

B. Docket ID No. EPA-HQ-OPPT-2018-0612

Title: TSCA Existing Chemical Risk Evaluation and Management; Generic ICR for Surveys.

EPA ICR No.: 2585.02.

OMB Control No.: 2070-0218.

Abstract: EPA will use this generic ICR to survey chemical users, processors, distributors, manufacturers (including importers), and recyclers, chemical waste handlers, consumers of chemical-containing products, employees exposed to the chemical evaluated (including unions), state and local regulators, non-governmental organizations, industry experts, and knowledgeable members of the public (including potentially exposed or susceptible subpopulations) who may have relevant information and are not covered by current information collection requests. The Agency will use the information collected to inform the development of any future regulatory efforts and to integrate consistent, meaningful, and transparent information into risk evaluation and risk management actions. This information is critical for adequately identifying conditions of use, conducting hazard and exposure assessments, characterizing risks, ascertaining benefits of and substitutes for each substance, estimating the economic consequences of regulation, and developing appropriate regulatory actions. Surveys are important information-gathering tools that will allow EPA to collect information that is necessary to inform the risk evaluation and management efforts and support unreasonable risk determinations from existing chemicals under TSCA.

Burden statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 9.2 hours. Burden is defined in 5 CFR 1320.3(b).

Respondents: Include chemical manufacturers (including importers), chemical users (including government agencies), processors, distributors, product manufacturers, recyclers, chemical waste handlers, consumers, employees, and others with important information about the chemical being evaluated or considered for risk evaluation and management under TSCA.

Respondent obligation to respond: Voluntary.

Forms: None.

Frequency of response: On occasion.

Total estimated number of potential respondents: 2,400.

Total estimated average number of responses for each respondent: 1.

Total estimated annual burden hours: 7,360 hours.

Total estimated annual respondent costs: \$ 653,362, which includes \$ 0 for capital investment or maintenance and operational costs.

III. Are there changes in the estimates from the last approval?

There are no changes in burden or number of respondents when compared with that identified in the ICRs currently approved by OMB. However, there is an increase of \$ 28 and \$ 1,911 in the total estimated respondent costs due to undated wage rates. These changes qualify as adjustments.

IV. What is the next step in the process for this ICR?

EPA will consider the comments received and amend the ICRs as appropriate. The final ICR packages will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. EPA will issue another **Federal Register** document pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICRs to OMB and the opportunity to submit additional comments to OMB. If you have any questions about these ICRs or the approval process, please contact the person listed under **FOR FURTHER INFORMATION CONTACT**.
