SUPPLEMENTARY INFORMATION:

I. Background

On August 31, 2020, Secretary's Order 3384 directed the realignment of the OST within the Office of the Secretary (OS) into the new Bureau of Trust Funds Administration (BTFA) under the Assistant Secretary—Indian Affairs, effective October 1, 2020. The mission of the BTFA is to manage the trust beneficiaries' financial assets, which is integrally related to DOI's goal of

meeting its trust responsibilities to American Indians. The BTFA assumed the responsibility for two systems of records previously managed by OST, the INTERIOR/OS-02, Individual Indian Money (IIM) Trust Funds, and the INTERIOR/OS-03, The Box Index Search System (BISS), systems of records notice (SORN). The INTERIOR/OS-3, The Box Index Search System (BISS), is being renamed as INTERIOR/BTFA-02, Box Index Search System (BISS), to reflect the new BTFA organization and is being renumbered as the second system of records maintained by BTFA. BTFA will also publish a separate revised notice for the INTERIOR/OS-02, Individual Indian Money (IIM) Trust Funds, SORN in the **Federal Register**.

The BISS enables centralized management of access to inactive historical records dating back to the 1850's that are retired to the American Indian Records Repository (AIRR) and provides the capacity to (1) create file level listings of the content of boxes containing inactive historical records retired to AIRR as a quick finding aid in the form of an index, (2) provide authorized users with a tool to search a file level index of all inactive historical records, (3) support requests for copies of historical records received from the original record owners, and conduct research in response to requests made under the Freedom of Information Act (FOIA) and in support of litigation, and (4) track box inventories that accession retired inactive historical records into the National Archives and Records Administration (NARA).

The BISS serves as an indexing system locator tool and does not contain copies or contents of the original program files that are transferred from the originating office to the AIRR. The inactive historical records are owned by the originating office where the original records were created and are covered by applicable SORNs that cover the Privacy Act records. Requests for Privacy Act access to inactive historical records are processed in collaboration with the AIRR and the originating office as the data owner. The INTERIOR/OS-03, The Box Index Search System (BISS), system notice was last published in the **Federal Register** at 70 FR 43899 (July 29, 2005); modification published at 73 FR 8342 (February 13, 2008).

DOI is publishing this revised notice to reflect the BTFA management of the system; update the system location, system manager, and authorities for maintenance of the system; expand on categories of individuals and categories of records covered by the modified system, add a new section to describe

the purpose of the system, update the records source categories, storage, safeguards, and the retention and disposal of records sections; update the record access, contesting record, and notification procedures; and provide general administrative updates in accordance with the OMB Circular A-108, *Federal Agency Responsibilities for Review, Reporting, and Publication Under the Privacy Act*. Additionally, DOI is changing the routine uses from a numeric to an alphabetic list and is proposing to add new routine uses and modify existing routine uses to provide clarification and transparency and reflect updates consistent with standard DOI routine uses, facilitate the sharing of information when necessary to carry out the purpose of the system or promote the integrity of the records, or carry out a statutory responsibility of the DOI or Federal Government.

Routine use A has been modified to further clarify disclosures to the Department of Justice or other Federal agencies as necessary in relation to litigation or judicial hearings. Routine use B has been modified to clarify disclosures to a congressional office to respond to or resolve an individual's request made to that office. Routine use D has been modified to allow DOI to share information with other agencies when there is an indication of a violation of law. Routine use E has been modified to allow DOI to share information with other Federal agencies to assist in the performance of their responsibility to ensure records are accurate and complete, and to respond to requests from individuals who are the subject of the records. Routine use G was slightly modified to update legal authority for disclosures to NARA to perform oversight of records management functions. Routine use H has been modified to add territorial governments to the sharing of information in response to court orders or for discovery purposes related to litigation. Routine use I has been modified to include the sharing of information with grantees and shared service providers performing services for DOI who require access to records to carry out the purposes of the system. Modified routine use J and new routine use K allow DOI to share information with appropriate Federal agencies or entities when reasonably necessary to respond to a breach of personally identifiable information and to prevent, minimize, or remedy the risk of harm to individuals or the Federal Government resulting from a breach, in accordance with OMB Memorandum M-17-12, *Preparing for and Responding to a*

Breach of Personally Identifiable Information. Routine use P has been modified to further clarify disclosures to authorized external entities for the purpose of researching records maintained by the system and conducting on-site research of the underlying files at the AIRR.

Proposed routine use C permits sharing of information with the Executive Office of the President to respond to an inquiry by the individual to whom the record pertains. Proposed routine use F allows DOI to share information with agencies when relevant for hiring, firing, and retention, or issuance of a security clearance, license, contract, grant or other benefit. Proposed routine use L allows DOI to share information with OMB during the coordination and clearance process in connection with legislative affairs. Proposed routine use M allows DOI to share information with the Department of Treasury to recover debts owed to the United States. Proposed routine use N allows DOI to share information with the news media and the public when there is a legitimate public interest in the disclosure of the information.

II. Privacy Act

The Privacy Act of 1974, as amended, embodies fair information practice principles in a statutory framework governing the means by which Federal agencies collect, maintain, use, and disseminate individuals' records. The Privacy Act applies to records about individuals that are maintained in a "system of records." A "system of records" is a group of any records under the control of an agency from which information is retrieved by the name of an individual or by some identifying number, symbol, or other identifying particular assigned to the individual. The Privacy Act defines an individual as a United States citizen or lawful permanent resident. Individuals may request access to their own records that are maintained in a system of records in the possession or under the control of DOI by complying with DOI Privacy Act regulations at 43 CFR part 2, subpart K, and following the procedures outlined in the Record Access, Contesting Record, and Notification Procedures sections of this notice.

The Privacy Act requires each agency to publish in the **Federal Register** a description denoting the existence and character of each system of records that the agency maintains and the routine uses of each system. The INTERIOR/BTFA-02, Box Index Search System (BISS), system of records is published in its entirety below. In accordance with 5 U.S.C. 552a(r), DOI has provided a

report of this system of records to the Office of Management and Budget and to Congress.

III. Public Participation

You should be aware your entire comment including your personally identifiable information, such as your address, phone number, email address, or any other personal information in your comment, may be made publicly available at any time. While you may request to withhold your personally identifiable information from public review, we cannot guarantee we will be able to do so.

Copies of records related to vital record backups are covered by DRS 1.4.0013, Short-term Information Technology Records, and System Security records are covered by DRS 1.4.0014, System Planning, Design, and Documentation. The disposition for records that are covered by DRS 1.4.0013 and DRS 1.4.0014 is temporary. These records are destroyed/deleted 3 years after cut-off. Approved destruction methods for temporary records that have met their retention period include NARA guidelines and Departmental policy.

ADMINISTRATIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS:

The records contained in this system are safeguarded in accordance with 43 CFR 2.226 and other applicable security and privacy rules and policies. During normal hours of operation, paper records are maintained in locked file cabinets under the control of authorized personnel. Computer servers on which electronic records are stored are located in secured DOI controlled facilities with physical, technical and administrative levels of security to prevent unauthorized access to the DOI network and information assets. Access granted to authorized personnel is password-protected, and each person granted access to the system must be individually authorized to use the system. A Privacy Act Warning Notice appears on computer monitor screens when records containing information on individuals are first displayed. Data exchanged between the servers and the system is encrypted. Backup tapes are encrypted and stored in a locked and controlled room in a secure, off-site location.

Computerized records systems follow the National Institute of Standards and Technology privacy and security standards as developed to comply with the Privacy Act of 1974, as amended, 5 U.S.C. 552a; Paperwork Reduction Act of 1995, 44 U.S.C. 3501 *et seq.*; Federal Information Security Modernization Act of 2014, 44 U.S.C. 3551 *et seq.*; and the Federal Information Processing Standards 199: Standards for Security Categorization of Federal Information and Information Systems. Security controls include user identification, passwords, database permissions, encryption, firewalls, audit logs, network system security monitoring, and software controls.

Access to records in the system is limited to authorized personnel who
