

the United States.” FERC Form 587² consolidates the required information, including a description of the applicable U.S. lands and identification of hydropower project boundary maps associated with the applicable U.S. lands. An applicant must send FERC Form 587 both to the Commission and

to the Bureau of Land Management (BLM)³ state office where the project is located. The information consolidated in FERC Form 587 facilitates the reservation of U.S. lands as hydropower sites and the withdrawal of such lands from other uses.

Type of Respondents: Applicants proposing hydropower projects, or

changes to existing hydropower projects, within lands of the United States.

Estimate of Annual Burden: The Commission estimates the average annual burden⁴ and cost⁵ for this information collection as follows.

A. Number of respondents	B. Annual number of responses per respondent	C. Total number of responses (column A × column B)	D. Average hour burden & cost per response	E. Total annual burden hours & total annual cost (column C × column D)	F. Cost per respondent (\$) (column E ÷ column A)
70	1	70	1 hour; \$100.00	70 hours; \$7,000	\$100.00

Comments: Comments are invited on: (1) whether the collections of information is necessary for the proper performance of the functions of the Commission, including whether the information will have practical utility; (2) the accuracy of the agency’s estimate of the burden and cost of the collections of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information collections; and (4) ways to minimize the burden of the collections of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.
