SUPPLEMENTARY INFORMATION:

I. Background

The CRPS Directorate consists of various applications that support programs under an Associate Director, including the Technical Preservation Services (TPS) Office, National Register of Historic Places and National Historic Landmarks Programs (NR/NHL), Park Archeology Program, Cultural Landscapes, Historic and Prehistoric Structures, and State, Tribal, Local Governments Program, and Tribal Relations and American Cultures. The INTERIOR/NPS–35, Cultural Resource Applications System, system of records provides the NPS CRPS Directorate program managers the ability to centrally manage processes from several program areas. The system helps NPS track, manage, comment and report on grant applications; manage and report on National Register resources in an effective and timely manner; track the processing of applications for Federal income tax incentives for historic preservation; manage NPS's official inventory of cultural resource sites in parks; provide Historic Preservation Offices the ability to report program and financial activities; provide the Native American Graves Protection and Repatriation Act (NAGPRA) Program the ability to track and process data related areas of program work; handle submission, collection, reviewing of the application process and track its progress; create reports, and provide audit documentation; and comply with legal and regulatory requirements for cataloging and reporting on cultural resources and historic properties. To the extent permitted by law, information may be shared with Federal, State, local, Tribal agencies, members of the public, and organizations as authorized and compatible with the purpose of this system, or when proper and necessary, consistent with the routine uses set forth in this system of records notice (SORN).

II. Privacy Act

The Privacy Act of 1974, as amended, embodies fair information practice principles in a statutory framework governing how Federal agencies collect, maintain, use, and disseminate individuals' records. The Privacy Act applies to records about individuals that are maintained in a "system of records." A "system of records" is a group of any

records under the control of an agency from which information is retrieved by the name of an individual or by some identifying number, symbol, or other identifying particular assigned to the individual. The Privacy Act defines an individual as a United States citizen or lawful permanent resident. Individuals may request access to their own records that are maintained in a system of records in the possession or under the control of DOI by complying with DOI Privacy Act regulations at 43 CFR part 2, subpart K, and following the procedures outlined in the Records Access, Contesting Record, and Notification Procedures sections of this notice.

The Privacy Act requires each agency to publish in the **Federal Register** a description denoting the existence and character of each system of records that the agency maintains, and the routine uses of each system. The INTERIOR/NPS–35, Cultural Resource Applications System, SORN is published in its entirety below. In accordance with 5 U.S.C. 552a(r), DOI has provided a report of this system of records to the Office of Management and Budget and to Congress.

III. Public Participation

You should be aware your entire comment including your personally identifiable information, such as your address, phone number, email address, or any other personal information in your comment, may be made publicly available at any time. While you may request to withhold your personally identifiable information from public review, we cannot guarantee we will be able to do so.

POLICIES AND PRACTICES FOR STORAGE OF RECORDS:

Paper records are stored in locked file cabinets in locked offices. Electric records are stored on file servers which is hosted by the NPS data center.

POLICIES AND PRACTICES FOR RETRIEVAL OF RECORDS:

Records in this system are retrieved by various fields including the first name, last name of an individual, name of a historic property, property location, and NPS system-assigned project number.

POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:

Records in this system are retained in accordance with the NPS Records Schedule, Resource Management and Lands, which has been approved by the National Archives and Records Administration (NARA) (Job No. NI-79-08-01), for records documenting the acquisition, planning, management, and protection of lands and natural and cultural resources under the stewardship of NPS. The disposition for records in the system is permanent and records are transferred to permanent special media and electronic records along with any finding aids or descriptive information (including linkage to the original file), and related documentation by calendar year to the National Archives when 3 years old. Digital records will be transferred according to standards applicable at the time. All other permanent records are transferred to NARA 7 years after closure.

ADMINISTRATIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS:

The records contained in this system are safeguarded in accordance with 43 CFR 2.226 and other applicable security and privacy rules and policies. Paper records are maintained in locked file cabinets in locked offices under the control of authorized personnel. Computer servers on which electronic records are stored and located are in secured DOI controlled areas with physical, technical, and administrative levels of security to prevent unauthorized access to the DOI network and information assets.

Computerized records systems follow the National Institute of Standards and Technology privacy and security standards as developed to comply with the Privacy Act of 1974, as amended, 5 U.S.C. 552a; Paperwork Reduction Act of 1995, 44 U.S.C. 3501 *et seq.*; Federal Information Security Modernization Act

of 2014, 44 U.S.C. 3551 *et seq.*; and the Federal Information Processing Standards 199: Standards for Security Categorization of Federal Information and Information Systems. Security controls include user identification, passwords, database permissions, encryption, firewalls, audit logs, and network system security monitoring, and software controls.

The system is accessed by NPS authorized employees, contractors, and volunteers (collectively, NPS users) using the Personal Identity Verification (PIV) credentials and DOI Active Directory for authentication and role/permission management. NPS users must complete a background check and are required to sign the DOI Rules of Behavior and must complete security and privacy training prior to accessing the DOI computer system or network. A Privacy Impact Assessment was conducted on the Cultural Resource Applications System to ensure that Privacy Act requirements are met, and appropriate privacy controls were implemented to safeguard the personally identifiable information contained in the system.

Government user access will be authorized according to their role and permissions using a formal process for ensuring least privilege access is maintained before their accounts are created through the Role Based Access Control (RBAC) system. Government users will authenticate to RBAC using the applicable agency identity provider (*e.g.*, Active Directory Federated Services for DOI) and their issued PIV card. The system uses audit logs to protect against unauthorized access, changes or use of data.

Non-NPS users, including users from other Federal agencies, State governments, local governments, Tribal organizations, universities, or the general public, must first obtain approval from program managers and register to have a user account created. The system user management tools provide multifactor authentication using a valid email account and a temporary encrypted account confirmation code. The system can be accessed through NPS public and internal network portals. Access to data is restricted to authorized personnel who require access to perform their official duties. Access to administrative functions is strictly controlled.

For all users, the permissions will determine what function the user may execute in the system and define what records the user can enter, edit, read, or delete. System administrators are required to view usernames and permissions for troubleshooting and for

system maintenance purposes. NPS employees and contractors with privileged accounts will be subject to routine auditing to ensure compliance with policies and procedures for managing data confidentiality and integrity. System administrators periodically review audit logs to prevent unauthorized monitoring for all users based on authorized and assigned roles and permissions.
