#### Overview of This Information Collection

*Title:* Advance Travel Authorization (ATA).

*OMB Number:* 1651-0143.

*Form Number:* N/A.

*Current Actions:* Revision to an existing collection of information with an increase in total annual burden.

*Type of Review:* Revision.

*Affected Public:* Individuals.

*Abstract:* The Department of Homeland Security (DHS) established new parole processes to allow certain noncitizens from certain countries, and their qualifying immediate family members to request advance authorization to travel to the United States to seek a discretionary grant of parole, issued on a case-by-case basis. To support these processes, U.S. Customs and Border Protection (CBP) developed the Advance Travel Authorization (ATA) capability, which allows individuals to submit information within the CBP One™ application as part of the process. Through an emergency approval, CBP established the ATA collection. Initially, this capability was utilized by Venezuelan citizens and their qualifying immediate family members seeking authorization to travel to the United States under the DHS-established parole process for Venezuelans.<sup>1</sup> DHS later developed similar parole processes for citizens of Cuba,<sup>2</sup> Haiti,<sup>3</sup> and Nicaragua<sup>4</sup> and their qualifying immediate family members. The four processes are collectively known as the CHNV process. There is no numerical cap on the number of noncitizens from these four countries who may apply; however, there is a 30,000 limit on the number of travel authorizations DHS may issue each month across the CHNV process. Additionally, participation is limited in the ATA capability to those individuals who meet certain DHS-established criteria, including, but not limited to, possession of a valid, unexpired passport, as well as having an approved U.S.-based financial supporter.

ATA requires the collection of a facial photograph via CBP One™ from those noncitizens who voluntarily elect to participate in the CHNV process, in order to provide accurate identity information for completion of vetting in advance of issuance of a travel authorization.

#### Advance Travel Authorization (ATA)

The biographic information collected on the I-134A is passed to CBP systems to allow the individual to complete their CBP One submission. The information the individual enters in CBP One must match the I-134A. The facial biometrics
