The project

creates an approximately 70-foot-long bypassed reach of the Passadumkeag River.

As required by Article 19 of the current license, KEI Power operates the project as a run-of-river (ROR) facility, such that project outflow approximates inflow to the impoundment.

Downstream fish passage is provided by a bypass facility located adjacent to the south side of the intake structure and powerhouse, and consists of a 3.7-foot-wide, 6.2-foot-high stoplog slot; a 5.1-foot-wide, 5.8-foot-long concrete fish collection box; and a 69.7-foot-long, 24-inch-diameter fiberglass fish passage pipe that discharges into a 13.4-foot-deep plunge pool next to the tailrace. Recreation facilities at the project include a hand-carry boat access area on the north side of the dam, a parking area, and a canoe portage.

The minimum and maximum hydraulic capacities of the powerhouse are 90 and 905 cfs, respectively. The average annual generation of the project was approximately 4,144 megawatt-hours from 2016 through 2020.

KEI Power proposes to: (1) continue operating the project as a ROR facility; (2) install upstream and downstream eel passage facilities; (3) install seasonal trashrack overlays with 0.875-inch diameter holes; (4) modify the discharge location of the existing downstream fish passage pipe to discharge adjacent to the existing upstream fish passage entrance; and (5) develop a fishway operation and management plan.

[Project No. 2853-073]

Montana Department of Natural Resources and Conservation; Notice of Availability of Draft Environmental Assessment

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission) regulations, 18 CFR part 380, the Office of Energy Projects has reviewed the application for license for the Broadwater Hydroelectric Project, located on the Missouri River in Broadwater County, Montana and has prepared a Draft Environmental Assessment (DEA) for the project. The project is adjacent to and includes federal lands administered by the Bureau of Land Management.

The DEA contains staff's analysis of the potential environmental impacts of the project and concludes that licensing the project, with appropriate environmental protective measures, would not constitute a major federal action that would significantly affect the quality of the human environment.

The Commission provides all interested persons with an opportunity to view and/or print the DEA via the internet through the Commission's Home Page (<http://www.ferc.gov/>), using the "eLibrary" link.
