Needs and Uses: Given the devastating effects of Military Sexual Trauma (MST) and limited information on male MST specifically, the U.S. Congress specified a requirement to improve the prevention of and response to sexual trauma affecting male service members in the National Defense Authorization Act for Fiscal Year 2016 (Pub. L. 114-92). Furthermore, the DoD developed a formalized plan of action to improve prevention and response efforts for male MST. Despite these efforts and consistent with prior research, DoD reports found that active duty men are substantially less likely to report MST relative to active duty women counterparts. As part of the DoD-wide effort to promote help-seeking for sexual assault survivors, the DoN Office of Force Resiliency (OFR) developed and recently updated the Prevention Plan of Action (PPoA) (aka Prevention Plan of Action 2.0, 2022-2024; PPoA 2.0). The PPoA 2.0 is a strategy framework leveraging public health science in military environments to prevent sexual assault in the military and improve response efforts. As part of this initiative, OFR commissioned this study (Agreement #NMR-24-11717) to investigate the help-seeking among men who experienced military sexual

violence (*i.e.*, sexual assault or sexual harassment). The present study addresses this requirement by conducting interviews with men who have experienced military sexual violence.

Affected Public: Individuals or households.

Frequency: Once.

BILLING CODE 3810-FF-P

DEPARTMENT OF ENERGY

Record of Decision: Issuance of a Loan Guarantee to Holtec Palisades, LLC for General Restoration and Maintenance Activities of the Palisades Nuclear Plant

AGENCY: Loan Programs Office (LPO), U.S. Department of Energy.

ACTION: Record of decision (ROD).

SUMMARY: The U.S. Department of Energy (DOE) announces its decision to issue a loan guarantee under the Energy Policy Act of 2005 (EPA 2005), as amended, specifically the Energy Infrastructure Reinvestment Program, to Holtec Palisades, LLC., (Holtec) for general restoration and maintenance activities (Project), consistent with the Nuclear Regulatory Commission (NRC) Renewed Facility Operating License Number DPR-20. The general

restoration and maintenance activities would support the potential future resumption of power generation activities at the Palisades Nuclear Plant (Palisades or PNP), an 800-MW electric nuclear generation station in Covert Township, Michigan. Holtec has initiated an exemption request, a license transfer request, and license amendment requests with NRC, that, if approved, would allow the resumption of power generation and operation until 2031, and Holtec intends to submit a subsequent license extension request to the NRC to allow power generation from 2031 to 2051.

ADDRESSES: Copies of this ROD and the Final EIS may be obtained by accessing these documents and additional information about DOE's Loan Programs website at <https://www.energy.gov/lpo/eis-0562-palisades-nuclear-restart-project-van-buren-county-michigan>, or LPO's NEPA Program website at <https://www.energy.gov/lpo/environmental-compliance-1>.

FOR FURTHER INFORMATION CONTACT:

Alicia Williamson, NEPA Document Manager, Technical and Environmental Division, Loan Programs Office (LP-30), U.S. Department of Energy, 1000 Independence Ave. SW, Washington, DC 20585, telephone (202) 586-7272; email Alicia.Williamson@hq.doe.gov.

SUPPLEMENTARY INFORMATION: The environmental impacts of general restoration and maintenance activities at PNP were analyzed pursuant to the National Environmental Policy Act (NEPA) in the *DOE/EIS-0562: Final Environmental Impact Statement, Proposed Palisades Nuclear Restart Project, Van Buren County, Michigan* (89 FR 53659, June 27, 2024).

The Project would entail general restoration and maintenance activities at PNP, consistent with the NRC Renewed Facility Operating License Number DPR-20. DOE LPO's review and adoption of the NRC NEPA documents covers only general restoration and maintenance activities, and the potential use of a DOE loan guarantee for PNP refueling, power ascension, and power generation would not occur until the completion of the NRC NEPA evaluation analyzing the same.

NEPA Review: Prior to DOE LPO consideration of a loan guarantee for the Project, PNP ceased operations, the nuclear fuel was removed, and PNP entered decommissioning mode in May 2022. The nuclear fuel was placed in the established onsite spent fuel pool, but no structural dismantling of PNP has occurred, and the equipment is still in place and intact. Palisades was acquired by Holtec in June 2022, who now
