Specific Guiding Questions

Question 1

Are the existing traffic safety performance measures effectively informing the State's highway safety programming decisions and encouraging the adoption of the Safe System Approach? If not, how can the measures be adapted to better support a comprehensive approach to roadway safety that results in impactful programming and funding decisions?

Question 2

Should performance measures be added, removed, or updated? If yes, which one(s) and why?

Question 3

How can performance management help States develop more robust programs to engage communities that have members killed and/or seriously injured at higher rates than others but are underrepresented in the State's programming and funding investments?

Question 4

As part of the Bipartisan Infrastructure Law, Congress directed NHTSA in section 24102 to, "provide for a comprehensive, data-driven traffic safety program that results from meaningful public participation and engagement from affected communities, particularly those most significantly impacted by traffic crashes resulting in injuries and fatalities."

How can performance management help assess community input and engagement, and what are your thoughts on adding a measure to evaluate the degree to which State Highway Safety Offices (SHSO) are diversifying their grantees who represent communities overrepresented in fatality data and underrepresented in the State's programming?

Question 5

Currently, the Federal Highway Administration requires 5 safety performance measures for State DOTs:

- Number of traffic fatalities (Fatality Analysis and Reporting System (FARS))
- Number of serious injuries in traffic crashes (State crash data files)
- Fatalities/VMT (FARS, FHWA-Highway Performance Management System (HPMS))

- Rate of Serious Injuries per 100 million VMT
- Number of Non-motorized Fatalities and Non-motorized Serious Injuries

NHTSA requires States to report on the number of fatalities, serious injuries, and the rate of fatalities per 100 million VMT. NHTSA does not require SHSOs to report on the rate of serious injuries per 100 million VMT nor the number of non-motorized fatalities and non-motorized serious injuries.

Should the serious injuries per 100 million VMT and non-motorized fatalities and serious injuries measures be included in NHTSA's Core Performance Measures? Please share the reasons for your perspective.

Question 6

The current performance management model requires SHSOs to submit 15 pre-identified core, behavioral and activity performance measures.

Are there other SHSO performance management approaches NHTSA should consider? For example, what are your thoughts on an approach that would require 3-5 pre-identified overall fatality and serious injury targets that apply to all SHSOs universally in addition to a set of targeted performance measures for specific highway safety program areas that would be required for any State that includes that program area in its triennial Highway Safety Plan?
