land Management (BLM) Wyoming Resource Advisory Council (Council) will meet as follows.

DATES: The Council will participate in a business meeting on June 12, 2024, and a field tour on June 13, 2024, to the North Lander Herd Management Area (HMA) Complex. A virtual participation option will also be available for the June 12, 2024, business meeting. The business meeting and field tour will start at 9 a.m. Mountain Time (MT) and conclude at 4 p.m. MT. The meeting and field tour are open to the public.

ADDRESSES: The June 12, 2024, business meeting will be held at the Holiday Inn Express and Suites at 1002 11th Street, Lander, WY 82520. The field tour will commence and conclude at the Holiday Inn and include a visit to the North Lander HMA Complex. Individuals that prefer to participate virtually in the meeting must register in advance. Registration information will be posted two weeks in advance of the meeting on the Council's web page at *https://www.blm.gov/get-involved/resource-advisory-council/near-you/wyoming.*

FOR FURTHER INFORMATION CONTACT: Azure Hall, BLM Wyoming State Office, telephone: (307) 775–6208, email: *ahall@blm.gov.* Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION: The Council provides recommendations to the Secretary of the Interior concerning the planning and management of the public land resources located within the State of Wyoming. Agenda topics for June 12, 2024, may include updates and discussions on statewide planning efforts, energy trends, district and field manager updates, State Director comments, and other resource management issues the Council may raise. The final agenda will be posted on the Council's web page two weeks in advance of the meeting. The Council will participate in a field tour on June 13, 2024, to the North Lander HMA Complex. Members of the public are welcome on field tours but must provide their own transportation and meals.

Please make requests in advance for sign language interpreter services, assistive listening devices, or other reasonable accommodations. We ask that you contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section of this notice at least 7 business days prior to the meeting to give the BLM sufficient time to process your request. All reasonable accommodation requests are managed on a case-by-case basis.

A 30-minute public comment period will be offered June 12, 2024, at 2:25 p.m. MT. Depending on the number of persons wishing to speak and the time

available, the amount of time for oral comments may be limited. Written comments for the Council may be sent electronically in advance of the scheduled meeting to Public Affairs Specialist Azure Hall at *ahall@blm.gov,* or in writing to BLM Wyoming/Public Affairs, 5353 Yellowstone Rd., Cheyenne, WY 82009. All comments received will be provided to the Council. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so. While the business meeting and field tour are scheduled from 9 a.m. to 4 p.m. MT, they may end earlier or later depending on the needs of group members. Therefore, members of the public interested in a specific agenda item or discussion at the June 12, 2024, meeting should schedule their arrival accordingly.

Detailed minutes for Council meetings will be maintained in the BLM Wyoming State Office. Minutes will also be posted to the Council's web page at *https://www.blm.gov/get-involved/resource-advisory-council/near-you/wyoming.*

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[BLM_CO_FRN_MO4500174287; COC 028580]

Public Land Order No. 7941; Partial Withdrawal Revocation, Power Site Reserve No. 244; Colorado

AGENCY: Bureau of Land Management, Interior.

ACTION: Public land order.

SUMMARY: This order partially revokes a withdrawal created by Executive Order dated February 17, 1912, which established Power Site Reserve (PSR) No. 244, insofar as it affects 7.55 acres and releases these acres from applicability of section 24 of the Federal Power Act. This order opens the lands to sale under section 203 of the Federal Land Policy and Management Act of 1976, as amended (FLPMA), subject to valid existing rights, the provisions of existing withdrawals, other segregations of record, and the requirements of applicable law.

DATES: This public land order takes effect on May 10, 2024.

ADDRESSES: Comments and meeting requests should be sent to State Director, Bureau of Land Management, Colorado State Office, P.O. Box 151029, Lakewood, Colorado 80215. Information regarding the proposed withdrawal, including environmental and other reviews, will be available at the Colorado State Office.

FOR FURTHER INFORMATION CONTACT: Jennifer Jardine, Senior Realty Specialist, BLM Colorado State Office, telephone: (970) 385–1224; email: *jjardine@blm.gov.* Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services for contacting Ms. Jardine. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

SUPPLEMENTARY INFORMATION: The Bureau of Land Management (BLM) requested partial revocation affecting portions of PSR No. 244, classified for potential power site development. The BLM, in consultation with the Federal Energy Regulatory Commission, determined that the interests of the United States will not be injured by conveyance of the land out of Federal ownership, without reservation. This order opens the lands described within PSR No. 244 to sale under section 203 of FLPMA.

Order

By virtue of the authority vested in the Secretary of the Interior by section 204 of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1714, and pursuant to the determination by the Federal Energy Regulatory Commission, it is ordered as follows:

1. The withdrawal created by Executive order dated February 17, 1912, which established PSR No. 244, is hereby revoked in part as to the following described lands:

6th Principal Meridian, Colorado

T. 4 S., R. 86 W.,
Sec. 9, lots 18 and 28.

The area described contains 7.55 acres.

2. The provisions of section 24 of the Federal Power Act no longer apply to the land described in paragraph 1.

3. At 9 a.m. on May 10, 2024, the lands described in Paragraph 1 are opened to sale under section 203 of the Federal Land Policy and Management Act of 1976, as amended (43 U.S.C. 1713), subject to valid existing rights, the provisions of existing withdrawals, other segregations of record, and the requirements of applicable law.

(Authority: 43 U.S.C. 1714)

Robert T. Anderson,

Solicitor.

Fish and Wildlife Service

[BLM_FRN_MO4500175331]

Notice of Availability of the Draft Supplemental Environmental Impact Statement To Reconsider a Highway Right-of-Way Application and Associated Amendment of an Incidental Take Permit, Washington County, Utah

AGENCY: Bureau of Land Management, Fish and Wildlife Service, Interior.

ACTION: Notice of availability.

SUMMARY: In compliance with the National Environmental Policy Act of 1969, as amended (NEPA), the Federal Land Policy and Management Act of 1976, as amended (FLPMA), and the Endangered Species Act of 1973, as amended (ESA), the Bureau of Land Management (BLM) and the Fish and Wildlife Service (FWS), as co-lead agencies, announce the availability of the Draft Supplemental Environmental Impact Statement (SEIS) for the Northern Corridor Project (a proposed highway) as well as a potential amendment to the Incidental Take Permit (ITP) issued to Washington County, Utah, under section 10(a)(1)(B) of the ESA.

DATES: To afford the BLM and FWS the opportunity to consider comments in the Final SEIS, please ensure the agencies receive your comments within 45 days following the date the Environmental Protection Agency (EPA) publishes its Notice of Availability (NOA) of the Draft SEIS in the **Federal Register**. The EPA usually publishes its NOAs on Fridays.

ADDRESSES: The Draft SEIS is available for review on the BLM ePlanning project website at *https://eplanning.blm.gov/eplanning-ui/project/2026562/510.* Click the Documents link on the left

side of the screen to find the electronic versions of these materials. Written comments related to the highway right-of-way (ROW) and associated potential amendment of an ITP can be submitted by either of the following methods:

- *Website: https://eplanning.blm.gov/eplanning-ui/project/2026562/510.*
- *Mail:* Bureau of Land Management, Attn: Northern Corridor SEIS, 345 East Riverside Drive, St. George, UT 84790.

FOR FURTHER INFORMATION CONTACT: Dawna Ferris-Rowley, NCA Manager, Red Cliffs and Beaver Dam Wash NCAs, telephone (435) 688–3200; address 345 East Riverside Drive, St. George, UT 84790; email *BLM_UT_NorthernCorridor@blm.gov.* Contact Ms. Ferris-Rowley to have your name added to our mailing list. Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services for contacting Ms. Ferris-Rowley. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States. Replies are provided during normal business hours. If you would like to request to view a hard copy, please call the St. George Field Office for more information at (435) 688–3200, Monday through Friday, except holidays.

SUPPLEMENTARY INFORMATION: The BLM and FWS are issuing this NOA pursuant to NEPA, 42 United States Code (U.S.C.) 4321 *et seq.;* the Council on Environmental Quality regulations for implementing NEPA, 40 Code of Federal Regulations (CFR) parts 1500–1508; and the Department of the Interior's NEPA regulations, 43 CFR part 46.

The Draft SEIS has been prepared to supplement the analysis contained in the 2020 Final EIS (FEIS) by BLM and FWS. (The entire FEIS can be found at: *https://eplanning.blm.gov/eplanning-ui/project/1502103/570.*)

On September 4, 2018, the Utah Department of Transportation (UDOT) applied for a ROW grant for the Northern Corridor Project north of the City of St. George, Utah, on BLM-managed and non-Federal lands within the Red Cliffs National Conservation Area (NCA) and Red Cliffs Desert Reserve. To consider the application, the BLM needed to also consider amending the St. George Field Office and Red Cliffs NCA Resource Management Plans (RMPs). The Red Cliffs NCA was established through the passage of the Omnibus Public Land Management Act of 2009 (16 U.S.C. 460www). Prior to the NCA's designation, the Red Cliffs Desert Reserve was established for the protection of the Mojave desert tortoise as part of the 1995 Washington County Habitat Conservation Plan (HCP). In 2015, pursuant to section 10(a)(1)(B) of the ESA, Washington County applied to renew and amend the HCP and associated ITP. The restated and amended HCP described the Northern Corridor highway as a potential changed circumstance, which would be partially offset with the addition of a new sixth zone to the Red Cliffs Desert Reserve (Reserve Zone 6) as the primary conservation strategy.

In 2019–2020, in accordance with NEPA, the BLM and FWS prepared an EIS to analyze the environmental impacts associated with the proposed action and reasonable alternatives. The BLM also consulted with the FWS to meet the requirements in section 7(a)(2) of the ESA. The FWS issued a biological opinion to the BLM that determined the ROW and the amendments to the RMPs were not likely to jeopardize the continued existence of the Mojave desert tortoise or destroy or adversely modify designated critical habitat for the Mojave desert tortoise. In addition, the FWS issued an intra-agency biological opinion which determined that the ITP is not likely to jeopardize the continued existence of the Mojave desert tortoise, Holmgren milkvetch, Shivwits milkvetch, dwarf bear-poppy, Siler pincushion cactus, Gierisch mallow, and Fickeisen plains cactus or result in the adverse modification of critical habitat for any of the above listed species.

On January 13, 2021, the Secretary of the Interior signed a Record of Decision that approved the Northern Corridor ROW application and approved the amendments to the RMPs. The decision approving the ROW was effective immediately. The BLM then signed and issued the ROW grant to UDOT on the same day. Also on January 13, 2021, the FWS Regional Director for Interior Regions 5 and 7 signed a Record of Decision approving the issuance of an ITP to Washington County, and the FWS issued the ITP to Washington County. Because BLM approved the UDOT ROW application, the changed circumstance was triggered, and Zone 6 was formally added to the Reserve.

On June 3, 2021, seven conservation organizations (collectively, Plaintiffs) filed a complaint in the United States District Court for the District of Columbia, Case No. 1:21–cv–01506. Among other claims, Plaintiffs alleged the BLM's ROW decision violated both NEPA and the National Historic Preservation Act (NHPA). The Plaintiffs stated, in part, that the FEIS did not fully address the changed circumstances of wildfire in the region and the impacts it may have on the Mojave desert tortoise, desert tortoise habitat, and the spread of invasive annual grasses. The Plaintiffs also alleged that the BLM failed to comply with the consultation requirements under section 106 of the NHPA. On July 27, 2021, Plaintiffs amended their complaint to include the FWS and additional claims related to NEPA and the ESA.

During the litigation, the United States and Plaintiffs reached a settlement agreement that was signed on August 30, 2023. Prior to executing that agreement, the United States moved for the remand and partial vacatur of BLM's and FWS's 2021 decisions. In the motion, the United States acknowledged that the BLM did not comply with the NHPA and that the agencies had substantial and legitimate concerns that the FEIS may lack sufficient analysis of certain resource effects, including the effects of the construction and use of the Northern Corridor Project in the context of the following: (1) the trend in the increasing frequency and extent of wildfires in the Mojave Desert; (2) the rise of non-native/exotic and invasive vegetation in post-burn areas; and (3) the impacts increased fire and new non-native/exotic and invasive vegetation have on desert tortoise. On September 1, 2023, the Plaintiffs filed a response in support of the United States' motion. On November 16, 2023, the United States District Court for the District of Columbia issued an Order that granted the remand of all decisions associated with the January 2021 Records of Decision issued by the BLM and FWS.

Purpose and Need for the Proposed Action

The BLM's purpose and need for this action is to reconsider the 2018 UDOT ROW application to determine whether the BLM will affirm, affirm with modifications, or terminate the ROW grant. The FWS's purpose and need for this action is to consider whether to amend Washington County's ITP so that it reflects the BLM's reconsideration of UDOT's ROW.

Proposed Action and Alternatives

The Draft SEIS considers six alternatives that include both a specific ROW alignment and the corresponding action required of the FWS regarding the Washington County ITP. The six ROW alternatives analyzed in detail in the Draft SEIS are similar to those included in the FEIS published in November 2020. No new highway

alignments that meet UDOT's stated purpose and need for the Northern Corridor highway were identified by the public during the scoping period.

- *UDOT ROW Alignment alternative (No Action, or No Change):* the BLM would affirm the ROW grant issued to UDOT in 2021 following an alignment that is approximately 4.5 miles long, 1.9 miles of which would be across BLM-managed lands. This alternative would have a similar analysis of effects as the ''UDOT Application Alignment for the Northern Corridor'' alternative described in the 2020 Final EIS. In this case, the FWS would affirm Washington County's ITP. The changed circumstance related to the construction of the Northern Corridor across the Reserve described in the HCP would remain triggered, and Zone 6 would remain in the Reserve.
- *T-Bone Mesa Alignment alternative:* the BLM would modify UDOT's ROW grant across public lands in the NCA. This alignment would connect Green Springs Drive on the east to Red Hills Parkway on the west just north of the Pioneer Hills trailhead parking area. Under this alternative, the Northern Corridor would skirt the southern edge of T-Bone Mesa. The Northern Corridor would be approximately 4.2 miles long, 2.2 miles of which would be across BLM-administered lands. In this case, the FWS would affirm Washington County's ITP. The changed circumstance related to the construction of the Northern Corridor across the Reserve described in the HCP would remain triggered, and Zone 6 would remain in the Reserve.
- *Southern Alignment alternative:* the BLM would modify UDOT's ROW grant across public lands in the NCA. This alignment would skirt the southern border of the NCA, connecting Green Springs Drive on the east to Red Hills Parkway on the west just south of, and slightly encroaching onto, the Pioneer Hills trailhead parking area. The Northern Corridor would be approximately 5.5 miles long, approximately 1.5 miles of which would be across BLM-administered lands. In this case, the FWS would affirm Washington County's ITP. The changed circumstance related to the construction of the Northern Corridor across the Reserve described in the HCP would remain triggered, and Zone 6 would remain in the Reserve.
- *Red Hills Parkway Expressway alternative:* This alternative would convert Red Hills Parkway into a grade-separated expressway between I–15 and Bluff Street. Under this alternative, UDOT would no longer hold the ROW grant for the Northern Corridor across the NCA. The BLM may need to grant necessary ROW amendments to the City of St. George's existing FLPMA Title V ROW for the Red Hills Parkway if the planned improvements exceed the boundaries of the existing ROW. Under this alternative, the FWS would amend Washington County's ITP because it could no longer assume the Northern Corridor changed circumstance is occurring.
- *St. George Boulevard/100 South One-Way Couplet alternative:* Under this alternative, UDOT would no longer hold the ROW grant for the Northern Corridor across the NCA. This alternative would include modifications to St. George Boulevard and 100 South to convert the two roadways into a one-way couplet system between I–15 and Bluff Street, wherein St. George Boulevard would only accommodate westbound traffic and 100 South would only accommodate eastbound traffic. While this alternative meets the purpose and need of the project, it would have to be implemented by the City of St. George because it does not cross any BLM-administered lands. Under this alternative, the FWS would amend Washington County's ITP because it could no longer assume the Northern Corridor changed circumstance is occurring.
- *Terminate UDOT's ROW alternative:* Under this alternative, UDOT would no longer hold the ROW grant for the Northern Corridor across the NCA. This alternative would have a similar analysis of effects as, and represents an equivalency with, the ''no action'' alternative in the 2020 Final EIS. Under this alternative, the FWS would amend Washington County's ITP because it could no longer assume the Northern Corridor changed circumstance is occurring.

Under the Red Hills Parkway Expressway, St. George Boulevard/100 South One-Way Couplet, and Terminate UDOT's ROW alternatives, the 6,812-acre mitigation area in the southwest area of St. George, known as Reserve Zone 6, would be removed from the Red Cliffs Desert Reserve. However, the 3,471 acres managed by the BLM within Zone 6 would continue to be managed with the protections put in place under the 2021 St. George Field Office RMP amendments. The remaining 3,341 acres of land, which are either privately owned or managed by the Utah Trust Lands Administration, would no longer be afforded special protections by Washington County and would be subject to development under the amended ITP.

The Draft SEIS does not reconsider any amendments to the BLM's RMPs or to Washington County's amended HCP.

Anticipated Permits and Authorizations

The BLM will decide whether to affirm, affirm with modifications, or terminate UDOT's ROW grant. The FWS will determine whether to amend Washington County's ITP for the Mojave desert tortoise consistent with the BLM's reconsideration of UDOT's ROW grant.

Schedule for the Decision-Making Process

The Final SEIS is anticipated to be released in fall 2024 with Records of Decision in November 2024.

Public Involvement Process

A public scoping period for the Draft SEIS was offered between November 16, 2023, and December 28, 2023, having been extended at the request of Washington County and the State of Utah. The scoping period included a public open house held in St. George, Utah on December 6, 2023, with over 200 attendees. A total of 8,993 comment submissions were received, of which 8,145 were form letters, 793 were unique comments, and 55 did not include a comment or were comments not relevant to scoping for the Draft SEIS. The BLM and FWS considered all comments received during the scoping period in preparation of the Draft SEIS. A scoping report is available for public review on the BLM ePlanning project website (see **ADDRESSES**).

This NOA initiates the Draft SEIS public review process. The BLM and FWS will hold one in-person public meeting during the public comment period. The BLM and FWS will announce the date and time for this meeting at least 15 days prior to the event. Announcements will be made through media releases and posting on the BLM ePlanning project website (see **ADDRESSES**).

Public review of the Draft SEIS allows the public an opportunity to provide substantive comments on the alternatives and analysis in the Draft SEIS. Public comments often identify factual errors, data gaps, relevant methods, or scientific studies. The BLM and FWS will respond to substantive comments and make appropriate revisions in development of the Final SEIS or explain why a comment did not warrant a change. Non-substantive comments may not receive a response from the BLM and FWS.

Lead and Cooperating Agencies

The BLM and FWS are co-lead agencies. Cooperating agencies consist of the State of Utah Public Lands Policy Coordinating Office, State of Utah Department of Environmental Quality, State of Utah Trust Lands Administration, Washington City, Dixie Metropolitan Planning Organization, City of St. George, City of Ivins, Santa Clara City, City of Hurricane, the Paiute Indian Tribe of Utah, and the Shivwits Band of the Paiute Indian Tribe of Utah.

Additional Information

There may be changes to the Draft SEIS based on information received during the public comment period and the gathering of additional data and analyses. The BLM and FWS invite and encourage detailed comments on all alternatives, alignments, actions, and analyses provided in the Draft SEIS.

The BLM and FWS will continue to consult with Indian Tribal Nations on a government-to-government basis in accordance with Executive Order 13175, BLM Manual Section 1780, and other Departmental policies. Tribal concerns, including impacts on Indian trust assets and potential impacts to cultural resources, will be given due consideration.

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can include in your comment a request to withhold your personal identifying information from public review, the agencies cannot guarantee that they will be able to do so.

INTERNATIONAL TRADE COMMISSION

[USITC SE–24–019]

Sunshine Act Meetings

AGENCY HOLDING THE MEETING: United States International Trade Commission.

TIME AND DATE: May 17, 2024 at 9:30 a.m.

PLACE: Room 101, 500 E Street SW, Washington, DC 20436, Telephone: (202) 205–2000.

STATUS: Open to the public.

MATTERS TO BE CONSIDERED:

1. A*gendas for future meetings:* none.
2. Minutes.
3. Ratification List.
4. Commission vote on Inv. Nos. Inv. Nos. 701–TA–716–719 and 731–TA–1683–1687 (Preliminary) (Epoxy Resins from China, India, South Korea, Taiwan, and Thailand). The Commission currently is scheduled to complete and file its determinations on May 20, 2024; views of the Commission currently are scheduled to be completed and filed on May 28, 2024.
5. Commission vote on Inv. Nos. 701–TA–710–711 and 731–TA–1673–1674 (Preliminary)(2,4-Dichlorophenoxyacetic Acid (2,4–D) from China and India). The Commission currently is scheduled to complete and file its determinations on May 20, 2024; views of the Commission currently are scheduled to be completed and filed on May 28, 2024.
6. *Outstanding action jackets:* none.

CONTACT PERSON FOR MORE INFORMATION: Sharon Bellamy, Supervisory Hearings and Information Officer, 202–205–2000.

The Commission is holding the meeting under the Government in the Sunshine Act, 5 U.S.C. 552(b). In accordance with Commission policy, subject matter listed above, not disposed of at the scheduled meeting, may be carried over to the agenda of the following meeting.

By order of the Commission.

Issued: May 8, 2024.

Sharon Bellamy,

Supervisory Hearings and Information Officer.

BILLING CODE 7020–02–P

DEPARTMENT OF LABOR

Employment and Training Administration

Agency Information Collection Activities; Comment Request; National Agricultural Workers Survey

ACTION: Notice.

SUMMARY: The Department of Labor's (DOL's) Employment and Training Administration (ETA) is soliciting comments concerning a proposed revision for the authority to conduct the information collection request (ICR) titled, ''National Agricultural Workers Survey.'' This comment request is part of continuing Departmental efforts to reduce paperwork and respondent burden in accordance with the Paperwork Reduction Act of 1995 (PRA).

DATES: Consideration will be given to all written comments received by July 9, 2024.

ADDRESSES: A copy of this ICR with applicable supporting documentation, including a description of the likely respondents, proposed frequency of response, and estimated total burden, may be obtained free by contacting Mr. Daniel Carroll by telephone at 202–693–2795 (this is not a toll-free number) or by email at *carroll.daniel.j@dol.gov.* For persons with a hearing or speech disability who need assistance to use the telephone system, please dial 711 to access telecommunications relay services.

Submit written comments about, or requests for a copy of, this ICR by mail or courier to the U.S. Department of Labor, Employment and Training Administration, Office of Policy Development and Research, Room N–5641, 200 Constitution Ave. NW, Washington, DC 20210; by email: *carroll.daniel.j@dol.gov;* or by Fax 202–693–2766.

FOR FURTHER INFORMATION CONTACT: Mr. Wayne Gordon by telephone at 202–693–3179 (this is not a toll-free number) or by email at *gordon.wayne@dol.gov.*

Authority: 44 U.S.C. 3506(c)(2)(A).

SUPPLEMENTARY INFORMATION: DOL, as part of continuing efforts to reduce paperwork and respondent burden, conducts a pre-clearance consultation program to provide the general public and Federal agencies an opportunity to comment on proposed and/or continuing collections of information before submitting them to the Office of Management and Budget (OMB) for final approval. This program helps to ensure requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements can be properly assessed.

The National Agricultural Workers Survey (NAWS) is an employment-based, annual survey of the demographic, employment, and health characteristics of hired crop workers, including those who employers hire indirectly through labor contractors. The survey began in 1988. It is distinct from other farm labor information sources, such as the United States Department of Agriculture's Farm Labor Survey, in that it collects information directly from crop workers. Each year the NAWS contractor interviews between 1,500 and 3,500 crop workers. The contractor interviews crop workers

three times per year to account for the seasonality of agricultural employment. ETA uses NAWS data to estimate each state's share of crop workers who are eligible for employment and training services through ETA's National Farmworker Jobs Program. Other Federal agencies similarly use the survey's data to estimate the number and characteristics of crop workers and their dependents who qualify to participate in or receive services from various migrant and seasonal farmworker programs. The United States Department of Agriculture periodically uses NAWS data, along with other data, to estimate changes in agricultural productivity.

ETA is seeking approval to modify a currently approved collection. This request is to include H–2A crop workers in the survey population, combine separate questions on race and ethnicity into one question, in conformance with the new OMB Standard for race and ethnicity, and add new questions to the survey on foodborne illness, heat illness, and precision agriculture.

In reference to the job site, questions on foodborne illness will gather information on:

- Food safety training and practices
- Use and type of food storage vessels
- Provision of toilets and hand-cleaning facilities
- Occurrence of discharge in the field/open air

Questions on heat-related illness will gather information on:

- The prevalence and incidence of heat stress
- The prevalence of reporting severe symptoms to the employer
- Heat stress interventions at the job site
- Employer provision of heat-related safety training
- Employer provision of an acclimatization period during extremely high temperatures

A question on precision agriculture will ask about the types of technology that crop workers use or interact with at the work site while performing agricultural tasks (*e.g.,* GPS-enabled devices, internet-enabled devices, task automation).

The Wagner-Peyser Act, as amended (29 U.S.C. 49f(d) and 49l–2(a)) authorizes this information collection.

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by OMB under the PRA and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid Control Number. See 5 CFR 1320.5(a) and 1320.6.

Interested parties are encouraged to provide comments to the contact shown in the **ADDRESSES** section. To receive consideration, you must provide written comments, which DOL will summarize and include in the request for OMB approval of the final ICR. To help ensure appropriate consideration, comments should mention OMB Control No. 1205–0453.

Submitted comments will also be a matter of public record for this ICR and posted on the internet, without redaction. DOL encourages commenters not to include personally identifiable information, confidential business data, or other sensitive statements/information in any comments.

DOL is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, (*e.g.,* permitting electronic submission of responses).

Agency: DOL–ETA.

Type of Review: Revision.

Title of Collection: National Agricultural Workers Survey.

Form: Primary Questionnaire.

OMB Control Number: 1205–0453.

Affected Public: Individuals and Households, Private Sector.

Estimated Number of Respondents: 3,594.

Frequency: Annual.

Total Estimated Annual Responses: 3,594.

Estimated Average Time per Response: 41 minutes.

Estimated Total Annual Burden Hours: 1,289 hours.

Total Estimated Annual Other Cost Burden: $0.

José Javier Rodríguez,

Assistant Secretary for Employment and Training, Labor.

BILLING CODE 4510–FM–P

DEPARTMENT OF LABOR

Labor Advisory Committee for Trade Negotiations and Trade Policy

AGENCY: The Bureau of International Labor Affairs, Department of Labor.

ACTION: Notice; intent to renew charter.

SUMMARY: Pursuant to the Federal Advisory Committee Act (FACA), as amended, the Secretary of Labor and the United States Trade Representative have determined that renewal of the Labor Advisory Committee for Trade Negotiations and Trade Policy is necessary and in the public interest.

DATES: The Department will renew the Labor Advisory Committee for Trade Negotiations and Trade Policy charter on or before May 20, 2024, before the current charter expires.

FOR FURTHER INFORMATION CONTACT: Anne M. Zollner, Designated Federal Officer and Division Chief, Preference Program Enforcement, Office of Trade and Labor Affairs, Bureau of International Labor Affairs, Department of Labor, Frances Perkins Building, Room S–5317, 200 Constitution Ave. NW, Washington, DC 20210, telephone (202) 693–4890, *zollner.anne@dol.gov*.

SUPPLEMENTARY INFORMATION: The Committee will be chartered pursuant to section 135(c)(1) and (2) of the Trade Act of 1974, 19 U.S.C. 2155(c) (1) and (2), as amended and Executive Order 11846 of March 27, 1975, 3 CFR 1971–1975 Comp., p. 971 (which delegates certain Presidential responsibilities conferred in section 135 of the Trade Act of 1974 to the United States Trade Representative).

The Labor Advisory Committee for Trade Negotiations and Trade Policy consults with and makes recommendations to the Secretary of Labor and the United States Trade Representative on general policy matters concerning labor and trade negotiations, operations of any trade agreement once entered into, and other matters arising in connection with the administration of the trade policy of the United States.

The current charter expires on May 20, 2024. The renewal of the charter of the Labor Advisory Committee for Trade Negotiations and Trade Policy is necessary and in the public interest, as

the Committee will provide information that cannot be obtained from other sources. The Committee will provide its views to the Secretary of Labor and the Unites States Trade Representative through the Bureau of International Labor Affairs of the U.S. Department of Labor. The Committee is to be comprised of no more than 30 members representing the labor community.

The Committee will meet at irregular intervals at the call of the Secretary of Labor and the United States Trade Representative.

Signed at Washington, DC.

Thea M. Lee,

Deputy Undersecretary, Bureau of International Labor Affairs.

BILLING CODE 4510–28–P

DEPARTMENT OF LABOR

[Agency Docket Number DOL–2023–0003]

Notice of Initial Determination To Remove Shrimp From Thailand and Garments From Vietnam From the List of Products Requiring Federal Contractor Certification as to Forced or Indentured Child Labor Pursuant to Executive Order 13126

AGENCY: The Bureau of International Labor Affairs, Department of Labor.

ACTION: Notice of initial determination; request for comments.

SUMMARY: This initial determination proposes to revise the list required by Executive Order No. 13126 (''Prohibition of Acquisition of Products Produced by Forced or Indentured Child Labor'') (E.O. List) in accordance with the Department of Labor's (DOL) ''Procedural Guidelines for the Maintenance of the List of Products Requiring Federal Contractor Certification as to Forced or Indentured Child Labor'' (the Procedural Guidelines). The E.O. List identifies a list of products, by their country of origin, that DOL, in consultation and cooperation with the Department of State and the Department of Homeland Security (hereinafter ''the three Departments''), has a reasonable basis to believe might have been mined, produced, or manufactured by forced or indentured child labor. Federal contracting officers must check the E.O. List when issuing a solicitation for supplies expected to exceed the micro-purchase threshold and take certain steps if the solicited product appears on the list. This notice proposes to remove shrimp from Thailand and garments from Vietnam because the three Departments have preliminarily determined that the use of forced or indentured child labor in the production of these products has been significantly reduced. The Department of Labor invites public comment on this initial determination. The three Departments will consider all public comments prior to publishing a final determination revising the E.O. List.

DATES: Comments should be submitted to the Office of Child Labor, Forced Labor, and Human Trafficking (OCFT) via one of the methods described below and must be received by no later than 5 p.m. ET, June 10, 2024, to guarantee consideration.

ADDRESSES: Information submitted to the Department of Labor should be submitted directly to OCFT, Bureau of International Labor Affairs, U.S. Department of Labor. Comments, identified as ''Docket No. DOL–2004–0003,'' may be submitted by any of the following methods:

Federal eRulemaking Portal: The portal includes instructions for submitting comments. Parties submitting responses electronically are encouraged not to submit paper copies.

Facsimile (fax): OCFT at 202–693–4830.

Mail, Express Delivery, Hand Delivery, and Messenger Service (1 copy): Ryan Olden at U.S. Department of Labor, ILAB/Office of Child Labor, Forced Labor, and Human Trafficking, 200 Constitution Ave. NW, Room S–5317, Washington, DC 20210.

Email: Email submissions should be addressed to Ryan Olden. Email: *eo13126@dol.gov.*

Digital Accessability: The United States Department of Labor (DOL) is required to ensure that all its digital information is accessible to people with disabilities, including those who use assistive technology such as screen readers. Therefore, DOL requests that your submissions through the portal be as accessible as possible. If you are able to conform to the current Web Content Accessibility Guidelines (WCAG), then please do so. Otherwise, DOL requests that submissions be made in a Microsoft Word document, using the built-in Styles for document formatting, including descriptive Alt Text on embedded images and graphics, and using the built-in Word Accessibility Checker for additional accessibility improvements. Although permissible, please avoid submitting scanned images, screen shots, or PDFs whenever possible.

FOR FURTHER INFORMATION CONTACT: Ryan Olden. Phone: (202) 693–4867. *eo13126@dol.gov.*

SUPPLEMENTARY INFORMATION: DOL is requesting public comment on the revisions to the E.O. List proposed below, as well as any other issue related to the fair and effective implementation of E.O. 13126. This notice is a general solicitation of comments from the public. All submitted comments will be made a part of the public record and will be available for inspection on *http://www.regulations.gov.*

In conducting research for this initial determination, the three Departments considered a wide variety of materials based on their own research, and materials from other U.S. Government agencies, foreign governments, international organizations, non-governmental organizations (NGOs), U.S. Government-funded technical assistance and field research projects, academic and other independent research, media, and other sources. The Department of State and U.S. embassies and consulates abroad also provided important information by gathering data from contacts, conducting site visits, and reviewing local media sources. In developing the proposed revision to the E.O. List, the three Departments' review focused on information concerning the use of forced or indentured child labor that was available from the above sources.

As outlined in the Procedural Guidelines, several factors were weighed in determining whether a product should be placed, or remain on, the revised E.O. List: the nature of the information describing the use of forced or indentured child labor; the source of the information; the date of the information; the extent of corroboration of the information by appropriate sources; whether the information involved more than an isolated incident; and whether recent and credible efforts are being made to address forced or indentured child labor in a particular country and industry (66 FR 5351).

This notice constitutes an initial determination to revise the E.O. List. Based on available information from various sources, the three Departments have preliminarily concluded that there is no longer a reasonable basis to believe that there is use of forced or indentured child labor in the production of the following products, identified by their countries of origin:

Product: Shrimp
Country: Thailand

DOL has received recent, credible, and corroborated information from various sources on the use of forced or indentured child labor in shrimp production in Thailand. This information indicates that while

children previously worked under forced labor conditions in the production of shrimp, the use of forced child labor appears to have been significantly reduced. Therefore, the three Departments have preliminarily concluded that there is no longer a reasonable basis to believe that shrimp from Thailand is produced by forced or indentured child labor, except in a few isolated instances, and therefore it should not continue to be on the E.O. List.

DOL placed shrimp from Thailand on the E.O. List in 2009, and to date, the listing cites 11 sources dating from 2006 to 2015. Sources indicated that children in Thailand—primarily migrant children—were peeling shrimp in small, unregulated ''shrimp sheds.'' In more than isolated incidents, these migrant children were engaged in forced child labor. Following international attention and action on labor exploitation in Thailand's seafood industry, the Royal Thai Government (RTG) and other stakeholders made a series of concerted significant efforts to address child labor and forced child labor throughout the seafood industry, including in the shrimp peeling sector.

The RTG acceded to the ILO's Maritime Labor Convention and the ILO's Work in Fishing Convention and passed the Ministerial Regulation Prohibiting Children in Seafood Processing. The RTG also enacted the Royal Ordinance on Fisheries, which enhanced traceability systems of aquatic resources in Thailand, inclusive of shrimp processing, and strengthened migrant worker recruitment regulations through revisions in the Labor Protection Act of 1998 and the Royal Ordinance on Foreign Worker Management (No. 2). Additionally, the RTG collaborated with international nongovernmental organizations to implement projects focused on eliminating forced child labor and child labor in the seafood processing sector, including the *Combatting Unacceptable Forms of Work in the Thai Fishing and Seafood Industry* program funded by the ILO and the European Union; the *FAIR Fish* program funded by DOL; and the *Ship to Shore* project funded by the EU. Private sector entities also acted against forced child labor by formalizing their supply chains, eliminating nearly all unregulated ''shrimp sheds'' in which child labor and forced child labor were previously documented. In 2023, Thai government officials, an industry trade group, workers' associations, international organizations, and nongovernmental organizations reported that incidents of forced child labor in shrimp processing had been reduced to no more than isolated cases. DOL's review of available information corroborated that forced child labor in the production of shrimp had been significantly reduced to isolated incidents.

Product: Garments
Country: Vietnam

DOL has also received recent, credible, and corroborated information from various sources on the use of forced or indentured child labor in garment production in Vietnam. This information indicates that while children previously worked under forced labor conditions in the production of garments, the use of forced child labor appears to have been significantly reduced. Therefore, the three Departments have preliminarily concluded that there is no longer a reasonable basis to believe that garments from Vietnam are produced by forced or indentured child labor, except in a few isolated instances, and therefore it should not continue to be on the E.O. List.

DOL placed garments from Vietnam on the E.O. List in 2012, and to date, the listing cites 18 sources dating from 2008 to 2015. Sources indicated that children in Vietnam—primarily children from rural areas—were being trafficked from their homes to Ho Chi Minh City, where they were coerced to work, and often live, in garment factories. Reports indicated that children working in the sector were underpaid, forced to work long hours, and in many cases were found living in the workshops. Between 2010 and 2014 there were between 20 and 64 children trafficked for these purposes each year, after which the number of children dropped rapidly. Reporting that exposed this trafficking pipeline was led by data from Blue Dragon Children's Foundation (BDCF)—a local NGO which functions as a key partner to the Vietnamese police. According to the U.S. Embassy in Hanoi and its contacts, all forced child labor cases in Vietnamese garment factories go through BDCF for intervention, removal of children from the trafficking situations, and victim services.

Research indicates that following reports of forced child labor in the sector, the police worked quickly and effectively to identify both victims and perpetrators of this trafficking pipeline. The police shut down all responsible criminal enterprises. According to a 2021 BDCF report, BDCF rescue operations for victims of trafficking have not uncovered a child in sweatshop labor since 2017.

Since the addition of garments to the E.O. List in 2012, Vietnam has made efforts in its legal framework, partnerships, and enforcement efforts to eradicate and prevent forced child labor in this sector. Vietnam enacted a Labor Code in 2012 prohibiting unlawful, underage, or forced labor of children, and included regulations on the employment of minors including working hours, working times of day, and types of work allowed for minors. Vietnam specifically prohibited minors from operating fabric and yarn-starching machines, as well as dyeing and dry-cleaning fabric and yarn, criminalized child trafficking, and affirmed the right of children to be protected from labor exploitation. Additionally, Vietnam has conducted two national programs on the reduction of child labor and has conducted a national survey on child labor. The government continues to work with Blue Dragon, as well as other INGOs and NGOs like the ILO, Fair Wear Foundation, and Better Work. Vietnam actively collaborates with stakeholders on programs like ENHANCE, which aims to build governmental capacity to address and prevent child labor; and Fear Wear's programming, which brings together key stakeholders to enhance the rights of garment workers. Reports also indicate that grievance mechanisms exist and are accessible for garment workers.

DOL invites public comment on whether these products (and/or other products, regardless of whether they are mentioned in this notice) should be included in or removed from the revised E.O. List. To the extent possible, comments provided should address the criteria for inclusion of a product on the E.O. List contained in the Procedural Guidelines discussed above.

Following receipt and consideration of comments, the three Departments will issue a final determination in the **Federal Register**. The three Departments intend to continue to revise the E.O. List periodically to add or remove products as warranted by the receipt of new and credible information.

Background

E.O. 13126 was signed on June 12, 1999, and published in the **Federal Register** on June 16, 1999 (64 FR 32383). E.O. 13126 declared that it was ''the policy of the United States Government . . . that executive agencies shall take appropriate actions to enforce the laws prohibiting the manufacture or importation of goods, wares, articles, and merchandise mined, produced or manufactured wholly or in part by forced or indentured child labor.'' The E.O. defines ''forced or indentured child labor'' as ''all work or service (1) exacted from any person under the age

of 18 under the menace of any penalty for its nonperformance and for which the worker does not offer himself voluntarily; or (2) performed by any person under the age of 18 pursuant to a contract the enforcement of which can be accomplished by process or penalties.''

Pursuant to E.O. 13126, and following public notice and comment, the Department of Labor published in the January 18, 2001 **Federal Register** the first E.O. List of products, along with their respective countries of origin, that DOL, in consultation and cooperation with the Department of State and the Department of the Treasury (whose relevant responsibilities are now within the Department of Homeland Security), had a reasonable basis to believe might have been mined, produced or manufactured with forced or indentured child labor (66 FR 5353). This list included 11 goods produced in 12 countries. DOL also published the Procedural Guidelines on January 18, 2001, which provide procedures for the maintenance, review, and, as appropriate, revision of the E.O. List (66 FR 5351).

The Procedural Guidelines provide that the E.O. List may be revised through consideration of submissions by individuals and on the three Departments' own initiative. When proposing a revision to the E.O. List, DOL must publish in the **Federal Register** a notice of initial determination, which includes any proposed alteration to the E.O. List. The three Departments will consider all public comments prior to the publication of a final determination of a revised E.O. List.

On January 18, 2001, pursuant to Section 3 of E.O. 13126, the Federal Acquisition Regulatory Council published a final rule to implement specific provisions of E.O. 13126 that require, among other things, that Federal contractors who supply products that appear on the list certify to the contracting officer that the contractor, or, in the case of an incorporated contractor, a responsible official of the contractor, has made a good faith effort to determine whether forced or indentured child labor was used to mine, produce, or manufacture any product furnished under the contract and that, on the basis of those efforts, the contractor is unaware of any such use of forced or indentured child labor (48 CFR subpart 22.15).

On September 11, 2009, the Department of Labor published an initial determination in the **Federal Register** proposing to revise the E.O. List to include 29 products from 21 countries. The Notice requested public comments for a period of 90 days. Public comments were received and reviewed by all relevant agencies and a final determination was issued on July 20, 2010. Following the same process, the E.O. List was revised again in 2011, 2012, 2013, 2014, 2019, and 2022. The most recent E.O. List, finalized on July 13, 2022, includes 34 products from 26 countries.

The current E.O. List and the Procedural Guidelines can be accessed at *https://www.dol.gov/agencies/ilab/reports/child-labor/list-of-products* or can be obtained from: OCFT, Bureau of International Labor Affairs, Room S–5313, U.S. Department of Labor, 200 Constitution Avenue NW, Washington, DC 20210; telephone: (202) 693–4843; fax (202) 693–4830.

(Authority: E.O. 13126, 64 FR 32383)

Signed at Washington, DC.

Thea Mei Lee,

Deputy Undersecretary for International Affairs.

- *Meeting ID:* 813 8891 2215
- *Passcode:* 51724

Once connected to Zoom, please immediately mute your computer or telephone. Members of the public are asked to keep their computers or telephones muted to eliminate background noise. To avoid disrupting the meetings, please refrain from placing the call on hold if doing so will trigger recorded music or other sound.

From time to time, the Board Chair may solicit comments from the public. To participate in the meeting during public comment, use the 'raise your hand' or 'chat' functions in Zoom and wait to be recognized by the Chair before stating your questions and/or comments.

STATUS: Open, except that, upon a vote of the Board of Directors, a portion of the meeting may be closed to the public to receive a briefing from LSC Management and to consider and act on as a list of prospective Leaders Council and Emerging Leaders Council members.

MATTERS TO BE CONSIDERED: The LSC Board of Directors' Transmittal Letter to Accompany the Inspector General's Semiannual Report to Congress, for the Period of Oct. 1, 2023 through March 31, 2024.

CONTACT PERSON FOR MORE INFORMATION: Jessica Wechter, Special Assistant to the President, at (202) 295–1621. Questions may also be sent by electronic mail to *wechterj@lsc.gov.*

Non-Confidential Meeting Materials: Non-confidential meeting materials will be made available in electronic format at least 24 hours in advance of the meeting on the LSC website, at *https://www.lsc.gov/about-lsc/board-meeting-materials.*

(Authority: 5 U.S.C. 552b.)

Dated: May 8, 2024.

Stefanie Davis,

Deputy General Counsel, Legal Services Corporation.

BILLING CODE 7050–01–P

LIBRARY OF CONGRESS

[Docket No. 2024–1]

Announcement Reauthorizing Copyright Public Modernization Committee

AGENCY: Library of Congress.

ACTION: Notice of reauthorizing IT modernization public stakeholder committee.

SUMMARY: The Library of Congress is reauthorizing a public committee to provide a forum for the technology-related aspects of the U.S. Copyright Office's modernization initiative. Given the success of the previous Copyright Public Modernization Committee (CPMC) and the value and insights provided by CPMC members, the Library wants to renew the committee for an additional term. Therefore, the Library will accept applications from qualified members of the public to serve on this committee. Membership will be on a volunteer basis, with the expectation of participation in at least two virtual or hybrid open forums a year at the member's own expense.

DATES: Applications must be submitted on or before June 18, 2024.

ADDRESSES: Applications may be submitted electronically to the CPMC's dedicated email inbox at *cpmc@loc.gov*.

FOR FURTHER INFORMATION CONTACT: Neil D. Bernstein, Program Analyst, Office of the Chief Information Officer, by telephone at 202–707–9319 or by email at *cpmc@loc.gov*.

SUPPLEMENTARY INFORMATION:

I. Background

The Library of Congress will reauthorize and form a public committee on Copyright Office information technology (IT) modernization. The committee will be managed by the Office of the Chief Information Officer (OCIO), with support from the U.S. Copyright Office and from other Library offices as necessary. The goal of the committee will be to expand and enhance communication with external stakeholders on IT modernization of Copyright Office systems and to provide an ongoing public forum for sharing information and answering questions related to this initiative. The scope of contributions made by the committee are limited to the specific topics set forth in this notice.

II. Public Stakeholder Committee Subjects of Discussion

Members of the Copyright Public Modernization Committee will provide feedback to the Library on the technology-related aspects of the Copyright Office's modernization initiative, including both Copyright Office IT systems and broader Library IT systems that interface with and/or support Copyright Office operations.

III. Public Stakeholder Committee Application Process

Members of the public who seek to participate in the Copyright Public Modernization Committee should submit a current curriculum vitae and a statement of interest of no more than 1000 words addressing the questions identified below no later than June 18, 2024. Members who served on the previous Committee are eligible to reapply for membership but must submit a new application. Applications can be submitted via email at *cpmc@loc.gov*. If you are unable to access a computer or the internet, please contact the Library using the contact information above for special instructions. Individuals selected for participation will be notified directly by the Library not later than September 6, 2024. In order to accommodate the expected level of interest, the Library expects to assign no more than one representative per organization to the committee.

The public stakeholder committee will have a limited number of seats, and the application and selection process are expected to be competitive. The Library will seek to select a membership that is representative of the broad and diverse Copyright Office stakeholder community. The areas of relevant expertise for membership include skill in communicating on complex technical issues; the ability to work collaboratively; and familiarity with technology relevant to Copyright Office services.

IV. Questions for Statement of Interest

For the Statement of Interest, the applicant need not address every subject identified below, but the Library requests that applicants clearly identify and separately address each numbered subject for which a response is submitted. Answers will be evaluated by the Library to select a committee with members that represent the broadest possible cross-section of Copyright Office stakeholders.

1. An important skill for members of the CPMC is the ability to communicate, whether orally or in writing, on complex technological issues, including describing their impact on the needs or interests of Copyright Office stakeholders. Please identify any relevant experience you have working and communicating on technological issues with these or any other relevant parties:

(a) Individual creators and copyright owners;

(b) Large corporate creators and companies that own or manage copyrights;

(c) Small-to-medium size enterprises that own or manage copyrights;

(d) Creators, copyright owners, or copyright users from the following sectors: photography, motion picture, musical works, sound recordings, graphic arts, publishing, software, and information technology;

(e) users of Copyright Office services, including but not limited to individuals or entities that register their works with the Office, record copyright-related documents with the Office, or benefit from or pay into the licensing systems administered by the Copyright Office;

(f) user interest groups, including researchers, universities, archives, and libraries; and

(g) representatives of the public and public interest groups (including organizations involved in issues related to open government, public government data and APIs, and government use of technology).

2. Another important skill for members of the CPMC is the ability to work collaboratively with others, including diverse stakeholders. Please describe any relevant past experience developing and maintaining relationships with a variety of individuals; communicating effectively about topics involving inter-dependencies, competing priorities, and diverse audiences/user groups; or reaching a consensus among diverse stakeholders with conflicting interests.

3. A key skill that the Library is seeking in members of the CPMC is familiarity with the technology relevant to the Copyright Office and the Office's recent IT initiatives. Please describe any relevant experience in the following sectors: government innovation and/or technology, copyright law and Copyright Office services, rights management, and the development and use of IT systems in library, cultural heritage, museum, creative industry or other settings.

4. Please describe your knowledge of user-centered strategies and design methods, including any experience applying iterative design principles to solving complex problems.

5. If your application is endorsed by other stakeholders or associations, please identify them.

Dated: May 7, 2024.

Carla D. Hayden,

Librarian of Congress.

BILLING CODE 1410–30–P

NATIONAL SCIENCE FOUNDATION

Agency Information Collection Activities: Comment Request; Grantee Reporting Requirements for the Engineering Research Centers

AGENCY: National Science Foundation.

ACTION: Submission for OMB review; comment request.

SUMMARY: The National Science Foundation (NSF) has submitted the following information collection requirement to OMB for review and clearance under the Paperwork Reduction Act of 1995. This is the second notice for public comment; the first was published in the **Federal Register**, and no comments were received. NSF is forwarding the proposed submission to the Office of Management and Budget (OMB) for clearance simultaneously with the publication of this second notice.

DATES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAmain*. Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Suzanne H. Plimpton, Reports Clearance Officer, National Science Foundation, 2415 Eisenhower Avenue, Alexandria, VA 22314, or send email to *splimpto@nsf.gov*. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339, which is accessible 24 hours a day, 7 days a week, 365 days a year (including federal holidays).

Copies of the submission may be obtained by calling 703–292–7556.

SUPPLEMENTARY INFORMATION: NSF may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

Title of Collection: Grantee Reporting Requirements for the Engineering Research Centers.

OMB Number: 3145–0220.

Type of Request: Extension without revision of an information collection.

Type of Request: Intent to seek approval to renew an information collection.

Abstract: The Engineering Research Centers (ERC) program supports an integrated, interdisciplinary research environment to advance fundamental engineering knowledge and engineered systems; educate a globally competitive and diverse engineering workforce from K–12 on; and join academe and industry in partnership to achieve these goals. ERCs conduct world-class research through partnerships of academic institutions, national laboratories, industrial organizations, and/or other public/private entities. New knowledge thus created is meaningfully linked to society.

ERCs conduct world-class research with an engineered systems perspective that integrates materials, devices, processes, components, control algorithms and/or other enabling elements to perform a well-defined function. These systems provide a unique academic research and education experience that involves integrative complexity and technological realization. The complexity of the systems perspective includes the factors associated with its use in industry, society/environment, or the human body.

ERCs enable and foster excellent education, integrate research and education, speed knowledge/technology transfer through partnerships between academe and industry, and prepare a more competitive future workforce. ERCs capitalize on diversity through participation in center activities and demonstrate leadership in the involvement of groups underrepresented in science and engineering.

Centers are required to submit annual reports on progress and plans, which will be used as a basis for performance review and determining the level of continued funding. To support this review and the management of a Center, ERCs also are required to submit management and performance indicators annually to NSF via a data collection website that is managed by a technical assistance contractor. These indicators are both quantitative and descriptive and may include, for example, the characteristics of center personnel and students; sources of cash and in-kind support; expenditures by operational component; characteristics of industrial and/or other sector participation; research activities; education activities; knowledge transfer activities; patents, licenses; publications; degrees granted to students involved in Center activities; descriptions of significant advances and other outcomes of the ERC effort. Such reporting requirements will be included in the cooperative agreement which is binding between the academic institution and the NSF.

Each Center's annual report will address the following categories of activities: (1) vision and impact, (2) strategic plan, (3) research program, (4) innovation ecosystem and industrial collaboration, (5) education, (6) infrastructure (leadership, management, facilities, diversity) and (7) budget issues.

For each of the categories the report will describe overall objectives for the year, progress toward center goals, problems the Center has encountered in making progress towards goals and how they were overcome, plans for the future and anticipated research and other barriers to overcome in the following year, and specific outputs and outcomes.

Use of the Information: The data collected will be used for NSF internal reports, historical data, performance review by peer site visit teams, program level studies and evaluations, and for securing future funding for continued ERC program maintenance and growth.

Estimate of Burden: 150 hours per center for 17 centers for a total of 2550 hours.

Respondents: Academic institutions.

Estimated Number of Responses per Report: One from each of the 17 ERCs.

Dated: May 7, 2024.

Suzanne H. Plimpton,

Reports Clearance Officer, National Science Foundation.

[FR Doc. 2024–10268 Filed 5–9–24; 8:45 am]

BILLING CODE 7555–01–P

NUCLEAR REGULATORY COMMISSION

716th Meeting of the Advisory Committee on Reactor Safeguards (ACRS)

In accordance with the purposes of sections 29 and 182b of the Atomic Energy Act (42 U.S.C. 2039, 2232(b)), the Advisory Committee on Reactor Safeguards (ACRS) will hold meetings on June 5–7, 2024. The Committee will be conducting meetings that will include some Members being physically present at the NRC while other Members

participate remotely. Interested members of the public are encouraged to participate remotely in any open sessions via MS Teams or via phone at 301–576–2978, passcode 893169154#. A more detailed agenda including the MSTeams link may be found at the ACRS public website at *https://www.nrc.gov/reading-rm/doc-collections/acrs/agenda/index.html.* If you would like the MSTeams link forwarded to you, please contact the Designated Federal Officer as follows: *Quynh.Nguyen@nrc.gov,* or *Lawrence.Burkhart@nrc.gov*

Wednesday, June 5, 2024

8:30 a.m.–8:35 a.m.: Opening Remarks by the ACRS Chair (Open)—The ACRS Chair will make opening remarks regarding the conduct of the meeting.

8:35 a.m.–11:30 a.m.: Terrapower Natrium Topical Reports on Principal Design Criteria and Fuel and Control Assembly Qualification Plan/Commission Meeting Preparations (Open/Closed)—The Committee will have presentations and discussion with the licensee representatives and NRC staff regarding the subject topic.

[*Note:* Pursuant to 5 U.S.C. 552b(c)(4), a portion of this session may be closed in order to discuss and protect information designated as proprietary.]

11:30 a.m.–2:00 p.m.: Committee Deliberation on Terrapower Natrium Topical Reports on Principal Design Criteria and Fuel and Control Assembly Qualification Plan/Commission Meeting Preparations (Open/Closed)—The Committee will deliberate with the NRC staff regarding the subject topic.

[*Note:* Pursuant to 5 U.S.C. 552b(c)(4), a portion of this session may be closed in order to discuss and protect information designated as proprietary.]

2:00 p.m.–6:00 p.m.: Preparation of Reports/Commission Meeting Preparations (Open/Closed)—The Committee will proceed to preparation of reports and preparation of Commission Meeting.

[*Note:* Pursuant to 5 U.S.C. 552b(c)(4), a portion of this session may be closed in order to discuss and protect information designated as proprietary.]

Thursday, June 6, 2024

8:30 a.m.–6:00 p.m.: Planning and Procedures Session/Future ACRS Activities/Reconciliation of ACRS Comments and Recommendations/Preparation of Reports/Commission Meeting Preparations (Open/Closed)—The Committee will hear discussion of the recommendations of the Planning and Procedures Subcommittee regarding items proposed for consideration by the Full Committee during future ACRS meetings, and/or proceed to preparation of reports and preparation of Commission Meeting as determined by the Chair.

[*Note:* Pursuant to 5 U.S.C. 552b(c)(2), a portion of this meeting may be closed to discuss organizational and personnel matters that relate solely to internal personnel rules and practices of the ACRS.]

[*Note*: Pursuant to 5 U.S.C. 552b(c)(4), a portion of this session may be closed in order to discuss and protect information designated as proprietary.]

Friday, June 7, 2024

1:00 p.m.–6:00 p.m.: Committee Deliberation/Preparation of Reports (Open/Closed)—The Committee will deliberate with the NRC staff regarding the subject topic and proceed to preparation of reports.

[*Note:* Pursuant to 5 U.S.C. 552b(c)(4), a portion of this session may be closed in order to discuss and protect information designated as proprietary.]

Procedures for the conduct of and participation in ACRS meetings were published in the **Federal Register** on June 13, 2019 (84 FR 27662). In accordance with those procedures, oral or written views may be presented by members of the public, including representatives of the nuclear industry. Persons desiring to make oral statements should notify Quynh Nguyen, Cognizant ACRS Staff and the DFO (Telephone: 301–415–5844, Email: *Quynh.Nguyen@nrc.gov*), 5 days before the meeting, if possible, so that appropriate arrangements can be made to allow necessary time during the meeting for such statements. In view of the possibility that the schedule for ACRS meetings may be adjusted by the Chair as necessary to facilitate the conduct of the meeting, persons planning to attend should check with the cognizant ACRS staff if such rescheduling would result in major inconvenience.

An electronic copy of each presentation should be emailed to the cognizant ACRS staff at least one day before the meeting.

In accordance with subsection 10(d) of Public Law 92–463 and 5 U.S.C. 552b(c), certain portions of this meeting may be closed, as specifically noted above. Use of still, motion picture, and television cameras during the meeting may be limited to selected portions of the meeting as determined by the Chair. Electronic recordings will be permitted only during the open portions of the meeting.

ACRS meeting agendas, meeting transcripts, and letter reports are available through the NRC Public Document Room (PDR) at *pdr.resource@nrc.gov,* or by calling the PDR at 1–800–397–4209, or from the Publicly Available Records System component of NRC's Agencywide Documents Access and Management System, which is accessible from the NRC website at *https://www.nrc.gov/reading-rm/adams.html* or *https://www.nrc.gov/reading-rm/doc-collections/#ACRS/.*

Dated: May 6, 2024.

Russell E. Chazell,

Federal Advisory Committee Management Officer, Office of the Secretary.

POSTAL REGULATORY COMMISSION

[Docket Nos. MC2024–272 and CP2024–278; MC2024–273 and CP2024–279; MC2024–274 and CP2024–280; MC2024–275 and CP2024–281; MC2024–276 and CP2024–282]

New Postal Products

AGENCY: Postal Regulatory Commission.

ACTION: Notice.

SUMMARY: The Commission is noticing a recent Postal Service filing for the Commission's consideration concerning a negotiated service agreement. This notice informs the public of the filing, invites public comment, and takes other administrative steps.

DATES: *Comments are due:* May 14, 2024.

ADDRESSES: Submit comments electronically via the Commission's Filing Online system at *http://www.prc.gov.* Those who cannot submit comments electronically should contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section by telephone for advice on filing alternatives.

FOR FURTHER INFORMATION CONTACT: David A. Trissell, General Counsel, at 202–789–6820.

SUPPLEMENTARY INFORMATION:

Table of Contents

I. Introduction

The Commission gives notice that the Postal Service filed request(s) for the Commission to consider matters related to negotiated service agreement(s). The request(s) may propose the addition or removal of a negotiated service agreement from the Market Dominant or the Competitive product list, or the modification of an existing product currently appearing on the Market Dominant or the Competitive product list.

Section II identifies the docket number(s) associated with each Postal Service request, the title of each Postal Service request, the request's acceptance date, and the authority cited by the Postal Service for each request. For each request, the Commission appoints an officer of the Commission to represent the interests of the general public in the proceeding, pursuant to 39 U.S.C. 505 (Public Representative). Section II also establishes comment deadline(s) pertaining to each request.

The public portions of the Postal Service's request(s) can be accessed via the Commission's website (*http://www.prc.gov*). Non-public portions of the Postal Service's request(s), if any, can be accessed through compliance with the requirements of 39 CFR 3011.301.[1]

The Commission invites comments on whether the Postal Service's request(s) in the captioned docket(s) are consistent with the policies of title 39. For request(s) that the Postal Service states concern Market Dominant product(s), applicable statutory and regulatory requirements include 39 U.S.C. 3622, 39 U.S.C. 3642, 39 CFR part 3030, and 39 CFR part 3040, subpart B. For request(s) that the Postal Service states concern Competitive product(s), applicable statutory and regulatory requirements include 39 U.S.C. 3632, 39 U.S.C. 3633, 39 U.S.C. 3642, 39 CFR part 3035, and 39 CFR part 3040, subpart B. Comment deadline(s) for each request appear in section II.

II. Docketed Proceeding(s)

1. *Docket No(s).:* MC2024–272 and CP2024–278; *Filing Title:* USPS Request to Add Priority Mail & USPS Ground Advantage Contract 245 to Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* May 6, 2024; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3040.130 through 3040.135, and 39 CFR 3035.105; *Public Representative:* Almaroof Agoro; *Comments Due:* May 14, 2024.

2. *Docket No(s).:* MC2024–273 and CP2024–279; *Filing Title:* USPS Request to Add Priority Mail Express, Priority Mail & USPS Ground Advantage Contract 64 to Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* May 6, 2024; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3040.130 through 3040.135, and 39 CFR 3035.105; *Public Representative:* Cristopher C. Mohr; *Comments Due:* May 14, 2024.

3. *Docket No(s).:* MC2024–274 and CP2024–280; *Filing Title:* USPS Request to Add Priority Mail & USPS Ground Advantage Contract 246 to Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* May 6, 2024; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3040.130 through 3040.135, and 39 CFR 3035.105; *Public Representative:* Christopher C. Mohr; *Comments Due:* May 14, 2024.

4. *Docket No(s).:* MC2024–275 and CP2024–281; *Filing Title:* USPS Request to Add Priority Mail & USPS Ground Advantage Contract 247 to Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* May 6, 2024; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3040.130 through 3040.135, and 39 CFR 3035.105; *Public Representative:* Christopher C. Mohr; *Comments Due:* May 14, 2024.

5. *Docket No(s).:* MC2024–276 and CP2024–282; *Filing Title:* USPS Request to Add Priority Mail Express, Priority Mail & USPS Ground Advantage Contract 65 to Competitive Product List and Notice of Filing Materials Under

[1] *See* Docket No. RM2018–3, Order Adopting Final Rules Relating to Non-Public Information, June 27, 2018, Attachment A at 19–22 (Order No. 4679).

Seal; *Filing Acceptance Date:* May 6, 2024; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3040.130 through 3040.135, and 39 CFR 3035.105; *Public Representative:* Kenneth R. Moeller; *Comments Due:* May 14, 2024.

This Notice will be published in the **Federal Register**.

Erica A. Barker,

Secretary.

[FR Doc. 2024–10259 Filed 5–9–24; 8:45 am]

BILLING CODE 7710–FW–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–100065; File No. SR–CboeBZX–2023–087]

Self-Regulatory Organizations; Cboe BZX Exchange, Inc.; Notice of Designation of a Longer Period for Commission Action on Proceedings To Determine Whether To Approve or Disapprove a Proposed Rule Change To List and Trade Shares of the Invesco Galaxy Ethereum ETF Under BZX Rule 14.11(e)(4), Commodity-Based Trust Shares

May 6, 2024.

On October 20, 2023, Cboe BZX Exchange, Inc. (''BZX'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission''), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'') [1] and Rule 19b–4 thereunder,[2] a proposed rule change to list and trade shares of the Invesco Galaxy Ethereum ETF under BZX Rule 14.11(e)(4), Commodity-Based Trust Shares. The proposed rule change was published for comment in the **Federal Register** on November 8, 2023.[3]

On December 13, 2023, pursuant to Section 19(b)(2) of the Act,[4] the Commission designated a longer period within which to approve the proposed rule change, disapprove the proposed rule change, or institute proceedings to determine whether to disapprove the proposed rule change.[5] On February 6, 2024, the Commission instituted proceedings under Section 19(b)(2)(B) of the Act [6] to determine whether to approve or disapprove the proposed rule change.[7]

Section 19(b)(2) of the Act [8] provides that, after initiating proceedings, the Commission shall issue an order approving or disapproving the proposed rule change not later than 180 days after the date of publication of notice of filing of the proposed rule change. The Commission may extend the period for issuing an order approving or disapproving the proposed rule change, however, by not more than 60 days if the Commission determines that a longer period is appropriate and publishes the reasons for such determination. The proposed rule change was published for comment in the **Federal Register** on November 8, 2023.[9] The 180th day after publication of the proposed rule change is May 6, 2024. The Commission is extending the time period for approving or disapproving the proposed rule change for an additional 60 days.

The Commission finds that it is appropriate to designate a longer period within which to issue an order approving or disapproving the proposed rule change so that it has sufficient time to consider the proposed rule change and the issues raised therein. Accordingly, the Commission, pursuant to Section 19(b)(2) of the Act,[10] designates July 5, 2024, as the date by which the

Commission shall either approve or disapprove the proposed rule change (File No. SR–CboeBZX–2023–087).

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[11]

J. Matthew DeLesDernier,

Deputy Secretary.

[SEC File No. 270–151, OMB Control No. 3235–0291]

Submission for OMB Review; Comment Request; Extension: Rules 17Ad–6 and 17Ad–7

Upon Written Request, Copies Available From: Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE, Washington, DC 20549–2736

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1995 (''PRA'') (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission (''Commission'') has submitted to the Office of Management and Budget (''OMB'') a request for approval of extension of the previously approved collection of information provided for in Rule 17Ad–6 (17 CFR 240.17Ad–6) and Rule 17Ad–7 (17 CFR 240.17Ad–7) under the Securities Exchange Act of 1934 (15 U.S.C. 78a *et seq.*) (''Exchange Act'').

Rule 17Ad–6 under the Exchange Act requires every registered transfer agent to make and keep current records about a variety of information, such as: (1) specific operational data regarding the time taken to perform transfer agent activities (to ensure compliance with the minimum performance standards in Rule 17Ad–2 (17 CFR 240.17Ad–2)); (2) written inquiries and requests by shareholders and broker-dealers and response time thereto; (3) resolutions, contracts, or other supporting documents concerning the appointment or termination of the transfer agent; (4) stop orders or notices of adverse claims to the securities; and (5) all canceled registered securities certificates.

Rule 17Ad–7 under the Exchange Act requires each registered transfer agent to retain the records specified in Rule 17Ad–6 in an easily accessible place for a period of six months to six years, depending on the type of record or document. Rule 17Ad–7 also specifies the manner in which records may be maintained using electronic, microfilm, and microfiche storage methods.

These recordkeeping requirements are designed to ensure that all registered transfer agents are maintaining the records necessary for transfer agents to monitor and keep control over their own performance and for the Commission to adequately examine registered transfer agents on an historical basis for compliance with applicable rules.

The Commission estimates that approximately 315 registered transfer agents will spend a total of 157,500 hours per year complying with Rules 17Ad–6 and 17Ad–7 (500 hours per year per transfer agent).

The retention period under Rule 17Ad–7 for the recordkeeping requirements under Rule 17Ad–6 is six months to six years, depending on the particular record or document. The recordkeeping and retention requirements under Rules 17Ad–6 and 17Ad–7 are mandatory to assist the Commission and other regulatory agencies with monitoring transfer agents and ensuring compliance with the rules.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–100062; File No. SR–CboeBYX–2024–013]

Self-Regulatory Organizations; Cboe BYX Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Introduce a New Connectivity Offering Through Dedicated Cores

May 6, 2024.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on April 24, 2024, Cboe BYX Exchange, Inc. (the ''Exchange'' or ''BYX'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Exchange filed the proposal as a ''non-controversial'' proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act[3] and Rule 19b–4(f)(6) thereunder.[4] The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] 15 U.S.C. 78s(b)(3)(A)(iii).

[4] 17 CFR 240.19b–4(f)(6).

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Cboe BYX Exchange, Inc. (the ''Exchange'' or ''BYX'') proposes to introduce a new connectivity offering.

The text of the proposed rule change is also available on the Exchange's website (*http://markets.cboe.com/us/equities/regulation/rule_filings/byx/*), at the Exchange's Office of the Secretary, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to introduce a new connectivity offering relating to the use of Dedicated Cores. By way of background, all Central Processing Units (''CPU Cores'') have historically been shared by logical order entry ports (*i.e.,* multiple logical ports from multiple firms may connect to a single CPU Core). Starting May 6, 2024, the Exchange will allow Users[5] to assign a single Binary Order Entry (''BOE'') logical order entry port[6] to a single dedicated CPU Core (''Dedicated Core'').[7] Use of Dedicated Cores can provide reduced latency, enhanced throughput, and improved performance since a firm using a Dedicated Core is utilizing the full processing power of a CPU Core instead of sharing that power with other firms. This offering is completely voluntary and will be available to all Users.[8] Users will also continue to have the option to utilize BOE logical order entry ports on shared CPU Cores as they do today, either in lieu of, or in addition to, their use of Dedicated Core(s). As such, Users will be able to operate across a mix of shared and dedicated CPU Cores which the Exchange believes provides additional risk and capacity management, especially during times of market volatility and high message traffic. Further, Dedicated Cores are not required nor necessary to participate on the Exchange and as such Users may opt not to use Dedicated Cores at all.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Securities Exchange Act of 1934 (the ''Act'') and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act.[9] Specifically, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)[10] requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)[11] requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

In particular, the proposal would provide Users the option to assign a single BOE logical entry port to a single Dedicated Core. As described above, CPU Cores have historically been shared by logical order entry ports (*i.e.,* multiple logical ports from multiple

[5] A User may be either a Member or Sponsored Participant. The term ''Member'' shall mean any registered broker or dealer that has been admitted to membership in the Exchange. limited liability company or other organization which is a registered broker or dealer pursuant to Section 15 of the Act, and which has been approved by the Exchange. A Sponsored Participant may be a Member or non-Member of the Exchange whose direct electronic access to the Exchange is authorized by a Sponsoring Member subject to certain conditions. See Exchange Rule 11.3.

[6] Users may currently connect to the Exchange using a logical port available through an application programming interface (''API''), such as the Binary Order Entry (''BOE'') protocol. A BOE logical order entry port is used for order entry.

[7] The Exchange notes that firms will not have physical access to their Dedicated Core and thus cannot make any modifications to the Dedicated Core or server. All Dedicated Cores (including servers used for this service) are owned and operated by the Exchange.

[8] The Exchange intends to submit a separate rule filing to adopt monthly fees related to the use of Dedicated Cores.

[9] 15 U.S.C. 78f(b).

[10] 15 U.S.C. 78f(b)(5).

[11] *Id.*

firms may connect to a single CPU Core). Use of Dedicated Cores can provide reduced latency, enhanced throughput, and improved performance since a firm using a Dedicated Core is utilizing the full processing power of a CPU Core instead of sharing that power with other firms. The Exchange also emphasizes that the use of Dedicated Cores is not necessary for trading and as noted above, is entirely optional. Indeed, Users can continue to access the Exchange through shared CPU Cores at no additional cost. Depending on a firm's specific business needs, the proposal enables Users to choose to use Dedicated Cores in lieu of, or in addition to, shared CPU Cores (or as noted, not use Dedicated Cores at all). The Exchange believes the proposal to operate across a mix of shared and dedicated CPU Cores may further provide additional risk and capacity management. The Exchange also notes that its affiliated exchange, Cboe EDGA Exchange, Inc, recently introduced Dedicated Cores and that another Exchange [sic] also provides a similar connectivity offering.[12]

Furthermore, this service is optional and is available to all Users. In this regard, some Users may determine it does not want or need Dedicated Cores and may continue their use of the shared CPU Cores, unchanged. The Exchange has no current plans to eliminate shared Cores nor require subscription to the dedicated offering.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. Particularly, the Exchange believes the proposed rule change does not impose any burden on intra-market competition that is not necessary or appropriate in furtherance of the purposes of the Act because Dedicated Cores will be available to all Users. While the Exchange believes that the proposed Dedicated Cores provide a valuable service, Users can choose to purchase, or not purchase, Dedicated Cores based on their own determination of the value and their business needs. Indeed, no User is required or under any regulatory obligation to use Dedicated Cores.

Additionally, nothing in the proposal imposes any burden on the ability of other exchanges to compete. The Exchange operates in a highly competitive market in which exchanges offer various connectivity services as a means to facilitate the trading and other market activities of those market participants and at least one other exchange has an offering comparable to Dedicated Cores.[13]

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative prior to 30 days from the date on which it was filed, or such shorter time as the Commission may designate, if consistent with the protection of investors and the public interest, the proposed rule change has become effective pursuant to Section 19(b)(3)(A)(iii) of the Act[14] and Rule 19b–4(f)(6) thereunder.[15]

A proposed rule change filed under Rule 19b–4(f)(6)[16] normally does not become operative prior to 30 days after the date of the filing. However, pursuant to Rule 19b–4(f)(6)(iii),[17] the Commission may designate a shorter time if such action is consistent with the protection of investors and the public interest.

The Exchange has asked the Commission to waive the 30-day operative delay so that the proposal may become operative immediately upon filing. The Exchange states that its affiliated exchange, Cboe EDGA Exchange, Inc., recently introduced Dedicated Cores and another exchange has a connectivity offering comparable to Dedicated Cores.[18] The Commission believes that the proposed rule change presents no novel legal or regulatory issues, and that waiver of the 30-day operative delay is consistent with the protection of investors and the public interest. Accordingly, the Commission hereby waives the 30-day operative delay and designates the proposed rule change operative upon filing.[19]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B)[20] of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov*. Please include file number SR–CboeBYX–2024–013 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to file number SR–CboeBYX–2024–013. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[SEC File No. 270–770, OMB Control No. 3235–0750]

Submission for OMB Review; Comment Request; Extension: Rule 18a–8

Upon Written Request, Copies Available From: Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE, Washington, DC 20549–2736

Notice is hereby given that, pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission (''Commission'') has submitted to the Office of Management and Budget (''OMB'') a request for extension of the previously approved collection of information discussed below.

Exchange Act Rule 18a–8 (17 CFR 240.18a–8) specifies the circumstances under which stand-alone security-based swap dealers (''SBSDs''), stand-alone major security-based swap participants (''MSBSPs''), bank SBSDs, and bank MSBSPs must notify the Commission about their financial or operational condition, as well as the form that the notice must take.

The Commission estimates that the total hour burden under Rule 18a–8 is approximately 5 burden hours per year, and the total cost burden is approximately $0 per year. There has been no change in the estimated total hour and cost burdens since the last approval of this information collection.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information under the PRA unless it displays a currently valid OMB control number.

The public may view background documentation for this information collection at the following website: *www.reginfo.gov.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. Written comments and recommendations for the proposed information collection should be sent by June 10, 2024 to (i) *www.reginfo.gov/public/do/PRAMain* and (ii) David Bottom, Director/Chief Information Officer, Securities and Exchange Commission, c/o John Pezzullo, 100 F Street NE, Washington, DC 20549, or by sending an email to: *PRA_Mailbox@sec.gov.*

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[SEC File No. 270–446, OMB Control No. 3235–0503]

Proposed Collection; Comment Request; Extension: Form N–6

Upon Written Request, Copies Available From: Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE, Washington, DC 20549–2736

Notice is hereby given that, pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission (the ''Commission'') is soliciting comments on the collection of information summarized below. The Commission plans to submit this existing collection of information to the Office of Management and Budget for extension and approval.

The title for the collection of information is ''Form N–6 (17 CFR 239.17c and 274.11d) under the Securities Act of 1933 (15 U.S.C. 77a *et seq.*) and under the Investment Company Act of 1940 (15 U.S.C. 80a–1 *et seq.*) registration statement of separate accounts organized as unit investment trusts that offer variable life insurance policies.'' Form N–6 is the form used by insurance company separate accounts organized as unit investment trusts that offer variable life insurance contracts to register as investment companies under the Investment Company Act of 1940 and/or to register their securities under the Securities Act of 1933. The primary purpose of the registration process is to provide disclosure of financial and other information to investors and potential investors for the purpose of evaluating an investment in a security. Form N–6 also requires separate accounts organized as unit investment trusts that offer variable life insurance policies to provide investors with a prospectus and a statement of additional information (''SAI'') covering essential information about the separate account when it makes an initial or additional offering of its securities.

The Commission estimates that approximately 448 registration statements (20 initial registration statements plus 428 post-effective amendments) are filed on Form N–6 annually. The estimated hour burden per portfolio for preparing and filing an initial registration statement on Form N–6 is 772.25 hours. The estimated annual hour burden for preparing and filing initial registration statements is 15,445 hours (20 initial registration statements annually times 772.25 hours per registration statement). The Commission estimates that the hour burden for preparing and filing a post-effective amendment on Form N–6 is 154.25 hours. The total annual hour burden for preparing and filing post-effective amendments is 66,019 hours (428 post-effective amendments annually times 154.25 hours per amendment). The frequency of response is annual. The total annual hour burden for Form N–6, therefore, is estimated to be 81,464 hours (15,445 hours for initial registration statements plus 66,019 hours for post-effective amendments).

The Commission estimates that the cost burden for preparing an initial Form N–6 filing is $40,000 per filing and the current cost burden for preparing a post-effective amendment to a previously effective registration statement is $20,000 per filing. Thus, the total cost burden allocated to Form N–6 would be $9,360,000 (20 initial filings times $40,000 and 428 post-effective amendment filings times $20,000).

The information collection requirements imposed by Form N–6 are mandatory. Responses to the collection of information will not be kept

[21] 17 CFR 200.30–3(a)(12), (59).

confidential. Estimates of average burden hours are made solely for the purposes of the Paperwork Reduction Act, and are not derived from a comprehensive or even a representative survey or study of the costs of Commission rules and forms. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid control number.

Written comments are invited on: (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted by July 9, 2024.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information under the PRA unless it displays a currently valid OMB control number.

Please direct your written comments to: David Bottom, Chief Information Officer, Securities and Exchange Commission, c/o John Pezzullo, 100 F Street NE, Washington, DC 20549 or send an email to: *PRA_Mailbox@sec.gov*.

Dated: May 7, 2024.

Sherry R. Haywood,

Assistant Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–100067; File No. SR–FINRA–2024–006]

Self-Regulatory Organizations; Financial Industry Regulatory Authority, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend FINRA Rule 1240.01 To Reopen the Period by Which Certain Participants in the Maintaining Qualifications Program May Complete Their Prescribed Continuing Education Content

May 6, 2024.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'')[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on April 30, 2024, the Financial Industry Regulatory Authority, Inc. (''FINRA'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by FINRA. FINRA has designated the proposed rule change as constituting a ''non-controversial'' rule change under paragraph (f)(6) of Rule 19b–4 under the Act,[3] which renders the proposal effective upon receipt of this filing by the Commission. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

FINRA is proposing to amend FINRA Rule 1240.01 (Eligibility of Other Persons to Participate in the Continuing Education Program Specified in Paragraph (c) of this Rule) to reopen the period by which certain participants in the Maintaining Qualifications Program (''MQP'') will be able to complete their prescribed 2022 and 2023 continuing education (''CE'') content.

Below is the text of the proposed rule change. Proposed new language is italicized; proposed deletions are in brackets.

* * * * *

1200. REGISTRATION AND QUALIFICATION

* * * * *

1240. Continuing Education

This Rule prescribes requirements regarding the continuing education of registered persons. The requirements shall consist of a Regulatory Element and a Firm Element as set forth below. This Rule also sets forth continuing education programs through which specified persons may maintain their qualification in a representative or principal registration category following the termination of that registration category.

(a) through (c) No Change.

• • • Supplementary Material:————

.01 Eligibility of Other Persons to Participate in the Continuing Education Program Specified in Paragraph (c) of this Rule. A person registered in a representative or principal registration category with FINRA within two years immediately preceding March 15, 2022 shall be eligible to participate in the continuing education program under paragraph (c) of this Rule, provided that he or she satisfies the conditions set forth in paragraphs (c)(1) and (c)(3) through (c)(6) of this Rule. In addition, a person participating in the Financial Services Affiliate Waiver Program under Rule 1210.09 immediately preceding March 15, 2022 shall be eligible to participate in the continuing education program under paragraph (c) of this Rule, provided that he or she satisfies the conditions set forth in paragraphs (c)(3), (c)(5) and (c)(6) of this Rule. Persons eligible under this Supplementary Material .01 shall make their election to participate in the continuing education program under paragraph (c) of this Rule either (1) between January 31, 2022, and March 15, 2022; or (2) between March 15, 2023, and December 31, 2023. If such persons elect to participate in the continuing education program, their participation period shall also be for a period of five years following the termination of their registration categories, as with other participants under paragraph (c) of this Rule. [In addition, eligible persons who elect to participate in the continuing education program between March 15, 2023, and December 31, 2023, must complete any prescribed 2022 and 2023 continuing education content by March 31, 2024.] *Individuals enrolled in the continuing education program under this Supplementary Material .01 in both 2022 and 2023 who did not complete their prescribed 2022 and 2023 continuing education content as of March 31, 2024, shall be able to complete such content between May 22, 2024, and July 1, 2024, to be eligible to continue their participation in the continuing education program. In addition, any such individuals who will have completed their prescribed 2022 and 2023 continuing education content between March 31, 2024, and May 22, 2024, shall be deemed to have completed such content by July 1, 2024, for purposes of this Supplementary Material .01.*

.02 No Change.

* * * * *

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, FINRA included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. FINRA has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

FINRA Rule 1240.01 extended the option to participate in the MQP to individuals who: (1) were registered as a representative or principal within two years immediately prior to March 15, 2022 (the implementation date of the

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] 17 CFR 240.19b–4(f)(6).

MQP); and (2) individuals who were participating in the Financial Services Affiliate Waiver Program (''FSAWP'') under FINRA Rule 1210.09 (Waiver of Examinations for Individuals Working for a Financial Services Industry Affiliate of a Member) immediately prior to March 15, 2022 (collectively, ''Look-Back Individuals'').[4] The rule provided two open enrollment periods for Look-Back Individuals to participate in the MQP.[5] FINRA provided all Look-Back Individuals who had enrolled in the MQP until March 31, 2024, to complete any prescribed 2022 and 2023 CE content.[6] Look-Back Individuals who are enrolled in the MQP, similar to other MQP participants, are able to complete any prescribed CE and renew their annual MQP participation through their FINRA Financial Professional Gateway (''FinPro'') accounts.

On March 16, 2024, FINRA sent an email to Look-Back Individuals who had enrolled in the MQP but had not completed their prescribed CE to remind them of the March 31, 2024, deadline.[7] In the week leading up to the deadline, however, FINRA noticed that several thousand of those individuals were renewing their participation in the MQP for 2024 instead of completing their prescribed CE.[8] FINRA believes that some of those individuals may have been confused by the layout of their FinPro accounts. Specifically, if they selected the 2024 renewal banner, which was prominently displayed on their FinPro accounts, and completed the renewal process, they would not have been automatically redirected to complete any prescribed CE. Therefore, individuals may have inadvertently assumed that completion of the renewal process alone would have satisfied all of the necessary requirements to continue their participation in the MQP.[9]

For these reasons, FINRA is proposing to amend Rule 1240.01 to provide Look-Back Individuals enrolled in the MQP in both 2022 and 2023 who did not complete their prescribed 2022 and 2023 CE content as of March 31, 2024, the opportunity to complete such content between May 22, 2024, and July 1, 2024, to be eligible to continue their participation in the MQP.[10] FINRA is also proposing to amend the rule to provide that any such individuals who will have completed their prescribed 2022 and 2023 CE content between March 31, 2024, and May 22, 2024, will be deemed to have completed such content by July 1, 2024, for purposes of the rule. FINRA plans to reach out to all impacted individuals and inform them of the new CE completion period. FINRA has made changes, and is also considering future changes, to the layout of FinPro to more effectively communicate the necessary steps that individuals must take to satisfy their MQP obligations.

FINRA has filed the proposed rule change for immediate effectiveness and has requested that the SEC waive the requirement that the proposed rule change not become operative for 30 days after the date of the filing. The operative date will be the date of filing of the proposed rule change, if the SEC grants the waiver.

2. Statutory Basis

FINRA believes that the proposed rule change is consistent with the provisions of Section 15A(b)(6) of the Act,[11] which requires, among other things, that FINRA rules must be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, and, in general, to protect investors and the public interest. FINRA believes that reopening the period by which Look-Back Individuals will be able to complete their prescribed 2022 and 2023 CE content is appropriate under the circumstances. FINRA believes that Look-Back Individuals who had enrolled in the MQP in 2022 and 2023 but had not completed their prescribed 2022 and 2023 CE content by the March 31, 2024, deadline may have been confused, as described above. FINRA continues to believe that participation in the MQP reduces unnecessary impediments to requalification without diminishing investor protection.[12] In addition, the MQP promotes other goals, such as diversity and inclusion in the securities industry by attracting and retaining a broader and diverse group of professionals. The MQP also allows the industry to retain expertise from skilled individuals, providing investors with the advantage of greater experience among the individuals working in the industry. FINRA believes that reopening the CE completion period, as proposed, will further these goals and objectives.

B. Self-Regulatory Organization's Statement on Burden on Competition

FINRA does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. Further, FINRA provided an extensive economic impact assessment relating to the MQP as part of the rule filing that proposed the adoption of the MQP.[13]

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time

[4] The FSAWP is a waiver program for eligible individuals who have left a member firm to work for a foreign or domestic financial services affiliate of a member firm. FINRA stopped accepting new participants for the FSAWP beginning on March 15, 2022; however, individuals who were already participating in the FSAWP prior to that date had the option of continuing in the FSAWP.

[5] In March 2023, FINRA amended Rule 1240.01 to provide Look-Back Individuals with a second opportunity to participate in the MQP. *See* Securities Exchange Act Release No. 97184 (March 22, 2023), 88 FR 18359 (March 28, 2023) (Notice of Filing and Immediate Effectiveness of File No. SR–FINRA–2023–005).

[6] FINRA determined to treat the individuals who enrolled during the first period (between January 31, 2022, and March 15, 2022) the same as those who enrolled during the second period (between March 15, 2023, and December 31, 2023) for purposes of the March 31, 2024, deadline for completion of prescribed 2022 and 2023 CE content. This is because those who had enrolled in the MQP during the first period satisfied all of the eligibility criteria for enrollment during the second period and would have been able to complete their prescribed CE content by March 31, 2024, had they chosen to enroll during the second period instead of enrolling during the first period.

[7] FINRA had sent multiple reminders prior to March 16, 2024, but the March 16, 2024, email was the last reminder that was sent prior to the March 31, 2024, deadline for completion of any prescribed 2022 and 2023 CE content.

[8] Look-Back Individuals who enrolled in the MQP have until December 31, 2024, to renew their participation in the MQP for 2024, provided that they complete their prescribed CE by the stated deadline.

[9] A number of these individuals contacted FINRA to confirm whether they were required to satisfy any additional requirements other than completing the 2024 renewal. To provide FINRA with additional time to assess the situation, FINRA temporarily changed the March 31, 2024, due date for CE completion in its systems. This may have compounded the confusion because any Look-Back Individual who may have logged into their FinPro account during this time would have seen an interim CE completion date and would have been able to complete their prescribed CE content based on that interim CE completion date.

[10] This would include any Look-Back Individuals who were still in the process of completing their prescribed CE content as of March 31, 2024.

[11] 15 U.S.C. 78*o*–3(b)(6).

[12] As of April 15, 2024, approximately 31,000 individuals, including approximately 20,000 Look-Back Individuals, have enrolled in the MQP, of which approximately 1,400 individuals have used the MQP to return to the industry without having to go through requalification.

[13] *See* Securities Exchange Act Release No. 92183 (June 15, 2021), 86 FR 33427 (June 24, 2021) (Notice of Filing of File No. SR–FINRA–2021–015).

as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act[14] and Rule 19b–4(f)(6) thereunder.[15]

A proposed rule change filed under Rule 19b-4(f)(6)[16] normally does not become operative prior to 30 days after the date of the filing. However, pursuant to Rule 19b4(f)(6)(iii),[17] the Commission may designate a shorter time if such action is consistent with the protection of investors and the public interest. FINRA has asked the Commission to waive the 30-day operative delay so that the proposed rule change may become operative upon filing. As outlined above, FINRA states that it plans to reach out to all impacted individuals and inform them of the new CE completion period established by this rule change. FINRA has indicated that the immediate operation of the proposed rule change is appropriate so that FINRA can communicate the rule change to impacted individuals promptly. FINRA also believes that immediate operation of the proposed rule change is appropriate because it would provide clarity to impacted individuals without unnecessary delay. For these reasons, the Commission believes that waiving the 30-day operative delay is consistent with the protection of investors and the public interest. Therefore, the Commission hereby waives the operative delay and designates the proposal operative upon filing.[18]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*https://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov*. Please include File Number SR–FINRA–2024–006 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–FINRA–2024–006. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*https://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of such filing also will be available for inspection and copying at the principal office of FINRA. Do not include personal identifiable information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright protection. All submissions should refer to File Number SR–FINRA–2024–006 and should be submitted on or before May 31, 2024.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[19]

J. Matthew DeLesDernier,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

Sunshine Act Meetings

TIME AND DATE: Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Public Law 94–409, that the Securities and Exchange Commission Investor Advisory Committee will hold a public meeting on Thursday, June 6, 2024. The meeting will begin at 10:00 a.m. (ET) and will be open to the public.

PLACE: The meeting will be conducted by remote means. Members of the public may watch the webcast of the meeting on the Commission's website at *www.sec.gov.*

STATUS: This Sunshine Act notice is being issued because a majority of the Commission may attend the meeting.

PUBLIC COMMENT: The public is invited to submit written statements to the Committee. Written statements should be received on or before June 5, 2024.

Written statements may be submitted by any of the following methods:

Electronic Statements

- Use the Commission's internet submission form (*http://www.sec.gov/rules/other.shtml*); or
- Send an email message to *rules-comments@sec.gov.* Please include File No. 265–28 on the subject line; or

Paper Statements

- Send paper statements to Vanessa A. Countryman, Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File No. 265–28. This file number should be included on the subject line if email is used. To help us process and review your statement more efficiently, please use only one method.

The Commission will post all statements on the Commission's website. Statements also will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Room 1503, Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Operating conditions may limit access to the

Commission's Public Reference Room. Do not include personal information in submissions; you should submit only information that you wish to make available publicly. We may redact in part or withhold entirely from publication submitted material that is obscene or subject to copyright.

MATTERS TO BE CONSIDERED: The agenda for the meeting includes: welcome and opening remarks; approval of previous meeting minutes; a panel discussion examining the new frontier for investment advice; a panel discussion regarding AI regulation: embracing the future; a discussion of a recommendation regarding the protection of self-directed investors when trading complex products and utilizing complex strategies; a discussion of a recommendation on financial literacy and investor education; subcommittee and working group reports; and a non-public administrative session.

CONTACT PERSON FOR MORE INFORMATION: For further information, please contact Vanessa A. Countryman from the Office of the Secretary at (202) 551–5400.

Authority: 5 U.S.C. 552b.

Dated: May 8, 2024.

Vanessa A. Countryman,

Secretary.

BILLING CODE 8026–09–P

SOCIAL SECURITY ADMINISTRATION

[Docket No. SSA–2024–0009]

Maximum Dollar Limit in the Fee Agreement Process

AGENCY: Social Security Administration.

ACTION: Notice.

SUMMARY: We are increasing the maximum dollar amount limit for fee agreements approved under the Social Security Act (the Act) to $9,200. Effective November 30, 2024, we may approve fee agreements up to the new dollar limit, provided that the fee agreement otherwise meets the statutory conditions of the agreement process.

DATES: We will apply this notice beginning on November 30, 2024.

FOR FURTHER INFORMATION CONTACT: Mary Quatroche, Office of Vocational, Evaluation, and Process Policy in the Office of Disability Policy, Social Security Administration, 6401 Security Boulevard, Baltimore, MD 21235–6401, (410) 966–4794.

For information on eligibility or filing for benefits, call the Social Security Administration's (SSA) national toll-free number, 1–800–772–1213 or TTY 1–800–325–0778, or visit SSA's internet site, Social Security Online at *http://www.socialsecurity.gov.*

SUPPLEMENTARY INFORMATION: The Act provides a streamlined process for a representative to obtain approval of the fee the representative wishes to charge for representing a claimant before us.[1] To use that fee agreement process, the representative(s) and the claimant must agree, in a signed writing, to a fee that does not exceed the limit set by the statute, which is the lesser of 25 percent of past due benefits or a prescribed dollar amount. Section 5106 of the Omnibus Budget Reconciliation Act (OBRA) of 1990, Public Law 101–508, set the initial fee amount at $4,000 and gave the Commissioner the authority to increase it periodically, provided that the cumulative rate of increase did not at any time exceed the rate of increase in the primary insurance amount (PIA) since January 1, 1991. The law further provided that notice of any increased amount shall be published in the **Federal Register**. On June 30, 2022, we published a notice raising the maximum fee to $7,200, effective November 30, 2022, which is the current maximum dollar amount for fee agreements.[2]

With this notice, we announce that the maximum dollar amount under the fee agreement process, will increase to $9,200, effective November 30, 2024. This increase does not exceed the rate of increase provided in the OBRA of 1990. We expect that this increase will compensate representatives for their services while ensuring claimants are protected from excessive fees. In setting the new cap, we considered a number of factors, including: data about fees authorized under the current fee cap, data about case backlogs, COLA, PIAs, feedback we received about the current fee cap, increases in disability benefits, and the effects on our claimants.

Beginning November 30, 2024, decision makers may approve a fee agreement up to the new dollar limit if the fee agreement meets the statutory conditions for approval, no exceptions to the fee agreement process exist, and the favorable determination or decision is issued on or after this date. We are setting this date to ensure that there is adequate time to provide training and guidance to our employees and to make the necessary changes in our information technology infrastructure.

Starting in January 2026, along with our announcements of other cost of living adjustments (COLA) (*e.g.,* for title II benefits, title XVI payments, or the appointed representative fee assessment), we will annually address the maximum dollar amount for fee agreements and provide a rationale for either increasing or not increasing the maximum dollar amount based upon the annual COLA for the prior year. Future increases will not exceed the rate of increase provided in the OBRA of 1990. We expect that future increases will compensate representatives for

[1] 42 U.S.C. 406(a) and 1383(d)(2)(A).

[2] 87 FR 39157 (2022).

their services while ensuring claimants are protected from excessive fees.

The Commissioner of the Social Security Administration, Martin O'Malley, having reviewed and approved this document, is delegating the authority to electronically sign this document to Jennifer L. Dulski, who is a Federal Register Liaison for SSA, for purposes of publication in the **Federal Register**.

Jennifer L. Dulski,

Federal Register Liaison, Office of Legislation and Congressional Affairs, Social Security Administration.

BILLING CODE 4191–02–P

DEPARTMENT OF STATE

[Public Notice: 12405]

Notice of Public Meeting in Preparation for International Maritime Organization NCSR 11th Meeting

The Department of State will conduct a public meeting at 11:00 a.m. on Wednesday, May 29, 2024, both in-person at Coast Guard Headquarters in Washington, DC, and via teleconference. The primary purpose of the meeting is to prepare for the 11th session of the International Maritime Organization's (IMO) Sub-Committee on Navigation, Communication and Search and Rescue (NCSR 11) to be held in London, United Kingdom from Tuesday, June 4, 2024 to Thursday, June 13, 2024.

Members of the public may participate up to the capacity of the teleconference line, which will handle 500 participants, or up to the seating capacity of the room if attending in-person. The meeting location will be the United States Coast Guard Headquarters, and the teleconference line will be provided to those who RSVP. To RSVP, participants should contact the meeting coordinator, Mr. John Stone, by email at *John.M.Stone@uscg.mil.* Mr. Stone will provide access information for in-person and virtual attendance.

The agenda items to be considered include:

—Adoption of the agenda
—Decisions of other IMO bodies
—Routing measures and mandatory ship reporting systems
—Updates to the LRIT system
—Developments in GMDSS services, including guidelines on maritime safety information (MSI)
—Response to matters related to the ITU–R Study Groups and ITU World Radiocommunication Conference
—Development of global maritime SAR services, including harmonization of maritime and aeronautical procedures and amendments to the IAMSAR Manual
—Development of performance standards for a digital navigational data system (NAVDAT)
—Development of amendments to SOLAS chapters IV and V and performance standards and guidelines to introduce VHF Data Exchange System (VDES)
—Review of the appropriateness and effectiveness of SOLAS regulation IV/5 (Provision of radiocommunication services)
—Revision of the Criteria for the provision of mobile satellite communication services in the Global Maritime Distress and Safety System (GMDSS) (Resolution A. 1001(25))
—Development of guidelines for the use of electronic nautical publications (ENP)
—Revision of SOLAS regulation V/23 and associated instruments to improve the safety of pilot transfer arrangements
—Identification of measures to improve the security and integrity aspects of AIS
—Unified interpretation of provision of IMO safety, security, environment, facilitation, liability and compensation-related conventions.
—Biennial status report and provisional agenda for NCSR 12
—Election of Chair and Vice-Chair for 2025
—Any other business
—Report to the Maritime Safety Committee

Please note: The IMO may, on short notice, adjust the NCSR 11 agenda to accommodate any constraints associated with the meeting. Although no changes to the agenda are anticipated, if any are necessary, they will be provided to those who RSVP.

Those who plan to participate should contact the meeting coordinator, Mr. John Stone at *John.M.Stone@uscg.mil,* by phone at (206) 815–1335, or in writing at 2703 Martin Luther King Jr. Ave. SE, Stop 7418, Washington, DC 20593–7418 not later than May 15, 2024, 14 days prior to the meeting. Requests made after May 15, 2024 might not be able to be accommodated. The meeting coordinator will provide the teleconference information, facilitate the building security process, and requests for reasonable accommodation. Please note that due to security considerations, two valid, government issued photo identifications must be presented to gain entrance to the Douglas A. Munro Coast Guard Headquarters Building at St. Elizabeth's. This building is accessible by taxi, public transportation, and privately owned conveyance (upon advanced request).

Additional information regarding this and other IMO public meetings may be found at: *https://www.dco.uscg.mil/IMO.*

(Authority: 22 U.S.C. 2656 and 5 U.S.C. 552)

BILLING CODE 4710–09–P

DEPARTMENT OF STATE

[Public Notice: 12404]

Notice of Charter Renewal for the Cultural Property Advisory Committee

SUMMARY: The Charter of the Department of State's Cultural Property Advisory Committee has been renewed for an additional two years.

FOR FURTHER INFORMATION CONTACT: Allison Davis, Cultural Heritage Center, U.S. Department of State, Bureau of Educational and Cultural Affairs, 2200 C Street NW, Washington, DC 20522. Telephone: (771) 204–4765; Email *culprop@state.gov.*

SUPPLEMENTARY INFORMATION: The Department of State has renewed the Charter of the Cultural Property Advisory Committee. The Committee was established by the Convention on Cultural Property Implementation Act of 1983, 19 U.S.C. 2601 *et seq.,* to provide recommendations regarding requests for assistance from foreign governments under the UNESCO 1970 Convention on the Means of Prohibiting and Preventing the Illicit Import, Export and Transfer of Ownership of Cultural Property. The Presidentially appointed members include individuals representing the interests of museums; experts in the fields of archaeology, anthropology, or related areas; experts in the international sale of archaeological, ethnological, and other cultural property; and individuals who represent the interests of the general public. The renewed Charter was filed with Congress on April 4, 2024.

Allison R. Davis Lehmann,

Executive Director, Cultural Property Advisory Committee, Bureau of Educational and Cultural Affairs, Department of State.

BILLING CODE 4710–05–P

SURFACE TRANSPORTATION BOARD

[Docket No. FD 36771]

Merrimack & Grafton Railroad Corporation—Change in Operator Exemption—in Grafton and Coos Counties, N.H., and Essex County, Vt.

Merrimack & Grafton Railroad Corporation (MGRC), a Class III rail carrier, has filed a verified notice of exemption pursuant to 49 CFR 1150.41 to assume operations over the following railroad lines (the Lines), totaling approximately 52 route miles, owned by the State of New Hampshire through the New Hampshire Department of Transportation (NHDOT): (1) from milepost P 131.93 at North Stratford, N.H., to milepost P 145.21 at Colebrook, N.H.; (2) from milepost C 119.86 east of Wing Road in Bethlehem, N.H., to milepost C 130.7/P 101.9 at Hazen Road in Whitefield, N.H.; (3) from milepost C 130.7/P 101.9 at Hazen Road in Whitefield to milepost P 112.46/C 137.42 at Lancaster, N.H.; (4) from milepost P 112.46/C 137.42 at Lancaster to milepost C 145.76 (proximate to the Whistle Post located south of the West Street crossing at the connection with the St. Lawrence & Atlantic Railroad Company) at Groveton, N.H.; and (5) from milepost P 100.91 at Whitefield to milepost P 111.57 at Lunenburg, Vt. The verified notice states that the Lines are currently operated by New Hampshire Central Railroad, Inc. (NHCR).

According to the verified notice, MGRC, a subsidiary of Trans Rail Holding Company, has entered into an operating agreement with NHDOT to assume common carrier operations over the Lines. Upon consummation of the proposed transaction, MGRC will replace NHCR as the exclusive common carrier operator over the Lines.

MGRC certifies that the documents governing the proposed transaction do not include terms that would limit future interchange with a third-party connecting carrier. MGRC also certifies that its projected annual revenues resulting from the transaction will not result in the creation of a Class I or II rail carrier and are not expected to exceed $5 million.

Under 49 CFR 1150.42(b), a change in operator requires that notice be given to shippers. MGRC certifies that it has provided a copy of its verified notice to all customers on the Lines.

The transaction may be consummated on or after May 26, 2024, the effective date of the exemption (30 days after the verified notice was filed). If the verified notice contains false or misleading information, the exemption is void ab initio. Petitions to revoke the exemption under 49 U.S.C. 10502(d) may be filed at any time. The filing of a petition to revoke will not automatically stay the effectiveness of the exemption. Petitions for stay must be filed no later than May 17, 2024 (at least seven days before the exemption becomes effective).

All pleadings, referring to Docket No. FD 36771, must be filed with the Surface Transportation Board via e-filing on the Board's website or in writing addressed to 395 E Street SW, Washington, DC 20423–0001. In addition, a copy of each pleading must be served on MGRC's representative, Robert A. Wimbish, Fletcher & Sippel LLC, 29 North Wacker Drive, Suite 800, Chicago, IL 60606–3208.

According to MGRC, this action is categorically excluded from environmental review under 49 CFR 1105.6(c) and from historic preservation reporting requirements under 49 CFR 1105.8(b).

Board decisions and notices are available at *www.stb.gov.*

Decided: May 7, 2024.

By the Board, Mai T. Dinh, Director, Office of Proceedings.

Jeffrey Herzig,

Clearance Clerk.

BILLING CODE 4915–01–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Notice of Availability, Notice of Public Comment Period, Notice of Public Meeting, and Request for Comment on the Draft Programmatic Environmental Assessment for Drone Package Delivery in North Carolina

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of availability; notice of public meeting; request for comments.

SUMMARY: The Federal Aviation Administration (FAA) announces the availability of the Draft Programmatic Environmental Assessment (PEA) for Drone Package Delivery in North Carolina for public review and comment.

DATES: Send comments on or before May 30, 2024. The FAA will hold a virtual public meeting on Tuesday, May 21, 2024, from 6:00–8:00 p.m. Eastern Time.

ADDRESSES: Email comments to *9-FAA-Drone-Environmental@faa.gov* or by mail to Federal Aviation Administration, Suite 802W, C/O AVS Environmental, 800 Independence Ave. SW, Washington, DC 20591. Members of the public may view the virtual meeting via Zoom at *https://us06web.zoom.us/j/84319168260.*

Before including your address, phone number, email address, or other personal identifying information in your comment, be advised that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold from public review your personal identifying information, we cannot guarantee that we will be able to do so.

FOR FURTHER INFORMATION CONTACT: For questions concerning this action, contact Nicholas Baker, Environmental Protection Specialist, Unmanned Aircraft Systems Integration Office, Safety & Integration Division, Strategic Programs Branch, AUS–430; telephone 1–202–267–4714; email *9-FAA-Drone-Environmental@faa.gov.*

SUPPLEMENTARY INFORMATION: The Draft PEA evaluates the potential environmental impacts of Unmanned Aircraft Systems (UAS) package delivery operations in the state of North Carolina. The proposed action analyzed in the PEA is UAS operators conducting commercial drone package deliveries under 14 Code of Federal Regulations (CFR) part 135 in North Carolina. The North Carolina Department of Transportation is the project proponent.

The Draft PEA is submitted for review pursuant to the National Environmental Policy Act (NEPA) (42 United States Code [U.S.C.] 4321 *et seq.*), the Council on Environmental Quality NEPA Implementing Regulations (40 CFR parts 1500–1508), FAA Order 1050.1F, *Environmental Impacts: Policies and Procedures,* section 4(f) of the Department of Transportation Act (49 U.S.C. 303), and section 106 of the National Historic Preservation Act (16 U.S.C. 470). The draft PEA is available to view and download electronically at *https://www.faa.gov/uas/advanced_operations/nepa_and_drones/.* The Draft PEA is available from any internet access, including from computers freely available at public libraries.

Based on the analysis in the Draft PEA, including any mitigation measures that may be used to prevent significant noise impacts, the FAA has preliminarily determined there will not be significant impacts to the human environment. As a result, an Environmental Impact Statement has not been initiated. The FAA intends for this PEA to create efficiencies by establishing a framework that can be used for ''tiering,'' when appropriate, to

project-specific actions that require additional analysis. As decisions on specific applications are made, to the extent additional NEPA analysis is required, environmental review will be conducted to supplement the analysis set forth in this PEA.

Public Meeting

The FAA will provide an overview of the project and potential environmental impacts at a virtual public meeting on May 21, 2024. There will be a question-and-answer session where the public will have the opportunity to ask questions about the project after the presentation. Following the question-and-answer session, the public will have the opportunity to provide oral comments on the Draft PEA. The opportunity to provide oral comment will be given in the order that the requests are received. Comments should be limited to three minutes and must be reserved to the topic of the Draft PEA. Commenters who may need longer than three minutes are strongly encouraged to submit a written comment. The FAA will accept written comments until May 30, 2024. The FAA will not respond to oral comments during the virtual public meeting, but will review and respond to oral comments in the same fashion as written comments in preparing the Final PEA.

The U.S. Department of Transportation is committed to providing equal access to this meeting for all participants. If you need alternative formats or services because of a disability, such as sign language, interpretation, or other ancillary aids, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

Comments Invited

The FAA invites interested stakeholders to submit comments on the Draft PEA, as specified in the **ADDRESSES** section of this Notice. The most helpful comments reference a specific recommendation, explain the reason for any recommended change, and include supporting information. The FAA will consider all comments received or post-marked on or before the closing date. The FAA will also consider late filed comments if it is possible to do so without incurring expense or delay.

Issued in Washington, DC, on May 7, 2024.

Derek W. Hufty,

Manager, General Aviation and Commercial Branch, Emerging Technologies Division, Office of Safety Standards, Flight Standards Service.

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Office of Commercial Space Transportation; Notice of Intent To Prepare an Environmental Impact Statement (EIS), Open a Public Scoping Period, and Hold Public Scoping Meetings

AGENCY: The Federal Aviation Administration (FAA), National Aeronautics and Space Administration (NASA), Fish and Wildlife Service (USFWS), National Park Service (NPS), Coast Guard (USCG), and Department of the Air Force (DAF).

ACTION: Notice of Intent to prepare an EIS, open a public scoping period, and hold public scoping meetings.

SUMMARY: This Notice provides information to Federal, State, and local agencies; Native American tribes; and other interested persons regarding the FAA's intent to prepare an EIS to evaluate the potential environmental impacts of issuing a commercial launch Vehicle Operator License to SpaceX for the Starship-Super Heavy launch vehicle at Launch Complex 39A (LC–39A) at Kennedy Space Center (KSC), Florida. SpaceX proposes to construct launch, landing, and other associated infrastructure at and in proximity to LC–39A. The proposal would also include Starship-Super Heavy launches at LC–39A; recoverable Super Heavy booster and Starship landings at LC–39A or on a droneship; and expendable Super Heavy booster and Starship landings in the ocean. The FAA will prepare the EIS in accordance with the National Environmental Policy Act of 1969, the Council on Environmental Quality Regulations for Implementing the Procedural Provisions of NEPA, and FAA Order 1050.1F, *Environmental Impacts: Policies and Procedures,* as part of its licensing process. Additional information is available online at: *https://www.faa.gov/space/stakeholder_engagement/spacex_starship_ksc.*

DATES: The FAA invites interested agencies, organizations, Native American Tribes, and members of the public to submit comments to inform the FAA on the significant issues to be analyzed in depth in the EIS (*e.g.,* range of actions, alternatives, environmental impacts). The public scoping period starts with the publication of this Notice in the **Federal Register**. To ensure sufficient time to consider issues identified during the public scoping period, comments should be submitted by one of the methods listed under **ADDRESSES** no later than June 24, 2024. All comments will receive the same attention and consideration in the preparation of the EIS.

ADDRESSES: Comments, statements, or questions concerning scoping issues must be identified with the Docket Number FAA–2024–1395 and may be provided to the FAA as follows:

- *Federal E-Rulemaking Portal: http://www.regulations.gov.* Retrieve the docket by conducting a search for ''FAA–2024–1395'' and follow the online instructions for submitting comments. Please note that the FAA will post all comments on the internet without changes, including any personal information provided.
- By U.S. mail to Ms. Eva Long, FAA Environmental Protection Specialist, c/o Leidos, 2877 Guardian Lane, Virginia Beach, VA 23452.

We encourage you to submit comments electronically through the Federal E-Rulemaking Portal. If you submit your comments electronically, it is not necessary to also submit a hard copy. All comments received will be posted without change to *http://www.regulations.gov.* Before including your address, phone number, email address, or other personal identifying information in your comment, be advised that your entire comment—including any personal identifying information you provide—may be publicly available at any time. While you can request in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

SUPPLEMENTARY INFORMATION:

Background

When fully operational, SpaceX proposes that the Starship-Super Heavy launch vehicle will offer a heavy lift platform that expands the company's ability to execute the totality of its current and expected future customers' requirements. By providing a reusable launch vehicle, SpaceX proposes that the Starship-Super Heavy would deliver efficient access to space and enable cost-effective delivery of cargo and people to the moon and Mars. Currently, SpaceX is conducting flight tests of the Starship-Super Heavy at Starbase in Boca Chica, Texas, an exclusive use launch site that serves as SpaceX's primary research, development, and flight test launch facility for the vehicle.

In September 2019, NASA completed the *Final Environmental Assessment for the SpaceX Starship and Super Heavy Launch Vehicle at Kennedy Space Center (KSC)* (''2019 EA'') to evaluate the potential environmental impacts

resulting from construction and operations associated with utilization of LC–39A for the SpaceX Starship-Super Heavy launch vehicle in practical applications. LC–39A is a SpaceX-leased launch site located on northern KSC property, approximately 3 miles east of NASA's Vehicle Assembly Building. LC–39A currently supports SpaceX Falcon 9 and Falcon Heavy launches.

The 2019 EA established the purpose and need for Starship-Super Heavy at KSC and LC–39A, which was to develop and implement formal agreements with SpaceX for use of NASA assets and to provide services and commodities to enable Starship-Super Heavy launches. Commercial use of KSC real property supports NASA's mandate to encourage the fullest commercial use of space, supports the goals of the National Aeronautics and Space Act, and advances the National Space Policy that Federal agencies shall ensure that United States (U.S.) Government space technology and infrastructure is made available for commercial use on a reimbursable, noninterference, and equitable basis. The need for Starship-Super Heavy at KSC aligns with NASA's Commercial Space Launch Act, as amended, which is to support the U.S. goal of encouraging activities by the private sector to strengthen and expand U.S. space transportation infrastructure.

NASA is seeking the support of the Starship-Super Heavy at KSC in its continued mission to expand commercial uses of space and the space industry by facilitating SpaceX efforts to strengthen U.S. space transportation and launch infrastructure and providing greater mission capability to NASA and SpaceX by continuing the development of ever evolving next generation launch vehicles and spacecraft. Additionally, NASA is seeking the support of the Starship-Super Heavy in meeting the U.S. goal of near-term lunar exploration, such as the NASA Artemis and Human Landing System (HLS) programs.

SpaceX proposes that the Starship-Super Heavy at KSC serves to increase the company's operational portfolio diversity (*i.e.,* the ability to support multiple customer missions at different locations) and capabilities through multiple Starship-Super Heavy launch sites, reduce space transportation costs (including within the Artemis and HLS programs), enhance exploration, support national leadership in space, and make space access more affordable.

Within the context of the 2019 EA, the scope of the Proposed Action was defined as infrastructure development and Starship-Super Heavy operations. Infrastructure development included construction of a launch mount for the Starship and Super Heavy Booster, a liquid methane farm, transport road leading from the pad entrance gate to the launch mount, high-pressure gaseous commodity lines, a deluge water system, and a landing zone (including pad). The 2019 EA assessed approximately 24 Starship-Super Heavy launches per year, including lunar and Mars missions, satellite payload missions, and human spaceflight. Starship design at the time of the 2019 EA consisted of seven raptor engines, while the Super Heavy booster consisted of 31 Raptor engines. Starship landing locations included Landing Zone 1 at Cape Canaveral Space Force Station (CCSFS), downrange on a droneship (converted barge), and a new landing pad at LC–39A. Landings for Super Heavy, the first stage booster, were proposed to occur downrange on a droneship. Super Heavy booster returns to LC–39A were not considered in the 2019 EA. NASA's resultant Finding of No Significant Impact (FONSI) issued on September 19, 2019, concluded that the environmental impacts associated with Starship-Super Heavy infrastructure development and operations, within the scope of the 2019 EA, would not individually or cumulatively have a significant impact on the quality of the biological or physical environment.

Since 2019, SpaceX has undertaken infrastructure improvements at LC–39A (*e.g.,* construction of a launch mount) consistent with the scope of the 2019 EA. However, while the purpose and need for Starship-Super Heavy at LC–39A have not changed, the Starship-Super Heavy concept of operations has evolved from the original 2019 EA scope. SpaceX now proposes to construct additional launch infrastructure not previously contemplated in the 2019 EA: a Super Heavy booster catch tower, a natural gas liquefaction system and air separation unit for propellant generation, and stormwater/deluge ponds. SpaceX also proposes to launch an advanced design of the Starship and Super Heavy vehicle (up to nine raptor engines for Starship and up to 35 raptor engines for the Super Heavy booster), operate at a projected higher launch tempo (up to 44 launches per year), and land the Super Heavy booster at LC–39A in support of its reusability concept. Starship landings are no longer proposed to occur at Landing Zone 1 at CCSFS.

In order to conduct Starship-Super Heavy launch and landing operations from LC–39A, SpaceX must obtain a Vehicle Operator License from the FAA. Issuing a Vehicle Operator License and approving associated airspace closures is considered a major Federal action under NEPA. In consideration of SpaceX's revised proposal, NASA, as the land management agency, and FAA, as the licensing agency, have determined that an EIS is the appropriate level of NEPA analysis to address the adjusted scope of Starship-Super Heavy at LC–39A. SpaceX will prepare this EIS under the supervision of the FAA which will serve as the lead agency at NASA's request (see 40 CFR 1506.5).

The EIS will consider the potential environmental impacts of the Proposed Action and the No Action Alternative. The successful completion of the environmental review process does not guarantee that the FAA would issue a Vehicle Operator License. The project must also meet all FAA safety, risk, and indemnification requirements for the appropriate license.

Proposed Action

The FAA's Federal Action would include (1) issuing a Vehicle Operator License to SpaceX, as well as potential future renewals or modifications to the Vehicle Operator License for operations that would be within the scope analyzed in the EIS; and (2) developing one or more formal agreements with SpaceX to outline notification procedures prior to, during, and after an operation including Notice to Air Missions (NOTAM), as well as issuing temporary airspace closures to ensure public safety in accordance with FAA Order 7400.2M, *Procedures for Handling Airspace Matters.*

SpaceX's Proposed Action within the context of this EIS consists of the totality of Starship-Super Heavy infrastructure improvements and operations, to include those identified in the 2019 EA, as well as those adjusted scope elements described previously. This includes up to 44 Starship-Super Heavy launches per year. Launches may occur during the day or at night. Each Starship-Super Heavy orbital launch would include either landing the Super Heavy booster at LC–39A or downrange in the Atlantic Ocean on a droneship or expending the booster in the Atlantic Ocean, no closer than approximately 5 nautical miles off the coast. Starship could also land at LC–39A or on a droneship or be expended in the high seas between 55 degrees south latitude and 55 degrees north latitudes. SpaceX would continue to launch Falcon 9 and Falcon Heavy missions at LC–39A while Starship-Super Heavy is operational.

While infrastructure improvements consistent with the 2019 EA are already

underway, additional infrastructure improvements at LC–39A associated with the evolved Starship-Super Heavy program to be addressed in this EIS include, but are not limited to, a Super-Heavy catch tower; onsite facilities for propellant generation and propellant storage (*e.g.,* natural gas pretreatment system and methane liquefier); cooling tower; air separation unit; and deluge system.

The potential environmental impacts of all proposed construction and operational activities, including those from launch and landing, will be analyzed in the EIS. The EIS will evaluate the potential environmental impacts associated with air quality; biological resources (including fish, wildlife, and plants); climate; coastal resources; Department of Transportation Act, Section 4(f); farmlands; hazardous materials, solid waste, and pollution prevention; historical, architectural, archeological and cultural resources; land use; natural resources and energy supply; noise and noise-compatible land use; socioeconomics, environmental justice, and children's health and safety risks; visual effects; and water resources (including wetlands, floodplains, surface waters, groundwater, and wild and scenic rivers). This analysis will consist of an evaluation of potential direct and indirect impacts and will account for cumulative impacts from other relevant activities in the vicinity of the action.

Concurrent with the NEPA process, the FAA is initiating National Historic Preservation Act section 106 Consultation to determine the potential effects of the Proposed Action on historic properties. Additionally, the FAA is consulting with the USFWS under section 7 of the Endangered Species Act (ESA) regarding potential impacts on federally listed threatened and endangered species. The FAA is also consulting with the National Marine Fisheries Service under section 7 of the ESA and the Marine Mammal Protection Act for potential impacts on protected marine species. Pursuant to the U.S. Department of Transportation Act of 1966, this EIS will comply with the requirements of section 4(f) of the Act, as applicable.

Alternatives

The Council on Environmental Quality defines ''reasonable alternatives'' as those ''that are technically and economically feasible and meet the purpose and need for the proposed action.'' (40 CFR 1508.1(z)). Through an alternative screening process based on Starship-Super Heavy requirements and the purpose and need, the 2019 EA established LC–39A as the approved location for Starship-Super Heavy operations, and infrastructure development based on NASA's 2019 FONSI is already underway. LC–39A could provide time-critical mission capability to NASA and commercial pursuits via the Starship-Super Heavy. In addition to existing launch infrastructure, LC–39A could provide launch site diversity for Starship-Super Heavy to meet the purpose and need for near-term lunar exploration under the NASA Artemis and HLS programs.

Given the above, the only alternative to the Proposed Action as described in this EIS is the No Action Alternative. Under the No Action Alternative, FAA would not issue a Vehicle Operator License for Starship-Super Heavy operations at LC–39A. SpaceX would not implement further improvements or launch Starship-Super Heavy from LC–39A. Potential impacts associated with the No Action Alternative will be analyzed in this EIS.

Scoping Meetings

FAA will hold three IN-PERSON scoping meetings and one VIRTUAL public scoping meeting. The meetings will allow the public to receive information on the Proposed Action, meet lead and cooperating agency representatives, and provide comments to the record.

The IN-PERSON meetings will be held on June 12, 2024, and June 13, 2024. The June 12, 2024, meetings will be held from 2 p.m.–4 p.m. and 6 p.m.–8 p.m. (Eastern) at the Radisson Cape Canaveral, 8701 Astronaut Blvd., Cape Canaveral, Florida 32920. The June 13, 2024, meeting will be held from 6 p.m.–8 p.m. (Eastern) at the Kennedy Space Center Visitor Complex, Space Commerce Way, Merritt Island, Florida 32953. All meetings will consist of an open house information-station format wherein the FAA will provide information describing the purpose of the scoping meetings, project schedule, opportunities for public involvement, Proposed Action and alternatives summary, and environmental resource area summary. Fact sheets will be made available containing similar information. At any time during the meetings, the public will have the opportunity to provide verbal comments to a court reporter or written comments via a written comment form at one of several commenting stations. English-Spanish translation services will be provided at the in-person meetings.

The VIRTUAL meeting will be held on June 17, 2024; 6 p.m.–8 p.m. (Eastern); the URL and call-in number for the meeting will be provided in advance on the FAA's project website *https://www.faa.gov/space/stakeholder_engagement/spacex_starship_ksc.* The virtual meeting will consist of a closed-captioned auto-run presentation describing the purpose of the scoping meetings, project schedule, opportunities for public involvement, Proposed Action and alternatives summary, and environmental resource area summary. Presentations will be run at the beginning of each hour. Members of the public may provide written comments via the chat function during the presentation and for the remainder of each hour. Verbal comments up to three minutes can be given after the completion of each presentation. A moderator will facilitate verbal comments. English-Spanish translation services for verbal comments will be provided. Both English and Spanish versions of the presentation will be made available to the public on FAA's project website.

More information regarding the scoping meetings, along with any published scoping materials, is available on FAA's project website at *https://www.faa.gov/space/stakeholder_engagement/spacex_starship_ksc.*

Issued in Washington, DC.

Daniel P. Murray,

Executive Director, Office of Operational Safety.

[FR Doc. 2024–10149 Filed 5–9–24; 8:45 am]

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

[Docket No. FHWA–2024–0038]

Agency Information Collection Activities: Notice of Request for Reinstatement of a Previously Approved Information Collection

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of request for reinstatement of a previously approved information collection.

SUMMARY: The FHWA invites public comments about our intention to request the Office of Management and Budget's (OMB) approval for reinstatement of an existing information collection that is summarized below under **SUPPLEMENTARY INFORMATION**. We are required to publish this notice in the **Federal Register** by the Paperwork Reduction Act of 1995.

DATES: Please submit comments by July 9, 2024.

ADDRESSES: You may submit comments identified by DOT Docket ID Number 0038 by any of the following methods:

Website: For access to the docket to read background documents or comments received go to the Federal eRulemaking Portal: Go to *http://www.regulations.gov.* Follow the online instructions for submitting comments.

Fax: 1–202–493–2251.

Mail: Docket Management Facility, U.S. Department of Transportation, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590–0001.

Hand Delivery or Courier: U.S. Department of Transportation, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590, between 9 a.m. and 5 p.m. ET, Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Mr. Paul Foundoukis, (785) 273–2655, Department of Transportation, Federal Highway Administration, Highway Systems Performance (HPPI–20), Office of Highway Policy Information, Office of Policy & Governmental Affairs, 1200 New Jersey Avenue SE, Washington, DC 20590. Office hours are from 7:30 a.m. to 4 p.m., Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION:

Title: Highway Performance Monitoring System (HPMS).

OMB Control: 2125–0028.

Background: The HPMS data that is collected is used for management decisions that affect transportation, including estimates of the Nation's future highway needs and assessments of highway system performance. The information is used by the FHWA to develop and implement legislation and by State and Federal transportation officials to adequately plan, design, and administer effective, safe, and efficient transportation systems. This data is essential to the FHWA and Congress in evaluating the effectiveness of the Federal-aid highway program. The HPMS also provides mile and lane-mile components of the Federal-Aid Highway Fund apportionment formulae. The data that is required by the HPMS is continually reassessed and streamlined by the FHWA. The process has recently been updated to enable the transactional submission of many data items, thereby reducing the need to submit redundant data each year.

Respondents: State governments of the 50 States, the District of Columbia, and the Commonwealth of Puerto Rico.

Frequency: Annually.

Estimated Average Burden per Response: The estimated average burden per response for the annual collection and processing of the HPMS data is 2,000 hours for each State, the District of Columbia, and the Commonwealth of Puerto Rico.

Estimated Total Annual Burden Hours: The estimated total annual burden for all respondents is 104,000 hours.

Public Comments Invited: You are asked to comment on any aspect of this information collection, including: (1) Whether the proposed collection is necessary for the FHWA's performance; (2) the accuracy of the estimated burdens; (3) ways for the FHWA to enhance the quality, usefulness, and clarity of the collected information; and (4) ways that the burden could be minimized, including the use of electronic technology, without reducing the quality of the collected information. The agency will summarize and/or include your comments in the request for OMB's clearance of this information collection.

Authority: The Paperwork Reduction Act of 1995; 44 U.S.C. chapter 35, as amended; and 49 CFR 1.48.

Issued on: May 7, 2024.

Jazmyne Lewis,

Information Collection Officer.

BILLING CODE 4910–22–P

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

[Docket No. FMCSA–2022–0243]

Parts and Accessories Necessary for Safe Operation; Application for an Exemption From Gemini Motor Transport LP, USDOT# 913300

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), Department of Transportation (DOT).

ACTION: Notice of final disposition; grant of exemption.

SUMMARY: The Federal Motor Carrier Safety Administration (FMCSA) announces its decision to grant Gemini Motor Transport LP's, USDOT No. 913300, (Gemini) application for an exemption to allow it to operate commercial motor vehicles (CMVs) equipped with a module manufactured by Intellistop, Inc. (Intellistop). The Intellistop module is designed to pulse the required rear clearance, identification, and brake lamps from a lower-level lighting intensity to a higher-level lighting intensity 4 times in 2 seconds when the brakes are applied and then return the lights to a steady-burning state while the brakes remain engaged. The Agency has determined that granting the exemption to Gemini, an individual, easily identifiable motor carrier operating a finite number of CMVs, would likely achieve a level of safety equivalent to, or greater than, the level of safety achieved by the regulation.

DATES: This exemption is effective May 10, 2024 and ending May 12, 2029.

FOR FURTHER INFORMATION CONTACT: Mr. David Sutula, Vehicle and Roadside Operations Division, Office of Carrier, Driver, and Vehicle Safety, MC–PSV, (202) 366–9209, Federal Motor Carrier Safety Administration, 1200 New Jersey Avenue SE., Washington, DC 20590–0001; *MCPSV@dot.gov.*

I. Viewing Comments and Documents

To view comments, go to *www.regulations.gov,* insert the docket number ''FMCSA–2022–0243'' in the keyword box, and click ''Search.'' Next, sort the results by ''Posted (Newer-Older),'' choose the first notice listed, and click ''Browse Comments.''

To view documents mentioned in this notice as being available in the docket, go to *www.regulations.gov,* insert the docket number ''FMCSA–2022–0243'' in the keyword box, click ''Search,'' and choose the document to review.

If you do not have access to the internet, you may view the docket online by visiting Dockets Operations on the ground floor of the DOT West Building, 1200 New Jersey Avenue SE, Washington, DC 20590, between 9 a.m. and 5 p.m. ET, Monday through Friday, except Federal holidays. To be sure someone is there to help you, please call (202) 366–9317 or (202) 366–9826 before visiting Dockets Operations.

II. Legal Basis

FMCSA has authority under 49 U.S.C. 31136(e) and 31315(b) to grant exemptions from certain parts of the FMCSRs if it ''finds such exemption would likely achieve a level of safety that is equivalent to, or greater than, the level that would be achieved absent the exemption.'' FMCSA must publish a notice of each exemption request in the **Federal Register** and provide the public an opportunity to inspect the information relevant to the application, including the applicant's safety analysis, and an opportunity for public comment on the request (49 U.S.C. 31315(b)(6)(A); 49 CFR 381.315(a).

The Agency reviews safety analyses and public comments submitted and determines whether granting the exemption would likely achieve a level

of safety equivalent to, or greater than, the level that would be achieved by the current regulation (49 CFR 381.305). The decision of the Agency must be published in the **Federal Register** (49 CFR 381.315(b)) with the reasons for denying or granting the application and, if granted, the name of the person or class of persons receiving the exemption, and the regulatory provision from which the exemption is granted. The notice must also specify the effective period and explain the terms and conditions of the exemption. Granted exemptions may be renewed (49 CFR 381.300(b)).

III. Background

A. Current Regulatory Requirements

Section 393.25(e) of the Federal Motor Carrier Safety Regulations (FMCSRs) requires all exterior lamps (both required lamps and any additional lamps) to be steady-burning, with certain exceptions not relevant here. Two other provisions of the FMCSRs—section 393.11(a) and section 393.25(c)—mandate that required lamps on CMVs meet the requirements of Federal Motor Vehicle Safety Standard (FMVSS) No. 108 in effect at the time of manufacture. FMVSS No. 108, issued by the U.S. Department of Transportation's National Highway Traffic Safety Administration (NHTSA), includes a requirement that installed brake lamps, whether original or replacement equipment, be steady burning.

B. Applicant's Request

Gemini applied for an exemption from 49 CFR 393.25(e) to allow it to operate CMVs, equipped with Intellistop's module. When the brakes are applied, the Intellistop module is designed to pulse the rear clearance, identification, and brake lamps from a lower-level lighting intensity to a higher-level lighting intensity 4 times in 2 seconds and then maintain the original equipment manufacturer's (OEM) level of illumination for those lamps until the brakes are released and reapplied. Intellistop asserts that its module is designed to ensure that if the module ever fails, the clearance, identification, and brake lamps will default to normal OEM function and illumination.

Gemini's application followed the Agency's October 7, 2022 (87 FR 61133), denial of Intellistop's application for an industry-wide exemption to allow all interstate motor carriers to operate CMVs equipped with the Intellistop module. While the Agency determined that the scope of the exemption Intellistop sought was too broad to ensure that an equivalent level of safety would be achieved, the Agency explained that individual motor carrier applications for exemption may be more closely aligned with FMCSA authorities. Exemptions more limited in scope would allow the Agency to ensure compliance with all relevant FMCSA regulations because the individual exemptee would be easily identifiable and its compliance with applicable regulations could be monitored, thus providing a level of safety equivalent to compliance with 49 CFR 393.25(e).

Gemini stated that previous research demonstrated that the use of pulsating brake-activated lamps increases the visibility of vehicles and should lead to a significant decrease in rear-end crashes. In support of its application, Gemini submitted several reports of research conducted by the National Highway Traffic Safety Administration (NHTSA), another agency in the U.S. Department of Transportation, on the issues of rear-end crashes, distracted driving, and braking signals.[1] [2] [3] This same body of research was also referenced in Intellistop's industry-wide exemption application. Relying on these studies, Gemini stated that the addition of brake-activated pulsating lamp(s) will not have an adverse impact on safety and would likely maintain a level of safety equivalent to or greater than the level of safety achieved without the exemption.

A copy of the application is included in the docket referenced at the beginning of this notice.

IV. Comments

FMCSA published a notice of the application in the **Federal Register** on February 1, 2023, and asked for public comment (88 FR 6805). The Agency received 26 comments from the American Trucking Associations (ATA); Intellistop, Inc.; the National Truck Equipment Association (NTEA); the Transportation Safety Equipment Institute (TSEI); and 22 other commenters. Twenty-five of the commenters favored the exemption application, while TSEI expressed concerns.

TSEI reiterated comments it had previously made in support of the safety benefits of brake-activated warning lamps when used in conjunction with steady burning red brake lamps as well as its prior support of the exemption requests from Groendyke, NTTC, and Grote. Despite these previous expressions of support for the potential benefits of some brake warning lamp configurations, TSEI stated that it is concerned about any exemption permitting the pulsing of lamps that are currently required to be steady burning without a thorough consideration of safety data and research. TSEI stated that the aim of future rulemaking should be to ensure consistent application across all vehicles equipped with such pulsating lamps and recommended that the Agency engage in a formal rulemaking to amend Part 393 to allow for pulsating brake lamps.

ATA supported Gemini's request and stated that enhanced rear signaling (ERS) can provide functionality beyond what traditional CMV lighting and reflective devices offer, including drawing attention to CMVs stopped ahead; increasing awareness of roadside breakdowns; notification of emergency braking; and improving driver confidence from both vehicles. ATA also stated that, in addition to these safety benefits, ERS performance is superior to that of steady-burning brake lamps in conditions of severe weather, taillight glare, and around infrastructure obstacles. Specifically, ATA noted that this ''request by Gemini presents another opportunity for the DOT to learn about the performance of ERS in real world applications.'' Further, ATA stated that ''[it] believes the exemption process is well-suited for these kinds of situations, where the DOT can monitor small, controlled deployments to learn about benefits and costs and gather important data to make sound judgments on a broader industry exemption or change in regulations.''

ATA recommended the Agency provide clear guidance in the terms and conditions of the exemption grant to aid the Agency in monitoring the exemption for unintended consequences and aid the Applicant in understanding expectations for potential renewal of the exemption application. ATA further commented that FMCSA should work with industry to develop research efforts that examine the performance of ERS to supplement future DOT decisions on ERS technologies. and aid the Applicant

[1] See NHTSA Study—Evaluation of Enhanced Brake Lights Using Surrogate Safety Metrics *https://www.nhtsa.gov/sites/nhtsa.dot.gov/files/811127.pdf*; As part of the General Findings the NHTSA study report concluded that ''rear lighting continues to look promising as a means of reducing the number and severity of rear-end crashes.''

[2] See also NHTSA Study—Enhanced Rear Lighting and Signaling Systems *https://tinyurl.com/y2romx76* or *https://www.nhtsa.gov/sites/nhtsa.dot.gov/files/task_3_results_0.pdf*; As part of the conclusions NHTSA found that enhanced, flashing brake lighting ''demonstrated improvements in brake response times and other related performance measures.''

[3] See also NHTSA—Traffic Safety Facts *https://tinyurl.com/yxglsdax* or *https://www.nhtsa.gov/sites/nhtsa.dot.gov/files/tsf811128.pdf*; which concluded that flashing brake lights were a promising signal for improving attention-getting during brake applications.

in understanding expectations for potential renewal of the exemption application. ATA further commented that FMCSA should work with industry to develop research efforts that examine the performance of ERS to supplement future DOT decisions on ERS technologies.

The NTEA supported the Agency's authority to grant a temporary exemption. The NTEA, however, expressed concern that some of its members who are manufacturers and alterers of motor vehicles may receive requests from fleet operators to install brake-activated pulsating warning lamps on certain new vehicles they construct or modify. As manufacturers of new motor vehicles, NTEA members are required to certify these vehicles to applicable NHTSA Federal Motor Vehicle Safety Standards (FMVSS). NTEA noted that FMCSA does not have the authority to exempt CMV manufacturers from their obligation to certify FMVSS compliance. It recommended the Agency clarify in the terms and conditions of the exemption the responsibilities of carriers, manufacturers, and repair facilities, and the limitations and the conditions under which modifications may be made. NTEA specifically requested that FMCSA ''make clear that [this] exemption does not currently change any NHTSA regulations applying to the certification of federal motor vehicle safety standards,'' if it grants the exemption.

Intellistop supported the Applicant's request for exemption. It commented that for over 20 years, multiple States have allowed pulsing or flashing of brake lamps. Intellistop also asserted many State driver training schools recommend tapping brakes to warn other drivers when a CMV is slowing or stopping. Intellistop stated that it is unlikely that other motorists would confuse the use of their module with the recommendation to tap brakes when a CMV is slowing or stopping, as ''[s]eeing brake lights flash is a commonly communicated method to alert other drivers that a vehicle is slowing down or stopping.''

Twenty-one additional comments were submitted in support of granting the exemption. These commenters believe that any technology that has been shown to reduce rear-end crashes should be allowed and cited various benefits of brake activated pulsating lamps, including (1) enhanced awareness that the vehicle is making a stop, especially at railroad crossings, and (2) increased visibility in severe weather conditions. Several commenters noted that 37 States currently allow brake lamps to flash. In addition, three commenters noted that the guidelines developed by the American Driver and Traffic Safety Education Association advise driving instructors to teach new drivers to pulse brake lamps when stopping to improve visibility.

V. FMCSA Equivalent Level of Safety Analysis

Gemini petitions FMCSA to grant an exemption from 49 CFR 393.25(e)—requiring certain exterior lamps to be steady burning—to allow it to operate CMVs equipped with Intellistop's module. FMCSA has determined that in order for Gemini to operate vehicles in compliance with the FMCSRs, an exemption from 49 CFR 393.25(e) must be accompanied by limited exemptions from 49 CFR 393.11(a) and 393.25(c), both of which mandate that required lamps on CMVs operated in interstate commerce must, ''at a minimum, meet the applicable requirements of 49 CFR 571.108 (FMVSS No. 108) in effect at the time of manufacture of the vehicle.'' FMCSA grants exemptions only when it determines ''such exemption[s] would likely achieve a level of safety that is equivalent to, or greater than, the level that would be achieved absent the exemption[s].''

Rear-end crashes generally account for approximately 30 percent of all crashes. They often result from a failure to respond (or delays in responding) to a stopped or decelerating lead vehicle. Data on crashes that occurred between 2010 and 2016 show that large trucks are consistently three times more likely than other vehicles to be struck in the rear in two-vehicle fatal crashes.[4] [5] FMCSA is deeply interested in the development and deployment of technologies that can reduce the frequency, severity, and risk of rear-end crashes.

Both FMCSA and NHTSA have examined alternative rear-signaling systems to reduce the incidence of rear-end crashes. While research efforts concluded that improvements in the incidence of rear-end crashes could be realized through certain rear-lighting systems that flash,[6] the FMCSRs do not currently permit the use of pulsating, brake-activated lamps on the rear of CMVs. FMCSA believes that the two agencies' previous research programs demonstrate that rear-signaling systems may be able to ''improve attention getting'' to reduce the frequency and severity of rear-end crashes. Any possible benefit must be balanced against a possible risk of increased driver distraction and confusion. In balancing these interests, the Agency was compelled to deny the Intellistop application for exemption because the industry-wide scope of the request was too broad for the Agency to effectively monitor for the potential risk of driver distraction or confusion.

The Agency acknowledges the limitations of the research studies completed to date and the overall data deficiencies in this area. Nonetheless, as noted in its Intellistop decision, the Agency recognizes that existing data do suggest a potential safety value in the use of alternative rear-signaling systems, generally. Specifically, FMCSA considered NHTSA's research concerning the development and evaluation of rear-signaling applications designed to reduce the frequency and severity of rear-end crashes via enhancements to rear-brake lighting. The study examined enhancements for (1) redirecting drivers' visual attention to the forward roadway (for cases involving a distracted driver) and (2) increasing the saliency or meaningfulness of the brake signal (for inattentive drivers).[7] The research considered the attention-getting capability and discomfort glare of a set of candidate rear brake lighting configurations using driver judgments and eye-drawing metrics. The results of this research served to narrow the set of candidate lighting configurations to those that would most likely be carried forward for additional on-road study. Based on subjective participant responses, this research indicates some form of flashing or variation in brake light brightness may be more than two times more attention-getting than the baseline, steady-burning brake lights for distracted drivers.[8]

[8] Ibid. While data demonstrated that brighter flashing lights were the most attention-getting combination for distracted drivers in this study, flashing lights with no increase in brightness were still more effective at capturing a distracted driver's attention than the baseline steady-burning brake

Continued

While some of the data collected in the study may not be statistically significant, the study results nonetheless indicate that additional efforts to get drivers' attention when they are approaching the rear of a CMV that is stopping may be helpful to reduce driver distraction and, ultimately, rear-end crashes. This was among several reasons why researchers concluded that the promising nature of enhanced brake lighting systems warranted additional work and research. FMCSA believes the acquisition of relevant data through real-world monitoring is of critical importance as the Agency continues to seek new and innovative options for reducing crashes. This is particularly true given the data limitations noted in previous studies.

Despite finding a potential safety value in the use of alternative rear-signaling technology, in the Intellistop decision the Agency determined that the data presently available did not justify an exemption to allow all interstate motor carriers to alter the performance of an FMVSS-required lighting device (*i.e.,* stop lamps) on any CMV. In contrast, however, Gemini's application requests an exemption from the steady-burning brake lamp requirement for CMV operations by only one interstate motor carrier. As FMCSA noted in its denial of Intellistop's industry-wide exemption application, individual motor carrier exemption requests more closely align with FMCSA and NHTSA authorities to ensure compliance with all other applicable regulations and with the safety performance of the smaller population of affected motor carriers. With an individual motor carrier exemption, the Agency can also more easily monitor compliance with terms and conditions intended to ensure operations conducted under the exemption do in fact provide an equivalent level of safety. Gemini's application demonstrates why this is particularly true, since the vehicles operated by Gemini under the exemption would be easily identifiable, and compliance with NHTSA's ''make inoperative'' prohibition and other related regulations could be readily checked.

The Agency's decision to grant this exemption is based on the data suggesting enhanced rear signal systems, such as pulsing brake lights, may help reduce the frequency and severity of rear-end crashes, as well as on the limited number of vehicles operating under the exemption. Gemini currently operates a nationwide fleet of approximately 1,200 vehicles, primarily fuel haulers. The installation of the module on a finite number of CMVs operated by a single motor carrier provides the opportunity for the Agency to collect data on the effects of pulsing brake lights in real-world conditions. The terms and conditions FMCSA imposes through this exemption will ensure appropriate Federal oversight in the use of these devices on a finite number of CMVs utilizing a phased in approach.

Initially restricting the application of this exemption to a limited portion of Gemini's fleet will allow for a comparison between the crash involvement of Gemini CMVs equipped with the Intellistop device, those without the device, and the overall crash involvement of CMVs operated by similarly sized motor carriers with similar operations and overall safety performance. Data collected through this exemption and any other similar exemptions the Agency may grant in the future will allow for an evaluation of how the Intellistop module may improve following vehicle driver responses to CMV braking. Consideration of the scope of any particular carrier's operation and the number and types of vehicles the carrier operates are critical to ensuring FMCSA gathers the most relevant data as the Agency considers safety benefits gained by the deployment of these rear brake lamp systems in CMV operations. The Agency's incremental approach in granting this limited exemption will also allow FMCSA to investigate and respond as appropriate to any incidents of alleged driver confusion attributable to use of the brake lamp systems in CMV operations, which some commenters have raised as a potential concern.

FMCSA acknowledges that all other pulsating rear lamp exemptions the Agency previously granted involved the addition of non-mandatory auxiliary lights while the Intellistop module that Gemini seeks to install alters the functionality of original equipment manufacturers' lamps. Nonetheless, those previous exemptions are instructive, most notably Groendyke.

The Groendyke exemption involved auxiliary lamps rather than required lighting, but, like the Intellistop module, the modulation of the auxiliary lamps in the Groendyke exemption occurs during braking. More importantly, Groendyke also involved a technology with limited supporting data being installed on a finite number of CMVs of a single motor carrier, which allowed the Agency more realistically to monitor the exemptee's compliance with other applicable regulations. When granting the exemption, FMCSA found Groendyke's experience with brake-activated pulsating warning lamps, which resulted in a 33.7 percent reduction in rear-end crashes, to be compelling. Through the granting of the Groendyke exemption, the Agency was able to collect additional valuable real-world data about the operation of the module at issue. Similarly, limited exemptions with narrowly tailored terms and conditions permitting the use of the Intellistop module will allow the Agency to collect data about the reliability and safety benefits of an integrated alternative rear-signaling system.

FMCSA notes that Gemini failed to provide any evidence beyond what is publicly available about the integration of the Intellistop module with its CMVs' existing systems or to support the claim that a malfunction of the device would result in the brake lights returning to OEM functionality. Nonetheless, based on the Agency's understanding of the device's design and assertions made in publicly available materials, FMCSA believes concerns about both the reliability and integration of the device are sufficiently alleviated in this instance because of the narrow scope of the exemption and the stringent requirements imposed by the Agency in the terms and conditions. Any evidence that module failure results in anything less than a return to brake light OEM functionality will result in revocation of the exemption.

Likewise, granting this exemption to an easily identifiable carrier alleviates concerns the Agency previously articulated about its inability to monitor compliance with NHTSA's ''make inoperative'' prohibition. FMCSA can monitor compliance with this exemption and ensure that only Gemini installs the module on its own CMVs.

Notwithstanding the promise the Agency sees in this technology, exemptions are warranted only if the applicant can demonstrate that an equivalent level of safety likely will be maintained. For this reason, the Agency believes it is important to consider the safety record of the applicant motor carrier. Gemini's existing on-road safety performance record warrants granting this exemption, to collect safety performance data in a limited set of operations. Gemini's out-of-service rate is well below the national average, with a vehicle out-of-service rate of only 3.0 percent (national average—21.4

lamps. Both look-up (eye drawing) data and interview data supported the hypothesis that simultaneous flashing of all rear lighting combined with increased brightness would be effective in redirecting the driver's eyes to the lead vehicle when the driver is looking away with tasks that involve visual load.

percent), a driver out-of-service rate of only 0.4 percent (national average—6 percent), and hazardous material out-of-service rate of 0.2 percent (national average—4.5 percent). Gemini maintains a Satisfactory safety rating.

FMCSA has authority to grant temporary exemptions to the FMCSRs only to motor carriers and not to CMV manufacturers or vehicle alterers. FMCSA acknowledges that the research described above did not fully address all of the implications of allowing pulsating stop lamps, especially by automobiles where stop lamp design is stylized and often brand-specific, and that it remains unclear whether deviation from the uniform brake-light patterns of CMVs may cause confusion among highway users when the lamps are pulsated during braking. When Intellistop sought an industry-wide exemption, FMCSA concluded that the potential risks of widespread adoption outweighed the potential benefits. But FMCSA reaches a different conclusion here, where any risks will be more limited and easier to monitor. FMCSA notes, moreover, that the research suggests that the use of rear-signaling systems may be a means to reduce the frequency and severity of rear-end crashes involving CMVs, as do the reductions in rear-end crashes reported by Groendyke (84 FR 17910, April 26, 2019) utilizing an auxiliary flashing rear-signaling system. These facts and the specific safety record of the applicant motor carrier support the conclusion that permitting the use of Intellistop's pulsating-lamp module among a finite number of vehicles of a single motor carrier, subject to terms and conditions for monitoring, is likely to achieve a level of safety that is equivalent to, or greater than, the level of safety achieved without the exemption.

VII. Exemption Decision

a. Grant of Exemption

FMCSA has evaluated Gemini's exemption application and the comments received. The Agency believes that granting a temporary exemption to 393.25(e), and temporary limited exemptions to the requirements of 49 CFR 393.11(a) and 393.25(c) to allow Gemini to operate a defined and limited number of CMVs equipped with Intellistop's pulsating-brake module will likely achieve a level of safety that is equivalent to, or greater than, the level of safety achieved without the exemption.

This exemption is restricted to a finite number of vehicles in Gemini's fleet and provides relief from the steady burning requirement for rear clearance, identification, and brake lamp activation for 2 seconds following brake activation. All other FMVSS No. 108 requirements cross-referenced or incorporated within the FMCSRs remain in effect, with a limited exception to the requirement exempted here in 393.11(a) and 393.25(c) for only the first two seconds of brake engagement. In addition, through the terms and conditions, FMCSA will be able to monitor to performance of these CMVs to determine whether they were involved in a crash and whether they appear to be overrepresented in crashes compared to a control group (Gemini vehicles that are not equipped with the Intellistop unit but are operating on similar routes with similar schedules, etc.).

The Agency has evaluated the application and hereby grants the exemption for a 5-year period, beginning May 10, 2024 and ending May 12, 2029. During the temporary exemption period, Gemini (Applicant) may operate CMVs, equipped with Intellistop's module that pulses the rear brake, clearance, and identification lamps from a lower-level lighting intensity to a higher-level lighting intensity 4 times in 2 seconds. This grant applies only to the ''steady-burning'' requirement as specified in FMVSS 108 S7.3, and Tables I–a, I–b, and I–c. All other photometric and requirements for stop lamps specified in FMVSS 108 must still be met.

b. Terms and Conditions of the Exemption

(i) Installation of the Intellistop Module

The Applicant is responsible for installing the Intellistop module and assumes any liability for installation of the module. This exemption applies only to CMVs owned and operated by the Applicant. THE PRODUCT MUST BE INSTALLED BY THE OWNER OF THE VEHICLE ONLY. IN ACCORDANCE WITH FEDERAL LAW (49 U.S.C. 30112(a)(1) AND 49 U.S.C. 30122), THE PRODUCT MAY NOT BE INSTALLED BY ANY MANUFACTURER, DISTRIBUTOR, DEALER, RENTAL COMPANY, OR MOTOR VEHICLE REPAIR BUSINESS.

The Applicant may not install the Intellistop module on more than 25% of its power units, and 25% of its trailers during the first year of operation under the exemption, or on more than 50% of its power units, and 50% of its trailers during the second year. The Applicant shall provide the vehicle identification numbers for the power units and trailers that will be operating under the exemption.

The Applicant must maintain a control group of equal size to portion of its power units and trailers equipped with the Intellistop unit during the first 2 years of the exemption. And the CMVs in the control group would operate on routes with schedules that are similar to those of the Intellistop vehicles.

Installed modules may only be used to modulate rear clearance, identification, and stop lamps.

Within 30 business days of its first installation of the Intellistop module, the Applicant must notify the FMCSA via email at *MCPSV@dot.gov* of the number and type of CMVs it is operating, or intends to operate, with the Intellistop module installed; the module type and/or sub-type; and any trouble-shooting, repair, or other use of an Intellistop module covered by this exemption. Amended installation information, including CMVs on which the device is installed or uninstalled, may then be submitted via the quarterly submission specified in sub-paragraph (iv) *Recurring Reporting Requirements* below.

If the Applicant sells or transfers ownership of any CMV equipped with an Intellistop module under this exemption, or if the exemption is terminated for any reason, the Applicant must remove the module and restore the CMV to full compliance with the FMCSRs and FMVSSs prior to the transfer of ownership, or upon termination of the exemption. The Applicant must also certify in writing to the purchaser/transferee and FMCSA that the CMV has been restored to compliance with the FMCSRs and FMVSSs.

(ii) Driver Pre-Trip Vehicle Inspections

The Applicant must ensure that each driver of an Intellistop-equipped CMV performs a pre-trip inspection to confirm that the Intellistop module operates only for 2 seconds and does not interfere with the normal operation of lamps after 2 seconds. If the lamps are not steady burning after 2 seconds, the CMV must not be dispatched until repairs are made. At the end of each workshift, drivers must note any problems observed by or reported to the driver concerning the Intellistop module on a driver vehicle inspection report (see 49 CFR 396.11), and the motor carrier must correct the problem before the vehicle is dispatched again.

(iii) Safety Notification to FMCSA

The Applicant will notify FMCSA within 5 business days after it becomes aware, or otherwise determines, that the continued use of a module or entire type or subtype of module covered by this

exemption is no longer likely to maintain a level of safety that is at least equivalent to the level that would be achieved absent this exemption. Notification will be made by sending an email to FMCSA at *MCPSD@dot.gov.*

(iv) Recurring Reporting Requirements

During the exemption period, the Applicant will provide quarterly submissions to FMCSA of the data described below. The Applicant's first quarterly submission is due on August 12, 2024, and thereafter will be due every 3 months, on the first business day of the month. The first quarterly submission will include the required data beginning 60 days prior to the date of module installation. All quarterly submissions will include data through at least the 14th day (inclusive) of the month immediately preceding the submission. Unless otherwise agreed to by FMCSA, quarterly submissions will be sent via email to FMCSA at *MCPSD@dot.gov.* If the Applicant does not have one or more categories of information described below, it will, within 20 days of the effective date of this exemption, discuss with FMCSA other available information. If the Agency accepts such alternative information, the Applicant will submit that data in lieu of the information specified below.

In the quarterly submission, the Applicant must provide FMCSA the following information known to the Applicant regarding all crashes and other incidents (''crash or incident'') involving a CMV equipped with an Intellistop module covered by this exemption where the Intellistop module is potentially implicated. Crashes involving a CMV equipped with an Intellistop module that are ''head-on'' or otherwise involve only the front of the Intellistop-equipped CMV impacting some other object (such that the Intellistop module, without question, could not be implicated) are not subject to this condition. For the first quarterly submission, data must include any crash or incident occurring in the 60 days prior to installation of the Intellistop module that would have been contained in this reporting category had the module been installed at the time of the crash or incident. The Applicant's knowledge includes, but is not limited to: (1) outreach from a consumer, lawyer, or any other person or organization (via letter, email, fax, telephone call, social media, or any other medium); (2) lawsuits to which the Applicant is a party, or otherwise knows exist where an Intellistop module covered by this exemption is an issue in the litigation; and (3) insurance claims against the Applicant related to use of the Intellistop module. When in the Applicant's possession, information provided to FMCSA shall include:

1. The date of first contact regarding, or the Applicant's first awareness of, the crash or incident;
2. The date of the most recent follow-up contact, if any, between the Applicant and the other party;
3. The date, time, and location of the crash or incident;
4. A brief description of the crash or incident; and
5. The Intellistop module type and/or subtype(s) involved in the crash or incident.
6. Information, if any, indicating that the Intellistop module is, or was, not working as intended, or caused confusion or a roadway hazard for either the consumer or other motorists.

Annual data. At the end of each 12-month period this exemption is in effect, the Applicant shall, within 60 days, submit a report detailing all information in its possession regarding crash rates and vehicle miles traveled by CMVs equipped with a module covered by this exemption. Additionally, the report will specify the number and type of CMVs the Applicant is operating under the exemption, the module type or sub-type installed on each CMV, the affected lamps (rear clearance, identification, and/or brake lamps), the number of covered vehicles sold or transferred in ownership during the 12-month reporting period, and a statement certifying that any sold/transferred vehicle(s) have been restored to compliance with applicable FMVSSs and FMCSRs.

Meetings. The Applicant shall, at FMCSA's request, meet with FMCSA to answer questions regarding data and information provided by the Applicant under this exemption.

(v) Early Termination

The exemption will be valid for 5 years from the date of issuance unless rescinded earlier by FMCSA. FMCSA will terminate the exemption if: (1) the Applicant fails to comply with its terms and conditions; (2) the exemption results in a lower level of safety than was maintained before it was granted; or (3) continuation of the exemption would not be consistent with the goals and objectives of 49 U.S.C. 31136(e) and 31315(b).

(vi) Notification From the Public

Interested parties possessing information that would demonstrate that Gemini's CMVs equipped with Intellistop's pulsating rear-light module may not be achieving the requisite statutory level of safety should immediately notify FMCSA. The Agency will evaluate any such information and, if safety is being compromised or if the continuation of the exemption is not consistent with 49 U.S.C. 31136(e) and 31315(b), will take immediate steps to revoke the exemption.

(vii) Non-Endorsement

This limited and conditional exemption does not constitute an endorsement of the Intellistop product by FMCSA, NHTSA, the U.S. DOT, or any of their components, or by any of these agencies' employees or agents. As a condition of the continued effectiveness of this exemption, Intellistop is expressly prohibited from describing its product as approved by, endorsed by, or otherwise authorized by FMCSA, NHTSA, or U.S. DOT, or as compliant with Federal safety regulations.

VIII. Preemption

In accordance with 49 U.S.C. 31313(d), as implemented by 49 CFR 381.600, during the period this exemption is in effect, no State shall enforce any law or regulation applicable to interstate commerce that conflicts with or is inconsistent with this exemption. States may, but are not required to, adopt the same exemption with respect to operations in intrastate commerce.

Sue Lawless,

Acting Deputy Administrator.

BILLING CODE 4910–EX–P

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

[Docket No. FRA–2024–0008]

Proposed Agency Information Collection Activities; Comment Request

AGENCY: Federal Railroad Administration (FRA), Department of Transportation (DOT).

ACTION: Notice of information collection; request for comment.

SUMMARY: Under the Paperwork Reduction Act of 1995 (PRA) and its implementing regulations, this notice announces that FRA is forwarding the Information Collection Request (ICR) summarized below to the Office of Management and Budget (OMB) for review and comment. The ICR describes the information collection and its expected burden. On February 21, 2024, FRA published a notice providing a 60-

day period for public comment on the ICR.

DATES: Interested persons are invited to submit comments on or before June 10, 2024.

ADDRESSES: Written comments and recommendations for the proposed ICR should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find the particular ICR by selecting ''Currently under Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Ms. Arlette Mussington, Information Collection Clearance Officer, at email: *arlette.mussington@dot.gov* or telephone: (571) 609–1285 or Ms. Joanne Swafford, Information Collection Clearance Officer, at email: *joanne.swafford@dot.gov* or telephone: (757) 897–9908.

SUPPLEMENTARY INFORMATION: The PRA, 44 U.S.C. 3501–3520, and its implementing regulations, 5 CFR part 1320, require Federal agencies to issue two notices seeking public comment on information collection activities before OMB may approve paperwork packages. *See* 44 U.S.C. 3506, 3507; 5 CFR 1320.8 through 1320.12. On February 21, 2024, FRA published a 60-day notice in the **Federal Register** soliciting public comment on the ICR for which it is now seeking OMB approval. *See* 89 FR 13142. FRA has received no comments related to the proposed collection of information.

Before OMB decides whether to approve this proposed collection of information, it must provide 30-days' notice for public comment. Federal law requires OMB to approve or disapprove paperwork packages between 30 and 60 days after the 30-day notice is published. 44 U.S.C. 3507(b)–(c); 5 CFR 1320.12(d); *See also* 60 FR 44978, 44983, Aug. 29, 1995. OMB believes the 30-day notice informs the regulated community to file relevant comments and affords the agency adequate time to digest public comments before it renders a decision. 60 FR 44983, Aug. 29, 1995. Therefore, respondents should submit their respective comments to OMB within 30 days of publication to best ensure having their full effect.

Comments are invited on the following ICR regarding: (1) whether the information collection activities are necessary for FRA to properly execute its functions, including whether the information will have practical utility; (2) the accuracy of FRA's estimates of the burden of the information collection activities, including the validity of the methodology and assumptions used to determine the estimates; (3) ways for FRA to enhance the quality, utility, and clarity of the information being collected; and (4) ways to minimize the burden of information collection activities on the public, including the use of automated collection techniques or other forms of information technology.

The summary below describes the ICR that FRA will submit for OMB clearance as the PRA requires:

Title: Metrics and Minimum Standards for Intercity Passenger Rail Service.

OMB Control Number: 2130–0632.

Abstract: In November 2020, in connection with a Congressional mandate, FRA published a final rule titled Metrics and Minimum Standards for Intercity Passenger Train Operations. (49 CFR part 273). The final rule established metrics and a minimum standard for measuring the performance and service quality of intercity passenger train operations, including cost recovery, on-time performance and minutes of delay, ridership, on-board services, stations, facilities, equipment, and other services.[1]

Type of Request: Extension without change (with changes in estimates) of a currently approved collection.

Affected Public: Amtrak.

Form(s): N/A.

Respondent Universe: Amtrak and Host Railroad(s).

Frequency of Submission: Varied.

Total Estimated Annual Responses: 93.

Total Estimated Annual Burden: 141 hours.

FRA informs all interested parties that it may not conduct or sponsor, and a respondent is not required to respond to, a collection of information that does not display a currently valid OMB control number.

Authority: 44 U.S.C. 3501–3520.

Christopher S. Van Nostrand,

Deputy Chief Counsel.

DEPARTMENT OF TRANSPORTATION

Pipeline and Hazardous Materials Safety Administration

[Docket No. PHMSA–2024–0056 (Notice No. 2024–08)]

Hazardous Materials: Information Collection Activities

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), DOT.

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, PHMSA invites comments on three Office of Management and Budget (OMB) control numbers pertaining to hazardous materials transportation. PHMSA intends to request renewal and extension for these three control numbers from OMB.

DATES: Interested persons are invited to submit comments on or before July 9, 2024.

ADDRESSES: You may submit comments identified by the Docket Number PHMSA–2024–0056 (Notice No. 2024–08) by any of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.
- *Fax:* 1–202–493–2251.
- *Mail:* Docket Management System; U.S. Department of Transportation, West Building, Ground Floor, Room W12–140, Routing Symbol M–30, 1200 New Jersey Avenue SE, Washington, DC 20590.
- *Hand Delivery:* To the Docket Management System; Room W12–140 on the ground floor of the West Building, 1200 New Jersey Avenue SE, Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Instructions: All submissions must include the agency name and Docket Number (PHMSA–2024–0056) for this notice at the beginning of the comment. To avoid duplication, please use only one of these four methods. All comments received will be posted without change to the Federal Docket Management System (FDMS) and will include any personal information you provide.

Requests for a copy of an information collection should be directed to Steven Andrews or Nina Vore, Standards and Rulemaking Division, (202) 366–8553, *ohmspra@dot.gov,* Pipeline and Hazardous Materials Safety Administration, U.S. Department of Transportation, 1200 New Jersey

Avenue SE, Washington, DC 20590–0001.

Docket: For access to the dockets to read background documents or comments received, go to *http://www.regulations.gov* or DOT's Docket Operations Office (see **ADDRESSES**).

Privacy Act: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to *www.regulations.gov,* as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at *www.dot.gov/privacy.*

Confidential Business Information: Confidential Business Information (CBI) is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to this notice contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to this notice, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as ''PROPIN.'' PHMSA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this notice. Submissions containing CBI should be sent to Steven Andrews or Nina Vore, Standards and Rulemaking Division, and addressed to the Pipeline and Hazardous Materials Safety Administration, U.S. Department of Transportation, 1200 New Jersey Avenue SE, Washington, DC 20590–0001 or *ohmspra@dot.gov.* Comments received by PHMSA which are not specifically designated as ''CBI'' will be placed in the public docket for this notice.

FOR FURTHER INFORMATION CONTACT: Steven Andrews or Nina Vore, Standards and Rulemaking Division, (202) 366–8553, *ohmspra@dot.gov,* Pipeline and Hazardous Materials Safety Administration, U.S. Department of Transportation, 1200 New Jersey Avenue SE, Washington, DC 20590–0001.

SUPPLEMENTARY INFORMATION: Section 1320.8(d), title 5, Code of Federal Regulations (CFR) requires the Pipeline and Hazardous Materials Safety Administration (PHMSA) to provide interested members of the public and affected agencies an opportunity to comment on information collection and recordkeeping requests. This notice identifies information collection requests PHMSA will be submitting to OMB for renewal and extension. These information collections are contained in 49 CFR 171.6 of the Hazardous Materials Regulations (HMR; 49 CFR parts 171–180). PHMSA has revised burden estimates, where appropriate, to reflect current reporting levels or adjustments based on changes in proposed or final rules published since the information collections were last approved. The following information is provided for each information collection: (1) title of the information collection, including former title if a change is being made; (2) OMB control number; (3) summary of the information collection activity; (4) description of affected public; (5) estimate of total annual reporting and recordkeeping burden; and (6) frequency of collection. PHMSA will request a 3-year term of approval for each information collection activity and will publish a notice in the **Federal Register** upon OMB's approval. PHMSA requests comments on the following information collections:

Title: Flammable Cryogenic Liquids.

OMB Control Number: 2137–0542.

Summary: Provisions in § 177.840(a)(2) specify certain safety procedures and documentation requirements for drivers of motor vehicles transporting flammable cryogenic liquids. This information allows the driver to take appropriate remedial actions to prevent a catastrophic release of the flammable cryogenics should the temperature of the material begin to rise excessively or if the travel time will exceed the safe travel time. These requirements are intended to ensure a high level of safety when transporting flammable cryogenics due to their extreme flammability and high compression ratio when in a liquid state. The following information collections and their burdens are associated with this OMB Control Number.

Information collection	Respondents	Total annual responses	Time per response	Total annual burden hours
Flammable Cryogenic Liquids—Reporting	175	18,200	3.5 minutes	1,062
Flammable Cryogenic Liquids—Recordkeeping	175	18,200	30 seconds	152

Affected Public: Carriers of cryogenic materials.

Annual Reporting and Recordkeeping Burden:

Number of Respondents: 350.

Total Annual Responses: 36,400.

Total Annual Burden Hours: 1,214.

Frequency of Collection: On occasion.

Title: Response Plans for Shipments of Oil.

OMB Control Number: 2137–0591.

Summary: Under authority of the Federal Water Pollution Control Act, as amended by the Oil Pollution Act of 1990 (33 U.S.C. 1251 *et seq.*), PHMSA issued regulations in 49 CFR part 130 that require preparation of written spill response plans. The following information collections and their burdens are associated with this OMB Control Number.

Information collection	Respondents	Total annual responses	Time per response (hours)	Total annual burden hours
Basic Written Response Plan—New Plans	80	80	33	2,640
Basic Written Response Plan—Updating Plans	7,920	7,920	1	7,920

Affected Public: Carriers that transport oil in bulk, by motor vehicle or rail.

Annual Reporting and Recordkeeping Burden:

Number of Respondents: 8,000.

Total Annual Responses: 8,000.

Total Annual Burden Hours: 10,560.

Frequency of Collection: On occasion.

Title: Requirements for United Nations (UN) Cylinders.

OMB Control Number: 2137–0621.

Summary: This information collection and recordkeeping burden is the result of efforts to amend the HMR to adopt standards for the design, construction, maintenance, and use of cylinders and multiple-element gas containers (MEGCs) based on the standards contained in the UN Recommendations on the Transport of Dangerous Goods. Aligning the HMR with the UN Recommendations promotes flexibility, permits the use of technological advances for the manufacture of the pressure receptacles, provides for a broader selection of pressure receptacles, reduces the need for special permits, and facilitates international commerce in the transportation of compressed gases. Information collection requirements address domestic and international manufacturers of cylinders that request approval by the approval agency for cylinder design types. The approval process for each cylinder design type includes review, filing, and recordkeeping of the approval application. The approval agency is required to maintain a set of the approved drawings and calculations for each design it reviews and a copy of each initial design type approval certificate approved by the Associate Administrator for the Office of Hazardous Materials Safety for not less than 20 years. The following information collections and their burdens are associated with this OMB Control Number.

Information collection	Respondents	Total annual responses	Time per response	Total annual burden hours
UN Pressure Receptacle Approval—New Request	35	35	6 hours	210
UN Pressure Receptacle Approval—Modified Request	100	100	6 hours	600
UN Pressure Receptacle Approval—Recordkeeping	75	75	6 minutes	8

Affected Public: Fillers, owners, users, and retesters of UN cylinders.

Annual Reporting and Recordkeeping Burden:

Number of Respondents: 210.

Total Annual Responses: 210.

Total Annual Burden Hours: 818.

Frequency of Collection: On occasion.

Issued in Washington, DC, on May 7, 2024, under authority delegated in 49 CFR 1.97.

Steven W. Andrews Jr.,

Acting Chief, Regulatory Review and Reinvention Branch, Office of Hazardous Materials Safety, Pipeline and Hazardous Materials Safety Administration.

BILLING CODE 4910–60–P

DEPARTMENT OF TRANSPORTATION

Office of the Secretary

[Docket ID Number: DOT–OST–2018–0068]

Notice of Submission of Proposed Information Collection to OMB; Agency Request for Reinstatement of Previously Approved Collections: Traveling by Air With Service Animals—U.S. Department of Transportation Service Animal Air Transportation Form and U.S. Department of Transportation Service Animal Relief Attestation Form

AGENCY: Office of the Secretary (OST), U.S. Department of Transportation (DOT).

ACTION: Notice; addendum.

SUMMARY: The U.S. Department of Transportation (Department or DOT) published a notice for comment that confirms the Department's intention to renew Office of Management and Budget (OMB) Control Number 2105–0576, concerning Traveling by Air with Service Animals—U.S. Department of Transportation Service Animal Air Transportation Form, and U.S. Department of Transportation Service Animal Relief Attestation Form. The purpose of this addendum is to notify the public that an accessible version of the notice is available for view on DOT's Office of Aviation Consumer Protection website.

DATES: This addendum is effective May 10, 2024.

FOR FURTHER INFORMATION CONTACT: Maegan Johnson or Livaughn Chapman, Jr., Office of Aviation Consumer Protection, U.S. Department of Transportation, 1200 New Jersey Avenue SE, Washington, DC 20590, telephone number (202) 366–9342 (voice), (202) 366–7152 (fax); *maegan.johnson@dot.gov* or *livaughn.chapman@dot.gov* (email). Arrangements to receive this document in an alternative format may be made by contacting the above-named individuals.

SUPPLEMENTARY INFORMATION: DOT published a **Federal Register** notice with a 30-day comment period soliciting comments on the information collections on April 29, 2024 (89 FR 33443). The notice was also submitted to OMB for review and approval on April 29, 2024. DOT's Office of Aviation Consumer Protection has posted accessible PDF and Word versions of this Notice on its website on its website, *www.transportation.gov/airconsumer* on its What's New Page, *www.transportation.gov/airconsumer/latest-news.*

* * * * *

Issued in Washington, DC.

Maegan Lea Johnson,

Senior Attorney, Office of Aviation Consumer Protection.

DEPARTMENT OF TRANSPORTATION

Bureau of Transportation Statistics

[Docket: DOT–OST–2014–0031 BTS Paperwork Reduction Notice]

Agency Information Collection; Activity Under OMB Review; Reporting Required for International Civil Aviation Organization (ICAO)

AGENCY: Office of the Assistant Secretary for Research and Technology (OST–R), Bureau of Transportation Statistics (BTS), Department of Transportation.

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act of 1995 this notice announces that the Information Collection Request (ICR) abstracted below has been forwarded to the Office of Management and Budget (OMB) for extension of currently approved collections. The ICR describes the nature of the information collection and its expected burden. A **Federal Register** Notice with a 60-day comment period soliciting comments on the following collection of information was published on March 19, 2024. No comments were received.

DATES: Written comments should be submitted by June 10, 2024.

ADDRESSES: You may submit comments identified by DOT Docket ID Number DOT–OST–2014–0031 OMB Approval

No. 2138–0039 by any of the following methods:

Federal eRulemaking Portal: Go to *http://www.regulations.gov.* Follow the online instructions for submitting comments.

Mail: Docket Services: U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building Ground Floor, Room W12–140, Washington, DC 20590–0001.

Hand Delivery or Courier: West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, between 9 a.m. and 5 p.m. ET, Monday through Friday, except Federal holidays.

Fax: 202–366–3383.

Instructions: Identify docket number, DOT–OST–2014–0031, at the beginning of your comments, and send two copies. To receive confirmation that DOT received your comments, include a self-addressed stamped postcard. Internet users may access all comments received by DOT at *http://www.regulations.gov*. All comments are posted electronically without charge or edits, including any personal information provided.

Privacy Act: Anyone is able to search the electronic form of all comments received into any of our dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.). You may review DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000 (65 FR 19477–78).

Docket: For access to the docket to read background documents or comments received, go to *http://www.regulations.gov*. or the street address listed above. Follow the online instructions for accessing the dockets.

Electronic Access

An electronic copy of this rule, a copy of the notice of proposed rulemaking, and copies of the comments may be downloaded at *http://www.regulations.gov,* by searching docket DOT–OST–2014–0031.

FOR FURTHER INFORMATION CONTACT: James Bouse, *james.bouse@dot.gov,* 202–366–3000, Office of Airline Information, RTS–42, Room E34, OST–R, 1200 New Jersey Avenue Street SE, Washington, DC 20590–0001.

SUPPLEMENTARY INFORMATION:

OMB Approval No. 2138–0039.

Title: Reporting Required for International Civil Aviation Organization (ICAO).

Form No.: BTS Form EF.

Type Of Review: Extension of a currently approved collection.

Respondents: Large certificated air carriers.

Number of Respondents: 34.

Number of Responses: 34.

Total Annual Burden: 23 hours.

Needs and Uses: As a party to the Convention on International Civil Aviation (Treaty), the United States is obligated to provide ICAO with financial and statistical data on operations of U.S. carriers. Over 99% of the data filled with ICAO is extracted from the air carriers' Form 41 submissions to BTS. BTS Form EF is the means by which BTS supplies the remaining 1% of the air carrier data to ICAO.

The Confidential Information Protection and Statistical Efficiency Act of 2002 (44 U.S.C. 3501 note), requires a statistical agency to clearly identify information it collects for non-statistical purposes. BTS hereby notifies the respondents and the public that BTS uses the information it collects under this OMB approval for non-statistical purposes including, but not limited to, publication of both Respondent's identity and its data, submission of the information to agencies outside BTS for review, analysis and possible use in regulatory and other administrative matters.

Issued Washington, DC, May 7, 2024.

William Chadwick, Jr.,

Director, Office of Airline Information, Bureau of Transportation Statistics.

BILLING CODE 4910–9X–P

UNIFIED CARRIER REGISTRATION PLAN

Sunshine Act Meetings

TIME AND DATE: May 15, 2024, 10:30 a.m. to 1:30 p.m., Eastern time.

PLACE: This meeting will take place at the National Press Building 529 14th Street NW, Suite 1280, Washington, DC 20045. This meeting will also be accessible via conference call and via Zoom Meeting and Screenshare. Any interested person may call (i) 1–929–205–6099 (US Toll) or 1–669–900–6833 (US Toll), Meeting ID: 948 4051 5537, to listen and participate in this meeting. The website to participate via Zoom Meeting and Screenshare is *https://kellen.zoom.us/meeting/register/tJAlc-mtrz4vGdONsaXbTwLuoDAYqBiSoE42.*

STATUS: This meeting will be open to the public.

MATTERS TO BE CONSIDERED: The Unified Carrier Registration Plan Industry Advisory Subcommittee (the ''Subcommittee'') will conduct a meeting to continue its work in developing and implementing the Unified Carrier Registration Plan and Agreement. The subject matter of this meeting will include:

Proposed Agenda

I. Call to Order—UCR Industry Advisory Subcommittee Chair

The Industry Advisory Subcommittee Chair will welcome attendees, call the meeting to order, call roll for the Industry Advisory Subcommittee, confirm whether a quorum is present, and facilitate self-introductions.

II. Verification of Publication of Meeting Notice—UCR Executive Director

The UCR Executive Director will verify the publication of the meeting notice on the UCR website and distribution to the UCR contact list via email followed by the subsequent publication of the notice in the **Federal Register**.

III. Review and Approval of Subcommittee Agenda- UCR Industry Advisory Subcommittee Chair

For Discussion and Possible Subcommittee Action

The proposed Agenda will be reviewed, and the Subcommittee will consider adoption.

Ground Rules

➢ Subcommittee action only to be taken in designated areas on agenda.

IV. Review and Approval of Minutes From the February 28, 2024 Meeting—UCR Industry Advisory Subcommittee Chair

For Discussion and Possible Subcommittee Action

Draft minutes from the February 28, 2024 Industry Advisory Subcommittee meeting via teleconference will be reviewed. The UCR Industry Advisory Subcommittee will consider action to approve.

V. 2024 Priorities and Project Development for the Subcommittee—UCR Industry Advisory Subcommittee Chair

The UCR Industry Advisory Subcommittee Chair will provide an update on current and planned initiatives, to include the development of a video series intended to increase participation in the UCR focused on brokers, motor carriers, and bus operators.

VI. Industry Update on Compliance—UCR Industry Advisory Subcommittee Chair

The UCR Industry Advisory Subcommittee Chair UCR will provide an update on compliance numbers for all the industry stakeholders. Demonstrating current numbers and how those compare to the last few years, current compliance strategies being utilized, and the goal for 2024.

VII. Industry Update on Truck Parking—UCR Industry Advisory Subcommittee Chair

The UCR Industry Advisory Subcommittee Chair will provide an information update on trucking parking initiatives.

VIII. Other Items—UCR Industry Advisory Subcommittee Chair

The UCR Industry Advisory Subcommittee Chair will call for any other items Subcommittee members would like to discuss.

IX. Adjournment—UCR Industry Advisory Subcommittee Chair

The UCR Industry Advisory Subcommittee Chair will adjourn the meeting.

The agenda will be available no later than 5:00 p.m. Eastern time, May 8, 2024 at: *https://plan.ucr.gov.*

CONTACT PERSON FOR MORE INFORMATION: Elizabeth Leaman, Chair, Unified Carrier Registration Plan Board of Directors, (617) 305–3783, *eleaman@board.ucr.gov.*

Alex B. Leath,

Chief Legal Officer, Unified Carrier Registration Plan.

[FR Doc. 2024–10360 Filed 5–8–24; 11:15 am]

BILLING CODE 4910–YL–P

DEPARTMENT OF VETERANS AFFAIRS

[OMB Control No. 2900–0399]

Agency Information Collection Activity: Student Beneficiary Report—REPS (Restored Entitlement Program for Survivors)

AGENCY: Veterans Benefits Administration, Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: Veterans Benefits Administration, Department of Veterans Affairs (VA), is announcing an opportunity for public comment on the proposed collection of certain information by the agency. Under the Paperwork Reduction Act (PRA) of 1995, Federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of a previously approved collection, and allow 60 days for public comment in response to the notice.

DATES: Written comments and recommendations on the proposed collection of information should be received on or before July 9, 2024.

ADDRESSES: Submit written comments on the collection of information through Federal Docket Management System (FDMS) at *www.Regulations.gov* or to Nancy J. Kessinger, Veterans Benefits Administration (20M33), Department of Veterans Affairs, 810 Vermont Avenue NW, Washington, DC 20420 or email to *nancy.kessinger@va.gov.* Please refer to ''OMB Control No. 2900–0399'' in any correspondence. During the comment period, comments may be viewed online through FDMS.

FOR FURTHER INFORMATION CONTACT: Maribel Aponte, Office of Enterprise and Integration, Data Governance Analytics (008), 810 Vermont Ave. NW, Washington, DC 20420, (202) 266–4688 or email *maribel.aponte@va.gov.*

Please refer to ''OMB Control No. 2900–0399'' in any correspondence.

SUPPLEMENTARY INFORMATION: Under the PRA of 1995, Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. This request for comment is being made pursuant to section 3506(c)(2)(A) of the PRA.

With respect to the following collection of information, VBA invites comments on: (1) whether the proposed collection of information is necessary for the proper performance of VBA's functions, including whether the information will have practical utility; (2) the accuracy of VBA's estimate of the burden of the proposed collection of information; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or the use of other forms of information technology.

Authority: 42 U.S.C. 402.

Title: Student Beneficiary Report—REPS (Restored Entitlement Program for Survivors).

OMB Control Number: 2900–0399.

Type of Review: Extension of a previously approved collection.

Abstract: VA Form 21P–8938–1 is primarily used to verify that a surviving child who is receiving REPS benefits based on school-child status is in fact enrolled full-time in an approved school and is otherwise eligible for continued benefits. VA Form 21P–8938–1 is generated by VA's central computer system each March and sent to all student beneficiaries. If the completed form is not received by the end of May, the beneficiary is sent a system-generated due process letter with another VA Form 21P–8938–1. No changes have been made to this form. The respondent burden has remained the same.

Affected Public: Individuals and households.

Estimated Annual Burden: 300 hours.

Estimated Average Burden per Respondent: 20 minutes.

Frequency of Response: One time.

Estimated Number of Respondents: 1,200.

By direction of the Secretary.

Maribel Aponte,

VA PRA Clearance Officer, Office of Enterprise and Integration/Data Governance Analytics, Department of Veterans Affairs.

[FR Doc. 2024–10235 Filed 5–9–24; 8:45 am]

BILLING CODE 8320–01–P

DEPARTMENT OF VETERANS AFFAIRS

[OMB Control No. 2900–0889]

Agency Information Collection Activity Under OMB Review: COVID–19 Veterans Assistance Partial Claim Payment Program

AGENCY: Veterans Benefits Administration, Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (PRA) of 1995, this notice announces that the Veterans Benefits Administration, Department of Veterans Affairs, will submit the collection of information abstracted below to the Office of Management and Budget (OMB) for review and comment. The PRA submission describes the nature of the information collection and its expected cost and burden and it includes the actual data collection instrument.

DATES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice by clicking on the following link *www.reginfo.gov/public/do/PRAMain,* select ''Currently under Review—Open for Public Comments'', then search the list for the information collection by Title or ''OMB Control No. 2900–0889.''

FOR FURTHER INFORMATION CONTACT: Maribel Aponte, Office of Enterprise and Integration, Data Governance Analytics (008), 810 Vermont Ave. NW, Washington, DC 20420, (202) 266–4688 or email *maribel.aponte@va.gov.* Please refer to ''OMB Control No. 2900–0889'' in any correspondence.

SUPPLEMENTARY INFORMATION:

Authority: U.S. Code 38 3720, U.S. Code 38 3732.

Title: COVID–19 Veterans Assistance Partial Claim Payment Program.

OMB Control Number: 2900–0889.

Type of Review: Revision of a currently approved collection.

Abstract: This collection is necessary for VA to accept resubmissions for the COVID–19 Veterans Assistance Partial Claim Payment program (VAPCP) and continue to accept COVID–19 Refund Modifications added under this authority. The COVID–19 Refund Modification submission date was extended through May 31, 2024, and coincides with the foreclosure moratorium which also ends May 31, 2024.

An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. The **Federal Register** Notice with a 60-day comment period soliciting comments on this collection of information was published at, 89 FR 16817 on March 8, 2024, page 16817.

Affected Public: Individuals and households.

Estimated Annual Burden: 11,670 hours.

Estimated Average Burden per Respondent: 45 minutes.

Frequency of Response: One time.

Estimated Number of Respondents: 15,560.

By direction of the Secretary.

Maribel Aponte,

VA PRA Clearance Officer, Office of Enterprise and Integration, Data Governance Analytics, Department of Veterans Affairs.

[CMS–2442–F]

RIN 0938–AU68

Medicaid Program; Ensuring Access to Medicaid Services

AGENCY: Centers for Medicare & Medicaid Services (CMS), Department of Health and Human Services (HHS).

ACTION: Final rule.

SUMMARY: This final rule takes a comprehensive approach to improving access to care, quality and health outcomes, and better addressing health equity issues in the Medicaid program across fee-for-service (FFS), managed care delivery systems, and in home and community-based services (HCBS) programs. These improvements increase transparency and accountability, standardize data and monitoring, and create opportunities for States to promote active beneficiary engagement in their Medicaid programs, with the goal of improving access to care.

DATES: These regulations are effective on July 9, 2024.

FOR FURTHER INFORMATION CONTACT:

Karen LLanos, (410) 786–9071, for Medicaid Advisory Committee.

Jennifer Bowdoin, (410) 786–8551, for Home and Community-Based Services.

Jeremy Silanskis, (410) 786–1592, for Fee-for-Service Payment.

SUPPLEMENTARY INFORMATION:

I. Background

A. Overview

Title XIX of the Social Security Act (the Act) established the Medicaid program as a joint Federal and State program to provide medical assistance to eligible individuals, including many with low incomes. Under the Medicaid program, each State that chooses to participate in the program and receive Federal financial participation (FFP) for program expenditures must establish eligibility standards, benefits packages, and payment rates, and undertake program administration in accordance with Federal statutory and regulatory requirements. The provisions of each State's Medicaid program are described in the Medicaid ''State plan'' and, as applicable, related authorities, such as demonstration projects and waivers of State plan requirements. Among other responsibilities, CMS approves State plans, State plan amendments (SPAs), demonstration projects authorized under section 1115 of the Act, and waivers authorized under section 1915 of the Act; and reviews expenditures for compliance with Federal Medicaid law, including the requirements of section 1902(a)(30)(A) of the Act relating to efficiency, economy, quality of care, and access to ensure that all applicable Federal requirements are met.

The Medicaid program provides essential health coverage to tens of millions of people, covering a broad array of health benefits and services critical to underserved populations,[1] including low-income adults, children, parents, pregnant individuals, older adults, and people with disabilities. For example, Medicaid pays for approximately 41 percent of all births in the U.S.[2] and is the largest payer of long-term services and supports (LTSS),[3] the largest, single payer of services to treat substance use disorders,[4] and services to prevent and treat the Human Immunodeficiency Virus.[5]

On January 28, 2021, the President signed Executive Order (E.O.) 14009,[6] ''Strengthening Medicaid and the Affordable Care Act,'' which established the policy objective to protect and strengthen Medicaid and the Affordable Care Act and to make high-quality health care accessible and affordable for every American. The E.O. also directed executive departments and agencies to review existing regulations, orders, guidance documents, and policies to determine whether such agency actions are inconsistent with this policy. On April 5, 2022, E.O. 14070,[7] ''Continuing To Strengthen Americans' Access to Affordable, Quality Health Coverage,'' directed Federal agencies with responsibilities related to Americans' access to health coverage to review agency actions to identify ways to continue to expand the availability of affordable health coverage, to improve the quality of coverage, to strengthen benefits, and to help more Americans enroll in quality health coverage. Consistent with CMS' authorities under the Act, this final rule implements E.O.s 14009 and 14070 by helping States to strengthen Medicaid and improve access to and quality of care provided.

Ensuring that beneficiaries can access covered services is necessary to the basic operation of the Medicaid program. Depending on the State and its Medicaid program structure, beneficiaries access their health care services using a variety of care delivery systems (for example, FFS, fully-capitated managed care, partially capitated managed care, etc.), including through demonstrations and waiver programs. The volume of Medicaid beneficiaries enrolled in a managed care program in Medicaid has grown from 81 percent in 2016 to 85 percent in 2021, with 74.6 percent of Medicaid beneficiaries enrolled in comprehensive managed care organizations.[8] [9] The remaining individuals received all of their care or some services that have been carved out of managed care through FFS.

Current access regulations are neither comprehensive nor consistent across delivery systems or coverage authority (for example, State plan and demonstration authority). For example, regulations at 42 CFR 447.203 and 447.204 relating to access to care, service payment rates, and Medicaid provider participation in rate setting apply only to Medicaid FFS delivery systems and focus on ensuring that payment rates are consistent with the statutory requirements in section 1902(a)(30)(A) of the Act. The regulations do not apply to services

[8] Medicaid Managed Care Enrollment Report. *https://www.medicaid.gov/medicaid/managed-care/enrollment-report/index.html*.

[9] Throughout this document, the use of the term ''managed care plan'' includes managed care organizations (MCOs), prepaid inpatient health plans (PIHPs), and prepaid ambulatory health plans (PAHPs) [as defined in 42 CFR 438.2] and is used only when the provision under discussion applies to all three arrangements. An explicit reference is used in the preamble if the provision applies to primary care case managers (PCCMs) or primary care case management entities (PCCM entities).

delivered under managed care. These regulations are also largely procedural in nature and rely heavily on States to form an analysis and reach conclusions on the sufficiency of their own payment rates.

With a program as large and complex as Medicaid, access regulations need to be multi-factorial to promote consistent access to health care for all beneficiaries across all types of care delivery systems in accordance with statutory requirements. Strategies to enhance access to health care services should reflect how people move through and interact with the health care system. We view the continuum of health care access across three dimensions of a person-centered framework: (1) enrollment in coverage; (2) maintenance of coverage; and (3) access to services and supports. Within each of these dimensions, accompanying regulatory, monitoring, and/or compliance actions may be needed to ensure access to health care is achieved and maintained.

In the spring of 2022, we released a request for information (RFI) [10] to collect feedback on a broad range of questions that examined topics such as: challenges with eligibility and enrollment; ways we can use data available to measure, monitor, and support improvement efforts related to access to services; strategies we can implement to support equitable and timely access to providers and services; and opportunities to use existing and new access standards to help ensure that Medicaid and Children's Health Insurance Program (CHIP) payments are sufficient to enlist enough providers.

Some of the most common feedback we received through the RFI related to ways that we can promote health equity through cultural competency. Commenters shared the importance that cultural competency plays in how beneficiaries access health care and in the quality of health services received by beneficiaries. The RFI respondents shared examples of actions that we could take, including collecting and analyzing health outcomes data by sociodemographic categories; establishing minimum standards for how States serve communities in ways that address cultural competency and language preferences; and reducing barriers to enrollment and retention for racial and ethnic minority groups.

In addition to the topic of cultural competency, commenters also commonly shared that they viewed reimbursement rates as a key driver of provider participation in Medicaid and CHIP programs. Further, commenters noted that aligning payment approaches and setting minimum standards for payment regulations and compliance across Medicaid and CHIP delivery systems, services, and benefits could help ensure that beneficiaries' access to services is as similar as possible across beneficiary groups, delivery systems, and programs.

As mentioned previously in this final rule, the first dimension of access focuses on ensuring that eligible people are able to enroll in the Medicaid program. Access to Medicaid enrollment requires that a potential beneficiary know if they are or may be eligible for Medicaid, be aware of Medicaid coverage options, and be able to easily apply for and enroll in coverage. The second dimension of access in this continuum relates to maintaining coverage once the beneficiary is enrolled in the Medicaid program initially. Maintaining coverage requires that eligible beneficiaries are able to stay enrolled in the program without interruption, or that they know how to and can smoothly transition to other health coverage, such as CHIP, Exchange coverage, or Medicare, when they are no longer eligible for Medicaid coverage but have become eligible for other health coverage programs. In September 2022, we published a proposed rule, *Streamlining the Medicaid, Children's Health Insurance Program, and Basic Health Program Application, Eligibility, Determination, Enrollment, and Renewal Processes* to simplify the processes for eligible individuals to enroll and retain eligibility in Medicaid, CHIP, and the Basic Health Program (BHP) (87 FR 54760). This proposed rule was finalized in two parts, the *Streamlining Medicaid; Medicare Savings Program Eligibility Determination and Enrollment Final Rule* (88 FR 65230) and the *Streamlining Eligibility & Enrollment final rule* (89 FR 22780).

The third dimension, which is the focus of this final rule, is access to services and supports. This rule addresses additional critical elements of access: (1) potential access, which refers to a beneficiary's access to providers and services, whether or not the providers or services are used; (2) beneficiary utilization, which refers to beneficiaries' actual use of the providers and services available to them; and (3) beneficiaries' perceptions and experiences with the care they did or were not able to receive. These terms and definitions build upon previous efforts to examine how best to monitor access.[11]

We completed an array of regulatory activities, including three rules: the aforementioned Streamlining Eligibility & Enrollment final rules and a final rule entitled Medicaid and Children's Health Insurance Program (CHIP) Managed Care Access, Finance, and Quality (as published elsewhere in this issue of the **Federal Register**, Managed Care final rule), on managed care including matters of access, and this final rule on access. Additionally, we are taking non-regulatory actions to improve beneficiary access to care (for example, best practices toolkits and technical assistance to States) to improve access to health care services across Medicaid delivery systems.

As noted earlier, we issued the Streamlining Eligibility & Enrollment final rules to address the first two dimensions of access to health care: (1) enrollment in coverage and (2) maintenance of coverage. Through those final rules, we streamline Medicaid, CHIP and BHP eligibility and enrollment processes, reduce administrative burden on States and applicants/enrollees toward a more seamless eligibility and enrollment process, and increase the enrollment and retention of eligible individuals.

The Managed Care final rule improves access to care and quality outcomes for Medicaid and CHIP beneficiaries enrolled in managed care by: creating standards for timely access to care and States' monitoring and enforcement efforts; reducing burden for some State directed payments and certain quality reporting requirements; adding new standards that will apply when States use in lieu of services and settings (ILOSs) to promote effective utilization, and specifying the scope and nature of ILOS; specifying medical loss ratio (MLR) requirements, and establishing a quality rating system for Medicaid and CHIP managed care plans.

Through the Managed Care final rule and this final rule (Ensuring Access to Medicaid Services), we finalize additional requirements to address the third dimension of the health care access continuum: access to services. The requirements outlined later in this section focus on improving access to services in Medicaid by utilizing tools such as FFS rate transparency,

[10] CMS Request for Information: Access to Coverage and Care in Medicaid & CHIP. February 2022. For a full list of question from the RFI, see *https://www.medicaid.gov/medicaid/access-care/downloads/access-rfi-2022-questions.pdf.*

[11] Kenney, Genevieve M., Kathy Gifford, Jane Wishner, Vanessa Forsberg, Amanda I. Napoles, and Danielle Pavliv. ''Proposed Medicaid Access Measurement and Monitoring Plan.'' Washington, DC: The Urban Institute. August 2016. Accessed at *https://www.urban.org/sites/default/files/publication/88081/2001143-medicaid-access-measurement-and-monitoring-plan_0.pdf.*

standardized reporting for HCBS, and improving the process for interested parties, especially Medicaid beneficiaries, to provide feedback to State Medicaid agencies and for Medicaid agencies to respond to the feedback (also known as a feedback loop).

Through a combination of these four final rules, we address a range of access-related challenges that impact how beneficiaries are served by Medicaid across all of its delivery systems. FFP will be available for expenditures that are necessary to implement the activities States will need to undertake to comply with the provisions of these final rules.

Finally, we also believe it is important to acknowledge the role of health equity within this final rule. Medicaid plays a disproportionately large role in covering health care for people from underserved communities in this country.[12] Consistent with E.O. 13985 on ''Advancing Racial Equity and Support for Underserved Communities Through the Federal Government (January 20, 2021),'' [13] which calls for advancing equity for underserved populations, we are working to ensure our programs consistently provide high-quality care to all beneficiaries, and thus advance health equity, consistent with the goals and objectives we have outlined in the CMS Framework for Health Equity 2022–2032 [14] and the HHS Equity Action Plan.[15] That effort includes increasing our understanding of the needs of those we serve to ensure that all individuals have access to equitable coverage and care.

We recognize that each State faces a unique set of challenges related to the resumption of its normal program activities after the end of the COVID–19 public health emergency (PHE). More specifically, the expiration of the Medicaid continuous enrollment condition authorized by the Families First Coronavirus Response Act (FFCRA) presents the single largest health coverage transition event since the first open enrollment period of the Affordable Care Act. As a condition of receiving a temporary 6.2 percentage point Federal Medical Assistance Percentage (FMAP) increase under the FFCRA, States were required to maintain enrollment of nearly all Medicaid enrollees. This continuous enrollment condition expired on March 31, 2023, after which States began completing renewals for all individuals enrolled in Medicaid, CHIP, and the BHP. Additionally, many other temporary authorities adopted by States during the COVID–19 PHE expired at the end of the PHE, and States are returning to regular operations across their programs. The resumption of normal Medicaid operations is generally referred to as ''unwinding'' and the period for States to initiate all outstanding eligibility actions that were delayed because of the FFCRA continuous enrollment condition is called the ''unwinding period.'' We considered States' unwinding responsibilities when finalizing the dates for States to begin complying with the requirements being finalized in this rule, but, as noted in the Ensuring Access to Medicaid Services proposed rule, we solicited State feedback on whether our proposals struck the correct balance.

We considered adopting an effective date of 60 days following publication of this final rule and separate compliance dates for various provisions, which we note where relevant in our discussion of specific proposals in this final rule. We solicited comment on whether an effective date of 60 days following publication would be appropriate when combined with later dates for compliance for some provisions.

We also solicited comment on the timeframe that would be most achievable and appropriate for compliance with each proposed provision and whether the compliance date should vary by provision.

B. Medical Care Advisory Committees (MCAC)

We obtained feedback during various public engagement activities conducted with States and other interested parties, which supports research findings that the beneficiary perspective and lived Medicaid experience [16] should be considered when making policy decisions related to Medicaid programs.[17] [18] A 2022 report from the HHS Assistant Secretary of Planning and Evaluation (ASPE) noted that including people with lived experience in the policy-making process can lead to a deeper understanding of the conditions affecting certain populations, facilitate identification of possible solutions, and avoid unintended consequences of potential policy or program changes that could negatively impact the people the program aims to serve.[19] We have concluded that beneficiary perspectives need to be central to operating a high-quality health coverage program that consistently meets the needs of all its beneficiaries.

However, effective community engagement is not as simple as planning a meeting and requesting feedback. To create opportunities that facilitate true engagement, it is important to understand and honor strengths and assets that exist within communities; recognize and solicit the inclusion of diverse voices; dedicate resources to ensuring that engagement is done in culturally meaningful ways; ensure timelines, planning processes, and resources that support equitable participation; and follow up with communities to let them know how their input was utilized. Ensuring optimal health outcomes for all beneficiaries served by a program through the design, implementation, and operationalization of policies and programs requires intentional and continuous effort to engage people who have historically been excluded from the process.

Section 1902(a)(4) of the Act is a longstanding statutory provision that, as implemented in part in regulations currently codified at 42 CFR 431.12,[20] requires States to have a Medical Care

[20] The regulatory provision was originally established in 36 FR 3793 at 3870.

Advisory Committee (MCAC) in place to advise the State Medicaid agency about health and medical care services. Under section 1903(a)(7) of the Act, expenditures made by the State agency to operate the MCAC are eligible for Federal administrative match.

The current MCAC regulations at § 431.12 require States to establish such a committee and describe high-level requirements related to the composition of the committee, the scope of topics to be discussed, and the support the Committee can receive from the State in its administration. Due to the lack of specificity in the current regulations, these regulations have not been consistently implemented across States. For example, there is no mention of how States should approach meeting periodicity or meeting structure in ways that are conducive to including a variety of Medicaid interested parties. There is also no mention in the regulations about how States can build accountability through transparency with their interested parties by publicly sharing meeting dates, membership lists, and the outcomes of these meetings. The regulations also limit the required MCAC discussions to topics about health and medical care services—which in turn limits the benefits of using the MCAC as a vehicle that can provide States with varied ideas, suggestions, and experiences on a range of issues related to the effective administration of the Medicaid program.

As such, we have determined the requirements governing MCACs need to be more robust to ensure all States are using these committees optimally to realize a more effective and efficient Medicaid program that is informed by the experiences of beneficiaries, their caretakers, and other interested parties. The current regulations have been in place without change for over 40 years.[21] Over the last four decades, we have learned that the current MCAC requirements are insufficient in ensuring that the beneficiary perspective is meaningfully represented on the MCAC. Recent research regarding soliciting input from individuals with lived experience, including our recent discussions with States about their MCAC, provide a unique opportunity to re-examine the purpose of this committee and update the policies to reflect four decades of program experience.

In 2022, we gathered feedback from various public engagement activities conducted with States, other interested parties, and directly from a subset of State Medicaid agencies that described a wide variation in how States are operating MCACs today. The feedback suggested that some MCACs operate simply to meet the broad Federal requirements. As discussed previously in this section, we have discovered that our current regulations do not further the statutory goal of meaningfully engaging Medicaid beneficiaries and other low-income people in matters related to the operation of the Medicaid program. Meaningful engagement can help develop relationships and establish trust between the communities served and the Medicaid agency to ensure States receive important information concerning how to best provide health coverage to their beneficiary populations. The current MCAC regulations establish the importance of broad feedback from interested parties, but they lack the specificity that can ensure States use MCACs in ways that facilitate that feedback.

The current regulations require that MCACs must include Medicaid beneficiaries as committee members. However, the regulations do not mention or account for the reality that other interested parties can stifle beneficiary contribution in a group setting. For example, when there are a small number of beneficiary representatives in large committees with providers, health plans, and professional advocates, it can be uncomfortable and intimidating for beneficiaries to share their perspective and experience. Based on these reasons, several States already use beneficiary-only groups that feed into larger MCACs.

Improvements to the MCACs are critical to ensuring a robust and accurate understanding of beneficiaries' challenges to health care access. The current regulations value State Medicaid agencies having a way to get feedback from interested parties on issues related to the Medicaid program. However, the current regulations lack specificity related to how MCACs can be used to benefit the Medicaid program more expressly by more fully promoting the beneficiary voice. MCACs need to provide a forum for beneficiaries and people with lived experience with the Medicaid program to share their experiences and challenges with accessing health care, and to assist States in understanding and better addressing those challenges. These committees also represent unique opportunities for States to include representation by members that reflect the demographics of their Medicaid program to ensure that the program is best serving the needs of all beneficiaries, but not all States are utilizing that opportunity.

This final rule strikes a balance that reflects how States currently use advisory committees (such as MCACs or standalone beneficiary groups). We know that some States approach these committees as a way to meet a Federal requirement while other States are using them in much more innovative ways. As a middle ground, this final rule seeks to: (1) address the gaps in the current regulations described previously in this section; and (2) establish requirements to implement more effective advisory committees. States will select members in a way that reflects a wide range of Medicaid interested parties (covering a diverse set of populations and interests relevant to the Medicaid program), place a special emphasis on the inclusion of the beneficiary perspective, and create a meeting environment where each voice is empowered to participate equally.

The changes we are making in this rule are rooted in best practices learned from States' experiences implementing the existing MCAC provisions and from other State examples of community engagement that support getting the type of feedback and experiences from beneficiaries, their caretakers, providers, and other interested parties that can then be used to positively impact care delivered through the Medicaid program.

Accordingly, this final rule includes changes that will support the implementation of the principles of bi-directional feedback, transparency, and accountability. We are making changes to the features of the new committee that can most effectively ensure member engagement, including the staff and logistical support that is required for beneficiaries and individuals representing beneficiaries to meaningfully participate in these committees. We are also making changes to expand the scope of topics to be addressed by the committee, address committee membership composition, prescribe the features of administration of the committee, establish requirements of an annual report, and underscore the importance of beneficiary engagement through the addition of a related beneficiary-only group.

C. Home and Community-Based Services (HCBS)

While Medicaid programs are required to provide medically necessary nursing facility services for most eligible individuals age 21 or older, coverage for

[21] 43 FR 45091 at 45189.

HCBS is a State option.[22] As a result of this ''institutional bias'' in the statute, Medicaid reimbursement for LTSS was primarily spent on institutional care, historically, with very little spending for HCBS.[23] However, over the past several decades, States have used several Medicaid authorities,[24] as well as CMS-funded grant programs,[25] to develop a broad range of HCBS to provide alternatives to institutionalization for eligible Medicaid beneficiaries and to advance person-centered care. Consistent with many beneficiaries' preferences for where they would like to receive their care, HCBS have become a critical component of the Medicaid program and are part of a larger framework of progress toward community integration of older adults and people with disabilities that spans efforts across the Federal government. In fact, total Medicaid HCBS expenditures surpassed the long-standing benchmark of 50 percent of LTSS expenditures in FY 2013 and has remained higher than 50 percent since then, reaching 55.4 percent in FY 2017 and 62.5 percent in FY 2020.[26] A total of 35 States spent at least 50 percent of Medicaid LTSS expenditures on HCBS in FY 2020.

Furthermore, HCBS play an important role in States' efforts to achieve compliance with Title II of the Americans with Disabilities Act (ADA) of 1990, section 504 of the Rehabilitation Act of 1973 (section 504),[27] section 1557 of the Affordable Care Act, and the Supreme Court's decision in *Olmstead* v. *L.C.,*[28] in which the Court held that unjustified segregation of persons with disabilities is a form of unlawful discrimination under the ADA [29] and States must ensure that persons with disabilities are served in the most integrated setting appropriate to their needs.[30] Section 9817 of the American Rescue Plan Act of 2021 (ARP) (Pub. L. 117–2) recently made a historic investment in Medicaid HCBS by providing qualifying States with a temporary 10 percentage point increase to the FMAP for certain Medicaid expenditures for HCBS that States must use to implement or supplement the implementation of one or more activities to enhance, expand, or strengthen HCBS under the Medicaid program.[31]

Medicaid coverage of HCBS varies by State and can include a combination of medical and non-medical services, such as case management, homemaker, personal care, adult day health, habilitation (both day and residential), and respite care services. HCBS programs serve a variety of targeted population groups, such as older adults, and children and adults with intellectual or developmental disabilities, physical disabilities, mental health/substance use disorders, and complex medical needs. HCBS programs provide opportunities for Medicaid beneficiaries to receive services in their own homes and communities rather than in institutions.

CMS and States have worked for decades to support the increased availability and provision of high-quality HCBS for Medicaid beneficiaries. While there are quality and reporting requirements for Medicaid HCBS, the requirements vary across authorities and are often inadequate to provide the necessary information for ensuring that HCBS are provided in a high-quality manner that best protects the health and welfare of beneficiaries. Consequently, quality measurement and reporting expectations are not consistent across and within services, but instead vary depending on the authorities under which States are delivering services. Additionally, States have flexibility to determine the quality measures they use in their HCBS programs. While we support State flexibility, a lack of standardization has resulted in thousands of metrics and measures currently in use across States, with different metrics and measures often used for different HCBS programs within the same State. As a result, CMS and States are limited in the ability to compare HCBS quality and outcomes within and across States or to compare the performance of HCBS programs for different populations.

In addition, although there are differences in rates of disability among demographic groups, there are very limited data currently available to assess disparities in HCBS access, utilization, quality, and outcomes. Few States have the data infrastructure to systematically or routinely report data that can be used to assess whether disparities exist in HCBS programs. This lack of available data also prevents CMS and States from implementing interventions to make improvements in HCBS programs designed to consistently meet the needs of all beneficiaries. Compounding these concerns have been notable and high-profile instances of abuse and neglect in recent years, which have been shown to result from poor quality care and inadequate oversight of HCBS in Medicaid. For example, a 2018 report, ''Ensuring Beneficiary Health and Safety in Group Homes Through State Implementation of Comprehensive Compliance Oversight,'' [32] (''Joint Report''), which was jointly developed by the U.S. Department of Health Human Services' Administration for Community Living (ACL), Office for Civil Rights (OCR), and the Office of

[32] Ensuring Beneficiary Health and Safety in Group Homes Through State Implementation of Comprehensive Compliance Oversight. US Department of Health and Human Services, Office of the Inspector General, Administration for Community Living, and Office for Civil Rights. January 2018. Accessed at *https://oig.hhs.gov/reports-and-publications/featured-topics/group-homes/group-homes-joint-report.pdf*.

Inspector General (OIG), found systemic problems with health and safety policies and procedures being followed in group homes and that failure to comply with these policies and procedures left beneficiaries in group homes at risk of serious harm. In addition, while existing regulations provide safeguards for all Medicaid beneficiaries in the event of a denial of Medicaid eligibility or an adverse benefit determination by the State Medicaid agency and, where applicable, by the beneficiary's managed care plan, there are no safeguards related to other issues that HCBS beneficiaries may experience, such as the failure of a provider to comply with the HCBS settings requirements or difficulty accessing the services in the person-centered service plan unless the individual is receiving those services through a Medicaid managed care arrangement.

Finally, through our regular interactions with State Medicaid agencies, provider groups, and beneficiary advocates, we observed that all these interested parties routinely cite a shortage of direct care workers and high rates of turnover in direct care workers among the greatest challenges in ensuring access to high-quality, cost-effective HCBS for people with disabilities and older adults. Some States have also indicated that a lack of direct care workers is preventing them from transitioning individuals from institutions to home and community-based settings. While workforce shortages have existed for years, they have been exacerbated by the COVID–19 pandemic, which has resulted in higher rates of direct care worker turnover (for instance, due to higher rates of worker-reported stress), an inability of some direct care workers to return to their positions prior to the pandemic (for instance, due to difficulty accessing child care or concerns about contracting COVID–19 for people with higher risk of severe illness), workforce shortages across the health care sector, and wage increases in types of retail and other jobs that tend to draw from the same pool of workers.[33] [34] [35]

To address the list of challenges outlined in this section, we proposed Federal requirements to improve access to care, quality of care, and health and quality of life outcomes; promote health equity for people receiving Medicaid-covered HCBS; and ensure that there are safeguards in place for beneficiaries who receive HCBS through FFS delivery systems. We solicited comment on other areas for rulemaking consideration. The requirements we are finalizing in this rule are intended, individually and as a whole, to promote public transparency related to the administration of Medicaid HCBS programs.

D. Fee-For-Service (FFS) Payment

Section 1902(a)(30)(A) of the Act requires States to ''assure that payments are consistent with efficiency, economy, and quality of care and are sufficient to enlist enough providers so that care and services are available under the plan at least to the extent that such care and services are available to the general population in the geographic area.'' Regulations at § 447.203 require States to develop and submit to CMS an access monitoring review plan (AMRP) for a core set of services. Currently, the regulations rely on available State data to support a determination that the State's payment rates are sufficient to ensure access to care in Medicaid FFS that is at least as great for beneficiaries as is generally available to the general population in the geographic area, as required under section 1902(a)(30)(A) of the Act.

In the May 6, 2011, **Federal Register**, we published the Medicaid Program; Methods for Assuring Access to Covered Medicaid Services proposed rule (76 FR 26341; hereinafter ''2011 proposed rule''), which outlined a data-driven process for States with Medicaid services paid through a State plan under FFS to follow in order to document their compliance with section 1902(a)(30)(A) of the Act. We finalized the 2011 proposed rule in the November 2, 2015, **Federal Register** when we published the ''Medicaid Program; Methods for Assuring Access to Covered Medicaid Services'' final rule with comment period (80 FR 67576; hereinafter ''2015 final rule with comment period''). Among other requirements, the 2015 final rule with comment period required States to develop and submit to CMS an AMRP for certain Medicaid services that is updated at least every 3 years. Additionally, the rule required that when States submit a SPA to reduce or restructure provider payment rates, they must consider the data collected through the AMRP and undertake a public process that solicits input on the potential impact of the proposed reduction or restructuring of Medicaid FFS payment rates on beneficiary access to care. We published the ''Medicaid Program; Deadline for Access Monitoring Review Plan Submissions'' final rule in the April 12, 2016 **Federal Register** (81 FR 21479; hereinafter ''2016 final rule'') with a revised deadline for States' AMRPs to be submitted to us.

Following the implementation of the AMRP process, numerous States have expressed concern regarding the administrative burden associated with the 2015 final rule with comment period requirements, especially those States with high rates of beneficiary enrollment in managed care. In an attempt to address some of the States' concerns regarding unnecessary administrative burden, we issued a State Medicaid Director letter (SMDL) on November 16, 2017 (SMDL #17–004), which clarified the circumstances in which provider payment reductions or restructurings would likely not result in diminished access to care, and therefore, would not require additional analysis and monitoring procedures described in the 2015 final rule with comment period.[36] Subsequently, in the March 23, 2018 **Federal Register**, we published the ''Medicaid Program; Methods for Assuring Access to Covered Medicaid Services-Exemptions for States With High Managed Care Penetration Rates and Rate Reduction Threshold'' proposed rule (83 FR 12696; hereinafter ''2018 proposed rule''), which would have exempted States from requirements to analyze certain data or monitor access when the vast majority of their covered beneficiaries receive services through managed care plans. That proposed rule, if it had been finalized, would have provided similar flexibility to all States when they make nominal rate reductions or restructurings to FFS payment rates. Based on the responses received during the public comment period, we decided not to finalize the proposed exemptions.

In the July 15, 2019, **Federal Register**, we published the ''Medicaid Program; Methods for Assuring Access to Covered Medicaid Services-Rescission'' proposed rule (84 FR 33722; hereinafter ''2019 proposed rule'') to rescind the regulatory access requirements at §§ 447.203(b) and 447.204, and

[36] State Medicaid Director Letter #17–0004 Re: Medicaid Access to Care Implementation Guidance. Accessed at *https://www.medicaid.gov/federal-policy-guidance/downloads/smd17004.pdf* (November 2017).

concurrently issued a CMCS Informational Bulletin (CIB) [37] stating the agency's intention to establish a new access strategy. Based on the responses we received during the public comment period, we decided not to finalize the 2019 proposed rule, and instead continue our efforts and commitment to develop a data-driven strategy to understand access to care in the Medicaid program.

States have continued to question whether the AMRP process is the most effective or accurate reflection of access to care in a State's Medicaid program, and requested we provide additional clarity on the data necessary to support compliance with section 1902(a)(30)(A) of the Act. In reviewing the information that States presented through the AMRPs, we also have questioned whether the data and analysis consistently address the primary access-related question posed by section 1902(a)(30)(A) of the Act—namely, whether rates are sufficient to ensure access to care at least as great as that enjoyed by the general population in geographic areas. The unstandardized nature of the AMRPs, which largely defer to States to determine appropriate data measures to review and monitor when documenting access to care, have made it difficult to assess whether any single State's analysis demonstrates compliance with section 1902(a)(30)(A) of the Act.

While the AMRPs were intended to be a useful guide to States in the overall process to monitor beneficiary access, they are generally limited to access in FFS delivery systems and focus on targeted payment rate changes rather than the availability of care more generally or population health outcomes (which may be indicative of the population's ability to access care). Moreover, the AMRP processes are largely procedural in nature and not targeted to specific services for which access may be of particular concern, requiring States to engage in triennial reviews of access to care for certain broad categories of Medicaid services—primary care services, physician specialist services, behavioral health services, pre- and post-natal obstetric services, and home health services. Although the 2016 final rule discussed that the selected service categories were intended to be indicators for available access in the overall Medicaid FFS system, these categories do not directly translate to the services authorized under section 1905(a) of the Act, granting States deference as to how broadly or narrowly to apply the AMRP analysis to services within their programs. For example, the category ''primary care services'' could encompass several of the Medicaid service categories described within section 1905(a) of the Act and, without clear guidance on which section 1905(a) services categories, qualified providers, or procedures we intended States to include within the AMRP analyses, States were left to make their own interpretations in analyzing access to care under the 2016 final rule.

Similarly, a number of the AMRP data elements, both required and suggested within the 2016 final rule, may be overly broad, subject to interpretation, or difficult to obtain. Specifically, under the 2016 final rule provisions, States are required to review: the extent to which beneficiary needs are fully met; the availability of care through enrolled providers to beneficiaries in each geographic area, by provider type and site of service; changes in beneficiary utilization of covered services in each geographic area; the characteristics of the beneficiary population (including considerations for care, service and payment variations for pediatric and adult populations and for individuals with disabilities); and actual or estimated levels of provider payment available from other payers, including other public and private payers, by provider type and site of service. Although service utilization and provider participation are relatively easy measures to source and track using existing Medicaid program data, an analysis of whether beneficiary needs are fully met is at least somewhat subjective and could require States to engage in a survey process to complete. Additionally, while most Medicaid services have some level of equivalent payment data that can be compared to other available public payer data, such as Medicare, private payer information may be proprietary and difficult to obtain. Therefore, many States struggled to meet the regulatory requirement to compare Medicaid program rates to private payer rates because of their inability to obtain private payer data.

Due to these issues, States produced varied AMRPs through the triennial process that were, as a whole, difficult to interpret or to use in assessing compliance with section 1902(a)(30)(A) of the Act. In isolation, a State's specific AMRP most often presented data that could be meaningful as a benchmark against changes within a State's Medicaid program, but did not present a case for Medicaid access consistent with the general population in geographic areas. Frequently, the data and information within the AMRPs were presented without a formal determination or attestation from the State that the information presented established compliance with section 1902(a)(30)(A) of the Act. Because the States' AMRPs generally varied to such a great degree, there was also little to glean in making State-to-State comparisons of performance on access measures, even for States with geographic and demographic similarities.

Based on results of the triennial AMRPs, we were uncertain of how to make use of the information presented within them other than to make them publicly available. We published the AMRPs on Medicaid.gov but had little engagement with States on the content or results of the AMRPs since much of the information within the plans could not meaningfully answer whether access in Medicaid programs satisfied the requirements of section 1902(a)(30)(A) of the Act. Additionally, we received little feedback from providers, beneficiaries, or advocates on whether or how interested parties made use of the triennial AMRPs. However, portions of the 2016 final rule related to public awareness and feedback on changes to Medicaid payment rates and the analysis that we received from individual States proposing to make rate changes was of great benefit in determining approvals of State payment change proposals. Specifically, the portion of the AMRP process where States update their plans to describe data and measures to serve as a baseline against which they monitor after reducing or restructuring Medicaid payments allows States to document consistency with section 1902(a)(30)(A) of the Act at the time of SPA submission, usually as an assessment of how closely rates align with Medicare rates, and to understand the impact of reductions through data monitoring after SPA approval.

Under this final rule, we balance elimination of unnecessary Federal and State administrative burden with robust implementation of the Federal and State shared obligation to ensure that Medicaid payment rates are set at levels sufficient to ensure access to care for beneficiaries consistent with section 1902(a)(30)(A) of the Act. The provisions of this final rule, as discussed in more detail later, will better achieve this balance through improved transparency of Medicaid FFS payment rates, through publication of a comparative payment rate analysis to Medicare and payment rate disclosures,

[37] CMCS Informational Bulletin: Comprehensive Strategy for Monitoring Access in Medicaid, Accessed at *https://www.medicaid.gov/federal-policy-guidance/downloads/CIB071119.pdf* (July 2019).

and through a more targeted and defined approach to evaluating data and information when States propose to reduce or restructure their Medicaid payment rates. Payment rate transparency is a critical component of assessing compliance with section 1902(a)(30)(A) of the Act. In addition, payment rate transparency helps to ensure that interested parties have basic information available to them to understand Medicaid payment levels and the associated effects of payment rates on access to care so that they may raise concerns to State Medicaid agencies via the various forms of public processes discussed within this final rule. Along with improved payment rate transparency and disclosures as well as comparative payment rate analyses, we are finalizing a more efficient process for States to undertake when submitting rate reduction or restructuring SPAs to CMS for review. As we move toward aligning our Medicaid access to care strategy across FFS and managed care delivery systems, we will consider additional rulemaking to help ensure that Medicaid payment rate information is appropriately transparent and rates are fully consistent with broad access to care across delivery systems, so that interested parties have a more complete understanding of Medicaid payment rate levels and resulting access to care for beneficiaries.

II. Summary of the Proposed Provisions and Analysis of and Responses to the Public Comments

We received 2,123 public comments from individuals and organizations, including, but not limited to, individuals, State government agencies, non-profit health care organizations, advocacy groups, associations, law firms, managed care plans, academic groups, and tribal organizations. We thank and appreciate the commenters for their consideration of the proposed requirements for ensuring access to care, quality and health outcomes, and better addressing health equity issues in the Medicaid program across FFS and managed care delivery systems, and in HCBS programs. In general, commenters supported the proposed rule. In this section, arranged by subject area, we summarize the proposed provisions, the public comments received, and our responses. For a complete and full description of the proposed requirements, see the 2023 proposed rule, ''Medicaid Program; Ensuring Access to Medicaid Services'' (88 FR 27960, May 5, 2023) hereafter referred to as the ''proposed rule.''

We also received a number of out-of-scope comments that are not addressed in this final rule. In addition, we received some comments which were s solely applicable to the Managed Care proposed rule. Please see the Managed Care final rule for a for a summary of the comments CMS received pertaining to that proposed rule.

We are clarifying and emphasizing our intent that if any provision of this final rule is held to be invalid or unenforceable by its terms, or as applied to any person or circumstance, or stayed pending further action, it shall be severable from this final rule, and from rules and regulations currently in effect, and not affect the remainder thereof or the application of the provision to other persons not similarly situated or to other, dissimilar circumstances. If any provision is held to be invalid or unenforceable, the remaining provisions which could function independently, should take effect and be given the maximum effect permitted by law. Through this rule, we adopt provisions that are intended to and will operate independently of each other, even if each serves the same general purpose or policy goal. Where a provision is necessarily dependent on another, the context generally makes that clear.

Finally, we note that we are finalizing with modification several of the dates for when we expect States to begin complying with the requirements being finalized in this rule, instead of what we proposed. Generally, we are finalizing that this rule, including the proposals being finalized herein, will be effective 60 days after publication of this final rule. However, we are finalizing that States are not required to begin compliance with most requirements being finalized in this rule until a specified applicability date, which we have specified for each such individual proposal being finalized. We discuss in detail the applicability date we are finalizing for each proposal being finalized in this rule in the respective section of this preamble. We encourage States, providers, and interested parties to confirm the applicability dates indicated in this final rule for any changes from the proposed. To assist, we are including Table 1 with the provisions and relevant timing information and dates.

BILLING CODE 4120–01–P

TABLE 1: Provisions and Relevant Timing Information and Dates*

Regulation Section(s) in Title 42 of the CFR	Applicability Dates**
Medicaid Advisory Committee (MAC) & Beneficiary Advisory Council (BAC) § 431.12	*Establishment of MAC and BAC*: 1 year after the effective date of the final rule.
	BAC crossover on MAC: For the period from the effective date of the final rule through 1 year after the effective date, 10 percent; for the period from year 1 plus one day through year 2 after the effective date of the final rule, 20 percent; and thereafter, 25 percent of committee members must be from the BAC
	Annual report: States have 2 years from the effective date of the final rule to finalize the first annual report. After the report has been finalized, States will have 30 days to post the annual report.
Person-Centered Service Plans §§ 441.301(c)(1) and (3), 441.450(c), 441.540(c), and 441.725(c)	Beginning 3 years after the effective date of the final rule***
Grievance Systems §§ 441.301(c)(7), 441.464(d)(5), 441.555(e), and 441.745(a)(1)(iii)	Beginning 2 years after the effective date of the final rule
Incident Management System §§ 441.302(a)(6), 441.464(e), 441.570(e), 441.745(a)(1)(v), and (b)(1)(i)	Beginning 3 years after the effective date of the final rule***; except for the requirement at § 441.302(a)(6)(i)(B) (electronic incident management system), which begins 5 years after the effective date of the final rule***
HCBS Payment Adequacy §§ 441.302(k), 441.464(f), 441.570(f), and 441.745(a)(1)(vi)	Beginning 6 years after the effective date of the final rule***
Reporting Requirements §§ 441.311, 441.474(c), 441.580(i), and 441.745(a)(1)(vii)	Beginning 3 years after the effective date of the final rule*** for § 441.311(b) (compliance reporting) and § 441.311(d) (access reporting) Beginning 4 years after the effective date of the final rule*** for § 441.311(c) (reporting on the HCBS Quality Measure Set) and (e) (HCBS payment adequacy reporting)
HCBS Quality Measure Set §§ 441.312, 441.474(c), 441.585(d), and 441.745(b)(1)(v)	HHS Secretary begins identifying quality measures no later than December 31, 2026, and no more frequently than every other year. HHS Secretary shall make technical updates and corrections to the HCBS Quality Measure Set annually as appropriate.
Website Transparency §§ 441.313, 441.486, 441.595, and 441.750	Beginning 3 years after the effective date of the final rule***
Payment Rate Transparency Publication § 447.203(b)(1)	July 1, 2026, then updated within 30 days of a payment rate change.
Comparative Payment Rate Analysis Publication § 447.203(b)(2) to (4)	July 1, 2026, then every 2 years
Payment Rate Disclosure § 447.203(b)(2) to (4)	July 1, 2026, then every 2 years
Interested Parties Advisory Group § 447.203(b)(6)	The first meeting must be held within 2 years after effective date of the final rule (then at least every 2 years).
Rate Reduction and Restructuring SPA procedures § 447.203(c)(1) and (2)	Effective date of the final rule

* Regulatory provisions in this table are applicable at the time this rule becomes effective.

** In this final rule, including the regulations being finalized herein, we use the term "applicability date" to indicate when a new regulatory requirement will be applicable and when States must begin compliance with the requirements as specified in that regulation.

*** In the case of the State that implements a managed care delivery system under the authority of sections 1915(a), 1915(b), 1932(a), or 1115(a) of the Act and includes HCBS in the managed care organization's (MCO), prepaid inpatient health plan's (PIHP), or prepaid ambulatory health plan's (PAHP) contract, the applicability date is the first rating period for contracts with the MCO, PIHP or PAHP beginning on or after the applicability date specified in the chart.

BILLING CODE 4120–01–C

A. Medicaid Advisory Committee and Beneficiary Advisory Council (§ 431.12)

The current regulations at § 431.12 require States to have a Medical Care Advisory Committee (MCAC) to advise the State Medicaid agency about health and medical care services. The regulations are intended to ensure that State Medicaid agencies had a way to receive feedback regarding health and medical care services from interested parties. However, these regulations lacked specificity related to how these committees can be used to ensure the proper and efficient administration of the Medicaid program more expressly by more fully promoting beneficiary perspectives.

Under the authority of section 1902(a)(4) of the Act, section 1902(a)(19) of the Act, and our general rulemaking authority in section 1102 of the Act, we are finalizing proposals to § 431.12 to replace the current MCAC requirements with a committee framework designed to ensure the proper and efficient administration of the Medicaid program and to better ensure that services under the Medicaid program will be provided in a manner consistent with the best interests of the beneficiaries. States will be required to establish and operate the newly named Medicaid Advisory Committee (MAC) and a Beneficiary Advisory Council (BAC). Please note that in the proposed rule, the BAC was referred to as the Beneficiary Advisory Group, or BAG. The MAC and its corresponding BAC will serve as vehicles for bi-directional feedback between interested parties and the State on matters related to the effective administration of the Medicaid program as determined by the State and MAC. With the changes in this final rule FFP, or Federal match, for Medicaid administrative activities will remain available to States for expenditures related to MAC and BAC activities in the same manner as the former MCAC.

The proposed and finalized requirements of the MAC amend previous and add new Federal requirements to: (1) expand the scope and use of States' MACs; (2) rename the Medicaid Advisory Committee, which will advise the State on a range of issues including medical and non-medical services; (3) require States to establish a BAC; (4) establish minimum requirements for Medicaid beneficiary representation on the MAC, membership, meetings materials, and attendance; and (5) promote transparency and accountability between the State and interested parties by making information on the MAC and BAC activities publicly available. The finalized requirements aimed at promoting transparency and accountability also include a requirement for States to create and publicly post an annual report summarizing the MAC and BAC activities.

We note that some commenters expressed general support for all of the provisions in section II.A. of this rule, as well as for this rule in its entirety. In response to commenters who supported some, but not all, of the policies and regulations we proposed in the proposed rule, we are clarifying and emphasizing our intent that each final policy and regulation is distinct and severable to the extent it does not rely on another final policy or regulation that we proposed.

While the provisions in section II.A. of this final rule are intended to present a comprehensive approach to implementing Medicaid Advisory Committees and Beneficiary Advisory Councils, and these provisions complement the goals expressed and policies and regulations being finalized in sections II.B. (Home and Community-Based Services) and II.C.(Documentation of Access to Care and Service Payment Rates) of this final rule, we intend that each of them is a distinct, severable provision, as finalized. Unless otherwise noted in this rule, each policy and regulation being finalized under this section II.A is distinct and severable from other final policies and regulations being finalized in this section or in sections II.B. or II.C of this final rule, as well as from rules and regulations currently in effect.

Consistent with our previous discussion earlier in section II. of this final rule regarding severability, we are clarifying and emphasizing our intent that if any provision of this final rule is held to be invalid or unenforceable by its terms, or as applied to any person or circumstance, or stayed pending further State action, it shall be severable from this final rule, and from rules and regulations currently in effect, and not affect the remainder thereof or the application of the provision to other persons not similarly situated or to other, dissimilar circumstances. For example, we intend that the policies and regulations we are finalizing related to the State Plan requirement (section II.A.2 of this final rule) are distinct and severable from the policies and regulations we are finalizing related to the MAC Membership and Composition requirement and the Annual Report requirement (sections II.A.4 and II.A.9 of this final rule, which we further intend are severable from each other).

1. Basis and Purpose (§ 431.12(a))

Under § 431.12 of the current regulation, paragraph (a) Basis and Purpose, sets forth a State plan requirement for the establishment of a committee (Medical Care Advisory Committee) to advise the Medicaid agency about health and medical care services. In the proposed rule, we proposed to amend the title of § 431.12 and paragraph (a) to update the name of the existing MCAC to the Medicaid Advisory Committee (MAC), and to add the requirement for States to establish and operate a dedicated advisory council comprised of Medicaid beneficiaries, the Beneficiary Advisory Group. In this final rule, we are changing the name from the Beneficiary Advisory Group to the Beneficiary Advisory Committee (BAC).

In the proposed rule, we stated that our goal was for the committee and its corresponding advisory council to serve in an advisory role to the State on issues related to health and medical services, as the MCAC did, as well as on other matters related to policy development and to the effective administration of the Medicaid program consistent with the language of section 1902(a)(4)(B) of the Act, which requires a State plan to meaningfully engage Medicaid beneficiaries and other low-income people in the administration of the plan.[38] The Medicaid program covers medical services and is increasingly also covering services designed to address beneficiaries' social determinants of health and their health-related social needs more generally. Therefore, we believe that the MAC should discuss topics directly related to covered services as well as the potential need for the coverage of additional services that may be necessary to ensure that beneficiaries are able to meaningfully access these services. Expanding the scope of the current committee is necessary in order to align with the expanding scope of the Medicaid program. These changes are consistent with section 1902(a)(4)(B) of the Act because the MAC creates a formalized way for interested parties and beneficiary representatives to provide feedback to the State about issues related to the Medicaid program and the services it covers. The feedback from the MAC and BAC will be used by the State to ensure that the program operates efficiently and as it was designed to operate.

We received public comments on these proposals. The following is a

[38] Medicaid Program; Ensuring Access to Medicaid Services,'' (88 FR 27967).

summary of the comments we received and our responses.

Comment: We received a large number of comments in support of the proposed changes to the MCAC regulation and structure as proposed in § 431.12(a). The commenters expressed broad support for creation of the dual structure of the MAC and BAC. They noted that the creation of the BAC was a positive and welcome step to better capturing the lived experiences of people enrolled in Medicaid. Commenters also noted that having the BAC advise the MAC on policy development was a way to prioritize beneficiaries' perspectives. Commenters noted that the improvements proposed to the existing MCAC structure had the potential to be transformative and make the State more attuned to the needs and priorities of Medicaid beneficiaries.

Response: We thank commenters for their support of our overhaul of the MCAC. We are finalizing as proposed, with minor technical changes, the creation of the MAC and BAC.

Comment: We also received comments in opposition to the creation of a BAC. Generally, opposing commenters wanted CMS to be less prescriptive and allow States to engage Medicaid beneficiaries in other ways (for example, using existing State committees to serve as the BAC, conducting focus groups, and fielding surveys). Other commenters noted that States would need resources to implement the BAC, citing the additional administrative burden and layering of meetings for certain members.

Response: We encourage States to engage with their Medicaid beneficiaries in a variety of ways, and we understand that many States may already operate groups or committees comprised of Medicaid beneficiaries. However, having a formalized structure to work directly with Medicaid beneficiaries will help to ensure a level and manner of engagement across all State programs. For the commenters concerned with the BAC adding administrative burden, we acknowledge that implementing these changes will create administrative burden. We discuss administrative burden to States in the Regulatory Impact Analysis section of this rule. However, in an effort to minimize administrative burden for States, we note that existing committees can be used to fulfill the BAC requirement as long as the committees meet the membership requirements specified in § 431.12(e). Later in this section, we also note that States do not have to use the same BAC members to join all MAC meetings. While it may not be an ideal way to create long-term consistency of the MAC membership, States could, in an effort to lessen the time commitment of BAC members, choose to rotate which members attend the quarterly MAC meetings.

Comment: We received several comments asking for the BAG name to be changed. The commenters cited potentially negative connotations that could be associated with the acronym BAG. Additionally, a few commenters requested that States with existing beneficiary groups be able to maintain their names.

Response: We have changed the name of the BAG to the BAC, as noted earlier in this final rule. For commenters concerned with duplicative efforts, we noted in the proposed rule that States with existing BAC-like committees can use those committees to fulfil the BAC requirement as long as they meet the membership requirements specified § 431.12(e). States are not required to change their existing group names to match the BAC name as long as interested parties understand what existing group or committee is being used to fulfill regulatory requirement of the BAC. To clarify this for interested parties, States must note in their publicly posted by-laws (§ 431.12 (f)(1)) that the group is being used to fulfill the regulatory requirements of § 431.12.

Comment: Several commenters asked CMS to clarify the role of the MAC and BAC, citing that in the proposals, the language varies from ''advisory'' to ''providing feedback.'' Other commenters expressed that they do not want the MAC and BACs to be approval bodies that lack the ability to make decisions.

Response: The primary role of the MAC and BAC is to advise the State Medicaid agency on policy development and on matters related to the effective administration of the Medicaid program. It is our intention that the MAC and BAC serve in an advisory capacity to the State. However, serving in an advisory capacity does not preclude the MAC and BAC members from sharing experiential feedback. We did not propose to give the MAC or BAC a decision-making role because we want to allow States the freedom to administer their Medicaid programs in the manner they see fit, but be guided by these two entities' recommendations and experiences with the Medicaid program.

Comment: We received a comment asking CMS to require that the MAC and BAC not be used to take the place of a State's tribal consultation requirements.

Response: We do not anticipate that the MAC or BAC could be used to fulfill tribal consultation requirements under section 1902(a)(73) of the Act. For States with one or more Indian Health Programs or Urban Indian Organizations that furnish health care services, the State must consult with such Programs and Organizations on a regular, ongoing basis. While the statute specifically permits representatives of such Programs and Organizations to be included on the MCAC [now known as the MAC], this alone would not meet the requirement to consult on any State plan amendments (SPAs), waiver requests, and proposals for demonstration projects likely to have a direct effect on Indians, Indian Health Programs, or Urban Indian Organizations prior to submission.

Comment: We received a few comments requesting that CMS conduct a study to assess which States already have MCACs or BACs to ensure they are no duplicative efforts. Another commenter asked CMS to solicit feedback from existing MCAC members to see how it can be improved before making beneficiary groups a requirement.

Response: We clarify that MCACs are currently required of all States so conducting an assessment to see which States already have MCACs would not necessarily result in a lot of new information. However, we agree that understanding which States already have BAC-like committees in place would be helpful. In fact, when developing the proposed rule, we engaged with interested parties, both from State Medicaid agencies and the wider Medicaid community, to determine what improvements were needed to the MCACs to allow States and beneficiaries to obtain the most benefit from their work. For commenters concerned with duplicative BAC activities, we note again that States with an existing beneficiary group or beneficiary committee that meets the requirement of the BAC, as finalized in this rule at § 431.12(e), do not need to set up a second beneficiary committee.

Comment: We received a few comments asking CMS to require the MAC and BAC to coordinate with other State advisory committees.

Response: States will vary in how they run their advisory committees. Some States may choose to coordinate across their different advisory committees, while other States may have reasons for keeping their advisory committees and their processes separate. We do not want to add more administrative burden by adding a requirement to § 431.12 for States to coordinate across State advisory committees. However, if coordinating

across these committees in some manner would be advantageous for the Medicaid program, then we encourage the State to do so.

After consideration of public comments, we are finalizing § 431.12(a) as proposed with the following change:

Language modifications to reflect the new name of the ''Beneficiary Advisory Council (BAC).''

2. State Plan Requirement (§ 431.12(b))

Under § 431.12 of the current regulation, paragraph (b) State Plan Requirement, calls for a State plan to provide for a MCAC to advise the Medicaid agency director about health and medical care services.

We proposed conforming updates to paragraph (b) regarding the State plan requirements, to reflect the addition of the BAC and the expanded scope.

The Interested Parties Advisory Group, described in a later section of this final rule (Interested Parties Advisory Group § 447.203(b)(6)), is designed to advise States on rate setting and other matters for certain HCBS and is not related to the MAC or BAC specified here. In section II.C.2.c. of this final rule, under § 447.203(b)(6), we explain that States will have the option to use its MAC and BAC to provide recommendations for payment rates, thereby satisfying the requirements of § 447.203(b)(6). However, the MAC and BAC requirements finalized here are wholly separate from the Interested Parties Advisory Group.

We did not receive public comments on § 431.12(b). However, we are making one conforming edit to this paragraph based on a language change identified in § 431.12(c) to replace the term State Medicaid Director. We are finalizing as proposed with the following changes:

- Language modifications to reflect the new name of the ''Beneficiary Advisory Council (BAC).''
- Replacing the term Medicaid Agency Director with the term, ''director of the single State Agency for the Medicaid program.''

3. Selection of Members (§ 431.12(c))

Under § 431.12 of the current regulation, paragraph (c) Appointment of members, the agency director, or a higher State authority, must appoint members to the advisory committee on a rotating and continuous basis.

We proposed to revise paragraph (c) to specify that the members of the MAC and BAC must be appointed by the agency director or a higher State authority on a rotating and continuous basis. We also proposed to require the State to create a process for the recruitment and appointment of members of the MAC and BAC. Additionally, we proposed to require the State to post this information on the State's website. As discussed in the proposed rule,[39] the website page where this information is located would be required to be easily accessible by the public. These proposed updates align with how some States' existing MCACs are already run, which will facilitate the transition of these MCACs into MAC/BACs. Additionally, the proposed changes are designed to provide additional details to support States' operation of the MAC and BAC. Further, we believe these proposed updates will facilitate transparency, improving the current regulations, which did not mention nor promote transparency of information related to the MCAC with the public. We also believe that transparency of information can lead to enhanced accountability on the part of the State in making its MAC and BAC as effective as possible.

We received public comments on these proposals. The following is a summary of the comments we received and our responses.

Comment: We received several comments regarding the terms used to describe who should be given the authority to appoint members to the MAC and BAC. Many commenters supported the proposal of having the State Medicaid Director appoint the members. A few commenters suggested that we make clarifications to the proposed regulation language so that only the State Medicaid Director and not ''a higher State authority'' is referenced, since the work of the MAC and BAC is to advise the State Medicaid Director. Others noted that the correct term to use in the regulation when referring to the State Medicaid Director is the director of the single State agency for the Medicaid program. There was another category of commenters that did not believe the authority to select MAC and BAC members should sit with either the State Medicaid Director or a higher State Authority. These commenters instead stated it would be more equitable if prospective MAC and BAC members were selected by an outside company, a computer, at random, or by a lottery system. They noted that in their experiences sometimes parents or family members are excluded from selection processes. Finally, other commenters noted that the term ''appointed'' implied that the State did not use any kind of a ''selection process'' to choose its MAC and BAC members. These commenters may have felt that the term ''appoint'' means that the State can simply pick whomever it wants to serve as a member rather than ''selecting'' members from a pool of people who submitted applications to serve as MAC or BAC members.

Response: We appreciate the comments provided on this section and acknowledge the complicated work that comes with selecting MAC and BAC members. Since the MAC and BAC serve in an advisory role to the Medicaid program, we believe strongly that the authority to select should lie with the director of the State Medicaid agency. We know that Medicaid agencies' names may vary from State to State, and thus, agree that language in the regulation can be changed to more clearly reflect a more commonly used term for the Medicaid agency (that is, the single State Agency for the Medicaid Program). For commenters that expressed concern that parents or family members are excluded from the selection processes, we note that the BAC regulations require both Medicaid beneficiaries and individuals with direct experience supporting Medicaid beneficiaries, such as family members to be selected. Finally, we agree that the word ''appoint'' in the proposed rule does not accurately reflect the intention of the regulation and could be misinterpreted to mean that the State did not use a selection process where interested parties submit an application and then the State reviews those applications before selecting its MAC and BAC members. Based on the comments we received, we now understand that the term ''appoint'' can be taken to mean that a selection process did not occur. We want to avoid any confusion that the requirements are asking the State to appoint members without using a selection process, which was not our intention. For clarity, we are also amending the regulatory language in § 431.12(c) to now state that the ''director of the single State Agency for the Medicaid program,'' must ''select'' members for the MAC and BAC.

Comment: We received comments on the proposed changes to § 431.12(c) related to term limits of the MAC and BAC members. The commenters were generally divided across wanting CMS to require States to have set term limits for members, not wanting any term limits, and not wanting short term limits. Commenters who expressed support for set term limits noted that setting term limits ensured that new perspectives would be added on a regular basis while others noted that setting term limits allowed members to

[39] Medicaid Program; Ensuring Access to Medicaid Services,'' (88 FR 27960, 27968).

share recommendations or constructive criticism without fear of retaliation. The commenters who opposed term limits noted that finding people with Medicaid expertise may be difficult in some geographic areas and, as a result, the State would benefit from having the same members serve without term limits. Other commenters noted that it takes time for members to build their expertise and understanding of the Medicaid program and setting short term limits may not take into account the time needed to accumulate enough knowledge to contribute fully to the MAC and BAC. These commenters suggested term limits with lengths ranging from 2 to 6 years.

Response: States have the ability to determine the tenure of members, as States are best situated to assess their members' ability to participate in and meaningfully contribute to the MAC and BAC and for what length of time. In the proposed rule, we described the requirement for States to determine the length of terms for committee and council members. For clarity, we are amending the regulatory language in § 431.12(c) to reflect this information as well, to now state ''. . . members to the MAC and BAC for a term of a length determined by the State, which may not be followed immediately by a consecutive term for the same member, on a rotating and continuous basis.'' We proposed this type of term because we believe there is value in ensuring new voices and perspectives are introduced to the committee and council. We further clarify that once a MAC or BAC member's term has been completed, the State will select a new member, thus ensuring that MAC and BAC memberships rotate continuously. Setting memberships as continuously rotating means that the State must seek to recruit members to fill open seats on the MAC and BAC on an ongoing basis. States can also select members to serve multiple non-consecutive terms.

After consideration of public comments, we are finalizing § 431.12(c) with the following changes:

- Language modifications to reflect the new name of the BAC.
- Replacing the term agency director or higher authority with the term, ''director of the single State Agency for the Medicaid program.''
- Replacing the word ''appoint'' with ''select'' in various places.
- Adding language to the regulation to reflect that ''the term of length for MAC and BAC members will be term of a length determined by the State, which may not be followed immediately by a consecutive term for the same member, on a rotating and continuous basis.''

4. MAC Membership and Composition (§ 431.12(d))

Under § 431.12 of the current regulation, paragraph (d), Committee Membership, States are required to select three types of committee members: (1) Board-certified physicians and other representatives of the health professions who are familiar with the medical needs of low-income population groups and with the resources available and required for their care; (2) Members of consumers' groups, including Medicaid beneficiaries, and consumer organizations such as labor unions, cooperatives, consumer-sponsored prepaid group practice plans, and others; and (3) the director of the public welfare department or the public health department, whichever does not head the Medicaid agency.

In the proposed rule, paragraph (d) of § 431.12, MAC membership and composition, we proposed in (d)(1) to require that a minimum of 25 percent of the MAC must be individuals with lived Medicaid beneficiary experience from the BAC. The BAC, which is defined later in § 431.12(e), is comprised of people who: (1) are currently or have been Medicaid beneficiaries, and (2) individuals with direct experience supporting Medicaid beneficiaries (family members or caregivers of those enrolled in Medicaid).

We proposed 25 percent as the minimum threshold requirement for (d)(1) to reflect the importance of including the beneficiary perspective in the administration of the Medicaid program and to ensure that the beneficiary perspective has meaningful representation in the feedback provided by the MAC. We did not propose a higher percentage because we acknowledge that States will benefit from a MAC that includes representation from a diverse set of interested parties who work in areas related to Medicaid but are not beneficiaries, their family members, or their caregivers.

In terms of the required representation from the remaining MAC members, as specified in the proposed rule, paragraph (d)(2), we proposed that a State must include at least one from each category: (A) State or local consumer advocacy groups or other community-based organizations that represent the interests of, or provide direct service, to Medicaid beneficiaries; (B) clinical providers or administrators who are familiar with the health and social needs of Medicaid beneficiaries and with the resources available and required for their care; (C) participating Medicaid managed care organizations or the State health plan association representing such organizations, as applicable; and (D) other State agencies serving Medicaid beneficiaries, as ex-officio members.

We believe that advisory committees and councils can be most effective when they represent a wide range of perspectives and experiences. Since we know that each State environment is different, we aimed to provide the State with discretion on how large the MAC and BAC should be. In the proposed changes we did, however, specify the types of categories of Committee members that can best reflect the needs of a Medicaid program. We believe that diversely populated MACs and BACs can provide States with access to a broad range of perspectives, and importantly, beneficiaries' perspective, which can positively impact the administration of the Medicaid program. This approach is consistent with the language of section 1902(a)(4)(B) of the Act, which requires a State plan to meaningfully engage Medicaid beneficiaries and other low-income people in the administration of the plan. The changes in membership we proposed and are finalizing will support States to set up MACs that align with section 1902(a)(4)(B) since States will now have to select the membership composition to reflect the community members who represent the interests of Medicaid beneficiaries. The State also benefits from having a way to hear how the Medicaid program can be responsive to its beneficiaries' and the wider Medicaid community's needs.

We also noted in the proposed rule that we encourage States to take into consideration, as part of their member selection process, the demographics of the Medicaid population in their State. Keeping diverse representation in mind as a goal for the MAC membership can be a way for States to help ensure that specific populations and those receiving critically important services are appropriately represented on the MAC. For example, in making MAC membership selections, the State may want to balance the representation of the MAC according to geographic areas of the State with the demographics and health care needs of the Medicaid program of the State. The State will want to consider geographical diversity (for example, urban and rural areas) when making its membership selections. We noted in the proposed rule, that a State could also consider demographic representation of its membership by including members representing or serving Medicaid beneficiaries who receive services in the

following categories: (1) pediatric health care; (2) behavioral health services; (3) preventive care and reproductive health services; (4) health or service issues pertaining specifically to people over age 65; and (5) health or service issues pertaining specifically to people with disabilities. By offering these considerations, we seek to support States in their efforts to eliminate differences in health care access and outcomes experienced by diverse populations enrolled in Medicaid. We intend that the MAC and the BAC can support several of the priorities for operationalizing health equity across CMS programs as outlined in the CMS Framework for Health Equity (2022–2032) and the HHS Equity Action Plan which is consistent with E.O. 13985, which calls for advancing equity for underserved communities.

Rather than prescribing specific percentages for the other (non-BAC) categories in the proposed rule, we only required representation from each category as part of the MAC. The specific percentage of each of category (other than the BAC members) relative to the whole committee can be determined by each State. This approach will provide States with the flexibility to determine how to best represent the unique landscape of each State's Medicaid program. We solicited comment on what should be the minimum percentage requirement that MAC members be current/past Medicaid beneficiaries or individuals with direct experience supporting Medicaid beneficiaries (such as family members or caregivers of those enrolled in Medicaid). In addition to hearing directly from beneficiaries, the State can gain insights into how to effectively administer its program from other members of the Medicaid community.

States will determine which types of providers to include under the clinical providers or administrators category, and we recommend they consider a wide range of providers or administrators that are experienced with the Medicaid program including, but not limited to: (1) primary care providers (internal or family medicine physicians or nurse practitioners or physician assistants that practice primary care); (2) behavioral health providers (that is, mental health and substance use disorder providers); (3) reproductive health service providers, including maternal health providers; (4) pediatric providers; (5) dental and oral health providers; (6) community health, rural health clinic or Federally Qualified Health Center (FQHC) administrators; (7) individuals providing long-term care services and supports; and (8) direct care workers [40] who can be individuals with direct experience supporting Medicaid beneficiaries (such as family members or caregivers).

We have also identified managed care plans, including Primary Care Case Management (PCCM) entities and Primary Care Case Managers (PCCMs),[41] as an important contributor to the MAC, but we acknowledge that not all States have managed care delivery systems. We know many Medicaid managed care plans administer similar committees and thus allow for States to tailor managed care plan representation based on its delivery system and the experience and expertise of managed care plans in the State. For example, States, if applicable, can fulfill this category with only one or with multiple managed care plans operating in the State. In addition, we also give States the flexibility to meet the managed care plan representation requirements with either participating Medicaid managed care plans or a health plan association representing more than one such organization.

The language in paragraph (d)(2)(D) broadens the previous MCAC requirement to allow for additional types of representatives from other State agencies to be on the committee. Specifically, the previous MCAC regulation requires membership by ''the director of the public welfare department or the public health department, whichever does not head the Medicaid agency.'' In the proposed rule, we expanded the requirement for external agency representation to be broader than the welfare or public health department, which would give States more flexibility in representing the Medicaid program's interests based on States' unique circumstances and organizational structure. States can work with sister State agencies to determine who should participate in the MAC (for example, foster care agency, mental health agency, department of public health). We also proposed that these representatives be part of the committee as ex-officio members, meaning that they hold the position because they work for the relevant State agency. In finalizing the proposals, we reviewed this requirement closer. While we believe it will be essential to have these State-interested parties present for program coordination and information-sharing, we intended to reflect in the proposed rule that the formal representation of the MAC should be comprised of beneficiaries, advocates, community organizations, and providers that serve Medicaid beneficiaries. Therefore, we clarify in this final rule that while these ex-officio members will sit on the MAC, they will not be voting members of the MAC. Therefore, on matters that the MAC decides by vote, including but not necessarily limited to finalizing the MAC's recommendations to the State, the ex-officio members will not participate in voting.

We received public comments on these proposals. The following is a summary of the comments we received and our responses.

Comment: We received many comments about the proposed requirement of having some BAC members serving on the MAC. Commenters either agreed with the importance of having a subset of Medicaid beneficiaries serve on both the BAC and the MAC, or they noted that having a subset of BAC members on both committees could lead to undue burden for these members based on the number of meetings they would have to attend. One commenter suggested a phased-in approach where the BAC members meet only as the BAC for a time (for example, a year) and then transition to serving on the MAC only.

Response: We understand the concerns raised by the commenters about putting undue burden on a subset of BAC members. We believe it is vital for the success of both the BAC and MAC that there is a point of integration via the crossover membership requirement since this is the way to ensure that the Medicaid beneficiary perspective is included in both groups.

[40] As finalized in § 441.302(k) of this final rule, CMS defines as Direct care worker as any of the following individuals who may be employed by a Medicaid provider, State agency, or third party; contracted with a Medicaid provider, State agency, or third party; or delivering services under a self-directed service model: (A) A registered nurse, licensed practical nurse, nurse practitioner, or clinical nurse specialist who provides nursing services to Medicaid beneficiaries receiving home and community-based services available under this subpart; (B) A licensed or certified nursing assistant who provides such services under the supervision of a registered nurse, licensed practical nurse, nurse practitioner, or clinical nurse specialist; (C) A direct support professional; (D) A personal care attendant; (E) A home health aide; or (F) Other individuals who are paid to provide services to address activities of daily living or instrumental activities of daily living, behavioral supports, employment supports, or other services to promote community integration directly to Medicaid beneficiaries receiving home and community-based services available under this subpart, including nurses and other staff providing clinical supervision.

[41] Throughout this document, the use of the term ''managed care plan'' includes managed care organizations (MCOs), prepaid inpatient health plans (PIHPs), and prepaid ambulatory health plans (PAHPs) [as defined in 42 CFR 438.2] and is used only when the provision under discussion applies to all three arrangements. An explicit reference is used in the preamble if the provision applies to primary care case managers (PCCMs) or primary care case management entities (PCCM entities).

We created this crossover requirement to reflect the importance of including the beneficiary perspective in the administration of the Medicaid program and to ensure that the beneficiary perspective has meaningful representation in the feedback provided by the MAC. For commenters that are concerned with undue burden of having a subset of BAC members also attend MAC meetings, in § 431.12(f)(3), we note that MACs and BACs are only required to meet once per quarter. While the regulation does not state that the subset of BAC members that join each MAC meeting has to be the same, we recognize that it would be more effective to have consistency in the BAC members that attend the MAC meetings in many cases. However, if States or the BAC are concerned with overburdening its BAC members, a potentially less efficient but workable alternative could be to rotate which BAC members attend the MAC in an effort to further reduce the number of meetings attended for a given BAC member. Nevertheless, the suggestion of having a member transition from solely being on the BAC to solely being on the MAC might not always promote the crossover concept we are seeking with the requirement that the MAC membership consist of 10 to 25 percent members from the BAC, since we are striving for inclusion of the Medicaid beneficiary perspective in both groups via the BAC members.

Comment: In response to our solicitation about having 25 percent as the minimum threshold of BAC membership crossover on the MAC, the majority of the commenters stated that a minimum 25 percent was the appropriate amount of crossover members. They noted that 25 percent crossover membership would help to center and amplify beneficiary voices on the MAC. A few commenters stated that the percentage should be lower (for example 10 or 15 percent). These commenters cited several reasons why having a lower threshold number would be better. Some commenters noted that having a smaller number of BAC members would allow States to better support or train their members so they could fully participate in the MAC. Other commenters stated that having a smaller number of BAC members could lessen the burden on States of finding and recruiting members to participate. Another group of commenters wanted the percentage of BAC crossover to be higher than 25 percent (for example 33, 50, 51, or 75 percent). These commenters sought a higher BAC crossover in order to: safeguard against marginalization of beneficiary members on the MAC; amplify diverse voices through a higher crossover number; and rectify any power imbalances that may exist. There were also a few commenters who noted that States should have the ability to determine their own percentages for the BAC crossover. Finally, we received comments asking CMS to consider allowing States to use a graduated approach to reach the 25 percent minimum requirement of BAC crossover on the MAC.

Response: We thank the commenters who agreed with our proposed threshold of the requirement for a minimum of 25 percent BAC crossover on the MAC. For commenters who thought the percentage should be lower, we understand States may face challenges with finding, recruiting, and training beneficiary members to serve on the BAC. To account for these challenges, we are extending the timeframe for implementation of this requirement in this final rule so that States have 2 years to achieve the 25 percent minimum threshold requirement of MAC members that come from the BAC. Instead of the 25 percent minimum threshold coming into effect right away, we are revising this final rule to provide in § 431.12(d)(1) that, for the period from July 9, 2024 through July 9, 2025, 10 percent of the MAC members must come from the BAC; for the period from July 10, 2025 through July 9, 2026 20 percent of MAC members must come from the BAC; and thereafter, 25 percent of MAC members must come from the BAC.

For commenters who expressed the need for a percentage higher than 25 for the BAC member crossover, we note that the policy we proposed and are finalizing establishes a minimum percentage threshold for States to meet. If a State so chooses, it can select a percentage higher than the minimum of 25 percent, provided the MAC membership also satisfies the requirements of § 431.12(d)(2) of this final rule. For commenters who raised the issue of providing training for BAC members, we have a comment/response on this topic under § 431.12(h)(3).

Comment: The majority of comments received on § 431.12(d) were about § 431.12(d)(2), MAC composition categories. We received comments that fell into four groups. The first group of commenters shared their broad support for the MAC committee member categories that we proposed and also urged CMS to ensure that States select members that represented the Medicaid community and who were geographically as well as racially/ethnically diverse. The second group of commenters asked for the MAC to include representation from members who would qualify for the BAC (for example, Medicaid beneficiaries, their families, and caregivers). It is unclear from the comments if these commenters were asking for an additional group of Medicaid beneficiaries be added to the MAC (in addition to the 25 percent of MAC we proposed to require be from the BAC) or if they did not understand that the MAC composition already includes a category which accounts for this category of members. The third group of commenters asked that specific types of interested parties be required to be represented on the MAC categories (for example, specific provider types, unions, HCBS provider agencies, hospitals, protection and advocacy programs, legal professionals, and medical billing professionals). The fourth group of commenters suggested ideas for types of MAC members that States could use to meet categories specified in the proposed rule (for example add a State Ombudsman to the ex-officio category). We also received a few suggestions to add specific member categories (for example, a member category for FFS members, a member category for people with behavioral health conditions, and a youth member category).

Response: We appreciate the wide range of comments that were submitted about the MAC membership composition. We developed the MAC composition framework in the proposed rule by creating broad membership categories that captured a range of interested parties who are members of the Medicaid community while giving States as much flexibility as possible to build their MACs in ways that account for the unique features of the State's environment. All of the membership categories, as currently written, are broad enough to accommodate the types of members described by the commenters. For example, a State Ombudsman can be used to fulfil the State agency category; a State with both managed care and FFS could chose to select two members (one for each type of delivery system) for the MAC; a person with behavioral health condition(s) could be suitable for multiple categories depending on whether they are a Medicaid beneficiary (current or former) or represent a consumer advocacy or community-based organization. Finally, for the commenter asking for a specific youth member category, we will note that there are no Federal requirements or limitations concerning youth participation on the MAC or BAC, and this is in the State's discretion. The

State could select a youth member to fulfill a MAC or BAC member category as long as that person meets the requirements of that membership category.

We also want to clarify for commenters that Medicaid beneficiaries, their families, and caregivers have their own MAC category in the regulation, because the BAC is listed in the final regulation as one of the categories of MAC members at § 431.12(d)(1).

After consideration of public comments, for § 431.12(d), we are finalizing as proposed with:

- Language modifications to reflect the new name of the BAC;
- Replacing the language at § 431.12 (d)(1) to clarify the timeframe for States to reach 25 percent of MAC members coming from the BAC. The new sentence will now read, ''For the period from July 9, 2024 through July 9, 2025, 10 percent of the MAC members must come from the BAC; for the period from July 10, 2025 through July 10, 2026 20 percent of MAC members must come from the BAC; and thereafter, 25 percent of MAC members must come from the BAC.''
- Language modifications to § 431.12 (d)(2)(C) to replace ''managed care plan'' with ''MCOs, PIHPs, PAHPs, PCCM entities or PCCMs as defined in § 438.2''; and
- Adding the word ''non-voting'' to ex-officio members at the end of § 431.12 (d)(2)(D).

5. Beneficiary Advisory Council (§ 431.12(e))

The current requirements governing MCACs require the presence of beneficiaries in committee membership but do little else to ensure their contributions are considered or their voices heard. For example, in the current regulations of § 431.12, paragraph (e) Committee participation, only briefly mentions the participation of beneficiary members. The current requirement provides little guidance about how to approach the participation of beneficiary members on the committee.

We proposed to add new paragraph § 431.12(e). The proposed rule noted that in the new paragraph, (e) Beneficiary Advisory Council, States would be required to create a BAC, a dedicated Beneficiary Advisory Council, that will meet separately from the MAC on a regular basis and in advance of each MAC meeting.

Specifically, at new paragraph (e)(1), we proposed to require that the MAC members described in paragraph (d)(1) must also be members of the BAC. This requirement will facilitate the bi-directional communication essential to effective beneficiary engagement and allow for meaningful representation of diverse voices across the MAC and BAC. In paragraph (e)(2), we proposed to require that the BAC meetings occur in advance of each MAC meeting to ensure BAC member preparation for each MAC discussion. BAC meetings will also be subject to requirements in paragraph (f)(5), described later in this section, that the BAC meetings must occur virtually, in-person, or through a hybrid option to maximize member attendance. We plan to expound on best practices for engaging beneficiary participation in committees like the MAC in a future toolkit.

We proposed the addition of the BAC because we believe that it will result in providing States with increased access to beneficiary perspectives. The creation of a separate beneficiary-only advisory council also aligns with what we have learned from multiple interviews with State Medicaid agencies and other Medicaid interested parties (for example, Medicaid researchers, former Medicaid officials) conducted over the course of 2022 on the operation of the existing MCACs. These interested parties described the importance of having a comfortable, supportive, and trusting environment that facilitates beneficiaries' ability to speak freely on matters most important to them. Further, we believe that the crossover structure for the MAC and BAC proposed in § 431.12(d) allows for the beneficiary-only group to meet separately while still having a formal connection to the broader, over-arching MAC. It is important the MAC members can directly engage with the beneficiaries and hear from their experience. We noted earlier that some States may already have highly effective BAC-type councils operating as part of their Medicaid program. These existing councils may represent specific constituencies such as children with complex medical needs or older adults or may be participants receiving services under a specific waiver. In these instances, States may use these councils to satisfy the requirements of this rule, as long as the pre-existing BAC-type council membership includes the type of members required in the proposed paragraph of § 431.12(e).

We received public comments on these proposals. The following is a summary of the comments we received and our responses.

Comment: We received many comments in support of the BAC as specified in the newly proposed § 431.12(e). Commenters noted that the BAC would provide a necessary and less-intimidating venue where Medicaid beneficiaries along with their families and caregivers can share first-person experiences and feedback to the State. While many commenters stated the BAC was needed and a welcomed improvement, a few commenters cautioned that States would need more than just to set up a BAC; they will also need to invest in creating opportunities for meaningful engagement.

Response: We agree that the BAC must be supported and used by the State in ways that create opportunities for BAC members to be actively involved and have their contributions considered.

Comment: A few commenters asked CMS to clarify how existing community groups or advisory councils could be used to satisfy the requirements of the BAC. One commenter asked if the BAC would meet a State's inclusive Community First Choice (CFC) requirements.

Response: The proposed new paragraph (e) requires that States form a BAC, but notes that the State can use an existing beneficiary group. Prior to rulemaking, CMS spoke to several States and researchers to understand how States were implementing the MCAC requirements. From the information gathered, we know that many States already have active Medicaid beneficiary groups that could fill these requirements and can function as their BACs. In these instances, it is not our intention to ask a State to create a second Medicaid beneficiary group to meet the BAC requirements. If a State wants to use an existing group to satisfy the BAC requirements, they will need to ensure that the existing committee's membership meets the membership requirements of the BAC and that the existing committee's bylaws are developed or updated, and published, to explain that the committee functions to meet the BAC requirements.

Regarding the ability to use the BAC to meet CFC requirements of the State, CMS notes in the ''Medicaid Program; State Plan Home and Community-Based Services, 5-Year Period for Waivers, Provider Payment Reassignment, and Home and Community-Based Setting Requirements for Community FirstChoice and Home and Community Based Services (HCBS) Waivers'' final rule,[42] that States may utilize existing

[42] ''Medicaid Program; State Plan Home and Community-Based Services, 5-Year Period for Waivers, Provider Payment Reassignment, and Home and Community-Based Setting Requirements for Community FirstChoice and Home and Community Based Services (HCBS) Waivers *https://www.medicaid.gov/sites/default/files/2019-12/cfc-final-settings.pdf*,'' (79 FR 2948, 2982).

advisory bodies in the implementation of CFC, as long as the statutory requirements as specified in § 441.715 for the Development and Implementation Council are met. We acknowledge the benefits of the Implementation Council coordinating with related interested parties councils and commissions and encourage States to do so. States may also choose to leverage these councils and/or include members from these councils to meet the requirements for CFC.

Comment: The majority of the comments received related to the newly proposed § 431.12(e) were commenters providing recommendations on which groups of people should also be required to be included as BAC members. We received a range of suggestions such as: HCBS beneficiaries, individuals with specific chronic diseases and disabilities, individuals using long term care services and supports (LTSS), individuals who are receiving perinatal health services, individuals who have lived experience with behavioral health conditions, and Medicaid beneficiaries who are deaf, hard of hearing, or deaf blind. Commenters also requested that the BAC members represent a cross-section of Medicaid beneficiaries that can also be regarded as demographically and geographically diverse.

Response: We agree with commenters that the States should select the types of BAC members that can provide them with representative views of the experience of Medicaid beneficiaries in their State. The regulatory language provides States with the flexibility to make those determinations based on the characteristics of their individual State Medicaid program. It can be challenging to find beneficiaries available to serve on a council, particularly if the requirements of membership are very specific. By keeping our regulations broad for what types of beneficiaries should be selected for the BAC, we seek to ensure States are able to recruit members with fewer challenges.

Comment: A few commenters asked for CMS to clarify or further define a few terms used in newly proposed § 431.12(e). Specifically, a couple of commenters asked CMS to clarify the phrase ''individuals with direct care experience supporting Medicaid beneficiaries.'' Another commenter asked if CMS could define whether the term ''caregivers'' included paid caregivers.

Response: In the proposed and in this final rule, we have described individuals with direct experience supporting Medicaid beneficiaries as ''family members or caregivers of those enrolled in Medicaid.'' In the proposed rule's preamble,[43] we state that caregivers can be paid or unpaid caregivers. To better clarify these definitions, we are adding the words ''paid or unpaid'' before the word caregiver to the proposed regulatory language at new paragraph § 431.12(e) so that the phrase reads, ''. . . individuals who are currently or have been Medicaid beneficiaries and individuals with direct experience supporting Medicaid beneficiaries (family members and paid or unpaid caregivers of those enrolled in Medicaid), to advise the State. . . .''

Comment: As noted in an earlier section, several commenters asked CMS to clarify the role of the BAC, citing that in the proposals, the language varies from ''advisory'' to ''providing feedback.''

Response: The primary role of the BAC is to advise the State Medicaid agency on policy development and on matters related to the effective administration of the Medicaid program. To better clarify the BAC's advisory role, we are removing from the proposed regulatory language at new paragraph § 431.12(e) the words and to ''provide input to.'' The phrase now reads ''. . . to advise the State regarding their experience with the Medicaid program, on matters of concern related to policy development and matters related to the effective administration of the Medicaid program.''

Comment: A few commenters shared suggestions related to the BAC meetings described in new paragraph § 431.12(e)(2). One commenter asked CMS to encourage States to hold BAC and MAC meetings on the same day, with the BAC meeting occurring first in an effort to minimize travel. Other commenters asked CMS for additional meetings for the BAC to be required to attend (for example, meetings with the State Medicaid Director and meetings with CMS regional administrators).

Response: The meeting structure specified in the BAC proposal is focused on the interplay between the BAC and MAC meetings. In new paragraph § 431.12(e)(2), we are requiring that the BAC meetings be held separate from the MAC and in advance of the MAC, so that the BAC members have the opportunity to prepare and hold an internal discussion among themselves. Holding MAC and BAC meetings in the same day could be in line with the meeting requirements. States may wish to hold additional BAC meetings with other parties, as needed.

Comment: Some commenters asked CMS to create a Federal-level BAC to ensure consistency across States.

Response: A Federal-level BAC would not further the goal of providing States with beneficiary input into their programs because it would not focus on the particular features of each individual State's Medicaid program or beneficiary and provider communities. Such a group is beyond the scope of this rulemaking.

After consideration of public comments, we are finalizing new § 431.12(e) as proposed, with changes to:

- Language modifications to reflect the new name of the BAC;
- Adding language that caregivers on the BAC can be ''paid or unpaid.'' Section 431.12 (e) will now state, ''. . . individuals who are currently or have been Medicaid beneficiaries and individuals with direct experience supporting Medicaid beneficiaries (family members and paid or unpaid caregivers of those enrolled in Medicaid) . . . .''
- Deleting the phrase ''. . . and provide input to . . . .'' Section 431.12(e) will now state ''. . . to advise the State regarding their experience with the Medicaid program, on matters of concern related to policy development and matters related to the effective administration of the Medicaid program.''

6. MAC and BAC Administration (§ 431.12(f))

We proposed to add new paragraph § 431.12(f), MAC and BAC administration, to provide an administrative framework for the MAC and BAC that ensures transparency and a meaningful feedback loop to the public and among the members of the committee and council.[44]

Specifically, in new paragraph (f)(1), we proposed that State agencies would be required to develop and post publicly on their website bylaws for governance of the MAC and BAC, current lists of MAC and BAC memberships, and past meeting minutes for both the committee and council. In paragraph (f)(2), we proposed that State agencies would be required to develop and post publicly a process for MAC and BAC member recruitment and selection along with a process for the selection of MAC and BAC leadership. In paragraph (f)(3), we proposed that State agencies would be required to develop, publicly post, and implement a regular meeting schedule for the MAC and BAC. The proposed

[43] ''Medicaid Program; Ensuring Access to Medicaid Services,'' (88 FR 27960, 27968).

[44] ''Medicaid Program; Ensuring Access to Medicaid Services,'' (88 FR 27960, 27920).

requirement specified that the MAC and BAC must each meet at least once per quarter and hold off-cycle meetings as needed. In paragraph (f)(4), we proposed requiring that that at least two MAC meetings per year must be opened to the public. For the MAC meetings that are open to the public, the meeting agenda would be required to include a dedicated time for public comment to be heard by the MAC. None of the BAC meetings were required to be open to the public unless the State's BAC members decided otherwise. We also proposed that the State ensure that the public is provided adequate notice of the date, location, and time of each public MAC meeting and any public BAC meeting at least 30 calendar days in advance. We solicited comment on this approach. In paragraph (f)(5), we proposed that States would be required to offer in-person, virtual, and hybrid attendance options including, at a minimum telephone dial-in options at the MAC and BAC meetings for its members to maximize member participation at MAC and BAC meetings. If the MAC or BAC meeting was deemed open to the public, then the State must offer at a minimum a telephone dial-in option for members of the public.

With respect to in-person meetings, we proposed in paragraph (f)(6) that States would be required to ensure that meeting times and locations for MAC and BAC meetings were selected to maximize participant attendance, which may vary by meeting. For example, States may determine, by consulting with their MAC and BAC members, that holding meetings in various locations throughout the State may result in better attendance. In addition, States may ask the committee and council members about which times and days may be more favorable than others and hold meetings at those times accordingly. We also proposed that States use the publicly posted meeting minutes, which lists attendance by members, as a way to gauge which meeting times and locations garner maximum participate attendance.

Finally, in paragraph (f)(7), we proposed that State agencies were required to facilitate participation of beneficiaries by ensuring that meetings are accessible to people with disabilities, that reasonable modifications are provided when necessary to ensure access and enable meaningful participation, that communication with individuals with disabilities is as effective as with others, that reasonable steps are taken to provide meaningful access to individuals with Limited English Proficiency, and that meetings comply with the requirements at § 435.905(b) and applicable regulations implementing the ADA, section 504 of the Rehabilitation Act, and section 1557 of the Affordable Care Act at 28 CFR part 35 and 45 CFR parts 84 and 92.

Interested parties' feedback and recent reports [45] [46] published on meaningful beneficiary engagement illuminate the need for more transparent and standardized processes across States to drive participation from key interested parties and to facilitate the opportunity for participation from a diverse set of members and the community. Further, we believe that in order for the State to comply with the language of section 1902(a)(4)(B) of the Act, which requires a State plan to meaningfully engage Medicaid beneficiaries and other low-income people in the administration of the plan, it needs to be responsive to the needs of its beneficiaries. To be responsive to the needs of its beneficiaries, the State needs to be able to gather feedback from a variety of people that touch the Medicaid program, and the MAC and BAC will serve as a vehicle through which States can obtain this feedback.

We acknowledge that interested parties may face a range of technological and internet accessibility limitations, and proposed requiring that, at a minimum, States provide a telephone dial-in option for MAC and BAC meetings. While we understand that in-person interaction can sometimes assist in building trusted relationships, we also recognize that accommodations for members and the public to participate virtually is important, particularly since the beginning of the COVID–19 pandemic. We solicited comment on ways to best strike this balance.

We received public comments on these proposals. The following is a summary of the comments we received and our responses.

Comment: We received many comments expressing broad support of § 431.12(f)(1) proposals requiring States to post publicly information on the MAC and BAC (bylaws, meeting minutes). The commenters noted that transparency plays an important role in promoting multi-directional accountability and could also help ensure the success of the MAC and BAC. While commenters were supportive, they also recommended that States consider their Medicaid communities' communication access needs, including cultural competency and linguistic needs, when posting these materials to their websites.

Response: We agree with commenters that States should take steps to ensure that any publicly posted materials are accessible to the various interested parties that comprise their Medicaid community.

Comment: We received a few comments asking us to reconsider the requirement of having States to post their BAC membership list on their websites. Several commenters suggested that States should give BAC members the choice of being publicly identified.

Response: We thank commenters for raising this issue, as we want to avoid any situation where a Medicaid beneficiary, family member or caregiver, does not want to be publicly identified. In response to these comments, we are updating and finalizing the proposed regulations to permit BAC members to choose whether to be publicly identified in materials such as membership lists and meeting minutes. If BAC members choose not to be identified in public materials, they can be referred to as BAC member 1, BAC member 2 and so on. Specifically, we are updating and finalizing the proposed language under new paragraph § 431.12(f)(1) to state, ''Develop and publish by posting publicly on its website, bylaws for governance of the MAC and BAC along with a current list of members . . . States will give BAC members the option to include their names on the membership list and meeting minutes that will be posted publicly.''

Comment: We received comments supporting the § 431.12(f)(2) requirement of having States publicly post their process for recruitment and selection. Commenters emphasized that these processes must be inclusive and reflect the diversity of their State's Medicaid community and beneficiaries. Other commenters asked for CMS to provide guidance or best practices on how to recruit members, as well as marketing best practices and the preferred format for print and audio materials.

Response: We agree that States should develop recruitment strategies that will result in identifying members that are

representative of a State's Medicaid community and beneficiaries. However, we have kept the requirements flexible to be cognizant of the fact that States can experience challenges in recruiting Medicaid beneficiaries to serve on the BAC. We also encourage States to examine best practices from entities that specialize in marketing, recruitment, and the accessibility of published materials as outlined on *Digital.gov*.[47]

Comment: We received some comments asking that States have a process for identifying conflicts of interest when making member selections.

Response: We agree that avoiding conflicts of interest is important, and we encourage States to establish conflict of interest policies, to be documented in the MAC/BAC bylaws or other organizing documents that govern the membership and operations of the MAC/BAC, and to ensure these policies are respected when selecting MAC/BAC members. Since MAC and BAC membership represent a variety of backgrounds and interest relevant to Medicaid, we also believe that building in a time for conflict-of-interest disclosure into each meeting's agenda is important. Specifically, under new § 431.12(f)(3) we are now adding that each MAC and BAC meeting agenda should have time set aside for members to disclose any matters that are not incompatible with their participation on the MAC and/or BAC under the State's conflict of interest policy, but which nevertheless could give rise to a perceived or actual conflict of interest and therefore should be disclosed. We also believe our requirements for MAC and BAC meetings, including the posting of meeting minutes and membership lists, will provide the public and States with the transparency needed to know if a conflict of interest (perceived, apparent, or actual) occurred during a meeting.

Comment: We received comments regarding the requirement in § 431.12(f)(3) for both the MAC and BAC to each meet at a minimum of once quarterly. Commenters noted the number of meetings could pose a burden to the States and members. Several commenters suggested that CMS allow Medicaid agencies to hold meetings in a way that matches their administrative resources and goals.

Response: We selected a quarterly meeting versus a monthly meeting schedule for the MAC and BAC because we believe it will provide States with more flexibility in determining when to meet. For example, rather than having the MAC and BAC members meeting every month (12 times annually), we reduce the time commitment for members by having the State select which month per quarter works best for the MAC and BAC members (4 times annually). Further, the goal of the MAC and BAC is to advise the State on matters related to policy development and to the effective administration of the Medicaid program. We believe that holding a quarterly meeting, as a minimum, allows States to integrate their Medicaid community's voice into the effective administration of the Medicaid program in a way that is timely and meaningful. Further, we believe that holding quarterly meetings would result in the least amount of burden for States. Holding more meetings per year would likely result in additional strain of time and resources for the State and its members. Holding meetings less frequently than quarterly would not assist the timely integration of the community voice into the administration of the Medicaid program. We also strive to further reduce the burden to MAC and BAC members by structuring the meeting requirements in a way that allows States to select non-traditional meeting times and to use different telecommunications options (for example, online meetings) for its meetings which would eliminate members' commuting times to meetings.

Comment: We received several comments about new § 431.12(f)(4) in support of the requirement that each MAC meeting must have a public comment period, citing the importance of all interested parties to be able to share feedback. Additionally, a few commenters asked that States also have a process to accept input from interested parties while developing MAC agendas.

Response: States will have the flexibility to develop the MAC agendas in accordance with their own processes and procedures. We encourage commenters to work with their State regarding those processes.

Comment: A couple of commenters suggested that all MAC and BAC meetings be open to the public.

Response: We place great importance on meeting transparency, but we also believe that States may need the flexibility to keep closed some of their meetings each year. The proposed requirement in § 431.12(f)(4) related to BAC meetings notes that BAC meetings are not required to be open to the public unless the State and the BAC members decide otherwise. It is important for States to create a dedicated space for this group of Medicaid beneficiaries and people with lived Medicaid experience to share their interactions with and perceptions of the Medicaid program. Having a comfortable, supportive, and trusting environment will encourage members to speak freely on matters most important to them. We note that in order to support overall transparency, we proposed that the meeting minutes of the BAC meetings be required to be posted online and MAC members who are also on the BAC will share input from the BAC with the broader MAC.

Comment: We received comments in response to our request for comments about in-person and virtual attendance options for the MAC and BAC meetings. The comments emphasized the need for States to offer both in-person and virtual attendance options. One commenter questioned if the proposed requirement meant that offering an in-person attendance option was a requirement for each meeting.

Response: We thank commenters for responding to our request for comments. In response to those comments, we are updating new § 431.12(f)(5) to list the different types of meeting options. Specifically, § 431.12(f)(5) states, ''Offer a rotating, variety of meeting attendance options. These meeting options are: all in-person attendance, all virtual attendance, and hybrid (in-person and virtual) attendance options. Regardless of which attendance type of meeting it is, States are required to always have, a minimum, telephone dial-in option at the MAC and BAC meetings for its members.'' For the commenter who questioned if States had to always provide in-person attendance options, we are clarifying that if the meeting is designated as a virtual-only meeting, States do not need to have in-person attendance.

Comment: One commenter suggested we add a requirement for meetings to be held both during and after work hours.

Response: In new § 431.12(f)(6), we require that States ensure that the meeting times selected for MAC and BAC meetings maximize member attendance. We encourage States to consider working hours and the impact on their MAC and BAC membership, as appropriate.

Comment: Several commenters expressed broad support for the proposal to ensure that MAC and BAC meetings are accessible by people with disabilities and Limited English Proficiency (LEP). Commenters also provided suggestions to better ensure meaningful participation, such as making sure States have available: interpreter services, American Sign Language translation services, closed captioning for virtual meeting, and

[47] *https://digital.gov/resources/an-introduction-to-accessibility/?dg.*

making materials available in plain language.

Response: As reflected in § 431.12(f)(7), we agree that MAC and BAC members with disabilities and LEP should have access to the types of supports needed to meaningfully engage in meetings. We have updated the relevant Federal requirements for States to meet in this final rule.

Comment: One commenter requested that CMS clarify what is meant by the phrase, ''that reasonable steps are taken to provide meaningful access to individuals with Limited English Proficiency . . . .''

Response: Title VI of the Civil Rights Act requires recipients of Federal financial assistance, including State Medicaid programs, to take reasonable steps to provide meaningful access to their programs or activities for individuals with Limited English Proficiency.[48] Section 1557 of the Affordable Care Act similarly requires recipients of Federal financial assistance to take reasonable steps to provide meaningful access to their health programs or activities for individuals with Limited English Proficiency, and the implementing regulation requires the provision of interpreting services and translations when it is a reasonable step to provide meaningful access.[49]

After consideration of public comments, we are finalizing § 431.12(f) as proposed with:

- Language modifications to reflect the new name of the BAC.
- Updates to § 431.12(f)(1) to now state, ''States will also post publicly the past meeting minutes of the MAC and BAC meetings, including a list of meeting attendees. States will give BAC members the option to include their names in the membership list and meeting minutes that will be posted publicly.''
- Updates to § 431.12(f)(3) to state, ''Each MAC and BAC meeting agenda must include a time for members and the public (if applicable) to disclose conflicts of interest.''
- Updates to § 431.12(f)(4) to move one sentence up to be the new second sentence and the deletion of a repetitive sentence so that third sentence now reads as, ''The public must be adequately notified of the date, location, and time of each public MAC meeting and any public BAC meeting at least 30 calendar days in advance of the date of the meeting.''
- Updates to § 431.12(f)(5) to state, ''Offer a rotating, variety of meeting attendance options. These meeting options are: all in-person attendance, all virtual attendance, and hybrid (in-person and virtual) attendance options. Regardless of which attendance type of meeting it is, States are required to always have at a minimum, telephone dial-in option at the MAC and BAC meetings for its members.''
- Updates to paragraph (f)(7) to reflect additional Federal requirements (adding reference to the Title VI of the Civil Rights Act of 1964). The sentence will now state, ''. . . that reasonable steps are taken to provide meaningful access to individuals with Limited English Proficiency, and that meetings comply with the requirements at § 435.905(b) of this chapter and applicable regulations implementing the ADA, Title VI of the Civil Rights Act of 1964, section 504 of the Rehabilitation Act, and section 1557 of the Affordable Care Act at 28 CFR part 35 and 45 CFR parts 80, 84 and 92, respectively.''

7. MAC and BAC Participation and Scope (§ 431.12(g))

We proposed to replace former paragraph (e) Committee participation, with new paragraph (g) MAC and BAC Participation and Scope. The original paragraph (e), Committee participation, required that the MCAC must have opportunity for participation in policy development and program administration, including furthering the participation of beneficiary members in the agency program.

In new paragraph § 431.12(g), we proposed and are finalizing the expansion of the types of topics which provide the MAC and BAC should advise to the State. The list of topics we proposed included at a minimum topics related to: (1) addition and changes to services; (2) coordination of care; (3) quality of services; (4) eligibility, enrollment, and renewal processes; (5) beneficiary and provider communications by State Medicaid agency and Medicaid managed care plans; (6) cultural competency, language access, health equity and disparities and biases in the Medicaid program; or (7) other issues that impact the provision or outcomes of health and medical services in the Medicaid program as identified by the MAC, BAC or State.

In researching States' MCACs, we know that some already use the MCACs advice on a variety of topics relating to the effective and efficient administration of the Medicaid program. With these changes, we aim to strike a balance that reflects some States' current practices without putting strict limitations on specific topics for discussion in a manner that would constrict flexibility for all States. Broadening the scope of the topics that the MAC and BAC discuss will benefit the State by giving greater insight into how it is currently delivering coverage and care for its beneficiaries and thereby assist in identifying ways to improve the way the Medicaid program is administered.

The State will use this engagement with the MAC and BAC to ensure that beneficiaries' and other interested parties' voices are considered and to allow the opportunity to adjust course based on the advice provided by the committee and council members. The State will base topics of discussion on State need and will determine the topics in collaboration with the MAC and BAC to address matters related to policy development and matters related to the effective administration of the Medicaid program. In finalizing the proposals, we reviewed the wording for this requirement closer. When listing the types of topics on which the MAC and BAC should advise to the State, we used the term ''or''. However, using the term ''or'' does not represent the intention behind the regulation. The MAC or BAC should not be limited to advising the State on one topic at a time. Our intent is that the MAC and BAC, in collaboration with the State, should be able to provide recommendations on all or any of the subset of the topics listed. We clarify this intention in this final rule by making a technical change to replace the word ''and'' with the word ''or'' in the list of the types of topics on which the MAC and BAC should advise the State.

We received public comments on these proposals. The following is a summary of the comments we received and our responses.

Comment: As noted in other sections, we received a few comments asking CMS to clarify the advisory authority of the MAC and BAC, noting that language fluctuated between advisory and experiential feedback.

Response: As discussed earlier with respect to § 431.12(a), the role of the MAC and BAC is to advise the State Medicaid agency. In reviewing the language proposed in § 431.12(g), we see similar opportunities where CMS can refine its wording to make clear the advisory roles that the MAC and BAC hold. The primary role of the MAC and BAC is to advise the State Medicaid agency on policy development and on

[48] *Lau* v. *Nichols,* 414 U.S. 563, 566 (1974) (interpreting Title VI and its implementing regulations to require a school district with students of Chinese origin with limited English proficiency to take affirmative steps to provide the students with a meaningful opportunity to participate in federally funded educational programs).

[49] 45 CFR 92.101; *see alsohttps://www.hhs.gov/civil-rights/for-providers/laws-regulations-guidance/guidance-federal-financial-assistance-title-vi/index.html.*

matters related to the effective administration of the Medicaid program. By replacing the wording in § 431.12(g) from ''provide recommendations'' to ''advise'' we are being consistent with the wording used in similar updates made in this final rule and also making clear that our intention is for the MAC and BAC to serve in an advisory capacity to the State.

Comment: All commenters who addressed § 431.12(g) supported the change in the MAC and BAC scope. The majority of those commenters also suggested additional topics for which the MAC and BAC should advise the State. These topics include getting feedback on Secret Shopper studies, external quality organization reports, consumer facing materials, enrollment materials, implementation of integrated programs for dually eligible individuals, rate reviews, and annual medical loss ratio report. We also received a comment noting the importance of access to services with a request that it be added it to the list of topics.

Response: We appreciate the support to the proposed changes. We clarify that the categories of topics we named in this section were selected as examples because they represented far-reaching parameters related to the effective administration of the Medicaid program. We believe that the proposal we are finalizing in this final rule allows for a broad interpretation of the topics that are within scope while leaving the ultimate decision on which topics the MAC and BAC will advise on to the MAC, BAC, and State. We encourage commenters to work with their States to define the topics that will be discussed at the MAC and BAC. Finally, we agree that specifically mentioning access to services is important, as it represents a key topic area of this regulation. Therefore, we are redesignating the proposed § 431.12(g)(7) as (g)(8) and adding a new § 431.12(g)(7), access to services.

After consideration of public comments, we are finalizing § 431.12(g) as proposed with:

- Language modifications to reflect the new name of the BAC.
- Replacing the wording at § 431.12(g) ''to participate in and provide recommendations'' with ''advise'' so as to clarify the advisory role of the MAC and BAC.
- Conforming edits to replacing the term State Medicaid Director at § 431.12(g) with the term, ''director of the single State Agency for the Medicaid program.''

Language modifications to § 431.12(g)(5) to replace ''managed care plan'' with ''MCOs, PIHPs, PAHPs, PCCM entities or PCCMs as defined in § 438.2.''

- Redesignating and finalizing proposed § 431.12(g)(7) as (g)(8) and adding a new § 431.12(g)(7), ''access to services.''
- Replacing the word ''or'' with the word ''and'' after 431.12(g)(7), access to services.

8. State Agency Staff Assistance, Participation, and Financial Help (§ 431.12(h))

Under § 431.12 of the current regulation, paragraph (f) Committee staff assistance and financial help, the State was required to provide the committee with—(1) Staff assistance from the agency and independent technical assistance as needed to enable it to make effective recommendations; and (2) Financial arrangements, if necessary, to make possible the participation of beneficiary members.

In the proposed rule, we proposed to redesignate previous paragraph § 431.12(f) to new paragraph (h) and expand upon existing State responsibilities for managing the MAC and BAC regarding staff assistance, participation, and financial support. The changes we proposed and are finalizing to new paragraph (h) are for the State to provide staff to support planning and execution of the MAC and the BAC to include: (1) Recruitment of MAC and BAC members; (2) Planning and execution of all MAC and BAC meetings; and (3) The provision of appropriate support and preparation (providing research or other information needed) to the MAC and BAC members who are Medicaid beneficiaries to ensure meaningful participation. These tasks include: (i) Providing staff whose responsibilities are to facilitate MAC and BAC member engagement; (ii) Providing financial support, if necessary, to facilitate Medicaid beneficiary engagement in the MAC and the BAC; and (iii) Attendance by at least one staff member from the State agency's executive staff at all MAC and BAC meetings.

The overlap of the current regulation with our proposed changes will mean much of the work to implement is already occurring. We are not changing the existing financial support requirements. We understand from States and other interested parties that many States already provide staffing and financial support to their MCACs in ways that meet or go beyond what we require through our updated requirements. We believe that expanding upon the current standards regarding State responsibility for planning and executing the functions of the MAC and BAC will ensure consistent and ongoing standards to further beneficiaries' and other interested parties' engagement. For example, we know that when any kind of interested parties council meets, all members of that council need to fully understand the topics being discussed in order to meaningfully engage in that discussion. This is particularly relevant when the topics of discussion are complex or based in specific terminology as Medicaid related issues often can be.

We believe that when States provide their MACs and BACs with additional staffing support that can explain, provide background materials, and meet with the members in preparation for the larger discussions, the members have a greater chance to provide more meaningful feedback and be adequately prepared to engage in these discussions. The proposed changes to the existing requirements seek to create environments that support meaningful engagement by the members of the MAC and the BAC, whose feedback can then be used by States to support the efficient administration of their Medicaid program. We anticipate providing additional guidance on model practices, recruitment strategies, and ways to facilitate beneficiary participation, and we solicited comments on effective strategies to ensure meaningful interested parties' engagement that in turn can facilitate full beneficiary participation.

Further, the proposed changes to the requirement for beneficiary support, including financial support, are similar to the original MCAC requirements. For example, using dedicated staff to support beneficiary attendance at both the MAC and BAC meetings and providing financial assistance to facilitate meeting attendance by beneficiary members are similar to the current regulations. Staff may support beneficiary attendance through outreach to the Medicaid beneficiary MAC and BAC members throughout the membership period to provide information and answer questions; identify barriers and supports needed to facilitate attendance at MAC and BAC meetings; and facilitate access to those supports.

In the proposed rule, we proposed to add a new requirement that at least one member of the State agency's executive staff attend all MAC and BAC meetings to provide an opportunity for beneficiaries and representatives of the State's leadership to interact directly.

We received public comments on these proposals. The following is a

summary of the comments we received and our responses.

Comment: Many commenters supported the modifications proposed at § 431.12(h), but they emphasized the importance of requiring States to appropriately compensate members that are beneficiaries for their participation. The comments noted that there should be financial compensation to beneficiary members for the time spent on BAC activities, as well as financial reimbursement for any travel, lodging, meals, and childcare associated with their participation in the BAC and/or MAC. Commenters also asked CMS to exclude the value of any financial compensation paid to members for their participation in the MAC and/or BAC from consideration in determining eligibility for Medicaid. A few commenters expressed that the term ''if necessary'' should be dropped from the regulatory language, noting that States should offer reimbursement to all participating Medicaid beneficiaries.

Response: Under the policies we are finalizing at § 431.12(h)(3)(ii), States will have the ability to reimburse all beneficiaries to facilitate Medicaid beneficiary engagement in the MAC and the BAC. This can include, at the State's discretion, reimbursement for travel, lodging, meals, and childcare. We did not remove the words ''if necessary'' to account for Medicaid beneficiaries who may not need financial support to engage in the MAC and BAC activities.

We are also clarifying the circumstances in which compensation provided to beneficiary members would be considered income for Medicaid eligibility purposes. For both MAGI and non-MAGI methodologies, reimbursements (such as for meals eaten away from home, mileage, and lodging) do not count as income, but other compensation (such as a daily stipend) for participating in an advisory council is countable income under applicable financial methodologies. For non-MAGI methodologies, the State could submit a SPA to CMS to disregard such stipends or other countable income under section 1902(r)(2) of the Act. Other means tested programs may have other rules for counting income, and we encourage States to assess those rules and advise Medicaid beneficiary members of the MAC and BAC accordingly.

Comment: Many commenters in support of the proposed requirements in § 431.12(h)(3) noted how critical it will be for States to provide appropriate technical support and preparation to MAC and BAC members who are also Medicaid beneficiaries in order to ensure their full and active participation in discussions. Commenters shared a variety of suggestions for the type of support that can help prepare these members to feel comfortable fully and meaningfully engaging in the process. The suggestions made by the commenters included specific areas to be addressed in the trainings and materials that the State agency staff provides, such as providing background materials in plain language, implementing techniques to empower members to participate successfully and equally in MAC and BAC discussions, supporting health literacy needs, and training members on digital access to meetings/technology. Additionally, some commenters suggested that States be required to provide MAC and BAC members with a mentor and training on the Medicaid program throughout the length of their membership term. Several commenters suggested that States be required to select an independent (outside of the Medicaid agency) policy advisor or technical expert to provide BAC members with support in understanding Medicaid topics and policy.

Response: We appreciate the support for our proposals and understand the interest in ensuring support for beneficiary members of the MAC and BAC. The underpinning of meaningful member engagement is that members have a substantial understanding of the topics to be discussed. We agree with commenters' suggestions in general, but given the differences in States' structures and resources, we believe there is a benefit in leaving the decision of how best to provide training and support to the MAC and BAC members to the States. As we noted earlier in the preamble, CMS will post publicly a MAC best practices toolkit.

Comment: We received a couple of comments asking CMS to clarify the role of the State Medicaid agency staff attending the MAC and BAC meetings.

Response: The purpose of requiring a member from the State Medicaid agency's executive staff to attend MAC and BAC meetings is to provide an opportunity for beneficiaries and representatives of the State's Medicaid agency leadership to interact directly. The role of the executive staff person is not to be a MAC/BAC co-chair, nor to facilitate these meetings. The executive staff person's role is to hear directly from and interact with Medicaid beneficiaries and with the wider Medicaid community in that State. The person attending generally will be expected to share take-aways from these meetings with State's Medicaid agency leadership.

After consideration of public comments, we are finalizing § 431.12(h) as proposed with:

- Language modifications to reflect the new name of the BAC.
- Conforming edits to replace the word ''State Agency'' with the ''single State agency for the Medicaid program'' in several places across § 431.12(h).

Language modifications to § 431.12(h)(3) to state, ''. . . MAC and BAC members who are Medicaid beneficiaries . . .''

9. Annual Report (§ 431.12(i)).

In the spirit of transparency and to ensure compliance with the updated regulations, we added in the proposed rule[50] and are finalizing new paragraph § 431.12(i) to require that the MAC, with support from the State and in accordance with the requirements updated at this section, must submit an annual report to the State. The State must review the report and include responses to the recommended actions. The State must also: (1) provide MAC members with final review of the report; (2) ensure that the annual report of the MAC includes a section describing the activities, topics discussed, and recommendations of the BAC, as well as the State's responses to the recommendations; and (3) post the report to the State's website. In the proposed rule, we noted that States had one year to implement the annual report requirement and we sought comment on that timeline. In finalizing the proposals, we reviewed these requirements closer. It is our intention that the MAC is required to submit an annual report to the State. We clarify this intention in this final rule by making a technical change to add the word ''must'' which was unintentionally omitted in the proposed rule.

The proposed requirements of this paragraph seek to ensure transparency while also facilitating a feedback loop and view into the impact of the MAC and BAC's recommendations. We solicited comment on additional ways to ensure that the State can create a feedback loop with the MAC and BAC.

We received public comments on these proposals. The following is a summary of the comments we received and our responses.

Comment: Several commenters supported the proposed requirements in new § 431.12(i), of having States submit an annual report that describes activities of the MAC and BAC, including the topics discussed and their

[50] ''Medicaid Program; Ensuring Access to Medicaid Services,'' (88 FR 27960, 27971).

recommendations. Commenters noted that requiring these reports is critical to building trust as well as ensuring transparency and accountability among the State, MAC, and BAC members. In addition, several commenters agreed with the annual report requirement, but they also wanted CMS to stipulate the contents of the annual report. One commenter suggested that States' annual reports include results from anonymous surveys of MAC and BAC members indicating whether these members felt they have been listened to and if they felt the State used members' feedback.

Response: We appreciate the support for the proposed regulations. We carefully considered the benefits of national uniformity of the contents of an annual report. However, due to the differences in how States may approach setting priorities, creating their MAC and BACs, and the varying level of resources, we believe that States should have the flexibility to adopt an approach to the content of the annual report that works best within their State.

Comment: A few commenters asked CMS to either further require that the BAC issue its own set of reports and recommendations independently or as part of the MAC report.

Response: While we fully understand and agree with the importance of the BAC and ensuring that their voices are heard, we believe that requiring States to create a second BAC-only annual report would add administrative burden. The proposed regulatory language requires that States create an annual report that reflects the activities of both the MAC and BAC. Since the annual report is required to contain the priorities and activities of both the MAC and BAC, there is no need for a separate BAC-only report.

Comment: There were a handful of commenters that wanted CMS to reconsider the report requirement because they thought the resource burden was too great to develop an annual report, the reporting requirement lacked meaning, or they wanted CMS to allow Medicaid agencies to set their own cadence to the reports.

Response: We understand the concerns of the commenters, but we have written the annual report requirement broadly to ensure maximal flexibility for States to meet this requirement. It is critical that States document the work and key outcomes of the MAC and BAC. Further, we believe the annual report requirement supports the implementation of the principles of bi-directional feedback, transparency, and accountability on the part of the State, MAC, and BAC. In response to comments about burden to States, we have adjusted the proposed applicability date for this requirement of 1 year and are now finalizing it as, States have 2 years from July 9, 2024 to finalize the first annual MAC report. After the report has been finalized, States will have 30 days to post the annual report.

Comment: A few commenters asked CMS to require States to conduct additional activities related to monitoring the MAC and BAC, in addition to the annual report. The commenters' suggestions included: implementing a corrective action plan for States that failed to meet the MAC requirements; requiring process evaluations on the experiences of the MAC and BAC members be conducted and the findings be made public; and requiring States to engage in program improvement activities in response to the recommendations made by the MAC that appear in the annual report.

Response: We carefully considered the benefits of requiring additional studies and activities to be captured by States and included in the annual report. However, we want to keep the parameters of our expectations on the content of a State's annual report to be as broad as possible to give each State the ability to create a report that will help them best document the interested parties' engagement with the MAC and the BAC and serve as a tool for helping advance programmatic goals over time.

Comment: A couple of commenters requested CMS publish the annual reports on its website.

Response: We thank the commenters for this suggestion. Currently, we believe each respective State Medicaid agency's website to be the most appropriate place for the annual reports to be published. However, we will consider whether the needs of interested parties would be better served with CMS collecting and publishing annual reports as well.

Comment: A few commenters inquired about how CMS would provide oversight on compliance with activities such as the annual report and number of meetings requirements.

Response: We thank commenters for these questions. We are currently assessing the most effective strategies with which to provide oversight. As these requirements implement State plan requirements in section 1902(a)(4) and (a)(19) of the Act, noncompliance with the provisions of this final rule could result in a State plan compliance action in accordance with § 430.35.

After consideration of public comments, we are finalizing § 431.12(i) as proposed with:

- Language modifications to reflect the new name of the BAC.
- Additional sentences at the end of § 431.12(i)(3), ''States have 2 years from July 9, 2024 to finalize the first annual MAC report. After the report has been finalized, States will have 30 days to post the annual report.''

10. Federal Financial Participation (§ 431.12(j))

In the current regulation, paragraph (g) Federal financial participation, noted that FFP is available at 50 percent in expenditures for the committee's activities. As noted in the proposed rule, we are not making changes to, and thus are maintaining, the current regulatory language on FFP from previous paragraph (g) to support committee activities, to appear in new paragraph (j) with conforming edits for the new MAC and BAC names.

We received public comments on these proposals. The following is a summary of the comments we received and our responses.

Comment: We received a few comments about the newly proposed § 431.12(j), encouraging CMS to offer a higher FFP than 50 percent. One commenter suggested that 90 percent FFP would be ideal.

Response: For Medicaid, all States receive a statutory 50 percent Federal matching rate for general administrative activities. States may also receive higher Federal matching rates for certain administrative activities, such as design, development, installation, and operation of certain qualifying systems. Federal matching rates are established by Congress, and CMS does not have the authority to change or increase them.

After consideration of public comments, we are finalizing new paragraph § 431.12(j) as proposed with:

- Language modifications to reflect the new name of the BAC.

11. Applicability Dates § 431.12(k)

For this final rule, we are adding new paragraph § 431.12 (k) *Applicability dates.* In the proposed rule, we noted that the requirements of § 431.12 would be effective 60 days after the publication date of the final rule, although we established different applicability dates by which States must implement certain provisions. We then solicited comment on whether 1 year was too much or not enough time for States to implement the updates in this regulation in an effective manner. We understand that States may need to modify their existing MCACs to reflect the finalized requirements for MACs and may also need to create the BAC and recruit members to participate

if they do not already have a similar entity already in place.

We received public comments on proposed implementation timeline. The following is a summary of the comments we received and our responses.

Comment: We received several comments related to the implementation timeframes specified in the MAC and BAC provisions of the proposed rule. The majority of comments fell into two categories: commenters who noted that 1 year should be sufficient to implement the required changes; and commenters who suggested that CMS provide at least 2 years for implementation. Other commenters suggested that CMS consider a graduated approach that would allow States to demonstrate compliance with the minimum 25 percent BAC crossover requirement over a period of time. The commenters who requested additional time shared concerns about States' many other ongoing priorities, workforce shortages, the amount of time and resources it would take to set up the MAC and BAC, and having enough time to submit budget requests to their legislature so they can get the resources to support the required activities.

Response: We have carefully considered the comments received and acknowledge that additional time for implementation of the requirements could be beneficial for States given competing priorities, budgeting and other challenges States may encounter. Additionally, we weighed the request for a graduated approach to demonstrate compliance with a 25 percent BAC crossover requirement, and we agree that a graduated approach will allow States a longer ramp-up time to modify their current MCACs, as well as to set up the BAC and recruit members to participate.

In the proposed rule, we proposed that States have 1 year from the effective date of the final rule to recruit members, set up their MAC and BAC, hold meetings, and submit their first annual report. Based on public comment, we understand that 1 year is not enough time to complete all of these activities. As a result, we are adding and finalizing in this final rule a second implementation year. Based on these changes, States would now recruit members and set up their MACs and BACs during the first year implementation year. In the second implementation year, States would hold the required MAC and BAC meetings. At the end of that second implementation year, States would summarize the information from the MAC and BAC activities and use that information to complete an annual report. States would then fulfill the annual report requirement by finalizing the report and posting the annual report to their websites. This annual report would need to be posted by States within 30 days of the report being completed.

Additionally, as noted in section II.A.4., and in response to public comment asking for States to have a more graduated approach to reach the requirement of having 25 percent of MAC members be from the BAC, we are finalizing in this rule an extended implementation timeline for this requirement. The finalized provision at § 431.12(d)(1) will require that, for the period from July 9, 2024 through July 9, 2025, 10 percent of the MAC members must come from the BAC; for the period from July 10, 2025 through July 9, 2026, 20 percent of MAC members must come from the BAC; and thereafter, 25 percent of MAC members must come from the BAC. We developed this approach based on the comments we received about competing State priorities and the time and resources that a State would need to meet the new requirements. Additionally, we understand States may face challenges with finding, recruiting, and training beneficiary members to serve on the BAC.

Based on the comments received, we are changing two applicability dates. We note in this new paragraph *Applicability dates* § 431.12(k), that except as noted in paragraphs (d)(1) and (i)(3) of this section, the requirements in paragraphs (a) through (j) are applicable July 9, 2025.

B. Home and Community-Based Services (HCBS)

To address several challenges that we described in the proposed rule (88 FR 27964 and 27965), we proposed both to amend and add new Federal HCBS requirements to improve access to care, quality of care, and beneficiary health and quality of life outcomes, while consistently meeting the needs of all beneficiaries receiving Medicaid-covered HCBS. The preamble of the proposed rule (88 FR 27971 through 27996) outlined our proposed changes in the context of current law.

As we noted in the proposed rule (88 FR 27971), we have previously received questions from States about the applicability of HCBS regulatory requirements to demonstration projects approved under section 1115 of the Act that include HCBS. As a result, we proposed that, consistent with the applicability of other HCBS regulatory requirements to such demonstration projects, the requirements for section 1915(c) waiver programs and section 1915(i), (j), and (k) State plan services included in the proposed rule would apply to such services included in approved section 1115 demonstration projects, unless we explicitly waive one or more of the requirements as part of the approval of the demonstration project.

We proposed not to apply the requirements for section 1915(c) waiver programs and section 1915(i), (j), and (k) State plan services that we proposed in the proposed rule to the Program of All-Inclusive Care of the Elderly (PACE) authorized under sections 1894 and 1934 of the Act, as the existing requirements for PACE either already address or exceed the requirements outlined in the proposed rule, or are substantially different from those for section 1915(c) waiver programs and section 1915(i), (j), and (k) State plan services.

We received public comments on these proposals for HCBS under the Medicaid program. The following is a summary of the comments we received and our responses. We discuss the comments we received related to specific proposals, and our responses, in further detail throughout the sections in this portion of the final rule (section II.B.).

Comment: Many commenters expressed general support for our efforts to increase transparency and accountability in HCBS programs, and ultimately improve access to Medicaid services. Commenters in particular noted general support for our proposed provisions in this section that are designed to support HCBS delivery systems through improvements in data collection around waiting lists and service delivery, enhancements to person-centered planning, standardization of critical incident investigation and grievance process requirements, and establishment of defined quality measures. While overall reaction to the payment adequacy minimum performance level (discussed in section II.B.5. of the proposed rule and this final rule) was mixed, many commenters agreed that HCBS programs are facing shortages of direct care workers that pose obstacles to beneficiaries' access to high-quality HCBS.

Commenters also shared several ideas for ways we could improve beneficiaries' access to, or the overall quality of, HCBS beyond the provisions presented in the proposed rule.

Some commenters expressed concerns that the HCBS provisions we proposed, when taken together, could present significant administrative costs to States and, in some cases, to providers.

Response: We thank commenters for their support. Comments on specific provisions that we proposed are summarized below, along with our responses. We also appreciate the many thoughtful suggestions made by commenters for other ways they believe HCBS could be improved beyond what we proposed in the proposed rule. While comments that are outside the scope of what we proposed in the proposed rule and not relevant are not summarized in this final rule, we will take these recommendations under consideration for potential future rulemaking.

We recognize that we must balance our desire to stimulate ongoing improvements in HCBS programs with the need to give States, managed care plans, and providers sufficient time to make adjustments and allocate resources in support of these changes. After consideration of comments we received, we are finalizing many of our proposals, some with modifications. These modifications are discussed in this section (section II.B.) of the final rule.

We also note that some commenters expressed general support for all of the provisions in section II.B. of this rule, as well as for this rule in its entirety. In response to commenters who supported some, but not all, of the policies and regulations we proposed in the proposed rule (particularly in section II.B related to HCBS), we are clarifying and emphasizing our intent that each final policy and regulation is distinct and severable to the extent it does not rely on another final policy or regulation that we proposed.

While the provisions in section II.B. of this final rule are intended to present a comprehensive approach to improving HCBS and complement the goals expressed and policies and regulations being finalized in sections II.A. (Medicaid Advisory Committee and Beneficiary Advisory Group) and II.C. (Documentation of Access to Care and Service Payment Rates) of this final rule, we intend that each of them is a distinct, severable provision, as finalized. Unless otherwise noted in this rule, each policy and regulation being finalized under this section II.B is distinct and severable from other final policies and regulations being finalized in this section or in sections II.A. or II.C of this final rule, as well as from rules and regulations currently in effect.

Consistent with our previous discussion earlier in section II. of this final rule regarding severability, we are clarifying and emphasizing our intent that if any provision of this final rule is held to be invalid or unenforceable by its terms, or as applied to any person or circumstance, or stayed pending further action, it shall be severable from this final rule, and from rules and regulations currently in effect, and not affect the remainder thereof or the application of the provision to other persons not similarly situated or to other, dissimilar circumstances. For example, we intend that the policies and regulations we are finalizing related to person-centered planning and related reporting requirements (sections II.B.1 and II.B.7. of this final rule) are distinct and severable from the policies and regulations we are finalizing related to grievance system (section II.B.2. of this final rule), and incident management system and related reporting requirements (sections II.B.3 and II.B.7. of this final rule). The standalone nature of the finalized provisions is further discussed in their respective sections in this rule.

Comment: Several commenters addressed the relationship between the proposed HCBS requirements and HCBS authorized under a section 1115 demonstration project. A few commenters requested clarification about the application of the proposed HCBS requirements in this section to services delivered under section 1115 authority. A few commenters expressed concern about what they perceived was the exclusion of services provided through a managed care delivery system under section 1115 demonstration authority. One commenter recommended only applying the finalized rules to new section 1115 demonstration programs; in the alternative, if applying the finalized requirements to current section 1115 demonstration programs, the commenter recommended that States develop transition plans and be given a reasonable timeframe for bringing their programs into compliance. A few commenters recommended that we add a specific reference to section 1115 demonstration authority of the Act in our proposed HCBS requirements (if finalized), including at § 438.72(b) (applying various finalized requirements to managed care programs) and § 441.302(k) (applying new payment adequacy requirements to section 1915(c) waiver programs).

Response: We are confirming that, consistent with the applicability of other HCBS regulatory requirements to such demonstration projects, the requirements for section 1915(c) waiver programs and section 1915(i), (j), and (k) State plan services included in this final rule, apply to such services included in approved section 1115 demonstration projects, unless we explicitly waive one or more of the requirements as part of the approval of the demonstration project. Further, we have not identified a compelling reason to treat States operating section 1115 demonstration projects differently from States operating other HCBS programs in terms of implementation, such as by requiring States with section 1115 demonstration programs to develop transition plans (as was recommended by one commenter). We also believe that the timeframes that are finalized in this rule are reasonable and sufficient to allow all States operating programs under all relevant authorities to come into compliance. If States have specific questions or concerns regarding compliance with the finalized requirements, we will provide assistance as needed.

We note that we have already included references to managed care delivery systems implemented under section 1115(a) of the Act in the implementation requirements at §§ 441.301(c)(3)(iii) (implementing the person-centered planning process minimum performance requirements), 441.302(a)(6)(iii) (implementing the critical incident management system minimum performance requirements), 441.302(k)(8) (implementing the payment adequacy minimum performance requirement), 441.311(f) (implementing reporting requirements), and 441.313(c) (implementing the website transparency provision). We decline commenters' recommendations that we include additional references to section 1115 of the Act, as we believe doing so would be duplicative. We will ensure that the approved standard terms and conditions of States' section 1115 demonstration projects are clear that the States must comply with all applicable HCBS requirements that we are finalizing in this rule.

We did not receive any comments on our proposal not to extend HCBS requirements that we are finalizing in this rule to PACE. We are finalizing our proposal to not apply the requirements we are finalizing in this rule for section 1915(c) waiver programs and section 1915(i), (j), and (k) State plan services to PACE authorized under sections 1894 and 1934 of the Act.

1. Person-Centered Service Plans (§§ 441.301(c), 441.450(c), 441.540(c), and 441.725(c))

Section 1915(c)(1) of the Act requires that services provided through section 1915(c) waiver programs be provided under a written plan of care (hereinafter referred to as person-centered service plans or service plans). Existing Federal regulations at § 441.301(c) address the person-centered planning process and

include a requirement at § 441.301(c)(3) that the person-centered service plan be reviewed and revised, upon reassessment of functional need, at least every 12 months, when the individual's circumstances or needs change significantly, or at the request of the individual.

In 2014, we released guidance for section 1915(c) waiver programs [51] (hereinafter the 2014 guidance) that included expectations for State reporting of State-developed performance measures to demonstrate compliance with section 1915(c) of the Act and the implementing regulations in 42 CFR part 441, subpart G through six assurances, including assurances related to person-centered service plans. The 2014 guidance indicated that States should conduct systemic remediation and implement a Quality Improvement Project when they score below an 86 percent threshold on any of their performance measures. We refer readers to section II.B.1. of the proposed rule (88 FR 27972) for a detailed discussion of the six assurances identified in the 2014 guidance.

In the proposed rule (88 FR 27972 through 27975), we proposed a different approach for States to demonstrate that they meet the statutory requirements in section 1915(c) of the Act and the regulatory requirements in 42 CFR part 441, subpart G, including the requirements regarding assurances around service plans. We proposed this approach based on feedback CMS obtained during various public engagement activities conducted with States and other interested parties over the past several years about the reporting discussed in the 2014 guidance, as well as feedback received through a request for information (RFI) [52] we released in the spring of 2022. Through this feedback, many States and interested parties expressed, and we identified, that there is a need to standardize reporting and set minimum standards for HCBS. We proposed HCBS requirements to establish a new strategy for oversight, monitoring, quality assurance, and quality improvement for section 1915(c) waiver programs, including minimum performance requirements and reporting requirements for section 1915(c) waiver programs. Further, as is discussed later in this section (section II.B.1. of the rule), to ensure consistency and alignment across HCBS authorities, we proposed to apply the proposed requirements for section 1915(c) waiver programs to section 1915(i), (j), and (k) State plan services, as appropriate.

As support for our proposals, we noted that under section 1902(a)(19) of the Act, States must provide safeguards to assure that eligibility for Medicaid-covered care and services are determined and provided in a manner that is consistent with simplicity of administration and that is in the best interest of Medicaid beneficiaries. While the needs of some individuals who receive HCBS may be relatively stable over some time periods, individuals who receive HCBS experience changes in their functional needs and individual circumstances, such as the availability of natural supports or a desire to choose a different provider, that necessitate revisions to the person-centered service plan to remain as independent as possible or to prevent adverse outcomes. Thus, the requirements to reassess functional need and to update the person-centered service plan based on the results of the reassessment, when circumstances or needs change significantly or at the request of the individual, are important safeguards that are in the best interest of beneficiaries because they ensure that an individual's section 1915(c) waiver program services change to meet the beneficiary's needs most appropriately as those needs change.

We also noted that effective State implementation of the person-centered planning process is integral to ensuring compliance with section 2402 of the of the Patient Protection and Affordable Care Act (Affordable Care Act) (Pub. L. 111–148, March 23, 2010). Section 2402 of the Affordable Care Act requires the Secretary of HHS to ensure that all States receiving Federal funds for HCBS, including Medicaid, develop HCBS systems that are responsive to the needs and choices of beneficiaries receiving HCBS, maximize independence and self-direction, provide support and coordination to facilitate the participant's full engagement in community life, and achieve a more consistent and coordinated approach to the administration of policies and procedures across public programs providing HCBS.[53]

Finally, we noted that since the release of the 2014 guidance, we have received feedback from States, the HHS Office of Inspector General (OIG), Administration for Community Living (ACL), and Office for Civil Rights (OCR), and other interested parties on how crucial person-centered planning is in the delivery of care and the significance of the person-centered service plan for the assurance of health and welfare for section 1915(c) waiver program participants that underscored the need for the proposals.[54]

To ensure a more consistent application of person-centered service plan requirements across States and to protect the health and welfare of section 1915(c) waiver participants, under our authority at sections 1915(c)(1) and 1902(a)(19) of the Act and section 2402(a)(1) and (2) of the Affordable Care Act, we proposed several changes to our person-centered service plan requirements in section II.B.1 of the proposed rule (88 FR 27972 through 27975), as discussed in more detail in this section of the final rule. First, we proposed revisions to § 401.301(c)(3)(i) to clarify that: (1) States are required to ensure person-centered service plans are reviewed and revised in compliance with requirements set forth therein; and (2) changes to the person-centered service plans are not required if the reassessment does not indicate a need for changes. Second, we proposed to establish a minimum performance level for States to demonstrate they meet the requirements at § 441.301(c)(3). Specifically, at § 441.301(c)(3)(ii)(A), we proposed to require that States demonstrate that a reassessment of functional need was conducted at least annually for at least 90 percent of individuals continuously enrolled in the waiver for at least 365 days. At § 441.301(c)(3)(ii)(B) we proposed to require that States demonstrate that they reviewed the person-centered service plan, and revised the plan as appropriate, based on the results of the required reassessment of functional need at least every 12 months for at least 90 percent of individuals continuously enrolled in the waiver for at least 365 days. Finally, we proposed to apply the requirements at § 441.301(c)(3) to section 1915(j), (k), and (i) State plan

services at §§ 441.450(c), 441.540(c), and 441.725(c), respectively.

We received public comments on these proposals. The following is a summary of the comments we received and our responses.

Comment: One commenter questioned whether States would continue to be required to demonstrate compliance with the six assurances and the related subassurances, including those related to person-centered service plans described in the 2014 guidance, or whether the minimum performance requirements and reporting requirements that we proposed in the proposed rule for the section 1915(c) waiver program, if finalized in the final rule, supersede these six assurances and related subassurances.

Response: We noted in the proposed rule (88 FR 27972), and reiterate here, that States must demonstrate that they meet the statutory requirements in section 1915(c) of the Act and the regulatory requirements in part 441, subpart G, including the requirements regarding assurances around person-centered service plans.

We proposed new minimum performance requirements and new reporting requirements for section 1915(c) waiver programs that are intended to supersede and fully replace the reporting requirements and the 86 percent performance level threshold for performance measures described in the 2014 guidance. Further, to ensure consistency and alignment across HCBS authorities, we proposed to apply the proposed requirements for section 1915(c) waiver programs to section 1915(i), (j), and (k) State plan services as appropriate.

We confirm that the section 1915(c) six assurances and the related subassurances,[55] including those related to person-centered service plans, continue to apply. The requirements proposed at § 441.301(c)(3)(ii)(A) and (B) (discussed in the next section, II.B.1.b. of this rule) assess State performance with the requirements at § 441.301(c)(3) and we did not intend to suggest that they would fully supersede the section 1915(c) six assurances and the related subassurances in the 2014 guidance. Further, as finalized later in this rule, States will be required to report on the minimum performance levels at § 441.301(c)(3)(ii)(A) and (B). To reduce unnecessary burden and to avoid duplicative or conflicting reporting requirements, we plan to work with States to phase-out the reporting requirements and the 86 percent performance level threshold for performance measures described in the 2014 guidance as they implement these requirements in the final rule.

Comment: A commenter requested we clarify what the impacts would be to the existing section 1915(c) waiver reporting tools as defined in the Version 3.6 HCBS Waiver Application if we finalize our proposals.

Response: We expect to implement new reporting forms for the new reporting requirements that we are finalizing in this final rule. However, some components of the existing reporting forms may remain in effect to the extent that they cover other requirements that remain unchanged by the requirements that we are finalizing in this final rule. States and interested parties will have an opportunity to comment on the new reporting forms and the revised forms through the Paperwork Reduction Act notice and comment process.

a. Finalization of Amended Requirement for Review of the Person-Centered Service Plan (§ 441.301(c)(3)(i))

At § 441.301(c)(3), we proposed to revise the regulatory text so that it is clearer that the State is the required actor under § 441.301(c)(3), and that changes to the person-centered service plan are not required if the reassessment does not indicate a need for changes. In the proposed rule (88 FR 27973), we noted that, with this revision to the regulatory text, the State could, for instance, meet the requirement that the person-centered service plan was reviewed, and revised as appropriate, based on the results of the required reassessment of functional need by documenting that there were no changes in functional needs or the individual's circumstances upon reassessment that necessitated changes to the service plan. However, the State would still be expected to review the service plan to confirm that no revisions are needed, even if the reassessment identified no changes in functional needs or the individual's circumstances.

Specifically, we proposed to move the sentence at § 441.301(c)(3) beginning with ''The person-centered service plan must be reviewed. . .'' to a new paragraph at § 441.301(c)(3)(i) and reposition the regulatory text under the proposed title, *Requirement.* In addition, we proposed to revise the regulatory text at the renumbered paragraph to clarify that the person-centered service plan must be reviewed, and revised as appropriate, based on the reassessment of functional need as required by § 441.365(e), at least every 12 months, when the individual's circumstances or needs change significantly, or at the request of the individual.

We received public comment on this proposal. Below is the summary of the comment and our response.

Comment: Commenters did not raise specific concerns about the proposal at § 441.301(c)(3)(i). However, one commenter raised concerns about the impact the minimum performance requirement proposed at § 441.301(c)(3)(ii) (discussed in greater detail in the next section) would have on the requirement at § 441.301(c)(3)(i). The commenter expressed concern that States may interpret the 90 percent minimum performance levels proposed at § 441.301(c)(3)(ii)(A) and (B) as meaning they are only required to conduct the reassessments and updates to person-centered service plans as required by § 441.301(c)(3)(i) for 90 percent of beneficiaries, not for 100 percent of beneficiaries receiving HCBS. This commenter also suggested that CMS clarify that States should conduct functional assessments and person-centered plan updates for every individual to make sure that the requirement at § 441.301(c)(3)(i) is not open to interpretation.

Response: We intend that the 90 percent minimum performance requirements proposed at § 441.301(c)(3)(ii) would assess States' minimum performance of the requirements at § 441.301(c)(3)(i); we do not suggest that reassessments of functional need and reviews, and revisions as appropriate, of the person-centered service plan, based on the results of the required reassessment of functional need, are required for only 90 percent of individuals enrolled in the waiver program. The minimum performance requirements at § 441.301(c)(3)(ii) (and the associated reporting requirements at § 441.311(b)(3), discussed in section II.B.7. of this final rule), while important for aiding in our oversight and States' accountability for complying with § 441.301(c)(3)(i), are distinct and severable requirements from § 441.301(c)(3)(i). In other words, States would be expected to comply fully with § 441.301(c)(3)(i) even had we not also proposed the specific minimum performance requirement at § 441.301(c)(3)(ii). Thus, the minimum performance of 90 percent proposed in § 441.301(c)(3)(ii) notwithstanding, it is our intent to require at § 441.301(c)(3)(i) that States ensure that the person-

[55] Modifications to Quality Measures and Reporting in § 1915(c) Home and Community-Based Waivers. March 2014. Accessed at *https://www.hhs.gov/guidance/sites/default/files/hhs-guidance-documents/3-cmcs-quality-memo-narrative_0_2.pdf.*

centered service plan for every individual is reviewed, and revised as appropriate, at least every 12 months, when the individual's circumstances or needs change significantly, or at the request of the individual. To ensure that this expectation is clear in the requirement, we are finalizing § 441.301(c)(3)(i) with a modification to specify that the requirement at § 441.301(c)(3)(i) applies to every individual.

Upon further review, we also determined that retaining the reference to § 441.301(c)(3) in § 441.365(e), governing the frequency of functional assessments for section 1915(d) waiver programs, at the redesignated § 441.301(c)(3)(i), is both obsolete and unnecessary. Section 441.365(e) was a standard used by section 1915(d) waiver programs, which were time-limited programs that are no longer in effect, to establish the frequency of functional assessments. The requirements at § 441.301(c)(3) establish the frequency of functional assessments for section 1915(c) programs, thus referencing § 441.365(e), which is obsolete, is unnecessary.

Accordingly, we are finalizing § 441.301(c)(3)(i) with the previously noted modifications to specify that the requirement applies to every individual and removing reference to § 441.365(e), as well as a minor technical modification to remove an extraneous comma after the word ''revised.'' As finalized, § 441.301(c)(3)(i) specifies that the State must ensure that the person-centered service plan for every individual is reviewed, and revised as appropriate, based upon the reassessment of functional need at least every 12 months, when the individual's circumstances or needs change significantly, or at the request of the individual.

b. Minimum Performance Level (§ 441.301(c)(3)(ii))

To ensure a more consistent application of person-centered service plan requirements across States and to protect the health and welfare of section 1915(c) waiver participants, under our authority at sections 1915(c)(1) and 1902(a)(19) of the Act and section 2402(a)(1) and (2) of the Affordable Care Act, we proposed to codify a minimum performance level to demonstrate that States meet the requirements at § 441.301(c)(3) (88 FR 27973).

Specifically, at new § 441.301(c)(3)(ii)(A), we proposed to require that States demonstrate that a reassessment of functional need was conducted at least annually for at least 90 percent of individuals continuously enrolled in the waiver for at least 365 days. We also proposed, at new § 441.301(c)(3)(ii)(B), to require that States demonstrate that they reviewed the person-centered service plan and revised the plan as appropriate based on the results of the required reassessment of functional need at least every 12 months for at least 90 percent of individuals continuously enrolled in the waiver for at least 365 days.

We intended that these proposed minimum performance levels would strengthen person-centered planning reporting requirements while taking into account that there may be legitimate reasons why assessment and care planning processes occasionally are not completed timely in all instances. We also considered whether to propose allowing good cause exceptions to the minimum performance level in the event of a natural disaster, public health emergency, or other event that would negatively impact a State's ability to achieve a minimum 90 percent performance level. In the end, we decided not to propose good cause exceptions because the minimum 90 percent performance level is intended to account for various scenarios that might impact a State's ability to achieve these minimum performance levels. Further, we noted that there are existing disaster authorities that States could utilize to request a waiver of these requirements in the event of a public health emergency or a disaster (88 FR 27973).

We received public comments on these proposals. The following is a summary of the comments we received and our responses.

Comment: Many commenters supported our proposals to codify at § 441.301(c)(3)(ii)(A) and (B) minimum performance levels for States to demonstrate that they meet the requirements at § 441.301(c)(3)(i). These commenters noted that, by CMS establishing minimum performance levels for the person-centered planning requirements, beneficiaries who receive HCBS may be more empowered to actively participate in decision-making processes related to their care and services.

Response: We appreciate the support for our proposals.

Comment: One commenter suggested we specify that a beneficiary's services should not be reduced, suspended, or terminated because the reassessment of functional need or person-centered service plan update did not occur within the specified timeframe.

Response: The proposed requirements to reassess functional need and to update the person-centered service plan based on the results of the reassessment, when circumstances or needs change significantly, or at the request of the individual, are important safeguards that are in the best interest of beneficiaries because they ensure that an individual's section 1915(c) waiver program services are reassessed to ensure they continue meeting the beneficiary's needs most appropriately as those needs change. Any changes in the services and supports included in the person-centered service plan for beneficiaries should be based on changes in circumstances or needs or preferences of the individual; they should not result from a failure by the State or managed care plan to conduct required assessment and service planning processes timely. Further, States should not reduce, suspend, or terminate a beneficiary's services solely to reach the minimum performance level required at § 441.301(c)(3)(ii)(A) and (B).

Comment: A couple of commenters suggested we clarify whether States would be required to implement corrective action for noncompliance with the 90 percent performance level if the same beneficiaries do not receive timely reassessments or updated person-centered plans repeatedly. One commenter questioned whether a 90 percent performance level provides an acceptable margin of error (10 percent) and requested clarification on whether States will be expected to remediate through corrective action if this threshold is not met.

Response: Corrective actions or other enforcement actions will be determined on a case-by-case basis, using our standard enforcement authority, for States that are determined to not be compliant with the requirements at § 441.301(c)(3)(ii)(A) and (B). We will take this feedback into account as we plan technical assistance and develop guidance for States.

Comment: One commenter stated that the person-centered planning requirements are essential to ensure choice and access to appropriate service and suggested that, although the proposed approach meets compliance oversight and monitoring objectives, a quality improvement strategy to address improving outcomes with the person-centered planning requirements is needed.

Response: We note that the proposed requirements at § 441.301(c)(3)(ii)(A) and (B) were intended to strengthen person-centered planning reporting requirements by codifying a minimum performance level to demonstrate that States meet the requirements at § 441.301(c)(3). We encourage States to consider implementing quality

improvement processes to strengthen and improve person-centered planning in their HCBS programs. Further, as discussed in section II.B.8. of this final rule, we are finalizing the HCBS Quality Measure Set reporting requirements to include requirements for States to implement quality improvement strategies in their HCBS programs; while the HCBS Quality Measure Set is distinct from the person-centered planning requirements being finalized at § 441.301(c)(3), we believe the HCBS Quality Measure Set requirements support the quality improvement objectives described by this commenter.

Comment: A few commenters suggested CMS include a good cause exception for States that do not meet the minimum performance level to take into account certain instances that fall outside of the specified performance standards for appropriate reasons, such as for resource challenges in rural areas, or for beneficiary-related events that could delay the ability to complete the assessment, such as medical emergencies/hospitalizations. Alternatively, a few commenters supported our proposal to not allow good cause exceptions to the performance level, observing that the 90 percent minimum performance level already gives States leeway for unexpected occurrences.

Response: We believe that the 90 percent minimum performance level proposed at § 441.301(c)(3)(ii)(A) and (B) sets a realistic and achievable threshold.

As we noted in the proposed rule (88 FR 27973), we decided to not propose any good cause exceptions because the minimum 90 percent performance level accounts for various scenarios that might impact the State's ability to achieve these performance levels, and there are existing disaster authorities, such as the waiver authority under section 1135 of the Act, that States could utilize to request a waiver of these requirements in the event of a public health emergency or a disaster. We decline to include good cause exceptions in the minimum performance level in this final rule.

After consideration of public comments, we are finalizing our proposals at § 441.301(c)(3)(ii) with minor modifications to clarify that the State must ensure that the minimum performance levels specified at § 441.301(c)(3)(ii)(A) and (B) are met (since States typically have person-centered planning requirements carried out by entities such as case managers or providers, rather than directly by the State). We are also finalizing § 441.301(c)(3)(ii)(B) with minor technical modifications to make the same punctuation correction as the modification finalized in § 441.301(c)(3)(i).

c. Application to Managed Care and Fee-for-Service (§ 441.301(c)(3))

To ensure consistency in person-centered service plan requirements between FFS and managed care delivery systems, we proposed to add the requirements for services delivered under FFS at § 441.301(c)(3) to services delivered under managed care delivery systems. Section 2402(a)(3)(A) of the Affordable Care Act requires States to improve coordination among, and the regulation of, all providers of Federally and State-funded HCBS programs to achieve a more consistent administration of policies and procedures across HCBS programs. In the context of Medicaid coverage of HCBS, it should not matter whether the services are covered directly on a FFS basis or by a managed care plan to its enrollees. Therefore, we proposed that a State must ensure compliance with the requirements in § 441.301(c)(3) with respect to HCBS delivered both under FFS and managed care delivery systems.

We note that in the proposed rule at 88 FR 27974, we made the statement that to ensure consistency in person-centered service plan requirements between FFS and managed care delivery systems, we propose to add the requirements at § 441.301(c)(3) to 42 CFR 438.208(c). This statement was published in error, and we did not intend to propose this specific regulation text include reference to § 438.208(c). We note that § 438.208(c)(3)(v) already requires that managed care plans comply with § 441.301(c)(3), generally, so we believe that referencing § 438.208(c) is not necessary. We also note that § 438.208(c)(3)(ii) requires compliance with the other person-centered planning requirements at § 441.301(c)(1) and (2). Thus, also referring to § 438.208(c) would be unnecessary.

We received public comments on this proposal. The following is a summary of the comments we received and our responses.

Comment: Commenters expressed support for the proposed requirements at § 441.301(c)(3) to be applied to managed care delivery systems as well, noting that States must ensure compliance with respect to HCBS delivered both in FFS and managed care delivery systems. Commenters also noted that the process of conducting reassessments and making updates to a person-centered service plan is agnostic to whether a provider is paid by a managed care plan or through a FFS delivery system.

Response: We appreciate the support for our proposal.

After consideration of public comments received, we are finalizing our proposed policy to require that the person-centered planning requirements at § 441.301(c)(3) finalized in this section are applied to HCBS delivered under both managed care and FFS delivery systems. As noted above, we are not finalizing a new reference to § 441.301(c)(3) at § 438.208(c), as § 438.208(c) already requires that managed care plans comply with § 441.301(c)(1) through (c)(3), which includes the requirements being finalized in this rule at § 441.301(c)(3)(i) and (ii). Additionally, as is discussed in section II.B.11. of this rule, we are finalizing our proposal at § 438.72(b) to direct States to comply with the requirements finalized in this final rule, including the revised person-centered centered planning requirements at § 441.301(c)(1) through (c)(3), for services authorized under HCBS authorities and provided under managed care delivery systems.

d. Person-Centered Planning—Definition of Individual (§ 441.301(c)(1))

We also proposed updates to existing language describing the person-centered planning process specific to section 1915(c) waivers. Current language describes the role of an individual's authorized representative as if every waiver participant will require an authorized representative, which is not the case. This language has been a source of confusion for States and providers. We proposed to amend the regulation text at § 441.301(c)(1) to better reflect that the individual, or if applicable, the individual and the individual's authorized representative, will lead the person-centered planning process. When the term individual is used throughout this section, it includes the individual's authorized representative will lead the person-centered planning process if applicable. We note that, in the proposed rule, we described our proposal as removing extraneous language and not as an amendment of § 441.301(c)(1) (88 FR 27974). Upon further consideration, we believe characterizing this proposal as an amendment is more accurate. We intend that this proposed language as finalized will bring the section 1915(c) waiver regulatory text in line with person-centered planning process language in both the section 1915(j) and (k) State plan options.

We did not receive public comments on this proposal. However, after further

consideration of the proposed requirement, we are finalizing § 441.301(c)(1) with a technical modification to clarify that the language contained in § 441.301(c)(1), as finalized, applies to the person-centered planning requirements **throughout § 441.301(c)(1) through (3)**. (New language identified in bold.) This modification expresses our intent that § 441.301(c)(1) applies to the person-centered planning requirements in § 441.301(c)(1) through (3), rather than § 441.301(c) in its entirety.

e. Applicability Date (§ 441.301(c)(3)(iii))

We proposed at § 441.301(c)(3)(iii) to make the performance levels under § 441.301(c)(3)(ii) effective 3 years after the effective date of § 441.301(c)(3) (in other words, 3 years after the effective date of the final rule) in FFS delivery systems. For States that implement a managed care delivery system under the authority of sections 1915(a), 1915(b), 1932(a), or 1115(a) of the Act and include HCBS in the managed care organization's (MCO's), prepaid inpatient health plan's (PIHP's), or prepaid ambulatory health plan's (PAHP's) contract, we proposed to provide States until the first rating period with the MCO, PIHP, or PAHP, beginning on or after 3 years after the effective date of the final rule to implement these requirements. We solicited comment on whether the timeframe to implement the proposed regulations is sufficient, whether we should require a shorter timeframe or longer timeframe to implement these provisions, and, if an alternate timeframe is recommended, the rationale for that alternate timeframe.

We received public comments on these proposals. The following is a summary of the comments we received and our responses.

Comment: Most commenters supported the 3-year timeframe for the effective date as defined at § 441.301(c)(3)(iii). A few commenters expressed concerns about the overall burden they believe will be associated with the final rule, due to competing priorities, and the effect it may have on States' ability to implement the proposed person-centered planning provisions at § 441.301(c)(3)(ii) within 3 years following the effective date of the final rule. A few commenters expressed that the performance levels under § 441.301(c)(3)(ii) may require States to have a longer runway to implement and operationalize State regulation changes and processes, revise policies, and hire critical staff. A few commenters also requested we consider alternative effective dates for the person-centered planning minimum performance requirements, ranging from 18 months to 4 years.

Response: We noted, in the proposed rule (88 FR 27974), that we recognize many States may need time to implement the proposed HCBS requirements we are finalizing in the final rule. We acknowledge that States will have to expend resources in addressing the person-centered planning minimum performance requirements, including needing time to amend provider agreements, make State regulatory or policy changes, implement process or procedural changes, update information systems for data collection and reporting, or conduct other activities to implement these person-centered planning requirements.

We believe that 3 years for States to ensure compliance with the person-centered planning minimum performance requirements being finalized at § 441.301(c)(3)(ii) is realistic and achievable for States. We also note that the minimum performance requirements measure performance of the requirements at § 441.301(c)(3)(i), which substantively reflect activities States are currently expected to perform under existing § 441.301(c)(3). For States implementing a managed care delivery system under the authority of sections 1915(a), 1915(b), 1932(a), or 1115(a) of the Act and include HCBS in the in the MCO's, PIHP's, or PAHP's contract, we similarly believe it is realistic and achievable to provide States with a date to comply that is until the first rating period with the MCO, PIHP, or PAHP, beginning on or after 3 years after the effective date of this final rule to implement these requirements. We will provide technical assistance to States as needed with meeting the timeframe for compliance.

After consideration of the comments received, we are finalizing the substance of §§ 441.301(c)(3)(iii) as proposed, but with minor modifications to correct erroneous uses of the word ''effective'' and to make technical modifications to the language pertaining to managed care delivery systems to improve accuracy and alignment with common phrasing in managed care contracting policy. We are retitling the requirement at § 441.301(c)(3)(iii) as Applicability date (rather than Effective date). We are also modifying the language at § 441.301(c)(3)(iii) to specify that **States must comply with** the requirements at § 441.301(c)(3)(ii) **beginning** 3 years from the effective date of this final rule (rather than stating that the performance levels described in § 441.301(c)(3)(ii) are effective 3 years after the date of enactment of the final rule); and in the case of the State that implements a managed care delivery system under the authority of sections 1915(a), 1915(b), 1932(a), or 1115(a) of the Act and includes HCBS in the MCO's, PIHP's, or PAHP's contract, the first **rating period *for contracts with the MCO, PIHP, or PAHP beginning*** on or after **the date that is** 3 years after the effective date of this **final rule**. (New language identified in bold.).

f. Application to Other Authorities

Section 2402(a)(3)(A) of the Affordable Care Act requires States to improve coordination among, and the regulation of, all providers of Federally and State-funded HCBS programs to achieve a more consistent administration of policies and procedures across HCBS programs. In accordance with the requirement of section 2402(a)(3)(A) of the Affordable Care Act and because HCBS State plan options have similar person-centered planning and service plan requirements, we proposed to include the proposed requirements at § 441.301(c)(3) in section 1915(j), (k), and (i) State plan services, at §§ 441.450(c), 441.540(c), and 441.725(c), respectively. Consistent with our proposal for section 1915(c) waivers, we proposed these requirements under section 1902(a)(19) of the Act, which authorizes safeguards necessary to assure that eligibility for care and services under the Medicaid program will be determined, and such care and services will be provided, in a manner consistent with the best interest of beneficiaries. We believe these same reasons for proposing these requirements for section 1915(c) waivers are equally applicable for these other HCBS authorities.

We considered whether to apply the proposed person-centered plan requirements at § 441.301(c)(3) to section 1905(a) ''medical assistance'' State plan personal care services, home health services, and case management services. However, we did not propose that these requirements apply to any section 1905(a) State plan services at this time. First, States do not have the same data collection and reporting capabilities for these services as they do for other HCBS at section 1915(c), (i), (j), and (k). Second, person-centered planning and service plan requirements are not required by Medicaid for section 1905(a) services, although we recommend that States implement person-centered planning processes for all HCBS. We note that the vast majority of HCBS is delivered under section 1915(c), (i), (j), and (k) authorities, while only a small percentage of HCBS

nationally is delivered under section 1905(a) State plan authorities. However, the small overall percentage includes large numbers of people with mental health needs who receive case management.

We solicited comment on whether we should establish similar person-centered planning and service plan requirements for section 1905(a) State plan personal care services, home health services and case management services.

We received public comments on these proposals. The following is a summary of the comments we received and our responses.

Comment: Commenters expressed support for applying the proposed person-centered planning and person-centered plan requirements at § 441.301(c)(3) to section 1915(j), (k), and (i) State plan services.

Response: We appreciate the support for our proposal. As noted earlier, we are finalizing modifications to § 441.301(c)(3)(i) to specify that the requirement applies to every individual and to make a technical correction to remove an extraneous comma. We are finalizing corresponding edits for section 1915(k) in § 441.540(c) and section 1915(i) in § 441.725(c). The revised language for both § 441.540(c) and § 441.725(c) will specify that the State must ensure that the person-centered service plan for every individual is reviewed, and revised as appropriate, based upon the reassessment of functional need, at least every 12 months, when the individual's circumstances or needs change significantly, and at the request of the individual. States must adhere to the requirements of § 441.301(c)(3).

Comment: A few commenters responded to our request for comment on whether we should establish similar health and welfare requirements for section 1905(a) State plan personal care services, home health services, and case management services. Several commenters supported that we decided not to propose to extend the person-centered plan requirements at § 441.301(c)(3) to section 1905(a) services. These commenters expressed concern that applying these requirements to these State plan benefits could pose critical challenges for State Medicaid and other operating agencies, due to varying levels of HCBS provided and different data reporting infrastructure States have for section 1905(a) services. A few commenters recommended that CMS apply the person-centered planning requirements to mental health rehabilitative services delivered under section 1905(a) State plan authority. A couple of other commenters suggested that mental health rehabilitative services are considered HCBS under the broader definition enacted by Congress in the American Rescue Plan Act of 2021 (Pub. L. 117–2, March 11, 2021), suggesting that CMS should consider including these services in the person-centered plan requirements at § 441.301(c)(3).

Response: At this time and as noted in the proposed rule (88 FR 27974 and 27975), we are not applying the person-centered service plan requirements at § 441.301(c)(3) to section 1905(a) services, due to the statutory and regulatory differences between services authorized under sections 1905(a) and 1915 of the Act. For example, there are no statutory provisions in section 1905(a) of the Act that attach State-level reporting requirements to any section 1905(a) service. Relatedly, States do not have the same data collection and reporting capabilities for these services as they do for HCBS at section 1915(c), (i), (j), and (k).

Additionally, we note that section 1905(a) services do not have the same person-centered planning requirements at § 441.301(c)(1) through (6). Formal person-centered service planning requirements are established for section 1915(j) services in § 441.468, for section 1915(k) services in § 441.540, and for section 1915(i) services at § 441.725. While service planning might be part of some specific 1905(a) services, it is not a required component of all section 1905(a) services.

We acknowledge that many beneficiaries, particularly those receiving mental health services, are served by section 1905(a) services, and encourage States to implement effective person-centered planning processes that are based on individual preferences and personal goals and support full engagement in community for Medicaid beneficiaries receiving section 1905(a) State plan personal care services, home health services, case management services, and rehabilitative services. We thank commenters for their feedback on this request for comment, which we may consider in future rulemaking.

After consideration of public comments, we are finalizing the application of § 441.301(c)(3), as finalized in this rule, to section 1915(j), (k), and (i) State plan services by finalizing relevant requirements at §§ 441.450(c), 441.540(c), and 441.725(c), respectively. We are finalizing §§ 441.450(c), 441.540(c), and 441.725(c), with a technical modification to clarify that service plans must meet the requirements of § 441.301(c)(3), but that references therein to section 1915(c) of the Act are instead references to section 1915(j), 1915(k), and 1915(i) of the Act, respectively. We are finalizing the requirements at §§ 441.540(c) and 441.725(c) with minor modifications. To maintain consistency with modifications finalized in § 441.301(c)(3)(i), we are finalizing §§ 441.540(c) and 441.725(c) with modifications to specify that the requirements apply to every individual and to remove an extraneous comma.

g. Summary of Finalized Requirements

After consideration of the public comments, we are finalizing the proposals at §§ 441.301(c)(1), 441.301(c)(3), 441.450(c), 441.540(c), and 441.725(c) as follows:

- We are finalizing the requirement at § 441.301(c)(1) with a technical modification to clarify that § 441.301(c)(1) applies to paragraphs (c)(1) through (3) of this section.
- We are finalizing § 441.301(c)(3)(i) with modifications to specify that the requirement applies to every individual and to remove the reference to § 441.365(e), as well as finalizing a minor technical change to remove an extraneous comma.
- We are finalizing our proposals at § 441.301(c)(3)(ii) with minor modifications to clarify that the State must ensure that the minimum performance levels specified at § 441.301(c)(3)(ii)(A) and (B) are met. We are also finalizing § 441.301(c)(3)(ii)(B) with minor technical modifications to correct the punctuation (consistent with the change finalized in § 441.301(c)(3)(i)).
- We are finalizing the applicability date requirement at § 441.301(c)(3)(iii), with a technical modification to the language to improve accuracy and alignment with common phrasing in managed care contracting policy. We also are finalizing § 441.301(c)(3)(iii) to specify that States must comply with the performance levels described in paragraph (c)(3)(ii) of this section beginning 3 years after July 9, 2024; and in the case of the State that implements a managed care delivery system under the authority of sections 1915(a), 1915(b), 1932(a), or 1115(a) of the Act and includes HCBS in the MCO's, PIHP's, or PAHP's contract, the first rating period for contracts with the MCO, PIHP, or PAHP beginning on or after the date that is 3 years after July 9, 2024.
- We are finalizing §§ 441.450(c), 441.540(c), and 441.725(c), with a technical modification to clarify that service plans must meet the requirements of § 441.301(c)(3), but that references therein to section 1915(c) of

the Act are instead references to section 1915(j), 1915(k), and 1915(i) of the Act, respectively.

- We are finalizing §§ 441.540(c) and 441.725(c), consistent with modifications finalized in § 441.301(c)(3)(i), with a modification to specify that the requirements apply to every individual, and with technical modification to correct the punctuation.

2. Grievance System (§ 441.301(c)(7); Proposed at § 441.464(d)(2)(v), Being Finalized at § 441.464(d)(5); Proposed at § 441.555(b)(2)(iv), Being Finalized at § 441.555(e); and § 441.745(a)(1)(iii))

a. Scope of Grievance System and Definitions (§ 441.301(c)(7)(i) and § 441.301(c)(7)(ii))

Section 2402(a) of the Affordable Care Act requires the Secretary of HHS to ensure that all States receiving Federal funds for HCBS, including Medicaid HCBS, develop HCBS systems that are responsive to the needs and choices of beneficiaries receiving HCBS, maximize independence and self-direction, provide support and coordination to assist with a community-supported life, and achieve a more consistent and coordinated approach to the administration of policies and procedures across public programs providing HCBS.[56] Among other things, section 2402(a)(3)(B)(ii) of the Affordable Care Act requires development and monitoring of an HCBS complaint system. Further, section 1902(a)(19) of the Act requires States to provide safeguards to assure that eligibility for Medicaid-covered care and services will be determined and provided in a manner that is consistent with simplicity of administration and the best interest of Medicaid beneficiaries.

Federal regulations at 42 CFR part 431, subpart E, require States to provide Medicaid applicants and beneficiaries with an opportunity for a fair hearing before the State Medicaid agency in certain circumstances, including for a denial, termination, suspension, or reduction of Medicaid eligibility, or for a denial, termination, suspension, or reduction in benefits or services. These fair hearing rights apply to all Medicaid applicants and beneficiaries, including those receiving HCBS regardless of the delivery system. Under 42 CFR part 438, subpart F, Medicaid managed care plans must have in place an appeal system that allows a Medicaid managed care enrollee to request an appeal, which is a review by the Medicaid managed care plan of an adverse benefit determination issued by the plan; and a grievance system, which allows a Medicaid managed care enrollee to file an expression of dissatisfaction with the plan about any matter other than an adverse benefit determination. Currently, our regulations do not provide for a venue to raise concerns about issues that HCBS beneficiaries in an FFS delivery system may experience which are not subject to the fair hearing process, such as the failure of a provider to comply with the HCBS settings requirements at § 441.301(c)(4) (which are issues that a managed care enrollee could file a grievance with their plan).

Under our authority at section 1902(a)(19) of the Act and section 2402(a)(3)(B)(ii) of the Affordable Care Act, we proposed to require that States establish grievance procedures for Medicaid beneficiaries receiving services under section 1915(c), (i), (j) and (k) authorities through a FFS delivery system. Specifically, for section 1915(c) HCBS waivers, we proposed at § 441.301(c)(7) that States must establish a procedure under which a beneficiary can file a grievance related to the State's or a provider's compliance with the person-centered planning and service plan requirements at §§ 441.301(c)(1) through (3) and the HCBS settings requirements at §§ 441.301(c)(4) through (6). This proposal was based on feedback obtained during various public engagement activities conducted with interested parties over the past several years about the need for beneficiary grievance processes in section 1915(c) waiver programs related to these requirements. We also proposed to apply this requirement to section 1915(i), (j) and (k) authorities, which are discussed below in section II.B.2.h. of this final rule.

To avoid duplication with the grievance requirements at part 438, subpart F, we proposed not to apply this requirement to establish a grievance procedure to managed care delivery systems. We note, though, that the requirements in this section are similar to requirements for managed care grievance requirements found at part 438, subpart F, with any differences reflecting changes appropriate for FFS delivery systems. The proposed requirements included at § 441.301(c)(7) in the proposed rule (88 FR 27975) were focused specifically on grievance systems and did not establish new fair hearing system requirements, as appeals of adverse eligibility, benefit, or service determinations are addressed by existing fair hearing requirements at 42 CFR part 431, subpart E. We solicited comments on any additional changes we should consider in this section with respect to a grievance system.

As discussed earlier in this section II.B.2. of this final rule, section 2402(a)(3)(B)(ii) of the Affordable Care Act requires development and monitoring of an HCBS complaint system. In addition, section 2402(a)(3)(A) of the Affordable Care Act requires the Secretary of HHS to ensure that all States receiving Federal funds for HCBS, including Medicaid HCBS, develop HCBS systems that achieve a more consistent and coordinated approach to the administration of policies and procedures across public programs providing HCBS. As such, we believe the proposed requirement for States to establish grievance procedures for Medicaid beneficiaries receiving HCBS through a FFS delivery system is necessary to comply with the HCBS complaint system requirements at section 2402(a)(3)(B)(ii) of the Affordable Care Act and to ensure consistency in the administration of HCBS between managed care and FFS delivery systems. Further, in the absence of a grievance system requirement for FFS HCBS programs, States may not have established processes and systems for people receiving HCBS through FFS delivery systems to express dissatisfaction with or voice concerns related to States' compliance with the person-centered planning and service plan requirements at § 441.301(c)(1) through (3) and the HCBS settings requirements at § 441.301(c)(4) through (6), as such concerns are not subject to the existing fair hearing process at 42 CFR part 431 subpart E. As a result, we believe the proposal for a grievance system for FFS HCBS programs is necessary to assure that care and services will be provided in a manner that is in the best interests of the beneficiaries, as required by section 1902(a)(19) of the Act.

We specifically focused our proposed grievance system requirement on States' and providers' compliance with the person-centered service plan requirements at § 441.301(c)(1) through (3) and the HCBS settings requirements at § 441.301(c)(4) through (6) because of the critical role that person-centered planning and service plans play in appropriate care delivery for people receiving HCBS. Additionally, we focused the grievance system requirements on the HCBS settings requirements because of the importance of the HCBS settings requirements to ensuring that HCBS beneficiaries have full access to the benefits of community

[56] Section 2402(a) of the Affordable Care Act—Guidance for Implementing Standards for Person-Centered Planning and Self-Direction in Home and Community-Based Services Programs. Accessed at *https://acl.gov/sites/default/files/news%202016-10/2402-a-Guidance.pdf*.

living and are able to receive services in the most integrated setting appropriate to their needs. Beneficiary advocates and other interested parties indicated to us that these are especially important areas for which to ensure that grievance processes are in place for all Medicaid beneficiaries receiving HCBS. Further, focusing the grievance systems requirements on the person-centered service plan requirements at § 441.301(c)(1) through (3) and the HCBS settings requirements at § 441.301(c)(4) through (6) helps to ensure that the proposed grievance requirements do not duplicate or conflict with existing fair hearing requirements at part 431, subpart E, as HCBS settings requirements and person-centered planning requirements are outside the scope of the fair hearing requirements.

At § 441.301(c)(7)(ii), we proposed to define a grievance as an expression of dissatisfaction or complaint related to the State's or a provider's compliance with the person-centered service plan requirements at § 441.301(c)(1) through (3) and the HCBS settings requirements at § 441.301(c)(4) through (6), regardless of whether the beneficiary requests that remedial action be taken to address the area of dissatisfaction or complaint. Also, at § 441.301(a)(7)(ii), we proposed to define the grievance system as the processes the State implements to handle grievances, as well as the processes to collect and track information about them.

We received public comments on these proposals. The following is a summary of the comments we received and our responses.

Comment: Many commenters expressed support for our proposal to require that States establish a procedure under which a beneficiary can file a grievance related to the State's or a provider's compliance with the person-centered service plan requirements at §§ 441.301(c)(1) through (3) and the HCBS settings requirements at §§ 441.301(c)(4) through (6). In general, commenters believed that clear, transparent, and accessible grievance processes are critical to ensuring that beneficiaries can address violations of their rights, provide feedback on their experiences in HCBS, and more fully participate in HCBS programs. One commenter noted that a Federal requirement will help establish national best practices.

Some commenters connected a strong grievance process with improved safety and service quality in HCBS programs. For instance, one commenter noted that a grievance process can complement other quality mechanisms (such as performance measures) because a grievance system can address problems as they happen, thus preventing harm before it can occur. Another commenter suggested that preventing or remediating poor service delivery has the potential of improving the HCBS workforce by promoting professionalism and improving the public perception of HCBS providers, which could aid providers' worker recruitment and retention efforts; this commenter noted that a strong workforce would promote quality in HCBS.

Other commenters noted that a grievance system would allow beneficiaries to state their rights and provide a fair and unbiased review of beneficiaries' concerns. Several commenters were specifically supportive of the proposal's potential to collect and track standardized information about service system issues, including obstacles to informed choice and person-centered planning.

A few commenters also described frustrations with current State or provider grievance processes that they have found difficult to access, unresponsive, ineffective, or opaque. One commenter described our proposal as ''overdue,'' but also expressed concerns about whether providers will comply with requirements moving forward. In this vein, a few commenters suggested that CMS involvement and oversight may be critical to ensuring that existing or newly created grievance processes are effective. One commenter expressed the hope that beneficiaries would be able to contact CMS if they believe the State is not complying with grievance process obligations.

Response: We thank commenters for their support. We believe the personal experiences with grievance systems that commenters shared underscore the need for national standards. Additionally, while States will have a great deal of responsibility for developing and monitoring their own systems, having Federal requirements for grievance systems will facilitate our ability to engage in oversight. We note that members of the public are able to share concerns with us about their State's Medicaid activities, which would include the grievance system, once implemented.[57] We also note that in addition to the grievance process finalized under this rule, individuals who believe they have been discriminated against in HCBS programs, including the right to be served in the most integrated setting, may file a civil rights complaint with the HHS Office for Civil Rights at *https://www.hhs.gov/civil-rights/filing-a-complaint/index.html.*

Comment: Several commenters expressed opposition to the proposal, suggesting that it was too prescriptive and would result in unnecessary information technology (IT) systems changes in States that already have grievance systems in place. Several commenters also noted concerns that the proposal would place administrative burdens on providers. Additionally, several commenters noted that this requirement could be administratively burdensome for States with a small percentage of their population enrolled in FFS. One commenter suggested that we provide an exceptions process in these circumstances.

Response: We address specific concerns from commenters—including concerns about potential duplication, burden, and provider involvement—in more detail in subsequent responses. As described below, we are seeking to balance State flexibility with the need for accountability and consistency among State systems. We also do not believe that this proposal should place excessive burdens on providers, as we are requiring that States, and not providers, bear the primary responsibility of managing the grievance system. Finally, as part of our goal of establishing national standards, we do not intend to exempt States from these requirements based on the size of their FFS populations.

Comment: One commenter requested clarification on whether the State or CMS is ''in charge'' of the grievance process.

Response: We have proposed and, as discussed further below, we are finalizing Federal requirements that States operate and maintain a grievance system. The State is responsible for this system. However, we will monitor the States' compliance with these requirements.

Comment: A few commenters raised concerns or expressed confusion about how the proposed grievance system requirement will affect dually eligible beneficiaries who are enrolled in managed care plans that already have grievance processes. One commenter raised concerns about the possibility of multiple investigations being conducted parallel to one another. Other commenters inquired if Medicare Advantage care navigators could be required to help beneficiaries file grievances, or if the proposed grievance system requirements can be made part of dual eligible special needs plan (D–

[57] Specific questions or concerns regarding the application or implementation of the regulations finalized in section II.B. of this rule may be directed to *HCBS_Access_Rule@cms.hhs.gov*.

SNP) contracts. One commenter noted that it is critical for dually eligible beneficiaries to have one place to file grievances about both Medicare and Medicaid services. Another commenter requested clarification on how the grievance systems should work for dually eligible beneficiaries who have, as described by the commenter, ''multiple, perhaps conflicting plans of care.''

Response: We plan to provide States with technical assistance to help address issues specific to dually eligible beneficiaries. We note that we proposed that the grievance system requirements at § 441.301(c)(7), and as finalized in this rule, apply only to beneficiaries receiving services under section 1915(c), (i), (j), and (k) authorities through FFS delivery systems, and to issues arising with these services. The new grievance system requirement would not affect, for instance, dually eligible beneficiaries who receive services under section 1915(c), (i), (j), or (k) authorities through fully integrated dual eligible special needs plans (FIDE SNP), highly integrated dual eligible special needs plans (HIDE SNP), or D–SNPs otherwise affiliated with MLTSS plans, as those beneficiaries receive their HCBS through managed care and not through FFS. We also note that some dually eligible beneficiaries may be enrolled in managed care plans known as applicable integrated plans (AIP), which are subject to the integrated grievance requirements at § 422.630. AIPs must resolve and notify enrollees within required timeframes for integrated grievances filed for Medicare and Medicaid services. We will provide technical assistance as needed regarding the application of the requirements finalized at § 441.301(c)(7) to beneficiaries in different categories of dual eligibility.

Comment: One commenter recommended continuity across grievance systems in FFS and managed care delivery systems to ensure consistent and equitable processes for addressing enrollee concerns.

Response: We agree that such continuity is important. In drafting the proposed requirements at § 441.301(c)(7) for FFS grievance systems, which we are finalizing as described in this section II.B.2 of the final rule, we attempted to mirror the requirements for managed care grievance processes in part 438, subpart F, as much as possible in order to promote consistency between the two systems.

Comment: A few commenters requested that we allow States to arrange for the operations of the grievance procedures to be performed by a vendor, local agencies, or other contracted entity. Conversely, a few other commenters raised concerns about the possibility of the grievance process being administered by providers. Some of these commenters expressed concerns that the requirement might be burdensome for local and regional entities to administer, and one commenter raised concerns that administration of the grievance process by local agencies might cause problems in terms of oversight and conflict of interest.

A few commenters also noted that, unlike in managed care where care is managed under one plan, some FFS delivery systems involve multiple State agencies or agency divisions operating different programs. The commenters requested more clarification about which agency or department is responsible for oversight of the system and coordination in these circumstances.

Response: The requirements proposed, and being finalized, in § 441.301(c)(7) are applied to the State, by which we refer (as we do in many of our regulations) to the single State agency as described in § 431.10(b). However, we believe that some States may find it more efficient or effective to have the operations of the grievance system performed by other government agencies or contractors, depending on how a State's systems are organized. Allowing such contracting may also help preserve existing State grievance processes; we address additional comments about preservation of existing grievance systems later in this section II.B.2. of the final rule. However, the single State agency must retain ultimate responsibility for ensuring compliance with the requirements set forth in § 441.301(c)(7). We expect that States are familiar with their local resources (including the capacity of local agencies) and would only have the operations of the grievance system performed by an entity that had the necessary infrastructure and resources to operate a system that would comply with the requirements in § 441.301(c)(7). To ensure that the responsibility of the single State agency is clear, we are finalizing § 441.301(c)(7)(i) with a modification to specify that the State may contract with contractors or other government entities to perform activities described in § 441.301(c)(7) provided however that the State retains responsibility for ensuring performance of and compliance with these provisions.

We also note that we intend that the proposed requirements at § 441.301(c)(7)(iii)(C)(3), which we are finalizing as discussed in detail later in this section II.B.2. of the final rule, promote an unbiased review of grievances because they prohibit someone who has previously made decisions related to the grievance from reviewing the grievance. While we do not intend to specify any additional restrictions on the entities operating the grievance system in this final rule, we believe that it would be difficult to envision scenarios in which it would be appropriate for the State to contract with a provider (or local agencies that act as providers) to operate the grievance system. For example, an employee of a provider who signed off on the provider's actions that gave rise to the grievance would be someone who was involved with making a decision about the grievance and thus neither that employee (nor their subordinates) would be appropriate decisionmakers in the grievance process. If a State believed it necessary to arrange for the operations of the grievance system to be performed by a local agency that also provided services, firewalls would have to be put in place to ensure that grievances were reviewed by a neutral decisionmaker within that agency.

Comment: Several commenters supported the definition of grievance we proposed at § 441.301(c)(7)(ii). Overall, these commenters supported the focus on compliance with the person-centered planning process and the HCBS settings rule. One of these commenters observed that issues with these requirements are often at the core of challenges experienced by beneficiaries. One commenter, however, questioned the inclusion of concerns about the HCBS settings requirements, noting that if a setting violates the HCBS settings requirements, the individual has the choice of moving to a different setting.

Response: We appreciate commenters' support for the definition of grievances. We specifically included noncompliance with the HCBS settings requirements as one of the bases for grievances so that beneficiaries do not have the burden of addressing violations of their rights by having to change providers, which could result in some circumstances in having to move out of their home. We do not believe that beneficiaries should have to choose between their rights or their homes. As a practical matter, switching residences can be disruptive, emotionally and physically demanding, costly, and time-intensive, not to mention particularly difficult in areas that lack plentiful affordable and accessible housing options. We also believe that requiring States to address these issues related to

compliance with HCBS settings requirements in the context of a grievance system may encourage States and providers to prevent similar issues from occurring with other beneficiaries.

Comment: One commenter stated that the definition of grievance was too broad and requested that CMS narrow the scope of allowable grievances. The commenter stated that although the proposed requirements limit the grievance system to person-centered planning, service plan requirements, and HCBS settings requirements, they would still allow a beneficiary to file a grievance on nearly every aspect of their HCBS experience, which would in turn create the potential for an unreasonably high volume of grievances to which States would be required to respond.

A few commenters stated that the definition of grievance was subjective, and asked for general clarification on what is meant by an ''expression of dissatisfaction.'' Conversely, a few commenters stated the definition of grievance was not broad enough. One commenter stated that the reference to §§ 441.301(c)(1) through (3) would only allow for the filing of grievances in relation to the person-centered planning process but would not allow for grievances in relation to beneficiaries' dissatisfaction with the delivery of the services in the plan. The commenter provided examples, such as a care provider handling an HCBS beneficiary roughly, failing to assist the beneficiary with certain activities of daily living or perform other services in the care plan, being slow to respond to the beneficiary's requests for assistance in residential settings, improper administration of chemical restraints, or general poor care that leads to injuries such as bed sores. The commenter recommended that the regulatory language be revised to include the right to file a grievance to protect beneficiary health and welfare.

One commenter suggested that we specify that grievances may include issues regarding timeliness, quality, and effectiveness of services, in addition to the HCBS setting, person-centered planning, and service plan requirements. The commenter noted that, in the commenter's State, beneficiaries have had to wait for long periods of time for the initiation of services after being approved for the services.

Finally, another commenter noted that they believed that the managed care regulations' grievance definition includes an expression of dissatisfaction about any matter other than an adverse benefit determination and recommended adding clarifying language to the definition of a grievance to ensure that beneficiaries do not mistakenly file grievances about issues that are adverse benefit decisions and that entitle them to a fair hearing.

Response: We disagree with commenters that the proposed definition is overly broad. The definition of grievance proposed at § 441.301(c)(7)(ii) was crafted to strike a balance between providing beneficiaries with broad, but not unlimited, bases for filing a grievance. We believe that the requirements in §§ 441.301(c)(1) through (6) provide a clear list of activities that the States and providers must perform to ensure that HCBS beneficiaries receive appropriate person-centered planning, receive the services described in the person-centered service plan to support the individual in the community, and have full access to the benefits of community living and are able to receive services in the most integrated setting appropriate to their needs.[58] We note that some specific examples of when a beneficiary may express dissatisfaction by filing a grievance are discussed further in this section.

We also disagree that the scope of the definition is too narrow. We proposed that the definition of grievance include an expression of dissatisfaction or complaint related to the State's or provider's compliance with the person-centered service planning process, required in §§ 441.301(c)(1) through (3). We note that some issues regarding the timeliness, quality, or effectiveness of services may need to be addressed as part of the person-centered service planning process itself. For instance, if a beneficiary believes the service is not effective, the beneficiary may request revision to the person-centered service plan, as required at § 441.301(c)(3), to identify either a more effective service or a more effective provider; non-responsiveness on the part of the entity responsible for updating the service plan could be a reason to file a grievance.

Additionally, § 441.301(c)(4) requires that home and community-based settings must meet certain requirements enumerated therein, including (but not limited to): being integrated in and supporting full access of individuals to community life; ensuring that an individual has rights to privacy, dignity and respect, and freedom from coercion and restraint; optimizing an individual's initiative, autonomy, and independence in daily activities and the physical environment; and facilitating an individual's choice in services and supports, as well as who provides them. If, for instance, a beneficiary believes that a worker has not treated the beneficiary with respect, or the worker is chronically late, and the provider has failed to address the worker's behavior or provide a different worker at the beneficiary's request, it would be reasonable for a beneficiary to file a grievance, as the provider is not ensuring that all of the qualities of a home and community-based setting (as described by § 441.301(c)(4)) are being met. Accordingly, we believe that the activities set forth in §§ 441.301(c)(1) through (6) (both currently and as are being amended in this final rule) generally describe the actions of both providers and States that are necessary to uphold and promote high-quality service delivery that promotes respect for beneficiaries' rights.

While we believe the scope of grievances that may be considered under the grievance system that we proposed, and are finalizing, appropriately captures activities that promote delivery of quality HCBS and respect for beneficiaries' rights, we do believe further clarity is warranted. We believe it is more appropriate and precise to say grievances may be filed regarding the State's or a provider's performance of (rather than compliance with) the requirements described in §§ 441.301(c)(1) through (6). We note that the activities described in § 441.301(c)(1) through (6) must, as required at § 441.301(c), be included in a State's waiver application; we want to make it clear that grievances may be filed when a State or provider fails to perform these activities (not solely if the State fails to include these items in a waiver application). To clarify this point, we are finalizing the scope of grievances that may be filed under the grievance system we proposed to set forth at § 441.301(c)(7) with modification, by revising the language in § 441.301(c)(7)(i) to specify that beneficiaries may file grievances regarding a State's or provider's performance of (rather than compliance with) the activities described in §§ 441.301(c)(1) through (6). We are finalizing a conforming modification to the definition of grievance at § 441.301(c)(7)(ii).

We observe that most of the examples provided by commenters, as described above, included instances in which a beneficiary experienced abuse or harm during the performance (or lack thereof) of services in the person-centered service plan. These types of complaints

[58] We note that compliance with CMS regulations and reporting requirements does not imply that a State has complied with the integration mandate of Title II of the ADA, as interpreted by the Supreme Court in the Olmstead Decision.

may be more appropriately addressed under the critical incident system being finalized at § 441.302(a)(6). As discussed in II.B.3. of this rule, we believe the critical incident system proposed at § 441.302(a)(6) is the appropriate mechanism for investigating harms to beneficiaries' health and safety. As we discuss in II.B.3 of this rule, we proposed additional performance measures and reporting requirements for the critical incident system (beyond what is proposed for the grievance system) to ensure more formal oversight of the investigations and resolutions of threats to beneficiary health and safety. We do not believe a grievance system is an appropriate mechanism for investigating threats to the beneficiary's health and welfare. Therefore, we decline to broaden the definition of grievances that may be addressed under the grievance system we are finalizing at § 441.301(c)(7) in such a way that would suggest that the grievance system is intended for complaints regarding health and safety. We believe doing so would create duplicative system requirements for the grievance process and critical incident system and potentially cause States to resolve threats to health and safety in the grievance system that should have been investigated and addressed within the critical incident system.

We also disagree with the commenter that suggested we align the definition of grievance we proposed at § 441.301(c)(7)(ii) with the definition of grievance for managed care grievance processes at § 438.400(b). We believe that, for the purposes of a FFS grievance system intended to address specific concerns with HCBS, using the same or similar definition of grievance for managed care grievance processes would be overly broad and will not diminish confusion about whether an issue is appropriate to be filed as a grievance, a critical incident, or a fair hearing. We plan to provide technical assistance to States as needed on this topic.

We refer readers to section II.B.2.b. of this final rule where we also address more specific concerns related to ensuring matters are filed with the correct system in our discussion of § 441.301(c)(7)(iii).

Comment: One commenter suggested that we broaden the definition of grievance to specify that beneficiaries can file grievances when their rights are violated, and suggested that the following be included in the definition of rights:

- Right to work and fair pay;
- Right to control one's own money;
- Right of possessions and ownership;
- Right to privacy, dignity, and respect;
- Freedom of choice and decision-making;
- Right to leisure activities;
- Freedom to marry and have children;
- Right to food, shelter, and clothing;
- Freedom of movement;
- Freedom of religion;
- Freedom of speech and expression;
- Free association and assembly;
- Freedom from harm;
- Access to health care;
- Right to citizenship and right to vote;
- Right to equal education;
- Right to equal access; and
- Due process.

Response: We believe that some of the consumer rights listed by the commenter are addressed in or mirrored by components of the existing HCBS settings rule requirements at § 441.301(c)(4), such as: ensuring that the individuals have access to the greater community, including engagement in community life, opportunities for employment in competitive integrated settings, and control over personal resources (§ 441.301(c)(4)(i)); the right to privacy, dignity and respect, and freedom from coercion and restraint (§ 441.301(c)(4)(ii)); allowing for individuals to choose their activities and set their own schedules (§ 441.301(c)(4)(iv) and (vi)(C)); the ability to determine with whom the individual will interact, as well as to have visitors of the individual's choosing at any time (§ 441.301(c)(4)(iv) and (vi)(D)); and control over the individual's own physical environment, living and sleeping space, and access to food (§ 441.301(c)(4)(iv), (v)(B), and (vi)(C)).

We note that many of the other rights suggested by the commenter are either addressed by other systems (such as access to health care which, if related to an adverse benefit determination made by the State Medicaid agency, may be subject to the fair hearings process or are out of scope of the State Medicaid agency's authority) or by other authorities (such as fair wages, equal access to education, or violations of constitutional rights).

Comment: Several commenters requested that the grievance process include issues such as authorization disputes and the provision of services.

Response: We are not certain if the commenters are referring to using the grievance system to allow beneficiaries or providers to challenge denials of services. We are also uncertain if disputes over ''provision of services'' refers to the quantity or quality of services. We note that the fair hearings process at 42 CFR part 431, subpart E, sets out the parameters that allow beneficiaries to challenge an adverse action by the State Medicaid agency. For the purposes of a fair hearing, an ''action'' is defined at § 431.201 in part, as the termination, suspension of, or reduction in covered benefits or services, or a termination, suspension of, or reduction in Medicaid eligibility. A State must provide an individual the opportunity for a fair hearing in the circumstances described in § 431.220(a), which include when the Medicaid agency has denied eligibility, services, or benefits, and when the claim for medical assistance has not been acted on with reasonable promptness. In most circumstances, a refusal of a State Medicaid agency to authorize a particular service for a beneficiary, or to authorize the quantity of services the beneficiary believes is necessary, would be addressed in the fair hearings process. In contrast, the grievance process we have proposed is intended to allow beneficiaries to raise concerns about specific aspects of their services that have been authorized.

Comment: Several commenters who supported this proposal did so because they agreed that, currently, concerns regarding person-centered planning and HCBS settings requirements are not subject to the existing fair hearings process at 42 CFR part 431 subpart E. One commenter, however, suggested that, rather than create a grievance process to hear complaints about person-centered service plans and the HCBS settings requirements, we should require that concerns about person-centered service plans or the HCBS settings requirements be added to fair hearings processes. The commenter stated the belief that fair hearings permit an unbiased third-party Administrative Law Judge (ALJ) to consider the facts and render an objective decision. By contrast, the commenter believed that, in their State, the current State grievance process did not permit unbiased or effective review.

Response: We agree that it is important to provide beneficiaries with the opportunity to raise concerns about the person-centered service plans and planning process and the HCBS settings requirements. We do not, however, believe that these are necessarily appropriate matters for the fair hearings process. The authority for the fair hearings process comes from section 1902(a)(3) of the Act, which requires that States provide beneficiaries and

applicants an opportunity for a fair hearing before the State agency to any individual whose claim for medical assistance is denied or is not acted upon with reasonable promptness.

While beneficiaries can request a fair hearing to address concerns about service denials (including partial denials) and other concerns described under § 431.220(a), we believe that an individual's concerns about person-centered service plans, the planning process, and HCBS settings are outside the scope of issues for which the statute requires that a fair hearing be provided, and therefore we cannot require States to provide an opportunity for a fair hearing to address such issues. We note, however, that States have discretion to decide whether integrating their grievance processes with other State systems, including their fair hearings systems, is feasible and appropriate, and that the requirements for both systems may still be met.

Separate from the fair hearing requirement at section 1902(a)(3) of the Act, section 2402(a)(3)(B)(ii) of the Affordable Care Act requires the development and monitoring of an HCBS complaint system. To address this statutory requirement, we proposed that the grievance system address matters that do not arise from a denial of Medicaid eligibility or denial of services, or failure to act upon the individual's claim for medical assistance with reasonable promptness, which are addressed separately under the required fair hearing process. We expect the grievance system will help beneficiaries resolve concerns about the quality of the services they are receiving. We also note that the purpose of our proposals in this section II.B.2. is to require that States create, implement, and maintain grievance systems that, while not necessarily as formal as a fair hearings process in all cases, will nevertheless result in unbiased and effective reviews of grievances.

We note that, while States may choose to use ALJs as hearing officers to conduct a Medicaid fair hearing, hearing officers are not required to be ALJs. Medicaid regulations at § 431.240(a)(3) require that all fair hearings be conducted by one or more impartial officials or other individuals who were not directly involved in the initial determination in question. We also note that the proposed requirements at § 441.301(c)(7)(iii)(C)(3), which we are finalizing as discussed in detail later in this section II.B.2. of the final rule, are intended to promote an unbiased review of grievances because they prohibit someone who has previously made decisions related to the grievance from reviewing the grievance.

Comment: A few commenters expressed concerns that, in States that already have grievance systems, the proposed requirements could result in duplication of processes and confusion for beneficiaries about where and how to report grievances. Several of these commenters requested we allow States to use existing grievance systems to meet the Federal requirement. One commenter also suggested that if the State's existing system meets our proposed criteria, the State should be considered in compliance with the requirements. Another commenter suggested that providers or States with existing grievance systems should not have to modify their systems.

Commenters were especially concerned about the impact on States that already had multiple grievance systems for different programs, administered by different operating agencies. These commenters requested that we allow States flexibility to design grievance systems and processes to fit their unique program and systems structures and implement multiple grievance systems or processes tailored to their programs. One commenter raised specific concerns about having to consolidate current grievance systems into a single electronic system.

One commenter, however, requested that we require States to have a single grievance system; the commenter stated that having multiple grievance processes can be confusing and burdensome for beneficiaries.

Response: We acknowledge that many States already have grievance processes in place for HCBS, and it is not our intent for States to abandon these systems or create additional systems. We agree with the suggestion that, if a State already has a grievance process in place that meets the requirements that we are finalizing in this rule, that State will be considered in compliance with these requirements. However, we disagree that States with existing grievance systems should be allowed to maintain the system without modification where their systems do not meet Federal requirements. While we encourage States to economize by maintaining current systems as much as possible, we do expect that States will make any needed adjustments to bring their systems into compliance with the requirements we are finalizing in this rule. We believe that having Federal requirements for grievance systems will promote consistency and accountability across the country.

Additionally, we note that the definition of grievance system that we proposed referred to ''processes,'' suggesting that a grievance system may be made up of one or more processes (88 FR 28080). If a State wishes to maintain multiple grievance processes, and each of these processes comply with the Federal requirements we are finalizing in this rule, the State will be considered in compliance.

We did not propose a requirement for a State to maintain a single electronic system for their grievance system and, as discussed above, believe it would be acceptable to maintain multiple grievance processes. However, we also emphasize that part of the definition of grievance system we proposed, and are finalizing, in § 441.307(c)(7)(ii) is that the system allows States to collect and track information about grievances. If States choose to maintain separate systems, including separate electronic systems, they must develop ways to ensure that they are able to track trends across systems in meaningful ways. We refer readers to section II.B.2.f of this final rule, where we discuss our proposals related to recordkeeping requirements for the required grievance system.

Although not required, we encourage States to implement a single integrated system across their HCBS programs, as we echo one commenter's concerns that a single integrated system would likely reduce confusion for beneficiaries and facilitate their ability to access the system. We also believe that a single system would best permit States to track trends across their HCBS programs and use the data and information generated by the grievance system to address systemic issues in their HCBS programs. Additionally, a single integrated system may be more cost-effective for States to operate once implemented.

Comment: One commenter requested clarification on whether there is a difference between a complaint and a grievance, as well as what would elevate a complaint to the level of a grievance.

One commenter asked for clarification on the role of conflict-free case managers in the grievance system.

Response: While section 2402(a)(3)(B)(ii) requires that we promulgate regulations to ensure that all States develop service systems that include development and monitoring of a complaint system, the Affordable Care Act does not define the terms complaint or complaint system. In developing our proposal to implement this requirement from the Affordable Care Act, we have chosen to use the term grievance, instead of complaint, and proposed to define grievance and grievance system at § 441.301(c)(7)(ii). If a State has implemented a system it calls a

complaint system that meets the requirements we proposed, and are finalizing, at § 441.301(c)(7), it is possible that this system could satisfy the requirement for a State to have a grievance system.

We do not understand the specific nature of the comment regarding conflict-free case managers. We note, in general, that we will provide technical assistance to States to assist in adapting their HCBS programs and any associated existing grievance processes to comply with the requirements finalized at § 441.301(c)(7).

Comment: Several commenters observed that some States currently require providers to have policies and procedures in place related to service-delivery complaints. One commenter requested that we provide clarification, either in the final rule or subregulatory guidance, regarding the inclusion of the proposed grievance system requirements in existing provider-level complaint and grievance processes. Commenters stated that additional guidance is needed to help all interested parties understand when beneficiaries should file a grievance with their provider and when they should file with the State. One commenter recommended that beneficiaries be required to exhaust these processes at the provider level before a complaint is submitted to the State agency for investigation or intervention.

Response: Our goal for proposing uniform requirements for grievance systems applicable to all States providing HCBS under section 1915(c) waiver program authority, and other HCBS authorities as discussed in section II.B.2.h of this final rule, is to ensure consistent processes are available for Medicaid beneficiaries receiving such services. We decline to require in this final rule that beneficiaries exhaust their provider-level complaint process prior to accessing the State grievance system. We believe that such a Federal requirement would be inapplicable or confusing in States that do not have provider-level complaint process requirements, do not require all providers to have them, or do not require that providers have uniform complaint processes. We have attempted to provide States with as much flexibility as possible in the design of their grievance system. Additionally, we have concerns that such an exhaustion requirement would be a barrier, or would cause unnecessary delay, for beneficiaries where the relationship between the beneficiary and the provider is contentious, or where the provider does not have an effective or efficient complaint process.

Comment: Commenters requested that grievance processes be developed with input from providers, beneficiaries, families, and advocacy groups to create a grievance system that is accessible, practical, and sets realistic expectations for its users.

Response: We have attempted to provide States with as much flexibility as possible in the design of their grievance system and decline to add a specific requirement on this point in this final rule. We encourage States to include input from interested parties when developing their grievance system policies and procedures to comply with the requirements we are finalizing in this rule.

Comment: Several commenters suggested that the grievance system be integrated with the critical incident system. One commenter stated that States should be required to enter the grievance information and data into a State database with standardized fields that is either part of, or integrated with an incident management system, so that grievance data can be compared to data on relevant individuals, providers, and incidents (both reported and unreported). Similarly, a few commenters suggested that the grievance system should be integrated with the fair hearings system in States.

Response: While we agree that States may find it useful to have a single, integrated system for grievances, critical incidents, and fair hearings, we are not requiring in this final rule that States do so. We believe it is important for States to have flexibility in how they design their grievance systems so that they may expand on infrastructures and processes they already have in place and tailor the grievance systems to meet their programmatic and operational needs, even as they are held to standardized Federal grievance system requirements.

After consideration of the comments received, we are finalizing the language at § 441.301(c)(7)(i) and (ii) with modifications. For the reasons discussed above, we are modifying § 441.301(c)(7)(i) to include language specifying the State may have activities described in paragraph (c)(7) of this section performed by contractors or other government entities, provided, however, that the State retains responsibility for ensuring performance of and compliance with these provisions. Additionally, we are finalizing § 441.301(c)(7)(i) and the definition of grievance in § 441.301(c)(7)(ii) with the modification that States must establish a procedure under which a beneficiary can file a grievance related to the State's or a provider's *performance of* (rather than compliance with) the person-centered planning and service plan requirements at §§ 441.301(c)(1) through (3) and the HCBS settings requirements at §§ 441.301(c)(4) through (6). We are otherwise finalizing the definition of grievance system at § 441.301(c)(7)(ii) as proposed.

b. Grievance Process Requirements (§ 441.301(c)(7)(iii))

At § 441.301(c)(7)(iii)(A) through (C), we proposed new general requirements for States' grievance procedures for section 1915(c) HCBS waiver programs and other HCBS authorities as discussed in section II.B.2.h of this final rule. Specifically, at § 441.301(c)(7)(iii)(A), we proposed to require that a beneficiary or authorized representative be permitted to file a grievance under the section 1915(c) HCBS waiver program. As discussed below in section II.B.2.h. of this final rule, we also proposed to apply these same requirements to section 1915(i), (j) and (k) HCBS programs. Under the proposal, another individual or entity may file a grievance on a beneficiary's behalf, so long as the beneficiary or authorized representative provides written consent. We noted that our proposal would not permit a provider to file a grievance that would violate conflict of interest guidelines, which States are required to have in place under § 441.540(a)(5). At § 441.301(c)(7)(iii)(A), we also proposed to specify that all references to beneficiary in the regulatory text of this section includes the beneficiary's representative, if applicable.

At § 441.301(c)(7)(iii)(B)(1) through (7), we proposed to require States to:

- Have written policies and procedures for their grievance processes that at a minimum meet the requirements of this proposed section and serve as the basis for the State's grievance process;
- Provide beneficiaries with reasonable assistance in completing the forms and procedural steps related to grievances and to ensure that the grievance system is consistent with the availability and accessibility requirements at § 435.905(b);
- Ensure that punitive action is not threatened or taken against an individual filing a grievance;
- Accept grievances, requests for expedited resolution of grievances, and requests for extensions of timeframes from beneficiaries;
- Provide beneficiaries with notices and other information related to the grievance system, including information on their rights under the grievance

system and on how to file grievance, and ensure that such information is accessible for individuals with disabilities and individuals who are limited English proficient in accordance with § 435.905(b);

- Review grievance resolutions with which beneficiaries are dissatisfied; and
- Provide information on the grievance system to providers and subcontractors approved to deliver services under section 1915(c) of the Act.

At § 441.301(c)(7)(iii)(C)(1) through (6),[59] we proposed to require that the processes for handling grievances must:

- Allow beneficiaries to file a grievance either orally or in writing;
- Acknowledge receipt of each grievance;
- Ensure that decisions on grievances are not made by anyone previously involved in review or decision-making related to the problem or issue for which the beneficiary has filed a grievance or a subordinate of such an individual, are made by individuals with appropriate expertise, and are made by individuals who consider all of the information submitted by the beneficiary related to the grievance;
- Provide beneficiaries with a reasonable opportunity, face-to-face (including through the use of audio or video technology) and in writing, to present evidence and testimony and make legal and factual arguments related to their grievance;
- Provide beneficiaries, free of charge and in advance of resolution timeframes, with their own case files and any new or additional evidence used or generated by the State related to the grievance; and
- Provide beneficiaries, free of charge, with language services, including written translation and interpreter services in accordance with § 435.905(b), to support their participation in grievance processes and their use of the grievance system.

We received public comments on these proposals. The following is a summary of the comments we received and our responses.

Comment: Several commenters supported the proposal at § 441.301(c)(7)(iii)(A) to require that a beneficiary or the beneficiary's authorized representative be permitted to file a grievance, including allowing another individual or entity to file a grievance on a beneficiary's behalf, with written consent from the beneficiary or the beneficiary's authorized representative.

However, several commenters raised concerns about the proposed requirement that beneficiaries or their authorized representatives must provide written consent to another individual or entity to file a grievance on the beneficiary's behalf. A few commenters noted that some beneficiaries may not be able to give written consent, or that waiting for written consent to be obtained could create unnecessary delays in grievance filings and investigations. One commenter suggested that we either remove the word ''written'' or specify that consent may be verbal or written. Another commenter, using their State as an example, suggested that a grievance could be filed with verbal consent from the beneficiary or authorized representative, with written consent obtained later. One commenter suggested an agency could obtain a beneficiary or authorized representative's consent over the phone to allow another individual or entity to file a grievance on the beneficiary's behalf.

Response: As discussed further herein, we are finalizing the requirement that consent must be written as proposed. We modelled the proposed requirement and language at § 441.301(c)(7)(iii)(A) on requirements for the managed care grievance process at § 438.402(c)(1)(ii), which provides that, if State law permits and with the written consent of the enrollee, a provider or an authorized representative may request an appeal or file a grievance, or request a State fair hearing, on behalf of a managed care enrollee. Our general intent is to align the FFS grievance system and managed care grievance process to the greatest extent possible. We also believe it is important to ensure that there is some documentation demonstrating that beneficiaries or their authorized representatives have provided consent for a grievance to be filed on the beneficiary's behalf, especially as the investigation of a grievance may involve reviewing records pertaining to the beneficiary's care.

We note that written consent may be broadly interpreted to include electronic signatures, voice signatures, or other methods that provide reasonable accommodations to individuals who might face challenges providing traditional written signatures. States will have flexibility in determining how written consent is obtained and verified, so long as the system States develop ensures that the process presents as few administrative barriers as possible for a beneficiary or authorized representative to provide the necessary consent.

Comment: Several commenters recommended that we clarify that beneficiaries be able to choose who represents them throughout the grievance process. One commenter recommended that the grievance process should provide the beneficiary with the opportunity to indicate who they want to assist them in the process, and this should serve as a type of release.

Response: It was our intent that beneficiaries and their authorized representatives be able to involve other individuals or entities of their choosing to assist them throughout the grievance process, in addition to filing a grievance. We believe that it is logical to assume that if a beneficiary or their authorized representative needs assistance filing a grievance, they may also need assistance with other parts of the process (such as requesting and reviewing their case file, or presenting information to support their concerns at a hearing). We also note that while States are required at § 441.301(c)(7)(iii)(B)(*2*) to provide beneficiaries with reasonable assistance in completing forms and taking other procedural steps related to a grievance, beneficiaries may prefer to get this assistance from an individual or entity of their own choosing, particularly in situations where the beneficiary has filed a grievance against the State. To clarify this intent, we are finalizing § 441.301(c)(7)(iii)(A)(*1*) with a modification to specify that another individual or entity may file a grievance on behalf of the beneficiary, or provide the beneficiary with assistance or representation throughout the grievance process, with the written consent of the beneficiary or authorized representative. We note that we expect that, as part of ensuring the process is person-centered, beneficiaries or their authorized representatives will be able to withdraw consent for this third-party representation at any time, and that beneficiaries can generally terminate the grievance process at any time.

We are finalizing § 441.301(c)(7)(iii)(B)*(1)* with a modification to correct an erroneous reference to subchapter in the regulatory language and replace subchapter with paragraph (c)(7).

Comment: Several commenters requested clarifications or made suggestions regarding our proposal at § 441.301(c)(7)(iii)(B)(2) to require that States provide beneficiaries reasonable assistance in completing forms and taking other procedural steps related to a grievance. One commenter

[59] At 88 FR 27976, we incorrectly stated that we were proposing these requirements at § 441.301(c)(7)(iii)(C)(*1*) through (*5*), rather than (*1*) through (*6*). This typo has been corrected.

recommended that we set minimum criteria for reasonable assistance in filing a grievance, including but not limited to the State making someone available to meet with the beneficiary in person. Another commenter observed that many individuals who receive section 1915(c) waiver services, for example, have significant intellectual and developmental disabilities and as a result may need substantially more assistance than other beneficiaries to complete forms and procedural steps. The commenter requested clarification as to whether, in these circumstances, the reasonable threshold is determined by the needs of the beneficiary or the burden is on the State to determine how to provide reasonable assistance.

Response: We disagree that the term reasonable assistance that we proposed at § 441.301(c)(7)(iii)(B)(*2*) is unclear. We intentionally proposed language that would require States to determine, on a case-by-case basis, what constitutes reasonable assistance for beneficiaries utilizing the grievance system. Reasonable assistance may vary among beneficiaries and thus we intended to provide States with flexibility in determining what assistance is reasonable to provide. We decline to include additional formal definitions or criteria for the term reasonable assistance in this final rule lest we inadvertently set rigid standards that would, counterproductively, inhibit States from modifying processes for beneficiaries. For instance, if we were to require that States make someone available to meet with the beneficiary in person, we would not want this misinterpreted as a requirement that grievances may only be filed in person, which could pose significant barriers to individuals who lack transportation or live far from the physical locations in which grievances could be filed, even though we recognize that some beneficiaries may prefer to file a grievance in person.

We agree with the commenter that some beneficiaries may need more assistance, or different types of assistance, than other beneficiaries. We decline, however, to weigh in on what would be the threshold for determining reasonableness, as this appears to be a request for an opinion on hypothetical situations. We note that the concept of reasonableness is central to many areas of law and bodies of guidance regarding reasonableness are well-developed. We also note that the grievance system in general, by virtue of being administered by State Medicaid programs, will be subject to Title II of the Americans with Disabilities Act (ADA) of 1990, and section 504 of the Rehabilitation Act of 1973 (section 504), which may provide some specific guidance for what may be considered a reasonable modification in a government service.

Comment: A number of commenters advocated for the creation of a requirement for an HCBS Ombudsman program, similar to those required by the Older Americans Act. Many commenters noted an independent ombuds program could provide more effective assistance to individuals in filing grievances, helping them navigate the process, and representing them during the proceedings, rather than relying on assistance provided by the State.

Response: We thank commenters for their interest in this issue. As commenters noted, Title VII of the Older American Act authorizes and provides Federal funding for the national Long-Term Care Ombudsman Program, which is administered at the State level. These programs provide advocacy on behalf of residents of long-term care facilities. While there is no similar Federal statutory requirement for States to create an HCBS ombuds program, States may create such a program or similar programs at their own discretion to assist during grievance processes or to provide other advocacy supports.

Comment: Several commenters expressed concerns that it will be challenging for beneficiaries to understand when and how to file grievances. Several commenters noted the possibility that beneficiaries will be confused by the grievance and fair hearings processes and will file grievances or appeals with the wrong entities. One commenter suggested that beneficiaries enrolled in managed care for some medical services but receive FFS HCBS may be confused when presented with multiple grievance processes.

A number of commenters recommended that the grievance system should be set up with a ''no wrong door'' process so that, for example, a managed care plan receiving a grievance related to a FFS service would be responsible for forwarding the grievance to the appropriate entity. Similarly, another commenter suggested that if an enrollee mistakenly files a grievance about an adverse benefit determination, we require that this submission be treated as a fair hearing request unless the beneficiary objects. One commenter cautioned that, based on the commenter's experience, creating a ''no wrong door'' approach to grievances can be complicated and resource intensive. Another commenter requested that, if setting up a ''no wrong door'' approach, we ensure that the burden does not fall entirely on local entities, such as local Area Agencies on Aging.

One commenter requested clarification on whether appropriate referral of a grievance to the critical incident management process will count as a successful resolution of the grievance.

Response: We take very seriously the concerns raised by commenters regarding potential confusion among beneficiaries about which matters should be filed with which system. Our understanding of the commenters' suggestions is that such system should be coordinated for accepting grievances, fair hearing requests, and reports of critical incidents, among other engagements with beneficiaries, and ensure that each grievance, fair hearing request, or report of a critical incident is appropriately and seamlessly processed once it has been received by that system. However, we are not adding a formal ''no wrong door'' requirement in this final rule. Rather, we are finalizing the grievance system requirements we proposed with modifications as described below. We understand that, despite efforts to provide beneficiaries and interested parties with information and to make systems as user-friendly as possible, there will be instances in which beneficiaries attempt to access the ''wrong'' system. Additionally, there may be some matters where it is not immediately clear to the beneficiary if the problem, for instance, is a matter for the grievance system, critical incident investigation, or the fair hearings process. We also note that the beneficiary (or someone on their behalf) may report a critical incident (as defined at § 441.302(a)(6) of this final rule), or file an appeal under the fair hearings process that may not, as a whole, meet the definition of a grievance, but may contain elements that are more appropriate for consideration under the grievance system, while the remaining elements should still proceed as a critical incident investigation or in the fair hearing process. (We note that additional concerns about perceived overlap between grievances and critical incidents are addressed more fully later in this section.) Further, we agree that something akin to a ''no wrong door'' approach may be a good solution, to ensure that matters that are brought to the grievance system are not rejected because they are really a matter for a fair hearing or critical incident investigation. We encourage States to create a ''no wrong door'' policy and system or integrate grievance filings with existing ''no wrong door'' systems,

if feasible. We believe that such a system would help ensure that matters are filed correctly, which could reduce administrative burden on the grievance system.

However, we did not propose, nor are we requiring, that States create a ''no wrong door'' system. We note that some States may already have ''no wrong door'' systems that could be used to support beneficiary filings in the grievance system. While we encourage States that do not have such ''no wrong door'' systems to consider developing them, we recognize that there is variety among State systems and we do not wish to create a potentially rigid requirement that misaligns with States' existing infrastructures. We also want to ensure that the grievance process requirements finalized in this section focus on standardizing the grievance process itself, and are concerned that an attempt to further standardize ancillary processes would distract from this intention. We will take commenters' suggestions regarding ''no wrong door'' systems under consideration for potential future policy development or rulemaking.

While we are not requiring States develop a ''no wrong door'' system, we do take seriously commenters' concerns that beneficiaries may attempt to file grievances with other systems operated by the State. We proposed a requirement at § 441.301(c)(7)(iii)(B)(*2*) that States must provide reasonable assistance to beneficiaries both with filing grievances and completing other procedural steps; we believe it is logical to expect that if a beneficiary needs reasonable assistance from the State for the procedural steps, then they may need assistance with determining where to file their grievance in the first place. To better address the concern about potential beneficiary confusion about the grievance, incident management, fair hearings, and managed care grievance and appeal systems, we are modifying the language in § 441.301(c)(7)(iii)(B)(*2*) to indicate more clearly that States must provide reasonable assistance to ensure that grievances are appropriately filed with the grievance system (in other words, that States help beneficiaries identify whether their concern should be filed in the grievance system and, to the greatest extent possible, redirect grievances filed with other State systems to the grievance system).

Additionally, we note that the disposition of matters that are not grievances is outside the scope of the grievance process requirements at § 441.301(c)(7) finalized in this section regarding the grievance system; however, we strongly encourage States to ensure that grievances filed with the grievance system that contain matters that are appropriate for other systems, including the critical incident system (as finalized in section II.B.3. of this rule), the fair hearings system (as described in part 431, subpart E), or the managed care grievance or appeal system (as described in part 438, subpart F) are also considered filings with the appropriate system or systems in accordance with the requirements and timeframes for those systems.

We also remind States that States have the option under current regulations to assist beneficiaries with filing fair hearing requests (as described in part 431, subpart E). Section 431.221(c) provides that State Medicaid agencies may assist applicants or beneficiaries in submitting fair hearings requests and section 2901.3 of the State Medicaid Manual instructs States to make every effort to assist applicants and beneficiaries to exercise their appeal rights. Additionally, section 2902.1 of the State Medicaid Manual states that oral inquiries about the opportunity to appeal should be treated as an appeal for purposes of establishing the earliest possible date for an appeal. Thus, if a beneficiary submits a matter to the grievance system which the State recognizes as a matter more appropriate for a fair hearing, the State should treat this matter in accordance with the requirements of § 431.221(c) and the State Medicaid Manual by assisting the beneficiary with filing a fair hearing request and using the grievance submission date to establish the earliest possible submission date for the fair hearing requests. States also have the option to establish procedures that treat the request made to the grievance system as a submission of a fair hearing request described at § 431.221(a) when the matter raised in the grievance filing is more appropriate for a fair hearing.

Finally, we clarify that matters that are mistakenly filed with the grievance system but are appropriately referred to another system may be considered ''resolved grievances'' unless the State determines that the matter also contains separate grounds for a grievance review. We note that should a matter be resolved through referral to another system, this matter would still be subject to the requirements at § 441.301(c)(7)(v) and (vi) (notifying the beneficiary of the resolution of a grievance) and § 441.301(c)(7)(iii)(B)(*6*) (review of grievance resolutions with which the beneficiary is dissatisfied), which are being finalized in this section II.B.2. of the final rule.

Comment: A few commenters provided support for our proposal at § 441.301(c)(7)(iii)(B)(2) that the reasonable assistance provided by the State includes, but is not limited to, ensuring the grievance system is accessible to individuals with disabilities and individuals with Limited English Proficiency. These commenters noted the importance of providing accessible information to beneficiaries, to ensure beneficiaries have full participation in the process.

Some commenters suggested modifications or additions to the accessibility requirements, including:

- Replacing the term, interpreter services, with the term, linguistic accommodations, noting this would better capture the need for trans creative supports that addresses differences in cultural norms and understandings;
- Requiring plain language explanations of the grievance procedures; and
- Adding mention of the regulations implementing section 1557 of the Affordable Care Act, particularly to reflect §§ 92.201–92.205 of the 2022 Nondiscrimination in Health Programs and Activities proposed rule (87 FR 47824).

Response: As discussed further herein, we are not making modifications to § 441.301(c)(7)(iii)(B)(2) in response to these comments. While it may be a term of art used in some fields, there is no Federal guidance or definition of the term, linguistic accommodations. We retain the term, interpreter services, as defined at § 441.301(c)(7)(iii)(B)(*2*), in this final rule to remain consistent with other Federal requirements. We thank the commenter for bringing the term linguistic accommodations to our attention, and we will take it into consideration for future technical assistance related to this provision.

We note that the proposed requirement at § 441.301(c)(7)(iii)(B)(2) already included a mention of existing accessibility requirements at § 435.905(b). Section 435.905(b) includes a requirement that communications be provided in plain language. We believe it would be duplicative to add a specific requirement that information be provided in plain language.

We also decline to add specific reference to section 1557 of the Affordable Care Act or its implementing regulations, as we find such an addition to be unnecessary. State Medicaid agencies must comply with all relevant requirements in section 1557 in all aspects of their programs, including the grievance process.

Upon review, we are finalizing § 441.307(c)(7)(iii)(B)(*2*) with some modifications to better align the provision with other regulations. We are finalizing a modification to revise the term ''individuals who are limited English proficient'' to ''individuals with Limited English Proficiency.'' This modification conforms with the language being finalized in § 431.12(f)(7) (discussed in section II.A. of this final rule). We are finalizing a modification to clarify that auxiliary aids and services are to be available where necessary to ensure effective communication (instead of upon request as originally proposed), which we believe better conforms to access standards such as those set forth in the ADA and section 504.

Comment: One commenter noted that the repeated references to the regulation at § 435.905(b) (in the proposed requirements at § 441.301(c)(7)(iii)(B)(*2*), (c)(7)(iii)(C)(*6*), and (c)(7)(vi)(A)) may suggest that these accessibility services are not necessary outside of the specific provisions for which they are listed. The commenter suggested we create a separate provision related to language and disability access under the general requirements for the grievance system and specify that it applies to all components of the grievance system.

Response: We disagree that a separate, standalone accessibility requirement would add clarity to States' accessibility requirements. We also do not believe that we have overlooked a part of the process that must be accessible and note that the entire grievance system is subject to other accessibility requirements, including the ADA and section 504, by virtue of being administered by government agencies. As discussed further herein, we are finalizing the references to § 435.905(b) included in the provisions in § 441.301(c)(7) as proposed, as we believe that it is helpful to reiterate the importance of compliance with § 435.905(b) in the various steps of the grievance process.

Comment: One commenter recommended that we mandate that States accept electronic grievances with fill-in forms that could be completed by someone using a smart phone. Another commenter also requested that we require that the grievance system be web-based. One commenter, however, expressed concerns about a grievance system that is only accessible electronically, noting that some people may not have access to or be able to use computers.

Another commenter suggested that we specify that States must maintain a toll-free number, a regularly monitored email address for receiving grievances from Medicaid HCBS beneficiaries, and multiple modes of submitting a grievance, including a request for assistance with articulating and submitting a grievance as a reasonable accommodation.

Response: We appreciate commenters' many thoughtful suggestions on how to ensure that the grievance process system is accessible and user-friendly. At this time, we are not making changes in this final rule at § 441.301(c)(7) to include specific regulatory requirements for exactly how States should implement an electronic system for filing grievances. We believe that the diversity of comments on this issue demonstrates that beneficiaries will likely need the ability to access the grievance filing process through multiple modalities. We encourage States to consider user access (in addition to legally required accessibility considerations) and engage the interested parties within the HCBS community regarding the construction of a user-friendly grievance filing process that accommodates beneficiaries' different communication and technology needs.

Comment: A few commenters expressed support for our proposal to prohibit punitive actions against individuals who file grievances. One commenter noted that, in their State, beneficiaries are reluctant to complain about care due to fear of retaliation. Another commenter requested that CMS clarify that the requirement applies to punitive actions taken by either the State or a provider. The commenter also requested that CMS clarify that States must investigate punitive actions from providers. One commenter requested that CMS clarify that punitive action includes implying that an individual or family might lose services if they access the grievance process. Another commenter stated that the State should provide operational definitions of punitive actions and provide easily understood guidance to providers and State entities as to what types of actions would be considered punitive.

Several commenters offered specific suggestions for revising the proposed requirement at § 441.301(c)(7)(iii)(B)(*3*). One commenter suggested we revise the language to read ''retaliatory action'' or ''retaliatory or punitive action.'' Another commenter suggested that we amend the proposed regulatory text to define such action as ''any negative action following a grievance, complaint, and appeal or reporting of any issue to any regulatory body.''

Response: We clarify that this requirement is intended to prohibit punitive actions from either the State or providers. We do expect that, as part of ensuring that beneficiaries (as well as authorized representatives or other individuals who have filed a grievance on the beneficiary's behalf) are protected from punitive action, States will have a system for both identifying and investigating allegations of punitive action. We agree with the commenter that verbal threats from a provider directed at the beneficiary, or the beneficiary's family, would be the type of punitive action contemplated by this provision that would merit investigation. We also agree that providing additional definitions and examples of punitive actions will be an important part of States' grievance system policies.

To better clarify who is protected from punitive actions (both beneficiaries and those filing grievances on their behalf), we are finalizing a modification to § 441.301(c)(7)(iii)(B)(*3*) to clarify that prohibited actions are neither threatened nor taken against an individual filing a grievance *or who has had a grievance filed on their behalf.* As discussed in this section (section II.B.2.b.), we are finalizing our proposal at § 441.301(c)(7)(iii)(A)(*1*) to allow beneficiaries to have another individual or entity file a grievance on their behalf with written consent. We intend to make it clear that punitive action may not be taken against a beneficiary, whether the beneficiary personally filed the grievance or received assistance filing the grievance. We also want to ensure that authorized representatives or other individuals (including family members or other beneficiaries) are protected from punitive action when helping beneficiaries file grievances.

We agree that amending the regulatory language to ''punitive or retaliatory actions'' would further clarify the intent of the requirement, as ''retaliation'' is a common term associated with prohibited behavior in other types of complaints systems. While there is overlap in the connotations of ''punitive'' and ''retaliatory'' actions, we also believe that some actions that could be taken against individuals in response to the filing of a grievance could be perceived as ''retaliatory'' rather than ''punitive.'' We believe that the word ''retaliatory'' may particularly capture threats or actions that could negatively affect a beneficiary's access to services, whether or not the threat or negative outcome actually materializes. For instance, if a provider noted negative things to other providers about a beneficiary or the beneficiary's authorized representative and discouraged other providers from accepting that beneficiary as client after a grievance was filed against the

provider, this action could be perceived as ''retaliatory'' rather than ''punitive,'' particularly if this did not ultimately result in a reduction or alteration of the beneficiary's services. Therefore, we are finalizing § 441.301(c)(7)(iii)(B)(*3*) with modification in this final rule to specify that States must ensure that punitive or retaliatory action is neither threatened nor taken against an individual filing a grievance or who has had a grievance filed on their behalf.

We decline to make the other modifications that commenters suggested. We believe the requirement we proposed at § 441.301(c)(7)(iii)(B)(*3*), as modified herein, is sufficiently broad and clear to address the essential concerns raised by commenters. We believe including language prohibiting ''any negative action'' may be ambiguous and overly broad. Additionally, we do not believe the grievance system regulations should be used to prohibit punitive or retaliatory actions in response to actions performed outside of the grievance process. However, we note that, if a beneficiary believes they are experiencing poor treatment from a provider because the beneficiary has filed a complaint about the provider in a system other than the grievance system, the beneficiary may have grounds to file a grievance on the basis of the poor treatment.

Comment: Several commenters recommended the addition of more specific provisions to protect against punitive or retaliatory action, including a post-grievance follow-up with the beneficiary and assessing fines or other penalties against a provider who has taken retaliatory action. One commenter also requested that CMS require States to make the results of investigations into allegations of punitive behavior available to the public.

Response: We decline to make modifications to § 441.301(c)(7)(iii)(B)(*3*) based on these commenters' suggestions because we believe that the proposed regulation text at § 441.301(c)(7)(iii)(B)(*3*), which we are finalizing with modification as discussed herein, is sufficient. To comply with the requirement that States ensure that punitive or retaliatory actions are neither threatened nor taken against individuals who have filed a grievance or have had a grievance filed on their behalf, we expect that States will develop a system for identifying, investigating, and deterring punitive or retaliatory actions. We believe creating more regulatory requirements as commenters suggested would not provide States with flexibility in how they comply with this requirement. Instead, States may develop processes in accordance with their grievance system's structure and other relevant considerations, such as provider agreements and State laws.

Comment: We received a few comments on the requirement we proposed at § 441.301(c)(7)(iii)(B)(*4*) that States must accept grievances, requests for expedited resolution of grievances, and requests for extensions of timeframes from beneficiaries. One commenter recommended that § 441.301(c)(7)(iii)(B)(*4*) be revised to specify that no ''magic language'' is needed to initiate the grievance process. The commenter noted that a ''demonstrated intent'' to obtain assistance with an HCBS-related problem should be accepted as a grievance.

Response: We are concerned that the language proposed by the commenter is overly broad. We agree that States should make filing a grievance as simple and accessible as possible for beneficiaries, their authorized representatives, and other individuals or entities filing on a beneficiary's behalf. For example, we believe that it would be inappropriate for a State to create a complex grievance filing form and then refuse to review a grievance because the form was not filled out completely or properly. We note that this scenario would also be a plausible illustration of a State's failure to provide reasonable assistance and accessibility as required at § 441.301(c)(7)(iii)(B)(*2*). We also believe it is critical that States make every effort to ensure that beneficiaries and their advocates know that a grievance system exists and how to access it. We do not, however, expect that every expression of dissatisfaction, in any context, must be treated as a presumptive grievance filing. We believe it is acceptable for States to develop a grievance filing process that requires a clear intent to file a grievance. Further, we do not want to encourage situations in which grievances are pursued on the beneficiary's behalf without the beneficiaries' knowledge or consent.

Comment: We received a number of comments regarding the requirement we proposed at § 441.301(c)(7)(iii)(B)(5) that States provide beneficiaries with notices and other information related to the grievance system, including information on their rights under the grievance system and on how to file grievances. One commenter expressed particular support for this requirement. Other commenters provided several suggestions for additional requirements to ensure that beneficiaries receive information regarding the grievance process, including:

- Requiring that States add an explanation of grievance rights in any HCBS-related communication from the State to the beneficiary;
- Requiring that providers include an explanation of grievance rights in the person-centered service planning process;
- Requiring that information on grievance procedures be posted in each group home or other provider owned or controlled residential setting, along with a toll-free number and email address for filing grievances; and
- Including common examples of grievances in the information given to beneficiaries, so that beneficiaries are better able to understand the potential utility of the process.

A few commenters noted that, regardless of where or how the information was shared, the information should be in accessible plain language and large print formats.

Response: We do not intend to add additional requirements in this final rule regarding how States must inform beneficiaries about the grievance system, as we believe it is important for States to retain flexibility in how they communicate with beneficiaries. We believe the ideas shared by commenters are great examples of what could be done. We note that there is a lot of diversity among beneficiaries receiving HCBS, States' existing communication pathways, and HCBS program design—all factors that will affect the methods of informing beneficiaries about the grievance process. Therefore, we believe it may be necessary for the information about the grievance system to be presented in multiple ways and through multiple modalities. We encourage States to engage with interested parties to determine the most effective ways to inform beneficiaries. We will also work with States to identify effective ways to inform beneficiaries about the State's grievance system.

We also highlight that our proposed text at § 441.301(c)(7)(iii)(B)(*5*) requires that information provided to beneficiaries must comply with § 435.905(b), which does require that materials use plain language. In addition, States generally must comply with the ADA and section 504, and their implementing regulations. We are finalizing § 441.301(c)(7)(iii)(B)(*5*) largely as proposed, although with a modification to change mention of individuals who are limited English proficient to individuals with Limited English Proficiency, consistent with the change to § 441.301(c)(7)(iii)(B)(*2*) discussed previously in this section.

Comment: One commenter requested clarification whether States have an

ongoing obligation to provide this notice and information to beneficiaries, including to people who begin HCBS after the effective date of the grievance system requirements that we proposed at § 441.301(c)(7).

Response: We agree and clarify that States will have an ongoing responsibility to ensure that both new and current beneficiaries receive information about the grievance system to comply with § 441.301(c)(7)(iii)(B)(*5*), which we are finalizing as described in this section (section II.B.2. of the final rule).

Comment: One commenter noted that our proposal at § 441.301(c)(7)(iii)(B)(*6*), requiring the State to review any grievance resolution with which the beneficiary is dissatisfied, is too vague. This commenter suggested that the regulations should specify that the reviewer be someone not involved in the original determination, and the beneficiary should have a process to submit information as to why the original resolution was insufficient. The commenter also suggested that we specify that the beneficiary must request review, believing that otherwise the expectation appears to be that the State must decide whether the beneficiary is dissatisfied. Finally, the commenter suggested that the notice of the original resolution should inform the beneficiary of this review process and how to initiate it.

One commenter also requested clarification on how beneficiaries should express dissatisfaction with a resolution for the purpose of seeking review of a resolution under § 441.301(c)(7)(iii)(B)(6).

Response: We believe that the requirements at § 441.301(c)(7)(iii)(C)(3), which we are finalizing as described in this section II.B.2, address several of the commenter's concerns. We clarify that the requirements at § 441.301(c)(7)(ii)(C)(*3*) apply to initially filed grievances and review of grievances under § 441.301(c)(7)(iii)(B)(*6*). We note that § 441.301(c)(7)(iii)(C)(*3*)(*i*) requires that the individual making a decision on a grievance is an individual who was neither involved in any previous level of review or decision-making related to the grievance nor a subordinate of any such individual. Section 441.301(c)(7)(iii)(C)(*3*)(*iii*) specifies that the individual must consider all comments, documents, records, and other information submitted by the beneficiary without regard to whether such information was submitted to or considered previously by the State.

We expect that beneficiaries would express dissatisfaction by affirmatively requesting review of a grievance resolution. We agree that beneficiaries have the responsibility of requesting the review, and expect that States will include, as part of their written policies, the method for how beneficiaries may request review and how beneficiaries will be notified of this right.

Comment: We did not receive comments on the requirement we proposed at § 441.301(c)(7)(iii)(B)(*7*) that States must provide information on the grievance system to providers and subcontractors. However, one commenter requested that we require States to give providers 14 days' notice if the provider is a party to the grievance.

Response: We believe that whether, and how, a State chooses to involve providers in individual grievances filed pursuant to § 441.301(c)(7) will vary on a case-by-case basis and, thus, a standardized notification requirement may not be appropriate. For instance, some grievances may be resolvable without the provider's involvement, and in some cases, the beneficiary may not want the provider to know the beneficiary's identity. If the beneficiary and the State believe it is necessary to have the provider involved in the investigation, including appearing at the resolution meeting, we expect that States will give the provider reasonable notice and ensure that the provider is able to participate in the process. Therefore, we intend to provide States with flexibility in determining their grievance system policies in this respect.

Comment: One commenter supported the requirement we proposed at § 441.301(c)(7)(iii)(C)(*1*) to allow beneficiaries to file grievances orally but recommended that we revise the requirement to specify that States must follow up with a written summary of the oral grievance so the beneficiary can ensure accuracy. Another commenter suggested that we revise the requirement at § 441.301(c)(7)(iii)(C)(*2*) to specify that acknowledgement of the receipt of a grievance must be in writing.

Response: We appreciate the comments and believe it is a best practice for States to provide a summary of the grievance to the beneficiary for accuracy. However, we decline to mandate that States provide a written summary, as we intend to allow flexibility for States to decide their own policies to operationalize this requirement. We believe that part of acknowledging the grievance, as required at § 441.301(c)(7)(iii)(C)(*2*), involves developing an appropriate system for providing beneficiaries with confirmation of their grievance.

Comment: One commenter requested that we specify whether all grievances filed must receive a full resolution or whether there are instances in which the acknowledgement of the grievance is sufficient. The commenter anticipated that because of the current direct care workforce crisis, many grievances may be filed related to provider shortages. While acknowledging that understaffing is a serious problem, the commenter believed that the grievance process is unlikely to be able to address the problem to the beneficiary's satisfaction.

Response: We note that the definition of grievance that we are finalizing at § 441.301(c)(7)(ii) indicates that a beneficiary may file a grievance regardless of whether remedial action is requested. We agree that, in instances in which the beneficiary does not wish to pursue remedial action and indicates they are not interested in presenting and debating their grievance as we proposed at § 441.301(c)(7)(iii)(C)(*4*), acknowledging the grievance may be considered resolving the complaint (rather than conducting additional inquiry). We note that should a matter be resolved with an acknowledgment, this matter would still be subject to the requirements at § 441.301(c)(7)(v) and (vi) (notifying the beneficiary of the resolution of a grievance) and § 441.301(c)(7)(iii)(B)(*6*) (review of grievance resolutions with which the beneficiary is dissatisfied).

Comment: A few commenters commented on our proposal at § 441.301(c)(7)(iii)(C)(*3*), establishing requirements for decisionmakers reviewing grievances considered under the grievance system. Several of these commenters supported our efforts to require a system that would provide a fair and unbiased review of beneficiaries' concerns. However, one commenter noted that the requirement at § 441.301(c)(7)(iii)(C)(*3*) would require a separate set of personnel to respond to and investigate grievances than the staff that is currently allocated for program management, administration, and support, and expressed concern that this would require additional resources.

Response: We note that the requirement we proposed at § 441.301(c)(7)(iii)(C)(*3*) requires that individuals reviewing and making decisions about grievances are not the same individuals, nor subordinates of individuals, who made the original decision or action that has given rise to the grievance. This would require that the provider that made the decision or performed the action giving rise to the

grievance would not be able to be the decisionmaker for the grievance. However, this would not preclude State Medicaid agency personnel from reviewing a grievance filed against a provider. Additionally, even for grievances filed about the State's performance, the requirement does not necessarily require review from separate departments or entities. With firewalls as needed, reviewers may be from the same department (or a different department) so long as the necessary expertise and independence standards are met, and the reviewer takes into account the information described in § 441.301(c)(7)(iii)(C)(*3*)(*ii*). We are not making modifications to § 441.301(c)(7)(iii)(C)(*3*) based on these comments.

Comment: One commenter questioned if the intent of the requirement we proposed at § 441.301(c)(7)(iii)(C)(*3*)(*iii*) is to require a ''de novo'' review of the grievances.

Response: De novo review typically refers to a standard of review of a matter on appeal after a trial court or administrative body has reached a determination. If a matter is being reviewed *de novo,* the reviewer is reviewing the whole matter as if it is freshly presented to them, without regard for what the prior decisionmaker determined, or their rationale supporting that determination. We did not specify in the regulation text (either proposed or finalized) whether this process is intended as a *de novo* review of grievances, as reference to *de novo* review would have been inapplicable. The general intent of the grievance system we proposed at § 441.301(c)(7) is not to address specific determinations that are being appealed, as would be the case in the fair hearing process. The grievance system is intended to address a beneficiary's dissatisfaction or complaint related to the State's or provider's performance of person-centered planning or HCBS settings requirements. We expect that the grievance system will typically represent the first opportunity a beneficiary has had to present their concerns directly to the State. Because there likely has not been an initial determination to consider and possibly affirm or reverse, we do not believe *de novo* review is applicable.

For example, consider two scenarios in which a provider fails to send a personal care assistant to two beneficiary's homes. For Beneficiary A, the failure was because the provider forgot to ensure a worker was scheduled to deliver the services. For Beneficiary B, the provider decided, unilaterally, that Beneficiary B had been authorized more personal care services than the provider believed was necessary and thus refused to send a personal care assistant to Beneficiary B's home. In both scenarios, Beneficiary A and Beneficiary B could file grievances about the provider's failure to provide services as outlined in the person-centered care plan or attempt to change the service plan without going through the process required in § 441.301(c)(1) through (3). The proper focus in both cases would be on whether the provider provided services in accordance with the current person-centered care plan. We would not expect in Beneficiary B's situation that the State would treat the provider's actions as a formal determination requiring *de novo* review (such as reviewing whether the provider's objections to the number of service hours in the service plan were valid, or making the beneficiary prove that the service hours were needed). Further, even if there has been an initial decision by a provider or State that the beneficiary disputes, we did not intend the grievance system to operate like a formal legal proceeding (that is, an administrative hearing or trial) and, again therefore, we do not believe the concept of *de novo* review is applicable.

Comment: One commenter suggested that we amend the definition of ''skilled professional medical personnel'' to allow the designation to apply to staff administering the grievance process, which would make the activity eligible for a 75 percent Federal matching rate.

Response: We are not amending the definition of skilled professional medical personnel in this final rule. The term ''skilled professional medical personnel'' is defined at § 432.2 as physicians, dentists, nurses, and other specialized personnel who have professional education and training in the field of medical care or appropriate medical practice and who are in an employer-employee relationship with the Medicaid agency. The term explicitly does not include other, nonmedical health professionals such as public administrators, medical analysts, lobbyists, senior managers, or administrators of public assistance programs of the Medicaid program. Per § 432.50, the FFP rate for skilled professional medical personnel and directly supporting staff of the Medicaid agency is 75 percent. We do not intend to require that the administrative activities required for grievance process must be administered by personnel with specialized medical education and training. Even for those who meet the criteria to be considered skilled professional medical personnel, only the portion of their activities that require their advanced skills and expertise would be eligible for the enhanced matching rate. If similar functions are performed by non-skilled professional medical personnel, then the activities themselves would not qualify for the higher matching rate.

Comment: One commenter requested clarification as to whether a telephonic communication would satisfy the proposed requirement at § 441.301(c)(7)(iii)(C)(*4*) that the State provide a beneficiary with a reasonable opportunity face-to-face, including through the use of audio or video technology.

Response: We believe that audio-only telephone calls, when requested by the beneficiary and with the inclusion of any necessary accommodations, satisfy this requirement.

Comment: One commenter recommended that we revise proposed § 441.301(c)(7)(iii)(C)(*4*) by removing the word ''limited'' from before ''time available,'' as the commenter believed the inclusion of the word ''limited'' was unnecessary.

Response: We disagree with the commenter's statement that the word ''limited'' is unnecessary. The language in this requirement was intended to mirror similar language in the managed care grievance process requirements at § 438.406(b)(4). Further, we believe it is important that beneficiaries understand the timeframes associated with the grievance resolutions and understand that it is intended, for their benefit, to be a time-limited process.

Comment: One commenter recommended that we mandate a minimum number of days afforded to a beneficiary to review their record and submit additional germane evidence and testimony to the State agency before resolution. The commenter noted that the proposed regulation merely requires that the State agency provide the beneficiary with ''a reasonable opportunity.'' The commenter regarded this as a vague standard and was concerned that States would not grant beneficiaries sufficient time. The commenter noted that beneficiaries with disabilities or complex medical issues may need additional time and supports to prepare evidence and testimony. The commenter suggested that granting beneficiaries a minimum of 21 days to prepare their evidence and testimony after receipt of the agency record would ensure that the State provided the record well in advance of the resolution deadline and would protect beneficiaries from the imposition of unreasonable timeframes to prepare.

Response: We note that § 441.301(c)(7)(iii)(C)(*4*) requires that

the State provide the beneficiary a reasonable opportunity to present evidence and testimony and make legal and factual arguments related to their grievance, while § 441.301(c)(7)(iii)(C)(*5*) requires the State to provide the beneficiary with their case file and other records sufficiently in advance of the resolution timeframe for grievances. We are unclear on which provision the commenter is recommending we modify. We decline to modify either provision by prescribing specific deadlines within the overall resolution timeframe, to allow States to develop flexible processes to accommodate beneficiaries. We expect that States will develop appropriate processes to allow beneficiaries to request postponements or rescheduling of any face-to-face hearings that they have requested if they find they need more time to prepare, or other situations arise that would prevent a beneficiary from being able to participate in the hearing.

We also note that we are finalizing a requirement at § 441.301(c)(7)(v)(C) to allow beneficiaries to have the option of requesting 14-day extensions if (for any reason) a beneficiary requires additional time beyond the 90-day resolution timeframe we are finalizing at § 441.301(c)(7)(v)(B).

Comment: Several commenters expressed concern about legal representation during the process. One commenter stated that beneficiaries should get access to State-provided legal assistance. Another commenter requested that, if a beneficiary is unable to afford an attorney, the opposing party not be allowed an attorney.

Response: As discussed in a prior response, beneficiaries have flexibility in determining who will assist them throughout the grievance process—which could, if the beneficiary chose, include assistance from a legal professional. We believe that the grievance system should be easy to navigate and largely non-adversarial, such that beneficiaries would not be required, nor feel pressured, to have legal representation. We also believe that at least some portion of grievances filed will be for minor issues that do not require a formal inquiry. We agree with commenters that it is preferable that hearings neither be, nor have the appearance of being, imbalanced in terms of support for the beneficiary. We encourage States, as they develop their policies, to consider what level of assistance beneficiaries will need during face-to-face meetings and ensure that reasonable assistance is provided.

Comment: One commenter stated that § 441.301(c)(7)(iii)(C)(*5*) should be revised to expand the documents beyond the beneficiary's ''case file.'' The commenter recommended that the regulations require that the State obtain relevant files and other information held by the provider and then provide that information to the beneficiary. The commenter stated that, particularly in cases involving residential providers, provider-maintained information will be relevant and often pivotal.

Response: We disagree and believe adding this language is unnecessary. We believe that the term, case file, could have several meanings, depending on the circumstances, and could include the records related to the beneficiary's services maintained by the provider that would be obtained by the State as part of review of the grievance. We also note that proposed § 441.301(c)(7)(iii)(C)(*5*) already requires beneficiaries to receive other documents and records, as well as new and current evidence considered or relied upon by the State related to the grievance. We believe relevant records from providers could fall into these categories, depending on the record and the circumstances by which the State obtained it. We do not intend our requirement at § 441.301(c)(7)(iii)(C)(*5*), as proposed and being finalized in this rule, to amend any existing obligations for confidentiality of certain records and we expect States to comply with applicable Federal and State laws and regulations governing confidentiality of those records in determining what records to provide to the beneficiary related to their grievance in compliance with § 441.301(c)(7)(iii)(C)(*5*). We decline to make modifications to § 441.301(c)(7)(iii)(C)(*5*) as requested by the commenter.

Comment: One commenter suggested that we require that the grievance system be compliant with the Health Insurance Portability and Accountability Act of 1996 (HIPAA).

Response: We had proposed at § 441.301(c)(7)(iii)(C)(*5*) that medical records being used as part of a grievance be handled in compliance with 45 CFR 164.510(b) (a provision of the HIPAA Privacy Rule), to ensure that protected health information (PHI) used during the grievance review are obtained and used with beneficiaries' authorization. In general, whenever a beneficiary's PHI may be obtained, maintained, or disclosed by a State agency that is a covered entity as defined in 45 CFR 160.103 (such as a State Medicaid agency), States are responsible for ensuring compliance with the requirements of HIPAA and its implementing regulations, as well as any other applicable Federal or State privacy laws governing confidentiality of a beneficiary's records. We also note that 45 CFR 164.510(b) is just one provision of the HIPAA Privacy Rule that permits the disclosure of PHI, and other provisions may also permit the disclosure of PHI (such as disclosure of PHI to personal representatives under 45 CFR 164.502(g)); other permissions may also apply in addition to what is cited here and included in the regulatory text of this final rule. Upon further review, we have determined that, given that a number of requirements of the HIPAA Privacy Rule may apply to the obtaining and sharing of beneficiaries' information, we are finalizing § 441.301(c)(7)(iii)(C)(5) with a modification to change the citation of 45 CFR 164.510(b) to a broader reference to the HIPAA Privacy Rule (45 CFR part 160 and part 164 subparts A and E).

Finally, we also note that individuals who believe their health information privacy has been violated may file a complaint with the HHS Office for Civil Rights at *https://www.hhs.gov/hipaa/filing-a-complaint/index.html.*

After consideration of public comments, we are finalizing § 441.301(c)(7)(iii)(A) as proposed, with the following modification. We are finalizing § 441.301(c)(7)(iii)(A)(1) with modification to specify that another individual or entity may file a grievance on behalf of the beneficiary or provide the beneficiary with assistance or representation throughout the grievance process with the written consent of the beneficiary or authorized representative. We are finalizing § 441.301(c)(7)(iii)(A)(2) as proposed.

We are finalizing requirements at § 441.301(c)(7)(iii)(B) as proposed, with the following modifications. We are finalizing § 441.301(c)(7)(iii)(B)(*1*) with a modification to correct an erroneous reference to subchapter by replacing subchapter with paragraph (c)(7). We are finalizing § 441.301(c)(7)(iii)(B)(*2*) with modifications by: (1) adding to States' obligation the requirement that States must provide beneficiaries reasonable assistance in ensuring grievances are appropriately filed with the grievance system; (2) modifying language to refer to individuals with Limited English Proficiency; and (3) clarifying that auxiliary aids and services must be made available where necessary to ensure effective communication. We are finalizing § 441.301(c)(7)(iii)(B)(*3*) with modifications to require that States ensure that punitive or retaliatory actions (rather than just punitive actions) are neither threatened nor taken. We are also adding language to specify that the punitive or retaliatory actions cannot be threatened or taken

against an individual filing a grievance **or who has had a grievance filed on their behalf**. (New language identified in bold.)

For reasons we discuss in greater detail in the next section (section II.B.2.c. of this rule) we are finalizing § 441.301(c)(7)(iii)(B)(*4*) with a modification to remove the reference to expedited grievances. We are finalizing § 441.301(c)(7)(iii)(B)(*5*) with a modification to change the language to refer to individuals with Limited English Proficiency. We are finalizing § 441.301(c)(7)(iii)(B)(6) and (7) as proposed.

We are finalizing § 441.301(c)(7)(iii)(C)(*1*) through (*5*) with minor technical modifications. We are replacing the periods at the end of each paragraph with semi-colons and adding the word and at the end of § 441.301(c)(7)(iii)(C)(*5*) to accurately reflect that § 441.301(c)(7)(iii)(C)(*1*) through (*6*) are elements of a list, not separate declarative statements. Additionally, for reasons we discuss in greater detail in a later section (section II.B.2.d.) because we are not finalizing the expedited resolution timeframe at § 441.301(c)(7)(v)(B)(2), we are finalizing § 441.301(c)(7)(iii)(C)(*5*) with modifications to remove references to § 441.301(c)(7)(v)(B)(1) and (2) and add a reference to § 441.301(c)(7)(v). We are also finalizing § 441.301(c)(7)(iii)(C)(5) with a modification to change the citation of 45 CFR 164.510(b) to a broader reference to the HIPAA Privacy Rule (45 CFR part 160 and part 164 subparts A and E).

c. Filing Timeframe (§ 441.301(c)(7)(iv))

At § 441.301(c)(7)(iv)(A), we proposed to require that the beneficiary be able to file a grievance at any time. At § 441.301(c)(7)(iv)(B), we proposed to require that beneficiaries be permitted to request expedited resolution of a grievance, whenever there is a substantial risk that resolution within standard timeframes will adversely affect the beneficiary's health, safety, or welfare, such as if, for example, a beneficiary cannot access personal care services authorized in the person-centered service plan.

We received public comments on these proposals. The following is a summary of the comments we received and our responses.

Comment: A few commenters made suggestions or submitted clarifying questions about our proposal at § 441.301(c)(7)(iv)(A) that beneficiaries be able to file a grievance at any time. One commenter requested clarification on whether our intent was to prohibit limits on the timeframe between the occurrence of the subject of the grievance and the date when the individual files a grievance. Another commenter noted that there should be a 90-day time limit on when beneficiaries can file grievances.

Response: We do not intend for beneficiaries' ability to file grievances to be time-limited. We appreciate commenters' concerns regarding this issue; however, we defer to the rationale we used when declining to add a timeframe cap in the managed care grievance filing process (81 FR 27511). In the managed care grievance process, § 438.402(c)(2)(i) specifies that enrollees may file a grievance with their managed care plan at any time. As we previously noted, grievances do not progress to the level of a State fair hearing, which is a time-sensitive process; therefore, we found it unnecessary to include filing limits because grievances are resolved without having to consider the time limits of other processes (81 FR 27511).

We understand that States may be concerned about revisiting grievance issues that occurred in the past, but we believe this is a normal part of providing services and that beneficiaries should be permitted to file a grievance at any time. We also note, that, as discussed in more detail below, States believe that educating beneficiaries about the grievance process will take time; therefore, we do not want to prevent beneficiaries from filing grievances in cases where the delay in filing was because the beneficiary was not initially aware of their ability to file a grievance.

Comment: A few commenters supported the proposal at § 441.301(c)(7)(iv)(B) to create a pathway for expedited resolutions when there is a substantial risk that resolution within standard timeframes will adversely affect the beneficiary's health, safety, or welfare.

Several commenters, however, believed that the proposal at § 441.301(c)(7)(iv)(B) to create a pathway for an expedited resolution was unclear or overly broad and requested additional clarification as to what would constitute a grievance warranting expedited resolution. Some of these commenters stated that technical assistance would be needed to help States identify the criteria for determining whether a resolution should be expedited, and how to proceed if a beneficiary disagrees with the State's determination that a grievance request should be expedited or resolved in the standard timeframe. One commenter raised the concern that if a beneficiary's request for an expedited resolution was denied, they may follow up with submitting another grievance or file a fair hearing request. Another commenter suggested that expedited resolutions should be defined as being contingent on the timely receipt of information from the beneficiary.

Some commenters noted that the expedited resolution process's focus on health, safety, and welfare could lead to duplication with other systems, including the critical incident system. They expressed the belief that there are separate channels to address health and safety concerns. For this reason, a few commenters suggested that there should only be one standard grievance resolution and notice timeline of 90 calendar days. A few commenters also suggested that we should not have an expedited resolution process in the FFS grievance system because there is not such a process in the managed care grievance system (as described in 42 CFR part 438, subpart F).

One commenter stated that, in their experience, few grievances were about issues affecting beneficiaries' health and safety, and thus it would not be appropriate to create a requirement for an expedited process as it was defined in proposed § 441.301(c)(7)(iv)(B). The commenter offered examples of typical grievances, based on the commenter's experience with operating a State grievance system. The commenter noted that many grievances involve education about the HCBS program (for example, additional services and limitations), information about available providers in their area as an alternative to their current provider, dissatisfaction with their paid caregiver, and frustrations with provider workforce shortages.

Response: We are persuaded by commenters' feedback summarized here, as well as comments summarized later in this section regarding the expedited resolution timeframe. After consideration of public comments, as discussed here in section II.B.2, we are not finalizing § 441.301(c)(7)(iv)(B) and are removing other references to the expedited resolution process where it appears in § 441.301(c)(7) in this final rule.

In particular, we are persuaded by the concern that the expedited resolution process as proposed could create overlap with the critical incident system, which is described in section II.B.3 of this final rule. We believe that the critical incident system is the most appropriate mechanism for investigating situations when a beneficiary has experienced actual harm or substantial risks to their health and safety. We do not want there to be a delay in the investigation of a critical incident

because it was incorrectly filed as a grievance, nor do we want matters that should be investigated as critical incidents resolved only in the grievance process.

In addition, as some commenters correctly noted, the managed care requirements at 42 CFR part 438, subpart F, do not include an expedited grievance resolution process. We have not identified a compelling reason why beneficiaries receiving HCBS through FFS systems should need an expedited resolution process for grievances when no similar process has, as yet, been deemed necessary in the managed care system. After reexamining these requirements in light of comments received, we do not wish to create misalignment between managed care and FFS systems' grievance resolution processes.

In general, we agree with the commenter that it is likely that many grievances filed would not meet the standard we proposed for expedited resolution (and, as noted above, if they did meet the standard, they are likely candidates for the critical incident or fair hearings systems). However, we envision that there remains the potential for some grievances to require immediate attention and intervention, even if they do not rise to the level of a critical incident (as defined in § 441.302(a)(6)(i)(A)) or do not qualify for a fair hearing (as set out in part 431, subpart E). Therefore, we encourage States to include in their grievance system a system for identifying, triaging, and expediting resolution of grievances that require, according to the State's criteria, prioritization and prompt resolution.

After consideration of the comments received about § 441.301(c)(7)(iv), we are finalizing our proposal at § 441.301(c)(7)(iv) with modification by removing the expedited resolution requirement at § 441.301(c)(7)(iv)(B) and redesignating § 441.301(c)(7)(iv)(A) as § 441.301(c)(7)(iv). Additionally, we are removing references to the expedited resolution process in § 441.301(c)(7)(iii)(B)(*4*). We are also removing requirements related to the expedited resolution process in § 441.301(c)(7)(v). These changes are discussed in their respective sections below.

d. Resolution and Notification (§ 441.301(c)(7)(v))

At § 441.301(c)(7)(v), we proposed resolution and notification requirements for grievances. Specifically, at § 441.301(c)(7)(v)(A), we proposed to require that States resolve and provide notice of resolution related to each grievance as quickly as the beneficiary's health, safety, and welfare requires and within State-established timeframes that do not exceed the standard and expedited timeframes proposed in § 441.301(c)(7)(v)(B). At § 441.301(c)(7)(v)(B)(1), we proposed to require that standard resolution of a grievance and notice to affected parties must occur within 90 calendar days of receipt of the grievance. At § 441.301(c)(7)(v)(B)(2), we proposed to require that expedited resolution of a grievance and notice must occur within 14 calendar days of receipt of the grievance.

At § 441.301(c)(7)(v)(C), we proposed that States be permitted to extend the timeframes for the standard resolution and expedited resolution of grievances by up to 14 calendar days if the beneficiary requests the extension, or the State documents that there is need for additional information and how the delay is in the beneficiary's interest. At § 441.301(c)(7)(v)(D), we proposed to require that States make reasonable efforts to give the beneficiary prompt oral notice of the delay, give the beneficiary written notice, within 2 calendar days of determining a need for a delay but no later than the timeframes in paragraph (c)(7)(v)(B), of the reason for the decision to extend the timeframe, and resolve the grievance as expeditiously as the beneficiary's health condition requires and no later than the date the extension expires, if the State extends the timeframe for a standard resolution or an expedited resolution.

We also proposed at § 441.301(c)(7)(iv)(B) and (c)(7)(v)(B)(*2*) that beneficiaries be permitted to request, and the State provide for, expedited resolution of a grievance. However, we noted that these proposed requirements differ from the current grievance system requirements for Medicaid managed care plans at part 438, subpart F, which do not include specific requirements for an expedited resolution of a grievance. We solicited comment on whether part 438, subpart F should be amended to include the proposed requirements for expedited resolution of a grievance at § 441.301(c)(7)(iv)(B) and (v)(B)(2).

We received public comments on these proposals. The following is a summary of the comments we received and our responses. We note that, as discussed in the previous section, we are not finalizing the expedited resolution process at § 441.301(c)(7)(iv)(B). We will discuss the impact of this change to the requirements in § 441.301(c)(7)(v) in our response to the comments below.

Comment: A few commenters requested that we provide additional information to clarify what is expected for a grievance to be considered resolved.

Response: We believe that the resolutions of grievances can take many forms and may vary on a case-by-case basis, and thus we decline to revise the requirements at § 441.301(c)(7)(v) to provide a more specific definition. We proposed and are finalizing as discussed in this section II.B.2 that a beneficiary may file a grievance even if the beneficiary does not request remedial action. We expect that grievances will vary not only in severity and urgency but will also vary according to the formality of the response. Some grievances, as noted in a response above, may require only a simple acknowledgment of the concern. Others may require immediate action(s), including intervention(s) with or action(s) taken against the provider. Still others may involve the State setting up a long-term corrective action plan or monitoring, consistent with applicable State laws governing such. We believe that a critical part of the grievance process involves collecting input from the beneficiary filing the grievance on the resolution or outcome they hope to achieve through the grievance process. This may include instances in which the beneficiary wishes to bring a concern to the State's attention but is not necessarily pursuing a specific resolution.

Comment: A few commenters raised concerns or questions about how States should ensure compliance with resolutions. One commenter noted the importance of ensuring corrective actions are taken in response to grievances so that policy and systems transformation can take place in a timely manner. One commenter requested that we provide States with more tools to ensure provider compliance, including appropriate monetary and nonmonetary penalties. Another commenter stated that the grievance resolution process should include an order for the creation of a corrective action plan and subsequent monitoring.

Response: We appreciate the commenters' suggestions, but we decline to add specific actions to the requirements at § 441.301(c)(7)(v). As noted above, we believe that there will be variety in both grievances and resolutions. It would be difficult, and perhaps detrimental, to establish a set of Federal penalties that may be over- or under-responsive to the range of matters heard in the grievance process. Thus, we want to retain flexibility in the

regulatory requirements to allow State grievance systems to respond appropriately to each situation. We expect that States will apply a reasonable interpretation to the requirement that the States ''resolve'' the grievance. For instance, if resolution reasonably requires a corrective action plan for a provider (for grievances resolved against providers) or a corrective action plan for the State (for grievances resolved against the State), we expect that a corrective action plan would be executed and monitored as part of the resolution in accordance with applicable State laws. Through State law and regulations, States can create penalties, whether monetary or non-monetary, for providers that have violated their obligations as set forth by the State Medicaid program.

Comment: Several commenters suggested that the grievance resolution process should include formal follow-up requirements. To ensure proper follow-up, one commenter recommended that the regulations specify that grievances and their resolutions be reviewed at the subsequent person-centered planning process. One commenter recommended that the State should perform a follow up at 30 and 90 days after the resolution.

Response: We decline to add specific follow-up requirements to § 441.301(c)(7)(v). As discussed in prior responses, we believe that grievances are likely to take many forms. We agree that, in some instances, follow-up or ongoing monitoring may be a critical element of a particular resolution and, thus, should be included. In other cases, the grievance may not require follow-up and, thus, a formal follow-up requirement would impose an unnecessary administrative burden. There may also be instances in which a beneficiary may not wish to be repeatedly contacted after they believe the matter has been resolved. We believe that determining the appropriateness of when, and how, to monitor outcomes of grievances should be part of policies States develop for their grievance system.

Comment: One commenter recommended that we revise the requirement at § 441.301(c)(7)(v)(A) to require that the State solicit more information from beneficiaries on how a delayed resolution could hurt the beneficiary. One commenter suggested that we include the language from this provision in the timeframe requirement for expedited grievances at § 441.301(c)(7)(v)(B)(2) so that the requirement reads, ''as expeditiously as the beneficiary's health condition requires and no longer than 14 calendar days after the State receives the grievance.''

Response: We decline to make the suggested modifications to the requirement at § 441.301(c)(7)(v)(A). We clarify that this requirement at § 441.301(c)(7)(v)(A) sets a general expectation for expeditious resolutions for all grievances. We encourage States to ensure that beneficiaries provide, in their grievances, detailed information about their concerns (including negative impacts they are experiencing or believe they will experience). However, we have specifically not set requirements for the amount or type of information beneficiaries must submit when filing a grievance, as we do not wish to inadvertently mandate a process that is administratively burdensome for beneficiaries. We believe that commenters may have interpreted this requirement as a means of identifying grievances being filed for expedited resolution, which was not the intent. Additionally, as discussed above, we are not finalizing the requirement for an expedited resolution at § 441.301(c)(iv)(B)(*2*).

We also note that, consistent with our discussion above related to concerns about confusion between the purpose of the grievance system and the critical incident system described in § 441.302(a)(6), we are revising the language in this provision. Specifically, we are finalizing our proposal at § 441.301(c)(7)(v)(A) with modification to require that the State resolve each grievance and provide notice as expeditiously as the beneficiary's health condition requires, instead of our proposal, which would have required that such notice be provided as expeditiously as the beneficiary's health, safety, and welfare requires. We believe this avoids confusion with the critical incident system and aligns the language with a parallel requirement in the managed care grievance requirements at § 438.408(a), as well as our language in §§ 441.301(c)(7)(v)(D)(*3*) (pertaining to expeditious resolution during extensions). We believe that ''health condition'' may be broadly interpreted to refer both to physical and mental health and well-being of the beneficiary.

Comment: A few commenters supported our proposal at § 441.301(c)(7)(v)(B)(*1*) that standard resolution of a grievance and notice to affected parties must occur within 90 calendar days of receipt of the grievance. However, some commenters, while not specifically opposing the 90-day timeframe, expressed concerns that the timeframe proposed for resolving grievances may not always allow for a thorough investigation. One commenter noted that, while this timeframe might allow for investigation and resolution of some grievances, other grievances might require more extensive investigation (such as interviews, on-site visits, legal review and consultation, and request for additional documentation) and could take longer. The commenter also worried about the time involved in allowing the beneficiary a reasonable opportunity to present evidence face-to-face and in writing, as well as access to their case file to review in advance.

Conversely, a number of commenters recommended that the standard resolution timeframe be shortened to 45 days. Many of these commenters stated that 90 days is too long for an individual to wait for resolution if they are experiencing a serious violation of their rights or access to services.

Response: We agree with commenters that some grievances may take longer than 90 days to resolve properly and note that these extenuating circumstances can be addressed through the use of the 14-day extension we are finalizing at § 441.301(c)(7)(v)(C) if the conditions set forth in that requirement are met. We also agree with commenters that grievances should be resolved as expeditiously as possible, but we do not agree that cutting the proposed timeframe in half (to 45 days) would be a sufficient timeframe. We based our proposal of 90 calendar days on the current timeframe for resolution in the managed care grievance system at § 438.408(b), and we do not find reason to believe that FFS grievances would require less time to resolve than grievances in the managed care system. We do not wish to set a timeframe that encourages hasty investigations, nor the overuse of the 14-day extensions. We also note that 90 calendar days is the maximum allowed timeframe and that States may choose to set a shorter timeframe, or several timeframes for different types of grievances, so long as none of the timeframes exceed 90 calendar days. We are finalizing the 90-calendar day timeframe for resolutions as proposed.

Comment: One commenter noted that the proposed timeframe of 14 days for expedited resolution was too long and suggested that it be reduced to 7 days. On the other hand, many commenters expressed concerns about staff capacity necessary to respond to expedited grievances within 14 calendar days, as well as the feasibility of completing investigations within the proposed 14-day timeframe. Commenters believed that, given the potential seriousness of grievance inquiries, it may be difficult

for all necessary information to be gathered in 14 days and to grant the beneficiary a reasonable opportunity to present evidence in a face-to-face meeting. Several commenters recommended that, if finalizing an expedited resolution timeframe, we extend the timeframe to 30 calendar days, and one commenter recommended 30 business days.

Response: As discussed above, we are not finalizing the requirement for an expedited resolution process. In addition to the comments summarized above about the process itself, we agree with commenters that if a beneficiary has filed a grievance and wishes to present evidence and participate in a face-to-face meeting with the decisionmaker, 7 calendar days, or even 14 calendar days, may not be sufficient time for all relevant materials to be gathered and reviewed by the beneficiary and decisionmaker, nor to arrange for a resolution meeting. As discussed above, we are encouraging States to create their own processes for expediting resolution of certain grievances. We believe that there will be some grievances filed that may (and should) be resolved almost immediately, including by a referral to the critical incident system or fair hearings process. We note that several commenters suggested that 30 days is a reasonable timeframe for expediting resolutions, and States may want to take that recommendation under consideration when developing their own processes.

Consistent with our decision not to finalize the expedited resolution process at § 441.301(c)(7)(iv)(B), we are not finalizing § 441.301(c)(7)(v)(B)(*2*).

Comment: One commenter noted that imposing any timelines for resolving grievances could detract from staff resources needed to investigate critical incidents, particularly if the grievance and critical incident systems use the same staff.

Response: We recognize that States will have to supply staff and resources for both the grievance and critical incident systems that we are finalizing in this rule. We will provide technical assistance to States as needed to help identify ways to manage both systems, including setting priorities and managing the critical incident investigation and grievance resolution timeframes.

Comment: A number of commenters responded to our invitation to comment on whether part 438, subpart F should be amended to include the proposed expedited resolution requirements at § 441.301(c)(7)(iv)(B) and (v)(B)(*2*). Several commenters recommended that expedited procedures be extended to the managed care grievance procedures at part 438 subpart F. However, several commenters opposed adding expedited resolution timeframes to part 438 subpart F. Similar to the opposition presented to including expedited resolutions in the FFS grievance system, these commenters believed that very few expressions of dissatisfaction require expedited resolution and that other mechanisms exist to address health and safety concerns in a timely manner. A few commenters also provided suggestions on possible changes to the managed care grievance requirements, such as adding a prohibition of punitive action against beneficiaries who file grievances.

Response: We will take these comments under consideration. We note that we are not, at this time, finalizing an expedited resolution process in the FFS grievance system and are not finalizing the requirements we proposed at § 441.301(c)(7)(iv)(B) and at § 441.301(c)(7)(v)(B)(*2*) for such a process. We also note that, while outside the scope of this proposal, we will take other recommendations regarding potential changes to the managed care grievance process under consideration as well.

Comment: A few commenters noted support for the proposal at § 441.301(c)(7)(v)(C) that States be permitted to extend the timeframes for the resolution of grievances by up to 14 calendar days.

Response: We thank the commenters for their support.

We did not receive comments on the requirements we proposed at § 441.301(c)(7)(v)(D).

After consideration of public comments, we are finalizing our proposal at § 441.301(c)(7)(v)(A) with modification to require that the State resolve each grievance, and provide notice, as expeditiously as the beneficiary's health condition (instead of health, safety, and welfare) requires. Additionally, consistent with our decision not to finalize the expedited resolution process at § 441.301(c)(7)(iv)(B), we are not finalizing the expedited resolution timeframe at § 441.301(c)(7)(v)(B)(2), redesignating § 441.301(c)(7)(v)(B)(1) as § 441.301(c)(7)(v)(B), and retitling § 441.301(c)(7)(v)(B) as ''Resolution timeframes.'' We are also removing the word ''standard'' in § 441.301(c)(7)(v)(B)(1) (which we are finalizing at § 441.301(c)(7)(v)(B)) since the finalized requirements do not distinguish between ''standard resolution'' and other types of resolutions.

We are finalizing § 441.301(c)(7)(v)(C), with a technical correction to redesignate paragraphs (C)(*1)*(i) and (C)(*1*)(ii) as (C)(*1*) and (C)(*2*), respectively. We are finalizing § 441.301(c)(7)(v)(D) as proposed, with minor technical corrections. Specifically, we are changing the periods at the end of § 441.301(c)(7)(v)(D)(*1*) and (*2*) to semi-colons and adding ''and'' at the end of § 441.301(c)(7)(v)(D)(*2*).

e. Notice of Resolution (§ 441.301(c)(7)(vi))

We proposed at § 441.301(c)(7)(vi) requirements related to the notice of resolution for beneficiaries. Specifically, at § 441.301(c)(7)(vi)(A), we proposed to require that States establish a method for written notice to beneficiaries and that the method meet the availability and accessibility requirements at § 435.905(b). At § 441.301(c)(7)(vi)(B), we proposed to require that States make reasonable efforts to provide oral notice of resolution for expedited resolutions.

We received public comments on these proposals. The following is a summary of the comments we received and our responses.

Comment: Several commenters recommended that we expand the requirements proposed at § 441.301(c)(7)(vi) pertaining to the information beneficiaries receive at the resolution of their grievance. The commenters requested we include a requirement that the notice explain what the grievance is, the information considered, the necessary remedial actions (if any) for resolution, and the ability to request further review.

Response: We encourage States to include this information in resolution notices as appropriate, but we decline to make changes to this requirement in our final rule. We note that this requirement, as written, is consistent with the parallel requirement in § 438.408(d), which provides States with flexibility in developing a method by which managed care plans will notify enrollees of resolutions. We intend to provide States with this same flexibility in the FFS system, as we see no compelling reason to impose more rigid requirements on one system than the other.

We also note that, consistent with the discussion above not to finalize the expedited resolution process, we are not finalizing § 441.301(c)(7)(vi)(B), which requires oral notice for expedited resolutions. We expect that States, should they decide to include an expedited resolution process in their grievance system, would develop an

appropriate system for notifying beneficiaries of these resolutions.

After consideration of the comments received, we are finalizing § 441.301(c)(7)(vi)(A) without substantive changes. However, consistent with our decision (discussed above) not to finalize the expedited resolution process at § 441.301(c)(7)(iv)(B), we are not finalizing the requirement we proposed relating to the expedited resolution process at § 441.301(c)(7)(vi)(B) and redesignating § 441.301(c)(7)(vi)(A) as § 441.301(c)(7)(vi).

f. Recordkeeping (§ 441.301(c)(7)(vii))

We proposed at § 441.301(c)(7)(vii) recordkeeping requirements related to grievances. Specifically, at § 441.301(c)(7)(vii)(A), we proposed to require that States maintain records of grievances and review the information as part of their ongoing monitoring procedures. At § 441.301(c)(7)(vii)(B), we proposed to require that the record of each grievance must contain at a minimum the following information: a general description of the reason for the grievance, the date received, the date of each review or review meeting (if applicable), resolution and date of the resolution of the grievance (if applicable), and the name of the beneficiary for whom the grievance was filed. Further, at § 441.301(c)(7)(vii)(C), we proposed to require that grievance records be accurately maintained and in a manner that would be available upon our request.

We received public comments on these proposals. The following is a summary of the comments we received and our responses.

Comment: A few commenters supported the proposal at § 441.301(c)(7)(vii)(A) to require that States maintain records of grievances and review the information as part of their ongoing monitoring procedures, and for the proposal at § 441.301(c)(7)(vii)(C) that grievance records would be available upon CMS's request. A few commenters were also specifically supportive of what they regarded as the proposal's potential to collect and track standardized information about service system issues, including obstacles to informed choice and person-centered planning.

One commenter observed that there will be important lessons and conclusions that may be drawn from the data that should help the State to take steps to deter future service provider actions that lead to grievances. The commenter also hoped that such data could lead to educational opportunities to refine State and service provider knowledge of HCBS settings and person-centered service plan rules, and data should be collected on the efficacy of such educational interventions. One commenter suggested that we require qualitative, as well as quantitative, reporting.

Response: We decline to make any additional changes to our proposal at § 441.301(c)(7)(vii) in this final rule, but we agree with the commenters that the data and records that States collect as part of the grievance process may be critical in helping States improve their HCBS programs. While we are not finalizing specific requirements for how States must use this data, promising practices related to data collection and analysis, including methods of capturing qualitative data from the records, will likely be included in the technical assistance that will be available to States during the implementation period.

Comment: A few commenters recommended requiring States to make information on grievances publicly available, such as by releasing an annual report on the anonymized grievances received in the previous 12 months, categorized by issue, severity, and resolution or lack of resolution. One commenter suggested that such a report would enhance transparency and could assist with quality improvement by providing States, providers, and consumer advocates with insight into grievance patterns and trends. Another commenter recommended that we require public online disclosure of grievance details and resolutions. The commenter noted this would help individuals make informed choices about providers and would encourage compliance with person-centered planning and settings requirements. One commenter, presuming that the State's recordkeeping system would be made publicly available, suggested that we include the name of the decision maker in the records so that CMS, researchers, and advocacy groups can ensure that decision makers are making unbiased decisions.

Response: We did not propose that States publicly report information about grievance resolutions in this final rule; we note, for instance, that we did not include reporting on the grievance system as part of the reporting requirement being finalized at § 441.311, nor are we requiring that States report information about grievances as part of the website posting requirement being finalized at § 441.313. We decline to make any changes in this final rule to require such public reporting.

We believe that some public disclosures may not be suitable or appropriate in every instance, and it would be difficult to tailor a meaningful requirement to anticipate all of these circumstances. We are concerned that, for example, in States with smaller HCBS populations, it may be difficult to truly anonymize information about grievances. Relatedly, some beneficiaries may not want grievances published about specific providers, as some commenters suggest, as this would further complicate anonymity when some providers only serve a few clients. We are concerned also that public disclosure could have a chilling effect if beneficiaries believed their grievance could be made part of a public report. While we agree that, over time, data about trends in grievances could be useful to both the States and external interested parties in promoting systemic improvements of HCBS, we defer to States to determine when and how to make this information public and for what purpose. We also note that the specific recommendation to add the name of the decision maker to the record is addressed in another response later in this section.

Comment: One commenter recommended that we establish a process for an annual or regular review of the States' summary of issues and the States' resolution of the issues. Another commenter recommended requiring an independent evaluator periodically review States' grievance processes to identify common barriers, trends, participation rates, and effectiveness of resolutions.

Response: When developing the proposed requirements at § 441.301(c)(7), we did not intend to create a formal system in which we would routinely review individual resolutions made by States' grievance systems and are not persuaded otherwise after review of public comments received. As discussed further in this section II.B., we proposed, and are finalizing, the requirement at § 441.301(c)(7)(vii)(C) that States must make records available to us upon request. This provides CMS with authority to review records should we need to review the functioning of a State's grievance system on a case-by-case basis.

We believe that the grievance system's designated decision makers are generally in the best position to determine appropriate resolutions to beneficiaries' concerns and that the need to review individual records should be decided on a case-by-case basis. We do agree regular review of the States' grievance systems is a good

suggestion, and we will take it under consideration for future guidance and rulemaking. Similarly, we are not requiring that States have their grievance system reviewed by an independent evaluator in this final rule—in part because we believe many States will likely do this anyway, as part of their standard audit processes. However, we agree that having the system regularly reviewed by an independent entity is a good practice that States may consider.

Comment: A few commenters suggested specific categories of information to be added to the record of each grievance proposed at § 441.301(c)(7)(vii)(B). One commenter suggested that all information considered should be included as a category in the record of each grievance. A few commenters recommended we add that the name of the decisionmaker be included in the record to ensure that conflict of interest requirements at § 441.301(c)(7)(iii)(C)(*3*) are preserved.

Response: We thank commenters for their suggestions, but we decline to add new record requirements for States at § 441.301(c)(7)(vii)(B). We believe capturing the names of staff and individuals who decided the outcome of each grievance is an operational and internal matter for States. States can record whatever information about a grievance resolution that they deem appropriate in addition to what is required. We believe § 441.301(c)(7)(vii)(B) as finalized reflects an appropriate minimum level of detail. We note that § 441.301(c)(7)(vii)(B) aligns with the managed care grievance system recordkeeping requirement at § 438.416.

After consideration of public comments received, we are finalizing § 441.301(c)(7)(vii) without substantive modifications. However, we are finalizing § 441.301(c)(7)(viii)(B)(*1*) through (*5*) with minor technical modifications. We are replacing the periods at the end of each paragraph with semi-colons, to accurately reflect that § 441.301(c)(7)(vii)(B)(*1*) through (*6*) are elements of a nonexhaustive list, not separate declarative statements. We are also adding the word ''and'' to the end of § 441.301(c)(7)(vii)(B)(*5*).

g. Applicability Date (§ 441.301(c)(7)(viii))

In the proposed rule (88 FR 27977), we recognized that many States may need time to implement the proposed grievance system requirements, including needing time to amend provider agreements, make State regulatory or policy changes, implement process or procedural changes, update information systems for data collection and reporting, or conduct other activities to implement these requirements. However, we noted that the absence of a grievance system in FFS HCBS systems poses a substantial risk of harm to beneficiaries. We proposed at § 441.301(c)(7)(viii) that the requirements at § 441.301(c)(7) be effective 2 years after the effective date of the final rule. A 2-year time period after the effective date of the final rule for States to implement these requirements reflected our attempt to balance two competing challenges: (1) the fact that there is a gap in existing regulations for FFS HCBS grievance processes related to important HCBS beneficiary protection issues involving person-centered planning and HCBS settings requirements; and (2) feedback from States and other interested parties that it could take 1 to 2 years to amend State regulations and work with their State legislatures, if needed, as well as to revise policies, operational processes, information systems, and contracts to support implementation of the proposals outlined in this section. We also considered all of the HCBS proposals outlined in the proposed rule (88 FR 27971 through 27995) as whole. We solicited comments on overall burden for States to meet the requirements of this section, whether this timeframe is sufficient, whether we should require a shorter timeframe (1 year to 18 months) or longer timeframe (3 to 4 years) to implement these provisions, and if an alternate timeframe is recommended, the rationale for that alternate timeframe.

We received public comments on these proposals. The following is a summary of the comments we received and our responses.

Comment: One commenter supported our proposal at § 441.301(c)(7)(viii) that the requirement at § 441.301(c)(7) be effective 2 years after the effective date of the final rule. However, one commenter, stating that these grievance protections will be vital to HCBS beneficiaries, recommended that States be required to come into compliance within 18 months after the effective date of the regulations.

A few commenters expressed concerns about the burden they believe will be associated with developing a grievance system, particularly in States that do not already have grievance processes in place. Commenters believed that it would take significant resources to help beneficiaries understand what rights they can claim under the grievance system. Commenters also described costs or activities such as: funding and statutory change requests to State legislatures; administrative rulemaking; IT and administrative system design and development, which may include vendor procurement; collaboration with other State agencies or agency divisions; partnering with providers for implementation; hiring and training new staff; and approval of implementation advance planning documents by CMS. These commenters suggested alternative effective dates ranging from 3 to 5 years. One commenter also suggested an effective date of 4 years after CMS releases relevant subregulatory guidance.

Response: We appreciate the fact that States will have to expend resources in developing the grievance system, particularly States that do not currently have grievance systems for Medicaid beneficiaries receiving services under section 1915(c), (i), (j) and (k) authorities through a FFS delivery system. Because of the activities that some States will have to perform to develop the grievance system shared by commenters, we agree that requiring an earlier timeframe of 18 months is not realistic. We also appreciate, and agree with, the sense of urgency expressed by commenters. We believe it is important to prioritize giving beneficiaries the opportunity to have their concerns heard. In this final rule, we have provided States with as much flexibility as possible to build on or retain existing grievance systems and have kept specific information systems requirements to a minimum. We have also reduced some potential initial administrative challenges by not finalizing a formal expedited resolution requirement and by allowing States to decide whether, and how, to implement such a policy. After consideration of public comments received as discussed herein, we are finalizing the substance of § 441.301(c)(7)(viii) as proposed, but with minor modifications to correct erroneous uses of the word ''effective'' and retitle the requirement as Applicability date (rather than Effective date). We are also modifying the language at § 441.301(c)(7)(viii) to specify that **States must comply with** the requirements at § 441.301(c)(7) **beginning** 2 years from the effective date of this final rule, rather than stating that this requirement is effective 2 years after the date of enactment of the final rule. (New text in bolded font). We are finalizing § 441.301(c)(7)(viii) with a technical modification to specify that the applicability date applies to the requirements at § 441.301(c)(7).

Comment: A few commenters requested enhanced FMAP to support implementation and operationalization

of the grievance process. Two commenters recommended that, in addition to providing 90 percent FFP for information systems improvements, we should offer 75 percent FFP for all quality-related activities, including operational costs associated with a grievance system. The commenters suggested this would create parity between the States whose service delivery systems are largely FFS and the States with managed care services that can receive 75 percent FFP for External Quality Review (EQR) activities.

Response: We note that enhanced FMAP is available for certain activities related to administering the Medicaid program and designing, developing, implementing, and operating certain IT systems.[60] However, Federal matching rates are established by Congress and CMS does not have the authority to change or increase them, nor do we have the authority to add additional activities not specified in statute into the scope of an existing enhanced FMAP. We also do not agree that providing broader enhanced match for the FFS grievance system would create parity with managed care, as we believe this is an inaccurate characterization of payments related to the managed care grievance systems. While commenters are correct that States can receive 75 percent enhanced match for EQR activities, which are listed at § 438.358, these activities are primarily validation and review of data on performance measures; the operation of a grievance system is not listed as an EQR activity. We also note that the associated administrative costs for MCOs, PIHPs, and PAHPs are variable and negotiated with the State as part of their contracts.

After consideration of public comments received, we are finalizing the substance of § 441.301(c)(7)(viii) as proposed, but with minor modifications to correct erroneous uses of the word ''effective'' and retitle the requirement as Applicability date (rather than Effective date). We are also modifying the language at § 441.301(c)(7)(viii) to specify that States must comply with the requirements at § 441.301(c)(7) beginning 2 years from the effective date of this final rule, rather than stating that this requirement is effective 2 years after the date of enactment of the final rule. (New text in bolded font.) We are finalizing § 441.301(c)(7)(viii) with a technical modification to specify that the applicability date applies to the requirements at § 441.301(c)(7).

h. Application to Other Authorities

As discussed earlier in section II.B.1. of this preamble, section 2402(a)(3)(A) of the Affordable Care Act requires States to improve coordination among, and the regulation of, all providers of Federally and State-funded HCBS programs to achieve a more consistent administration of policies and procedures across HCBS programs. In accordance with the requirement of section 2402(a)(3)(A) of the Affordable Care Act for States to achieve a more consistent administration of policies and procedures across HCBS programs and because HCBS State plan options also must comply with the HCBS Settings Rule and with similar person-centered planning and service plan requirements, we proposed to include these grievance requirements within the applicable regulatory sections. Specifically, we proposed to apply these proposed requirements in § 441.301(c)(7) to sections 1915(j), (k), and (i) State plan services at §§ 441.464(d)(2)(v), 441.555(b)(2)(iv), and 441.745(a)(1)(iii), respectively.

Also, consistent with our proposal for section 1915(c) waivers, we proposed to apply the proposed grievance requirements in § 441.301(c)(7) to sections 1915(j), (k), and (i) State plan services based on our authority under section 1902(a)(19) of the Act to assure that there are safeguards for beneficiaries and our authority at section 2402(a)(3)(B)(ii) of the Affordable Care Act to require a complaint system for beneficiaries. We stated that the same arguments for applying these requirements for section 1915(c) waivers are equally applicable to these other HCBS authorities. We requested comment on the application of the grievance system provisions to section 1915(i), (j), and (k) authorities. We also noted that, in the language added to § 441.464(d)(2)(v), the proposed grievance requirements apply when self-directed personal assistance services authorized under section 1915(j) include services under a section 1915(c) waiver program.

As described in the proposed rule (88 FR 27978), we did not propose to apply these requirements to section 1905(a) services. Specifically, we considered whether to also apply the proposed requirements to section 1905(a) ''medical assistance'' in the form of State plan personal care services, home health services, and case management services, but did not propose these requirements apply to any section 1905(a) State plan services because section 1905(a) services are not required to comply with HCBS settings requirements and because the person-centered planning and service plan requirements for most section 1905(a) services are substantially different from those for section 1915(c), (i), (j), and (k) services. Further, the vast majority of HCBS is delivered under section 1915(c), (i), (j), and (k) authorities, while only a small percentage of HCBS nationally is delivered under section 1905(a) State plan authorities. We solicited comment, seeing the value in discussing and seeking public input, on whether we should establish grievance requirements for section 1905(a) State plan personal care services, home health services and case management services.

We received public comments on these proposals. The following is a summary of the comments and our responses.

Comment: A few commenters supported the proposal to apply the grievance system provisions proposed for section 1915(c) at § 441.301(c)(7) to sections 1915(i), (j) and (k) authorities. They agreed with the goal of aligning the different HCBS program authorities and promoted consistency with managed care.

Response: We thank commenters for their support.

Comment: One commenter supported the application of the grievance requirements to self-directed personal assistance services under section 1915(j) of the Act as well. This commenter noted that, during the pandemic, there was no clear way to file a grievance with Medicaid concerning a lack of access to direct care workers, for example.

One commenter, on the other hand, questioned the operationalization of the grievance process for self-directed personal care service models under sections 1915(j) and (k), where the beneficiary acts as the employer for purposes of hiring, training, supervising, and firing, their provider, if necessary. This commenter was concerned that allowing beneficiaries to file grievances against their provider would erode a beneficiary's responsibilities as the employer. Another commenter, while supporting application of the grievance process to section 1915(j) self-directed services, did suggest that implementing this requirement in self-directed models may require additional time and guidance.

Response: We believe it would be inappropriate to exclude beneficiaries enrolled in self-directed services delivery models from the grievance system and decline to do so in this final rule. As noted by other commenters, beneficiaries enrolled in self-directed

[60] For a current list of activities eligible for this enhanced FMAP, refer to: MACPAC, ''Federal Match Rates for Medicaid Administrative Activities,'' last access: October 22, 2023. *https://www.macpac.gov/federal-match-rates-for-medicaid-administrative-activities/.*

services may experience systemic challenges with their services; they may also interact with other providers in addition to their self-directed service provider (such as the entity providing financial management services). We also note that the grievance system is a venue for expressing concerns about violations of the HCBS settings requirements, which may be relevant to some beneficiaries in self-directed programs. We do not believe that additional time needs to be granted specifically for inclusion of beneficiaries using self-directed services.

Comment: Several commenters responded to our request for comment on whether we should establish grievance requirements for section 1905(a) State plan personal care services, home health services and case management services. A few commenters supported the proposal not to extend the requirements to section 1905(a) services on the basis that these services are not subject to the same person-centered planning and HCBS settings rules. Additionally, several commenters also believed the expansion of these requirements to section 1905(a) State plan services would pose additional challenges to State Medicaid and operating agencies. One commenter noted that, in States that deliver section 1905(a) State plan services and section 1915(c) services through different agencies or agency divisions, implementation could prove challenging and costly. A few commenters stated that States should be encouraged (but not required) to implement the proposed provisions to their section 1905(a) State plan services.

However, a few commenters supported extending the grievance system requirements to section 1905(a) services. Among these commenters, a few commenters recommended that CMS apply the grievance system requirements specifically to mental health rehabilitative services delivered under section 1905(a) services. These services, some commenters stated, are delivered to large numbers of Medicaid beneficiaries, particularly those with mental health needs. These commenters elaborated on concerns that, otherwise, there would be disparities between individuals receiving similar services from the same State Medicaid agency under different authorities, and that many Medicaid recipients with mental health disabilities receiving services under the section 1905(a) authority would not have recourse if their rights were violated. One commenter also suggested that mental health rehabilitative services are considered ''home- and community-based services'' under the broader definition enacted by Congress in the American Rescue Plan Act of 2021.

Response: At this time, we are not requiring inclusion of section 1905(a) services in the State grievance system. That said, we are not convinced by the argument that including section 1905(a) services would simply be too much work, as we do believe it is critical that beneficiaries have access to mechanisms to claim their rights and have their concerns heard. Rather, we note that there are statutory and regulatory differences between services authorized under sections 1905(a) and 1915 of the Act. We would need to consider how to define the nature of the grievances that would be filed for section 1905(a) services, given that they do not have the same person-centered planning and HCBS settings rule requirements at § 441.301(c)(1) through (6). As we discussed extensively in this section, the bases for a grievance are providers' and States' performance of the requirements at § 441.301(c)(1) through (6). We believe this definition of grievance provides clear parameters for matters that would be the subject of grievances. We note that person-centered service planning requirements are established for section 1915(j) services in § 441.468, for section 1915(k) services in § 441.540, and for section 1915(i) services at § 441.725. While person-centered service planning might be part of some specific 1905(a) services, it is not a required component of all section 1905(a) services.

Similarly, the HCBS settings requirements a § 441.301(c)(3) through (6) that apply to section 1915(c) services have counterparts for section 1915(k) services at § 441.530 and for 1915(i) services at § 441.710. (For more discussion of the application of the HCBS settings rule's application to section 1915(c), (i), and (k) services, we refer readers to the final rule published in 2014 at 79 FR 2948.) Section 1915(j) services offered through a section 1915(c) waiver (as specified, for instance, at § 441.452(a)) would also be subject to the HCBS settings requirements at § 441.301(c)(3) through (6). There is not a similar application of the HCBS settings rule to section 1905(a) services.

If we are to apply a grievance process to 1905(a) services, it is likely we would weigh proposing a grievance process for all section 1905(a) services versus for only specific section 1905(a) services. These services are diverse, are offered in diverse settings, and lack the clear regulatory framework that we were able to use in constructing the bases for grievances in section 1915 services. We believe this requires additional consideration and discussion with the public beyond what could be finalized in this current rule.

Though we are not finalizing inclusion of section 1905(a) services in the State grievance system in this rule, we acknowledge that many beneficiaries, including those receiving mental health services, are served by section 1905(a) services and encourage States to consider development of grievance processes to address these beneficiaries' concerns. We appreciate the commenters' suggestions. Given that our work to better ensure access in the Medicaid program is ongoing, we intend to gain implementation experience with this final rule, and we will consider the recommendations provided on the proposed rule to help inform any future rulemaking in this area, as appropriate.

After consideration of public comments, we are finalizing the application of the grievance system requirements for section 1915(c) waivers, as finalized in this rule at § 441.301(c)(7), to the other HCBS authorities under sections 1915(j), 1915(k), and 1915(i). However, after further review, we determined it is necessary to make modifications to our regulations for these other HCBS authorities to clarify this intention. Our proposed regulation text for these HCBS authorities did not accurately reflect or effectuate our proposal to require States to implement and maintain a grievance system, in accordance with § 441.301(c)(7), for these HCBS authorities as well. We are finalizing the regulation text we proposed at §§ 441.464 (for section 1915(j)), 441.555 (for section 1915(k)), and 441.745 (for section 1915(i)) with modification to more clearly specify that a State must implement and maintain a grievance system in accordance with the requirements we are finalizing at § 441.301(c)(7) for HCBS programs they administer under these authorities.

For application to section 1915(j) services, we are not finalizing the amendment we proposed at § 441.464(d)(2)(v), but rather finalizing this new requirement for a grievance system at § 441.464(d)(5). We will retain the current language at § 441.464(d)(2)(v), which indicates that States must include grievance processes, generally, among the support activities about which States provide information, counseling, training, and assistance. At § 441.464(d)(5), we are finalizing with modification for clarity and precision that the State must implement and maintain a grievance process in accordance with § 441.301(c)(7), rather

than the language we proposed at § 441.464(d)(2)(v) (Grievance process, as defined in § 441.301(c)(7) when self-directed PAS include services under a section 1915(c) waiver program). We are also finalizing § 441.464(d)(5) with a technical modification to clarify that the grievance system must meet the requirements of § 441.301(c)(7), but that references therein to section 1915(c) of the Act are instead references to section 1915(j) of the Act.

For application to section 1915(k) services, we are not finalizing the amendment we proposed at § 441.555(b)(2)(iv), but rather finalizing this new requirement for a grievance system at § 441.555(e). We will retain the current language at § 441.555(b)(2)(iv), which indicates that States must include grievances processes, generally, among the support activities about which States provide information, counseling, training, and assistance. At § 441.555(e), we are finalizing with modification for clarity and precision that the State must implement and maintain a grievance process in accordance with § 441.301(c)(7), rather than the language we proposed at § 441.555(b)(2)(iv) (Grievance process, as defined in § 441.301(c)(7)). We are also finalizing § 441.555(e) with a technical modification to clarify that the grievance system must meet the requirements of § 441.301(c)(7), but that references therein to section 1915(c) of the Act are instead references to section 1915(k) of the Act.

For application to section 1915(i) services, we are finalizing the amendment we proposed at § 441.745(a)(1)(iii) with modifications. As proposed, § 441.745(a)(1)(iii) had indicated that a State must provide beneficiaries receiving section 1915(i) services with the opportunity to file a grievance. To clarify that the State must maintain a grievance process in accordance with § 441.301(c)(7) for beneficiaries receiving HCBS under section 1915(i), we are finalizing § 441.745(a)(1)(iii) to specify that the State must implement and maintain a grievance process in accordance with § 441.301(c)(7). We note that several requirements being finalized at § 441.301(c)(7) (such as § 441.301(c)(7)(iii)(A), (B)(*2*), and (C)(*1*), discussed in section II.B.2.b. of this final rule) require States to provide the beneficiary with the opportunity to file grievances in the grievance system. We are also finalizing § 441.745(a)(1)(iii) with a technical modification to clarify that the grievance system must meet the requirements of § 441.301(c)(7), but that references therein to section 1915(c) of the Act are instead references to section 1915(i) of the Act. Additionally, as we are finalizing a new § 441.745(a)(1)(iii) in this rule, we are redesignating the current § 441.745(a)(1)(iii) as § 441.745(a)(1)(iv).

We also note that while we are finalizing these amendments to regulations under section 1915(j), (k) and (i) authorities, we are not suggesting that States that provide HCBS through multiple authorities must operate a separate grievance process for each program. As discussed earlier in II.B.2. of this preamble, while States are allowed to maintain multiple grievance processes (so long as each process complies with § 441.301(c)(7)), we strongly encourage States to maintain a single, integrated grievance system for all HCBS beneficiaries.

i. Summary of Finalized Requirements

After consideration of the public comments, we are finalizing the proposals at §§ 441.301(c)(7) as follows:

- We are finalizing the requirement describing the grievance system purpose at § 441.301(c)(7)(i) with technical modifications to specify that States must establish a procedure under which a beneficiary can file a grievance related to the State's or a provider's **performance of** (rather than **compliance with**) the activities described in paragraphs (c)(1) through (6) of § 441.301(c)(7). (New language identified in bold.) We are also adding language to § 441.301(c)(7)(i) stating that the State may contract with other entities to perform activities described in § 441.301(c)(7) but retains responsibility for ensuring performance of and compliance with these provisions. The finalized requirement at § 441.301(c)(7)(i) will read: *Purpose.* The State must establish a procedure under which a beneficiary may file a grievance related to the State's or a provider's performance of the activities described in paragraphs (c)(1) through (6) of this section. This requirement does not apply to a managed care delivery system under the authority of sections 1915(a), 1915(b), 1932(a), or 1115(a) of the Act. The State may have activities described in paragraph (c)(7) of this section performed by contractors or other government entities, provided, however, that the State retains responsibility for ensuring performance of and compliance with these provisions.
- We are finalizing the definition of grievance at § 441.301(c)(7)(ii) with a technical modification, conforming with the modification at § 441.301(c)(7)(i), to specify that a grievance will mean an expression of dissatisfaction or complaint related to the State's or a provider's performance of (rather than **compliance with**) the activities described in paragraphs (c)(1) through (6), regardless of whether remedial action is requested. (New language identified in bold.) We are finalizing the definition of grievance system at § 441.301(c)(7)(ii) as proposed.
- We are finalizing the process requirement at § 441.301(c)(7)(iii)(A) as proposed, with the following exceptions. We are finalizing § 441.301(c)(7)(iii)(A)(*1*) with modification to specify that another individual or entity may file a grievance on behalf of the beneficiary, or provide the beneficiary with assistance or representation throughout the grievance process, with the written consent of the beneficiary or authorized representative. The finalized requirement at § 441.301(c)(7)(ii)(A)(*1*) will read: Another individual or entity may file a grievance on behalf of the beneficiary, or provide the beneficiary with assistance or representation throughout the grievance process, with the written consent of the beneficiary or authorized representative. We are finalizing § 441.301(c)(7)(iii)(A)(*2*) as proposed.
- We are finalizing the process requirement at § 441.301(c)(7)(iii)(B) as proposed.
- We are finalizing § 441.301(c)(7)(iii)(B)(*1*) with a modification to correct an erroneous reference to subchapter by replacing subchapter with paragraph (c)(7).
- We are finalizing the process requirements at § 441.301(c)(7)(iii)(B)(*2*) with a modification to specify that States must provide beneficiaries with reasonable assistance in ensuring grievances are appropriately filed with the grievance system. We are also finalizing § 441.307(c)(7)(iii)(B)(2) with modifications to change the term ''individuals who are limited English proficient'' to ''individuals with Limited English Proficiency.'' We are also finalizing with modification to clarify that auxiliary aids and services are to be available where necessary to ensure effective communication. As finalized, § 441.301(c)(7)(iii)(B)(2) specifies that States must provide beneficiaries reasonable assistance in ensuring grievances are appropriately filed with the grievance system, completing forms, and taking other procedural steps related to a grievance. This includes, but is not limited to, ensuring the grievance system is accessible to individuals with disabilities and to provide meaningful access to individuals with Limited English Proficiency, consistent with § 435.905(b) of this chapter, and includes auxiliary aids and services

where necessary to ensure effective communication, such as providing interpreter services and toll-free numbers that have adequate TTY/TTD and interpreter capability.

- We are finalizing the process requirement at § 441.301(c)(7)(iii)(B)(3) with modifications to require that States ensure that punitive or retaliatory action (rather than just punitive actions) is neither threatened nor taken against an individual filing a grievance or who has had a grievance filed on their behalf. The finalized requirement at § 441.301(c)(7)(iii)(B)(3) will read: Ensure that punitive or retaliatory action is neither threatened nor taken against an individual filing a grievance **or who has had a grievance filed on their behalf**. (New language identified in bold.)
- We are finalizing the process requirement § 441.301(c)(7)(iii)(B)(4) with a modification to remove the reference to expedited grievances. The finalized requirements at § 441.301(c)(7)(iii)(B)(4) will read: Accept grievances and requests for extension of timeframes from the beneficiary.
- We are finalizing the process requirements at § 441.301(c)(7)(iii)(B)(5) with a modification to change mention of individuals who are limited English proficient to individuals with Limited English Proficiency.
- We are finalizing the process requirements at § 441.301(c)(7)(iii)(B)(6) and (7) as proposed.
- We are finalizing the requirements at § 441.301(c)(7)(iii)(C)(*4*) and (*5*) with a modification to replace the reference to § 441.301(c)(7)(v)(B)(1) and (2) and adding a reference to § 441.301(c)(7)(v). We are also finalizing § 441.301(c)(7)(iii)(C)(5) with a modification to change the reference to 45 CFR 164.510(b) to a broader reference to the HIPAA Privacy Rule (45 CFR part 160 and part 164 subparts A and E).
- Aside from the modifications noted previously to § 441.301(c)(7)(iii)(C)(*4*) and (5), we are finalizing § 441.301(c)(7)(iii)(C) as proposed, with minor formatting changes.
- We are finalizing the filing timeframe requirement at § 441.301(c)(7)(iv) with modifications by removing the expedited resolution requirement at § 441.301(c)(7)(iv)(B) and redesignating § 441.301(c)(7)(iv)(A) as § 441.301(c)(7)(iv). The finalized requirement at 441.301(c)(7)(iv) will read: *Filing timeframes.* A beneficiary may file a grievance at any time.
- We are finalizing the resolution and notification requirement at § 441.301(c)(7)(v)(A) with a modification to require that the State resolve each grievance, and provide notice, as expeditiously as the beneficiary's health condition (instead of health, safety, and welfare) requires. The finalized requirement at § 441.301(c)(7)(v)(A) will read: *Basic rule.* The State must resolve each grievance, and provide notice, as expeditiously as the beneficiary's health condition requires, within State-established timeframes that may not exceed the timeframes specified in this section.
- We are not finalizing the expedited resolution timeframe at § 441.301(c)(7)(v)(B)(*2*). Instead, we are redesignating § 441.301(c)(7)(v)(B)(*1*) as § 441.301(c)(7)(v)(B) and retitling § 441.301(c)(7)(v)(B) as ''Resolution timeframes.'' We are also removing the word ''standard'' from § 441.301(c)(7)(v)(B). The finalized requirement at § 441.301(c)(7)(v)(B) will read: *Resolution timeframes.* For resolution of a grievance and notice to the affected parties, the timeframe may not exceed 90 calendar days from the day the State receives the grievance. This timeframe may be extended under paragraph (c)(7)(v)(C) of this section.
- We are finalizing the timeframe extension requirement at § 441.301(c)(7)(v)(C) and (D) without substantive changes. We are finalizing § 441.301(c)(7)(v)(C) with a technical modification to redesignate paragraphs (C)(*1*)(i) and (C)(*1*)(ii) as (C)(*1*) and (C)(*2*), respectively. We are finalizing § 441.301(c)(7)(v)(D) as proposed, but with a technical modification to change the periods at the end of § 441.301(c)(7)(v)(D)(*1*) and (*2*) to semi-colons, and adding ''and'' at the end of § 441.301(c)(7)(v)(D)(*2*).
- We are finalizing the notice format requirement at § 441.301(c)(7)(vi)(A) without substantive modification. However, we are not finalizing the proposal relating to the expedited resolution process at § 441.301(c)(7)(vi)(B). Therefore, we are redesignating § 441.301(c)(7)(vi)(A) as § 441.301(c)(7)(vi).
- We are finalizing the recordkeeping requirements at § 441.301(c)(7)(vii) without substantive modifications. However, we are finalizing § 441.301(c)(7)(viii)(B)(*1*) through (*5*) with semi-colons rather than periods at the end of each paragraph, and with the word ''and'' at the end of § 441.301(c)(7)(vii)(B)(*5*).
- We are finalizing the applicability date requirements at § 441.301(c)(7)(viii) to specify that States must comply with the requirement at paragraph (c)(7) beginning 2 years from the effective date of this final rule.

Additionally, we are finalizing the application of the grievance process requirements at § 441.301(c)(7) to section 1915(j), (k) and (i) authorities as follows:

- For application to section 1915(j) services, we are not finalizing a reference at § 441.464(d)(2)(v), as we had proposed, but rather finalizing a new requirement at § 441.464(d)(5) that specifies that States must implement and maintain a grievance process in accordance with § 441.301(c)(7), except that the references to section 1915(c) of the Act are instead references to section 1915(j) of the Act.
- For application to section 1915(k) services, we are not finalizing a reference at § 441.555(b)(2)(iv), as we had proposed, but rather finalizing a new requirement at § 441.555(e) that specifies that States must implement and maintain a grievance process in accordance with § 441.301(c)(7), except that the references to section 1915(c) of the Act are instead references to section 1915(k) of the Act.
- For application to section 1915(i) services, we are finalizing a new § 441.745(a)(1)(iii) with modification to clarify that the State must maintain a grievance process in accordance with § 441.301(c)(7), except that the references to section 1915(c) of the Act are instead references to section 1915(i) of the Act. We are redesignating the existing § 441.745(a)(1)(iii) as § 441.745(a)(1)(iv).

3. Incident Management System (§§ 441.302(a)(6), 441.464(e), 441.570(e), 441.745(a)(1)(v) and 441.745(b)(1)(i))

Section 1902(a)(19) of the Act requires States to provide safeguards as may be necessary to assure that eligibility for care and services will be determined, and that such care and services will be provided, in a manner consistent with simplicity of administration and the best interests of the recipients. Section 1915(c)(2)(A) of the Act and current Federal regulations at § 441.302(a) require that States have in place necessary safeguards to protect the health and welfare of individuals receiving section 1915(c) waiver program services. Further, as discussed previously in section II.B.1. of this rule, section 2402(a) of the Affordable Care Act requires the Secretary of HHS to ensure that all States receiving Federal funds for HCBS, including Medicaid, develop HCBS systems that are responsive to the needs and choices of beneficiaries receiving HCBS, maximize independence and self-direction, provide support and coordination to assist with a community-supported life, and achieve a more a more consistent

and coordinated approach to the administration of policies and procedures across public programs providing HCBS.[61] Among other things, section 2402(a)(3)(B)(ii) of the Affordable Care Act requires development and oversight of a system to qualify and monitor providers.

As noted earlier in section II.B.1. of this rule, we released guidance for section 1915(c) waiver programs included in the 2014 guidance,[62] which noted that States should report on State-developed performance measures to demonstrate that they meet six assurances, including a Health and Welfare assurance for States to demonstrate that they have designed and implemented an effective system for assuring waiver participant health and welfare. Specifically, the 2014 guidance highlighted, related to the Health and Welfare assurance, the following:

- The State demonstrates on an ongoing basis that it identifies, addresses, and seeks to prevent instances of abuse, neglect, exploitation, and unexplained death;
- The State demonstrates that an incident management system is in place that effectively resolves incidents and prevents further similar incidents to the extent possible;
- The State's policies and procedures for the use or prohibition of restrictive interventions (including restraints and seclusion) are followed; and
- The State establishes overall health care standards and monitors those standards based on the responsibility of the service provider as stated in the approved waiver.

Consistent with the expectations for other performance measures, the 2014 guidance noted that States should conduct systemic remediation and implement a Quality Improvement Project when they score below 86 percent on any of their Health and Welfare performance measures.

Despite States implementing these statutory and regulatory requirements to protect the health and welfare of individuals receiving section 1915(c) waiver program services, and States' adherence to related subregulatory guidance, there have been notable and high-profile instances of abuse and neglect in recent years that highlight the risks associated with poor quality care and with inadequate oversight of HCBS in Medicaid. For example, a 2018 report, ''Ensuring Beneficiary Health and Safety in Group Homes Through State Implementation of Comprehensive Compliance Oversight,'' [63] (referred to as the Joint Report, developed by ACL, OCR, and the OIG), found systemic problems with health and safety policies and procedures being followed in group homes and that failure to comply with these policies and procedures left beneficiaries in group homes at risk of serious harm.

In addition, in 2016 and 2017, OIG released several reports on their review of States' compliance with Federal and State requirements regarding critical incident reporting and monitoring.[64] [65] [66] OIG found that several States did not comply with Federal waiver and State requirements for reporting and monitoring critical incidents involving individuals receiving HCBS through waivers. In particular, the reports indicated that:

- Critical incidents were not reported correctly;
- Adequate training to identify appropriate action steps for reported critical incidents or reports of abuse or neglect was not provided to State staff;
- Appropriate data sets to trend and track critical incidents were not accessible to State staff; and
- Critical incidents were not clearly defined, making it difficult to identify potential abuse or neglect.

In 2016, we conducted three State audits based at least in part on concerns regarding health and welfare and media coverage on abuse, neglect, or exploitation issues.[67] We found that these three States had not been meeting their section 1915(c) waiver assurances, similar to findings reported by the OIG. In two cases, for the incidents of concern, tracking and trending of critical incidents were not present. Further, in at least two of the States, staffing at appropriate levels was identified as an issue.

In January 2018, the United States Government Accountability Office (GAO) released a report on a study of 48 States that covered assisted living services.[68] The GAO found large inconsistencies between States in their definition of a critical incident and their system's ability to report, track, and collect information on critical incidents that have occurred. States also varied in their oversight methods, as well as the type of information they were reviewing as part of this oversight. The GAO recommended that requiring States to report information on incidents (such as the type and severity of incidents and the number of incidents) would strengthen the effectiveness of State and Federal oversight.

In July 2019, we issued a survey to States that operate section 1915(c) waivers, requesting information on their approach to administering incident management systems. The goal of the survey was to obtain a comprehensive understanding of how States organize their incident management system to best respond to, resolve, monitor, and prevent critical incidents in their waiver programs. The survey found that:

- Definitions of critical incidents vary across States and, in some cases, within States for different HCBS programs or populations;
- Some States do not use standardized forms for reporting incidents, thereby impeding the consistent collection of information on critical incidents;
- Some States do not have electronic incident management systems, and, among those that do, many use systems with outdated electronic platforms that are not linked with other State systems, leading to the systems operating in silos and the need to consolidate information across disparate systems; and
- Many States cited the lack of communication within and across State agencies, including with investigative agencies, as a barrier to incident resolution.

Additionally, during various public engagement activities conducted with interested parties over the past several years, we have heard that ensuring access to HCBS requires that we must first ensure health and safety systems are in place across all States, a theme underscored by the Joint Report.

a. Incident Management System Requirements (§ 441.302(a)(6))

Based on these findings and reports, under the authorities at sections 1902(a)(19) and 1915(c)(2)(A) of the Act and section 2402(a)(3)(B)(ii) of the Affordable Care Act, we proposed a new requirement at § 441.302(a)(6) to require that States provide an assurance that they operate and maintain an incident management system that identifies, reports, triages, investigates, resolves, tracks, and trends critical incidents. This proposal is intended to ensure standardized requirements for States regarding incidents that harm or place a beneficiary at risk of harm and is based on our experience working with States as part of the section 1915(c) waiver program and informed by the incident management survey described previously in this section of the final rule. In the absence of an incident management system, people receiving section 1915(c) waiver program services are at risk of preventable or intentional harm. As such, we believe that such a system to identify and address incidents of abuse, neglect, exploitation, or other harm during the course of service delivery is in the best interest of and necessary for protecting the health and welfare of individuals receiving section 1915(c) waiver program services. We proposed similar requirements for section 1915(i), (j) and (k) HCBS programs at §§ 441.464(e), 441.570(e), 441.745(a)(1)(v), and 441.745(b)(1)(i); these are discussed further in section II.B.3.i of this final rule.

We received public comments on these proposals. The following is a summary of the comments we received and our responses.

Comment: Many commenters supported the proposal at § 441.302(a)(6) to require States to provide an assurance that they operate and maintain an incident management system that identifies, reports, triages, investigates, resolves, tracks, and trends critical incidents. Additionally, these commenters noted that the proposed requirements for this incident management system can ensure States standardize data and processes for critical incident monitoring, identify trends, and influence timely oversight of responses to incidents to minimize health and safety risks for beneficiaries receiving HCBS.

Several commenters stated that establishing an incident management system, including requirements for data-driven analytics and trend reporting, would help to better inform States and providers by creating new collaborative models to measure improvements to better ensure quality of life for HCBS beneficiaries. In the same vein, one commenter noted that States should use the data and information collected on critical incidents to develop strategies to reduce or eliminate the risk of abuse, neglect, or exploitation; to enable discovery of root cause for occurrence of critical incidents; and to identify actions to influence critical incidents proactively, instead of reactively.

Response: We appreciate the support for our proposal and agree that requiring States to provide an assurance that they operate and maintain an incident management system that identifies, reports, triages, investigates, resolves, tracks, and trends critical incidents will ensure that States are better informed and more able to identify root causes for the occurrence of critical incidents, enabling them to act more proactively to influence and prevent the occurrence of such incidents.

Comment: A few commenters requested we clarify how States can fully address critical incidents for dually eligible beneficiaries who are enrolled in managed care plans, when the managed care plan does not have access to Medicare claims data. In the same vein, they were also concerned that States would require extensive resources to utilize the Medicare claims data.

These commenters also requested clarification on the feasibility of reporting across Medicare and Medicaid in dual eligible special needs plan (D–SNP) contracts.

Response: Since 2011, we have provided States access to Medicare data for dually-eligible beneficiaries, including for beneficiaries in different categories of dual eligibility, free-of-charge via the Medicare-Medicaid Data Sharing Program.[69] Information on the Medicare-Medicaid Data Sharing Program, including how to request data and the standard data sharing agreements, is available through the State Data Resource Center.[70]

We proposed that the incident management system requirements, as specified at § 441.302(a)(6) and as finalized in this rule, will apply to section 1915(c)(i), (j), and (k) services delivered through managed care plans. We also note that dually eligible beneficiaries enrolled in managed care plans known as fully integrated dual eligible special needs plans (FIDE SNP) and highly integrated dual eligible special needs plans (HIDE SNP), are subject to the incident management requirements at § 441.302(a)(6) as finalized. We will provide technical assistance regarding the application of these requirements to beneficiaries in different categories of dual eligibility.

Comment: A few commenters expressed concern that the requirements we proposed for this incident management system generally seemed to be more focused on documentation of critical incidents, rather than impacting quality and outcomes for HCBS participants to ensure optimal health and welfare. One commenter recommended that States should assure that resolution of critical incidents focuses on preventing harm to the HCBS participant(s) involved in the critical incident. This commenter also suggested that States should take actions to not only prevent further harm to HCBS participant(s) involved in a critical incident, but actions based on the critical incident should be taken to prevent further harm to all HCBS participants.

Response: We believe the requirements we proposed at § 441.302(a)(6), and as finalized in this rule, give States the flexibility to decide how to design and implement their incident management system. We encourage States to consider implementing quality improvement processes as part of their incident management systems, as quality improvement processes can help States to promote the health and welfare of beneficiaries by addressing systemic issues in their HCBS programs. We also note that the purpose of tracking and trending critical incidents is to assist States in understanding patterns that require interventions to promote improvement and prevent the recurrence of harm to beneficiaries.

We also refer readers to the requirements currently set forth at § 438.330(b)(5)(ii) that MCOs, PHIPs, and PAHPs participate in efforts by the State to prevent, detect, and remediate critical incidents, consistent with assuring beneficiary health and welfare as required in § 441.302 and § 441.703(a). Further, as noted herein, the six assurances and related

[69] See Medicare-Medicaid Data Sharing Program at *https://www.cms.gov/Medicare-Medicaid-Coordination/Medicare-and-Medicaid-Coordination/Medicare-Medicaid-Coordination-Office/StateAccesstoMedicareData.*

[70] See State Data Resource Center at *https://www.statedataresourcecenter.com/home/contact-us.*

subassurances for section 1915(c) waiver programs, including the Health and Welfare assurance, as set forth in the 2014 guidance, continue to apply. In addition, as discussed in section II.B.8. of this final rule, the HCBS Quality Measure Set reporting requirements include requirements for States to implement quality improvement strategies in their HCBS programs; while the HCBS Quality Measure Set requirements being finalized in this rule are distinct and severable from the incident management requirements being finalized at § 441.302(a)(6), we believe the HCBS Quality Measure Set requirements support the quality improvement objectives described by this commenter.

After consideration of these public comments, we are finalizing our proposal to require at § 441.302(a)(6) that States must provide an assurance that the State operates and maintains an incident management system that identifies, reports, triages, investigates, resolves, tracks, and trends critical incidents as proposed.

b. Critical Incident Definition (§ 441.302(a)(6)(i)(A))

At § 441.302(a)(6)(i)(A) through (G), we proposed new requirements for States' incident management systems. Specifically, at § 441.302(a)(6)(i)(A), we proposed to establish a standard definition of a critical incident to include, at a minimum, verbal, physical, sexual, psychological, or emotional abuse; neglect; exploitation including financial exploitation; misuse or unauthorized use of restrictive interventions or seclusion; a medication error resulting in a telephone call to or a consultation with a poison control center, an emergency department visit, an urgent care visit, a hospitalization, or death; or an unexplained or unanticipated death, including but not limited to a death caused by abuse or neglect.

We proposed the Federal minimum standard definition of a critical incident at § 441.302(a)(6)(i)(A) to address the lack of a standardized Federal definition for the type of events or instances that States should consider a critical incident that must be reported by a provider to the State and considered for an investigation by the State to assess whether the incident was the result of abuse, neglect, or exploitation, and whether it could have been prevented. The definition we proposed at § 441.302(a)(6)(i)(A) is based on internal analyses of data and information obtained through a CMS survey of States' incident management systems, commonalities across definitions, and common gaps in States' definitions of critical incidents (for instance, that many States do not consider sexual assault to be a critical incident).

We also requested comment on whether there are specific types of events or instances of serious harm to section 1915(c) waiver participants, such as identity theft or fraud, that would not be captured by the proposed definition and that should be included, and whether the inclusion of any specific types of events or instances of harm in the proposed definition would lead to the overidentification of critical incidents.

We received public comments on these proposals. The following is a summary of the comments we received and our responses.

Comment: Several commenters supported the proposed minimum standard definition of a critical incident. Commenters expressed that the proposed requirements at § 441.302(a)(6)(i)(A) establish a minimum Federal definition of a critical incident which would help to standardize practices across States and HCBS programs to better serve and prevent harm or risk of harm for beneficiaries. A few commenters noted the standardized Federal minimum definition of a critical incident will increase consistency across States, section 1915(c) waivers, and HCBS programs. A few commenters suggested CMS further explain the critical incident definition to minimize misinterpretation, stating that explanations of definitions for each type of critical incident could ensure reporting is uniform and consistent across all State programs and services. These commenters stated that without a uniform understanding of each type of critical incident, critical incidents could be over or under reported. Similarly, several other commenters suggested that the definition of critical incident we proposed is overly broad, expressing it could impede the State's coordination with other agencies and interested parties. These commenters indicated that more explanation of the definitions of critical incident at § 441.302(a)(6)(i)(A) could help to address varying interpretations in implementation of the proposed requirements, noting that each State Medicaid agency or interested parties could independently establish meaning.

Response: We disagree with commenters that the proposed definition of critical incident is overly broad. We believe that the proposed requirements at § 441.302(a)(6)(i)(A) provide States with a comprehensive minimum standard definition of a critical incident. We recommend that States view the definition as a minimum Federal standard. States may consider expanding the definition to include other health and safety concerns based on the unique needs of their HCBS populations and the specific characteristics of their HCBS programs. We plan to provide technical assistance, as needed, to States if they have questions about the types of incidents that should be included in the standardized definition, and how this definition relates to existing critical incident definitions already in use.

Comment: Commenters responded to our request for comment on whether there were specific types of events or instances of serious harm that would not be captured by the proposed critical incident definition and should be included. A few commenters suggested that we broaden the definition of critical incident and suggested that the following types of incidents be included in the proposed definition of critical incident at § 441.302(a)(6)(i)(A): abuse between HCBS waiver housemates; expression of racism, sexism, homophobia, or transphobia by a provider toward a beneficiary; lack of direct care workers; physical or emotional harm suffered by participant; falls with severe or moderate injury/illness; missed or delayed provision of services identified in the person-centered plan; refusal of service; self-neglect; and a range of harmful things beneficiaries may experience.

Alternatively, a few commenters recommended that CMS not expand the minimum definition of critical incident further, indicating the critical incident definition offers flexibility to States to expand their critical incident definition to fit the HCBS program and population served by the State. Commenters expressed that CMS should provide technical assistance, for all States, including for States that already have an incident management system with critical incident definitions and policies and programs in place.

Response: We appreciate commenters sharing these suggestions. We note that many of these types of events would be captured by the minimum standard definition. For instance, we would consider abuse between HCBS waiver housemates to fall under verbal, physical, sexual, psychological, or emotional abuse. Similarly, expressions of racism, sexism, homophobia, or transphobia by a provider toward a beneficiary may be considered a critical incident. If a lack of direct care workers, a refusal of service, or missed or delayed provision of services identified in the person-centered service plan results in

harm or risk of risk from the failure of a provider to deliver needed services, we would expect a State to consider those events as instances of neglect. Physical or emotional harm suffered by a participant as a result of one or more types of events included in our definition of critical incidents or that results in death would also be captured as a critical incident. Falls with severe or moderate injury/illness may be considered critical incidents depending on whether they occur as a result of an event included in our definition of critical incidents. They would also be considered critical incidents if they result in death. Some of these events, such as missed or delayed provision of services identified in the person-centered service plan, could also meet the definition of a grievance and be appropriate for consideration under the grievance system, which we are finalizing as part of a separate provision in § 441.301(c)(7) (discussed in section II.B.2 of this rule.)

We decline to include refusing a service or self-neglect in the minimum standard definition because we intend this definition to focus on incidents that occur during the course of service delivery. However, States may include these events in their own definitions.

We are unsure what the commenter intended by ''range of harmful things beneficiaries may experience'' and are unable to respond directly to that recommendation.

We appreciate these comments and will take this feedback into consideration when developing resources for States on the incident management system's requirements.

Comment: One commenter stated that we should consider whether what constitutes a critical incident might differ between adult and child beneficiaries and recommended that pediatricians could assist States in development and implementation of incident management requirements, including critical incident requirements. This commenter also stated that data and information for children receiving HCBS and housed in pediatric health systems should be linked with the State electronic critical incident system proposed at § 441.302(a)(6)(i)(B).

Response: As previously discussed, our proposal is to establish a minimum Federal definition, and States may consider expanding the definition to include other health and safety concerns based on the unique needs of their HCBS populations. We also encourage States to include input from interested parties, including experts in children receiving HCBS, when developing and implementing their incident management systems and policies and procedures to meet the proposed requirements. We discuss requirements for data and information sharing and electronic systems in more detail below in this section II.B.3. of the rule.

Comment: Several commenters provided feedback about the inclusion of medication errors resulting in a telephone call to or a consultation with a poison control center in the proposed critical incident definition at § 441.302(a)(6)(i)(A)(*5*). One commenter expressed support for the reporting of a medication error resulting in a telephone call to or a consultation with a poison control center, and agreed they should be reported by the provider to the State. Another commenter expressed that beneficiaries receiving HCBS are encouraged to be independent and have the right to self-determination, and completing investigations on medication errors could be infringing upon HCBS beneficiaries' self-determination. One commenter requested we consider that managed care plans do not typically receive member data from poison control centers unless they are contracted with the managed care plan to provide this notification, making it difficult to track incidents that result in a consultation with the poison control center unless this data is captured elsewhere in member claims data. One commenter expressed concern that including a medication error in the definition of critical incidents could be problematic since not all providers who serve HCBS beneficiaries are clinical staff who can render a professional clinical determination of medication error, which could result in medication errors being over or under reported and skew data reports.

Response: We plan to provide States with technical assistance to help address issues raised by providers in reporting any critical incidents that occur during the delivery of services as specified in a beneficiary's person-centered service plan, or any critical incidents that are a result of the failure to deliver authorized services, including medication errors resulting in a telephone call to or a consultation with a poison control center. Because we also are finalizing § 441.302(a)(6)(i)(C) as described in II.B.3.d. of this rule, we confirm that States must require providers to report to them any critical incidents that occur during the delivery of services as specified in a beneficiary's person-centered service plan, or any critical incidents that are a result of the failure to deliver authorized services. As such, a provider would be expected to report a medication error resulting in a contact with a poison control center if the medication error occurred during the delivery of services or a result of the failure to deliver services. We believe that such a system to identify and address incidents of abuse, neglect, exploitation, or other harm during the course of service delivery is in the best interest of and necessary for protecting the health and welfare of individuals receiving HCBS.

Comment: One commenter requested that CMS clarify that in addition to audio-only telephone, that the use of audio or video technology be made acceptable to satisfy the requirement proposed at § 441.302(a)(6)(i)(A)(*5*) that the State adopt the minimum standard definition for critical incident for a medication error resulting in contact with a poison control center.

Response: We do not have the authority to define additional communication types or consultation methods for poison control centers. We decline to add ''use of audio or video technology'' to the requirement proposed at § 441.302(a)(6)(i)(A)(*5*). We encourage States to collaborate with their State and local poison control centers to understand the types of consultation that are acceptable and make requests for additional communication types or consultation methods for poison control centers.

Comment: Several commenters responded to our solicitation to comment on whether the proposed critical incident definition at § 441.302(a)(6)(i)(A) should include other specific types of events or instances of serious harm to beneficiaries receiving HCBS, such as identity theft or fraud. Most commenters responding to the request for comment recommended that CMS not expand the critical incident definition to include identity theft or fraud, noting it could create duplication of existing investigative and reporting processes. Alternatively, a few commenters supported the inclusion of identity theft and fraud in the critical incident definition. One commenter recommended that CMS provide additional guidance on identity theft or fraud in the context of exploitation, including financial exploitation if added to the minimum critical incident definition. One commenter expressed concern with including identity theft or fraud in the proposed critical incident definition, except when the individual has been formally and legally judged incompetent to make relevant decisions.

Response: We agree with commenters that expanding the critical incident definition at § 441.302(a)(6)(i)(A) to include identity theft or fraud could

create duplication of existing Federal investigative agencies and reporting processes. Therefore, we have not identified a compelling reason to add other types of incidents, such as identity theft or fraud, to the standardized minimum definition of critical incidents we proposed and are finalizing in this rule.

Comment: One commenter specifically responded to the request for comment soliciting whether the proposed critical incident definition at § 441.302(a)(6)(i)(A) includes any specific types of events or instances of harm that would lead to the overidentification of critical incidents. The commenter supported the proposed definition, noting it would not result in overidentification of critical incidents. This commenter noted that, although the events included in the critical incident definition they use are not the same as those in the proposed critical incident definition at § 441.302(a)(6)(i)(A), they believed that the proposed definition would not cause overidentification of critical incidents because their policies require any incident, not solely those that are defined, to be reported.

Response: We appreciate the support for our proposal.

After consideration of these public comments, we are finalizing § 441.302(a)(6)(i)(A) as proposed with the following minor modifications: a minor formatting modification at § 441.302(a)(6)(i)(A)(3) to correct an improper italicization; a minor technical modification at § 441.302(a)(6)(i)(A)(5) to correct missing punctuation; and a minor formatting modification to conclude § 441.302(a)(6)(i)(A)(6) with a semi-colon.

c. Electronic Critical Incident Systems (§ 441.302(a)(6)(i)(B))

At § 441.302(a)(6)(i)(B), we proposed that States must have electronic critical incident systems that, at a minimum, enable electronic collection, tracking (including of the status and resolution of investigations), and trending of data on critical incidents. We also solicited comment on the burden associated with requiring States to have electronic critical incident systems and whether there is specific functionality, such as unique identifiers, that should be required or encouraged for such systems. As part of our proposal, we also encouraged, but did not propose to require, States to advance the interoperable exchange of HCBS data and support quality improvement activities by adopting standards in 45 CFR part 170 and other relevant standards identified in the Interoperability Standards Advisory (ISA).[71]

We received public comments on these proposals. Below is a summary of the public comments we received and our responses.

Comment: Several commenters supported the proposed requirements at § 441.302(a)(6)(i)(B), that a State have an electronic critical incident system that, at a minimum, enables electronic collection, tracking (including of the status and resolution of investigations), and trending of data on critical incidents. A few commenters expressed concern about the impact of the proposed requirements on States that already have multiple incident management systems, including electronic systems, for different programs, administered by different operating agencies. Commenters requested that we allow States flexibility to design the electronic critical incident systems, which we proposed to require at § 441.302(a)(6)(i)(B), by taking into account existing State incident management systems and processes which fit their unique program and systems structures. A few commenters were especially concerned about the impact on States that already enable electronic collection of critical incidents and questioned whether a single incident management system is required to be implemented across all waivers and authorities, or whether a separate system can be implemented for each waiver or program. Commenters expressed concern about having to consolidate current incident management systems, designed based on State infrastructure, into a single electronic system.

Response: We acknowledge that some States currently have electronic incident management systems in place for HCBS, and it is not our intent for States to abandon these systems. We encourage States to build upon existing incident management system infrastructure and protocols to meet the electronic critical incident systems requirements we proposed at § 441.302(a)(6)(i)(B) and are finalizing in this rule.

We believe that a single electronic critical incident system may best enable the State to prevent the occurrence of critical incidents and protect the health and safety of beneficiaries across their lifespan. For example, in the absence of a single electronic critical incident system, States may have more difficulty developing and implementing a comprehensive plan to address and resolve critical incidents across HCBS programs and authorities. A single electronic incident management system could also better enable the State to track critical incidents for providers that deliver services in multiple HCBS programs or under different HCBS authorities, identify systemic causes of critical incidents, or detect patterns of preventable critical incidents and, in turn, implement strategies to more effectively prevent critical incidents.

We assume that some States may need to make at least some changes to their existing systems to fully comply with the requirements at § 441.302(a)(6)(i)(B). We have attempted to provide the State with as much flexibility as possible in the design of their incident management system. As such, the State may opt to maintain multiple systems that comply with the requirements at § 441.302(a)(6).

We encourage each State to consider developing a single electronic critical incident system for all of their HCBS programs under section 1915(c), (i), (j), and (k) authorities.

However, if a State chooses to implement multiple systems, we strongly encourage the State to share data among those systems to enable the development and implementation of a comprehensive plan to address and resolve critical incidents for HCBS beneficiaries and track and trend incidents for specific providers. We note that the State is responsible for ensuring compliance with the requirements of applicable Federal or State laws and regulations governing confidentiality, privacy, and security of certain information and records.

Comment: Several commenters recommended that CMS consider providing additional funding opportunities to assist States in the development and implementation of electronic critical incident systems we proposed to require at § 441.302(a)(6)(i)(B).

Response: As noted in the proposed rule (88 FR 27979), in Medicaid, enhanced Federal financial participation (FFP) is available at a 90 percent Federal Medical Assistance Percentage (FMAP) for the design, development, or installation of improvements of mechanized claims processing and information retrieval systems, in accordance with applicable

[71] Relevant standards adopted by HHS and identified in the ISA include the USCDI (*https://www.healthit.gov/isa/united-states-core-data-interoperability-uscdi*), eLTSS (*https://www.healthit.gov/isa/documenting-care-plans-person-centered-services*), *and Functional Assessment Standardized Items* (*https://www.healthit.gov/isa/representing-patient-functional-status-andor-disability*).

Federal requirements.[72] Enhanced FFP at a 75 percent FMAP is also available for operations of such systems, in accordance with applicable Federal requirements.[73] However, we reiterate that receipt of these enhanced funds is conditioned upon States meeting a series of standards and conditions to ensure investments are efficient and effective.[74]

Comment: A few commenters supported CMS encouraging States to advance the interoperable exchange of HCBS data by adopting standards in the Interoperability Standards Advisory (ISA), and requested we further promote, support, and incentivize the development of better interoperability infrastructure to facilitate more seamless data sharing between States, providers, and managed care plans.

Response: While we did not propose any specific requirements related to interoperability for the electronic incident management system, States should ensure the advancement of the interoperable exchange of HCBS data, to further improve the identification and reporting on the prevalence of critical incidents for HCBS beneficiaries to support quality improvement activities that can help promote the health and safety of HCBS beneficiaries. We clarify that, to receive enhanced FMAP funds, the State Medicaid agency is required at § 433.112(b)(12) to ensure the alignment with, and incorporation of, standards and implementation specifications for health information technology adopted by the Office of the National Coordinator for Health IT in 45 CFR part 170, subpart B, among other requirements set forth in § 433.112(b)(12). States should also consider adopting relevant standards identified in the Interoperability Standards Advisory (ISA) [75] to bolster improvements in the identification and reporting on the prevalence of critical incidents for HCBS beneficiaries and present opportunities for the State to develop improved information systems that can support quality improvement activities that can help promote the health and safety of HCBS beneficiaries.

Comment: A few commenters recommended CMS not require States to include additional specific functionalities, including unique identifiers.

Response: We agree with commenters to not require or encourage a specific functionality, such as unique identifiers.

After consideration of public comments received, we are finalizing our proposal to require at § 441.302(a)(6)(i)(B) that States use an information system, meeting certain requirements, for electronic data collection, tracking, and trending of critical incident data, as proposed, with minor modifications. We are finalizing § 441.302(a)(6)(i)(B) with the addition of the word ''enables'' and striking ''enables'' from § 441.302(a)(6)(i)(B)(*1*) so that it applies to all paragraphs in § 441.302(a)(6)(i)(B). We are finalizing minor formatting changes to conclude paragraphs (a)(6)(i)(B)(*2*) and (3) with semi-colons.

d. Provider Critical Incident Reporting—During Delivery of or Failure To Deliver Services (§ 441.302(a)(6)(i)(C))

At § 441.302(a)(6)(i)(C), we proposed that States must require providers to report to the State any critical incidents that occur during the delivery of section 1915(c) waiver program services as specified in a waiver participant's person-centered service plan, or any critical incidents that are a result of the failure to deliver authorized services. We believe that this proposed requirement will help to specify provider expectations for reporting critical incidents and to ensure that harm that occurs because of the failure to deliver services will be appropriately identified as a critical incident.

We received public comments on these proposals. The following is a summary of the comments we received and our responses.

Comment: A few commenters supported the requirement we proposed at § 441.302(a)(6)(i)(C) that a State must require providers to report to the State any critical incidents that occur during the delivery of services as specified in a beneficiary's person-centered service plan, or any critical incidents that are a result of the failure to deliver authorized services. One commenter expressed that requiring providers to report on any critical incidents that occur during service delivery, or as a result of the failure to deliver authorized services, encourages better, more transparent reporting and provides a more accurate reflection of the prevalence and types of critical incidents occurring in HCBS delivery. Another commenter noted missed or delayed services, especially a pattern of missed or delayed service appointments, can lead to poor health outcomes for beneficiaries.

Response: We appreciate the expressions of support for our proposal.

Comment: A few commenters raised concerns with the requirement we proposed at § 441.302(a)(6)(i)(C) that States require providers to report to them any critical incidents that occur during the delivery of section 1915(c) waiver program services as specified in a waiver participant's person-centered service plan, or as a result of the failure to deliver services authorized under a section 1915(c) waiver program and as specified in the waiver participant's person-centered service plan. One commenter expressed that this requirement would require reviewers of critical incidents to draw conclusions about the service provider's role, without taking into account a beneficiary's right to privacy, decision making, personal preferences, and autonomy, especially for beneficiaries who live in their own home and/or receive care from different providers. Another commenter expressed concern that, even after a thorough investigation, it is often impossible to definitively substantiate certain allegations of abuse or neglect or determine whether a negative outcome, such as a hospitalization, was the direct result of a critical incident that occurred during the delivery of services or as a result of the failure to deliver services as authorized. A commenter expressed concern that the requirement for providers to report to States any critical incidents that are a result of the failure to deliver authorized services is too broad and could cause critical incident reporting to be ineffective and inconsistent.

Response: We proposed requirements for States regarding the reporting of critical incidents by providers that we believe are important for identifying and addressing incidents of abuse, neglect, exploitation, or other harms that occur during the course of service delivery or as a result of the failure to deliver services. We note that the reporting of a critical incident does not necessarily mean that an action should be taken by the State in response to the critical incident. Further, even if no action is warranted or it is not possible to substantiate an allegation of abuse or neglect, it is still important to have the critical incident reported, and investigation conducted if appropriate, in case, for instance, a pattern later

[75] Relevant standards adopted by HHS and identified in the ISA include the USCDI (*https://www.healthit.gov/isa/united-states-core-data-interoperability-uscdi*), eLTSS (*https://www.healthit.gov/isa/documenting-care-plans-person-centered-services*), and Functional Assessment Standardized Items (*https://www.healthit.gov/isa/representing-patient-functional-status-andor-disability*).

emerges that indicates systemic causes of critical incidents or that warrants action by the State.

Comment: A few commenters suggested we modify § 441.302(a)(6) to specify that critical incident records be collected in accordance with applicable privacy laws, such as HIPAA and its implementing regulations.

Response: In consideration of public comments received, we have not identified a compelling reason, and therefore decline, to add a reference to specific privacy laws to the requirements at § 441.302(a)(6). We note that States have existing obligations to comply with applicable Federal and State laws and regulations governing confidentiality, privacy, and security of information, records, and data obtained and maintained in a critical incident system. We note that this regulatory requirement does not modify these obligations to comply with applicable laws.

Comment: One commenter suggested we require States to accept critical incident reports, and acknowledge receipt of the report, directly from beneficiaries or other interested parties, establish a process to accept such reports, and allow reports to be made orally or in writing. The commenter recommended that we should require that punitive action is neither threatened nor taken against any individual who makes a report in good faith.

Response: We decline to modify our proposal to broaden the requirements related to critical incidents we proposed at § 441.302(a)(6)(i)(C) in this final rule. Although we proposed to only require providers to report critical incidents at § 441.301(a)(6)(i)(C), the State is not precluded from accepting the reporting of critical incidents from others, who are not providers, including beneficiaries or other interested parties. We believe that our proposal that the State assure a system to identify and address incidents of abuse, neglect, exploitation, or other harm during the course of service delivery, or as a result of the failure to deliver services, is in the best interest of, and necessary for, protecting the health and welfare of beneficiaries receiving HCBS in section 1915(c) waiver programs and under section 1915(i), (j) and (k) State plan services.

We encourage States to include in their policies and procedures that beneficiaries would not be prohibited from reporting critical incidents and, in doing so, would be free from any punitive action when reporting a critical incident to the State. We have provided States with flexibility to establish their own policies and procedures related to addressing punitive actions against beneficiaries involved in the critical incident process.

After consideration of these public comments, we are finalizing our proposal at § 441.302(a)(6)(i)(C) with a modification to require providers to report to the State, within State-established timeframes and procedures, any critical incident that occurs during the delivery of services authorized under section 1915(c) of the Act and as specified in the **beneficiary's** (instead of waiver participant's) person-centered service plan, or occurs as a result of the failure to deliver services authorized under section 1915(c) of the Act and as specified in the **beneficiary's** (instead of waiver participant's) person-centered service plan. (New language identified in bold.) We are also finalizing § 441.302(a)(6)(i)(C) with minor formatting changes to conclude § 441.302(a)(6)(i)(C) with a semi-colon.

e. Data Sources To Identify Unreported Critical Incidents (§ 441.302(a)(6)(i)(D))

At § 441.302(a)(6)(i)(D), we proposed to require that States use claims data, Medicaid Fraud Control Unit data, and data from other State agencies such as Adult Protective Services or Child Protective Services to the extent permissible under applicable State law to identify critical incidents that are unreported by providers and occur during the delivery of section 1915(c) waiver program services, or as a result of the failure to deliver authorized services. We believe that such data can play an important role in identifying serious instances of harm to waiver program participants, which may be unreported by a provider, such as a death that occurs as a result of choking of an individual with a developmental disability residing in a group home, or a burn that occurs because a provider failed to appropriately supervise someone with dementia and that results in an emergency department visit.

We solicited comment on whether States should be required to use these data sources to identify unreported critical incidents, and whether there are other specific data sources that States should be required to use to identify unreported critical incidents.

We received public comments on these proposals. The following is a summary of the comments we received and our responses.

Comment: Several commenters expressed support for our proposal at § 441.302(a)(6)(i)(D). One commenter noted that these data sources could help establish pathways at the beneficiary and systems levels for reporting, tracking, and addressing issues with person-centered planning and provider noncompliance, and they will also advance efforts to ensure States' ongoing compliance with the HCBS Settings Rule. Another commenter approved of the requirement that States use data sources to identify unreported critical incidents, including claims data, Medicaid Fraud Control Unit data, and data from other State agencies such as Adult Protective Services or Child Protective Services to the extent permissible under applicable State law, expressing that implementation of this requirement could result in a more accurate reflection of the prevalence and types of critical incidents occurring in HCBS delivery, in working with managed care plans and providers.

Response: We appreciate the support for our proposal.

Comment: Two commenters requested that collaboration with police and law enforcement be included in the data sources under § 441.302(a)(6)(i)(D). One commenter noted CMS should require providers to report to law enforcement in a timely manner any reasonable suspicion of a crime committed against a beneficiary receiving HCBS. Another commenter recommended CMS require providers to report suspicion of a crime to law enforcement. A commenter also questioned whether an investigative agency includes law enforcement. Additionally, a few commenters also recommended that collaboration with the designated Protection & Advocacy (P&A) system for the State be included in the data sources under § 441.302(a)(6)(i)(D), citing that P&A systems have the authority to investigate incidents of abuse and neglect of individuals with developmental disabilities if the incidents are reported to the system or if there is probable cause to believe that the incidents occurred.

Response: While we intend that § 441.302(a)(6)(i)(D) establishes the minimum requirements for States to use certain data sources to detect unreported critical incidents, States retain flexibility to use additional data sources, such as police and law enforcement data and P&A systems, to identify critical incidents that are unreported by providers. However, we decline to include additional data sources in the regulation at this time. We are concerned that it would be difficult for States to use non-Medicaid data sources, such as data from P&A systems and law enforcement records, to effectively identify unreported critical incidents for Medicaid beneficiaries and that such requirements would be administratively and operationally

burdensome for States to implement. At § 441.302(a)(6)(i)(D), we proposed to require that States use claims data, Medicaid Fraud Control Unit data, and data from other State agencies to the extent permissible under applicable State law to identify critical incidents that are unreported by providers and occur during the delivery of section 1915(c) waiver program services, or as a result of the failure to deliver authorized services, identifying Adult Protective Services or Child Protective Services as examples of State agencies. We encourage the State to include additional State agency data sources to detect unreported critical incidents as defined at § 441.302(a)(6)(i)(D) as appropriate.

Comment: A couple commenters stated that CMS should direct States to take definitive enforcement actions to address provider compliance with the incident management requirements. One commenter proposed to penalize HCBS providers that do not timely report critical incidents by imposing monetary penalties or suspension from the Medicaid program. Another commenter recommended that we allow States to implement an escalation of remedies to address provider reporting, up to and including a separate investigation with sanctions, if necessary.

Response: We reiterate that States already have broad authority to create penalties, whether monetary or non-monetary, for providers that have violated their obligations as set forth by the State Medicaid program.

After consideration of public comments we received, we are finalizing our proposal at § 441.302(a)(6)(i)(D), with a modification to require providers to report to the State, within State-established timeframes and procedures, any critical incident that occurs during the delivery of services authorized under section 1915(c) of the Act and as specified in the **beneficiary's** (instead of waiver participant's) person-centered service plan, or occurs as a result of the failure to deliver services authorized under section 1915(c) of the Act and as specified in the **beneficiary's** (instead of waiver participant's) person-centered service plan. (New language identified in bold.) We are also finalizing § 441.302(a)(6)(i)(D) with minor formatting changes to conclude § 441.302(a)(6)(i)(D) with a semi-colon.

f. Critical Incident Data Sharing (§ 441.302(a)(6)(i)(E))

At § 441.302(a)(6)(i)(E), we proposed States share information, consistent with the regulations in 42 CFR part 431, subpart F on the status and resolution of investigations. We set the expectation that data sharing could be accomplished through the use of information sharing agreements with other entities in the State responsible for investigating critical incidents if the State refers critical incidents to other entities for investigation.

We received public comments on these proposals. The following is a summary of the comments we received and our responses.

Comment: Several commenters recommended CMS provide technical assistance related to the data sharing requirements. Commenters noted data sharing barriers in and between the State, agencies, and divisions within in the same agency, influencing successful implementation of the proposed requirements at § 441.302(a)(6)(i)(G).

Response: We appreciate these comments identifying the need for technical assistance related to data and information sharing agreements. We will take this feedback into consideration when developing resources for States on the incident management system requirements.

Further, we generally note that the State is responsible for ensuring its critical incident system(s) comply with all applicable Federal and State laws and regulations governing confidentiality, privacy, and security of records obtained, maintained, and disclosed via this incident management system.

After consideration of public comments, we are finalizing the proposed § 441.302(a)(6)(i)(E) as proposed, with a minor technical modification to clarify that mention of critical incident in § 441.302(a)(6)(i)(E) refers to critical incidents as defined in paragraph (a)(6)(i)(A) of this section (meaning § 441.302).

g. Separate Investigation of Critical Incidents (§ 441.302(a)(6)(i)(F))

At § 441.302(a)(6)(i)(F), we proposed to require the State be required to separately investigate critical incidents if the investigative agency fails to report the resolution of an investigation within State-specified timeframes. These proposed requirements are intended to ensure that the failure to effectively share information between State agencies or other entities in the State responsible for investigating incidents does not impede a State's ability to effectively identify, report, triage, investigate, resolve, track, and trend critical incidents, particularly where there could be evidence of serious harm or a pattern of harm to a section 1915(c) waiver program participant for which a provider is responsible.

We received public comments on these proposals. The following is a summary of the comments we received and our responses.

Comment: Many commenters expressed serious concerns about the requirements we proposed at § 441.302(a)(6)(i)(F), that the State is required to separately investigate critical incidents if the investigative agency fails to report the resolution of an investigation within State-specified timeframes. Commenters recognized the importance of cross-agency collaboration but identified that the timeframes for investigations by investigative agencies, such as Adult Protective Services and Child Protective Services, can be prolonged. Further, opening a separate concurrent investigation at the State level, if the investigative agency fails to report the resolution of an investigation within State-specified timelines, could compromise the integrity of both investigations. Some commenters questioned the feasibility of the requirements at § 441.302(a)(6)(i)(F) due to State statutory provisions around investigative agency responsibilities and allowable data sharing.

Response: These proposed requirements are intended to ensure that the failure to effectively share information between State agencies or other entities in the State responsible for investigating incidents does not impede a State Medicaid agency's ability to effectively identify, report, triage, investigate, resolve, track, and trend critical incidents to protect the health and welfare of HCBS beneficiaries. We believe that requiring the State to separately investigate critical incidents if the investigative agency fails to report the resolution of an investigation within State-specified timeframes will strengthen the ability of the State Medicaid agency to act quickly and/or separately if investigations by Adult Protective Services, Child Protective Services, or other State agencies are taking longer to address and resolve. Further, it will ensure that the State has the information it needs to take action to protect beneficiary health and safety if a provider is responsible (intentionally or unintentionally) for causing harm to beneficiaries or putting beneficiaries at risk of harm. Additionally, we note that the State Medicaid agency may have the authority to take certain actions against the provider (such as suspend their Medicaid enrollment) that other State agencies, such as Adult Protective

Services or Child Protective Services, are unable to take.

We have provided States with flexibility to establish State-specified timelines to separately investigate critical incidents if the investigative agency fails to report the resolution of an investigation and encourage States to take into account specific nuances that may impact the timelines.

After consideration of public comments, we are finalizing the proposed § 441.302(a)(6)(i)(F) as proposed.

h. Reporting (§§ 441.302(a)(6)(i)(G) and 441.302(a)(6)(ii))

Section 1902(a)(6) of the Act requires State Medicaid agencies to make such reports, in such form and containing such information, as the Secretary may from time to time require, and to comply with such provisions as the Secretary may from time to time find necessary to assure the correctness and verification of such reports. Under our authority at section 1902(a)(6) of the Act, we proposed to modernize the health and welfare reporting by requiring all States to report on the same Federally prescribed quality measures as opposed to the State-developed measures, which naturally vary State by State. Specifically, at § 441.302(a)(6)(i)(G), we proposed to require that States meet the reporting requirements at § 441.311(b)(1) related to the performance of their incident management systems. We discuss these reporting requirements in our discussion of proposed § 441.311(b)(1). Further, under our authority at sections 1915(c)(2)(A) and 1902(a)(19) of the Act, we proposed to codify a minimum performance level to demonstrate that States meet the requirements at § 441.302(a)(6). Specifically, at § 441.302(a)(6)(ii), we proposed to require that States demonstrate that: an investigation was initiated, within State-specified timeframes, for no less than 90 percent of critical incidents; an investigation was completed and the resolution of the investigation was determined, within State-specified timeframes, for no less than 90 percent of critical incidents; and corrective action was completed, within State-specified timeframes, for no less than 90 percent of critical incidents that require corrective action. This minimum performance level strengthens health and welfare reporting requirements while taking into account that there may be legitimate reasons for delays in investigating and addressing critical incidents.

In the proposed rule (88 FR 27980), we considered whether to allow good cause exceptions to the minimum performance level in the event of a natural disaster, public health emergency, or other event that would negatively impact a State's ability to achieve a minimum 90 percent. We opted not to propose good cause exceptions because the minimum 90 percent performance level accounts for various scenarios that might impact a State's ability to achieve these performance levels, and there are existing disaster authorities that States could utilize to request a waiver of these requirements in the event of a public health emergency or a disaster.

We received public comments on these proposals. The following is a summary of the comments we received and our responses.

Comment: A couple of commenters expressed concern about implementing the performance levels at the 90 percent threshold at § 441.302(a)(6)(ii). Alternatively, one commenter recommended the performance level should instead be 100 percent to protect the health and welfare of HCBS beneficiaries, since the minimum performance level to demonstrate that States meet the requirements at § 441.302(a)(6) should gauge State performance by how efficiently they conduct critical incident investigations.

Response: We believe the performance levels at the 90 percent threshold sets a high, but achievable standard, for complying with the requirements at § 441.302(a)(6)(ii). Our intention in proposing minimum performance requirements at § 441.302(a)(6)(ii) was to provide a standard by which we could oversee, and hold States accountable, for complying with the requirements for an incident management system that we are finalizing at § 441.302(a)(6). Further it, was intended to strengthen the critical incident requirements while also recognizing that there may be legitimate reasons why critical incident processes occasionally are not completed timely in all instances. However, it is our expectation that States make reasonable efforts to ensure every critical incident is investigated, resolved, and (if necessary) subject to corrective action within State-specified timeframes.

Comment: A few commenters suggested CMS include a good-cause exception to the incident management performance level for certain instances that fall outside of the specified performance standards for appropriate reasons, such as for resource challenges or when the investigating agency requests that the State refrain from contact due to an ongoing and active investigation. Alternatively, a few commenters supported the approach in the proposed rule to not allow good-cause exceptions to the incident management performance level, observing that the 90 percent minimum performance level already gives States leeway for unexpected occurrences.

Response: We reiterate our belief that the 90 percent minimum performance level sets a high, but achievable standard for States' incident management systems. We underscore that the minimum 90 percent performance level accounts for various scenarios that might impact the State's ability to achieve these performance levels, and there are existing disaster authorities that States could utilize to request a waiver of these requirements in the event of a public health emergency or a disaster. The 90 percent minimum performance level is intended to strengthen incident management system requirements. We also recognize that there may be legitimate reasons why incident management processes occasionally are not completed timely in all instances. We reiterate that our expectation is that States make reasonable efforts to ensure every critical incident is investigated, resolved, and (if necessary) subject to corrective action within State-specified timeframes.

After consideration of public comments, we are finalizing our proposals at §§ 441.302(a)(6)(i)(G) and 441.302(a)(6)(ii) as proposed.

i. Applicability Date

We proposed at § 441.302(a)(6)(iii) to provide States with 3 years to implement these requirements in FFS delivery systems following the effective date of the final rule. For States with managed care delivery systems under the authority of sections 1915(a), 1915(b), 1932(a), or 1115(a) of the Act and that include HCBS in the MCO's, PIHP's, or PAHP's contract, we proposed to provide States until the first rating period that begins on or after 3 years after the effective date of the final rule to implement these requirements.

We received public comments on these proposals. The following is a summary of the comments we received and our responses.

Comment: Several commenters expressed concerns about the burden they believe will be associated with the proposed provision to implement the incident management requirements at § 441.302(a)(6) within 3 years following the effective date of the final rule. Commenters stated that implementation of the incident management requirements as proposed at § 441.302(a)(6)(i)(B) could require

potential State statute and regulatory amendments, lead time for securing additional technology resources, and operational and workflow changes. Commenters requested CMS consider alternative effective dates for the incident management system ranging from 4 to 7 years, with the most frequent suggestions at 4 to 5 years to address these concerns.

Response: We believe that 3 years for States to comply with the requirements at § 441.302(a)(6) is realistic and achievable for most of the incident management provisions. However, we agree that the proposed 3-year implementation timeframe for States to comply with the electronic incident management requirements at § 441.302(a)(6)(i)(B) could create hardships for States. We agree that States and managed care plans may require a timeframe longer than 3 years to address funding needs, policy changes, IT procurements, and other systems changes, necessary to implement an electronic incident management system as required at § 441.302(a)(6)(i)(B), which may necessitate 5 years.

After consideration of public comments, we are finalizing § 441.302(a)(6)(iii) with minor modifications to correct erroneous uses of the word ''effective.'' We are retitling the requirement at § 441.302(a)(6)(iii) as Applicability date (rather than Effective date). We are also modifying the applicability date to require that States must comply with the requirements in paragraph (a)(6) beginning 3 years from the effective date of this final rule, except for the requirement at paragraph (a)(6)(B) of this section, with which the State must comply beginning 5 years from the effective date of the final rule. In addition, we are making a technical correction to clarify that the applicability dates in § 441.302(a)(6)(iii) apply only to the requirements in § 441.302(a)(6). Additionally, we are also finalizing with modification the language pertaining to managed care delivery systems to improve accuracy and alignment with common phrasing in managed care contracting policy at § 441.302(a)(6)(iii).

j. Application to Other Authorities

At § 441.302(a)(6)(iii), we proposed to apply these requirements to services delivered under FFS or managed care delivery systems. Section 2402(a)(3)(A) of the Affordable Care Act requires States to improve coordination among, and the regulation of, all providers of Federally and State-funded HCBS programs to achieve a more consistent administration of policies and procedures across HCBS programs. In the context of Medicaid coverage of HCBS, it should not matter whether the services are covered directly on an FFS basis or by a managed care plan to its enrollees. The requirement for consistent administration should require consistency between these two modes of service delivery. We proposed that a State must ensure compliance with the requirements in § 441.302(a)(6) with respect to HCBS delivered both under FFS and managed care delivery systems.

Section 2402(a)(3)(A) of the Affordable Care Act requires States to improve coordination among, and the regulation of, all providers of Federally and State-funded HCBS programs to achieve a more consistent administration of policies and procedures across HCBS programs. In accordance with the requirement of section 2402(a)(3)(A) of the Affordable Care Act for States to achieve a more consistent administration of policies and procedures across HCBS programs and because of the importance of assuring health and welfare for other HCBS State plan options, we proposed to include the incident management requirements at § 441.302(a)(6) within the applicable regulatory sections, including section 1915(j), (k), and (i) State plan services at §§ 441.464(e), 441.570(e), and 441.745(a)(1)(v), respectively. We note that a conforming reference to § 441.745(b)(1)(i), although not discussed in preamble of the proposed rule, was included in the proposed rule (88 FR 28086); the reference supports the application of incident management requirements to section 1915(i) services. Consistent with our proposal for section 1915(c) waivers, we based on our authority under section 1902(a)(19) of the Act to assure that there are safeguards for beneficiaries. We believe the same arguments for these requirements for section 1915(c) waivers are equally applicable for these other HCBS authorities.

We received public comments on these proposals. The following is a summary of the comments we received and our responses.

Comment: Several commenters supported the requirements at § 441.302(a)(6)(iii), expressing that States must ensure compliance with the requirements in § 441.302(a)(6) with respect to HCBS delivered both in FFS and managed care delivery systems, noting there is no meaningful difference between abuse, neglect, or exploitation perpetrated by a provider paid through a managed care plan or by a provider paid through a FFS delivery system. One commenter recommended we assist States in developing instructions for State incident management systems for work with Medicaid managed care plans and contracted providers in implementing the requirements in § 441.302(a)(6).

Response: We appreciate the support for our proposal. We will take this feedback into consideration when developing technical assistance and other resources for States on the incident management system requirements.

After consideration of public comments received, we are finalizing the proposal at § 441.302(a)(6)(iii) for HCBS delivered under both FFS and managed care delivery systems.

Comment: Several commenters supported the proposal to apply the incident management system requirements at § 441.302(a)(6) to sections 1915(i), (j) and (k) authorities. Commenters expressed that equally applicable requirements for States across waiver authorities can ensure better access, equity, quality, and reporting for HCBS beneficiaries.

Response: We appreciate the support for our proposal.

Comment: A few commenters responded to our request for comment on whether we should establish similar health and welfare requirements for section 1905(a) State plan personal care, home health, and case management services. Several commenters supported the proposal not to extend the incident management requirements at § 441.302(a)(6) to section 1905(a) services and expressed that applying these requirements to State plan benefits would pose critical challenges for State Medicaid and other operating agencies, due to varying levels of HCBS provided and different data reporting infrastructure States have for 1905(a) services. A few commenters recommended that CMS apply the incident management system requirements to mental health rehabilitative services delivered under section 1905(a) State plan authority. A couple of commenters suggested that mental health rehabilitative services are considered home- and community-based services under the broader definition enacted by Congress in the American Rescue Plan Act of 2021. They also indicated that many Medicaid beneficiaries with mental health disorders and disabilities receiving services under the section 1905(a) authority would benefit from the beneficiary protections afforded through the incident management system requirements at § 441.302(a)(6).

Response: At this time, we are not mandating inclusion of section 1905(a) services in the State requirements for incident management systems, due to the statutory and regulatory differences between services authorized under sections 1905(a) and 1915 of the Act. That said, we are not persuaded by the argument that including section 1905(a) services would simply be too much work, as we do believe it is critical that Medicaid beneficiaries have protections for freedom from harm. We acknowledge that many beneficiaries, particularly those receiving mental health services, are served by section 1905(a) services, and encourage States to consider development of critical incident processes to address protections for beneficiaries from harm or events that place a beneficiary at risk of harm.

After consideration of public comments, we are finalizing application of the requirements at § 441.302(a)(6) to other HCBS program authorities within the applicable regulatory sections, including section 1915(j), (k), and (i) State plan services. We are finalizing the requirements at §§ 441.464(e), 441.570(e), and 441.745(a)(1)(v) and (b)(1)(i) as proposed, with minor modifications to clarify that the references to section 1915(c) of the Act are instead references to section 1915(j), 1915(k), and 1915(i) of the Act, respectively.

k. Summary of Finalized Requirements

After consideration of the public comments, we are finalizing the requirements at §§ 441.302(a)(6), as follows:

- We are finalizing § 441.302(a)(6)(i)(A) as proposed with the following minor modifications: a minor formatting modification at § 441.302(a)(6)(i)(A)(3) to correct an improper italicization; a minor technical modification at § 441.302(a)(6)(i)(A)(5) to correct missing punctuation; and a minor formatting modification to conclude § 441.302(a)(6)(i)(A)(6) with a semi-colon.
- We are finalizing § 441.302(a)(6)(i)(B) as proposed with the following minor modifications: adding the word ''Enables'' to § 441.302(a)(6)(i)(B) and striking it from § 441.302(a)(6)(i)(B)(1); and minor formatting modifications to conclude § 441.302(a)(6)(i)(B)(2) and (3) with a semi-colon.
- We are finalizing the requirements at § 441.302(a)(6)(i)(C) with a modification to require providers to report to the State, within State-established timeframes and procedures, any critical incident that occurs during the delivery of services authorized under section 1915(c) of the Act and as specified in the beneficiary's person-centered service plan, or occurs as a result of the failure to deliver services authorized under section 1915(c) of the Act and as specified in the beneficiary's person-centered service plan. We are also finalizing § 441.302(a)(6)(i)(C) with a minor formatting change so that it concludes with a semi-colon.
- We are finalizing the requirements at § 441.302(a)(6)(i)(D, with a modification to require providers to report to the State, within State-established timeframes and procedures, any critical incident that occurs during the delivery of services authorized under section 1915(c) of the Act and as specified in the beneficiary's person-centered service plan, or occurs as a result of the failure to deliver services authorized under section 1915(c) of the Act and as specified in the beneficiary's person-centered service plan. We are also finalizing § 441.302(a)(6)(i)(D) with a minor formatting change so that it concludes with a semi-colon.
- We are finalizing the requirement at § 441.302(a)(6)(i)(E) with a minor formatting modification to change a reference to § 441.302(a)(6)(i)(A) to paragraph (a)(6)(i)(A).
- We are finalizing the requirements at § 441.302(a)(6)(i)(F) and (G) and (a)(6)(ii) as proposed.
- We are finalizing the requirement at § 441.302(a)(6)(iii) with modifications to specify that States must comply with the requirements in paragraph (a)(6) beginning 3 years from the effective date of this final rule; except for the requirement at paragraph (a)(6)(B) of this section, with which the State must comply beginning 5 years after the date that is the effective date of this final rule; and in the case of the State that implements a managed care delivery system under the authority of sections 1915(a), 1915(b), 1932(a), or 1115(a) of the Act and includes HCBS in the MCO's, PIHP's, or PAHP's contract, the first rating period for contracts with the MCO, PIHP, or PAHP beginning on or after 3 years from the effective date of this final rule, except for the requirement at paragraph (a)(6)(B) of this section, with which the first rating period for contracts with the MCO, PIHP, or PAHP beginning on or after 5 years from the effective date of this final rule.
- We are finalizing the requirements at §§ 441.464(e), 441.570(e), and 441.745(a)(1)(v) and (b)(1)(i) with minor modifications to clarify that the references to section 1915(c) of the Act are instead references to section 1915(j), 1915(k), and 1915(i) of the Act, respectively.

4. Reporting (§ 441.302(h))

As discussed earlier in section II.B.1. of this rule, section 2402(a)(3)(A) of the Affordable Care Act requires HHS to promulgate regulations to ensure that States develop HCBS systems that are designed to improve coordination among, and the regulation of, all providers of Federally and State-funded HCBS programs to achieve a more consistent administration of policies and procedures across HCBS programs. We also believe that standardizing reporting across HCBS authorities will streamline and simplify reporting for providers, improve States' and CMS's ability to assess HCBS quality and performance, and better enable States to improve the quality of HCBS programs through the availability of comparative data. Further, section 1902(a)(6) of the Act requires State Medicaid agencies to make such reports, in such form and containing such information, as the Secretary may from time to time require, and to comply with such provisions as the Secretary may from time to time find necessary to assure the correctness and verification of such reports.

To avoid duplicative or conflicting reporting requirements at § 441.302(h), we proposed to amend § 441.302(h) by removing the following language: ''annually''; ''The information must be consistent with a data collection plan designed by CMS and must address the waiver's impact on -''; and by removing paragraphs (1) and (2) under § 441.302(h). Further, we proposed to add '', including the data and information as required in § 441.311'' at the end of the new amended text, ''Assurance that the agency will provide CMS with information on the waiver's impact.'' By making these changes, we proposed to consolidate reporting expectations in one new section at proposed § 441.311, described in section II.B.7. of the proposed rule, under our authority at section 1902(a)(6) of the Act and section 2402(a)(3)(A) of the Affordable Care Act. As noted earlier in section II.B.1. of the proposed rule, this reporting will supersede existing reporting for section 1915(c) waivers and standardize reporting across section 1915 HCBS authorities.

We did not receive specific comments on this proposal.

We are finalizing our proposed amendment of § 441.302(h) as proposed.

We did receive comments on proposed § 441.311, described in section II.B.7. of this rule, which establishes a new Reporting Requirements section. Comments on this proposal and our

responses are summarized in section II.B.7. of this final rule.

5. HCBS Payment Adequacy (§§ 441.302(k), 441.464(f), 441.570(f), 441.745(a)(1)(vi))

Section 1902(a)(30)(A) of the Act requires State Medicaid programs to ensure that payments to providers are consistent with efficiency, economy, and quality of care and are sufficient to enlist enough providers so that care and services are available to beneficiaries at least to the extent as to the general population in the same geographic area. Access to most HCBS generally requires hands-on and in-person services to be delivered by direct care workers. Direct care workers are referred to by various names, such as direct support professionals, personal care attendants, and home health aides, within and across States. They perform a variety of roles, including nursing services, assistance with activities of daily living (such as mobility, personal hygiene, and eating) and instrumental activities of daily living (such as cooking, grocery shopping, and managing finances), behavioral supports, employment supports, and other services to promote community integration for older adults and people with disabilities. We discuss the definition of direct care workers in more detail below in the context of our proposed definition of direct care workers.

Direct care workers typically earn low wages and receive limited benefits [76] [77] [78] contributing to a shortage of direct care workers and high rates of turnover in this workforce, which can limit access to and impact the quality of HCBS. Workforce shortages can also reduce the cost-effectiveness of services for State Medicaid agencies that take into account the actual cost of delivering services when determining Medicaid payment rates, such as by increasing the reliance on overtime and temporary staff, which have higher hourly costs than non-overtime wages paid to permanent staff. Further, an insufficient supply of HCBS providers can prevent individuals from transitioning from institutions to home and community-based settings and from receiving HCBS that can prevent institutionalization. HCBS is, on average, less costly than institutional services,[79] [80] and most older adults and people with disabilities prefer to live in the community. Accordingly, limits on the availability of HCBS lessen the ability for State Medicaid programs to deliver LTSS in a cost-effective, beneficiary friendly manner.

Shortages of direct care workers and high rates of turnover also reduce the quality of HCBS. For instance, workforce shortages can prevent individuals from receiving needed services and, in turn, lead to poorer outcomes for people who need HCBS. Insufficient staffing can also make it difficult for providers to achieve quality standards.[81] High rates of turnover can reduce quality of care,[82] including through the loss of experienced and qualified workers and by reducing continuity of care for people receiving HCBS,[83] which is associated with the reduced likelihood of improvement in function among people receiving home health aide services.[84]

While workforce shortages have existed for years, the COVID–19 pandemic exacerbated the problem, leading to higher rates of direct care worker turnover (for instance, due to higher rates of worker-reported stress), an inability of some direct care workers to return to their positions prior to the pandemic (for instance, due to difficulty accessing child care or concerns about contracting COVID–19 for people with higher risk of severe illness), workforce shortages across the health care sector, and wage increases in retail and other jobs that tend to draw from the same pool of workers.[85] [86] [87] Further, demand for direct care workers is expected to continue rising due to the growing needs of the aging population, the changing ability of aging caregivers to provide supports, the increased provision of services in the most integrated community setting rather than institutional services, and a decline in the number of younger workers available to provide services.[88] [89] [90]

Section 2402(a) of the Affordable Care Act requires the Secretary of HHS to ensure that all States receiving Federal funds for HCBS, including Medicaid, develop HCBS systems that are responsive to the needs and choices of beneficiaries receiving HCBS, maximize independence and self-direction, provide coordination for and support each person's full engagement in community life, and achieve a more consistent and coordinated approach to the administration of policies and procedures across public programs providing HCBS.[91] In particular, section 2402(a)(1) of the Affordable Care Act requires States to allocate resources for

[78] We recognize that there are workforce shortages that may impact access to other Medicaid-covered services aside from HCBS. We are focusing in this rule on addressing workforce shortages in HCBS and continue to assess the feasibility and potential impact of other actions to address workforce shortages in other parts of the health care sector.

services in a manner that is responsive to the changing needs and choices of beneficiaries receiving HCBS, while section 2402(a)(3)(B)(iii) of the Affordable Care Act requires States to oversee and monitor HCBS system functions to assure a sufficient number of qualified direct care workers to provide self-directed personal assistance services. To comply with sections 2402(a)(1) and 2402(a)(3)(B)(iii) of the Affordable Care Act, States must have a sufficient direct care workforce to be able to deliver services that are responsive to the changing needs and choices of beneficiaries, and, specifically, a sufficient number of qualified direct care workers to provide self-directed personal assistance services. We proposed requirements across section 1915(c), (i), (j) and (k) HCBS programs to further this outcome.

a. Assurance of Sufficient Rates (§ 441.302(k))

Consistent with section 1902(a)(30)(A) of the Act and sections 2402(a)(1) and 2402(a)(3)(B)(iii) of the Affordable Care Act, we proposed to require at § 441.302(k) that State Medicaid agencies provide assurance that payment rates for certain HCBS authorized under section 1915(c) of the Act are sufficient to ensure a sufficient direct care workforce (defined and explained later in this section of the rule) to meet the needs of beneficiaries and provide access to services in accordance with the amount, duration, and scope specified in the person-centered service plan, as required under § 441.301(c)(2). We believe that this proposed requirement supports the economy, efficiency, and quality of HCBS authorized under section 1915(c) of the Act, by ensuring that a sufficient portion of State FFS and managed care payments for HCBS go directly to compensation of the direct care workforce.

We received public comments on these proposals. The following is a summary of the comments we received and our responses.

Comment: A significant number of commenters raised the issue of State Medicaid rates for homemaker, home health aide, and personal care services. Many commenters suggested that requiring that a sufficient portion, or even requiring a specific percent, of Medicaid payments be spent on compensation for direct care workers will not address rate sufficiency, which they regard as the underlying cause of low wages for direct care workers. Even commenters who were supportive of § 441.302(k) generally or the proposed minimum performance level at § 441.302(k)(3) (discussed further below) acknowledged that the policies may be more successful if they coincided with rate increases to ensure that providers' service operations remain fully supported. Many commenters recommended that as an alternative to (or in addition to) this proposal, we create requirements that States regularly review and update or increase their rates.

Several commenters were concerned that wages for direct care workers will not increase if the underlying Medicaid payment rates for the services remain low and are not increased. However, one commenter suggested that if a State's Medicaid rates are low, this places even greater importance on ensuring that as much of the rate as possible is going to compensation for direct care workers.

A few commenters expressed the belief that the accountability and transparency created by the proposal, in addition to the associated reporting requirement we proposed at § 441.311(e) (discussed further in section II.B.7. of this rule), would encourage providers to pass more of their Medicaid payments along to direct care worker wages. A few commenters offered anecdotal observations that, when their State allocated additional funds to HCBS providers, the commenters believed the increased funding was not passed along to direct care worker wages. One commenter noted that a permanent payment adequacy requirement is preferable to the temporary pass-through policies that have been enacted for one-time rate increases, because a permanent requirement would not be dependent on rate increases.

Response: While section 1902(a)(30)(A) of the Act does not provide us with authority to require specific payment rates or rate-setting methodologies, section 1902(a)(30)(A) of the Act does provide us with authority to oversee that States assure that payments are consistent with efficiency, economy, and quality of care and are sufficient to enlist enough providers so that care and services are available under the plan, at least to the extent that such care and services are available to the general population in the geographic area. We did not propose to establish, and are not finalizing, specific payment rates for HCBS under the Medicaid program. Instead, we reiterate that under section 1902(a)(30)(A) of the Act payments must be sufficient to recruit and retain enough providers to ensure care and services are available to beneficiaries; we proposed to implement this requirement by specifying a percentage of Medicaid payments be spent on compensation to direct care workers. We believe this policy will also promote, and be consistent with, economy, efficiency, and quality of care.

Broadly speaking, we also do not believe that simply increasing rates alone, without setting guardrails for how the payments are allocated, would ensure that direct care workers' wages will increase. Rather, we agree with commenters who believed that, regardless of the underlying Medicaid rate, requiring a certain amount of Medicaid payments be spent on compensation will help ensure that Medicaid payments are distributed in a way that supports direct care workers, including their recruitment and retention, to the greatest extent possible. While we did not propose, and are not finalizing, a requirement that State Medicaid agencies increase their rates, we anticipate that States will examine their rates to assure they are sufficient to support the direct care workforce to comply with the policy we proposed and are finalizing with modifications, as discussed further herein. We also direct commenters to the proposals discussed in section II.C. of this final rule, which includes a number of provisions related to rate transparency that are intended to support FFS rate sufficiency.

Comment: One commenter recommended that we revise § 441.302(k) to specify that rates must be sufficient to ensure a sufficient number of providers, including members of the direct care workforce. The commenter stated that this revision would match the broader term ''provider'' in section 1902(a)(30)(A) of the Act while highlighting the importance of the direct care workforce.

Response: We appreciate the commenter's feedback, but we decline to make the recommended revision. At this time, we want to make the focus of the requirement explicitly on the individuals who are part of the direct care workforce, whether they act as individual providers (such as by working as an independent contractor), are employed by a provider entity, or otherwise. We agree with the commenter that section 1902(a)(30)(A) of the Act requires that Medicaid payments must be sufficient to enlist enough providers so that care and services are available to beneficiaries at least to the extent that such care and services are available to the general population in the geographic area. We note that section 1902(a)(30)(A) of the Act also requires that States assure that payments are consistent with efficiency, economy, and quality of care. We agree that enrolling sufficient numbers of

providers is critical to Medicaid service delivery, and that providers in turn may not be able to deliver services if they do not have a sufficient number of direct care workers. As noted in a previous response, we proposed to implement these requirements by specifying a percentage of Medicaid payments be spent on compensation to direct care workers. We believe this policy will promote, and be consistent with, economy, efficiency, and quality of care, as required by statute at section 1902(a)(3)(A) of the Act.

Comment: One commenter requested clarification on whether the payment adequacy requirement applies only to the voluntary, nonprofit sector or whether it also applies to State-operated services.

Response: Given the varied nature of HCBS programs, we specifically proposed for the payment adequacy requirement to apply broadly to compensation paid to direct care workers by providers receiving payments for furnishing homemaker, home health aide, or personal care services from the State; we did not propose to apply these requirements to only certain types of providers or their ownership arrangements. We specifically proposed at § 441.302(k)(1)(ii)(G) (which we are finalizing at § 441.302(k)(1)(ii) as discussed later in this section) that a direct care worker, to whom this requirement would apply, may be employed by or contracted with a Medicaid provider, State agency, or third party or delivering services under a self-directed service model. The requirements we proposed, and are finalizing in this section II.B.5, under § 441.302(k) require States to assure that payment rates are adequate to ensure a sufficient direct care workforce by, in turn, ensuring that providers spend a certain percentage of their total payments for certain HCBS on compensation for direct care workers furnishing those HCBS.

After consideration of the comments received, we are finalizing the assurance requirement at § 441.302(k) with modifications as discussed in this section II.B.5 of this final rule. We are finalizing the language we proposed in the introductory paragraph at § 441.302(k) with technical modifications so that it is clear that the reference to person-centered service plans is to beneficiaries' person-centered service plans. The finalized language at § 441.302(k) will read: *HCBS payment adequacy.* Assurance that payment rates are adequate to ensure a sufficient direct care workforce to meet the needs of beneficiaries and provide access to services in the amount, duration, and scope specified in beneficiaries' person-centered service plans.

b. Minimum Performance Requirement and Flexibilities (§ 441.302(k)(2), (3), (4), (5), and (6))

Our proposal at § 441.302(k)(2) and (3) was designed to affect the inextricable link between sufficient payments being received by the direct care workforce and access to and, ultimately, the quality of HCBS received by Medicaid beneficiaries. We believe that this proposed requirement would not only benefit direct care workers but also individuals receiving Medicaid HCBS because supporting and stabilizing the direct care workforce will result in better qualified employees, lower turnover, and a higher quality of care. The direct care workforce must be able to attract and retain qualified workers in order for beneficiaries to access providers of the services they have been assessed to need and for the direct care workforce to be comprised of workers with the training, expertise, and experience to meet the diverse and often complex HCBS needs of individuals with disabilities and older adults. Without access to a sufficient pool of direct care workers, individuals are forced to forgo having their needs met, or have them addressed by workers without sufficient training, expertise, or experience to meet their unique needs, both of which could lead to worsening health and quality of life outcomes, loss of independence, and institutionalization.[92] [93] [94] [95] Further, we believe that ensuring adherence to a Federal standard of the percentage of Medicaid payments going to direct care workers is a concrete step in recruitment and retention efforts to stabilize this workforce by enhancing salary competitiveness in the labor market. In the absence of such requirements, we may be unable to support and stabilize the direct care workforce because we would not be able to ensure that the payments are used primarily and substantially to pay for care and services provided by direct care workers. Therefore, at § 441.302(k)(3)(i), we proposed to require that at least 80 percent of all Medicaid payments, including but not limited to base payments and supplemental payments, with respect to the following services be spent on compensation to direct care workers: homemaker services, home health aide services, and personal care services.[96]

While many States have already voluntarily established such minimums for payments authorized under section 1915(c) of the Act,[97] we believe a Federal standard would support ongoing access to, and quality and efficiency of, HCBS. Our proposal was based on feedback from States that have implemented similar requirements for payments for certain HCBS under section 9817 of the ARP [98] or other State-led initiatives. We refer readers to our proposed rule for more specific discussion of the feedback we received from States regarding their implementation of similar requirements (88 FR 27984).

We focused our proposed requirement on homemaker services, home health aide services, and personal care services because they are services for which we

[96] We note that section 2402(a) of the Affordable Care Act applies broadly to all HCBS programs and services funded by HHS. Further, section 2402(a) does not include limits on the scope of services, HCBS authorities, or other factors related to its use of the term HCBS. Therefore, we believe that there is no indication that personal care, homemaker, and home health aide services would fall outside the scope of section 2402(a).

[97] For instance, as part of their required activities to enhance, expand, or strengthen HCBS under ARP section 9817, some States have required that a minimum percentage of rate increases and supplemental payments go to the direct care workforce. See *https://www.medicaid.gov/medicaid/home-community-based-services/guidance/strengthening-and-investing-home-and-community-based-services-for-medicaid-beneficiaries-american-rescue-plan-act-of-2021-section-9817/index.html* for more information on ARP section 9817.See *https://www.medicaid.gov/medicaid/home-community-based-services/guidance/strengthening-and-investing-home-and-community-based-services-for-medicaid-beneficiaries-american-rescue-plan-act-of-2021-section-9817/index.html* for more information on ARP section 9817.

[98] Information on State activities to expand, enhance, or strengthen HCBS under ARP section 9817 can be found on *Medicaid.gov* at *https://www.medicaid.gov/medicaid/home-community-based-services/guidance/strengthening-and-investing-home-and-community-based-services-for-medicaid-beneficiaries-american-rescue-plan-act-of-2021-section-9817/index.html.*

expect that the vast majority of payment should be comprised of compensation for direct care workers. These services are comprised of individualized supports for Medicaid beneficiaries delivered by direct care workers and generally have low equipment or supply costs relative to other services. Further, these are services that would most commonly be conducted in individuals' homes and general community settings. As such, there should be low facility or other indirect costs associated with the services. We requested comment on the following options for the minimum percentage of payments that must be spent on compensation to direct care workers for homemaker services, home health aide services, and personal care services: (1) 75 percent; (2) 85 percent; and (3) 90 percent. If an alternate minimum percentage was recommended, we requested that commenters provide the rationale for that minimum percentage.

We received public comments on these proposals. The following is a summary of the comments we received and our responses.

Comment: Many commenters (regardless of whether they supported the overall proposal itself) applauded our acknowledgement of, and efforts to address, HCBS workforce shortages, which many commenters characterized as a ''crisis.'' Many commenters appeared to agree that wages to direct care workers are generally low, and that these low wages contribute to overall workforce challenges. Both providers and beneficiaries submitted comments detailing struggles they have had in hiring and retaining qualified direct care workers. Some of these commenters described the frustration of having to constantly recruit and train new direct care workers. Some commenters described having to turn away new clients due to staff shortages, and beneficiaries reported experiencing delays or reductions in their services due to difficulty in finding direct care workers to provide the services. Many direct care workers also submitted personal examples of the hardships caused by financial strain due to inadequate pay, including having to work long hours at multiple jobs to earn extra income, missing time with their own families, struggling to pay bills, risking exposure to (or contracting) COVID–19, and experiencing burnout and psychological stress. A few of these commenters indicated they had left the direct care workforce due to low wages.

Several commenters stated that the proposed minimum performance requirement, if finalized, would likely lead to increases in wages for direct care workers and strengthen the workforce, which in turn could improve the quality of HCBS. In particular, a number of commenters noted the potential for the proposal to have a positive impact on workers who are Black, other people of color, and women, who are disproportionately represented in the direct care workforce—groups that have historically experienced low wages due to discrimination.

Commenters were able to draw anecdotal connections between wages and worker retention. A few providers, for instance, noted that they had made efforts to increase their workers' wages, and observed that the increase in wages had a positive impact on their staff retention and the number of beneficiaries the providers were able to serve.

A few other commenters noted that there are other factors that may contribute to worker shortages, and recommended that we continue to partner with the Administration for Community Living and other Federal agencies to promote a comprehensive, integrated campaign that addresses multiple facets of the workforce shortage, including promotion of and improvement of social valuation of this work, support of workforce pipelines, changes to immigration policy, and creative strategies for atypical workforce development.

Response: We thank commenters for sharing their personal experiences and perspectives on how they have been affected by the direct care workforce shortage and the low wages paid to many direct care workers. We share the belief that this requirement will create a foundation of support for the direct care workforce, which we believe is fundamental to HCBS delivery. We focused in this proposal on compensation for direct care workers because, as we noted above and many commenters confirmed anecdotally, many direct care workers have been paid low wages for a long time.[99] [100] We recognize that other factors also play important roles in worker retention and shortages. While we will continue to partner with other Federal agencies to address these issues, some of the factors affecting the workforce lie outside of our regulatory purview and are outside of the scope of this proposal.

Comment: A significant number of commenters provided feedback on the idea of having a national minimum performance level (separate from providing comment on what the percentage should be). One commenter, representing several State agencies, supported the intent of the proposal and indicated that the proposed requirements could ''improve recruitment, retention and economic security of the HCBS direct care workforce.'' While offering cautions, the commenter indicated that many States generally support a single national minimum performance requirement, but they also recommended that we consider providing States with flexibility related to the requirement based on provider size, rural/urban status, and risk of closure.

Many commenters expressed concerns that a single national minimum performance level could fail to take into account various factors that might affect the percent of Medicaid payments that is spent on compensation for direct care workers including substantial differences among HCBS waiver programs, such as size, services, populations, service area, and staffing needs; State requirements for providers, such as differences in business operations requirements, licensure costs, staff training requirements, or whether States require providers to maintain physical office space; and local economic environments, including cost of living, taxes, and wage laws. Many commenters requested that we not finalize a minimum performance level, so that providers may be allowed flexibility to allocate their Medicaid payments as they determine to be appropriate. One commenter, while acknowledging a workforce crisis, noted that Area Agencies on Aging and provider organizations are taking steps to improve recruitment and retention and that a Federal mandate such as the 80 percent minimum performance level proposed in the rule is unnecessary, may have unintended consequences, and may complicate State and local efforts currently underway.

Response: After consideration of public comments as described in this section II.B.5 of this rule, we are finalizing a national minimum performance level in this final rule. We believe that not doing so would fail to help address the chronic shortages in the HCBS direct care workforce. In this context, the status quo amounts to minimal oversight over how much of the Medicaid payment is going to support the direct care workers who are

[99] MACPAC Issue Brief. State Efforts to Address Medicaid Home- and Community-Based Services Workforce Shortages. March 2022. Accessed at *https://www.macpac.gov/wp-content/uploads/2022/03/MACPAC-brief-on-HCBS-workforce.pdf.*

[100] Campbell, S., A. Del Rio Drake, R. Espinoza, K. Scales. 2021. Caring for the future: The power and potential of America's direct care workforce. Bronx, NY: PHI *http://phinational.org/wp-content/uploads/2021/01/Caring-for-the-Future-2021-PHI.pdf.*

performing the core activities of homemaker, home health aide, and personal care services. While some States have already implemented initiatives to ensure that a certain percentage of Medicaid payments or rate increases are going to direct care worker compensation, as noted above, we believe a Federal requirement is necessary and would be more effective to promote consistency and transparency nationwide.

We agree that there may be State or local circumstances that impact the percent of Medicaid payments that is spent on compensation for direct care workers. Where possible, we have built flexibilities into this requirement as discussed further in this section II.B.5 to ensure that it addresses certain differences among HCBS programs and providers. Specifically, as we discuss in detail later in this section, we are modifying the policy we proposed at § 441.302(k) by: (1) adding a definition of excluded costs at § 441.302(k)(1)(iii) to ensure certain costs are not included in the minimum performance level calculation of the percentage of Medicaid payments to providers that is spent on compensation for direct care workers; (2) revising the definition of direct care worker proposed at § 441.301(k)(1)(ii) to clarify that clinical supervisors are included in the definition of direct care workers; (3) revising § 441.302(k)(3)(ii) to allow States to set a separate minimum performance level for small providers; (4) adding a new provision at § 441.302(k)(4) to provide an option for States to develop reasonable, objective criteria to identify small providers to meet a small provider minimum performance level set by the State; (5) adding a new provision at § 441.302(k)(5) to allow States to develop reasonable, objective criteria to exempt certain providers from meeting the minimum performance level requirement; and (6) adding a new provision at § 441.302(k)(7) to exempt the Indian Health Service (IHS) and Tribal health programs subject to 25 U.S.C. 1641 from the HCBS payment adequacy requirements at § 441.302(k). The specific modifications and the rationale for these modifications are discussed in greater detail in this section II.B.5. of the final rule.

Further, we are modifying the policy we proposed at § 441.302(k) to require States to comply with this HCBS payment adequacy policy beginning 6 years after the effective date of this final rule, rather than the 4 years we proposed. (We discuss this modification to § 441.302(k)(4), being redesignated as § 441.302(k)(8), in section II.B.5.h., of this rule.) We will continue to use our standard enforcement tools and discretion, as appropriate, when States must comply with § 441.302(k).

Ultimately, while we agree that providers generally have flexibility to determine how to spend their Medicaid payments, we believe it is important to reiterate the parameters for payment rates required under section 1902(a)(30)(A) of the Act. Section 1902(a)(30)(A) of the Act requires that payment rates must be economic and efficient; they must not be so high as to be uneconomic or inefficient. This provision also requires payment rates to be consistent with quality of care and sufficient to enlist enough providers to ensure a specified level of access to services for beneficiaries; rates must not be so low as to impermissibly limit beneficiaries' access to care or the quality of care they receive. The Supreme Court in *Armstrong* v. *Exceptional Child Center, Inc.,* in considering this provision, recognized that Congress was ''explicitly conferring enforcement of this judgment-laden standard upon the Secretary[,] . . . thereby achieving 'the expertise, uniformity, widespread consultation, and resulting administrative guidance that can accompany agency decision-making.' '' [101] We believe that implementing this statutory requirement includes some degree of oversight into how providers are allocating the Medicaid payments that they receive for delivering HCBS to beneficiaries. For example, if providers are spending a high proportion of their Medicaid payments on compensation to direct care workers but beneficiaries have difficulty accessing services and quality is compromised due to an insufficient number of direct care workers, then the payment rate may be too low to satisfy section 1902(a)(30)(A). Conversely, if concerns about access to and quality of services were not present and providers were spending a low proportion of their Medicaid payments on compensation to direct care workers, then the Medicaid payment rate may exceed a level that is economic and efficient, contributing to overhead spending and/or operating margin at levels higher than needed to ensure access and quality.

Comment: While several commenters agreed that a national minimum performance level is authorized by section 1902(a)(30) of the Act, a few other commenters disagreed that this policy is authorized by section 1902(a)(30) of the Act. These latter commenters noted that section 1902(a)(30)(A) of the Act requires each State plan for medical assistance to provide such methods and procedures relating to the utilization of, and the payment for, care and services available under the plan as may be necessary to assure that payments are consistent with efficiency, economy, and quality of care and are sufficient to enlist enough providers so that care and services are available under the plan at least to the extent that such care and services are available to the general population in the geographic area. As such, these commenters contended that this statutory provision applies to State plans, not to CMS, and speaks to the adequacy of payments to Medicaid-enrolled healthcare providers, not the providers' workforce. They stated that section 1902(a)(30)(A) of the Act cannot be read to delegate authority to us to prescribe specific wage pass-through requirements that States must impose upon providers.

Response: We believe that the statutes we cited support the components of our proposal. Regarding the applicability of section 1902(a)(30)(A) of the Act, we refer readers to our prior discussion of section 1902(a)(30)(A) of the Act in section II.B.5.a. of this rule. As we noted in that discussion, section 1902(a)(30)(A) of the Act provides us with authority to oversee that States assure that payments are consistent with efficiency, economy, and quality of care and are sufficient to enlist enough providers so that care and services are available under the plan, at least to the extent that such care and services are available to the general population in the geographic area. We did not propose to establish, and are not finalizing, specific payment rates. Instead, we proposed that States demonstrate that payments are sufficient to ensure care and services are available to beneficiaries by specifying a percentage of Medicaid payments that States must ensure is spent on compensation to direct care workers. We believe this policy will also promote, and be consistent with, economy, efficiency, and quality of care. We also disagree that section 1902(a)(30)(A) of the Act speaks only to provider enrollment. We believe that setting a performance level at which States support their State plan assurance that payments are consistent with efficiency, economy, and quality of care is an appropriate use of our oversight authority under section 1902(a)(30)(A) of the Act.

Comment: A few commenters agreed that sections 2402(a)(1) and 2402(a)(3) of the Affordable Care Act authorize the creation of a national minimum

[101] *Armstrong* v. *Exceptional Child Center, Inc.,* 575 U.S. 320, 328–29 (2015) (internal citations omitted).

performance requirement to support the direct care workforce. However, a few commenters disagreed with this application of section 2402(a)(1) of the Affordable Care Act. These commenters noted that section 2402(a)(1) of the Affordable Care Act requires the Secretary of the Department of Health and Human Services (HHS) to promulgate regulations to ensure that all States develop service systems that are designed to allocate resources for services in a manner that is responsive to the changing needs and choices of beneficiaries receiving non-institutionally-based long-term services and supports and that provides strategies for beneficiaries receiving such services to maximize their independence, including through the use of client-employed providers. Commenters stated that, although this provision speaks to HHS's authority to promulgate regulations, those regulations must pertain to ensuring that States develop systems to appropriately allocate resources to the types of services their beneficiaries need. These commenters contended that section 2402 of the Affordable Care Act allows HHS to, for example, require States to assess whether they should provide services such as delivering healthy meals to certain populations or allow beneficiaries to hire a family member to assist them (and fund the wages), but it does not provide HHS the authority to require States to impose upon providers wage pass-through requirements that are set at a specific minimum performance level.

Response: We disagree with commenters' interpretation of section 2402(a)(1) of the Affordable Care Act. Section 2402(a)(1) of the Affordable Care Act requires States to allocate resources for services in a manner that is responsive to the changing needs and choices of beneficiaries receiving HCBS. As discussed throughout this section, one of the most fundamental ways that HCBS programs meet the needs of beneficiaries is by having a sufficient direct care workforce to provide the services beneficiaries have been assessed to need. Without an adequate supply of workers, beneficiaries may not be able to access all the services that they need and that fully reflect their choices or preferences. We believe that setting a benchmark that helps measure whether Medicaid payments are being allocated in a way that is responsive to the HCBS workforce shortage and supports essential aspects of HCBS delivery is an appropriate application of our authority under section 2402(a)(1) of the Affordable Care Act.

Comment: One commenter did not agree that section 2402(a)(3)(B)(iii) of the Affordable Care Act authorized the application of a minimum performance requirement. The commenter noted that section 2402(a)(3)(B)(iii) of the Affordable Care Act requires the Secretary of HHS to promulgate regulations to ensure that all States develop service systems that are designed to improve coordination among, and the regulation of, all providers of such services under Federally and State-funded programs in order to oversee and monitor all service system functions to assure an adequate number of qualified direct care workers to provide self-directed personal assistance services. The commenter stated that this statutory provision both bestows authority upon HHS to promulgate regulations and specifically references the need to ensure an adequate number of direct care workers. However, the commenter noted that, like section 2402(a)(1) of the ACA, section 2402(a)(3)(B)(iii) specifies that HHS's role—and its authority to promulgate such regulations—is limited to ensuring that States develop service systems that assure an adequate number of qualified direct care workers to provide self-directed personal assistance services. The commenter also stated that this statutory provision applies only to the self-directed service delivery model and does not authorize HHS to promulgate wage pass-through requirements with respect to services delivered by provider agencies. The commenter stated, generally, that the Medicaid program's fundamental premise is to allow each State or Territory the ability to tailor its program to reflect its unique needs, and that this is at odds with a requirement for States to direct providers' behavior.

Response: We generally disagree with the commenter's analysis of section 2402(a)(3)(B)(iii) of the Affordable Care Act that it does not authorize the application of a minimum performance requirement. Section 2402(a)(3)(B)(iii) of the Affordable Care Act requires States to oversee and monitor HCBS system functions to assure there is a sufficient number of qualified direct care workers to provide self-directed personal assistance services. We believe that, to comply with this statutory requirement, States must have a sufficient direct care workforce to be able to deliver services that are responsive to the changing needs and choices of beneficiaries (regardless of delivery model), and, specifically, States must have a sufficient number of qualified direct care workers to provide self-directed personal assistance services. In other words, an insufficient direct care workforce generally will impact whether a State has a sufficient number of qualified direct care workers to provide self-directed personal assistance services in compliance with this requirement. However, we do agree that section 2402(a)(3)(B)(iii) of the Affordable Care Act speaks specifically to self-directed services. We cited this authority for the purposes of supporting our inclusion of self-directed services in this proposal.

As noted in prior responses, we believe that section 1902(a)(30)(A) of the Act and 2402(a)(1) of the Affordable Care Act authorize us to set parameters or benchmarks for HCBS expenditures (both including and in addition to expenditures for self-directed personal care services). Section 1902(a)(30)(A) of the Act provides us with authority to oversee that States assure that Medicaid payments for services are consistent with efficiency, economy, and quality of care and are sufficient to enlist enough providers so that care and services are available under the plan, at least to the extent that such care and services are available to the general population in the geographic area. Section 2402(a)(1) of the Affordable Care Act requires HHS to ensure States to allocate resources for services in a manner that is responsive to the changing needs and choices of beneficiaries receiving HCBS. States retain flexibility in how they construct their HCBS systems. Rather, we believe the minimum performance requirement we proposed, and are finalizing with modifications in this section II.B.5, sets a benchmark to help us determine whether States are ensuring that their HCBS systems are allocating sufficient resources to support the direct care workforce to ensure there are sufficient providers so that care and services are available to beneficiaries and that these services are consistent with efficiency, economy, and quality of care. We believe that setting such a benchmark that helps measure whether Medicaid payments are being allocated in a way that is responsive to the HCBS workforce shortage and supports essential aspects of HCBS delivery is an appropriate application of our authority under section 2402(a)(1) of the Affordable Care Act and applies to other HCBS in addition to the self-directed personal care services specifically addressed in section 2402(a)(iii)(B).

Comment: A number of commenters stated that we did not provide enough data to support the proposal for an 80 percent minimum performance level. One commenter suggested that by not providing sufficient data to support the

proposal, we have not fulfilled our obligations under the Administrative Procedure Act.

A number of commenters recommended we collect more data before finalizing a certain percent for the national minimum performance level. Some commenters suggested that a State-by-State analysis of rates and the potential impact of a minimum performance level would need to be performed before setting a minimum performance level. A few of these commenters suggested that helpful data could be collected from States' rate studies, HCBS waiver rates, provider cost reports, or the data we proposed in the proposed rule to be reported to us (including our proposals at § 441.311(e) and § 447.203, which we discuss in sections II.B.7. and II.C. of this rule, respectively). One commenter suggested using the electronic visit verification (EVV) system [102] as a tool for gathering relevant data. Several commenters also suggested that any additional data collection performed to support a national minimum performance level be used to assess unintended consequences of such a level.

A few commenters questioned the specific data relied on for the proposal of an 80 percent minimum performance level. They noted concerns including:

- A lack of support for the claim in the proposed rule that some States have set wage pass-through requirements as high as 90 percent;
- Use of data on the American Rescue Plan Act of 2021 section 9817 funds by a few States to increase worker wages, which have only been relatively recently distributed, and thus reflect limited data;
- State wage pass-through requirements as part of their activities to enhance, expand, or strengthen HCBS under section 9817 the American Rescue Plan Act of 2021were generally only applied to temporary rate increases, not entire rates; and
- Minnesota and Illinois, two States that have wage pass-through requirements, have their requirements set at 72 percent and 77 percent, respectively, and both use different definitions of compensation or direct care worker than what was proposed.

Response: As discussed in the proposed rule (88 FR 27982), we based our proposal on feedback from States that have implemented similar requirements for payments for certain HCBS under section 9817 of the ARP [103] or other State-led initiatives. For example, as noted by commenters, Minnesota has established a minimum threshold of 72.5 percent,[104] while Illinois has implemented a minimum threshold of 77 percent, for similar requirements for HCBS payments as we proposed.[105] To further clarify the data that we used to inform our proposal, which was referenced in footnote 81 in the proposed rule (88 FR 27983 to 27984), we note the following examples of different types of States' wage pass-through requirements that States added to spending plans for ARP section 9817:

- Indiana announced a Direct Service Workforce Investment Grant in which 95 percent of the grant funds must be spent on direct service professionals.[106]
- Massachusetts required that HCBS providers use 90 percent of a rate increase to support their direct care workers.[107]
- North Carolina required that 80 percent of its rate increases for certain HCBS be spent on direct care worker wages.[108]
- West Virginia set different wage pass-through requirements (ranging from 50 percent to 100 percent) for the amount of the rate increase that would be allocated to direct care workers providing services to beneficiaries in several of the State's waiver programs.[109]

We acknowledge that we are unable to present a State-by-State study of the impact of a specific minimum performance level on all State Medicaid programs and providers. The variability among HCBS programs (including staffing requirements, service definitions, and rate methodologies) poses challenges to performing and presenting a multi-State analysis of the allocation of Medicaid payments to direct care workers using existing available data, such as rate studies or cost reports. We also note that information from EVV system reporting would only pertain to use of personal care services or home health aide services (not homemaker services) and would not speak to rates. We agree that the reporting requirement we proposed, and are finalizing in this rule, at § 441.311(e) may generate standardized data that is more amenable to national comparisons.

We also believe that the reporting requirement at § 441.311(e) may yield important data that will support transparency around the portion of Medicaid payments being shared with direct care workers; such transparency in and of itself may well encourage States and providers to look critically at their rates and how they are allocated. Further, we believe that gathering and sharing data about the amount of Medicaid dollars that are going to the compensation of workers is a critical step in understanding the ways we can enact policies that support the direct care workforce and thereby help advance access to high quality care for Medicaid beneficiaries. However, we believe that a reporting requirement alone will not be as effective at stabilizing the direct care workforce.

We believe that compensation levels are a significant factor in the creation of a stable workforce, and that a stable workforce will result in better qualified employees, lower turnover, and safer and higher quality care. If individuals are attracted to the HCBS workforce and incentivized to remain employed in it with sufficient compensation, the workforce is more likely to be comprised of workers with the training, knowledge, and experience to meet the diverse and often complex needs of individuals with disabilities and older adults receiving HCBS. A stable and qualified workforce will also enable beneficiaries to access providers of the services they have been assessed to need. As noted in an earlier comment

[102] Section 12006 of the 21st Century Cures Act (Pub. L. 114–255) requires States to have EVV systems for Medicaid personal care services and home health care services.

[109] West Virginia Department of Health and Human Resources, ''Spending Plan for Implementation of American Rescue Plan Act of 2021, Section 9817.'' *https://dhhr.wv.gov/bms/News/Documents/WV%20State%20ARP%20HCBS%20Spending%20Plan.pdf.*

summary, commenters almost unanimously agreed that the direct care workforce shortage is posing extensive challenges to HCBS access and quality of care. We believe that setting a minimum performance requirement that we have determined to be reasonable based on available information (and is supported by many commenters) is an appropriate exercise of our responsibility to oversee the sufficiency of Medicaid payments under section 1902(a)(30)(A) of the Act and States' allocation of resources under section 2402(a) of the Affordable Care Act.

We agree that the data from States that implemented wage pass-throughs through activities in their ARP section 9817 spending plans is relatively recent. However, we do not believe that data should be disqualified simply because it was generated recently; such data is likelier to provide a more current snapshot of States' Medicaid rates and the needs of their direct care workforce.

We also agree that States applied wage pass-through requirements to rate increases that they were implementing as part of their ARP section 9817 spending plans and that at least some of these wage pass-through requirements were temporary. As such, these percentages might not be as relevant to the selection of a minimum performance level as a permanent wage pass-through requirement applied to the entire Medicaid rate. That said, we do believe that these data are useful for illustrating that the need to support direct care workers' wages is relevant across the country, and that States and interested parties have not only identified increases in wages for direct care workers as a priority, but they have also identified allocating specific portions of Medicaid rates as an appropriate mechanism for addressing low wages. We echo a comment summarized earlier that the advantage of establishing a permanent minimum performance requirement is that it creates a stable support for the direct care workforce, rather than intermittent increases in compensation that are dependent on specific actions taken by State or Federal legislatures.

As observed by some commenters, the percent we proposed, at 80 percent, is slightly higher than the wage pass-through requirements set by Minnesota and Illinois. We believe that the 80 percent minimum performance level we are finalizing is informed by the current range of the wage pass-through requirements set by those States, but is set slightly higher to encourage further steps towards improving compensation for workers. We also note that we are not required to replicate precisely what certain States have done.

We continue to believe 80 percent is the feasible performance level to ensure that payments made for Medicaid HCBS are appropriately allocated to direct care workers' compensation to ensure sufficient providers for beneficiaries to access HCBS as approved in their person-centered plans. However, given that the 80 percent minimum performance is higher than what States have currently set in terms of permanent wage pass-through requirements, we will provide States with additional time to come into compliance with the 80 percent performance level. We are finalizing at § 441.302(k)(8) a modification to the applicability date for § 441.302(k) to indicate that States must comply with this requirement at § 441.302(k) beginning 6 years after the effective date of this rule, rather than 4 years as proposed. We will continue to use our standard enforcement tools and discretion, as appropriate, when States must comply with § 441.302(k). As discussed in greater detail below, we are also finalizing additional flexibilities that States, at their option, may utilize to apply a different percentage for small providers and exempt certain providers that experience hardships from the State's calculation for meeting these performance levels. We also describe below an exemption of the Indian Health Service (IHS) and Tribal health programs subject to 25 U.S.C. 1641 from the HCBS payment adequacy requirements.

Comment: A significant number of commenters stated that an 80 percent minimum performance level, if finalized, would not leave providers enough money for costs associated with administrative tasks, programmatic activities, supervision, technology, office or facility expenses, training, or travel reimbursement. Many commenters noted the 80 percent minimum performance level would result in unintended consequences—namely that affected HCBS providers would cut back on services, limit or stop serving Medicaid beneficiaries, or close altogether. A few commenters expressed concern that our proposal would result in fewer new providers enrolling as Medicaid HCBS providers. Many commenters worried that such reductions in available services or the provider pool would reduce, rather than increase, beneficiaries' access to high-quality HCBS. A few commenters worried that HCBS provider closures, as a result of the proposed policy, could result in more beneficiaries moving into institutional settings.

Several commenters also expressed the belief that the 80 percent minimum performance level would discourage innovation among providers. One commenter suggested that providers would be penalized if they relied on assistive technology, remote supports, or other technology solutions to support beneficiaries in lieu of human assistance.

Response: We thank commenters for their feedback. As discussed in greater detail later in this section, we are modifying the policy we proposed at § 441.302(k)(3) to establish certain exceptions from the minimum performance level, and to establish a 6-year effective date, rather than the 4 years we had proposed. We will continue to use our standard enforcement tools and discretion, as appropriate, when States must comply with § 441.302(k). As discussed in greater detail below, we are also: (1) adding a definition of excluded costs at § 441.302(k)(1)(iii) to exclude certain costs from the minimum performance level calculation of the percentage of Medicaid payments to providers that is spent on compensation for direct care workers; (2) revising the definition of direct care worker proposed at § 441.301(k)(1)(ii) to clarify that clinical supervisors are included in the definition of direct care workers; (3) revising § 441.302(k)(3)(ii) to allow States to set a separate minimum performance level for small providers; (4) adding a new provision at § 441.302(k)(4) to provide an option for States to develop reasonable, objective criteria to identify small providers to meet a small provider minimum performance level set by the State; (5) adding a new provision at § 441.302(k)(5) to allow States to develop reasonable, objective criteria to exempt certain providers from meeting the minimum performance level requirement; and (6) adding a new provision at § 441.302(k)(7) to exempt the Indian Health Service (IHS) and Tribal health programs subject to 25 U.S.C. 1641 from the HCBS payment adequacy requirements at § 441.302(k).

We believe that these amended requirements will address some commenters' concerns about leaving providers sufficient administrative funds for certain personnel and administrative activities and will meet the needs of providers that are small or experiencing other challenges in meeting the minimum performance level.

We always encourage providers to find innovative ways to deliver services but believe that these services (even if delivered with the assistance of

technology or telehealth) at their core require direct care workers to provide them. It is difficult to imagine how strategies that do not aim to stabilize direct care worker wages would improve the efficacy or quality of these services. We do believe, however, that placing a limit on the amount of the Medicaid payment going to expenses other than direct care worker compensation could encourage innovative efforts to improve and streamline administrative activities.

In response to commenters' concerns that this proposal would have the unintended consequence of causing program cuts or provider closures, we do not believe this outcome would be the result from implementing the proposed minimum performance level. We believe that the current environment—in which providers and beneficiaries routinely struggle to find qualified direct care workers, and direct care workers leave the HCBS workforce for better-paying jobs—poses a significant threat to access and community integration because there are an insufficient number of direct care workers to meet beneficiaries' needs. In addition, the direct care worker shortage threatens beneficiary access to services and community integration as such shortage may lead to provider closures if providers are unable to find enough workers to deliver services. This shortage also threatens service quality through the loss of well-trained and experienced direct care workers, if left unaddressed. Further, we believe that the modifications we are finalizing to this requirement will help to mitigate these concerns.

Comment: Some commenters (including beneficiaries, providers, labor organizations, disability or legal advocacy organizations, and research and policy organizations) agreed that 80 percent was an appropriate or reasonable payment adequacy requirement. A couple of these commenters based their support on personal experience, including a few who indicated that they were providers, and stated that 80 percent was an achievable minimum performance level. A few commenters pointed out that the medical loss ratio (MLR) for managed care is 85 percent. One commenter suggested that the minimum performance level be increased to 85 percent to align with the MLR. One commenter recommended that the 80 percent standard should account for necessary administration of HCBS programs, including training. This commenter stated that, if it does not account for necessary administration, the payment rates that States and managed care programs have established are likely too low. The commenter also recommended that, once the requirement is implemented, we review whether the percentage should be higher than 80 percent.

A number of commenters suggested alternative, lower minimum performance levels. Several commenters (including providers, State Medicaid agencies, a labor organization, and an advocacy organization) suggested minimum performance levels ranging from 70 percent to 75 percent. A few of the commenters who recommended 75 percent self-identified as providers and believed that 75 percent was achievable based on their own experiences and expenditure calculations. One commenter recommended we mandate a 72.35 percent minimum performance level and change the definition of compensation to exclude the 7.65 percent employer share of FICA taxes for direct care workers; the commenter believed this would reduce confusion regarding employers' shares of taxes and align the definition of compensation with that used by some States. A few commenters recommended 70 percent based on experience with rate studies or provider expenditures in their States.

Several commenters, including providers and commenters representing State agencies, recommended setting a minimum performance level at either 60 percent or 65 percent, based on the commenters' personal experience running a provider agency or overseeing provider agencies. One commenter suggested a minimum performance level of 60 percent based on a hypothetical analysis of one State's HCBS rates and projected expenditures.

While not making specific recommendations, several commenters (mostly providers and State Medicaid agencies) submitted comments that included anecdotal data of what providers spend on compensation; these percentages ranged from 55 to 81 percent.

Response: We thank commenters for engaging in this issue, including sharing their own experiences allocating Medicaid payments. While we found the feedback provided by commenters instructive, both the range of recommendations and the anecdotal nature of information supporting most of the recommendations prevented us from relying on the recommendations to finalize additional modifications to the proposed minimum performance at the provider level requirement at § 441.302(k)(3).

We do not agree that we should increase the minimum performance level upward to match the 85 percent MLR required in managed care as the MLR is a calculation and associated reporting requirement for Medicaid managed care contracts in accordance with § 438.8 and is not specific to HCBS.

Additionally, as discussed previously and in more detailed responses below, we are finalizing some modifications related to the exclusion of certain costs, the inclusion of clinical supervisors in the definition of direct care workers, and options for a small provider minimum performance level and hardship exemptions for some providers that will change somewhat the impact of the minimum performance level. Further, we are modifying the policy we proposed at § 441.302(k) to establish certain exceptions from the minimum performance level proposed at § 441.302(k)(3), and requiring States to comply beginning 6 years after the effective date of this final rule, rather than the 4 years we had proposed. We will continue to use our standard enforcement tools and discretion, as appropriate, when the minimum performance level requirement go into effect. We believe these modifications are necessary to balance the goal of stabilizing the direct care workforce with the operational realities faced by providers of varying sizes and locations.

Comment: A few commenters suggested that the minimum performance level, if finalized, should be applied at the State level, rather than the provider level. Commenters suggested that applying the minimum performance level at the State level would create some flexibility, as this would require only that all providers in the State meet the minimum performance level in aggregate. However, a few other commenters recommended that we clarify that the minimum performance level applies at the provider level.

Response: We clarify that we intended to propose that the minimum performance level policy would apply at the provider level, meaning that the State must ensure that each provider spends Medicaid payments they receive for certain HCBS on direct care worker compensation in accordance with the minimum performance level requirement. As noted previously, we believe it is important for States to hold providers individually accountable for how they allocate their Medicaid payments and are finalizing other policies, discussed below and elsewhere in this section II.B.5. of the final rule, for States to accommodate providers that need additional flexibility. We note that there was an error in the heading of § 441.302(k)(3), which was proposed

as ''Minimum performance at the State level.'' We apologize for any confusion this may have caused; we believe that most commenters, based on their comments, understood the minimum performance requirement to apply at the provider level. Accordingly, we are finalizing § 441.302(k)(3) with modification by revising the heading for § 441.302(k)(3) to read ''Minimum performance at the provider level,'' as it was originally intended to read.

Additionally, to ensure that it is understood that the minimum performance level that must be met by the State is calculated as the percentage of total payment (not including excluded costs, which are discussed in greater detail in section II.B.5.d. of this final rule) to a **provider** for furnishing homemaker, home health aide, or personal care services, as set forth at § 440.180(b)(2) through (4), represented by **the provider's** total compensation to direct care workers. (New text in bold font).

Comment: A significant number of commenters worried that a national minimum performance level, regardless of the percentage, would have a disparate impact on providers that are small, new, in rural or underserved areas, or run by/for people from specific underserved communities (such as indigenous people) or individuals for whom English is a second language. Some commenters worried that the proposal favors large providers and would lead to consolidation of providers. A few other commenters worried that this would mean that beneficiaries would have fewer choices of providers and have to work with larger corporate providers. One commenter worried that a national minimum performance level would have a disparate impact on agency providers (which may have more overhead costs), as opposed to providers of self-directed services.

A number of commenters requested that if we finalize a national payment adequacy requirement, we include additional flexibilities to minimize unintended consequences on certain providers, particularly small and rural providers. One commenter suggested that we allow for ''hardship exemptions'' on a case-by-case basis. One commenter suggested that we allow States to exempt providers that pay workers 200 percent of the Federal Poverty Level. Another commenter suggested that we exempt States from the payment adequacy requirement if the State has a minimum hourly base wage of $15 per hour applicable to direct care workers delivering the affected services.

Other commenters recommended adjustments to the national minimum performance level, rather than exemptions. A few commenters suggested that we allow for a variable payment adequacy requirement or for ''scaling'' of the minimum performance level, adjusted for different provider sizes or different types of services. A few other commenters recommended requiring a range to identify rates, which could vary by provider size, number of Medicaid beneficiaries served, rural or urban status, hardship status (risk of closure), or other characteristics. One commenter suggested the rate could vary by delivery system or service type. A number of commenters recommended that we allow States to set their own payment adequacy requirement.

A small number of commenters raised concerns that requiring a minimum performance level would conflict with 25 U.S.C. 1641, governing how IHS and Tribal health programs (as defined in 25 U.S.C. 1603(25)) may use Medicare and Medicaid funds, and other applicable laws providing for Tribal self-governance and self-determination. One commenter recommended that we exempt IHS and Tribal health programs from the requirement.

Response: We believe that at least some of commenters' concerns about provider impact may be alleviated by some of the modifications we are finalizing to our proposed policy in this section II.B.5. of the final rule. In particular, we are excluding travel costs from the calculation of the minimum performance level, as increased travel expenses were cited as a primary concern for rural providers. (We refer readers to the discussion of the definition of compensation and excluded costs in section II.B.5.d. of this rule, below.)

We note that the purpose of this proposal is not to set a particular wage for direct care workers, but to ensure that Medicaid payments are being allocated in ways that promote efficiency, economy, and quality of care. We believe that all States are accountable to this requirement and should hold their providers accountable. However, we also agree that some small providers may experience additional challenges in meeting a payment adequacy requirement, as any fixed costs must be covered by a smaller pool of revenues than for larger providers, and small providers have fewer opportunities for administrative efficiencies than larger providers do. We share commenters' desires that the minimum performance level not have a disparate impact on small providers, new providers that may still be developing their processes, providers that may, for various reasons, have additional administrative tasks (such as an increased need for interpreter or translation services), or providers that face disparately high costs, such as providers that may have to pay for temporary lodging for direct care workers delivering services to clients in extremely rural areas.

While we are finalizing a minimum performance level at § 441.302(k)(3)(i) as previously discussed that States must apply to most of their providers, we also agreed with commenters' suggestions. We are finalizing our policy with modifications at § 441.302(k)(3)(ii) to provide that States may apply a different minimum percentage to small providers that the States develop in accordance with requirements at § 441.302(k)(4). These modifications at § 441.302(k)(3)(ii) and (k)(4) will allow States the option to require a reasonable number of small providers, as defined using reasonable, objective criteria set by the State through a transparent process that must include public notice and opportunities for comment from interested parties, to meet a different minimum performance level. This separate minimum performance level would also be set by the State based on reasonable, objective criteria through a transparent process that must include public notice and opportunities for comment from interested parties. In order to apply a small provider minimum performance level, States must ensure it is supported by data or other reasonable factors in the State. We also note that States would still need to collect and report data as required in § 441.302(k)(2) and § 441.311(e) (discussed in section II.B.7. of this rule) for providers subject to the small provider minimum performance level.

Further, under our authority at section 1902(a)(6) of the Act, we are finalizing an additional provision at § 441.302(k)(6)(i), to require that States that establish a small provider minimum performance level in accordance with § 441.302(k)(4) must report to CMS annually, in the form and manner, and at a time, specified by CMS, on the following: the State's small provider criteria; the State's small provider minimum performance level; the percent of providers of services set forth at § 440.180(b)(2) through (4) that qualify for the small provider performance level; and a plan, subject to CMS review and approval, for small providers to meet the minimum performance requirement at § 441.302(k)(3)(i) within a reasonable period of time.

We also agree with commenters that some providers may experience hardships with meeting a payment adequacy requirement because, for instance, they are new to serving Medicaid beneficiaries and thus have not had time to develop administrative efficiencies. Additionally, we agree that special attention needs to be paid where a provider may be at risk of closure and could cause beneficiaries to lose access to HCBS in a particular area. We also agree that States are best positioned to identify the nature of the hardships and which providers are experiencing these hardships. As a result, we are finalizing a modification at § 441.302(k)(5) to allow States to develop reasonable, objective criteria through a transparent process to exempt from the minimum performance requirement at § 441.302(k)(3) a reasonable number of providers determined by the State to be facing extraordinary circumstances that prevent their compliance with § 441.302(k)(3). The State must develop these criteria through a transparent process that includes public notice and opportunities for comment from interested parties. If a provider meets the State's hardship exemption criteria, the provider should be excluded from the State's calculation of the minimum performance level at § 441.302(k)(3). We note that we expect that most providers would be subject to a hardship exemption on a temporary basis, and that States would still need to collect and report data as required in § 441.302(k)(2) and § 441.311(e) for providers with hardship exemptions.

Further, under our authority at section 1902(a)(6) of the Act, we are finalizing an additional provision at § 441.302(k)(6)(ii) to require that States that provide a hardship exemption to providers facing extraordinary circumstances must report to CMS annually, in the form and manner, and at a time, specified by CMS, on the State's hardship criteria, the percentage of providers of services set forth at § 440.180(b)(2) through (4) that qualify for a hardship exemption, and a plan, subject to CMS review and approval, for reducing the number of providers that qualify for a hardship exemption within a reasonable period of time.

We plan to issue guidance on both the small provider performance level and the hardship exemption and encourage States to consult with CMS as they develop their criteria. However, we note that, for States in which a small proportion of providers (less than 10 percent of the total number of providers of services at § 440.180(b)(2) through (4)) qualify for either the small provider performance level or a hardship exemption, CMS may waive the requirements, at § 441.302(k)(6)(i)(D), for States to report on a plan for small providers to meet the minimum performance level at § 441.302(k)(3)(i) within a reasonable period of time, and at § 441.302(k)(6)(ii)(C), for States to report on a plan for reducing the number of providers that qualify for a hardship exemption within a reasonable period of time. We are finalizing this waiver at § 441.302(k)(6)(iii).

In addition, we are modifying the date for when States must comply with the requirements at § 441.302(k) to be beginning 6 years after the effective date of the final rule, rather than the 4 years we had proposed. (We refer readers to our discussion in II.B.5.h. of this rule.) We will continue to use our standard enforcement tools and discretion, as appropriate, when the minimum performance level requirement goes into effect.

Finally, we are persuaded by commenters who raised concerns about interactions between statutory requirements for IHS and certain Tribal health programs health programs subject to 25 U.S.C. 1641 and the proposed requirement at § 441.302(k). Congress has already passed laws, such as 25 U.S.C. 1641, specifying how IHS and Tribal health programs (as defined in 25 U.S.C. 1603(25)) are to use their Medicaid collections. Because Congress has already specified how such funds must be used, we are finalizing an exemption at § 441.302(k)(7) to the HCBS payment adequacy requirements at § 441.302(k) for IHS and Tribal health programs subject to 25 U.S.C. 1641.

After consideration of the comments received, we are finalizing § 441.302(k)(3) with modifications, as well as finalizing new requirements at § 441.302(k)(4), (5), and (6). The requirements we are finalizing with modifications are as follows:

We are finalizing § 441.302(k)(3) with several modifications to retitle the requirement as *Minimum performance at the provider level* and clarify the components of the required calculation and the services that fall within this requirement. We also made modifications at § 441.302(k)(3) to clarify that excluded costs are not included in the calculation of the percentage of total payments to a provider that is spent on compensation to direct care workers and to specify the specific services (homemaker, home health aide, and personal care services) to which the payment adequacy requirement applies. We are also modifying § 441.302(k)(3) to note the exceptions to the minimum performance level that we are adding at (k)(5) (hardship exemption) and (k)(7) (IHS and Tribal health programs subject to 25 U.S.C. 1641). As finalized, § 441.302(k)(3) specifies that, **except as provided in paragraphs (k)(5) and (7)**, the State must meet the following minimum performance level as applicable, calculated as the percentage of total payment (not including excluded costs) *to a provider* for furnishing homemaker, home health aide, or personal care services, as set forth at § 440.180(b)(2) through (4), represented by the *provider's* total compensation to direct care workers. (New text in bold font).

We are modifying the language at § 441.302(k)(3)(i) to read that the minimum performance level of 80 percent applies to all payments to a provider, except as provided in paragraph (k)(3)(ii). We are finalizing a new requirement at § 441.302(k)(3)(ii) to read that at the State's option, for providers determined by the State to meet its State-defined small provider criteria in paragraph (k)(4)(i) of this section, the State must ensure that each provider spends the percentage set by the State in accordance with paragraph (k)(4)(ii) of this section of total payments the provider receives for services it furnishes as described in paragraph (k)(3) of this section on total compensation for direct care workers who furnish those services.

We are redesignating the applicability date we proposed at § 441.302(k)(4) as § 441.302(k)(8), as discussed further in section II.B.5.f. of this rule. We are finalizing a new § 441.302(k)(4) and adding new paragraphs (i) and (ii) to provide an option for States to develop reasonable, objective criteria through a transparent process to identify small providers to meet the State-defined small provider minimum performance level; require that the transparent process for developing criteria to identify providers that meet the small provider minimum performance level must include public notice and opportunities for comment from interested parties; and require that the small provider minimum performance level be set based on reasonable, objective criteria the State develops through a transparent process that includes public notice and opportunities for comment from interested parties.

We are finalizing a new § 441.302(k)(5) to allow States to develop reasonable, objective criteria through a transparent process to exempt from the minimum performance requirement at § 441.302(k)(3) a reasonable number of providers determined by the State to be facing

extraordinary circumstances that prevent their compliance with § 441.302(k)(3). The State must develop these criteria through a transparent process that includes public notice and opportunities for comment from interested parties. If a provider meets the State's hardship exemption criteria, the provider should be excluded by the State from its calculation of the State's compliance with the minimum performance level at § 441.302(k)(3).

We are finalizing a new provision at § 441.302(k)(6) to require States to report on their development and use of the small provider minimum performance level and hardship exemption. Specifically, at § 441.302(k)(6)(i), States that establish a small provider minimum performance level in accordance with § 441.302(k)(4) must report to CMS annually, in the form and manner, and at a time, specified by CMS, on the following: the State's small provider criteria; the State's small provider minimum performance level; the percent of providers of services at § 440.180(b)(2) through (4) that qualify for the small provider performance level; and a plan, subject to CMS review and approval, for small providers to meet the minimum performance requirement at § 441.302(k)(3)(i) within a reasonable period of time. We are also requiring at § 441.302(k)(6)(ii) that States that provide a hardship exemption to providers facing extraordinary circumstances must report to CMS annually, in the form and manner, and at a time, specified by CMS, on the State's hardship criteria, the percentage of providers of services at § 440.180(b)(2) through (4) that qualify for a hardship exemption, and a plan, subject to CMS review and approval, for reducing the number of providers that qualify for a hardship exemption within a reasonable period of time. Additionally, we are finalizing a waiver at § 441.302(k)(6)(iii) that specifies that CMS may waive the reporting requirements in paragraphs (6)(i)(D) or (6)(ii)(C), as applicable, if the State demonstrates it has applied the small provider minimum performance level at § 441.302(k)(4)(ii) or the hardship exemption at § 441.302(k)(5) to a small proportion of the State's providers.

Finally, we are finalizing a new § 441.302(k)(7) specifying that the Indian Health Service and Tribal health programs subject to the requirements at 25 U.S.C. 1641 are exempt from the requirements at § 441.302(k).

c. Other Services (§ 441.302(k)(3))

We considered whether the requirements we proposed at § 441.302(k)(3)(i) related to the percent of Medicaid payments going to the direct care workforce should apply to other services in addition to homemaker, home health aide, or personal care services (as set forth at § 440.180(b)(2) through (4)), such as adult day health, habilitation, day treatment or other partial hospitalization services, psychosocial rehabilitation services, and clinic services for individuals with chronic mental illness. However, these services may have facility or other indirect costs for which we do not have adequate information to determine a minimum percent of the payment that should be spent on compensation for the direct care workforce. We requested comment on whether the proposed requirements at § 441.302(k)(3)(i) related to the percent of payments going to the direct care workforce should apply to other services listed at § 440.180(b). In particular, in recognition of the importance of services provided to individuals with intellectual or developmental disabilities, we requested comment on whether the proposed requirements at § 441.302(k)(3)(i) related to the percent of payments going to the direct care workforce should apply to residential habilitation services, day habilitation services, and home-based habilitation services.

We also requested comment on the following options for the minimum percentage of payments that must be spent on compensation to direct care workers for each specific service that this provision should apply if this provision should apply to other services at § 440.180(b): (1) 65 percent; (2) 70 percent; (3) 75 percent; and (4) 80 percent. Specifically, we requested that commenters respond separately on the minimum percentage of payments for services delivered in a non-residential community-based facility, day center, senior center, or other dedicated physical space, which would be expected to have higher other indirect costs and facility costs built into the Medicaid payment rate than other HCBS. If an alternate minimum percentage is recommended, we requested that commenters provide the rationale for that minimum percentage.

We further clarified that we were requesting comment on a different range of options for the other services at § 440.180(b) than for the services at § 440.180(b)(2) through (4) because we expect that some of the other services at § 440.180(b), such as adult day health and day habilitation services, may have higher other indirect costs and facility costs than the services at § 440.180(b)(2) through (4). We also requested that commenters respond separately on the minimum percentage of payments for facility-based residential services and other facility-based round-the-clock services that have other indirect costs and facility costs that would be paid for at least in part by room and board payments that Medicaid does not cover. If a minimum percentage is recommended for any services, we requested that commenters provide the rationale for that minimum percentage.

We received public comments on these proposals. The following is a summary of the comments we received and our responses.

Comment: One commenter requested additional clarification on how the services we proposed to be included in the requirements at § 441.302(k)(3) were selected. One commenter suggested that we only apply the minimum performance requirement to personal care services. The commenter suggested we could align the requirement with the EVV system reporting requirement,[110] which applies to personal care services, including personal care services delivered as part of habilitation services.

Response: The priority of this proposal is to support the direct care workforce, and to this end we have focused on accountability for services that rely on direct care workers to perform the core activities. As noted in the background discussion of this provision and in previous responses, the services subject to the minimum performance requirement were selected because they are unlikely to have facility costs as part of the rate or as a component of the core service. We also note that the data we reviewed when determining an appropriate minimum performance requirement focused on home-based services, not facility-based services. Additionally, as identified in an analysis performed by CMS, the three services we proposed to be subject to this requirement at § 441.302(k) fall within the taxonomy of home-based services, which are both high-volume and high-cost.[111] Thus, we believe that targeting these services will maximize the impact of this requirement by addressing the needs of many beneficiaries and promoting better oversight of the allocation of Medicaid rates for frequently used services. Given these similarities among homemaker, home health aide, and personal care

[110] Section 12006 of the 21st Century Cures Act (Pub. L. 114–255).

[111] Centers for Medicare & Medicaid Services. ''Trends in Rate Methodologies for High-Cost, High Volume Taxonomies.'' *https://www.medicaid.gov/sites/default/files/2019-12/trends-in-rate-august-2017.pdf.* Last access October 2, 2023.

services, we cannot find a justification for removing homemaker and home health aide services from this requirement.

Comment: A few commenters requested that we provide a more specific definition of personal care services. Commenters noted that States do not always use HCBS taxonomies consistently, and personal care services can be applied to a different constellation of activities in different waivers. Similarly, one commenter noted that the lack of definitions in the proposed rule for homemaker, home health aide, and personal care services is problematic because States do not use these terms consistently and use a variety of different terms to describe these services.

Response: We understand that States have service definitions for homemaker, home health aide, and personal care services that differ from the definition of homemaker, home health aide, and personal care services in the section 1915(c) waiver Technical Guide [112] and that States do not always use these terms consistently. However, codifying definitions of homemaker, home health aide, and personal care services would have broad implications for State's HCBS programs that would extend beyond the HCBS payment adequacy requirements in this final rule. We will provide additional subregulatory guidance and technical assistance to aid in implementation of the HCBS payment adequacy requirements and may consider addressing in future rulemaking.

Comment: Many commenters responded to our solicitation for comment on whether we should include habilitation services in the services subject to the minimum performance requirement. Most commenters who responded did not believe that habilitation services should be included in the requirement. They echoed our concerns that these services are likelier to include at least some activities in a provider-operated facility or residential setting, which changes the expected costs of providing and allocation of the payment for these services.

Much of the public feedback around habilitation services focused on the facility or residential portion of those services. Commenters noted that rent, utilities, property maintenance, and other costs associated with residential or facility-based services can vary significantly. One commenter suggested that if residential habilitation was included in the minimum performance requirement, the minimum performance level for residential habilitation should be set at 75 percent to account for additional administrative costs. A few other commenters suggested that a different minimum performance level should be set for habilitation services, if included, but did not specify a particular percentage.

Some commenters also suggested that residential services might require more, or different staffing levels, as well as different types of staff than home-based services, which might change the necessary minimum performance level. Commenters disagreed, however, on whether these staffing differences would necessitate a higher or lower minimum performance level than for in-home services, and commenters did not recommend a percentage to specifically address the perceived differences in staffing. One commenter objected to any discussion of residential settings, out of concern that this would appear to promote congregate settings in violation of the home and community-based settings requirements; the commenter stated that all services should be provided in the community.

Several commenters recommended that we not apply the minimum performance level at § 441.302(k)(3)(i) to habilitation services and encouraged us to collect data on the percent of payments for habilitation services.

Response: We believe that the comments we received affirm our decision not to apply the HCBS payment adequacy policy we are finalizing at § 441.302(k) to habilitation or other facility-based services (in which services are delivered in a provider-operated physical location and for which facility-related costs are included in the Medicaid payment rate) due to the number of additional or variable expenses associated with facility-based services. While outside the scope of this final rule, we refer readers to and our requirements for, and the criteria of, a home and community-based setting at § 441.301(c)(4) and (5).

We agree with commenters that additional data collection on habilitation services would be useful. Please refer to the discussion of § 441.311(e) in section II.B.7. of this rule, below.

Comment: Although not necessarily supporting the inclusion of habilitation services in the minimum performance requirement, commenters worried about the impact on beneficiaries receiving habilitation services, who are largely individuals with intellectual or developmental disabilities or behavioral health needs. Some commenters stated that direct care workers who had been providing habilitation services might switch to working for providers that offer homemaker, home health aide, or personal care services because they believed that the requirements at § 441.302(k), if finalized, would lead to increased wages paid to these workers or to Medicaid agencies allocating more resources for these services. One commenter speculated that, if a lower minimum performance level was set for residential habilitation, this would encourage more services to be provided in congregate settings because providers would try to take advantage of the lower minimum performance level. Several commenters that provided services to people with intellectual disabilities and people with mental illness suggested we amend § 441.302(k)(3)(i) to specify an exclusion for direct care workers (or direct service professionals) providing services for individuals with intellectual and developmental disabilities or severe mental illness, as they believed that many of these services are delivered as facility-based habilitation services; the commenters were concerned that these providers have additional non-compensation expenses that are not considered by the proposal, and that it was unclear whether facility-based services were already excluded from the proposal.

Response: We agree that, by excluding habilitation services from this requirement, we are excluding services that are used more frequently by certain populations. This was not our intent, and we do not intend to explicitly exclude certain services from this requirement on the basis of the population receiving the service. However, as noted above, because of differences in these services, we do not believe we can set an appropriate minimum performance level for these services at this time. Although we are not requiring that habilitation or other facility-based services (in which services are delivered in a provider-operated physical location and for which facility-related costs are included in the Medicaid payment rate) be included in the minimum performance requirement, States are able to set wage pass-through requirements of their own for such services to promote the stability of the workforce; we also believe that States may naturally adjust rates or wages in other services in response to the implementation of the minimum performance requirement for homemaker, home health aide, and personal care services.

[112] See Centers for Medicare & Medicaid Services, ''Application for a § 1915(c) Home and Community Based Waiver: Instructions, Technical Guide and Review Criteria.'' January 2019. Available *at https://wms-mmdl.cms.gov/WMS/help/35/Instructions_TechnicalGuide_V3.6.pdf.*

Comment: One commenter expressed a concern that the minimum performance requirement would apply to skilled nursing facilities. Several commenters requested that we clarify in § 441.302(k)(3)(i) that direct care workers would be excluded from the minimum performance requirement if they are providing services in residential settings. One commenter requested that we clarify that assisted living facilities or assisted living services are not included in the minimum performance requirement, while another commenter raised concern about a lack of clarity about whether the requirement applies to assisted living facilities.

Response: The requirements we are finalizing in this section II.B. of this rule only apply to HCBS, and the minimum performance requirement at § 441.302(k)(3) applies specifically to homemaker, home health aide, and personal care services as set forth at § 440.180(b)(2) through (4). However, while the minimum performance requirement would not apply to institutional services (because those are not HCBS), we decline to explicitly restrict the application of this requirement on the basis of different community-based settings. As we noted in prior responses, we selected homemaker, home health aide, and personal care services because these are typically services delivered in the home. However, we acknowledge that beneficiaries may live in different residential settings that are considered homes, and that these services may be bundled with other services delivered to beneficiaries in residential settings.

Comment: A number of commenters requested that we add private duty nursing to the services subject to the minimum performance requirement.

Response: We believe that at least some commenters may be referring to private duty nursing as defined at section 1905(a)(8) of the Act and § 440.80 of our regulations. As discussed in greater detail below in section II.B.5.g. of this rule, we are not planning to require that the minimum performance level be applied to services authorized under section 1905(a) at this time. We note that home health aide services, included in § 440.180(b)(3) but authorized as part of a section 1915(c) waiver, are included in the minimum performance requirement. It is possible that some services that commenters are characterizing as ''private duty nursing'' may fall within the category of a section 1915(c) home health aide service, even as we acknowledge that Federal requirements for private duty nursing specify that these are skilled care services provided by a registered nurse or licensed practical nurse.

Comment: A few commenters recommended that we apply the minimum performance requirement to a number of other services that are experiencing staffing shortages, including: job supports; respite provided in the community; community habilitation services; in-home cognitive rehabilitation therapy; and in-home physical, occupational and speech therapy services. A few commenters suggested, without specifying which services, that the minimum performance requirement ought to be expanded to other services, or that it would be easier to administer if applied to a broader array of services than just homemaker, home health aide, and personal care services.

Response: We thank the commenters for their suggestions and will take them under consideration for potential future rulemaking. As we noted earlier in this section of the final rule, we selected homemaker, home health aide, and personal care services because they are services for which we expect that the vast majority of payment to be comprised of compensation for direct care workers. Further, they are high-volume and high-cost services,[113] and as a result, we believe that targeting these services will maximize the impact of this requirement by addressing the needs of many beneficiaries and promoting better oversight of the allocation of Medicaid rates for frequently used services. We note that States are able to apply wage pass-through requirements to additional services if they choose.

After consideration of the comments received, we are finalizing our proposed language at § 441.302(k)(3) to apply the minimum performance requirement to homemaker, home health aide, and personal care services as set forth at § 440.180(b)(2) through (4).

d. Definition of Compensation (§ 441.302(k)(1)(i))

At § 441.302(k)(1)(i), we proposed to define compensation to include salary, wages, and other remuneration as defined by the Fair Labor Standards Act and implementing regulations (29 U.S.C. 201 *et seq.,* 29 CFR parts 531 and 778), and benefits (such as health and dental benefits, sick leave, and tuition reimbursement). In addition, we proposed to define compensation to include the employer share of payroll taxes for direct care workers delivering services under section 1915(c) waivers. We considered whether to include training or other costs in our proposed definition of compensation. However, we determined that a definition that more directly assesses the financial benefits to workers would better ensure that a sufficient portion of the payment for services went to direct care workers, as it is unclear that the cost of training and other workforce activities is an appropriate way to quantify the benefit of those activities for workers. We requested comment on whether the definition of compensation should include other specific financial and non-financial forms of compensation for direct care workers.

We received public comments on these proposals. The following is a summary of the comments we received and our responses.

Comment: A couple of commenters noted support for our definition of compensation and encouraged us to finalize the definition as proposed.

Response: We thank the commenters for their support.

Comment: Several commenters expressed concern that workers' overtime pay would not be considered part of the definition of compensation.

Response: Our definition of compensation as proposed at § 441.302(k)(1)(i)(A) included salary, wages, ''and other remuneration as defined by the Fair Labor Standards Act'' and its regulations. As the Fair Labor Standards Act includes overtime pay in its definition of wages, overtime pay therefore is included in our definition of compensation as well.

Comment: Many commenters supported the inclusion of health and dental insurance and sick leave in the definition of benefits at § 441.302(k)(1)(i)(B). A few commenters requested that life insurance, disability insurance, and retirement contributions also be added to this definition. Several commenters also requested clarification as to whether paid time off was included in the definition of compensation, and a few suggested that it should be included.

One commenter noted that our definition of compensation was too broad, particularly the use of the term ''such as'' when describing the inclusion of benefits. The commenter expressed concern that employers could over-include items in compensation by calling them ''benefits.'' One commenter worried that if too many benefits were included in compensation, this would reduce workers' take-home pay.

One commenter expressed concerns that it will be difficult for State

[113] Centers for Medicare & Medicaid Services. ''Trends in Rate Methodologies for High-Cost, High Volume Taxonomies.'' *https://www.medicaid.gov/sites/default/files/2019-12/trends-in-rate-august-2017.pdf.* Last access October 2, 2023.

Medicaid agencies to quantify benefits included in direct care worker compensation.

Response: We believe that all the items identified by these commenters—life insurance, disability insurance, retirement, and paid time off—would be reasonably considered part of compensation. In its glossary, the Bureau of Labor Statistics (BLS) defines compensation as ''employer costs for wages, salaries, and employee benefits,'' and notes that the National Compensation Survey includes the following categories in employee benefits: insurance (life insurance, health benefits, short-term disability, and long-term disability insurance); paid leave (vacations, holidays, and sick leave); and retirement (defined benefit and defined contribution plans).[114] We believe the items suggested by the commenters align with our intent and are reflected by a common understanding of ''benefits'' as exemplified in the BLS glossary.

To help clarify what is meant by ''benefits,'' we are modifying the language we proposed at § 441.302(k)(1)(i)(B) in this final rule. We are retaining ''health and dental benefits'' but also are adding to the list ''life and disability insurance.'' We note that the definition used by BLS simply refers to health benefits, life insurance, and different types of disability insurance collectively as ''insurance,'' but we believe that spelling out examples of types of insurance is useful here. In the context of our definition, ''insurance'' listed by itself might be unclear (since it could be confused with other types of insurance that would not be considered compensation, like employers' liability insurance), and we wish to make it clear that the benefits must benefit the employee directly. We are also modifying ''sick leave'' to the broader term ''paid leave,'' as this should be understood to cover any time for which the employee is paid, whether it be for sick leave, holidays, vacations, and so forth. We also are adding retirement, which we believe is also a useful blanket term for different types of retirement plans or contributions on the employee's behalf. After consideration of public comments, we are finalizing § 441.302(k)(1)(i)(B) with modification to specify that compensation includes benefits, such as health and dental benefits, life and disability insurance, paid leave, retirement, and tuition reimbursement.

When proposing that benefits be included in the definition of compensation, we intentionally included the phrase ''such as'' to indicate that the examples of benefits provided in the definition is not exhaustive. We did not attempt to list all possible benefits in the regulatory definition, as we believe that would run the risk of creating a definition that is too narrow. We plan to provide technical assistance to States on how to help ensure that providers are applying a reasonable definition of ''benefits'' and are only counting expenses thereunder that would reasonably be considered an employee benefit.

Comment: Some commenters supported including employers' share of payroll taxes in the definition of compensation at § 441.302(k)(1)(i)(C). However, several commenters recommended that this expense be removed from the definition, as these are not expenses included in employees' take-home pay and are the responsibility of the employer. Several commenters requested that employers' contributions to worker's compensation and unemployment insurance be included in the definition of compensation.

Response: It is our intent to include employers' payroll tax contributions for unemployment insurance and workman's compensation (as well as payments required by the Federal Insurance Compensation Act) under § 441.302(k)(1)(i)(C) and thus as part of our definition of compensation for the purposes of the requirements at § 441.302(k). While not necessarily paid directly to the workers, these expenses are paid on their behalf. We also note, for instance, that per the BLS, the National Compensation Survey calls these payroll taxes ''legally mandated employee benefits'' and includes them as part of the definition of ''employee benefits'' for the purposes of determining compensation.[115] We plan to provide technical assistance to States on how to help ensure that providers are including payroll tax contributions for unemployment insurance and workman's compensation when reporting on compensation to workers.

Comment: Several commenters noted support for including tuition reimbursement in the definition of compensation. Several commenters suggested that costs associated with continuing education should also be included as compensation.

Response: We appreciate the commenters' support. We believe the term ''tuition reimbursement'' is broad enough to cover a variety of scenarios in which a provider may choose to reimburse a worker for tuition costs incurred either prior to or during their period of employment.

Comment: A number of commenters supported either including training in the definition of compensation or excluding training from the administrative and other expenses that are not considered compensation under this rule. Some of these commenters noted that certain types of services or programs might involve additional training for staff, such as services delivered to beneficiaries with complex needs. One commenter suggested that raising workers' wages will not necessarily increase service quality if it is not accompanied by better training for staff. Another commenter worried that providers could decide to cut back on training in order to meet the minimum performance level, which could endanger workers. Commenters cited examples of trainings, including in-service trainings and cardiopulmonary resuscitation trainings, as being critical for caring for beneficiaries. Several commenters suggested that direct care workers who serve beneficiaries with higher-acuity needs may require additional training than other direct care workers.

Commenters suggested that, if training was included in the definition of ''compensation'' (or was excluded from administrative and other expenses that are not considered compensation under this rule), training should be defined to include time spent in training, training materials, trainers, and training facilities.

Conversely, one commenter stated that if training was included in the definition of compensation, the minimum performance level should be adjusted further upward (above 80 percent). One commenter stated that if training was included as compensation to direct care workers, this cost should be restricted to the time workers spend in training and not include training materials and payments made to the trainer. One commenter stated that the cost of onboarding new staff should not be considered ''training.'' One commenter expressed skepticism that training was truly a major cost for providers.

Response: We clarify that the time direct care workers spend in training would already be accounted for in the definition of compensation. We agree with commenters on several points: that training is critical to the quality of services; that training needs might vary across (or even within) States' Medicaid HCBS programs, depending on the nature of the services or the acuity of

[114] See BLS ''Glossary'' at *https://www.bls.gov/bls/glossary.htm.*

[115] See BLS ''Glossary'' at *https://www.bls.gov/bls/glossary.htm.*

the beneficiaries served; that training costs may be difficult to standardize; and that worker training is essential to quality, as well as the health and safety of both the direct care worker and the beneficiary. We do not want to encourage providers to reduce training to cut administrative costs.

However, we are also reluctant upon considering comments to treat all training costs as ''compensation'' to the direct care worker. Trainings, as commenters noted, are often required as part of the job and may vary depending on the services or the needs of the beneficiaries they serve. We are concerned that including training costs in the definition of compensation could mean that direct care workers with higher training requirements would see more of their ''compensation'' going to training expenses, which could cause them to receive lower take-home pay than colleagues with fewer training requirements.

Rather than include training costs in the definition of compensation at § 441.302(k)(1)(i)), we are creating a new definition at § 441.302(k)(1)(iii) to define excluded costs for the purposes of the payment adequacy requirement at § 441.302(k)(3). Excluded costs are those that are not included in the State's calculation of the percentage of Medicaid payments that is spent on compensation for direct care workers required at § 441.302(k)(3). In other words, States would ensure providers deduct these costs from their total Medicaid payments before performing the calculation. We are specifying at § 441.302(k)(3)(iii) that excluded costs are limited to: training costs (such as costs for training materials or payment to qualified trainers); travel costs for direct care workers (such as mileage reimbursement or public transportation subsidies); and costs of personal protective equipment for direct care workers. This would mean that providers could deduct the total eligible training expenses, travel costs, and personal protective equipment for direct care workers from the total payments they receive for homemaker, home health aide, and personal care services before the compensation percentage is determined for the minimum performance level as required under § 441.302(k)(3).

The training costs that are excluded costs under § 441.302(k)(1)(iii) are limited to those costs associated with the training itself (such as qualified trainers and materials) and are distinct from the compensation paid to a direct care worker participating in the training as part of their employment duties under § 441.302(k)(1)(i).

Comment: One commenter requested clarification as to whether travel expenses were part of the definition of ''compensation.'' Many commenters stated that travel or transportation expenses should be included in the definition of compensation, or not treated as an administrative expense. Many commenters also expressed the concern that it would be difficult to cover the cost of travel as part of administrative expenses and other expenses that are not considered compensation under this rule, especially in rural areas where direct care workers may have to travel large distances to visit clients or transport them to appointments. A few commenters worried that if travel were considered an administrative expense, providers would be reluctant to serve beneficiaries outside of a narrow service area to save on travel expenses. A number of direct care workers shared experiences of having to pay for gas out-of-pocket when they transported beneficiaries and having to shoulder the financial burden of wear-and-tear on their cars. One commenter noted that travel costs are frequently included in rate calculations. Several commenters suggested that ''travel,'' if included in the definition of compensation, should include time workers spent travelling, mileage reimbursement, and public transportation reimbursement.

However, a few commenters specifically noted that travel should not be considered part of the definition of compensation. One commenter noted that due to the variability of travel costs, it would be difficult to include travel in a standardized definition of compensation.

Response: We agree with commenters that certain travel-related expenses should not be considered compensation to direct care workers. Travelling to beneficiaries' homes or assisting them in the community is an essential function of the job, and thus, travel reimbursement is not for the direct care worker's personal benefit.[116] We also agree that travel costs will vary significantly by region and even by beneficiary. We too are concerned that including travel in the definition of compensation could mean that direct care workers with higher travel demands would see more of their compensation going to travel, which could cause them to receive lower take-home pay than colleagues with lower travel demands.

At the same time, we are aware of the critical importance of travel to the delivery of these services and do not want to create unintended consequences. We are persuaded by commenters' concerns that counting travel as an administrative expense could induce some providers to stop serving beneficiaries that live outside certain regions. We would also be concerned if direct care workers were expected to shoulder the financial burden of travel out-of-pocket, as appears to be happening in some cases now.

To preserve beneficiary access to services and avoid burden or disparate impact on beneficiaries, direct care workers, and providers in rural or underserved areas, we are excluding travel costs in this final rule from the calculation of the percent of Medicaid payments for certain services going to compensation for direct care workers. This means that providers can deduct the total travel expenses for direct care workers that providers incur from the total Medicaid payments they receive before the compensation percentage is determined.

In order to reflect the exclusion of travel costs from the payment calculation, we are adding a new § 441.302(k)(1)(iii)(B) that specifies that travel costs (such as reimbursement for mileage or public transportation) may be considered an excluded cost for the purposes of the minimum performance requirement at § 441.302(k)(3). The travel costs that are excluded costs under § 441.302(k)(1)(iii) are limited to those costs associated with the travel itself (such as reimbursement for mileage or public transportation) and are distinct from the compensation paid to a direct care worker for any time spent traveling as part of their employment duties under § 441.302(k)(1)(i). Please refer to our discussion in an earlier response regarding the new definition of excluded costs at § 441.302(k)(1)(iii) and its effect for the calculation required at § 441.302(k)(3).

Comment: Several commenters expressed concerns about covering the cost of vehicle purchases or maintenance as an administrative expense. One commenter suggested that if travel were included in the definition of compensation, it should include the cost of vehicles or vehicle maintenance.

Response: We note that the payment adequacy requirement applies to Medicaid payments for homemaker services, home health aide services, and personal care services. In our

[116] *See* 29 U.S.C. 207(e)(2) (permitting employers to exclude ''reasonable payments for traveling expenses'' when determining an employee's regular rate of pay under the FLSA); *see also* 29 CFR 778.217 (same).

experience, it is rare that providers would be purchasing vehicles for these services or that vehicle purchases would be part of the rate. We do not expect that the cost of vehicles would be part of excludable travel costs, but we plan to provide technical assistance to States on a case-by-case basis.

Comment: Several commenters noted that personal protective equipment (PPE) for staff should be counted as compensation or that these expenses should not count as an administrative expense. Several direct care workers also shared experiences of having to provide their own PPE during the COVID–19 public health emergency (PHE), and the harms caused to them both physically and financially by contracting COVID–19.

Response: We agree, particularly given the recent experience with the COVID–19 PHE, that PPE should not be treated as an administrative expense. Providing direct care workers with adequate PPE is critical for the health and safety of both the direct care workers and the beneficiaries they serve. We also do not believe that direct care workers should have to pay for PPE out-of-pocket or that it is considered part of their compensation.

Similar to our approach with training and travel above, we are excluding the cost of PPE for direct care workers in this final rule from the calculation of the percentage of payments spent on compensation for direct care workers. In order to reflect the exclusion of PPE costs from the payment calculation, we are adding new §§ 441.302(k)(1)(iii) that specifies that PPE costs for direct care workers may be considered an excluded cost for the purposes of the minimum performance requirement at § 441.302(k). Please refer to our discussion in an earlier response regarding the new definition of excluded costs at § 441.302(k)(1)(iii) and its effect for the calculation required at § 441.302(k)(3).

Comment: Several commenters requested clarification as to what activities and costs would not be counted as compensation under this rule. A significant number of commenters described other activities or costs they believed should count as compensation, should not be counted as part of non-compensation costs, or simply would not be affordable if providers were left with only 20 percent of the Medicaid rate for personal care, homemaker, or home health aide services. These included costs associated with:

- Administration, including wages paid to administrative and human resources staff, who perform activities such as billing, payroll processing, contracts management, or scheduling client appointments;
- Other business expenses, such as organization accreditation, liability insurance, and licensure.
- Human resources activities, including recruitment activities or advertising for new staff.
- Background checks, drug screening, and medical screening for employees (such as testing staff for tuberculosis prior to starting service delivery).
- Office space and utilities (especially for providers that are required by State law to have a physical office).
- Office supplies, medical supplies, food, or other out-of-pocket expenses for clients, IT, mobile devices (including those used for electronic visit verification), and staff uniforms.
- Non-cash awards to direct care workers, such as parties, staff retreats, gifts for staff, Employee Assistance Programs, or other wellness programs.
- Recordkeeping and complying with quality measures and other reporting requirements.

Commenters noted that these costs are essential to operating a service organization. Commenters also noted that at least some of these costs, such as office space, are fixed costs, or costs that are beyond providers' control.

Response: We believe that most of the items listed above would qualify as administrative expenses, but some activities may be considered compensation or excluded costs under the definitions we are finalizing at § 441.302(k)(1), depending on the context. We clarify that, by designating activities as administrative and other expenses that are not considered compensation under this rule, we do not suggest that they are inessential. However, we also believe, as has been discussed in prior responses, that a vast majority of the payment for homemaker, home health aide, and personal care services must be spent supporting core activities that are performed by direct care workers. As noted by commenters in earlier comment summaries, we also do not want States to allow providers to add so many non-cash benefits to a worker's compensation that their take-home pay is excessively reduced. We plan to provide technical assistance to States to help ensure that States understand what are considered administrative and other expenses that are included in the percentage calculation and what are considered excluded costs.

Comment: Several commenters raised concerns that wages spent for staff conducting certain beneficiary support activities would not be considered compensation. These activities include completing person-centered service plans or scheduling client appointments.

Response: We believe that some of the activities described by commenters are activities that would be performed by staff who would classify as direct care workers, as we proposed to define at § 441.302(k)(1)(ii). We refer readers to our discussion of our proposed definition of direct care workers in the next section below. We plan to provide technical assistance to help States appropriately identify direct care workers and, separately, administrative staff, administrative activities, and other costs that are not considered compensation under this rule.

Comment: A few commenters expressed the concern that employers will shift more administrative activities to direct care workers, to avoid having these activities fall under administrative and other costs that are not considered compensation under this rule. The commenter stated that this could increase burnout for direct care workers.

Response: As discussed earlier, the definition of compensation we proposed, and are finalizing with modification, includes all compensation paid to direct care workers for activities related to their roles as direct care workers. States should ensure providers do not count in the percentage calculation at § 441.302(k)(3) compensation for the time that workers spend on administrative or other tasks unrelated to their roles as direct care workers as compensation to direct care workers. We would not view as permissible under this regulation the shifting of administrative tasks to direct care workers as a way to inflate compensation for direct care workers. However, providers can count as compensation to direct care workers the time that direct care workers spend on tasks, including administrative tasks, such as completing timecards, that are directly related to their roles as direct care workers in providing services to beneficiaries. We plan to provide States with technical assistance on how to accurately capture compensation for workers who provide direct care and perform administrative or other roles. However, we decline to make changes in this final rule based on these comments.

Comment: Several commenters requested clarification on what was included in the denominator of the calculation (in other words, what is meant by ''payments'' when calculating the percent of payments being spent on compensation for direct care workers). One commenter suggested that rather

than requiring 80 percent of Medicaid payments be spent on compensation, we require that 80 percent of all revenue be spent on compensation. One commenter requested clarification about whether, for managed care delivery systems, payment is the State's capitation payment to the MCO or the MCO's payment to the home care provider agency. The commenter also recommended that we require States to set a minimum payment rate that MCOs or other entities pay home care agencies and that the minimum rates be set at a level to pay workers the locally required minimum wage and other compensation as defined in the regulation, and for the home care agency to reserve 20 percent overhead.

A few commenters made specific suggestions for parameters of what should be included or excluded in the denominator, such as:

- Only collected revenue (and not billed charges) would be considered as base or supplemental payments;
- Excluding refunded or recouped payments from current or prior years based on program financial audits;
- Excluding chargebacks; and
- Excluding bad debt.

Response: For Medicaid FFS payments in the denominator of the calculation should include base and supplemental payments (as described in SMDL 21–006 [117]). Those base and supplemental payments should only include payments actually collected, or revenue, rather than billed charges. In addition, refunded or recouped payments from current or prior years based on program financial audits, chargebacks, and bad debt should be excluded from those base and supplemental payment amounts. We are available to provide States with technical assistance related to calculating payments for the purpose of determining the percent of all payments that is spent on compensation.

For Medicaid managed care, payments refer to payments from the managed care plan to the provider and not the capitation payment from the State to the managed care plan. Further, for Medicaid managed care, payments in the denominator of the calculation should include only those payments actually collected and exclude refunded or recouped payments from current or prior years based on program financial audits, chargebacks, and bad debt. We note that section 1902(a)(30)(A) of the Act does not provide us with authority to require specific payment rates or rate-setting methodologies.

As discussed throughout this section (II.B.5), we proposed the requirements at § 441.302(k) using our authority under section 1902(a)(30)(A) of the Act, which requires State Medicaid programs to ensure that payments to providers are consistent with efficiency, economy, and quality of care and are sufficient to enlist enough providers so that care and services are available to beneficiaries at least to the extent as to the general population in the same geographic area. We believe section 1902(a)(30)(A) of the Act speaks specifically to Medicaid payments, not to all revenue received by providers (which may be from various sources); thus, we decline to modify the requirement to affect non-Medicaid revenues.

Comment: One commenter requested that revenue from value-based care (VBC) arrangements in managed care be exempt from the calculation so as not to disrupt State or managed care efforts moving toward VBC or to disincentivize providers from pursuing innovative strategies to improve health and financial outcomes such as lowering emergency room visits, inpatient utilization, and admissions from HCBS to inpatient settings such as nursing facilities. The commenter also noted that providers must make numerous additional investments above and beyond typical compensation rates for a VBC or pay-for-performance (PFP) arrangement to work. Additionally, the commenter noted, VBC and PFP programs rely on lengthy cycles of data, tracking, analysis, and reconciliation before additional payments are made. The commenter stated that, if these types of payments are included in the denominator of the calculation, this will prove disruptive to these programs.

Response: We appreciate the commenter raising these concerns and agree that VBC, PFP, and other unique payment arrangements that reward and support quality over quantity are important, and it was not our intention to appear to discourage them or minimize their value. However, given the wide-ranging designs of such payments and that most HCBS are often not included in these arrangements, we are not requiring a specific way to address them in this final rule. We also decline to adopt the commenter's suggestion to exempt revenue from VBC arrangements in managed care from the calculation of the percent of Medicaid payments for certain HCBS that is spent on compensation of direct care workers, as such an exemption would undermine the intent of the proposal and the usefulness of the data for assessing the percentage of all Medicaid payments for certain HCBS that is spent on compensation for direct care workers. We plan to provide States with technical assistance as needed on how to include revenues from VBC, PFP, and other unique payment arrangements in the calculation.

After consideration of the comments received, we are finalizing § 441.302(k)(1)(i) with a modification to clarify at § 441.302(k)(1)(i)(B) that compensation includes benefits, such as health and dental benefits, life and disability insurance, paid leave, retirement, and tuition reimbursement.

We are also finalizing a new definition at § 441.302(k)(1)(iii) to define excluded costs, which are costs that are not included in the calculation of the percentage of Medicaid payments that is spent on compensation for direct care workers. In other words, States must ensure providers deduct these costs from their total Medicaid payments before performing the calculation required at § 441.302(k)(3)). Such costs are limited to: (A) Costs of required trainings for direct care workers (such as costs for qualified trainers and training materials); (B) Travel costs for direct care workers (such as mileage reimbursement or public transportation subsidies) provided to direct care workers; and (C) Costs of personal protective equipment for direct care workers.

e. Definition of Direct Care Worker (§ 441.302(k)(1)(ii))

At § 441.302(k)(1)(ii), we proposed to define direct care workers to include workers who provide nursing services, assist with activities of daily living (such as mobility, personal hygiene, eating) or instrumental activities of daily living (such as cooking, grocery shopping, managing finances), and provide behavioral supports, employment supports, or other services to promote community integration. Specifically, we proposed to define direct care workers to include nurses (registered nurses, licensed practical nurses, nurse practitioners, or clinical nurse specialists) who provide nursing services to Medicaid-eligible individuals receiving HCBS, licensed or certified nursing assistants, direct support professionals, personal care attendants, home health aides, and other individuals who are paid to directly provide services to Medicaid beneficiaries receiving HCBS to address activities of daily living or instrumental activities of daily living, behavioral supports, employment supports, or

[117] CMS State Medicaid Director Letter: SMDL 21–006. December 2021. New Supplemental Payment Reporting and Medicaid Disproportionate Share Hospital Requirements under the Consolidated Appropriations Act, 2021. Available at *https://www.medicaid.gov/sites/default/files/2021-12/smd21006.pdf.*

other services to promote community integration. We further identified in the preamble of the proposed rule that our definition of direct care worker is intended to exclude nurses in supervisory or administrative roles who are not directly providing nursing services to people receiving HCBS.

Our proposed definition of direct care worker was intended to broadly define such workers to ensure that the definition appropriately captures the diversity of roles and titles across States that direct care workers may have. We included workers with professional degrees, such as nurses, in our proposed definition because of the important roles that direct care workers with professional degrees play in the care and services of people receiving HCBS, and because excluding workers with professional degrees may increase the complexity of reporting, and may unfairly punish States, managed care plans, and providers that disproportionately rely on workers with professional degrees in the delivery of HCBS. We also proposed to define direct care workers to include individuals employed by a Medicaid provider, State agency, or third party; contracted with a Medicaid provider, State agency, or third party; or delivering services under a self-directed service model. This proposed definition is in recognition of the varied service delivery models and employment relationships that can exist in HCBS waivers. We requested comment on whether there are other specific types of direct care workers that should be included in the definition, and whether any of the types of workers listed should be excluded from the definition of direct care worker.

We received public comments on these proposals. The following is a summary of the comments we received and our responses.

Comment: Several commenters supported finalizing the definition of direct care worker as proposed. However, one commenter opposed the entire definition. The commenter noted that the definition, which resembles a definition of direct care worker used by the Department of Labor, is distinguishable from the definition used by the Bureau of Labor Statistics. The commenter recommended that no definition should be finalized until there has been an interagency workgroup to review and coordinate the different definitions.

Response: As discussed earlier in this section II.B.5.e. of this rule, our proposed definition of direct care worker was intended to capture the diversity of roles and titles across States that direct care workers may have. It was also intended to include individuals in the varied service delivery models and employment relationships that can exist in HCBS waivers. As discussed later in this section II.B.5.e. of this rule, we are finalizing the definition of direct care worker largely as proposed with a modification to clarify that direct care workers include nurses and other staff providing clinical supervision, as we do not want to discourage clinical oversight that contributes to the quality of services by creating a disincentive for providers to hire clinicians when necessary. We believe that the definition of direct care worker, as finalized, appropriately defines direct care worker for the specific purposes of the requirements in § 441.302(k), and we note that it was subject to interagency review.

Comment: Several commenters supported including clinicians (such as those we proposed at § 441.302(k)(1)(ii)(A)) in the definition of direct care worker. Commenters noted that providers are often required to have clinicians on staff and that such clinicians are critical to ensuring quality of care. A few commenters, however, expressed ambivalence or reservations about including clinicians in the definition of direct care worker. One commenter noted that some States do not include nurses in their State definitions of direct care worker. A few commenters observed that because clinicians (including nurses) generally earn higher wages, providers that employ clinicians will have an easier time reaching the minimum performance level for direct care worker compensation or that the higher wages of clinicians will mask the lower wages of direct care workers who do not have professional degrees and generally earn lower wages.

Response: We continue to believe it is appropriate to include clinicians (such as registered nurses, licensed practical nurses, nurse practitioners, or clinical nurse specialists) in the definition of direct care worker and are finalizing the definition in this final rule with these clinicians included. There is a shortage of nurses and other clinicians delivering HCBS, and we believe it is important to support these members of the HCBS workforce (especially as they also work directly with beneficiaries). We echo observations from commenters that some services are required to be delivered or monitored by clinicians. We also would not want to discourage clinical oversight that contributes to the quality of services by creating a disincentive for providers to hire clinicians when necessary. Therefore, we are clarifying that our definition of direct care worker is intended to include nurses and other staff who directly provide services to beneficiaries or who provide clinical supervision. However, consistent with the proposed rule, our definition is intended to exclude staff who provide administrative supervision. We are finalizing a modification at the end of § 441.302(k)(1)(ii)(F) to specifically include nurses and other staff providing clinical supervision.

Comment: One commenter suggested that if a State requires that a program employ a nurse to perform occasional beneficiary visits, the State should pay the nurses directly, rather than requiring the providers to pay them.

Response: We thank the commenter for this suggestion. While we do not intend to establish specific requirements for how States pay for services provided by nurses, we agree that this could be a solution for States that would prefer for providers to reach the payment adequacy requirement without relying on salaries for clinical staff. We decline to make changes in this final rule based on this comment.

Comment: A number of commenters requested that we include private duty nurses, including registered nurses, licensed practical nurses, and certified nursing assistants, in the definition of direct care worker.

Response: We note that private duty nurses are not necessarily a separate category of worker, but rather registered nurses, licensed practical nurses, or certified nursing assistants who provide services classified and billed as private duty nursing. As a technical matter, we clarify that only registered nurses and licensed practical nurses may provide private duty nursing services authorized under § 440.80. As discussed above, these types of clinicians are included in the definition of direct care worker in § 441.302(k)(1)(i)(A) so long as they are providing one of the three HCBS services specified in the minimum performance requirement (homemaker, home health aide, or personal care services). However, private duty nursing is not one of the services we have proposed, and are finalizing, for application of this the minimum performance requirement.

Comment: Many commenters recommended that nurse supervisors be included in the definition of direct care workers. Several of these commenters noted that these are required positions for their programs. Some commenters observed that nurse supervisors perform important activities like supervising and training other direct care workers,

coordinating beneficiaries' care, or completing documentation and other paperwork specific to beneficiaries' care (as opposed to paperwork related to business administration). Several commenters stated that clinical supervision is critical to the quality of HCBS. A few commenters noted that nurse supervisors sometimes visit beneficiaries or provide direct services when filling in for absent direct care workers.

One commenter noted support for excluding general administrative or supervisory staff from the definition of direct care workers. A few commenters expressed concerns about the exclusion of administrative or supervisory staff who may sometimes also provide services to beneficiaries. Some of these commenters noted that especially during workforce shortages, administrative staff or supervisors may fill in for direct care workers. A couple of commenters requested clarification on how wages for staff who perform both direct care work and administrative or supervisory work should be counted for the purposes of complying with the minimum performance level. One commenter requested clarification on whether first line supervisors of direct support professionals are included in the definition of direct care workers.

Several commenters stated that they opposed the exclusion of supervisory or managerial staff because these are required positions for their programs. Several commenters noted that staff who provide supervision or perform administrative tasks, such as understanding and reviewing compliance and other regulatory requirements, are critical to quality. One commenter expressed the concern that excluding supervisory or managerial staff from the 80 percent minimum performance level would mean that providers would have to lower the salaries of these positions, and then in turn may have trouble filling these positions. One commenter raised concerns about ''wage compression,'' with providers reducing wages for higher-skilled jobs or paying these jobs more like entry-level jobs.

Response: We are persuaded that nurses or other staff who provide clinical oversight and training for direct care workers participate in activities directly related to beneficiary care (such as completing or reviewing documentation of care), are qualified to provide services directly to beneficiaries, and periodically interact with beneficiaries should be included in the definition of direct care workers at § 441.302(k)(1)(ii). As noted earlier, we are modifying our definition of direct care worker at § 441.302(k)(1)(ii)(F) to clarify that it includes nurses and other staff providing clinical supervision. However, consistent with the proposed rule, our definition is intended to exclude staff who provide administrative supervision (such as overseeing business operations).

While we acknowledge that administrative staff and administrative supervisors are often required staff and perform essential functions (including quality and compliance reporting and recordkeeping), we believe it is critical for the economic and efficient use of Medicaid funds that the vast majority of Medicaid payment for homemaker, home health aide, and personal care services must go to supporting the core activities of that service; the core activities of homemaker, home health aide, and personal care services are performed by direct care workers. As discussed above, evidence specifically shows that direct care workers are paid low wages and, thus, our priority is ensuring a greater share of Medicaid payments go to direct care workers' compensation. If there is an insufficient number of direct care workers employed by a provider, then those HCBS cannot be delivered, and beneficiaries may not be able to access the HCBS they need. We will continue to partner with States to help providers find efficient ways to support their administrative and reporting requirements.

Comment: Many commenters expressed concern that direct support professionals were excluded from the definition of direct care worker, as direct care workers are often associated with provision of services to older adults and people with physical disabilities, while direct service professionals typically provide services to people with intellectual and developmental disabilities.

Response: We note that direct support professionals are explicitly included in the definition of direct care worker at § 441.302(k)(1)(ii)(C), so there is no need to further modify the definition of direct care worker in response to these comments. If someone designated by their State as a direct support professional provides a service that is subject to the minimum performance requirement, their compensation will be included in the calculation for the minimum performance level.

Comment: One commenter suggested that payments to contract employees should not count toward the minimum performance level.

Response: Given the varied nature of HCBS programs, we specifically proposed for the definition of direct care worker at § 441.302(k)(1)(ii)(G) to encompass a broad array of employment relationships. We cannot find sufficient justification for excluding certain types of employment relationships from this requirement and are finalizing our definition of direct care worker to include individuals employed by a Medicaid provider, State agency, or third party; contracted with a Medicaid provider, State agency, or third party; or delivering services under a self-directed service model, as proposed. However, we are making a technical modification for clarity to not finalize § 441.302(k)(1)(ii)(G) and to add language proposed at § 441.302(k)(1)(ii)(G) to the end of § 441.302(k)(1)(ii).

Comment: One commenter opposed including workers who deliver services via a self-directed services delivery model in the definition of direct care workers. They noted that including these workers would ''chip away at the uniqueness at the heart of the self-direction paradigm,'' unintentionally burden self-directed employers and employees, reduce autonomy by introducing a single title for a wide variety of caregiving types, and would not recognize the flexible and interdependent nature of self-direction or the fact that Medicaid beneficiaries who self-direct their services do not retain the funds that remain in budgets at the end of the year.

Response: We thank the commenter for raising their concerns. We decline to make modifications to the definition of direct care worker to exclude direct care workers providing services in self-directed services delivery models generally. We believe it is important for States to have a sufficient direct care workforce to be able to deliver services that are responsive to the changing needs and choices of beneficiaries, as required by section 2402(a)(1) of the Affordable Care Act, regardless of whether they are receiving services through a self-directed services delivery model or a model that is not self-directed. Further, we believe it is important for States to have a sufficient number of qualified direct care workers to provide self-directed personal assistance services, as required by section 2402(a)(3)(B)(iii) of the Affordable Care Act.

However, we do agree that there are certain self-directed services delivery models for which the minimum performance level at (k)(3) would not be appropriate. We intend to apply the requirements at § 441.302(k)(3) to models in which the beneficiary directing the services is not setting the payment rate for the worker (such as

agency-provider models). We do not intend to apply the requirements to self-directed services delivered through models in which the beneficiary sets the payment rate for the worker (such as in individual budget authority models). In the latter scenario, we expect that all or nearly all of that payment rate routinely is spent on the direct care worker's compensation. We are finalizing a new requirement at § 441.302(k)(2)(ii) that clarifies this policy; this requirement is discussed in greater detail in section II.B.5.g. of this final rule.

After consideration of the comments received, we are finalizing the definition of direct care worker at § 441.302(k)(1)(ii) with technical modifications for clarity to change the term, Medicaid-eligible individuals, to the term, Medicaid beneficiaries, in both § 441.302(k)(1)(ii)(A) and (F). We are finalizing § 441.302(k)(1)(ii) with a modification at the end of § 441.302(k)(1)(ii)(F) to provide that direct care workers include nurses and other staff providing clinical supervision. The finalized revised text at § 441.302(k)(1)(ii)(F) will read: Other individuals who are paid to provide services to address activities of daily living or instrumental activities of daily living, behavioral supports, employment supports, or other services to promote community integration directly to Medicaid beneficiaries receiving HCBS available under this subpart, including nurses and other staff providing clinical supervision. We are making a technical modification to not finalize § 441.302(k)(1)(ii)(G) and add language proposed at § 441.302(k)(1)(ii)(G) to the end of § 441.302(k)(1)(ii) to clarify that a direct care worker may be employed by a Medicaid provider, State agency, or third party; contracted with a Medicaid provider, State agency, or third party; or delivering services under a self-directed service model.

f. Reporting (§ 441.302(k)(2))

Section 1902(a)(6) of the Act requires State Medicaid agencies to make such reports, in such form and containing such information, as the Secretary may from time to time require, and to comply with such provisions as the Secretary may from time to time find necessary to assure the correctness and verification of such reports. At § 441.302(k)(2), under our authority at section 1902(a)(6) of the Act, we proposed to require that States demonstrate that they meet the minimum performance level at § 441.302(k)(3)(i) through new Federal reporting requirements at § 441.311(e). We discuss these reporting requirements in our discussion of proposed § 441.311(e) in section II.B.7 of this final rule.

We received public comments on these proposals. The following is a summary of the comments we received and our responses. We also direct the reader to the discussion of § 441.311(e) in section II.B.7. of this final rule for additional comments and responses.

Comment: A number of commenters, while not supporting the minimum performance requirement, did express support for the requirement that States must collect and report data on the percent of Medicaid payments for certain HCBS going to compensation of direct care workers. Commenters noted this reporting could yield important data about the compensation to workers and allow for national comparisons.

Response: We agree with commenters that the reporting requirement proposed at § 441.311(e) will yield important data about compensation to workers that will help support the HCBS direct care workforce and promote better oversight of how Medicaid payments for certain services are used.

We note that, while several commenters encouraged us to finalize the reporting requirement at § 441.311(e) without finalizing the minimum performance requirement at § 441.302(k)(3), no commenter suggested that we finalize the minimum performance requirement without a reporting requirement. We believe that the reference included in § 441.302(k)(2) to the reporting requirement at § 441.311(e) is necessary for CMS to oversee States' compliance with the minimum performance requirement at § 441.302(k)(3); however, the reporting requirement at § 441.311(e) is distinct and severable from the minimum performance requirement at § 441.302(k). As discussed in more detail in section II.B.7, the reporting requirement at § 441.311(e), which we are finalizing with modifications, addresses a broader universe of services than is included in the minimum performance level at § 441.302(k)(3) and has an earlier applicability date than the date we are finalizing at § 441.302(k)(8) (discussed later in this section). While we are finalizing both the minimum performance requirement at § 441.302(k)(3) and the payment adequacy reporting requirement, as amended, at § 441.311(e), these represent distinct policies, and we believe that the reporting requirement can (and will) function independently from the minimum performance requirement.

Comment: Several commenters suggested that we add a requirement to § 441.302(k)(2) that would require States, as part of their assurances of compliance with the minimum percentage requirement, to acknowledge and explain any differences between the actual payment rates for home care services and the rate most recently recommended by the interested parties' advisory group under § 447.203(b)(6) of this final rule and discussed in section II.C. of this rule. The commenters suggested that if the actual rate is lower than the recommended rate, the State would also need to explain why it is sufficient to ensure access to services.

Response: Although the interested parties' advisory group will provide an invaluable perspective on the adequacy of rates, as discussed in greater detail later in this preamble, the role of the group finalized at § 447.203(b)(6) is advisory. States will not be required to follow the recommendations of the group. We believe the policies as we are finalizing strike the right balance of accountability and flexibility for wholly new rate processes. We further note the recommendations of the interested parties' advisory group will be posted publicly for review. Finally, we note that we are also finalizing steps a State must take to demonstrate adequate access to services when proposing a rate reduction or restructuring in circumstances that could result in diminished access to care.

After consideration of the comments received, we are finalizing § 441.302(k)(2) with modifications. For reasons discussed in section II.B.5.g. of this final rule, at § 441.302, we are redesignating paragraph (k)(2) as paragraph (k)(2)(i) to allow for the addition of a new requirement at paragraph (k)(2)(ii) regarding treatment of certain payment data under self-directed services delivery models.

As discussed in section II.B.5.b. of this rule, we are finalizing reporting requirements at § 441.302(k)(6) to ensure accountability in the States' use of the small provider minimum performance level and hardship exemptions. To clarify that States must comply with this requirement, as well as the reporting requirement at § 441.311(e), we are finalizing references to § 441.302(k)(6) in § 441.302(k)(2)(i). We also are finalizing a technical modification for clarity that the State must demonstrate **annually**, consistent with the reporting requirements at §§ 441.302(k)(6) and 441.311(e), that they meet the minimum performance level at § 441.302(k)(3). (New text in bold font).

g. Application to Other Authorities (Proposed at § 441.302(k)(4), Finalized at § 441.302(k)(8); and §§ 441.464(f), 441.570(f), and 441.745(a)(1)(vi))

At § 441.302(k)(4), we proposed to apply the HCBS requirements described in the proposed rule to services delivered under FFS or managed care delivery systems. As discussed earlier in section II.B.1. of this preamble, section 2402(a)(3)(A) of the Affordable Care Act requires States to improve coordination among, and the regulation of, all providers of Federally and State-funded HCBS programs to achieve a more consistent administration of policies and procedures across HCBS programs. In the context of Medicaid coverage of HCBS, it should not matter whether the services are covered directly on an FFS basis or by a managed care plan to its enrollees. The requirement for consistent administration should require consistency between these two modes of service delivery. We accordingly proposed to specify that a State must ensure compliance with the requirements in § 441.302(k) with respect to HCBS delivered both under FFS and managed care delivery systems.

Similarly, because workforce shortages exist under other HCBS authorities, which include many of the same types of services to address activities of daily living or instrumental activities of daily living as under section 1915(c) waiver authority, we proposed to include these requirements within the applicable regulatory sections. Specifically, we proposed to apply the proposed requirements at § 441.302(k) to section 1915 (j), (k), and (i) State plan at §§ 441.464(f), 441.570(f), and 441.745(a)(1)(vi), respectively. Consistent with our proposal for section 1915(c) waivers, we proposed these requirements based on our authority under section 1902(a)(30)(A) of the Act to ensure payments to HCBS providers are consistent with efficiency, economy, and quality of care and are sufficient to enlist enough providers so that care and services are available to beneficiaries at least to the extent as to the general population in the same geographic area. We believed the same arguments for proposing these requirements for section 1915(c) waivers are equally applicable for these other HCBS authorities. We requested comment on the application of payment adequacy provisions across section 1915(i), (j), and (k) authorities. As noted earlier in section II.B.4. of the proposed rule, to accommodate the addition of new language at § 441.464(e) and (f), we proposed to renumber existing § 441.464(e) as paragraph (g) and existing § 441.464(f) as paragraph (h). We requested comment on whether we should exempt, from these requirements, services delivered using any self-directed service delivery model under any Medicaid authority.

We considered whether to also apply these proposed payment adequacy requirements to section 1905(a) ''medical assistance'' State plan personal care and home health services. However, we did not propose that these requirements apply to any section 1905(a) State plan services based on State feedback that they do not have the same data collection and reporting capabilities in place for section 1905(a) services as they do for section 1915(c), (i), (j), and (k) services. Further, the vast majority of HCBS is delivered under section 1915(c), (i), (j), and (k) authorities, while only a small percentage of HCBS nationally is delivered under section 1905(a) State plan authorities. We requested comment on whether we should apply these requirements to section 1905(a) State plan personal care and home health services.

We received public comments on these proposals. The following is a summary of the comments we received and our responses.

Comment: A few commenters supported holding providers delivering care in managed care delivery systems accountable for paying a sufficient amount to direct care workers. A few commenters requested that we clarify how this requirement would apply to MCOs, PIHPs, and PAHPs. One commenter noted that managed care plans do not control the payment rates that contracted providers pay their direct care workers.

A few commenters requested that we clarify managed care plans' responsibility for tracking and reporting expenditures. A few commenters expressed concern that this proposal would pose particular reporting or accounting burdens for providers that participate in multiple Medicaid managed care plans, serve non-Medicaid clients, or receive bundled payments.

Response: We acknowledge commenters' broad concerns about how these requirements will apply to managed care plans and will provide technical assistance regarding specific questions as they are raised during implementation. However, we are finalizing our proposal to apply the requirements at § 441.302(k) to both managed care and FFS delivery systems. We clarify here that the requirements in § 441.302(k) are the ultimate responsibility of States, regardless of whether their HCBS are delivered through an FFS delivery system, managed care delivery system, or both. The minimum performance requirement applies at the provider level, not the managed care plan level. We expect that States will develop an appropriate process with their managed care plans should the State determine that managed care plans have some role in activities such as the data collection or reporting required in § 441.302(k)(2) (being finalized as § 441.302(k)(2)(i)). We agree that managed care plans do not control payment rates that contracted providers pay their direct care workers and reiterate that the focus of § 441.302(k) is on the percentage of the payment to providers that is passed along as compensation to direct care workers.

We plan to provide technical assistance to States with managed care delivery systems to minimize provider reporting and accounting burden and to address questions related to bundled payments that include the affected services (homemaker, home health aide, and personal care services).

Comment: A few commenters specifically noted support for applying the payment adequacy requirement to programs authorized under all section 1915 authorities. One commenter did not support applying this requirement to ''all 1915 waiver authorities'' but did not provide a specific rationale for their recommendation.

Response: We are finalizing §§ 441.464(f), 441.570(f), and 441.745(a)(1)(vi) (applying § 441.302(k) to section 1915(j), (k) and (i) services, respectively) with minor technical modifications as noted later in this section II.B.5.g. of this final rule.

Comment: A number of commenters expressed concerns about the application of the minimum performance level to self-directed services authorized under sections 1915(j) and 1915(k) of the Act. A few commenters, while not necessarily suggesting that self-directed services should be excluded from the payment adequacy requirement, believed that it would take more time and additional guidance to implement the requirement for self-directed services.

Some commenters raised concerns about the application of the requirement to specific models of self-direction, particularly the self-directed model with service budget (as defined in § 441.545(b)) (often referred to as the individual budget authority model), in which the beneficiary sets the direct care worker's wages. Some commenters worried that the application of the minimum performance level to such

models would put the individual beneficiary in the position of acting as a provider for this purpose. Other commenters were concerned that if the minimum performance level was applied to these self-directed services delivery models, beneficiaries would have to apply a set percent of their budget to compensation of workers and thus would lose the flexibility of determining how their budget was spent or what to pay their direct care workers. One commenter pointed out that beneficiaries in self-directed services delivery models do not personally keep unspent funds and, thus, do not stand to profit by lowering direct care workers' wages. A few commenters also requested clarification of how the payment adequacy requirement would impact the co-employment relationship in self-directed services. One commenter noted that the vast majority of HCBS furnished under self-directed services delivery models are paid so that the entire payment rate goes toward direct care worker's wages and other associated costs such as employer taxes, workers' compensation, and other employer requirements such as State-mandated paid sick leave, while payment for financial management services is paid separately. In these models, nearly 100 percent of the payment rate goes toward the direct care worker's wages and associated costs, which would create an unfair comparison to agency-directed services.

A few commenters noted that it would be undesirable to apply the minimum performance level to HCBS furnished via self-directed services delivery models because these services involve additional activities and costs not associated with other types of services. These commenters noted that services furnished via self-directed services delivery models involve more training and human resources support for the beneficiaries to help them hire and direct their workers. One commenter stated that the proposed minimum performance level of 80 percent would be too high to accommodate other non-compensation activities included in self-directed services delivery models, such as employment or day activities, case management, and back up supports.

On the other hand, some commenters noted that self-directed services delivery models should be included in the payment adequacy requirements and that it is important to support compensation for direct care workers who provide HCBS via self-directed services delivery models. One commenter noted that most personal care services in the commenter's State are furnished via self-directed services delivery models.

Response: We agree with commenters that the minimum performance requirement may be difficult to apply (and, in fact, may simply be inapplicable) to self-directed services delivery models with service budget authority in which the beneficiary directing the services sets the worker's wages as the payment rate for the service (such as models meeting the definition of § 441.545(b) for section 1915(k) services, or self-directed services typically authorized under the section 1915(j) authority).

We also agree with one commenter who noted that, because of the separate payment of financial management services, nearly all of the payments for personal care, homemaker, and home health aide services furnished via self-directed services delivery models with service budget authority are spent on compensation for direct care workers. We believe that applying the minimum performance requirement to such models would be ineffectual and an unnecessary burden on States.

We believe the minimum performance requirement is appropriate when applied to a Medicaid rate for self-directed services that includes both compensation to direct care workers and administrative activities and in which the beneficiary did not set the payment rate for the worker.

We note that at least some of the ''non-compensation activities'' identified by one commenter, such as employment or day activities and case management, do not appear to fall under the specific services to which we proposed, and are finalizing, for the minimum performance requirement to apply, and therefore, they would not likely be subject to the minimum performance requirement as finalized.

To clarify the application of § 441.302(k) to HCBS furnished via self-directed services delivery models, we are finalizing a new requirement at § 441.302(k)(2)(ii), specifying that, if the State provides that homemaker, home health aide, or personal care services, as set forth at § 440.180(b)(2) through (4), may be furnished under a self-directed services delivery model in which the beneficiary directing the services sets the direct care worker's payment rate, then the State does not include such payment data in its calculation of the State's compliance with the minimum performance levels at paragraph (k)(3).

We are finalizing the general application of § 441.302(k) to HCBS authorized under section 1915(j), (k), and (i) authorities, with the understanding that some services delivered under these authorities will fall under the exception for self-directed services delivery models being finalized at § 441.302(k)(2)(ii).

We note that the exception at § 441.302(k)(2)(ii) directs States to exclude certain data from the specified excluded self-directed services models when establishing compliance with the minimum performance level or small provider performance level at § 441.302(k)(3). We believe, however, that the regulation text at § 441.302(k) requiring States to assure that payment rates are adequate to ensure a sufficient direct care workforce to meet the needs of beneficiaries and provide access to services in the amount, duration, and scope specified in beneficiaries' person-centered service plans applies to all self-directed services models offered under all section 1915 authorities.

Comment: Commenters were mixed in their support for excluding section 1905(a) services from the payment adequacy requirement. A few commenters expressed strong support for extending the payment adequacy requirement to services authorized under section 1905(a), particularly commenters writing from States in which larger numbers of beneficiaries receive section 1905(a) State plan services. One commenter expressed concern that not including section 1905(a) services would disproportionately exclude direct care workers providing services to children or adults with intellectual and developmental disabilities. One commenter noted that section 1902(a)(6) of the Act gives CMS the authority to apply the requirement section 1905(a) services.

However, several commenters did not support applying the requirement to section 1905(a) State plan services. Many of these commenters simply did not support applying the minimum performance requirement to services under any authority. A few commenters agreed with our concerns that applying the payment adequacy requirement to section 1905(a) State plan services would pose a particular burden on States due to differences in how these services are delivered and monitored.

Several commenters expressed concerns about potential unintended consequences of not applying the minimum performance requirement to section 1905(a) State plan services. In particular, some commenters raised concerns that direct care workers would stop working for providers that deliver section 1905(a) services, in favor of working for providers that were subject to the minimum performance requirement. On the other hand, a few

commenters worried that providers would stop providing services under section 1915 authorities and switch to providing section 1905(a) services to avoid having to comply with the payment adequacy requirement.

Response: At this time, we are not requiring the application of the HCBS payment adequacy requirements at § 441.302(k) to section 1905(a) services. Given our work to better ensure access in the Medicaid program is ongoing, we intend to gain implementation experience with this final rule, and we will take these comments under consideration for any potential future rulemaking regarding section 1905(a) services.

Comment: One commenter requested clarification as to whether the payment adequacy requirements would apply to services delivered under section 1115 authority.

Response: At § 441.302(k)(4) (which we are finalizing at § 441.302(k)(8)), we proposed to apply these requirements to services delivered under FFS or managed care delivery systems, including those authorized under section 1115(a) of the Act. We are finalizing this requirement in this final rule, with modifications as noted herein, including retaining the application to managed care delivery systems authorized section 1115(a).

After consideration of public comments, and for reasons discussed in sections II.B.5.b. and II.B.5.h. of this rule, we are finalizing § 441.302(k)(4) with modifications to redesignate § 441.302(k)(4) as § 441.302(k)(8) and change the date for States to comply with the requirements at § 441.302(k) from 4 years to 6 years. We are finalizing § 441.302(k)(8) with minor modifications to correct erroneous uses of the word ''effective.'' We are retitling the requirement at § 441.302(k)(8) as Applicability date (rather than Effective date). We are also modifying the language at § 441.302(k)(8) to specify that States must comply with the requirements in § 441.302(k) beginning 6 years after the effective date of this final rule, rather than stating that § 441.302(k)(8) is effective 6 years after the effective date of the final rule. In addition, we are finalizing technical modifications to the language pertaining to the applicability date for States providing services through managed care delivery systems to improve accuracy and alignment with common phrasing in managed care contracting policy.

As finalized, the redesignated § 441.302(k)(8) reads: *Applicability date.* **States must comply with the** requirements **set forth in paragraph (k) of this section** beginning *6* years after the effective date of this paragraph; and in the case of the State that implements a managed care delivery system under the authority of section 1915(a), 1915(b), 1932(a), or 1115(a) of the Act and includes **homemaker, home health aide, or personal care services, as set forth at § 440.180(b)(2) through (4)** in the MCO's, PIHP's, or PAHP's contract, ***the first rating period for contracts with the MCO, PIHP, or PAHP beginning*** on or after **the date that is** *6* years after the **effective** date of this paragraph. (New language identified in bold.)

After consideration of the comments, as noted above in this section, we are finalizing a requirement at § 441.302(k)(2)(ii) specifying that if the State provides that homemaker, home health aide, or personal care services, as set forth at § 440.180(b)(2) through (4), may be furnished under a self-directed services delivery model in which the beneficiary directing the services sets the direct care worker's payment rate, then the State does not include such payment data in its calculation of the State's compliance with the minimum performance levels at paragraph (k)(3).

We are finalizing the application of § 441.302(k) to section 1915(j), (k), and (i) services with minor modifications. We are finalizing a technical modification to clarify that the reference to person-centered service plans in §§ 441.464(f), 441.570(f), and 441.745(a)(1)(vi) is to beneficiaries' person-centered service plans. We are also clarifying in §§ 441.464(f), 441.570(f), and 441.745(a)(1)(vi) that while § 441.302(k) applies to services delivered under these authorities, references to section 1915(c) of the Act are instead references to sections 1915(j), (k), or (i), as appropriate.

Additionally, to ensure application of all relevant requirements of § 441.302(k) to section 1915(i) and (k) authorities, we are also finalizing a modification to §§ 441.474(c), 441.580(i) and 441.745(a)(1)(vii) to clarify that the reporting requirement at § 441.302(k)(6) applies to section 1915(j), (k) and (i) authorities, respectively. (We note that discussion of the finalization of §§ 441.474(c), 441.580(i) and 441.745(a)(1)(vii) is in II.B.7. of this final rule.) We note that while we are applying the requirement at § 441.302(k)(6) to section 1915(j), (k), and (k) authorities, States would only be required to comply with this reporting requirement if the State provided services under these authorities described in § 441.302(k)(2)(i) and if the State meets the other criteria set forth in § 441.302(k)(6).

h. Applicability Date (Proposed at § 441.302(k)(4), Being Finalized at § 441.302(k)(8))

As noted throughout the HCBS provisions in this preamble, we recognize that many States may need time to implement these requirements, including to amend provider agreements or managed care contracts, make State regulatory or policy changes, implement process or procedural changes, update information systems for data collection and reporting, or conduct other activities to implement these proposed payment adequacy requirements. We expect that these activities will take longer than similar activities for other HCBS provisions in the rule. Further, we expect that it will take a substantial amount of time for managed care plans and providers to establish the necessary systems, data collection tools, and processes necessary to collect the required information to report to States. As a result, we proposed at § 441.302(k)(4), to provide States with 4 years to implement these requirements in FFS delivery systems following the effective date of the final rule. For States that implement a managed care delivery system under the authority of sections 1915(a), 1915(b), 1932(a), or 1115(a) of the Act and include HCBS in the MCO's, PIHP's, or PAHP's contract, we proposed to provide States until the first rating period for contracts with the MCO, PIHP, or PAHP, beginning on or after 4 years after the effective date of the final rule to implement these requirements. Similar to our rationale in other sections, this proposed timeline reflects feedback from States and other interested parties that it could take 3 to 4 years for States to complete any necessary work to amend State regulations and work with their State legislatures, if needed, as well as to revise policies, operational processes, information systems, and contracts to support implementation of the proposals outlined in this section. We also considered the overall burden of the proposed rule as a whole in proposing the effective date for the payment adequacy provision. We invited comments on the overall burden associated with implementing this section, whether this timeframe is sufficient, whether we should require a shorter timeframe (such as 3 years) or longer timeframe (such as 5 years) to implement the payment adequacy provisions and if an alternate timeframe is recommended, the rationale for that alternate timeframe.

We received public comments on these proposals. The following is a

summary of the comments we received and our responses.

Comment: A few commenters supported our proposal that the minimum performance requirement go into effect four years after the publication of this final rule. One commenter noted that 4 years should be sufficient time for States and providers to make necessary adjustments. A few commenters noted that 4 years was too long, given the urgency of the workforce shortage. One commenter suggested that we require the minimum performance requirement go into effect January 1, 2025, while another commenter suggested a 2-year effective date. One commenter suggested the requirement should go into effect in 3 years, to align with some of the other proposed effective dates in this rule.

Other commenters recommended that we allow for a longer effective date, such as 6 years. Commenters noted that large-scale changes, such as what would be required to comply with the minimum performance requirement, would take time.

Several commenters suggested that compliance with the minimum performance requirement be phased in over time to give providers and States an opportunity to adjust their systems and policies.

Response: While we are sympathetic to commenters' sense of urgency regarding the workforce shortage, we do not believe it is realistic for States to comply with the requirements earlier than the proposed four years. We agree with commenters that, for some States, ensuring that a minimum percent of Medicaid payments go to direct care worker compensation (and tracking compliance with this requirement) will require a period of adjustment. We do expect that providers should already be aware of their Medicaid revenues and what they pay their workers; however, we acknowledge that they may not already be reporting this information to the States and that the States will need to work with their providers to develop an appropriate reporting mechanism. We also understand that some providers will have to adjust how they operate their business in order to meet the required minimum performance level. We also acknowledge that we will need to provide additional subregulatory guidance and technical assistance to aid in implementation.

We agree with commenters that a slightly longer date for States to comply with the requirements is necessary. We believe that the complementary reporting requirement at § 441.311I (discussed in section II.B.7. of this rule) can be leveraged to create a transition period to aid States in their compliance with § 441.302(k)(3). As such, we are finalizing § 441.302(k)(8) with a modification to change the date for States to comply with the requirements from 4 years to 6 years. The data collected as part of § 441.311(e) will give States feedback on how close they are to reaching the minimum performance level and will help CMS develop targeted technical assistance for States that are farther away from attaining compliance. For States electing to create a State-defined minimum performance level for small providers, this period between reporting and performance will also allow States to make any necessary adjustments to their State-defined minimum performance levels. It will also allow States to make any necessary adjustments to their criteria for hardship exemptions and to identify providers who need hardship exemptions. We will continue to use our standard enforcement tools and discretion, as appropriate, when the requirements at §§ 441.302(k) go into effect.

As noted in section II.B.5.b. and II.B.5.h. of this section, we are creating new requirements at § 441.302(k)(4) through (7) and thus are redesignating proposed § 441.302(k)(4) as § 441.302(k)(8) and finalizing § 441.302(k)(8) with the modifications as noted in section II.B.5.b. of this final rule. We are finalizing § 441.302(k)(8) with minor modifications to correct erroneous uses of the word ''effective.'' We are retitling the requirement at § 441.302(k)(8) as Applicability date (rather than Effective date). We are also modifying the language at § 441.302(k)(8) to specify that States must comply with the requirements in § 441.302(k) beginning 6 years after the effective date of this final rule, rather than stating that § 441.302(k)(8) is effective 6 years after the effective date of the final rule. In addition, we are finalizing technical modifications to the language pertaining to the applicability date for States providing services through managed care delivery systems to improve accuracy and alignment with common phrasing in managed care contracting policy.

i. Summary of Finalized Requirements

After consideration of the public comments, we are finalizing the requirements at § 441.302(k) as follows:

- We are finalizing the assurance requirement at § 441.302(k) with technical modifications.
- We are finalizing § 441.302(k)(1) with a technical modification.
- The definition of compensation at § 441.302(k)(1)(i) (now also at § 441.311(e)(1)(i)) and finalized as proposed, with the exception of § 441.302(k)(1)(i)(B) (now also at § 441.311(e)(1)(i)(B)), which is revised to read: Benefits (such as health and dental benefits, life and disability insurance, paid leave, retirement, and tuition reimbursement).
- The definition of direct care worker at § 441.302(k)(1)(ii) (now also at § 441.311(e)(ii)) is finalized with technical modifications to § 441.302(k)(1)(ii)(A) and (F) (now also at § 441.311(e)(1)(ii)(A) and (F)). We are also finalizing the following addition at the end of § 441.302(k)(1)(ii)(F) (now also at § 441.311(e)(1)(ii)(F)), including nurses and other staff providing clinical supervision. The revised text at § 441.302(k)(1)(ii)(F) (now also at § 441.311(e)(1)(ii)(F)) will read as follows: Other individuals who are paid to provide services to address activities of daily living or instrumental activities of daily living, behavioral supports, employment supports, or other services to promote community integration directly to Medicaid beneficiaries receiving home and community-based services available under this subpart, including nurses and other staff providing clinical supervision. In addition, we are making a technical modification to not finalize § 441.302(k)(1)(ii)(G) and add language proposed at § 441.302(k)(1)(ii)(G) to the end of § 441.302(k)(1)(ii) to clarify that a direct care worker may be employed by a Medicaid provider, State agency, or third party; contracted with a Medicaid provider, State agency, or third party; or delivering services under a self-directed services delivery model.
- A definition of excluded costs is finalized at § 441.302(k)(1)(iii) (now also at § 441.311(e)(1)(iii)) as follows:

Excluded costs means costs that are not included in the calculation of the percentage of Medicaid payments to providers that is spent on compensation for direct care workers. Such costs are limited to:

(A) Costs of required trainings for direct care workers (such as costs for qualified trainers and training materials);

(B) Travel costs for direct care workers (such as mileage reimbursement or public transportation subsidies); and

(C) Costs of personal protective equipment for direct care workers.

- Section 441.302(k)(2) is finalized with modifications. We are redesignating the language at § 441.302(k)(2) as § 441.302(k)(2)(i). We are finalizing § 441.302(k)(2)(i) to include references to the reporting requirements that are finalized at

§§ 441.302(k)(6) and 441.311(e) and the exception finalized at § 441.302(k)(2)(ii). We also made a technical modification for clarity that the State must demonstrate **annually,** consistent with the reporting requirements at §§ 441.302(k)(6) and 441.311(e), that they meet the minimum performance level at § 441.302(k)(3). In addition, we made technical modifications for clarity and precision to specify the specific services (homemaker, home health aide, and personal care services) to which the payment adequacy requirement applies and to specify that these requirements apply to services authorized under section 1915(c) of the Act, unless excepted under § 441.302(k)(2)(ii).

- We are finalizing at new requirement at § 441.302(k)(2)(ii) that clarifies that if the State provides that homemaker, home health aide, or personal care services, as set forth at § 440.180(b)(2) through (4), may be furnished under a self-directed services delivery model in which the beneficiary directing the services sets the direct care worker's payment rate, then the State would not include such payment data in its calculation of the State's compliance with the minimum performance levels at paragraph (k)(3).
- Section 441.302(k)(3) is finalized with several modifications to retitle the requirement as ''*Minimum performance at the provider level*'' and clarify the components of the required calculation and the services that fall within this requirement. Section 441.302(k)(3) is also finalized with modifications to clarify that excluded costs are not included in the calculation of the percentage of total payments to a provider that is spent on compensation to direct care workers and to specify the specific services (homemaker, home health aide, and personal care services) to which the payment adequacy requirement applies. We are also modifying § 441.302(k)(3) to note the exceptions to the minimum performance level that we are adding at (k)(5) (hardship exemption) and (k)(7) (IHS and Tribal health programs subject to 25 U.S.C. 1641).
- Section 441.302(k)(3)(i) is finalized with a clarification that the minimum performance level of 80 percent applies to all payments to a provider, except as provided in paragraph (k)(3)(ii).
- Section 441.302(k)(3)(ii) is amended to add an option for States to set a State-defined small provider minimum performance level. As finalized, § 441.302(k)(3)(ii) reads: (ii) At the State's option, providers determined by the State to meet its State-defined small provider criteria in paragraph (k)(4)(i) of this section, the State must ensure that each provider spends the percentage set by the State in accordance with paragraph (k)(4)(ii) of this section of total payments the provider receives for services it furnishes as described in paragraph (k)(3) on total compensation for direct care workers who furnish those services.
- An option for States to develop criteria to identify small providers to meet the State-defined small provider minimum performance level is added at new § 441.302(k)(4).
- An option for States to provide some providers with a hardship exemption is added at new § 441.302(k)(5).
- Reporting requirements are finalized at § 441.302(k)(6), establishing reporting requirements for States that utilize the small provider minimum performance level and hardship exemption options finalized at § 441.302(k)(4)(ii) and (k)(5), as well as a waiver of these requirements that may be granted under certain circumstances.
- An exemption from the requirements at § 441.302(k) is finalized for IHS and Tribal health programs subject to 25 U.S.C. 1641 at § 441.302(k)(7).
- Section 441.302(k)(4) is renumbered as § 441.302(k)(8) and is finalized, with other technical modifications, to specify that States must comply with the requirements set forth at § 441.302(k)(8) beginning 6 years from the effective date of this final Rule.
- We are finalizing §§ 441.464(f), 441.570(f), and 441.745(a)(1)(vi) with technical modification to clarify that the references to person-centered service plans in §§ 441.464(f), 441.570(f), and 441.745(a)(1)(vi) are to beneficiaries' person-centered service plans. We are also finalizing modifications to clarify that § 441.302(k) applies to services delivered under these authorities, except that references to section 1915(c) of the Act are instead references to sections 1915(j), (k), or (i) of the Act, as appropriate.
- We are finalizing a modification to §§ 441.474(c), 441.580(i), and 441.745(a)(1)(vii) to clarify that the reporting requirement at § 441.302(k)(6) applies to section 1915(j), (k) and (i) authorities, respectively.

6. Supporting Documentation Required (§ 441.303(f)(6))

As discussed in the proposed rule (88 FR 27986), States vary in whether they maintain waiting lists for section 1915(c) waivers, and if a waiting list is maintained, how individuals may join the waiting list. Section 1915(c) of the Act authorizes States to set enrollment limits or caps on the number of individuals served in a waiver, and many States maintain waiting lists of individuals interested in receiving waiver services once a spot becomes available. While some States require individuals to first be determined eligible for waiver services to join the waiting list, other States permit individuals to join a waiting list after an expression of interest in receiving waiver services. This can overestimate the number of people who need Medicaid-covered HCBS because the waiting lists may include individuals who are not eligible for services. According to the Kaiser Family Foundation, over half of people on HCBS waiting lists live in States that do not screen people on waiting lists for eligibility.[118]

We have not previously required States to submit any information on the existence or composition of waiting lists, which has led to gaps in information on the accessibility of HCBS within and across States. Further, feedback obtained during various public engagement activities conducted with States and other interested parties over the past several years about reporting requirements for HCBS, as well as feedback received through the RFI[119] discussed earlier, indicate that there is a need to improve public transparency and processes related to States' HCBS waiting lists. In addition, we have found, over the past several years in particular, that some States are operating waiting lists for their section 1915(c) waiver programs despite serving fewer people than their CMS-approved enrollment limit or cap, even though States are expected to enroll individuals up to their CMS-approved enrollment limit or cap before imposing a waiting list. However, because we do not routinely collect information on States' use of waiting lists and the number of people on waiting lists, we are unable to determine the extent to which States are operating such unauthorized waiting lists or to work with States to address these unauthorized waiting lists.

Section 1902(a)(6) of the Act requires State Medicaid agencies to make such reports, in such form and containing such information as the Secretary may from time to time require, and to comply with such provisions as the

[118] Burns, A., M. O'Malley Watts, M. Ammula. A Look at Waiting lists for Home and Community-Based Services from 2016 to 2021. Kaiser Family Foundation. *https://www.kff.org/47f8e6f/.*

[119] CMS Request for Information: Access to Coverage and Care in Medicaid & CHIP. February 2022. For a full list of question from the RFI, see *https://www.medicaid.gov/medicaid/access-care/downloads/access-rfi-2022-questions.pdf.*

Secretary may from time to time find necessary to assure the correctness and verification of such reports. Based on the authority found at section 1902(a)(6) of the Act, we proposed to require information from States on waiting lists to improve public transparency and processes related to States' HCBS waiting lists and ensure that we are able to adequately oversee and monitor States' use of waiting lists in their section 1915(c) waiver programs. To address new proposed requirements at § 441.311(d)(1), described in section II.B.7. of this rule, on State reporting on waiting lists, we proposed to amend § 441.303(f)(6) by adding a sentence to the end of the existing regulatory text to require that if the State has a limit on the size of the waiver program and maintains a list of individuals who are waiting to enroll in the waiver program, the State must meet the reporting requirements at § 441.311(d)(1).

We received public comments on these proposals. The following is a summary of the comments we received and our responses. We also received a number of comments on the related reporting requirement at § 441.311(d). Those comments are addressed in section II.B.7.

Comment: A few commenters shared local data and anecdotal experiences about States' waiting lists, which some described as containing thousands of people and requiring beneficiaries to wait for long periods of time, even years, before accessing services. One commenter observed that as demand for HCBS grows, the waiting lists will also grow. A few commenters expressed concerns that the long waiting times may result in beneficiaries having to enter institutional care. Commenters also noted that beneficiaries and their families experience confusion regarding waiting lists, including how long they will have to remain on the waiting list before receiving services; commenters noted that this confusion or lack of transparency can make it difficult for beneficiaries to make informed decisions or plan for future care needs.

A few commenters specifically supported our proposed amendment to § 441.303(f) that would require States to report information on waiting lists for section 1915(c) waiver programs, which commenters believed would contribute to transparency and provide additional data to help make future changes within HCBS programs. Commenters believed that a requirement to report this information would improve CMS's ability to provide oversight and to hold States accountable for waiting list practices. A few commenters believed that creating reporting requirements for waiting lists is a necessary step toward the larger goal of reducing HCBS waiting lists through expansion of HCBS programs. A few commenters noted this information is critical when requesting additional appropriations from State legislatures to expand HCBS programs.

Response: We thank the commenters for their support and for sharing their experiences and perspectives. We agree that collecting and reporting data on waiting lists is a critical step in identifying unmet needs among beneficiaries and can support the efficient administration and expansion of HCBS programs.

Comment: A few commenters expressed opposition to adding a reporting requirement for section 1915(c) waiver programs. Commenters noted concerns that this requirement would necessitate changes in States' data collection processes and IT systems.

Response: We address commenters' concerns in more detail in the discussion of § 441.311(d) in section II.B.7. of this rule. As we note in that section, we have designed the reporting requirement to minimize administrative burden on States while still generating valuable data about waiting lists needed to support transparency and accountability. We plan to offer States technical assistance as needed to help align their current data collection practices with what will be needed to comply with this reporting requirement.

After consideration of the public comments, we are finalizing the requirements at § 441.303(f) as proposed. We note that specific recommendations regarding the reporting requirement are addressed in section II.B.7. as part of the discussion of § 441.311(d).

7. Reporting Requirements (§§ 441.311, 441.474(c), 441.580(i), and 441.745(a)(1)(vii))

Section 1902(a)(6) of the Act requires State Medicaid agencies to make such reports, in such form and containing such information, as the Secretary may from time to time require, and to comply with such provisions as the Secretary may from time to time find necessary to assure the correctness and verification of such reports. As discussed in section II.B.1. of the proposed rule, in 2014, we released guidance for section 1915(c) waiver programs in which we requested States to report on State-developed performance measures across several domains, as part of an overarching HCBS waiver quality strategy. The 2014 guidance established an expectation that States conduct systemic remediation and implement a Quality Improvement Project when they score below 86 percent on any of their performance measures. Under our authority at section 1902(a)(6) of the Act, we proposed requirements at § 441.311, in combination with other proposed requirements identified throughout the proposed rule, to supersede and fully replace the reporting metrics and the minimum 86 percent performance level expectations for States' performance measures described in the 2014 guidance.

The reporting requirements we proposed in the proposed rule represented consolidated feedback from States, consumer advocates, managed care plans, providers, and other HCBS interested parties on improving and enhancing section 1915(c) waiver performance to integrate nationally standardized quality measures into the reporting requirements, address gaps in existing reporting requirements related to access and the direct service workforce, strengthen health and welfare and person-centered planning reporting requirements, and eliminate annual performance measure reporting requirements that provide limited useful data for assessing State compliance with statutory and regulatory requirements. The intent of the proposed reporting requirements was to allow us to better assess State compliance with the statutory and regulatory requirements for section 1915(c) waiver programs. As indicated at the end of this preamble section, we proposed that the reporting requirements at § 441.311 also apply to State plan options authorized under section 1915(i), (j) and (k) of the Act, as well as to both FFS and managed care delivery systems, unless otherwise indicated.

We proposed, at § 441.311(a), a regulation setting forth the statutory basis and scope of the reporting requirements in § 441.311.

We did not receive comments on § 441.311(a). Based on further consideration, we are finalizing § 441.311(a) with a modification for clarity to remove ''simplification'' and make a minor formatting change to ensure § 441.311(a) aligns directly with the statutory requirement at section 1902(a)(19) of the Act.

We also note that, consistent with statements we made in the introduction of sections II. and II.B. of this final rule regarding severability, we intend that each provision in § 441.311 of this final rule is, as finalized, distinct and severable to the extent it does not rely on another final policy or regulation that we proposed. While we intend that each of the provisions being finalized

within § 441.311, and policies and regulations being finalized elsewhere in this rule, present a comprehensive approach for our oversight of States' Medicaid programs and improving HCBS, we also intend that each reporting requirement within § 441.311 is distinct and severable from one another and from other policies and regulations, being finalized in this rule as well as those rules and regulations currently in effect, to the extent applicable.

Specifically, we proposed, and are finalizing, various reporting requirements in § 441.311 to provide mechanisms for us to oversee States' compliance with other policies being finalized in this rule, such as reporting requirements at § 441.311(b)(1) through (2) for incident management system and critical incident requirements under § 441.302(a)(6), as well as to collect data to support future policy considerations to address the direct care worker shortage at § 441.311(e). While we intend them to be distinct and severable, we are finalizing these reporting requirements in § 441.311 to consolidate them in one place in regulation so they are easier to find. They are not interdependent to the extent each does not rely on another final policy or regulation that we proposed and are finalizing in this rule. We believe that the reporting requirements being finalized herein at § 441.311(b)(1) through (4), (c), (d)(1) and (2), and (e) are each valuable on their own and would provide critical data and oversight even in a circumstance where individual provisions within § 441.311 were not finalized or implemented; however, we note that in this final rule, we are finalizing all reporting requirements in § 441.311, albeit some with modifications, as discussed in this section.

a. Compliance Reporting

(1) Incident Management System Assessment (§ 441.311(b)(1) and (2))

As noted earlier in section II.B.3. of this rule, there have been notable and high-profile instances of abuse and neglect in recent years that highlight the risks associated with poor quality care and with inadequate oversight of HCBS in Medicaid. This is despite State efforts to implement statutory and regulatory requirements to protect the health and welfare of individuals receiving section 1915(c) waiver program services, and State adoption of related subregulatory guidance. In addition, a July 2019 survey of States that operate section 1915(c) waivers found that:

- Definitions of critical incidents vary across States and, in some cases, within States for different HCBS programs or populations;
- Some States do not use standardized forms for reporting incidents, thereby impeding the consistent collection of information on critical incidents;
- Some States do not have electronic incident management systems, and, among those that do, many use systems with outdated electronic platforms that are not linked with other State systems, leading to the systems operating in silos and the need to consolidate information across disparate systems; and
- Many States cited the lack of communication within and across State agencies, including with investigative agencies, as a barrier to incident resolution.

Based on these findings and reports, as well as feedback obtained during various public engagement activities conducted with interested parties over the past several years to standardize and strengthen health and welfare reporting requirements, we proposed new requirements for States' incident management systems at § 441.302(a)(6), as discussed in section II.B.3. of this preamble. We also proposed new reporting requirements that will allow us to better assess State compliance with the requirements at § 441.302(a)(6).

Relying on our authority at section 1902(a)(6) of the Act, at § 441.311(b), we proposed to establish new compliance reporting requirements. Specifically, at § 441.311(b)(1)(i), we proposed to require that States report every 24 months on the results of an incident management system assessment to demonstrate that they meet the requirements at § 441.302(a)(6) that the State operate and maintain an incident management system that identifies, reports, triages, investigates, resolves, tracks, and trends critical incidents, including that:

- The State define critical incidents to meet the proposed minimum standard definition at § 441.302(a)(6)(i)(A);
- The State have an electronic critical incident system that, at a minimum, enables electronic collection, tracking (including of the status and resolution of investigations), and trending of data on critical incidents as proposed at § 441.302(a)(6)(i)(B);
- The State require that providers report any critical incidents that occur during the delivery of section 1915(c) waiver program services as specified in a waiver participant's person-centered service plan, or are a result of the failure to deliver authorized services, as proposed at § 441.302(a)(6)(i)(C);
- The State use claims data, Medicaid Fraud Control Unit data, and data from other State agencies such as Adult Protective Services or Child Protective Services to the extent permissible under applicable State law to identify critical incidents that are unreported by providers and occur during the delivery of section 1915(c) waiver program services, or as a result of the failure to deliver authorized services, as proposed at § 441.302(a)(6)(i)(D);
- The State ensure records being used as part of the incident management system are handled in compliance with 45 CFR 164.510(b), and records with protected health information are obtained and used with beneficiary consent at § 441.302(a)(6)(i)(E);
- The State share information on reported incidents, the status and resolution of investigations, such as through the use of information sharing agreements, with other entities in the State responsible for investigating critical incidents, if the State refers critical incidents to other entities for investigation, as proposed at § 441.302(a)(6)(i)(E); and
- The State separately investigate critical incidents if the investigative agency fails to report the resolution of an investigation within State-specified timeframes as proposed at § 441.302(a)(6)(i)(F).

Given the risk of preventable and intentional harm to beneficiaries when effective incident management systems are not in place, documented instances of abuse and neglect among people receiving HCBS, and identified shortcomings and weaknesses of States' incident management systems discussed earlier, we believed the proposed requirement for States to report every other year on the results of an incident management system assessment is in the best interest of and necessary for protecting the health and welfare of individuals receiving section 1915(c) waiver program services. In the absence of such a reporting requirement, we believed that we are unable to determine whether States have effective systems in place to identify and address incidents of abuse, neglect, exploitation, or other harm during the course of service delivery; ensure that States are protecting the health and welfare of individuals receiving section 1915(c) waiver program services; and safeguard people receiving section 1915(c) waiver program services from preventable or intentional harm.

In proposing an every 24-month timeframe for reporting, we were attempting to take into account the

likely frequency of State changes to policies, procedures, and information systems, while also balancing State reporting burden and the potential risk to beneficiaries if States have incident management systems that are not compliant with the proposed requirements at § 441.302(a)(6). We believed an every 24-month timeframe for reporting is sufficient to detect substantial changes to policies, procedures, and information systems and ensure that we have accurate information on States' incident management systems. We also proposed, at § 441.311(b)(1)(ii), to allow States to reduce the frequency of reporting to up to once every 60 months for States with incident management systems that are determined to meet the requirements at proposed § 441.302(a)(6). We invited comments on whether the timeframe for States to report on the results of the incident management system assessment is sufficient or if we should require reporting more frequently (every year) or less frequently (every 3 years). We also invited comment on whether we should require reporting more frequently (every 3 years or every 4 years) for States that are determined to have an incident management system that meets the requirements at § 441.302(a)(6). If an alternate timeframe is recommended, we requested that commenters provide the rationale for that alternate timeframe.

We received public comments on this proposal. The following is a summary of the comments we received and our responses. We also received comments on the incident management system requirements. Those comments and our responses are in section II.B.3. of this final rule.

Comment: A few commenters generally supported the proposed incident management requirements being finalized at § 441.302(a)(6), which are the subject of the reporting requirement at § 441.311(b)(1). One commenter questioned how these reporting requirements would interact with current State reporting requirements related to critical incidents or other waiver reporting requirements.

Response: We thank commenters for their support. We expect to implement new reporting forms for the new reporting requirements that we are finalizing in this final rule, including the critical incident reporting requirements. We also expect to modify existing reporting forms, particularly to remove the reporting requirements in the 2014 guidance [120] that are being superseded and fully replaced by the requirements in this final rule. We note that some components of the existing reporting forms may remain in effect to the extent that they cover other requirements that remain unchanged by the requirements that we are finalizing in this final rule. States and interested parties will have an opportunity to comment on the new reporting forms and the revised forms through the Paperwork Reduction Act notice and comment process. Further, we expect that States will be able to build on existing systems to comply with the requirements being finalized in this rule at §§ 441.302(a)(6) and 441.311(b)(1) (discussed in sections II.B.3. and II.B.7. of this rule, respectively.) We plan to provide technical assistance to specific State questions, as needed, about how these requirements can align and interact with current practices.

Comment: A few commenters requested clarification on the assessment that is mentioned in § 441.311(b)(1)(i). Commenters requested more information on the contents of the assessment States must perform of their incident management systems and how States should report the results of the assessment. A few commenters requested more detail on the reporting template and when the report would need to be submitted. A few commenters expressed the hope that the reporting timing could be aligned with waiver years or other administrative deadlines. One commenter inquired if States were expected to pay for the assessment. One commenter requested clarification on the deadline for when this assessment must be completed. A few commenters noted that the assessment was required to be performed annually.

Response: The assessment that States perform of their systems will include review of the elements being finalized at § 441.302(a)(6). The requirements we are finalizing in § 441.302(a)(6) is discussed in detail in section II.B.3. of this final rule. The assessment results will be collected as part of the overall data collection activities associated with the reporting requirements in § 441.311. Per § 441.311(f), as finalized herein (and discussed below in this section II.B.7.), States will be required to comply with the reporting requirement for § 441.311(b)(1) beginning 3 years after the effective date of this final rule. This means that States will be required to submit the assessment results to CMS in three years; thus, assessments should be performed in time for States to meet this timeframe. We will be making the required assessment and reporting template available for public comment through the Paperwork Reduction Act notice and comment process. Specific reporting due dates will be determined through subregulatory guidance.

We anticipate that the costs that States incur to conduct and report on the results of the assessment will be eligible for Federal match as an administrative activity. Current Medicaid Federal matching funds are available for State expenditures on the design, development, and installation (including enhancements), and for operation, of mechanized claims processing and information retrieval systems. Under section 1903(a)(7) of the Act, Federal matching funds are available for administrative activities necessary for the proper and efficient administration of the Medicaid State plan. This may include the costs that States incur to conduct and report on the results of the incident management assessment.

We also clarify that there is not a requirement that the incident management assessment be performed annually. As discussed in greater detail below, §§ 441.311(b)(1)(i) and (ii) require that States must submit an incident management assessment every 24 months unless CMS determines the system meets the requirements at § 441.302(a)(6), at which point the assessment must be made every 60 months. Assessments of the incident management system need to be performed as part of this assurance schedule. However, States are welcome to perform assessments more frequently than this schedule requires.

Comment: A few commenters requested that we require States to assess whether the State system tracks the reporting of critical incidents to the designated State Protection and Advocacy system at the same time the incident was reported to the State.

Response: We are declining to make modifications to requirements for States system assessments. We note that commenters made a similar request to add this requirement to the system requirements proposed at § 441.302(a)(6). We also declined to add the requirement to § 441.302(a)(6). We refer readers to section II.B.3. of this rule for the related discussion. However, States are welcome to add other factors to their system assessment beyond the requirements we are finalizing in this rule.

[120] We note that, although States will no longer be expected to meet the reporting requirements and 86 percent minimum performance level in the 2014 guidance, the six assurances and related subassurances in the 2014 guidance continue to apply.

Comment: One commenter requested clarification on the consequences of a State's incident management system being found to be non-compliant with § 441.302(a)(6).

Response: Corrective actions or other enforcement actions will be determined on a case-by-case basis, using our standard enforcement authority, for States with incident management systems that are determined by the assessment to not be compliant with the requirements at § 441.302(a)(6). Additionally, States that do not have compliant systems will be required to perform assessments every 24 months, as required by § 441.311(b)(1)(i) until CMS determines that the system meets the requirements of § 441.302(a)(6) and the State can reduce reporting frequency to every 60 months, as provided by § 441.311(b)(1)(ii). We are not making any changes in this final rule based on this comment.

Comment: A few commenters supported the proposals at § 441.311(b)(1)(i) and (ii) that States must provide the required assessment every 24 months and, if the system is determined to be compliant, every 60 months. One commenter encouraged us to reduce the frequency in § 441.311(b)(1)(i) to one year. One commenter suggested that States should provide assessments on their systems every 1 to 2 years, and if the State's system has been deemed to be in compliance, the assessment should be provided every 3 to 4 years.

A few commenters, however, believed that the reporting frequency should be increased. One commenter recommended this reporting should occur every three years. A few commenters worried that 24 months would not be sufficient time for States to submit the assessment to CMS, and implement any system changes, which might require IT systems updates and acquiring additional funding from State legislatures. One commenter suggested that the assessment should be submitted every 5 years to align with the waiver renewal cycle.

One commenter noted that requiring an assessment every 24 months will create an unnecessary duplication of work. The commenter agreed with the need for an initial assessment but contended that the ongoing assessments were unnecessary, as States could independently monitor ongoing operations and make quality improvements and system updates as needed.

Response: We continue to believe that 24 months (and, for compliant systems, 60 months) is an appropriate frequency that ensures accountability without being overly burdensome. We refer readers to our prior response regarding situations in which we determine, based on the State's assessment, that its system does not meet the requirements finalized at § 441.302(a)(6).

We do not agree that requiring a regular schedule of system review is duplicative. If a State is already conducting regular system reviews as part of a quality improvement process, that review can form the basis for the every 24-month or, as appropriate, every 60-month assessment. We believe that for States that may not already have such processes in place, some regular schedule of review is necessary to ensure that over time, systems do not fall out of compliance. We also would encourage States to use these assessments as opportunities to conduct more comprehensive audits or reviews to identify opportunities for system improvements.

After consideration of the comments received, we are finalizing the reporting frequency in § 441.311(b)(1)(i) with a technical modification for clarity that the State must report on the results of an incident management system assessment, every 24 months, in the form and manner, and at a time, specified by CMS, rather than according to the format and specifications provided by CMS. We are finalizing § 441.311(b)(1)(ii) as proposed.

(2) Critical Incidents (§ 441.311(b)(2))

As discussed earlier in section II.B.4. of the proposed rule, at § 441.302(a)(6)(i)(A), we proposed to require States to define critical incidents at a minimum as verbal, physical, sexual, psychological, or emotional abuse; neglect; exploitation including financial exploitation; misuse or unauthorized use of restrictive interventions or seclusion; a medication error resulting in a telephone call to or a consultation with a poison control center, an emergency department visit, an urgent care visit, a hospitalization, or death; or an unexplained or unanticipated death, including but not limited to a death caused by abuse or neglect.

Based on the same rationale as discussed previously in section II.B.7.a.(1) of this preamble related to the proposed incident management system assessment reporting requirement, at § 441.311(b)(2), relying on our authority under section 1902(a)(6) of the Act, we proposed to require that States report annually on the number and percent of critical incidents for which an investigation was initiated within State-specified timeframes; number and percent of critical incidents that are investigated and for which the State determines the resolution within State-specified timeframes; and number and percent of critical incidents requiring corrective action, as determined by the State, for which the required corrective action has been completed within State-specified timeframes. We intended to use the information generated from the proposed reporting requirements at § 441.311(b)(2)(i) through (iii) to determine if States meet the requirements at § 441.302(a)(6)(ii).[121] Given the risk of harm to beneficiaries when effective incident management systems are not in place, documented instances of abuse and neglect among people receiving HCBS, and identified shortcomings and weaknesses of States' incident management systems discussed earlier, we believed the proposed requirement at § 441.311(b)(2) for States to report annually on critical incidents is in the best interest of and necessary for protecting the health and welfare of individuals receiving section 1915(c) waiver program services. We invited comments on the timeframe for States to report on the critical incidents, whether we should require reporting less frequently (every 2 years), and if an alternate timeframe is recommended, the rationale for the alternate timeframe.

We received public comments on this proposal. The following is a summary of the comments we received and our responses. We also received comments on the minimum performance requirements for critical incident investigations proposed in § 441.302(a)(6), which form the basis of the reporting requirement at § 441.311(b)(2). These comments and our responses are in section II.B.3. of this final rule.

Comment: A few commenters generally supported our proposal at § 441.311(b)(2). One commenter observed that the current lack of standardized incident management systems across all States puts beneficiaries at risk and believed that the critical incident reporting requirements will help to prevent adverse experiences, increase accountability for States, and provide beneficiaries with an avenue of redress when they experience harm.

Response: We thank commenters for their support.

Comment: A few commenters opposed the reporting requirement at § 441.311(b)(2). One commenter

[121] We note that there was a typographical error in the NPRM at 88 FR 27987, incorrectly identifying the proposed reporting requirements at § 441.311(b)(2)(ii) through (iv), rather § 441.311(b)(2)(i) through (iii).

believed that building the necessary IT systems to complete the reporting will impose an extraordinary cost to States and take years to develop, test, and implement. Another commenter expressed concerns that the reporting requirements would necessitate a restructuring of some States' critical incident management, including revising policies, procedures, trainings, and processes.

Response: As discussed in the proposed rule (88 FR 27978), since 2014, States operating section 1915(c) waiver programs have been expected to demonstrate on an ongoing basis that they identify, address, and seek to prevent instances of abuse, neglect, exploitation, and unexplained death, and demonstrate that an incident management system is in place that effectively resolves incidents and prevents further similar incidents to the extent possible. While we acknowledge that some States may have to make some adjustments to their systems, we expect that most will be able to build on existing systems to achieve this reporting. We plan to offer States technical assistance as needed to support questions they may have about adjustments they need to make to existing policies, tracking, and reporting systems. We decline to make any changes in this final rule based on these comments.

Comment: A few commenters requested that we share more details about the reporting template and when the report would need to be submitted. A few commenters expressed the hope that the reporting timing could be aligned with waiver years or other administrative deadlines.

Response: The reporting requirement at § 441.311(b)(2) will be collected as part of the overall data collection activities associated with the reporting requirements in § 441.311. Per § 441.311(f), as finalized herein and discussed in this section II.B.7. of the rule, States must comply with the reporting requirement at § 441.311(b)(2) beginning 3 years from the effective date of this final rule]. Prior to that applicability date, we will be making the reporting template available for public comment through the Paperwork Reduction Act notice and comment process. Specific reporting due dates will be determined through subregulatory guidance.

Comment: One commenter requested clarification on whether the reporting was statewide or could be submitted for each program. The commenter noted that for States operating multiple critical incident systems, or tracking critical incidents at the program level, reporting of data at an aggregate statewide level will not only prove operationally challenging, but it could also limit the ability to identify and address program-specific issues.

Response: States are expected to report aggregated statewide data for this requirement. We believe that a State could track critical incidents by program at the State level and then aggregate this data for the purposes of the reporting requirement at § 441.311(b)(2). We plan to offer technical assistance to States, as needed, that have decentralized critical incident systems to facilitate the aggregated statewide reporting. We also note that States will be able to provide input into the reporting instrument when it is shared for public comment during the Paperwork Reduction Act notice and public comment process.

Comment: One commenter was critical of the proposed reporting metrics at § 441.311(b)(2), believing that the focus of the metrics was too much on timeliness: timely initiation of investigations, timely resolutions, and timely corrective action. The commenter did not believe that there was sufficient focus on the substance of the incidents. A few commenters recommended that we add the following metrics to § 441.311(b)(2): the number of critical incidents in each year, categorized by type of incident and extent of injury or by severity; whether corrective action was needed; whether corrective action was performed; whether any corrective action addressed the needs of current participants or future participants (or both); and whether corrective action adequately addressed participants' needs.

One commenter stated that the information should be reported to the public, although in a format that protects the anonymity of the beneficiary and filer. The commenter also suggested that a separate section of the public report should provide information on substantiated critical incidents by provider, including the service provider's owner and the name under which they are doing business.

Response: We disagree that the metrics in § 441.311(b)(2) focus only on timeliness. Inherent in these metrics is the expectation that States will promptly investigate and resolve critical incidents, which we believe is the essential purpose of the critical incident system. We developed the reporting requirement at § 441.311(b)(2) to strike a balance between collecting enough information to enable Federal oversight of the States' system designed to investigate and resolve critical incidents and imposing as minimal an administrative burden on States and providers as possible. We believe it is important for States to have flexibility in how they design their system to identify, report, triage, investigate, resolve, track, and trend critical incidents as set forth in the proposed requirements at § 441.302(a)(6), which we are finalizing as discussed in section II.B.3. We also believe that requiring a broad, national reporting requirement for States to report critical incident timeliness data will provide a mechanism to assess whether States are complying with their own timeframes for investigating, resolving, and implementing corrective actions, and to ensure States are complying with their own established processes for reviewing and addressing critical incidents.

We did not propose, and are not finalizing, specific requirements for how States must use this data. We will likely include promising practices related to data collection and analysis, including methods of capturing qualitative data from the records, in technical assistance for States to aid in implementation.

We note that the data required in § 441.311(b)(2) is included in the public posting requirement we are finalizing at § 441.313 (discussed in greater detail in II.B.9. of this final rule). We are not requiring that States publicly report specific information about critical incidents, including the names of providers involved in critical incidents. We believe that some public disclosures may not be suitable or appropriate in every instance, and it would be difficult to tailor a meaningful requirement to anticipate all of these circumstances. We are concerned that, for example, in States with smaller HCBS populations, it may be difficult to truly anonymize information about critical incidents. While we agree that, over time, qualitative data about trends in critical incidents could be useful to both States and other interested parties in promoting systemic improvements in their HCBS programs, we defer to States to determine when and how to make this information public, in accordance with applicable laws governing confidentiality of such information, and for what purpose.

Comment: A few commenters supported the proposal that this data should be reported on an annual basis. A few commenters recommended less frequent reporting, such as every two years, to reduce burden.

One commenter, while not necessarily recommending a different reporting frequency, noted that reporting requirements must take into account the unique factors that impact the length of time it could take to complete an

investigation or conduct corrective action. The commenter noted that depending on the nature of the corrective action and when the corrective action process begins in a reporting year, annual reporting may result in misleading data about the number of resolved critical incidents or completed corrective actions.

Response: Given the importance and time-sensitive nature of critical incident investigations, resolutions, and corrective actions, we believe it is necessary to collect this data on an annual basis so we may monitor these systems. We also clarify that the reporting is not intended to track how many critical incidents were investigated, resolved, or resulted in completed corrective actions in a reporting year; the requirement is to report how many critical incidents were investigated, resolved, or resulted in completed corrective actions within State-specified timeframes during the reporting period. Thus, even if the reporting period falls in the middle of a critical incident resolution or corrective action, these incidents would not be reported as ''non-compliant'' if they were still within the State-specified timeframes for completion.

After consideration of these comments, we are finalizing the introductory text at § 441.311(b)(2), with a technical modification for clarity that the State must report to CMS annually in the form and manner, and at a time, specified by CMS, rather than according to the format and specifications provided by CMS. We are also simplifying the title and moving the reference to § 441.302(a)(6)(i)(A) from the title of § 441.311(b)(2) to the introductory text. As finalized, the introductory text at § 441.311(b)(2) will specify that the State must report to CMS annually on the following information regarding critical incidents as defined in § 441.302(a)(6)(i)(A), in the form and manner, and at a time, specified by CMS. We are finalizing § 441.311(b)(2)(i) through (iii) as proposed.

(3) Person-Centered Planning (§ 441.311(b)(3))

Under the authority of section 1902(a)(6) of the Act, we proposed at § 441.311(b)(3) to require that States report annually to demonstrate that they meet the requirements at § 441.301(c)(3)(ii). Specifically, at § 441.311(b)(3)(i), we proposed to require that States report on the percent of beneficiaries continuously enrolled for at least 365 days for whom a reassessment of functional need was completed within the past 12 months. At § 441.311(b)(3)(ii), we proposed to require that States report on the percent of beneficiaries continuously enrolled for at least 365 days who had a service plan updated as a result of a reassessment of functional need within the past 12 months. These proposed requirements were based on feedback obtained during various interested parties' engagement activities conducted with States and other interested parties over the past several years about the reporting discussed in the 2014 guidance. As discussed in section II.B.7. of the preamble for the proposed rule, this feedback indicated that we should strengthen person-centered planning reporting requirements and eliminate annual performance measure reporting requirements that provide limited useful data for assessing State compliance with statutory and regulatory requirements. These proposed requirements were also based on feedback received through the RFI [122] discussed earlier about the need to standardize reporting and set minimum standards for HCBS.

As discussed in section II.B.1. of the preamble for the proposed rule, we proposed a revision to the regulatory text so that it is clear that changes to the person-centered service plan are not required if the re-assessment does not indicate a need for changes. As such, for the purpose of the reporting requirement at § 441.311(b)(3)(ii), beneficiaries would be considered to have had a person-centered service plan updated as a result of the re-assessment if it is documented that the required re-assessment did not indicate a need for changes.

For both of the metrics at § 441.301(c)(3)(ii), we proposed to allow States to report a statistically valid random sample of beneficiaries, rather than for all individuals continuously enrolled in the waiver program for at least 365 days.

We invited comments on whether there are other specific compliance metrics related to person-centered planning that we should require States to report, either in place of or in addition to the metrics we proposed. We also invited comments on the timeframe for States to report on person-centered planning, whether we should require reporting less frequently (every 2 years), and if an alternate timeframe is recommended, the rationale for the alternate timeframe.

We received public comments on this proposal. The following is a summary of the comments we received and our responses. We also received comments on the person-centered service plans minimum performance requirements proposed in § 441.301(c)(3)(ii), which form the basis of the reporting requirement at § 441.311(b)(3). These comments and our responses are in section II.B.1. of this final rule.

Comment: A few commenters expressed support for the requirement that States report annually on the specified performance metrics for person-centered planning. Commenters echoed sentiments that are reflected in section II.B.1. of this final rule, that many States are already regularly performing the assessment and reassessment activities in compliance with the minimum performance standards being finalized in § 441.301(c)(3)(ii) and, thus, reporting on these activities is reasonable.

We did not receive feedback in response to our request for comment on additional or alternative metrics that should be included in the reporting requirement at § 441.311(b)(3).

Response: We thank commenters for their support. We note that the metrics in § 441.311(b)(3) are based on the minimum performance requirements being finalized at § 441.301(c)(3)(ii); comments on these minimum performance standards are discussed in section II.B.1. of this final rule.

Comment: A few commenters expressed reservations about the proposal to allow States to report data on a statistically valid sample of beneficiaries, suggesting instead that we require complete reporting on all relevant beneficiary data.

Response: We intended that the proposed requirement allow States to report data and information for the person-centered service planning reporting metrics at § 441.311(b)(3) using a statistically valid random sampling of beneficiaries would reduce State burden, while still providing valuable data for strengthening States' person-centered service planning processes. We will consider expanding the reporting to capture the full population of beneficiaries receiving HCBS in future rulemaking if it is determined that such an approach gives a more complete picture of person-centered service planning. We note that States may choose to report on the total population for this measure as opposed to a sample, for instance, if doing so better aligns with their data collection process or needs.

We note that, as proposed, we stated in § 441.311(b)(3)(i) and (ii) that the State may report these metrics for a statistically valid random sample of

[122] CMS Request for Information: Access to Coverage and Care in Medicaid & CHIP. February 2022. For a full list of question from the RFI, see *https://www.medicaid.gov/medicaid/access-care/downloads/access-rfi-2022-questions.pdf.*

beneficiaries. We are finalizing the requirements at § 441.311(b)(3)(i) and (ii) with a technical modification to specify that the State may report this metric **using statistically valid random sampling** of beneficiaries. (Revised language identified in bold.) We make this technical correction to better align the language with standard terminology for the sampling methodology we intended in these requirements.

Comment: One commenter specifically noted that the frequency of annual reporting was feasible. One commenter noted that while the reporting frequency is reasonable, it is important to align with other reporting requirements already placed on States and managed care plans to minimize State and managed care plan reporting burdens.

A few commenters requested clarification on when the report required in § 441.311(b)(3) would be due to CMS and whether we would provide a template for the reporting. One commenter requested clarification on how this aggregated data should be reported, noting that current mechanisms for reporting similar data are waiver specific.

Response: We will be releasing subregulatory guidance, including technical specifications for the new reporting requirements in this final rule, and making the required reporting templates available for public comment through the Paperwork Reduction Act notice and comment process. Per § 441.311(f) below, States must comply with the reporting requirement for § 441.311(b)(3) beginning 3 years from the effective date of this final rule]. Specific reporting due dates will be determined through subregulatory guidance; we will work with States to align these due dates with other obligations to minimize administrative burden to the greatest extent possible.

After consideration of the public comments received, we are finalizing the reporting requirement at § 441.311(b)(3)(i) and (ii), with the technical modification noted above to specify that the State may report this metric using statistically valid random sampling of beneficiaries. We are also finalizing a technical correction to the regulation text at § 441.311(b)(3). In the proposed rule (88 FR 27988), we indicated that we were proposing at § 441.311(b)(3) to require that States report annually to demonstrate that they meet the requirements at § 441.301(c)(3)(ii). In the publication of the proposed rule, this language was omitted from the regulatory text in error. We are finalizing § 441.311(b)(3) with technical modifications to specify that, to demonstrate that the State meets the requirements at § 441.301(c)(3)(ii) regarding person-centered planning (as described in § 441.301(c)(1) through (3)), the State must report to CMS annually. We are also making a technical modification to indicate that the reporting must be in the form and manner, and at a time, specified by CMS. We believe, based on the language included in the proposed rule (88 FR 27988) and the comments received, that commenters understood the intent of this regulation even with language omitted.

(4) Type, Amount, and Cost of Services (§ 441.311(b)(4))

As discussed previously in section II.B.4. of this preamble, we proposed to amend § 441.302(h) to avoid duplicative or conflicting reporting requirements with the new Reporting Requirements section at proposed § 441.311. In particular, at § 441.302(h), we proposed to remove paragraphs (1) and (2). At § 441.311(b)(4), we proposed to add the language previously at § 441.302(h)(1). In doing so, we proposed to retain the current requirement that States report on the type, amount, and cost of services and to include the reporting requirement in the new consolidated reporting section at § 441.311.

We received public comments on this proposal. The following is a summary of the comments we received and our responses.

Comment: One commenter supported this proposal.

Response: We thank the commenter for their support.

Comment: One commenter requested clarification on whether the reporting requirement at § 441.311(b)(4) will apply to managed care plans.

Response: The requirement at § 441.311(b)(4) replicates the current requirement at § 441.302(h), which applies to section 1915(c) programs, regardless of whether they are part of a FFS or managed care delivery system.

As stated in the proposed rule (88 FR 27988), it was our intent to consolidate the current reporting requirement at § 441.302(h)(1) with the new requirements being finalized at § 441.311. We note that as this requirement was presented in the proposed rule, we inadvertently struck part of the language from § 441.302(h) that we intended to retain in § 441.311(b)(4) that clarified the reporting frequency (annually) and the object (the 1915(c) waiver's impact on the State plan) of the requirement currently at § 441.302(h)(1). We are concerned that without this omitted language, § 441.311(b)(4) does not include information needed to implement this requirement. We believe that, as we expressed our intent in the proposed rule (88 FR 27988) to retain the reporting requirement at § 441.302(h)(1), readers would have understood that we intended to preserve the essential elements of the reporting.

To ensure that this requirement can be implemented as intended, we are finalizing § 441.311(b)(4) with language from § 441.302(h) to specify that, **annually,** the **State will provide CMS with information on the waiver's impact on** the type, amount, and cost of services provided under the State plan. (Restored language is noted in bold.)

We also specify here that, as the requirement at § 441.302(h) specifies certain reporting for programs authorized under section 1915(c), this new requirement at § 441.311(b)(4) will similarly apply only to section 1915(c) waiver programs. We discuss the impact of this clarification on references to section 1915(j), (k), and (i) services (at §§ 441.474(c), 441.580(i), and 441.745(a)(1)(vii)) later in this section.

After consideration of the comments received, and in light of the clarification outlined above, we are finalizing the provision at § 441.311(b)(4) to specify that annually, the State will provide CMS with information on the waiver's impact on the type, amount, and cost of services provided under the State plan. Further, we are finalizing § 441.311(b)(4) with a technical modification to specify that the information is to be reported in the form and manner, and at a time, specified by CMS.

b. Reporting on the Home and Community-Based Services (HCBS) Quality Measure Set (§ 441.311(c))

At § 441.311(c), relying on our authority under section 1902(a)(6) of the Act, we proposed to require that States report every other year on the HCBS Quality Measure Set, which is described later in section II.B.8. of the preamble. Specifically, we proposed, at § 441.311(c)(1)(i), to require that States report every other year, according to the format and schedule prescribed by the Secretary through the process for developing and updating the HCBS Quality Measure Set described in section II.B.8. of the final rule, on measures identified in the HCBS Quality Measure Set as mandatory measures for States to report or are identified as measures for which the Secretary will report on behalf of States, and, at § 441.311(c)(1)(ii), to allow States to report on measures in the HCBS Quality Measure Set that are not

identified as mandatory, as described later in this section of the rule.

We proposed every other year for State reporting in recognition of the fact that the current, voluntary HCBS Quality Measure Set is heavily comprised of survey-based measures, which are more burdensome, including for beneficiaries who would be the respondents for the surveys, and costlier to implement than other types of quality measures. Further, we believed that requiring reporting every other year, rather than annually, would better allow States to use the data that they report for quality improvement purposes, as it would provide States with sufficient time to implement interventions that would result in meaningful improvement in performance scores from one reporting period to another. We also proposed this frequency in recognition of the overall burden of the proposed requirement.

Because the delivery of high quality services is in the best interest of Medicaid beneficiaries, we proposed at § 441.311(c)(1)(iii), under our authority at section 1902(a)(19) of the Act, to require States to establish performance targets, subject to our review and approval, for each of the measures in the HCBS Quality Measure Set that are identified as mandatory for States to report or are identified as measures for which we will report on behalf of States, as well as to describe the quality improvement strategies that they will pursue to achieve the performance targets for those measures.[123]

At § 441.311(c)(1)(iv), we proposed to allow States to establish State performance targets for other measures in the HCBS Quality Measure Set that are not identified as mandatory for States to report or as measures for which the Secretary will report on behalf of States as well as to describe the quality improvement strategies that they will pursue to achieve the performance targets for those targets.

At § 441.311(c)(2), we proposed to report on behalf of the States, on a subset of measures in the HCBS Quality Measure Set that are identified as measures for which we will report on behalf of States. Further, at § 441.311(c)(3), we proposed to allow, but not require, States to report on measures that are not yet required but will be, and on populations for whom reporting is not yet required but will be phased-in in the future.

We solicited comments on whether there should be a threshold of compliance that would exempt the State from developing improvement strategies, and if so, what that threshold should be. We also invited comments on whether the timeframe for States to report on the measures in HCBS Quality Measure Set is sufficient, whether we should require reporting more frequently (every year) or less frequently (every 3 years), and, if an alternate timeframe is recommended, the rationale for that alternate timeframe. We welcomed comments on any additional changes we should consider in this section.

We received public comments on this proposal. The following is a summary of the comments we received and our responses. We also received comments on the HCBS Quality Measure Set requirements proposed at § 441.312. These comments and our responses are in section II.B.8. of this final rule.

Comment: Regarding whether there should be a threshold of compliance that would exempt the State from developing improvement strategies, one commenter recommended exemptions for States to develop improvement strategies if they are performing within the top 5th to 10th percentile of performance targets for the quality measures in the HCBS Quality Measure Set, to alleviate administrative burden. Another commenter discouraged CMS from permitting a compliance threshold exemption for States from developing improvement strategies, emphasizing that all States should be held accountable for providing high-quality care and services to beneficiaries receiving HCBS regardless of performance.

Response: We continue to believe that, for each of the measures in the HCBS Quality Measure Set that are identified as mandatory for States to report, or are identified as measures for which we will report on behalf of States, States should establish and describe the quality improvement strategies to achieve the performance targets for those measures.[124] We reiterate our belief that the HCBS Quality Measure Set will promote more common and consistent use within and across States of nationally standardized quality measures in HCBS programs, and will allow CMS and States to have comparative quality data on HCBS programs. As such, exempting States from developing improvement strategies for quality measures in the HCBS Quality Measure Set does not align with this intent.

Comment: Several commenters recommended either faster or slower implementation for reporting of the measures in the HCBS Quality Measure Set. A few commenters recommended we change the timeframe requirement for States to report on the quality measures in the HCBS Quality Measure Set to every year. In this same vein, one commenter suggested we align the reporting timelines required for reporting measures in the HCBS Quality Measure Set to other Medicaid, CHIP, Medicare, and Marketplace measure sets, expressing that reporting biennially (every other year) could lock in data lags that could hinder State progress in improving HCBS for beneficiaries. A few commenters recommended alternatives to the HCBS Quality Measure Set biennial reporting time frame. These alternatives included the following: initiating reporting based on State choice; reporting on odd- or even-numbered years; and beginning State reporting upon renewal of their section 1915(c) waiver or based on the State reporting years for their waiver program.

A few commenters expressed concern that the timeframe for reporting measures in the HCBS Quality Measure Set should be longer than every other year, emphasizing the significant amount of systems work, contracting, and survey data needed to capture the necessary data and implement reporting on HCBS measures. Commenters recommended we consider that the implementation of the HCBS Quality Measure Set reporting requirements as proposed at § 441.311(c)(1)(iii) could require State statutory and regulatory amendments, lead time for securing additional technology resources, and operational and workflow changes. Commenters requested CMS consider alternative dates for States beginning reporting on the measures in the HCBS Quality Measure Set, ranging from an additional 3 to 5 years to address these concerns.

Response: We continue to believe that a biennial timeframe requirement for States to report on the measures in HCBS Quality Measure Set is an appropriate frequency that ensures accountability without being overly burdensome and are finalizing the frequency of reporting as proposed. We determined that a shorter annual reporting timeframe would not likely be operationally feasible because of the potential systems and contracting changes (to existing contracts or the establishment of new contracts) that States may be required to make. For

[123] We note that compliance with CMS regulations and reporting requirements does not imply that a State has complied with the integration mandate of Title II of the ADA, as interpreted by the Supreme Court in the Olmstead Decision.

[124] We note that compliance with CMS regulations and reporting requirements does not imply that a State has complied with the integration mandate of Title II of the ADA, as interpreted by the Supreme Court in the Olmstead Decision.

example, additional reporting requirements may need to be added to State contracts, changes may be needed to data sharing agreements with managed care plans, and modifications of databases or systems might be required to record new variables.

However, to provide States sufficient time to comply with the requirements finalized at § 441.311(c), we are finalizing at § 441.311(f)(2) an applicability date beginning 4 years, rather than 3 years, from the effective date of this final rule for the HCBS Quality Measure Set reporting at § 441.311(c). Our primary purpose in extending the effective date is to ensure States have sufficient time for interested parties to provide input into the measures, as required by § 441.312(g), which we are finalizing in section II.B.8. of this rule.

In general, we anticipate that States will not need more than 4 years after the effective date of the final rule, to implement systems and contracting changes, or acquire any additional support needed to report on the quality measures in the HCBS Quality Measure Set.

We plan to work collaboratively with States to provide the technical assistance and reporting guidance through the Paperwork Reduction Act process necessary to support reporting.

Comment: A few commenters requested confirmation of whether States with section 1115 demonstrations are expected to comply with the HCBS Quality Measures Set requirements in this final rule.

Response: Yes, consistent with the applicability of other HCBS regulatory requirements to such demonstration projects, the reporting requirements for section 1915(c) waiver programs and section 1915(i), (j), and (k) State plan services included in this rule, including the requirements at § 441.311 (and the related quality measure requirements at § 441.312), would apply to such services included in approved section 1115 demonstration projects, unless we explicitly waive or exclude one or more of the requirements as part of the approval of the demonstration project.

Comment: A couple of commenters recommended that we offer States financial assistance to develop and deploy the ability to report the quality measures in the HCBS Quality Measure Set.

Response: We note that Medicaid Federal matching funds are available for State expenditures on the design, development, and installation (including of enhancements), and for operation, of mechanized claims processing and information retrieval systems. We also note that under section 1903(a)(7) of the Act, Federal matching funds are available for administrative activities necessary for the proper and efficient administration of the Medicaid State plan. This may include developing and deploying the ability to report the quality measures in the HCBS Quality Measure Set.

Comment: A few commenters expressed that instructions related to the reporting requirements for the quality measures in the HCBS Quality Measures Set, and how they are related to the section 1915(c) waiver reporting requirements, would be helpful for implementing the reporting of the measure set.

Response: We thank commenters for the feedback. We plan to work collaboratively with States to provide the technical assistance and reporting guidance through the Paperwork Reduction Act process necessary to support reporting and help facilitate compliance with this requirement.

After consideration of public comments received, we are finalizing the HCBS Quality Measure Set reporting requirements at § 441.311(c) with modifications. At § 441.311(f)(2), we are finalizing that States must comply with the reporting requirements at § 441.311(c) beginning 4 years, rather than 3 years, from the effective date of this final rule for the HCBS Quality Measure Set. Our primary purpose in extending the applicability date is to ensure States have sufficient time for interested parties to provide input into the measures, as required by § 441.312(g), which we are finalizing in section II.B.8. of this rule.

c. Access Reporting (§ 441.311(d))

As noted earlier in section II.B.6. of this preamble, feedback obtained during various public engagement activities conducted with States and other interested parties over the past several years about reporting requirements for HCBS, as well as feedback received through the RFI [125] discussed earlier, indicated that there is a need to improve public transparency and processes related to States' HCBS waiting lists and for standardized reporting on HCBS access, including timeliness of HCBS and the comparability to services received to eligibility for services. At § 441.311(d) we proposed that the State must report to CMS annually on the following, according to the format and specifications provided by CMS. We are finalizing in this rule § 441.311(d) with a technical modification for clarity that requires that the State must report to CMS annually on the following, **in the form and manner, and at a time,** specified by CMS. (New language identified in bold.)

(i) Waiver Waiting Lists (§ 441.311(d)(1)(i))

At § 441.311(d)(1)(i), relying on our authority under section 1902(a)(6) of the Act, we proposed to require that States provide a description annually, according to the format and specifications provided by CMS, on how they maintain the list of individuals who are waiting to enroll in a section 1915(c) waiver program, if they have a limit on the size of the waiver program and maintain a list of individuals who are waiting to enroll in the waiver program, as described in § 441.303(f)(6). We further proposed to require that this description must include, but be not limited to, information on whether the State screens individuals on the waiting list for eligibility for the waiver program, whether the State periodically re-screens individuals on the waiver list for eligibility, and the frequency of re-screening if applicable. We also proposed to require States to report, at § 441.311(d)(1)(ii), the number of people on the waiting list, if applicable, and, at § 441.311(d)(1)(iii), the average amount of time that individuals newly enrolled in the waiver program in the past 12 months were on the waiting list, if applicable. We invited comments on whether there are other specific metrics or reporting requirements related to waiting lists that we should require States to report, either in place of or in addition to the requirements we proposed. We also invited comments on the timeframe for States to report on their waiting lists, whether we should require reporting less frequently (every 2 or 3 years), and if an alternate timeframe was recommended, the rationale for that alternate timeframe.

We received public comments on this proposal. The following is a summary of the comments we received and our responses. We also received comments on the related requirement at § 441.303(f). Those comments are addressed in section II.B.6. of this rule.

Comment: Many commenters supported the proposal at § 441.311(d)(1) to require States to report on waiting lists, including whether the State screens individuals on the list for eligibility, frequency of re-screening, number of individuals waiting to enroll, and average amount of time newly enrolled individuals were on the waiting list. Commenters

[125] CMS Request for Information: Access to Coverage and Care in Medicaid & CHIP. February 2022. For a full list of question from the RFI, see *https://www.medicaid.gov/medicaid/access-care/downloads/access-rfi-2022-questions.pdf.*

believed that this reporting would promote consistency, transparency, oversight, and accountability of waiting list practices and help States identify unmet needs among their Medicaid beneficiaries. Commenters noted that this additional information will better allow interested parties to advocate for policy changes to address underlying causes of waiting lists and expand HCBS programs; one commenter described this requirement as a good ''first step'' to understanding access issues for HCBS waivers.

A few commenters stated this requirement, with its potential to support policies that reduce waiting lists, would help beneficiaries avoid having to turn to institutional care for their LTSS needs. Commenters also noted transparent, understandable data about waiting lists may help individuals and families to make more informed decisions about accessing coverage as they plan for their future.

A few commenters noted that nationally comparable data and information-sharing among States will encourage standardization of waiting list processes and help States identify best practices for reducing waiting lists. Commenters noted that inconsistencies in the way States report data about their waiting lists and the current lack of standardized reporting requirements makes it difficult to form a clear picture of how many people are waiting to receive services, as well as how many of these individuals on the waiting list are actually eligible for services. One commenter suggested that making the waiting list public may lead to needed administrative updates to waiting lists, such as removing duplicate applications or applications from beneficiaries who have moved out of State or passed away.

Response: We agree that this critical data is not currently available in a way that allows for monitoring or comparison on a national level. We believe that this reporting requirement is an important first step in making data publicly available that can be used to identify unmet needs among Medicaid beneficiaries, support policymaking, and improve administrative efficiency.

Comment: A few commenters expressed opposition to, or concerns about, the waiting list reporting requirement at § 441.311(d)(1). A few commenters expressed concerns that the reporting requirement did not align with current State waiting list practices and would require significant change in data collection and IT systems. One commenter was concerned that due to differences in States' HCBS programs, infrastructure, and waiting list practices, attempting to collect and compare data on a national level could be misleading. A few commenters requested clarification on how CMS would use this data to drive meaningful policy changes and improvement in HCBS access. A few commenters stated that the proposed requirements would not address the underlying causes of waiting lists, which they attributed to limited funding for HCBS waiver slots, low Medicaid reimbursement rates, delays or barriers within States' Medicaid eligibility determination processes, or shortages of HCBS direct care workers. A few commenters, while not necessarily opposing the requirement at § 441.311(d)(1), suggested that we focus on gathering information about why States have caps on the number of beneficiaries who may be served by HCBS waivers and why States have waiting lists when they have not met their waiver caps.

One commenter raised a concern that the reporting requirement would cause States to redirect or prioritize resources for waivers with waiting lists at the expense of waivers that currently do not have waiting lists.

Response: We are not currently collecting States' data on their waiting lists and understand that States may have to update data collection systems to comply with this new requirement. We proposed the reporting requirement at § 441.311(d) to strike a balance between collecting enough information to enable Federal oversight of States' waiting list practices and imposing as minimal an administrative burden on States and providers as possible. We plan to offer States technical assistance as needed to help align their current data collection practices with what will be needed to comply with this reporting requirement. The reporting requirement at § 441.311(d)(1) is a first step in what will be an evolving process to promote transparency, oversight, and data-driven improvements in States' waiting list practices. We acknowledge that differences in States' HCBS programs may initially make comparing States' data challenging, but we believe that collecting this data will help highlight such differences and draw connections between different States' policies and the impact on their beneficiaries' access to HCBS. As noted by other commenters, States may be able to use this data to learn from the experiences of other States.

We acknowledge that there are many underlying causes for States to have long waiting lists, but we believe that the first step toward addressing these challenges, where possible, is to quantify the scope of these waiting lists through data collection. This data will not only help identify situations in which a State appears to be maintaining a waiting list when not all of the waiver's slots are taken but can also facilitate conversations with States about reasons for limitations on waiver enrollment.

We clarify that the purpose of this requirement is to document unmet needs for individuals who are seeking enrollment in HCBS waivers and to identify resources or practices that could be used to improve waiting list processes. As such, our goal is not to require that States shift needed resources away from other areas of their Medicaid programs.

Comment: One commenter requested that we provide reporting tools to help States track the required data. One commenter requested that the data needed for this reporting requirement be derived from the State's own eligibility and service authorization processes, not from providers and beneficiaries, particularly for self-directed services.

Response: We plan to release subregulatory guidance and other tools to assist States with implementation of this reporting requirement. We will also be making the reporting template available for public comment through the Paperwork Reduction Act notice and comment process.

While States have flexibility as to how they will gather the data needed to complete this reporting, we encourage States to find ways to rely on administrative data rather than gathering data directly from beneficiaries to meet the reporting requirements.

Comment: A few commenters requested that the information about waiting lists be made available to the public in a consumer-friendly and accessible format in order to facilitate program accountability and potentially improve beneficiary understanding of waiting list information. One commenter suggested that publishing data about the waiting list may help publicize the need for more direct care workers.

Response: As discussed in more detail later in section II.B.9 of this rule, we are finalizing a requirement at § 441.313(a) to require States to operate a website that meets the availability and accessibility requirements at § 435.905(b) of this chapter and that provides the results of the reporting requirements at § 441.311 (including this access reporting requirement at § 441.311(d), as well as the incident management, critical incident, person-centered planning, and service provision compliance data; data on the HCBS Quality Measure Set; and

payment adequacy data, discussed in this section) and the reporting requirements at § 441.302(k)(6). Please refer to the discussion of the website posting requirements in section II.B.9. of this rule.

Comment: One commenter suggested that we consider offering incentives for States to reduce or end waiting lists through a higher FMAP rate for a limited time period. One commenter requested that States be given a grace period and allowed to update their section 1915(c) waivers prior to any punitive action.

Response: We note that the requirement at § 441.311(d)(1) is a reporting requirement intended to encourage transparency and does not include any specific performance measures with which States must comply. To the extent that States are in compliance with existing requirements for section 1915(c) waiver programs, it is also not intended to require that States make changes to their waiver programs or processes. We intend to use our standard enforcement discretion to require State compliance with the reporting requirement, which (as discussed under § 441.311(f) below) will go into effect three years after the effective date of this final rule. In addition, we note that CMS does not have authority to provide States with a higher FMAP rate for any expenditures than has been authorized by statute.

Comment: A number of commenters noted that waiting list terminology, definitions, and processes vary widely among States and even among individual State programs. Commenters observed that some States operate what they refer to as interest lists, preauthorization lists, or similarly named lists, rather than waiting lists. In some cases, individuals can sign up to express interest in a waiver program but may not have yet been assessed for eligibility at the time they joined the interest list. Commenters questioned whether these individuals would be considered ''waiting to enroll'' as described in the proposed rule, as they are waiting to be determined eligible to enroll. Commenters requested clarification as to what data would be collected from States that maintain interest lists or similarly named lists of individuals who have not yet been determined to be eligible for the waiver.

A few commenters expressed concerns that if interest lists are not included in this requirement, States may be encouraged to stop maintaining waiting lists. One commenter noted that if the requirement does apply to interest lists, States that use an interest list approach would have to make significant changes to their processes to meet the waiting list reporting requirement. One commenter observed that in their State, the State maintains a single waiting list for all waivers, which could complicate reporting.

Several commenters requested that we create a definition of a waiting list. One commenter supported what they believed to be our proposed standardized definition of a waiting list (but did not specify what they thought that definition to be). A few commenters requested that we require States to have waiting lists for their waiver programs and that States screen individuals for eligibility prior to placing the individuals on the waiting list.

Response: We intended for the reporting requirement to apply to all States that maintain a list of individuals interested in enrolling in a section 1915(c) waiver program, whether or not the individual has been assessed for eligibility. As we stated in the proposed rule (88 FR 27986), many States maintain waiting lists of individuals interested in receiving waiver services once a spot becomes available. While some States require individuals to first be determined eligible for waiver services to join the waiting list, other States permit individuals to join a waiting list after an expression of interest in receiving waiver services.

We note that the requirement at § 441.311(d)(1) requires States to submit a description of their waiting list that includes information on whether the State screens individuals on the waiting list for eligibility for the waiver program, whether the State periodically re-screens individuals on the waiver list for eligibility, and the frequency of re-screening if applicable. This requirement indicates that § 441.311(d)(1) applies to States even if they do not screen the individuals on their list for eligibility. We believe that for the purposes of this requirement individuals who are waiting to be screened for eligibility for the waiver are considered ''waiting to enroll.''

We believe that States that maintain an interest list (or a similarly named list of individuals who have expressed interest in the waiver and are waiting to be assessed for eligibility) can report the same information required in § 441.311(d)(1) as States that maintain lists of individuals who have been screened for eligibility. We expect, for instance, that States typically would have information about the number of individuals who are on an interest list and how long those individuals have been on those lists. If a State maintains two separate lists for a waiver—a list of individuals who have been screened for eligibility for the waiver and a list of individuals who have expressed interest in enrolling in the waiver but have not yet been screened—the State should report on both to meet the reporting requirements at § 441.311(d)(1).

As we did not propose a formal definition of waiting list, nor a requirement for States to maintain a waiting list of individuals who have been screened for eligibility, we will not add these components to the finalized § 441.311(d). States retain flexibility in determining whether or not to maintain a list of individuals who are interested in enrolling in the waiver (whether or not the individual has been screened for eligibility). We will take commenters' recommendations into consideration for future policymaking if, after monitoring reporting generated by § 441.311(d), we identify the need for further standardization of these processes.

Comment: We received responses to our comment solicitation on additional metrics that could be collected regarding the waiting list. One commenter recommended that we not add more metrics to § 441.311(d)(1). Several commenters did suggest additional metrics. Many of these commenters believed that more detailed data would allow for a better assessment of overall unmet needs and disparities within the waiting lists. Additional metrics suggested by commenters included:

- Disaggregated data about beneficiaries, by demographic categories, including race, ethnicity, Tribal status, language status, sex or gender identification, sexual orientation, age, and geographic location;
- Disaggregated data on beneficiaries' dual eligible status, disability, diagnosis, functional status, level of care, and risk of institutionalization;
- Whether States maintain separate waiting lists or registries for beneficiaries who are eligible for HCBS but have been determined by the State to not have a need prioritized by the State for enrollment in the waiver;
- The criteria used to determine beneficiaries' placement and movement within a waiting list;
- How much time individuals spend waiting for an eligibility assessment and how much time elapses between an assessment and service authorization;
- The number of eligibility screens performed on each beneficiary on the waiting list in the past year, and why a rescreen was performed;
- The number of beneficiaries removed from the waiting list due to death, admission to an institutional

setting, or having been rescreened and deemed ineligible;

- The number of beneficiaries on the waiting list who are receiving care through another State Medicaid program, reasons why beneficiaries prefer to remain on the waiting list rather than enroll in other services, and what beneficiary needs remain unmet by other Medicaid programs while a beneficiary is on a waiting list; and
- Whether a participant who has been approved for HCBS waiver services is able to find a provider, how long it took for them to find that provider, and what services they wanted, but could not access because no provider was available.

Response: We thank commenters for their feedback. We will take these recommendations under consideration for future policymaking, but at this time decline to make modifications to the requirements based on these comments.

We believe it is important to strike a balance between collecting enough information to promote transparency around waiting lists and imposing as minimal an administrative burden on States and providers as possible. We also believe that information on whether States screen individuals on their waiting lists, the number of beneficiaries on the waiting list, and the average amount of time beneficiaries enrolled in HCBS waivers spent on the waiting list provides important preliminary data on the States' waiting list practices. As we gather and review this data, we will consider what additional information may be needed to further improve our oversight of HCBS programs and improve beneficiaries' access to services.

However, we agree that some of the granular data elements suggested by commenters could provide States with valuable insight into their own programs and beneficiary needs. We encourage States to consider what information they have the capacity to collect and would find useful for developing local policies to support beneficiaries' access to section 1915(c) HCBS waiver programs in their State.

Comment: One commenter recommended requiring that States report duplicated and unduplicated counts of individuals across waiver program waiting lists.

Response: We have not identified a compelling reason to require that States report unduplicated counts of beneficiaries for all waiver programs. We clarify that the reporting required for § 441.331(d)(1) is for each waiting list; if an individual is on multiple waiting lists, we believe that person should be counted among individuals on each of those waiting lists.

Comment: A few commenters recommended additional metrics that fall outside the scope of reporting on waiting list practices or waiver enrollment, including:

- Whether individuals on waiting lists are also being screened for eligibility for other programs that they may be able to benefit from (for example, Supplemental Nutrition Assistance Program);
- How long it takes a State to approve enrollment in any program that provides Medicaid LTSS, from the date that it receives an application until the date of the approval letter; and
- Additional measures to assess the needs of populations that face barriers to navigating the HCBS programs, applying, and getting on a waiting list.

Response: While these metrics lie outside the scope of the proposed reporting requirements, we will add these to other comments regarding broader HCBS access and equity issues that we will consider for future policymaking.

Comment: A few commenters suggested that we collect data on reasons for long waiting times, such as challenges with workforce availability or provider capacity. Some commenters, particularly those representing States or providers, were concerned that without this information, States and providers would be held responsible for long waiting lists or long waiting times for services that are due to reasons beyond States' or providers' control. One commenter recommended adding a requirement that States describe any conditions, such as State funding priorities, that serve to limit access to the HCBS described in the waiver application. A few commenters recommended adding a requirement to the interested parties' advisory group being finalized at § 447.203 that would require States, through their interested parties' advisory groups, to examine reasons for gaps in services that are revealed by the reporting on waiting lists.

Response: We do not believe it would be feasible at this stage to standardize the collection of qualitative data regarding the causes of waiting lists; this data would also be difficult to validate. As noted in prior responses, the purpose of the requirement at § 441.311(d)(1) is to encourage transparency; the requirement does not include any specific performance measures with which States or providers must comply. We believe that collecting the number of individuals on the waiting list and the length of time individuals spend on waiting list will present quantifiable and comparable baseline data that can facilitate more nuanced conversations with States about potential unmet beneficiary needs and the underlying causes of these unmet needs.

We note that, regarding the interested parties' advisory group being finalized at § 447.203, the requirements at § 447.203 already include an expectation that access reporting that is required by 441.311(d) would be appropriate data for the Interested Parties Advisory Group (IPAG) to consider when making recommendations regarding the sufficiency of rates. We decline to add a specific requirement as suggested by the commenter, as we wish to allow both States and the IPAGs some discretion in determining their approach to examining the impact on payments rates in their State.

Comment: A few commenters supported annual reporting for § 441.311(d)(1). One commenter observed that one of their State agencies had already identified annual reporting on the waiting list as a best practice and was publishing an annual report. One commenter recommended quarterly reporting to encourage States to take more aggressive steps to reduce the size of their waiting lists. A few commenters believed that biennial (every other year) reporting would reduce burden on States and better account for fluctuations in waiting list size that are beyond the State Medicaid agency's control.

One commenter highlighted that waiting list volumes may vary at certain times of year or from year to year, depending on how States structure the release of new waiver slots and the timing of the State legislative sessions where new funding for waiver slots may be approved. The commenter stated that it is important to take these factors into account when considering reporting frequency and when evaluating reported data from year to year.

Response: We are finalizing the annual reporting frequency as proposed at § 441.311(d)(1). We continue to believe that annual reporting on waiting lists strikes the right balance between collecting current data on waiting lists and minimizing burden on States to the greatest extent possible. We believe reporting more frequently than annually may represent an undue burden on States, although States are encouraged to share information with interested parties within their State on a more frequent basis if they are able to do so. We are concerned that if we extend the reporting to a biennial frequency, the information will become outdated prior

to the next public report. We also note that States will likely have to develop or maintain the same data tracking systems regardless of whether the reporting itself is done annually or biennially; we believe the potential reduction in administrative burden by biennial reporting is outweighed by the need for more timely information on waiting lists.

Comment: One commenter requested clarification that the reporting requirement at § 441.311(d)(1) is limited to the section 1915(c) authority and to the section 1915(j) authority, where it is used as the State's authority for self-direction in a section 1915(c) waiver. This commenter recommended limiting this requirement to these authorities.

Response: We agree that, because section 1915(i) and section 1915(k) State plan services cannot have capped enrollment, the reporting requirements at § 441.311(d)(1) would not apply to these authorities. We also agree that the reporting requirements at § 441.311(d)(1) would also apply to section 1915(j) authority only where section 1915(j) is used as the State's authority for self-direction in a section 1915(c) waiver. We note that the reporting requirements at § 441.311(d)(1) would apply to section 1115(a) demonstration projects that include HCBS if the State caps enrollment for the HCBS under the section 1115(a) demonstration project. As discussed later in this section, section II.B.7. of this final rule, we are finalizing the application of the reporting requirements at § 441.311 to section 1915(j), (k), and (i) authorities with modifications to specify that States must only comply with the reporting requirements applicable to the services under these authorities.

After consideration of the commenters received, we are finalizing § 441.311(d)(1) as proposed.

(ii) Reporting on Wait Times for Services and Authorized Service Hours Provided (§ 441.311(d)(2))

At § 441.311(d)(2)(i), based on our authority under section 1902(a)(6) of the Act, we proposed to require States report annually on the average amount of time from when homemaker services, home health aide services, or personal care services, as listed in § 440.180(b)(2) through (4), are initially approved to when services began, for individuals newly approved to begin receiving services within the past 12 months. We proposed to focus on these specific services for this reporting requirement because of feedback from States, consumer advocates, managed care plans, providers, and other HCBS interested parties that timely access to these services is especially challenging and because the failure of States to ensure timely access to these services poses substantial risk to the health, safety, and quality of care of individuals residing independently and in other community-based residences. We believed that having States report this information will assist us in our oversight of State HCBS programs by helping us target our technical assistance and monitoring efforts. We requested comment on whether this requirement should apply to additional services authorized under section 1915(c) of the Act.

For this metric, we proposed to allow States to report on a statistically valid random sample of individuals newly approved to begin receiving these services within the past 12 months, rather than for all individuals newly approved to begin receiving these services within the past 12 months. We invited comments on the timeframe for States to report on this metric, whether we should require reporting less frequently (every 2 or 3 years), and if an alternate timeframe is recommended, the rationale for that alternate timeframe. We also invited comments on whether there are other specific metrics related to the amount of time that it takes for eligible individuals to begin receiving homemaker services, home health aide services, or personal care services that we should require States to report, either in place of or in addition to the metric we proposed.

At § 441.311(d)(2)(ii), also based on our authority under section 1902(a)(6) of the Act, we proposed to require States to report annually on the percent of authorized hours for homemaker services, home health aide services, or personal care services, as listed in § 440.180(b)(2) through (4), that are provided within the past 12 months. For this metric, we further proposed to allow States to report on a statistically valid random sample of individuals authorized to receive these services within the past 12 months, rather than all individuals authorized to receive these services within the past 12 months. We invited comments on the timeframe for States to report on this metric, whether we should require reporting less frequently (every 2 or 3 years), and if an alternate timeframe is recommended, the rationale for that alternate timeframe. We also invited comments on whether there are other specific metrics related to individuals' use of authorized homemaker services, home health aide services, or personal care services that we should require States to report, either in place of or in addition to the metric we proposed. We further requested comment on whether this requirement should apply to additional services authorized under section 1915(c) of the Act.

We received public comments on this proposal. The following is a summary of the comments we received and our responses.

Comment: Several commenters supported our proposals at § 441.311(d)(2) that States report on the time it takes between service authorization and service delivery and the number of authorized hours compared to the number of hours provided. A few commenters, while characterizing these as imperfect measures, nevertheless noted that the data measurements can help assess systematic issues with provider enrollment and access to care. One commenter observed that similar data is not currently available from their State, and believed this type of data would be useful.

Commenters noted that in their experience, beneficiaries might wait months after being authorized to receive services for the services to actually begin, or do not receive all of the services indicated in their person-centered care plan; these delays and underutilization of services cause a wide array of issues for the beneficiary and their families.

Commenters also noted these proposals complemented the waiver waiting list requirement at § 441.311(d)(1), noting that even when individuals are enrolled in a waiver, this does not always mean that their services start immediately. A few commenters also stated that in their experience, even in States that do not have waiting lists for their waiver programs, beneficiaries may wait long periods of time for the waiver services to begin.

Response: As we discuss further in responses below, we recognize that the reasons for service delays and underutilization are nuanced. The reporting requirements at § 441.311(d)(2) are a first step in what will be an evolving process to promote transparency, oversight, and data-driven improvements in States' waiting list practices.

Comment: A few commenters cited factors that may contribute to delays or underutilization of services, some of which are beyond the control of State Medicaid agencies, managed care plans, or providers. Commenters cited challenges including administrative inefficiency, shortages of direct care workers or available providers, and geographic constraints. Other

commenters cited specific obstacles, such as: difficulty in obtaining complete medical information from the beneficiary, delays in the care planning process, additional training requirements for self-directed service workers, lags in providers submitting claims or other delays in claims processing, or unavailability of the beneficiary due to travel, hospitalization, changes in provider, withdrawal from the program, or loss of Medicaid eligibility. A few commenters suggested that in some cases, beneficiaries decline services or are already receiving a different service that meets their needs prior to the new services being authorized.

One commenter noted that there are service delivery delays in care provided under private payers and wondered how these delays compare to those in Medicaid HCBS and whether they may be attributable to the adequacy of the provider network or to reimbursement rates.

A few commenters believed that the requirements at § 441.311(d)(2) would not address these underlying causes of service delays or underutilization and, thus, would not improve access to services. One commenter requested clarification on how this data would be used to promote meaningful change.

On the other hand, some commenters believed that the requirements at § 441.311(d)(2) can help identify unmet needs and uncover some of the causes of these challenges, which in turn can focus efforts on efficient solutions.

Response: We acknowledge that there are many underlying causes for service delays or service underutilization. We believe that the first step toward addressing these challenges, where possible, is to quantify the scope of these delays or underutilization through data collection. Additionally, some of the challenges commenters cited are within the purview of States, managed care plans, or providers to address. If the data demonstrates what appears to be significant delays or underutilization, we believe this information can help facilitate conversations with States, managed care plans, and providers about the reasons for these reporting results.

We also note that the purpose of the data is to track trends in service delivery times and utilization, not to track the outcomes for each beneficiary. The reporting will be the average amount of time a random sample of beneficiaries waited between service authorization and the start of services, and the total percent of authorized services that were provided. Thus, some of the factors that commenters cited, particularly those involving the behavior of specific beneficiaries, such as failure to provide timely medical data, declining services, or traveling, we believe should not significantly impact the reported numbers unless these obstacles are particularly prevalent (in which case, this may also be an area to identify for policy or program improvement).

Comment: A few commenters opposed the requirements at § 441.311(d)(2). A few commenters suggested that some States or managed care plans are not currently tracking the time between service authorization and the start of services and that it would take significant resources to develop, test, and deploy changes to the State's documentation management system. One commenter noted that it may be difficult to track this data because services are authorized, and claims are paid using different systems or are overseen by different parts of State government. One commenter noted that, while their State does track service utilization data, it would take additional staff resources to comply with the reporting requirements.

Response: We are not currently collecting States' data on the times between service authorization and when services begin, or the number of authorized hours that are being utilized and understand that States may not be tracking all of this data; the absence of this data is what has prompted us to propose the requirement at § 441.311(d)(2). We recognize that, because this data has not previously been tracked by all States, some States may have to update their data collection systems to comply with this new requirement. As discussed elsewhere in this rule, in Medicaid, enhanced FFP is available at a 90 percent FMAP for the design, development, or installation of improvements of mechanized claims processing and information retrieval systems, in accordance with applicable Federal requirements. Enhanced FFP at a 75 percent FMAP is also available for operations of such systems, in accordance with applicable Federal requirements. We reiterate that receipt of these enhanced funds is conditioned upon States meeting a series of standards and conditions to ensure investments are efficient and effective. We also note that, under section 1903(a)(7) of the Act, Federal matching funds are available for administrative activities necessary for the proper and efficient administration of the Medicaid State plan.

We developed the reporting requirement at § 441.311(d)(2) to strike a balance between collecting enough information to enable Federal oversight of service delivery and utilization and imposing as minimal an administrative burden on States and providers as possible. We believe the long-term benefits of collecting this data outweigh the initial burden of implementation. Accordingly, we decline to make any changes in this final rule based on these comments.

We are finalizing § 441.311(d)(2)(i) with a modification that we believe will further reduce administrative burden on States. As noted in an earlier comment summary, some commenters noted that in some instances beneficiaries may wait long periods of time to receive services. Upon further consideration, we have determined that the requirement at § 441.311(d)(2) as written may present some data collection challenges in situations in which the beneficiary's date of approval of service and the date when services actually begin are separated by enough time that they fall in two different reporting periods. For instance, if the reporting period aligned with the calendar year, if an individual was approved for services on November 1, 2028, but did not start receiving services until February 1, 2029, it is not clear how that beneficiary's wait time for services would be captured in the reporting period for January 1, 2028, through December 31, 2028. (We note that we are using the calendar year as the reporting period only for the purposes of this example. As discussed later in this section, we will work with States and other interested parties through the Paperwork Reduction Act process to determine the actual reporting period.) It appears that in this circumstance, the State would have to first indicate that the beneficiary had waited 2 months (November 1, 2028, through the end of the reporting period on December 31, 2028); then the State would need to submit updated information for this beneficiary to report the beneficiary's total wait time. This process would need to be repeated on a rolling basis for other beneficiaries whose approval date and service start date fell in different reporting periods. Repeated updates to States' data would be burdensome, make it difficult for States to share meaningful data with CMS and the public, and lead to delays in State reporting of complete data for each reporting period.

To avoid this type of confusion in reporting, we are amending the requirement at § 441.311(d)(2)(i) to specify that the reporting is for individuals **newly** receiving **services,** rather than for individuals newly approved to begin receiving services. (Revised language is noted in bold.) As applied to the example above, this

modification to § 441.311(d)(2)(i) means that the beneficiary whose services began on February 1, 2029 would be included in the January 1, 2029, through December 31, 2029, reporting period; the State would be able to ''look back'' to identify when the services were approved (in the example, services were approved November 1, 2028) and the State would report the beneficiary's total wait time between November 1, 2028 and February 1, 2029. We believe this modification preserves the intention of what we proposed in § 441.311(d)(2)(i)—to measure the time between when a beneficiary was approved to receive services and when the services actually begin—but clarifies and streamlines the reporting process.

Comment: A few commenters expressed concerns that States would use information about unfilled service hours to infer whether or not authorized services are necessary for the beneficiary. These commenters noted that many reasons exist as to why an individual would be unable to receive authorized care on a particular day but still need the care, such as the service provider was unavailable or there was confusion around when and what services were to be delivered on that day. One commenter requested reassurance that the reporting requirement at § 441.311(d)(2)(ii) to report on the average number of hours authorized that are provided would not be used to reduce or limit beneficiaries' access to services. One commenter suggested that we monitor services to ensure that States are not reducing services in response to this data.

Response: The purpose of this reporting requirement at § 441.311(d)(2)(ii) is not to audit individual beneficiaries' service utilization or to use the information as a reason to reduce their authorized service hours. The purpose and intent of the requirement is to identify barriers to beneficiaries' access to services. Accordingly, we decline to make any changes in this final rule based on these comments. However, we note that the State is required at § 441.301(c)(2) to ensure that the person-centered service plan reflects the services and supports that are important for the individual to meet the needs identified through an assessment of functional need, as well as what is important to the individual with regard to preferences for the delivery of such services and supports, and this requirement remains unchanged. States and managed care plans should not use the data collected to meet the reporting requirement at § 441.311(d)(2)(ii) to reduce authorized hours.

Comment: One commenter requested clarification on when the approval of services occurs, such as at the time of enrollment or when a physician signs the plan of treatment. The commenter also observed that it will be critical to standardize the data elements that must be captured in this reporting.

Response: Given the variable nature of States' processes, we defer to States to determine when services are considered to have been approved and how this approval date can be tracked consistently for the reported services. We intend to provide States with technical assistance, including technical specifications and sampling guidance, for the new reporting requirements in this final rule, which will aid in consistent data reporting. We will also be making the reporting template available for public comment through the Paperwork Reduction Act notice and comment process.

Comment: A couple of commenters recommended requiring States to set a target for timeliness (such as 7 days) and measure the percentage of all cases in which the wait time exceeded that target.

Response: At this time, we are focusing on creating baseline data-reporting standards. We will take these recommendations for setting or requiring benchmarks under consideration should we pursue future rulemaking in this area.

Comment: We received responses to our comment solicitation on whether § 441.311(d)(2) should apply to other section 1915(c) services aside from homemaker, home health aide, and personal care services as set forth at § 440.180(b)(2) through (4).

One commenter recommended narrowing the scope of this requirement to personal care services only and removing homemaker and home health aide services from the requirement. The commenter contended that homemaker services do not cover activities of daily living which are typically associated with direct care to HCBS beneficiaries. The commenter also noted that home health aide services are typically offered under the Medicaid State plan rather than a section 1915(c) waiver. The commenter concluded that limiting the requirement to personal care services would allow CMS and States to concentrate on highly utilized personal care services and would make the requirement more operationally feasible for States.

On the other hand, a few commenters advocated for extending the reporting requirements to all HCBS. One of these commenters suggested that applying the requirement to only a few services would create an unintended consequence of focusing more attention on certain services and the populations receiving those services, at the expense of other beneficiaries. A few of these commenters also pointed out that other services are experiencing direct care worker shortages that could be contributing to service delays or underutilization that need to be identified.

One commenter suggested that we add services offered by specialty providers, such as occupational therapists, physical therapists, or speech-language pathologists, to the requirement.

A couple of commenters recommended extending the requirement to include services typically delivered to people with intellectual or developmental disabilities, such as habilitation services. Similar to the reasons cited by commenters for extending the requirement to all HCBS, commenters in favor of extending the requirements to include habilitation noted that these services are critical and beneficiaries who receive them are experiencing delays in services or other access issues. However, one commenter requested that we not extend these requirements to habilitation services, citing concerns that some States' information systems are not equipped to track this information for habilitation services. The commenter also noted that differences between habilitation services and other types of HCBS require additional study and consideration prior to applying these reporting requirements for habilitation services.

Response: We believe that the services proposed for inclusion in this requirement include activities of daily living that are critical to beneficiaries' health, safety, and ability to live successfully in the community. Additionally, as identified in an analysis performed by CMS, the three services fall within the taxonomy of home-based services, which are both high-volume and high cost.[126] Thus, we believe that targeting these services will maximize the impact of this requirement by addressing the needs of many beneficiaries and promoting better oversight of frequently used services. Given the similarities among homemaker, home health aide, and personal care services, we cannot find a justification for removing homemaker

[126] Centers for Medicare & Medicaid Services. ''Trends in Rate Methodologies for High-Cost, High Volume Taxonomies.'' *https://www.medicaid.gov/sites/default/files/2019-12/trends-in-rate-august-2017.pdf.* Last access October 2, 2023.

and home health aide services from this requirement.

Because we want to start by focusing on a selection of high-volume, high-cost services, we do not at this time intend to expand the reporting requirement to all HCBS. We do agree with commenters that services in addition to homemaker, home health aide, and personal care services may be particularly vulnerable to delays due to shortages in the direct care workforce. For that reason, we are extending the requirement to habilitation services in this final rule which, like homemaker, home health aide, and personal care services, tend to be hands-on services that are delivered by direct care workers who often earn lower wages. We believe that expanding the reporting to include habilitation services will ensure that beneficiary populations, namely individuals with intellectual or developmental disabilities who commonly receive personal care services as part of their habilitation services, are not excluded from our efforts to support the direct care workforce.

We acknowledge the comment that habilitation services are unique from other services, but also cannot identify reasons why these differences should exclude them from this reporting requirement.

After consideration of these comments and the benefits of aligning reporting requirements across services, we are finalizing the reporting requirements at § 441.311(d)(2)(i) and (ii) with a modification to include homemaker, home health aide, personal care, and habilitation services, as set forth at § 440.180(b)(2) through (4) and (6).

Comment: One commenter requested clarification on whether § 441.311(d)(2) would apply to services in both managed care and FFS delivery systems. One commenter requested that we require reporting on managed care plans' prior authorization practices, including differing lengths of authorizations and untimely authorizations that were not in place or renewed prior to the date of expected services. The commenter noted that missing authorizations may cause disruptions in payments to providers and threaten the continuity of beneficiaries' access to the services.

Response: The reporting requirements apply to services delivered under both FFS and managed care delivery systems. For additional information, we refer readers to the discussion of §§ 441.311(f) and 438.72(b) below. We note that a State may consider requiring reporting on specific managed care processes through its contracts with managed care plans.

Comment: A few commenters requested clarification as to whether the requirements at § 441.311(d)(2) would apply to self-directed services. A few commenters raised specific questions or concerns about the application of the reporting requirements at § 441.311(d)(2) to self-directed services, particularly self-directed service models with individual budget authority. Commenters noted that the inherent flexibility of these services might make reporting on the utilization of service hours particularly misleading. One commenter noted that, when an individual selects an independent worker to provide services, that worker might have to go through background checks and training that would make it appear that the service delivery is delayed. One commenter worried that States would become concerned with the appearance of delays in the delivery of self-directed services and discourage beneficiaries from seeking self-directed services. Another commenter pointed out that since beneficiaries might use their budget authority to purchase equipment or devices that replace some hands-on services, or may choose to adjust their service schedules, service utilization data on these services might inaccurately suggest that the beneficiary is being underserved. On the other hand, one commenter recommended that self-directed services be included in this reporting. Another commenter stated that from their personal experience as a provider, beneficiaries receiving self-directed services tend to have higher service utilization rates than beneficiaries in agency-directed services. One commenter suggested that data on all models of self-directed services be tailored to the unique needs of the model, such as by requiring reporting on the percent of the budget used rather than the number of service hours. Another commenter suggested that additional guidance would be needed to apply the reporting requirements to self-directed models.

Response: As discussed in section II.B.7.e. of this final rule, these reporting requirements will apply to self-directed services. We thank commenters for raising these concerns. As noted earlier, we intend to provide States with technical assistance, including technical specifications and sampling guidance, for the new reporting requirements in this final rule, which should aid in reporting on self-directed services. As noted in a prior response, the purpose of the data is to track trends in service delivery times and utilization, not to track the outcomes for each beneficiary. The reporting will be the average amount of time a random sample of beneficiaries waited between service authorization and the start of services, and the total percent of authorized services that are provided. Thus, some of the factors that commenters cited, such as additional training for self-directed service workers or individual beneficiaries' changes in schedules, should not significantly impact the reported numbers. However, we will work with States to monitor this issue.

Comment: A few commenters raised concerns about the proposal to allow States to report data on a statistically valid sample of beneficiaries, suggesting instead that we require complete reporting on all relevant beneficiary data. Commenters were concerned that using a sample could mask disparities or fail to identify individuals with particularly acute unmet needs. One commenter suggested that if we permit reporting on a random sample, we add a requirement that the data must include information on race, ethnicity, and population (such as older adults, people with intellectual and developmental disabilities, and people with physical disabilities) in order to identify disparities in service delivery.

Response: To minimize State reporting burden, we are finalizing the requirement to allow States to report data for § 441.311(d)(2) using statistically valid random sampling. We believe that due to variety in States' current tracking systems, some States might find reporting using statistically valid random sampling to be more manageable and auditable than attempting to report on all beneficiaries. We will consider expanding reporting to the full population in future rulemaking if it is determined that such an approach gives a more complete picture of service delivery. We note that States may choose to report on the full population, as opposed to sampling their beneficiaries, if for instance, doing so better aligns with their data collection process or needs.

We are finalizing the requirements at § 441.311(d)(2)(i) and (ii) with a technical modification to specify that the State may report this metric using **statistically valid random sampling of beneficiaries.** (Revised language identified in bold.) We make this technical correction to better align the language with standard terminology for the sampling methodology we intended in these requirements.

Comment: We received responses to our comment solicitation on additional metrics that could be collected regarding service delivery and utilization. One commenter

recommended that we not add more metrics to § 441.311(d)(2). Several commenters did suggest additional metrics. Many of these commenters noted that more detailed data would allow for a better assessment of overall unmet needs and disparities within service delivery. Additional metrics suggested by commenters included:

- Disaggregated data about beneficiaries, by demographic categories, including race, ethnicity, language status, sex or gender identification, sexual orientation, age, and geographic location;
- Tracking the total number of beneficiaries who received service authorizations versus the number of beneficiaries who received services;
- Tracking why services are not provided or why a beneficiary declines a service;
- Disaggregated data by HCBS authority and population (including dual eligibility), delivery system, provider type, and managed care plan; and
- Tracking beneficiaries' long-term access to services or other metrics to measure continuity of care and how the care contributes to beneficiaries' goals and outcomes.

One commenter, while not recommending that we require the measure for all States, shared a State's experience of including a measure to assess missed visits in its managed LTSS program. The commenter observed that this required a significant amount of time to identify legitimate reasons for services to not have been provided and to build the system mechanisms to capture that data, which was primarily identified through case management record review.

Response: We thank commenters for their thoughtful feedback. We will take these recommendations under consideration for future policymaking, but at this time, we decline to modify the metrics required at § 441.311(d)(2) based on these comments.

As noted in previous responses, we do not believe it would be feasible at this stage to standardize the collection of certain types of qualitative data, such as reasons for delayed or undelivered services, or how the services contribute to beneficiaries' outcomes; this data would also be difficult to validate and, as noted by one commenter, time-consuming to implement.

We believe it is important to strike a balance between collecting information to promote transparency around service times and utilization and imposing as minimal an administrative burden on States and providers as possible. We also believe that the reporting requirements at § 441.311(d)(2) are straightforward metrics on which to begin reporting. As we gather and review this data, we will consider what additional information may be needed to further improve our oversight of HCBS programs and improve beneficiaries' access to services and may consider additional reporting requirements in the future.

However, we agree that some of the granular data elements suggested by commenters could provide States with valuable insight into their own programs and beneficiary needs. We encourage States to consider what information they have the capacity to collect and would find useful for developing local policies to support beneficiaries' access to HCBS waivers in their State.

Comment: A few commenters recommended additional metrics that fall outside the scope of the reporting in § 441.311(d)(2). One commenter recommended collecting data on case manager or service coordinator caseloads. A few commenters recommended measuring time between an individual's date of application and their eligibility determination, and the time between an individual's eligibility determination and the plan of care development or authorization for services.

Another commenter noted that a cause of delay in receiving HCBS may be due to delays in the development of care plans that are required for HCBS delivery to begin. The commenter noted that a potential solution to this specific barrier is the use of provisional plans of care, which are discussed in Olmstead Letter #3.[127] The commenter recommend that we affirm that HCBS provisional plans of care are an available option and require States to report on usage of such plans.

Response: We thank commenters and note these comments are not directly related to the proposed requirements in § 441.311(d), and thus we decline to make modifications to § 441.311(d) based on these suggestions. We plan to consider the comments as we regard broader HCBS access and equity issues for future policymaking. We also note that while requiring use of provisional care plans would be outside the of scope of this requirement, we agree with the commenter that the use of provisional care plans as described in Olmstead Letter #3 may help avoid the delay of services pending the development of the care plan.[128] In this letter, we explain that we will accept, as meeting requirements, a provisional written plan of care which identifies the essential Medicaid services that will be provided in the person's first 60 days of waiver eligibility, while a fuller plan of care is being developed and implemented. During this time, the relevant agencies work with the beneficiary to develop and finalize a ''comprehensive plan of care,'' which goes into effect as soon as practically possible, and at least within 60 days.

Comment: One commenter recommended that we allow States the option to choose one of the proposed criteria in § 441.311(d)(2) on which to report or to propose a different metric on which to report. The commenter believed this would permit flexibility in reporting on and context for data related to timeliness of initiation of service planning and service delivery. The commenter believed that this could serve as the first stage in a phased approach for access reporting.

Response: We thank the commenter for their suggestion. However, we believe it is important to take steps to establish nationally comparable data, which would require States to report on the same metrics. As discussed in previous responses, we are not finalizing any additional metrics for § 441.311(d)(2) and believe that the two metrics included in this requirement are a reasonable first step in data collection.

Comment: A few commenters supported annual reporting for § 441.311(d)(2). One commenter noted that annual reporting will better monitor service interruptions due to shortages of direct care workers. One commenter noted that a beneficiary's service utilization can fluctuate significantly even from month to month. One commenter believed that biennial (every other year) reporting would reduce burden on States.

Response: We are finalizing the annual reporting frequency as proposed

[127] Refer to Centers for Medicare and Medicaid Services, ''Olmstead Letter #3, Attachment 3–a.'' July 25, 2000. Available at *https://www.medicaid.gov/sites/default/files/Federal-Policy-Guidance/downloads/smd072500b.pdf;*. The commenter notes that in Olmstead Letter #3, Attachment 3–a (*https://www.medicaid.gov/Federal-Policy-Guidance/downloads/smd072500b.pdf*), CMS explains that it ''will accept as meeting the requirements of the law a provisional written plan of care which identifies the essential Medicaid services that will be provided in the person's first 60 days of waiver eligibility, while a fuller plan of care is being developed and implemented.'' During this time, the relevant agencies work with the beneficiary to develop and finalize a ''comprehensive plan of care,'' which goes into effect as soon as practically possible, and at least within 60 days.

[128] Centers for Medicare and Medicaid Services, ''Olmstead Letter #3, Attachment 3–a.'' July 25, 2000, which is available at *https://www.medicaid.gov/sites/default/files/Federal-Policy-Guidance/downloads/smd072500b.pdf.*

in § 441.311(d)(2). We continue to believe that annual reporting strikes the right balance between collecting current data and minimizing burden on States to the greatest extent possible. We are concerned that if we extend the reporting to a biennial frequency, the information will become outdated prior to the next public report.

After consideration of the comments received, we are finalizing the requirements at § 441.311(d)(2), with modifications. We are finalizing § 441.311(d)(2)(i) with a modification to specify that the reporting is for individuals newly receiving services within the past 12 months, rather than for individuals newly approved to begin receiving services. We are also finalizing a modification so that both reporting requirements at § 441.311(d)(2)(i) and (ii) require reporting on homemaker services, home health aide services, personal care, or habilitation services, as set forth in § 440.180(b)(2) through (4) and (6), and allow States to report using statistically valid random sampling of beneficiaries.

We note that we are finalizing § 441.311(d)(2) with technical corrections. As a result of modifying § 441.311(d)(2) to include habilitation services, we are modifying the title of this provision to specify *Access to homemaker, home health aide, personal care, and habilitation services.* We are also finalizing a technical modification in both § 441.311(d)(2)(i) and (ii) to indicate that the services are as ''set forth'' in § 440.180(b)(2) through (4) and (6), rather than as ''listed'' in.

d. Payment Adequacy (§ 441.311(e))

At § 441.311(e), we proposed new reporting requirements for section 1915(c) waivers, under our authority at section 1902(a)(6) of the Act, requiring that States report annually on the percent of payments for homemaker, home health aide, and personal care services, as listed at § 440.180(b)(2) through (4), spent on compensation for direct care workers. For the same reasoning discussed in section II.B.5. of this preamble, we have focused this requirement on homemaker services, home health aide services, and personal care services because they are services for which we expect that the vast majority of payment should be comprised of compensation for direct care workers and for which there would be low facility or other indirect costs. These are services that would most commonly be conducted in individuals' homes and general community settings. As such, there should be low facility or other indirect costs associated with the services. We also believed that this reporting requirement could serve as the mechanism by which States demonstrated that they meet the proposed HCBS Payment Adequacy requirements at § 441.302(k).

We considered whether the proposed reporting requirements at § 441.311(e) related to the percent of payments going to the direct care workforce should apply to other services, such as adult day health, habilitation, day treatment or other partial hospitalization services, psychosocial rehabilitation services and clinic services for individuals with chronic mental illness. We had selected homemaker, home health aide, and personal care services (as defined at § 440.180(b)(2) through (4)) for this reporting requirement to align with the payment adequacy minimum performance requirement at § 441.302(k)(3), which is discussed in section II.B.5. of this preamble. However, we requested comment on whether States should be required to report annually on the percent of payments for other services listed at § 440.180(b) spent on compensation for direct care workers and, in particular, on the percent of payments for residential habilitation services, day habilitation services, and home-based habilitation services spent on compensation for direct care workers.

We further proposed that States separately report for each service subject to the reporting requirement and, within each service, separately report on payments for services that are self-directed. We considered whether other reporting requirements such as a State assurance or attestation or an alternative frequency of reporting could be used to determine State compliance with the requirement at § 441.302(k) and decided that the proposed requirement would be most effective to demonstrate State compliance. We requested comment on whether we should allow States to provide an assurance or attestation, subject to audit, that they meet the requirement in place of reporting on the percent of payments, and whether we should reduce the frequency of reporting to every other year.

To minimize burden on States and providers, we proposed that States report in the aggregate for each service across all of their services across all programs as opposed to separately report for each waiver or HCBS program. However, we requested comment on whether we should require States to report on the percent of payments for certain HCBS spent on compensation for direct care workers at the delivery system, HCBS waiver program, or population level. We also requested comment on whether we should require States to report on median hourly wage and on compensation by category.

In consideration of additional burden reduction for certain providers, we requested comment on whether we should allow States the option to exclude, from their reporting to us, payments to providers of agency directed services that have low Medicaid revenues or serve a small number of Medicaid beneficiaries, based on Medicaid revenues for the service, number of direct care workers serving Medicaid beneficiaries, or the number of Medicaid beneficiaries receiving the service. We also requested comment on whether we should establish a specific limit on this exclusion and, if so, the specific limit we should establish, such as to limit the exclusion to providers in the lowest 5th, 10th, 15th, or 20th percentile of providers in terms of Medicaid revenues for the service, number of Medicaid beneficiaries served, or number of direct care workers serving Medicaid beneficiaries.

We proposed that payments for self-directed services by States should be included in these reporting requirements, although we noted feedback from interested parties indicating that compensation for direct care workers in self-directed models tends to be higher and may comprise a higher percentage of the payments for services than other HCBS. This decision not to exclude them was based on the importance of ensuring a sufficient direct care workforce for self-directed services. We requested comment on whether we should allow States to exclude payments for self-directed services from these reporting requirements.

We note that, for clarity, we are aligning the definitions of compensation, direct care worker, and excluded costs at § 441.311(e)(1) with those we are finalizing in § 441.302(k)(1). As a result, the reporting requirement we proposed at § 441.311(e) is finalized at § 441.311(e)(2)(i), as discussed below. While we consider the reporting requirement at § 441.311(e) to be distinct and severable from the payment adequacy requirements in § 441.302(k), we believe that the reverse is not the case—that § 441.302(k) does rely on the reporting mechanism at § 441.311(e) to establish compliance with the minimum performance requirement at § 441.302(k)(3). As such, we believe it is advantageous to have aligned definitions.

We received public comments on this proposal. The following is a summary of

the comments we received and our responses.

Comment: Several commenters expressed general support for our proposed requirement at § 441.311(e) that States report annually on the percent of payments for homemaker, home health aide, and personal care services, as listed at § 440.180(b)(2) through (4), spent on compensation for direct care workers. Commenters believed that this requirement would provide data about how Medicaid payments are being spent, which would improve oversight and enable meaningful comparisons across programs. One commenter requested clarification on the intent of the reporting requirement.

Commenters also believed that this requirement would ensure compliance with the payment adequacy minimum performance requirement at § 441.302(k)(3). Several commenters, however, expressed support for finalizing this reporting requirement, but not for finalizing the minimum performance requirement at § 441.302(k)(3). These commenters noted that the reporting requirement by itself would yield useful data that would support payment transparency in HCBS programs.

Response: This requirement is intended to help track the percent of Medicaid payments for certain HCBS that is spent on compensation for direct care workers. As we discussed extensively in section II.B.5. of this rule, we believe that ensuring that a significant portion of payments for these hands-on services is spent on compensation for direct care workers aligns with our responsibility under section 1902(a)(30)(A) of the Act to require assurance that payments are consistent with efficiency, economy, and quality of care. We do note that this reporting requirement also is a mechanism by which States demonstrate compliance with the payment adequacy requirements at § 441.302(k), which is discussed in detail in section II.B.5. of this rule.

While we are finalizing the payment adequacy requirements at § 441.302(k), we agree that the value provided by this reporting requirement is distinct and severable from the minimum performance requirement and serves as a standalone requirement. To clarify the distinction between this reporting requirement and the payment adequacy requirement at § 411.302(k), we are revising the language at § 411.311(e)(2) to remove the reference to the minimum performance requirement at § 411.302(k)(3). We believe this will better demonstrate that the reporting requirement has a function aside from demonstrating compliance with § 411.302(k). We also believe this to be necessary because, as discussed further below, we are finalizing the reporting requirement at § 411.311(e)(2) to include reporting of data related to habilitation services, which are not subject to the minimum performance requirement at § 411.302(k)(3). Thus, we believe retaining the reference to § 411.302(k)(3) would cause some confusion.

Comment: A few commenters opposed the reporting requirement proposed at § 441.311(e) (which we are finalizing at § 411.311(e)(2)). These commenters noted that the reporting requirement would increase administrative burden and administrative costs for providers; a few commenters believed the increase in administrative tasks would undermine the goal of the minimum performance requirement at § 441.302(k)(3) to reduce providers' spending on administrative activities.

Other commenters expressed concern that this requirement would create a burden for States. One commenter, although recognizing the need for more data about compensation to direct care workers, believed that most States do not currently collect this type of data and would require significant time, administrative effort, and expense to collect, compile, report, and analyze the data in a meaningful way. A few commenters stated that States would need to make significant changes to current billing and reporting practices and IT in order to isolate the use of reimbursements for the three specified services from the larger menu of services a provider typically offers. A couple of commenters expressed concerns about the time and resources it would take to educate providers about the requirements and their reporting responsibilities.

Additionally, a few commenters expressed concerns about whether States have the capacity to validate the accuracy of providers' reports and conduct audits, especially in States with a large number of providers. One commenter expressed concern about the cost associated with hiring and training independent auditors to audit providers' reported compensation of direct care workers. One commenter shared first-hand experience with implementing a wage pass-through requirement as part of the State's spending plan under ARP section 9817; the commenter regarded the process of monitoring and validating the percentage of payments going to direct care workers as administratively burdensome.

Response: We acknowledge that complying with this reporting requirement will necessitate certain expenditures of resources and time on the part of providers and States. As noted by commenters, we believe that the value of the data collected through their efforts makes these expenditures of resources worthwhile. As discussed further below, we are finalizing the redesignated § 441.311(e)(2)(i) to require only aggregated data by service, as proposed, which we believe will reduce burden on both providers and States.

We believe that, generally speaking, States and providers should already have information about the amount of Medicaid payments providers receive for specific services, and that providers likely already track expenditures on wages and benefits for their workers. We also believe that the simpler, aggregated reporting will be easier for States to validate and include in their existing auditing processes.

However, to ensure that States are prepared to comply with this reporting, we are adding a requirement at § 441.311(e)(3) to require that States must report, one year prior to the applicability date for (e)(2)(i) of this section, on their readiness to comply with the reporting requirement in (e)(2)(i) of this section. This will allow us to identify States in need of additional support to come into compliance with § 441.311(e)(2)(i) and provide targeted technical assistance to States as needed.

Comment: A couple of commenters requested that CMS issue subregulatory guidance or share best practices to assist with strategies for collecting data and ensuring compliance with the requirement. One commenter recommended that we work with States to determine the most efficient way to gather comparable, useful data to inform future rate policies, including exploring whether existing State tools could meet the requirement or could do so with modification.

A few commenters raised particular concerns about cost reports, which they believed would be necessary for implementing the reporting requirement. Commenters stated that without standardized cost reports, it will be difficult to ensure consistent and comparable data reporting across programs. Some of these commenters noted that, in States that do not currently require cost reports, this will present a new burden for both providers and States. A couple of commenters worried that providers may lack both the familiarity and the resources to complete cost reports. A few commenters requested that CMS

develop a standard cost reporting template to ensure accurate data collection and assessment of compliance across all States.

A couple of commenters, noting the language proposed in § 441.311(e) (which we are finalizing at § 441.311(e)(2)(i)) that the reporting will be at the time and in the form and matter specified by CMS, requested additional information regarding the method of submission and the methodology that will be required for the calculations used in the report.

Response: We intend to release subregulatory guidance to assist States with implementation of this requirement, and we plan to also provide technical assistance and best practices to help States identify ways to use existing infrastructure or tools to gather and report. Further, as noted earlier, we intend to provide States with technical specifications for the new reporting requirements in this final rule, which will aid in consistent data reporting. In addition, we will be making the reporting template available for public comment through the Paperwork Reduction Act notice and comment process. Through that process, the public will have the opportunity to review and provide feedback on the elements of the required State reports, including the methodology of the calculations, as well as the timing and format of the report to us.

As discussed further below, we are finalizing the requirement at § 441.311(e)(2)(i) (originally proposed at § 441.311(e)) that States need only report aggregated data by service. We believe this will reduce the overall burden on States and providers and reduce the need for complex cost reporting.

Comment: One commenter requested enhanced FMAP for costs associated with the reporting requirement.

Response: Enhanced FFP is available at a 90 percent FMAP for the design, development, or installation of improvements of mechanized claims processing and information retrieval systems, in accordance with applicable Federal requirements.[129] Enhanced FFP at a 75 percent FMAP is also available for operations of such systems, in accordance with applicable Federal requirements.[130] We reiterate that receipt of these enhanced funds is conditioned upon States meeting a series of standards and conditions to ensure investments are efficient and effective.[131] We decline to make any changes in this final rule based on this comment.

Comment: One commenter suggested that, instead of requiring reporting on the percentage of Medicaid payments going to compensation for direct care workers, we should require States to report annually on how their rates are determined and if the State's rate review included factors such as current wage rates, inflation, required costs of business, and increasing health insurance rates. Another commenter recommended that CMS consider implementing a regular review and assessment to determine if State Medicaid rates provide competitive wages for the direct care workforce and review how these wages are funded in the various payment models.

Response: We focused this particular proposal on the allocation of Medicaid payments, not on rate setting or rate methodology. Such considerations are outside the scope of this proposal. However, we direct readers to the discussion in Documentation of Access to Care and Service Payment Rates (section II.C. of this final rule) which may speak to readers' interests in rate transparency and analysis. We decline to make any changes in this final rule based on this comment.

Comment: A few commenters requested clarification of the enforcement mechanisms for the reporting requirement.

Response: In terms of enforcing compliance of the States' obligation to submit reports as required at § 441.311(e), we intend to use our standard enforcement discretion. In terms of providers' cooperation with States in submitting the data States need to make their reports, we note that States already have broad authority to take enforcement action and create penalties, whether monetary or non-monetary, for providers that have violated their obligations as set forth by the State Medicaid program. We decline to make any changes in this final rule based on this comment.

Comment: A few commenters requested that we clarify managed care plans' responsibility for tracking and reporting expenditures. A few commenters expressed concern that this proposal would pose particular reporting or accounting burdens for providers that participate in multiple Medicaid managed care plans, serve non-Medicaid clients, or receive bundled payments.
