The ISMICC created five Working Groups to support each of the five focus areas in their 2017 report of recommendations. The Working Groups consist of Federal and Non-federal Members who meet regularly outside of regular ISMICC meetings. Working Groups focus on translating recommendations into action by prioritizing efforts, developing short- and long-term objectives, coordinating programs and policies, identifying existing activities that could be updated or leveraged, and evaluating the feasibility of specific federal initiatives and programs. Working Groups report their findings and offer action-oriented recommendations to the ISMICC. The ISMICC deliberates Working Groups'

findings and may vote on recommendations. Appointed federal staff act as Stewards for each of the Working Groups to support their operations and report progress.

### I. Background and Authority

In addition, the ISMICC will evaluate the effect federal programs related to serious mental illness have on public health, including public health outcomes such as (A) rates of suicide, suicide attempts, incidence and prevalence of SMIs, SEDs, and substance use disorders, overdose, overdose deaths, emergency hospitalizations, emergency room boarding, preventable emergency room visits, interaction with the criminal justice system, homelessness, and unemployment; (B) increased rates of employment and enrollment in educational and vocational programs; (C) quality of mental and substance use disorders treatment services; or (D) any other criteria as may be determined by the Secretary. Finally, the ISMICC will make specific recommendations for actions that agencies can take to better coordinate the administration of mental health services for adults with SMI or children with SED.
