

would experience enough motor vehicle emissions growth for a [national ambient air quality standards (NAAQS)] violation to occur.”<sup>1</sup> Additionally, the PM<sub>2.5</sub> LMP guidance suggests “an LMP may be particularly appropriate for a second maintenance plan, as the area will have demonstrated attainment of the PM<sub>2.5</sub> NAAQS for at least 8 years.”<sup>2</sup>

To meet the transportation conformity regulation, *i.e.*, demonstrate that it would be unreasonable to expect that the area would experience enough motor vehicle growth for a NAAQS violation to occur, an LMP submission for an area’s second maintenance plan should again address the area’s PM<sub>2.5</sub> air quality trends and its historical and projected vehicle miles traveled (VMT). Since the Northern New Jersey and Southern New Jersey areas have been attaining the PM<sub>2.5</sub> NAAQS for 10 years, with a low risk of future exceedances, we find the LMP adequate for transportation conformity purposes.

Once an area has an approved or adequate LMP for a specific pollutant and NAAQS, the area no longer needs to satisfy the regional emissions analysis for CFR 93.118 and CFR 93.119.<sup>3</sup> A conformity determination that meets the requirements outlined in CFR 93.109(b)(Table 1), including the hot-spot requirements for projects in CO, PM<sub>10</sub>, and PM<sub>2.5</sub> areas, is still required for these maintenance areas with an approved or adequate LMP.<sup>4</sup>

Transportation conformity is required by Clean Air Act section 176(c). EPA’s conformity rule requires that transportation plans, transportation improvement programs, and projects conform to State air quality implementation plans (SIPs) and establishes the criteria and procedures for determining whether or not they do. Conformity to a SIP means that transportation activities will not produce new air quality violations, worsen existing violations, or delay timely attainment of the NAAQS.

The criteria by which we determine whether a SIP’s Limited Maintenance Plan is adequate can be found in 40 CFR 93.109(e). Please note that an adequacy review is separate from EPA’s completeness review and should not be

used to prejudice EPA’s ultimate approval action for the SIP. Even if we find a limited maintenance plan adequate, the SIP could later be disapproved.

Served: May 20, 2024.

Notice is given that a complaint has been filed with the Federal Maritime Commission (the “Commission”) by Giti Tire (USA) Ltd. (the “Complainant”) against Flexport International LLC (the “Respondent”). Complainant states that the Commission has subject matter jurisdiction over the complaint pursuant to the Shipping Act of 1984, as amended, 46 U.S.C. 40101 *et seq.* and personal jurisdiction over the Respondent as a non-vessel-operating common carrier, as defined in 46 U.S.C. 40102(17).

Complainant is a Delaware corporation with its principal place of business located in Rancho Cucamonga, California.

Complainant identifies Respondent as a Delaware limited liability company with a principal place of business in San Francisco, California.

Complainant alleges that Respondent violated 46 U.S.C. 41102(c), 41104(a)(14), 41104(a)(15), and 41104(d) and 46 CFR 545.4 and 545.5. Complainant alleges these violations arose from the issuance of invoices for detention and demurrage charges that did not contain the information required under 46 U.S.C. 41104(d)(2), for charges that were already invoiced to other parties, and for charges that were excessive or unreasonable.

An answer to the complaint must be filed with the Commission within 25 days after the date of service.
