

(3) 0960-0444/SSA-8001, Application for Supplemental Security Income (Deferred or Abbreviated)

SSA uses this shortened version of the SSI application to determine an applicant’s potential eligibility for SSI, specifically to (1) provide a formal notification when non-medical information the applicant provides results in ineligibility; or (2) defer the complete development of non-medical issues until the DDS approves the medical portion of the disability process.

Specifically, SSA technicians use the SSA-8001 when the filing respondents seem to meet the non-medical eligibility requirements for at least one month and SSA can defer other development until the respondent receives a notice of medical allowance. After the initial interview and upon receiving medical allowance, technicians contact respondents who filed for SSI using the SSA-8001 to develop any deferred issues and update the information about income and resources from the time the respondent filed the application up to

the month the respondent received SSA’s approval. At that point, SSA technicians use the Intranet version of the SSA-8000 to develop the remaining necessary information (from the perspective of the applicant, through a personal interview).

SSA anticipates that the majority of respondents for the new iSSI would have otherwise completed the SSA-8001. Accordingly, we are revising the burden for the SSA-8001 to reflect this reduction:

Modality of completion	Number of respondents	Frequency of response	Average burden per response (minutes)	Estimated total annual burden (hours)	Average theoretical cost amount (dollars) *	Average wait time in field office or for teleservice centers (minutes) **	Total annual opportunity cost (dollars) ***
Intranet CCE or SSI Claims System	426,388	1	28	198,981	* \$22.39	** 19	*** \$7,478,350
Internet Claim System (iSSI) First party	+ 76,500	1	6	7,650	* 22.39	*** 171,284
Internet Claim System (iSSI)							
Third party	+ 71,000	1	6	7,100	* 22.39	*** 158,969
SSA-8001 (Paper Version)	38,304	1	28	17,875	* 22.39	** 19	*** 671,812
Total	612,192	231,606	*** 8,480,415

+ We are not double counting the number of respondents in this ICR, as we do not account for the iSSI (iClaim) respondents under 0960-0618, we only account for them here.

* We based this figure by averaging both the average DI payments based on SSA’s current data (<https://www.ssa.gov/legislation/2024FactSheet.pdf>), and the average U.S. worker’s hourly wages, as reported by Bureau of Labor Statistics data (https://www.bls.gov/oes/current/oes_nat.htm).

** We based this figure on averaging both the average FY 2024 wait times for field offices and teleservice centers, based on SSA’s management information data.

*** This figure does not represent actual costs that SSA is imposing on recipients of Social Security payments to complete this application; rather, these are theoretical opportunity costs for the additional time respondents will spend to complete the application. *There is no actual charge to respondents to complete the application.*

What will the benefits of iSSI be in comparison to our current processes?

- iSSI will be much *simpler* than the current process for the early stages of the SSI application process. Rather than completing a paper form, calling or visiting a field office to preserve a protective filing date, or assembling significant amounts of information to begin an application, the applicants will now just need to start the online DIB application process and answer the new iSSI basic eligibility questions. Once SSA receives the answers to the questions, we will determine whether further development is needed, and will contact the claimant if necessary.

- iSSI will also be more *convenient and somewhat faster* than the initial stages of the current application process. Primarily, this is because the iClaim system pre-populates information from SSA’s records for authenticated applicants that the applicant might otherwise have needed to provide. As well, iSSI will seamlessly move the applicant on to the other next steps described above (e.g., completion of the i3368). Moreover, applicants will save time that might have been required for a field office visit or a phone appointment.

- Finally, iSSI will, for the first time, offer an *electronic option to non-U.S.*

citizens. Currently, a non-U.S. citizen is told they will be contacted by an SSA employee to initiate an application. With iSSI, we will be able to utilize citizenship and country information from SSA’s records for authenticated applicants.

Tasha Harley,
Acting Reports Clearance Officer, Social Security Administration.
