II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the agency's functions to protect workers, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information, and transmission techniques.

III. Proposed Actions

OSHA is requesting that OMB extend the approval of the information collection requirements contained in the Permit-Required Confined Spaces Standard. The agency is requesting an adjustment increase in burden hours from 2,076,039 hours to 2,110,225 hours, a difference of 34,186 hours. This increase is due to the increase in the number of permit space entrants from 1,488,877 to 1,505,672, and due to the increase in the number of establishments with permit spaces from 214,994 to 221,852. It is also related to the adjustment of the estimated percentage of establishments assumed to incur burden hour costs conducting atmospheric monitoring and testing.

OSHA will summarize the comments submitted in response to this notice and will include this summary in the request to OMB to extend the approval of the information collection requirements.
