Submissions sent via the U.S. Postal Service must be addressed to: Debbie-Anne A. Reese, Acting Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room 1A, Washington, DC 20426. Submissions sent via any other carrier must be addressed to: Debbie-Anne A. Reese, Acting Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, MD 20852. All filings must clearly identify the project name and docket number on the first page: Fellows Dam Hydroelectric Project (P-9648-020).

m. The application is not ready for environmental analysis at this time.

n. *The existing Fellows Dam Project consists of the following:* (1) a 200-foot-long, 10-foot-high concrete dam (Fellows Dam) with a crest elevation of 435 feet mean sea level (msl); (2) an impoundment with a surface area of 21 acres and a storage capacity of 106 acre-feet at an elevation of 435 feet msl; (3) an intake structure equipped with an inclined trashrack with 1.5-inch clear bar spacing; (4) a 4-foot by 8-foot, 30-foot-long reinforced concrete open flume; (5) a powerhouse with a Francis turbine-generator unit with an authorized installed capacity of 150 kilowatts; (6) a 0.60 kilovolt (kV) generator lead; (7) a 0.60/4.16-kV transformer; (8) a 0.6-kV, 100-foot-long transmission line; and (9) appurtenant facilities.

The current license requires River Street to operate the project in a run-of-river mode and to release a minimum flow of 6 cubic feet per second (cfs) or inflow, whichever is less, over the spillway for the protection of fish and wildlife resources in the Black River. The project has an average annual generation of 500 megawatt-hours.

The current license also requires River Street to provide downstream fish passage at the project from April 1 to June 15. River Street operates a downstream fish passage facility consisting of a 36-inch-wide weir installed in the spillway adjacent to the existing trashrack, a fish collection box, and an 18-inch diameter steel sluice pipe that discharges to a natural plunge pool at the toe of the dam.

River Street proposes to continue operating the project in a run-of-river mode. River Street also proposes to: (1) increase the current year-round minimum flow release over the spillway from 0.5 inch (6 cfs) to 1 inch; (2) operate the existing downstream fish passage facility in the fall; and (3) develop a flow management, monitoring, and maintenance plan.

SUPPLEMENTARY INFORMATION:

I. Does this action apply to me?

This action is directed to the public in general and may be of interest to a wide range of stakeholders including environmental, human health, farm worker, and agricultural advocates; the chemical industry; pesticide users; and members of the public interested in the

sale, distribution, or use of pesticides. Since others also may be interested, the Agency has not attempted to describe all the specific entities that may be affected by this action. If you have any questions regarding the applicability of this action

to a particular entity, consult the Chemical Review Manager identified in table 1 of unit II.

II. What action is the Agency taking?

Pursuant to 40 CFR 155.58(a), this notice announces the availability of

EPA's proposed interim and proposed registration review decisions for the pesticides shown in table 1 and opens a 60-day public comment period on the proposed interim and proposed registration review decisions.

TABLE 1—PROPOSED INTERIM AND PROPOSED REGISTRATION REVIEW DECISIONS

Registration review case name and No.	Docket ID No.	Chemical review manager and contact information
Malathion Case Number 0248	EPA-HQ-OPP-2009-0317	Carolyn Smith, smith.carolyn@epa.gov , (202) 566-2273.
Mancozeb Case Number 0643	EPA-HQ-OPP-2015-0291	Ben Tweed, tweed.benjamin@epa.gov , (202) 566-2274.

III. What is the Agency's authority for taking this action?

EPA is conducting its registration review of the chemicals listed in the table 1 of unit II. pursuant to the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) section 3(g) (7 U.S.C. 136a(g)) and the Procedural Regulations for Registration Review at 40 CFR part 155, subpart C. FIFRA Section 3(g) provides, among other things, that pesticide registrations are to be reviewed every 15 years. Consistent with 40 CFR 155.57, in its final registration review decision, EPA will ultimately determine whether a pesticide continues to meet the registration standard in FIFRA section 3(c)(5) (7 U.S.C. 136a(c)(5)). As part of the registration review process, the Agency has completed a proposed interim or proposed decision for each of the pesticides listed in table 1 of unit II.

The registration review docket for a pesticide includes documents related to the registration review case. Among other things, these documents describe EPA's rationales for conducting additional risk assessments for the registration review of the pesticides included in table 1 of unit II., as well as the Agency's subsequent risk findings and consideration of possible risk mitigation measures. The proposed interim and proposed registration review decisions are supported by the rationales included in those documents.

Consistent with 40 CFR 155.58(a), EPA provides for at least a 60-day public comment period on proposed interim and proposed registration review decisions. This comment period is intended to provide an opportunity for public input and a mechanism for initiating any necessary amendments to the proposed decision.

For additional background on the registration review program, see: <https://www.epa.gov/pesticide-reevaluation>.

IV. What should I consider as I prepare comment for EPA?

1. *Submitting CBI.* Do not submit CBI to EPA through email or <https://www.regulations.gov>. If you wish to include CBI in your comment, please follow the applicable instructions at <https://www.epa.gov/dockets/commenting-epa-dockets#rules> and clearly mark the information that you claim to be CBI. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. *Tips for Preparing Your Comments.* When preparing and submitting your comments, see the commenting tips at: <https://www.epa.gov/dockets/commenting-epa-dockets>.

3. *Environmental Justice.* EPA seeks to achieve environmental justice, the fair treatment and meaningful involvement of any group, including minority and/or low-income populations, in the development, implementation, and enforcement of environmental laws, regulations, and policies. To help address potential environmental justice issues, the Agency seeks information on any groups or segments of the population who, as a result of their location, cultural practices, or other factors, may have atypical or disproportionately high and adverse human health impacts or environmental effects from exposure to the pesticides discussed in this document, compared to the general population.

All comments should be submitted using the methods in **ADDRESSES** and must be received by EPA on or before the closing date. These comments will become part of the docket for the pesticides included in table 1 in unit I.

The Agency will consider all comments received by the closing date and may respond to comments in a "Response to Comments Memorandum" in the docket and/or in any subsequent interim or final registration review decision, as appropriate.

Authority: 7 U.S.C. 136 *et seq.*

Dated: July 11, 2024.
