II. Background

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. chapter 35), the NRC is requesting public comment on its intention to request the OMB’s approval for the information collection summarized as follows.

1. *The title of the information collection:* Standards for Protection Against Radiation.
2. *OMB approval number:* 3150–0014.
3. *Type of submission:* Extension.
4. *The form number, if applicable:* Not applicable.

5. *How often the collection is required or requested:* Annually for most reports and at license termination for reports dealing with decommissioning.

6. *Who will be required or asked to respond:* NRC licensees and Agreement State licensees, including those requesting license terminations. Types of licensees include civilian commercial, industrial, academic, and medical users of nuclear materials. Licenses are issued for, among other things, the possession, use, processing, handling, and importing and exporting of nuclear materials, and for the operation of nuclear reactors.

7. *The estimated number of annual responses:* 53,483 (6,219 NRC licensees + 47,264 Agreement State licensees).

8. *The estimated number of annual respondents:* 25,826 (3,003 NRC licensees + 22,823 Agreement State licensees).

9. *The estimated number of hours needed annually to comply with the information collection requirement or request:* 787,286 (91,545 NRC licensees + 695,741 Agreement State licensees).

10. *Abstract:* Part 20 of title 10 of the *Code of Federal Regulations*, “Standards for Protection Against Radiation” establishes standards for protection against ionizing radiation resulting from activities conducted under licenses issued by the NRC and by Agreement States. These standards require the establishment of radiation protection programs, maintenance of radiation protection records, recording of radiation received by workers, reporting of incidents which could cause exposure to radiation, submittal of an annual report to NRC and to Agreement States of the results of individual monitoring, and submittal of license termination information. These mandatory requirements are needed to protect occupationally exposed individuals from undue risks of excessive exposure to ionizing radiation and to protect the health and safety of the public.
