Please note that written comments received in response to this notice will be considered public records.

*Title of Collection:* Regional Educational Laboratory (REL) Southwest Effective Advising Framework Evaluation.

*OMB Control Number:* 1850–NEW.

*Type of Review:* A new ICR.

*Respondents/Affected Public:*

Individuals and Households.

*Total Estimated Number of Annual Responses:* 852.

*Total Estimated Number of Annual Burden Hours:* 285.

*Abstract:* By 2030, the Texas Higher Education Coordinating Board expects that 60 percent or more of all new jobs in Texas will require some postsecondary education. However, in 2019, less than half of the Texas population ages 25–34 years (44.3 percent) had some type of postsecondary credential. To close this gap and support districts in meeting the state statute that requires schools to fully develop each student’s academic, career, personal, and social abilities, the Counseling, Advising, and Student Supports team (under the Division of College, Career, and Military Preparation) at the Texas Education Agency established the Effective Advising Framework. This framework expands access to effective college and career advising by streamlining and modernizing advising offerings and services for secondary and postsecondary students. The initiative aims to support students in making informed decisions about postsecondary education and careers and to offer professional development to educators and guidance counselors on advising services.

This proposed study will examine the implementation of the Effective Advising Framework across school districts participating in the pilot program. Because it is expected that districts are applying the framework in a variety of ways, the study will examine the variation in implementation across districts, including an analysis of the factors that support or hinder implementation. To do this, the research team will collect data from public education staff at the school, district, and regional levels. Surveys will be administered to gather information on how and what is being implemented at each level and what factors may act as barriers to successful implementation. One-on-one interviews and focus group interviews will be conducted with a subsample of respondents from each level to gather more in-depth information on the successes and challenges they faced in applying the framework. The results of this study will inform the continued development of the framework and the

associated resources and supports that will be provided to districts and schools when the initiative is implemented statewide.
