

relevant data. The Office of Management and Budget (OMB) and the Government Accountability Office (GAO) strongly advocate for stakeholder engagement in evaluation design. OMB's M-19-23 Memorandum emphasizes that engaging stakeholders enhances the utility of evaluation findings to improve program effectiveness.

To ensure alignment with ongoing efforts, this information request seeks to support the FTA in meeting the Evidence Act's requirements and contribute to FTA's broader framework of evidence-based decision-making. This is a voluntary data and information collection, with no participation requirement to receive Federal benefits. The survey portion of this information collection differs from other similar efforts, such as the FTA Stakeholder Survey which targets grant recipients and inquires on customer satisfaction with a range of FTA services and knowledge of rulemaking. Current and previous information collections for grant applicants and grantees to provide routine program planning and metrics on plans and deliverables are separate from this collection. Rather, this information collection will allow FTA decision makers to understand challenges and barriers to program implementation, identify opportunities for improving program communications and outreach, and make stronger linkages between program progress and outcomes.

The summary provided below has been updated since the publication of the 60-Day **Federal Register** Notice. The estimated annual respondents and number of responses have changed to reflect the current number of program participants for each representative FTA program as of April 2024. The estimated total burden was also updated to reflect this change in the estimated number of respondents, as well as a change to the estimated time per information collection based on the results of pilot testing.

Respondents: State Departments of Transportation (DOTs) and Metropolitan Planning Organizations (MPOs), Transit Authorities, States, and Local Government Units, Indian Tribes.

Estimated Annual Respondents: 1,380 respondents.

Estimated Annual Number of

Responses: 2,070 responses.

Estimated Total Annual Burden: 2,180 hours.

Frequency: Annual.

SUPPLEMENTARY INFORMATION:

OMB Approval No. 2138-0013.

Title: Report of Financial and Operating Statistics for Large Certificated Air Carriers.

Form No.: BTS Form 41.

Type of Review: Extension of a currently approved collection.

Respondents: Large certificated air carriers.

Number of Respondents: 60.

Estimated Time per Response: 4 hours per schedule, an average carrier may submit 90 schedules in one year.

Total Annual Burden: 13,910 hours.

Needs and Uses: Program uses for Form 41 data are as follows:

Mail Rates

The Department of Transportation sets and updates the international and mainline Alaska mail rates based on carrier aircraft operating expense, traffic and operational data. Form 41 cost data, especially fuel costs, terminal expenses, and line haul expenses are used in arriving at rate levels. DOT revises the established rates based on the percentage of unit cost changes in the carriers' operations. These updating procedures have resulted in the carriers receiving rates of compensation that more closely parallel their costs of providing mail service and contribute to the carriers' economic well-being.

Submission of U.S. Carrier Data to ICAO

As a party to the Convention on International Civil Aviation, the United States is obligated to provide the International Civil Aviation Organization with financial and statistical data on operations of U.S. air carriers. Over 99 percent of the data filed with ICAO is extracted from the carriers' Form 41 reports.

Carrier Fitness

Fitness determinations are made for both new entrants and established U.S. domestic carriers proposing a substantial change in operations. A portion of these applications consists of an operating plan for the first year (14 CFR part 204) and an associated projection of revenues and expenses. The carrier's operating costs, included in these projections, are compared against the cost data in Form 41 for a carrier or carriers with the same aircraft type and similar operating characteristics. Such a review validates the reasonableness of the carrier's operating plan.

Form 41 reports, particularly balance sheet reports and cash flow statements play a major role in the identification of vulnerable carriers. Data comparisons are made between current and past periods in order to assess the current financial position of the carrier. Financial trend lines are extended into the future to analyze the continued viability of the carrier. DOT reviews three areas of a carrier's operation: (1) the qualifications of its management team, (2) its disposition to comply with laws and regulations, and (3) its financial posture. DOT must determine whether or not a carrier has sufficient financial resources to conduct its operations without imposing undue risk on the traveling public. Moreover, once a carrier is operating, DOT is required to monitor its continuing fitness.

Senior DOT officials must be kept fully informed as to all current and developing economic issues affecting the airline industry. In preparing financial conditions reports or status reports on a particular airline, financial and traffic data are analyzed. Briefing papers may use the same information.

The Confidential Information Protection and Statistical Efficiency Act of 2002 (44 U.S.C. 3501 note), requires a statistical agency to clearly identify information it collects for non-statistical purposes. BTS hereby notifies the respondents and the public that BTS uses the information it collects under this OMB approval for non-statistical purposes including, but not limited to,

publication of both Respondent's identity and its data, submission of the information to agencies outside BTS for review, analysis and possible use in regulatory and other administrative matters.

Issued in Washington, DC, on July 2, 2024.

William Chadwick, Jr.,

*Director, Office of Airline Information,
Bureau of Transportation Statistics.*
