[Docket No. RM93-11-000]

Revisions to Oil Pipeline Regulations Pursuant to the Energy Policy Act of 1992; Notice of Annual Change in the Producer Price Index for Finished Goods

The Commission's regulations include a methodology for oil pipelines to change their rates through use of an index system that establishes ceiling levels for such rates. The Commission bases the index system, found at 18 CFR 342.3, on the annual change in the Producer Price Index for Finished Goods (PPI-FG), minus point two one percent (PPI-FG - 0.21%). The Commission determined in the January 2022 Order¹ that PPI-FG - 0.21% is the appropriate oil pricing index factor for pipelines to use for this period.

The regulations provide that the Commission will publish annually an index figure reflecting the final change in the PPI-FG after the Bureau of Labor Statistics publishes the final PPI-FG in May of each calendar year. The annual average PPI-FG index figures were 250.9 for 2022 and 254.6 for 2023.²

² Bureau of Labor Statistics (BLS) publishes the final figure in mid-May of each year. This figure is publicly available from the Division of Industrial Prices and Price Indexes of the BLS, at 202-691-7705, and in print in August in Table 1 of the

Thus, the percent change (expressed as a decimal) in the annual average PPI-FG from 2022 to 2023, minus 0.21 percent, is positive 0.012647.³ Oil pipelines must multiply their July 1, 2023, through June 30, 2024, index ceiling levels⁴ by positive 1.012647⁵ to compute their index ceiling levels for July 1, 2024, through June 30, 2025, in accordance with 18 CFR 342.3(d). For guidance in calculating the ceiling levels for each 12-month period beginning January 1, 1995,⁶ see *Explorer Pipeline Company*, 71 FERC ¶ 61,416, at n.6 (1995).
