

satisfaction with the activity. The RWHAP Regional AETC Program recipients will gather data on the training activities they conduct using six data collection instruments. The Individual Participant Record is completed at least once every reporting period by participants actively engaging in Regional AETC activities. This form includes Regional AETC participant demographic, workplace, and client-served data for the participant’s respective provider sites. The Training Activity Record is a form completed at the end of each Regional AETC activity that takes place during the reporting period and is completed by the regional recipients. This form describes the activity in hours, modality, and topic(s). The PT Site Characteristics/Outcomes form collects site characteristics information for PT recipient sites only, like clinic activities and procedures, and aggregate counts of clients. PT sites provide clinical services and differ from IPE sites that support students, thus necessitating a different form. The IPE Site Characteristics/Outcomes form collects site characteristics information for IPE recipient sites only. The Participant Post-Activity Immediate

Survey collects information from participants immediately after an activity, specifically, their satisfaction and potential increased knowledge due to participating in said activity. The IPE Long-Term form collects 1-year post-participation information from participant students who engaged in an IPE program to gauge involvement in the field of HIV care and treatment.

Need and Proposed Use of the Information: HRSA uses the data collected when conducting RWHAP AETC programmatic assessments to determine future program needs. These data allow HRSA to identify where gaps exist in training HIV professionals as well as to measure whether training activities are meeting the goals of the National HIV/AIDS Strategy and the RWHAP statute.

Likely Respondents: RWHAP Regional AETC participants complete the Individual Participant Record at least once a reporting period. Regional AETC recipients complete a Training Activity Record for each training activity they conduct during the reporting period. All Regional AETC participants will take the Participant Post-Activity Survey immediately after any attended activity.

The IPE Long-Term form will only be completed by participants who engaged in an IPE program, 1-year post-participation in the IPE program. Finally, PT recipients will complete the PT Site Characteristics/Outcomes form at least once per reporting period, and IPE recipients will complete the IPE Site Characteristics/Outcomes form at least once per reporting period.

Burden Statement: Burden in this context means the time expended by persons to generate, maintain, retain, disclose, or provide the information requested. This includes the time needed to review instructions; to develop, acquire, install, and utilize technology and systems for the purpose of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information; to search data sources; to complete and review the collection of information; and to transmit or otherwise disclose the information. The total annual burden hours estimated for this ICR are summarized in the table below.

TOTAL ESTIMATED ANNUALIZED BURDEN HOURS

Form name	Number of respondents	Number of responses per respondent	Total responses	Average burden per response (in hours)	Total burden hours
Individual Participant Record	59,576	1	59,576	0.27	16,085.52
Training Activity Record	12,226	1	12,226	0.21	2,567.46
PT, Site Characteristics and Outcomes	128	1	128	0.31	39.68
IPE, Site Characteristics and Outcomes	86	1	86	0.09	7.74
Participant Post-Activity Immediate Survey	59,576	3	178,728	0.06	10,723.68
IPE, Long-Term	4,403	1	4,403	0.07	308.21
Combined Data Set	8	1	8	64	512.00
Total	136,003	255,155	30,244.29

HRSA specifically requests comments on (1) the necessity and utility of the proposed information collection for the proper performance of the agency’s functions, (2) the accuracy of the estimated burden, (3) ways to enhance the quality, utility, and clarity of the information to be collected, and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.
