Title: FERC-921, Ongoing Electronic Delivery of Data from Regional Transmission Organizations and Independent System Operators.

OMB Control No.: 1902-0257.

Type of Request: Three-year extension of the FERC-921 information collection requirements with no changes to the current reporting requirements.

Abstract: The collection of data in FERC-921 is an effort by the Commission, implemented under Order No. 760,¹ to detect potential anti-competitive or manipulative behavior or ineffective market rules. In Order No. 760, the Commission issued 18 CFR 35.28(g)(4), which requires ongoing electronic delivery of data by each Commission-approved Regional Transmission Organization (RTO) and Independent System Operator (ISO). The required data include physical and virtual offers and bids, market awards, resource outputs, marginal cost estimates, shift factors, financial transmission rights, internal bilateral contracts, uplift, and interchange pricing. Although provision was made by the Commission that market monitoring units (MMUs) may provide datasets, all data for this collection has (and is expected to continue to) come from each RTO or ISO and not the MMUs. Therefore, any associated burden is counted as burden on RTOs and ISOs.

While the ongoing delivery of data under FERC-921 is continuous and routine, each RTO or ISO makes sporadic changes to its individual market with Commission approval. When those changes occur, the RTO or ISO may need to change the data being routinely sent to the Commission to ensure compliance with Order No. 760. Such changes typically require respondents to alter the ongoing delivery of data under FERC-921. The burden associated with a change varies considerably based on the significance of the specific change; therefore, the estimate below is intended to reflect the incremental burden for an average change. Based on historical patterns, Commission staff estimates there to be about one and a half changes of this nature per RTO or ISO per year.

The Commission published a 60-day Paperwork Reduction Act Notice on April 24, 2024 (89 FR 31197). The public comment period ended on June 24, 2024. The Commission received no public comments in response.

Types of Respondent: Regional Transmission Organizations (RTOs) and Independent System Operators (ISOs).

Estimate of Annual Burden:² The Commission estimates the total annual

¹ *Enhancement of Electricity Market Surveillance and Analysis through Ongoing Electronic Delivery of Data from Regional Transmission Organizations and Independent System Operators*, Order No. 760, 77 FR 26674 (May 7, 2012).

² "Burden" is the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. For further explanation of what is included in the information collection burden, refer to 5 CFR 1320.3.
