

AGENCY FOR INTERNATIONAL DEVELOPMENT**48 CFR Parts 715 and 752**

RIN 0412-AA88

U.S. Agency for International Development Acquisition Regulation; Administrative Updates: Correction**AGENCY:** U.S. Agency for International Development.**ACTION:** Direct final rule; correction.

SUMMARY: On January 23, 2024, the U.S. Agency for International Development (USAID) issued a direct final rule revising the Agency for International Development Acquisition Regulation (AIDAR) to maintain consistency with Federal and agency regulations, remove obsolete material and internal agency procedures, and make editorial amendments to clarify the regulation. This document makes two corrections to the rule.

DATES: Effective May 22, 2024.**FOR FURTHER INFORMATION CONTACT:** Lyudmila Bond, 202-916-2622, policymailbox@usaid.gov.

SUPPLEMENTARY INFORMATION: On January 23, 2024, at 89 FR 4201, the U.S. Agency for International Development (USAID) issued a direct final rule. This document makes corrections to the amendments to sections 715.604 and 752.222-71.

Correction

In the FR Doc. No. 2023-27953, appearing on page 4201 in the **Federal Register** issue of Tuesday, January 23, 2024, USAID is making the following corrections:

715.604 [Corrected]

■ 1. On page 4206, in the first column, section 715.604 is corrected by revising paragraph (a) to read as follows:

“(a) USAID’s Industry Liaison, Bureau for Management, Office of Acquisition and Assistance, manages the receipt and evaluation of unsolicited proposals. Unsolicited proposals may be submitted via: <https://www.workwithusaid.gov/unsolicited-submissions>.”

752.222-71 [Corrected]

■ 2. On page 4208, in the second column, in section 752.222-71, under “Nondiscrimination (May 2024)”, in the third sentence, after “genetic information”, remove “religion.”.

Jami J. Rodgers,
Chief Acquisition Officer.

[Docket No. 240514-0137]

RIN 0648-BM47

Fisheries Off West Coast States; West Coast Salmon Fisheries; 2024 Specifications and Management Measures**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.**ACTION:** Final rule.

SUMMARY: Through this final rule, NMFS establishes fishery management measures for the ocean salmon fisheries off Washington, Oregon, and California for the season beginning May 16, 2024, and ending May 15, 2025 (the 2024 ocean salmon fishing season), under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (MSA). The fishery management measures establish fishing areas, seasons, quotas, legal gear, recreational fishing days and catch limits, harvest guidelines, possession and landing restrictions, and minimum lengths for salmon taken in the U.S. Exclusive Economic Zone (EEZ) off Washington, Oregon, and California. The management measures are intended to prevent overfishing while achieving, on a continuing basis, the optimum yield from the fishery, and to apportion the ocean harvest equitably among treaty Indian, and non-Indian commercial and recreational fisheries. The measures are also intended to allow a portion of the salmon runs to escape the ocean fisheries in order to provide for spawning escapement, comply with applicable law, and to provide fishing opportunity for fisheries occurring in State waters.

DATES: This final rule is effective from 0001 hours Pacific Daylight Time, May 16, 2024, until the effective date of the 2025 management measures, as published in the **Federal Register**, which we expect to be 0001 hours Pacific Daylight Time May 16, 2025.

ADDRESSES: The documents cited in this document are available on the Pacific Fishery Management Council’s (Council’s) website (www.pcouncil.org).

FOR FURTHER INFORMATION CONTACT: Shannon Penna at 562-980-4239, Email: Shannon.Penna@noaa.gov.

SUPPLEMENTARY INFORMATION:**Background**

The ocean salmon fisheries in the EEZ (3–200 nautical miles (nmi); 5.6–370.4 kilometers (km)) off the coasts of Washington, Oregon, and California are managed under the Pacific Coast Salmon Fishery Management Plan (FMP). Regulations at 50 CFR part 660, subpart H, provide the mechanism for making preseason and inseason adjustments to the management measures within limits set by the FMP by notification in the **Federal Register**. Regulations at 50 CFR 660.408 govern the establishment of annual management measures.

This rule implements the management measures for the 2024 ocean salmon fishing season.

Process Used To Establish 2024 Management Measures

Ocean salmon fishery management measures are established via a collaborative process with the Council, States, tribes, fishing industry participants, anglers, and the public. The Council announced its annual preseason management process for the 2024 ocean salmon fishing season in the **Federal Register** on February 13, 2024 (89 FR 10042). NMFS published an additional notice of opportunity to submit public comments on the 2024 ocean salmon fishery management measures in the **Federal Register** on March 12, 2024 (89 FR 17834). These notices announced the availability of key documents, the dates and locations of meetings and public hearings regarding determining the annual proposed and final modifications to ocean salmon fishery management measures, and instructions on how to comment on those measures. The agendas for the March and April Council meetings were published in the **Federal Register** (89 FR 12319, February 16, 2024, and 89 FR 19815, March 20, 2024), and posted on the Council’s website prior to the meetings.

In accordance with the FMP, the Council’s Salmon Technical Team (STT) and economist prepared four reports for the Council, its advisors, and the public. All four reports were made available on the Council’s website upon their completion. The first of the reports, “Review of 2023 Ocean Salmon Fisheries,” was prepared in February when the first increment of scientific information necessary for crafting management measures for the 2024 ocean salmon fishing season became available. The first report summarizes biological and socio-economic data from the 2023 ocean salmon fisheries and assesses the performance of the fisheries
