On February 20, 2024, and supplemented on May 20, May 28, July 2, and July 3, 2024, Santa Clara Valley Water District (applicant) filed an application to retrofit the dam and to surrender the project exemption for the Anderson Dam Hydroelectric Project No. 5737. The staff of the Federal Energy Regulatory Commission (FERC or Commission) will prepare a document in accordance with the National Environmental Policy Act (NEPA) that will discuss the environmental impacts of the proposed dam retrofit and surrender of the project exemption for the Anderson Dam Hydroelectric Project located on Coyote Creek, in Santa Clara County, California (NEPA document). The Commission will use this NEPA document in its decision-making process to identify potential adverse and beneficial impacts of the proposed project surrender and reasonable alternatives.

This notice initiates the start of a scoping process the Commission will use to gather input from the public and interested agencies about issues regarding the project. As part of the NEPA review process, the Commission takes into account concerns the public may have about proposals and the environmental impacts that could result from its action. This process is referred

to as "scoping." The main goal of the scoping process is to focus the analysis in the NEPA document on the important environmental issues. Additional information about the Commission's NEPA process is described below in the *NEPA Process* section of this notice.

By this notice, the Commission staff requests public comments on the scope of issues to address in the NEPA document.
