- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

*Abstract:* Over the next three years, CRS and its evaluation contractor, Mathematica, anticipate collecting participant feedback for assessing ongoing programs across several areas within community outreach. The purpose of these collections is to gather feedback from participants who attended CRS programs and to use that information to assess participant satisfaction and implementation of the programs. The work may entail redesigning and/or modifying existing

programs based upon received feedback. CRS envisions using surveys via both electronic data collection and paper instruments.
