

II. Identification of the Categorical Exclusion

NOAA's categorical exclusion, C1, for habitat restoration actions is codified in NOAA's procedures for implementing NEPA (<https://www.noaa.gov/sites/default/files/2021-10/NOAA-NAO-216-6A-Companion-Manual-03012018%20%281%29.pdf>) and related authorities, as contained in the Companion Manual to NOAA Administrative Order NAO 2–16–6A. The text of categorical exclusion C–1 is as follows, “Habitat restoration actions, provided that such action: (1) transplants only organisms currently or formerly present at the site or in its immediate vicinity (if transplant is a component of the action); (2) does not require substantial placement of fill or dredging; (3) does not involve any removal of debris, excavation, or conditioning of soils unless such removal of debris, excavation, or conditioning of soils is geographically limited to the impact area such that site conditions will not impede or negatively alter natural processes, is in compliance with all permit and disposal requirements, and will not impact critical aquifers or recharge areas; and (4) does not involve an added risk of human or environmental exposure to toxic or hazardous substances, pathogens, or radioactive materials. *Notes:* If applicable, limitations and mitigation measures identified in the NOAA Restoration Center Programmatic Environmental Impact Statement for Habitat Restoration Actions must be followed. This CE includes, but is not limited to, response or restoration actions under CERLCA, OPA, or NMSA, if such actions help to restore an ecosystem, habitat, biotic community, or population of living resources to a determinable pre-impact condition prior to the incident leading to the response or restoration.”

Proposed Action

DARPA proposes to deploy and field test ecological engineering and biological adaptation strategies for corals in south Florida that have been tested in laboratory settings. The need to field test these strategies is to determine the best methods for coral translocation that will maximize wave attenuation, promote coral growth, mimic natural reef building and self-repair, increase the adaptive capacity of coral, and provide for long-term resiliency of the artificial reef that will be a part of DARPA's Reefense program in south Florida.

III. Consideration of Extraordinary Circumstances

If an agency determines that a categorical exclusion covers a proposed action, the agency must evaluate the proposed action for extraordinary circumstances in which a normally excluded action may have a significant effect. (40 CFR 1501.4(b)). DARPA does not currently have its own NEPA implementing procedures to guide its application of extraordinary circumstances. Until DARPA establishes NEPA implementing procedures, for purposes of considering extraordinary circumstances in connection with the NOAA categorical exclusion discussed in this notice, DARPA has considered whether the proposed action has the potential to result in significant effects. DARPA has assessed extraordinary circumstances and determined they are not present.

IV. Consultation With NOAA and Determination of Appropriateness

DARPA and NOAA consulted on the appropriateness of DARPA's adoption of the categorical exclusion. This consultation included a review of NOAA's experience applying the categorical exclusion and the proposed action for which DARPA plans to utilize it. Following this consultation and review, DARPA has determined that the impacts of the proposed action to deploy and field test ecological engineering and biological adaptation strategies for corals that have been tested in laboratory settings are similar to the impacts, which are not significant, of projects for which NOAA may apply the categorical exclusion. Additionally, DARPA determined that there are no extraordinary circumstances. Therefore, DARPA has determined that its proposed use of NOAA's categorical exclusion C1, as described within this notice, would be appropriate.

Notice to the Public and Documentation of Adoption

This notice documents adoption of the NOAA categorical exclusion listed above and is available for use by DARPA, effective immediately.
