[Docket No. FWS–R4–ES–2024–0135; FXES1114040000–245–FF04EG1000]

**Receipt of Incidental Take Permit Application and Proposed Habitat Conservation Plan for the Eastern Indigo Snake; Turner County, GA; Categorical Exclusion**

**AGENCY:** Fish and Wildlife Service, Interior.

**ACTION:** Notice of availability; request for comments and information.

**SUMMARY:** We, the Fish and Wildlife Service (Service), announce receipt of an application from Double Run Solar, LLC (applicant) for an incidental take permit (ITP) under the Endangered Species Act. The applicant requests the ITP to take the federally listed threatened Eastern indigo snake incidental to the construction and operation of a solar facility in Turner County, Georgia. We request public

comment on the application, which includes the applicant’s proposed habitat conservation plan (HCP), and on the Service’s preliminary determination that the proposed permitting action may be eligible for a categorical exclusion pursuant to the Council on Environmental Quality’s National Environmental Policy Act (NEPA) regulations, the Department of the Interior’s (DOI) NEPA regulations, and the DOI Departmental Manual. To make this preliminary determination, we prepared a draft environmental action statement and low-effect screening form, both of which are also available for public review. We invite comment from the public and local, State, Tribal, and Federal agencies.

**DATES:** We must receive your written comments on or before October 7, 2024.

**ADDRESSES:**

*Obtaining Documents:* The documents this notice announces, as well as any comments and other materials that we receive, will be available for public inspection online in Docket No. FWS–R4–ES–2024–0135 at <https://www.regulations.gov>.

*Submitting Comments:* If you wish to submit comments on any of the documents, you may do so in writing by one of the following methods:

- *Online:* <https://www.regulations.gov>. Follow the instructions for submitting comments on Docket No. FWS–R4–ES–2024–0135.
- *U.S. mail:* Public Comments Processing, Attn: Docket No. FWS–R4–ES–2024–0135; U.S. Fish and Wildlife Service, MS: PRB/3W, 5275 Leesburg Pike, Falls Church, VA 22041–3803.

**FOR FURTHER INFORMATION CONTACT:** Michele Elmore, Georgia Ecological Services Field Office, by U.S. mail (see **ADDRESSES**), by phone at 706–613–9493, or via email at [GAES\\_assistance@fws.gov](mailto:GAES_assistance@fws.gov). Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services.

Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

**SUPPLEMENTARY INFORMATION:** We, the Fish and Wildlife Service (Service), announce receipt of an application from Double Run Solar, LLC (applicant) for an incidental take permit (ITP) under the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*). The applicant requests the ITP to take the federally listed threatened Eastern indigo snake (*Drymarchon couperi*) incidental to the construction and operation of a solar facility in Turner County, Georgia. We request public comment on the application, which includes the applicant’s HCP, and on the Service’s preliminary determination that this proposed ITP qualifies as low effect, and may qualify for a categorical exclusion pursuant to the Council on Environmental Quality’s National Environmental Policy Act (NEPA) regulations (40 CFR 1501.4), the Department of the Interior’s (DOI) NEPA regulations (43 CFR 46), and the DOI’s Departmental Manual (516 DM 8.5(C)(2)). To make this preliminary determination, we prepared a draft environmental action statement and low-effect screening form, both of which are also available for public review.

**Proposed Project**

The applicant requests a 10-year ITP to take three Eastern indigo snakes and two nests via the conversion of approximately 768.8 acres (ac) of occupied nesting, foraging, and sheltering habitat incidental to the construction and operation of a solar facility on a 2,037-ac parcel. The parcel is mostly on the north side of Georgia State Route 90 and east side of Georgia State Route 159, approximately 2 miles northwest of the city of Rebecca, Georgia. The applicant proposes to avoid and minimize take of the species to the greatest extent possible by

implementing the Service's standard protection measures for the Eastern indigo snake during implementation of activities associated with the construction and operation of the solar facility. The applicant proposes to mitigate for take of the Eastern indigo snake by contributing \$403,620.00 to the Wildlife Foundation of Florida's Eastern Indigo Snake Conservation Fund. These funds will be used for the management or restoration of Eastern indigo snake habitat, purchase of occupied habitat, purchase of development rights of occupied habitat, or a combination thereof, in Georgia. The Service would require the applicant to provide the contribution of the funds prior to engaging in any phase of the project.

#### Our Preliminary Determination

The Service has made a preliminary determination that the applicant's proposed project, including the construction and operation of the solar facility, would individually and cumulatively have a minor effect on the Eastern indigo snake and the human environment. Therefore, we have preliminarily determined that the proposed ESA section 10(a)(1)(B) permit would be a low-effect ITP that individually or cumulatively would have a minor effect on Eastern indigo snakes and may qualify for application of a categorical exclusion pursuant to the Council on Environmental Quality's NEPA regulations, DOI's NEPA regulations, and the DOI Departmental Manual. A low-effect ITP is one that would result in (1) minor or nonsignificant effects on species covered in the HCP; (2) nonsignificant effects on the human environment; and (3) impacts that, when added together with the impacts of other past, present, and reasonable foreseeable actions, would not result in significant cumulative effects to the human environment.

#### Next Steps

The Service will evaluate the application and the comments to determine whether to issue the requested ITP. We will also conduct an intra-Service consultation pursuant to section 7 of the ESA to evaluate the effects of the proposed take. After considering the preceding and other matters, we will determine whether the permit issuance criteria of section 10(a)(1)(B) of the ESA have been met. If met, the Service will issue ITP number PER 11935051 to Double Run Solar, LLC.

#### Public Availability of Comments

Before including your address, phone number, email address, or other personal identifying information in your comment, be aware that your entire comment, including your personal identifying information, may be made available to the public. If you submit a comment at <https://www.regulations.gov>, your entire comment, including any personal identifying information will be posted on the website. If you submit a hardcopy comment that includes personal identifying information, such as your address, phone number, or email address, you may request at the top of your document that we withhold this information from public review. However, we cannot guarantee that we will be able to do so. Moreover, all submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, will be made available for public disclosure in their entirety.

#### Authority

The Service provides this notice under section 10(c) of the Endangered Species Act (16 U.S.C. 1531 *et seq.*) and its implementing regulations (50 CFR 17.32) and the National Environmental Policy Act (42 U.S.C. 4321 *et seq.*) and its implementing regulations (40 CFR 1500–1508 and 43 CFR 46).

#### Peter Maholland,

Field Supervisor, Georgia Ecological Services Office.

#### Record of Decision for the Barred Owl Management Strategy; Washington, Oregon, and California

**AGENCY:** Fish and Wildlife Service, Interior.

**ACTION:** Notice of availability; record of decision.

**SUMMARY:** The U.S. Fish and Wildlife Service (Service) announces the availability of a record of decision (ROD) for the final environmental impact statement for the Barred Owl Management Strategy (strategy) in Washington, Oregon, and California. With this notice, we also make available

the final strategy. The ROD documents the Service's decision to select the preferred alternative to address the threat that the nonnative and invasive barred owl (*Strix varia*) poses to the northern spotted owl (*Strix occidentalis caurina*) and the California spotted owl (*Strix occidentalis occidentalis*).

**ADDRESSES:** You may obtain copies of the ROD and other documents associated with the decision by any of the following methods:

- **Internet:** <https://www.regulations.gov> (search for Docket No. FWS–R1–ES–2022–0074) or at <https://www.fws.gov/project/barred-owl-management>.

- **Upon Request:** You may request alternative formats of the documents directly from the Service (see **FOR FURTHER INFORMATION CONTACT**).

**FOR FURTHER INFORMATION CONTACT:** Robin Bown, U.S. Fish and Wildlife Office, Oregon Fish and Wildlife Office, by telephone at 503–231–6923, or by email at [robin\\_bown@fws.gov](mailto:robin_bown@fws.gov). Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

**SUPPLEMENTARY INFORMATION:** The U.S. Fish and Wildlife Service (Service) announces the availability of its record of decision (ROD) for the final environmental impact statement (EIS) for the Barred Owl Management Strategy (strategy) in Washington, Oregon, and California developed in compliance with agency decision-making requirements of the National Environmental Policy Act of 1969, as amended (NEPA). Implementation of the selected strategy focuses on the removal of the nonnative and invasive barred owl populations in identified management areas in Washington, Oregon, and California. Where barred owls are in the early stages of invasion, such as in the California spotted owl's range, the strategy allows for removal of all barred owls in order to prevent establishment of barred owl populations. The barred owl is protected under the Migratory Bird Treaty Act (MBTA; 16 U.S.C. 703–712), which prohibits take of protected migratory bird species unless authorized by the Service through permit or regulation (50 CFR 21.10). This decision includes issuance of a Migratory Bird Special Purpose permit under the Migratory Bird Treaty Act (MBTA).
